Public Library.

TO THE SELECTMEN OF THE TOWN OF LACONIA:

The Trustees of the Public Library present the following report:

The Library contains 2,651 volumes, classified as follows:

Juvenile,	375
Fiction,	887
History,	197
Travels and Descriptive,	144
Biography,	129
Miscellaneous and Complete Works,	249
Educational and Scientific,	167
Poetry and Drama,	62
Religious,	109
Reference,	52
Public Documents,	280
	<hr/>
	2,651

During the year 207 volumes have been purchased. Sixteen volumes have been donated.

Whole number of cards issued,	1,838
Greatest number of books taken out any day,	336
Average number taken each day,	191
Greatest number out at any time,	633
Average number out,	478

Of these the average each day has been as follows:

Juvenile,	30
Fiction,	117
Historical, Travels and Biography,	18

Miscellaneous and Complete,	13
Educational, Scientific and Religious,	11

A report of the financial condition of the Library is appended.

LACONIA, March 2, 1882.

We have examined the foregoing accounts and find them correctly cast and properly vouched.

GEO. L. MEAD, }
W. M. F. KNIGHT, } Auditors.

List of tools owned by highway district No. 1, March 1, 1882:

1 two horse sled,	9 large stone drills,
1 iron roller,	6 small stone drills,
4 snow scrapers,	1 pair pruning shears,
1 harrow,	4 grub hoes,
1 stone drag,	4 picks,
4 chains,	1 plow,
15 steel shovels,	1 steel bar,
3 steel rakes,	5 stone hammers,
1 ice crusher,	2 dirt scrapers,
3 gravel screens,	2 wheelbarrows,
1 bush scythe,	1 concrete roller,
1 four tined fork,	1 concrete heater,
	3 steel hoes.

Stock ready for future use:

190 loads stone, grade, etc.,	\$142 50
75 feet covering stone,	20 00
9 sewer caps,	8 00

In submitting the report of highway district No. 1 to the taxpayers of the town, I desire to express thanks for their kindness and indulgence as generally manifested since my connection with the affairs of the town, and especially my connection with the district as superintendent of streets. The district embraces about twenty-three miles of road-way, and about the same amount of side-walk. In submitting this report I feel at liberty to make some suggestions, and as I am not to be a candidate for re-election, and do not expect to remain in town, I think I can make the suggestions without being charged with selfish motives.

I would first recommend that the town instruct the selectmen to procure a stone-crusher. From the best information I can obtain there is no other way the town can procure suitable grade for our main streets as cheap and as durable as by crushed stone. I observe by reports from Street Commissioners and Street Superintendents (from all the large cities in this country) that they recommend for streets where the traffic is similar to ours, Macadam, and where the traffic is heavy, as on the commercial streets in the large cities, stone block paving. It is a fact well settled in the minds of thinking men that for our main streets something should be done to make the surface hard and free from mud. How can this be done as cheaply and as durable in any other way as it can by removing a portion of the mud and substituting crushed stone? The question has been asked "Is the piece of road already macadamized on Main street, a success?" I answer, yes. The only mud that is upon that section is drawn there by vehicles passing through the muddy street next to the macadamized portion, and depositing its mud on the hard surface of the macadamized portion. In my judgment it only requires the macadamization of the remaining portion of Main street, say from Lake to Pleasant streets, to satisfy the most skeptical.

I think the remaining portion can be macadamized (with the aid of a stone crusher) much less per yard than that which has already been done. I believe the dirt period in repairing our principal streets should pass away from Laconia, and something more sub-

stantial take its place. I also think the selectmen should buy for the use of the town one of Pennock's patent road machines, as much more road can be made and repaired with its aid for the same amount of money than can be made and repaired in the ordinary way.

For the past three years there has been laid, a large quantity of tile pipe, and I have great faith in it if properly laid, and frequent sewer caps connected therewith, so as to take away the surface water.

I do not wish to hamper my successor with any suggestions as to where such pipe should first be laid, as I trust his own judgment will be his best guide.

A large quantity of concrete sidewalk has been laid the past year, and I only regret that I have not been able to do more in this direction, as I consider it money well invested if properly laid on a good foundation. I should have accomplished more in concreting and macadamizing Main street the past year, but it will be remembered that we had a heavy freshet in July which caused heavy additional repairs to roads which had already been repaired, and owing to a lack of time, money and tar, I was obliged to abandon concreting for the season. However, if as much concrete sidewalk is laid the coming season as was laid last season, in one year Laconia can justly be proud of her concrete side-walks; and in this, as in the matter of laying tile pipe, I leave it to the better judgment of my successor to determine where it is first and most needed.

I can congratulate the district upon the excellent condition of its highways, but would recommend an increase instead of a decrease in the appropriation for repairs on highways and bridges, as some of the small districts in the back parts of the town do not have sufficient with the present appropriation to keep their roads in passable condition.

Hoping that my successor will receive the same kind and earnest support at the hands of his fellow citizens that I have received for the past three years, and assuring him that he will always have my best wishes and kindly sympathy, I close this report with thanks to my fellow townsmen for past favors.

Respectfully submitted,

P. C. SMITH, Supt. of Streets.

Report of School Committee.

I herewith submit the report of the schools in district No. 1 for the year ending March 1, 1882, as made by the Board of Education:

To the School Committee of the town of Laconia:

The Board of Education for School District No. 1 herewith submit their seventh annual report:

The number of schools and course of studies during the spring term, were the same as last year, but at the close of this term, it was evident from the crowded condition of the lower grades of schools, on the south side, that the time had come when necessity demanded an additional school-room, to correspond with the first primary on the north side. A meeting of the district was therefore called, and it was decided to elevate the roof of the south brick school-house and put on an additional story, thereby making two new rooms, and to furnish one for present use; also to make some repairs at the south and north school-houses.

During the summer vacation, while the addition and repairs were being made, the course of studies was revised, the better to meet the present condition of our schools. This work was principally done by Miss Mary E. Rowe, Principal of our schools. The Fall term, except at the south brick, commenced on the fifth of September; those, on account of the time required to complete the building, did not commence till the third of October, and continued eight weeks, leaving two weeks in the primary schools and three in the Intermediate to be made up in the future. Miss Maxfield made up the time in her school at the close of the winter term. Miss Nelson and Miss Goodspeed kept the regular length of their terms, leaving three weeks in the Intermediate, and two in the second Primary still to be made up.

There has been no change of teachers on the north side, nor at the Academy, during the year. Miss Lizzie A. Nelson was engaged to teach the south second Primary. Miss Maxfield taking the first Primary, has continued through the year. Miss Freese taught the spring and fall terms at the south Intermediate, resigning at

the close of the latter. At the commencement of the winter term Miss Nelson was promoted to the place of Miss Freese, and Miss Florence Goodspeed followed her in the second primary. Miss Rowe has been retained during the school year as Principal, but at her request has been relieved of a part of her former labors. She has had the general supervision of all the schools, and her labors in this direction have been crowned with marked success, and we believe the money paid her has been well earned by her, and profitably expended by the Board.

Our schools as a whole have shown a good degree of proficiency, a step in advance of preceeding years, though there is still room for improvement, especially in some of the schools, in the matter of discipline. We have noticed that in those schools where the teachers have readily adopted the methods and suggestions of the Principal, and to use a homely expression, where they have "pulled together" the best work has been accomplished.

But there are others who have an important work to do, aside from Principal and teachers, without which, that success desired cannot be attained.

Parents have a part to perform; much of the promptness and regularity of attendance, as well as encouragement in well-doing, depends upon them. They should see to it, therefore, that their children are at school every day, and in season, that at the close of the term they may have the satisfaction of knowing that their names will appear on the roll of honor. This of itself may seem but of little consequence, but they should consider that promptness generally insures success.

And the pupils, the all important factor in our schools, as it is for them that we are all at work, should manifest an interest, and willingness on their part, to do all they can for themselves, for without this, all the time, patience, labor, and money expended, will be of no avail, as no teacher, however good and faithful, and no parent, however interested and anxious, can accomplish but little, unless the pupils have a desire and disposition to learn, and are willing to give their whole attention to their studies. We have noticed scholars in some of our schools who, judging from their appearance, think that if they can do something to cause a disturbance without being detected by the teacher, and therefore escape the punishment they deserve, they have accomplished a worthy object, and gained an important point. Now this is all

wrong, and shows a lack of appreciation on their part of the golden opportunities they enjoy, and should make the most of; and the time will come when they will see that the point they supposed they had gained, was worse than lost. They should realize that it is a mark against them, and made too by themselves, and one that will grow brighter with their growth, unless they make an effort to erase it. In the system of graded schools, as in almost anything else, we meet with difficulties, and hear some complaints because there are scholars in two classes at the same time; now there is no immediate and at the same time just way out of this difficulty. It would be unjust to put scholars that rank with the A class in one or two studies back into the B or C class altogether, because in some one study their rank is with that class, neither would it be right to ask the A class to wait for them to come up, but there is a gradual way out of the dilemma. Those who are behind in one study, must make an extra effort, and by the aid of parents, and teachers, try to overtake those in advance. It certainly cannot be done by sitting down with folded hands by the way side. It is not for the interest of our schools that scholars be advanced from one school to another until they are prepared for the advance. This has sometimes been done in times past, partly from necessity, but sometimes by the unworthy practice of deception on the part of the teacher, by drilling scholars on a set of selected questions, and thereby deceiving the Board of Education, and securing premature promotions, but we hope and trust that that day has past, and that with faithful teachers, assisted by a competent Principal, thoroughly conversant with the standing of all our schools, it may never return.

The whole number of different scholars attending school in the public schools of the district two weeks or more during the year was 458, of whom 227 were boys and 231 were girls. Of those reported, 29 were under six years of age, and 33 were over 16. The whole number of children in the district between 5 and 15 years old, as enumerated by the selectmen last April was 558, of whom 291 were boys and 267 were girls.

ROLL OF HONOR FOR THE YEAR ENDING MARCH 4, 1882.

High School.—Lillie A. Busiel.

North Grammar.—Ianthia M. Barnum, Lola M. Barnum, Mamie

E. Davis, Stella L. Dixon, Isabel Dixon, Marie E. Jewett, Addie E. Lovett, Nettie J. Piper, Alice M. Vaughan.

South Grammar.—Annie J. Swain.

North Intermediate.—George Dow, Charles W. Frye, Carrie F. Piper.

South Intermediate.—Lucie Seaverns.

North 1st Primary.—Georgia A. Piper.

South 1st Primary.—Fred Corliss.

North 2d Primary.—Hermon Parshley, Guy Tilton.

CHARLES F. STONE,	} Board of Education.
GEO. L. MEAD,	
N. L. TRUE,	
JOHN G. JEWETT,	
D. B. NELSON,	
JOHN W. ASHMAN.	

I also submit the following report with statistical table annexed, furnishing the information required by law in regard to the schools. In regard to the schools in the north part of the town it will be but justice to say they were never better conducted. Your committee would respectfully urge those most interested to visit the schools more frequently, not only at the close but during the term. There has been more interest manifested in this respect than formerly, but those who have the most fault to find are those who never show themselves inside the school-room, but take the report of some scholar for evidence. This is not as it should be. In district No. 3, Miss Bennett taught through the year. The roll of Honor shows the school has been well attended. Perfect harmony prevailed through the year and at the close of the term showed good advancement in all the studies.

Mrs. Morrison taught in district No. 4, through the year. Mrs. Morrison is a teacher of successful appearance, and this school has had a thorough and careful drill, and has made satisfactory improvement in all branches. Marked attention has been paid to reading, writing and history.

School in district No. 5 was under the instruction of Miss Blaisdell, for the summer, and made fair improvement. This school for the summer months is small. The government was mild and gentle. The teacher won the love of the scholars and labored hard for the welfare of the school. For the winter, Miss Trafton had

the care of the school. At this term the larger class of scholars were present, and different discipline was required and enforced by Miss Trafton, which at first threatened to create some disturbance, mostly from outside influence, however. The term closed with credit to teacher and pupils. The whole number of children between the ages of 5 and 15 years, in the town, as enumerated by the selectmen, last April, were 615, of whom 318 were boys, and 297 girls.

LYDIA E. WARNER, School Com.

Laconia, March 1, 1882.
