—HEALTH BOARD REPORT—

The undersigned, Health Board of the town of Colebrook respectfully submit their first annual report.

The town and village have been remarkably free from typhoid fever during the past year, but seven cases having been reported. A few sporadic cases of chicken pox have existed from time to time. Six cases of scarlet fever have been reported with no deaths. Six cases of diphtheria have been reported during the past month of moderate severity and it was deemed of sufficient importance by the Health Board to close the public schools for two weeks. Owing to the rigid quarantine maintained in these cases it is doubtful if any wide spread epidemic will occur. The general sewerage system in the village while to a certain extent unsatisfactory and deficient, has been somewhat improved upon during the last year. The extension of the main street sewer emptying formerly at a point just below Gleason's bridge to a point several rods below, has removed a dangerous source of contagious annoyance from that section. The extension of the sewer on Spring St. has been of great benefit to residents of that section.

We respectfully recommend the further extension of our sewerage system, and as far as possible, the use of flush closets, thus removing a possible source of contagion.
