COUNTY COMMISSIONERS' REPORT.

In compliance with the laws of the State, the subscribers, Commissioners for Hillsborough County, herewith present their Annual Report of the Financial affairs of the County, so far as we have any control of the expenditures, for the year ending January 17, 1865.

There has been no year since the County Farm was purchased to compare with the past year so far as relates to the great increased cost of every article of consumption, clothing and fuel, requisite and necessary for the support and maintenance of the county paupers. Although the expenditures for the year past for the support of paupers at the almshouse has been slightly increased, yet not in proportion to the increased cost of all articles of consumption used here.

The Farm has been less productive this year in consequence of the great drouth of the season. The crop of hay was very light indeed.

There has been built the past year fifty-eight rods thick stone wall, substantial and permanent; also, twenty-five rods common stone wall. The reservoir from which the buildings and boiler are supplied with water, has been very much enlarged during the dry season, and will in future afford a sufficient supply of excellent water for family purposes. The improvements generally upon the farm and buildings this year have been very creditable to the Superintendent, Mr. GEO. G. BUMPUS, whom

we are happy to say has faithfully and successfully discharged the arduous and important duties of his station to our satisfaction, and with profit to the county.

Mr. FRANK S. DODGE, the Assistant Superintendent, is entitled to and deserving of our confidence and approbation for the able and faithful discharge of the difficult duties of his station.

The general arrangement and appearance of all the various departments of the house inside seem to be complete in every detail, exhibiting capacity, skill and industry; showing every one who visits here that the lady who presides has a place for everything and everything in its place; also, that the unfortunate poor who are compelled to seek a home here, are dealt with by kind hands and feeling hearts.

Chapter 2247 of the laws of the State, "authorizing the establishment of a school or schools at the Hillsborough County Farm," provides "that said Commissioners shall not expend annually more than seventy-five dollars for teachers' wages, exclusive of board." We have a very good school room at the almshouse, and the school is in successful operation. It will be observed by the figures following, that the average attendance is between thirty and forty scholars, and most of them are under the age of eleven years. It is apparent that the sum of seventy-five dollars a year is insufficient to procure suitable instruction for thirty or forty scholars. We earnestly hope that our County Representative Convention will, next June, use their influence to have the law amended, allowing the Commissioners to expend a larger sum for school purposes. Most of the school children can do but little or no work on the farm to advantage, and require an active, capable person to see to them,—to correct their habits and exercise a moral influence over them, preparing them to enter upon the active duties of life with good habits and characters early formed; thus conferring a great blessing upon the children and the community at large. By continuing the school nearly the whole year, less help will be required to take care of the children, and therefore will not increase the expenses at the Farm but a trifle, if any.

The school is under the instruction of Mrs. J. M. DODGE, who appears to have all the requisites of a good and successful teacher,—observing good order and discipline, taking a deep interest in promoting the welfare and prosperity of the school.—

With the opportunity we have had to judge, we think the scholars have made commendable progress in their studies,—perhaps as much as in primary schools in general.

During the freshet in March last, a large embankment of the N. H. Central Railroad was carried away, covering several acres of the best land of the farm with sand and rubbish,—in some places more than three feet deep—in consequence of which the course of the brook running through said land has been entirely changed. The piece thus injured is as good grass producing land as there is on the farm, and will be entirely worthless for all farming purposes until the sand and dirt is removed therefrom. We have the positive assurance of Hon. N. G. Upham and Hon. J. A. Gilmore, President and Superintendent of the road, that they will cause the same to be removed at an early day. We have no doubt the matter will be adjusted early in the spring.

STATEMENT NO. 3.

Total cash paid out at farm:

| | | |
|--|--|------------|
| Cash drawn from the treasury, | | \$9037 11 |
| Cash received from all other sources and expended at the farm, | | 3223 99 |
| | | <hr/> |
| Amount drawn and expended as above, | | \$12261 10 |
| Dividing by 138 2-13ths, the average weekly number, we have as the cost of each inmate one year, | | 88 74 |
| Dividing by 52, the number of weeks, we have as the average weekly cost, | | 1 70 |

It will be observed that the difference of forty-five cents in the weekly cost, as estimated by these three methods, is in consequence of there being a large quantity of provisions and clothing now on hand which was purchased with this money.

Statement No. 2 shows the exact amount drawn from the Treasury and the actual annual cost to the county of each inmate at Farm, excluding interest on the amount invested in real estate and personal property.
