ATLAS
ACCOMPANYING THE REPORT ON THE
GEOLOGY
OF
NEW HAMPSHIRE
C. H. HITCHCOCK
STATE GEOLOGIST.
1878.

JULIAN'S BISH. NEW YORK.

3. Panoramic Views from several White Mountain Summits, from free-hand sketches.

4. Panoramic Views from Mountain Summits, by Camera.

5. Topography, Contour Lines, and Geography of New Hampshire, with portions of the adjoining territory on all sides. Fourteen geological sections are attached. The horizontal scale is two and a half miles to the inch; contour lines for every one hundred feet altitude, and for every fifty feet in parts of Coos and Cheshire Counties.

6. Illustrating the Surface Geology of New Hampshire.

This is the most complete and carefully executed series of Geological Maps yet executed under State authority. Prof. Hitchcock has had the concurrent assistance of the United States Coast Survey in extending the triangulation over the whole State.

PRICE, TEN DOLLARS.

The volume is too large to be sent by mail, but will be delivered to the express, either in Concord, Boston or New York, as may be wished by the subscriber.

Price, Vols. I and II, Geological Survey, quarto, illustrated, half goat, $10 each.
