Inquiry is the online, multi-disciplinary undergraduate research journal of the University of New Hampshire. It offers undergraduate researchers in all disciplines the opportunity to communicate their experiences and results to general as well as academic audiences worldwide—the final and very important step in the research process. The journal accepts submissions for research articles, commentaries, and research briefs from current and recently graduated students of UNH only. Inquiry is published biannually by the Hamel Center for Undergraduate Research. Contact the editors at editor.inquiry@unh.edu if you are interested in being published or in becoming a student editor.

Inquiry was made possible by a generous endowment from Mr. Dana Hamel.

Inquiry 2021-2022 Editorial Staff
Publisher:
Paul C. Tsang, Ph.D.
