FOURTH ANNUAL REPORT  
—OF THE—  
SUPERINTENDENT OF THE WATER WORKS  
—OF THE—  
TOWN OF WOLFEBORO, N. H.,  
FOR THE YEAR ENDING FEBRUARY 15, 1894.  

---

SHOWING RECEIPTS AND EXPENDITURES.  

---

*To Stephen W. Clow, James E. Gridley, and Fred  
E. Hersey, Selectmen of Wolfeboro.*

GENTLEMEN: In submitting our financial report, we would preface it with a few remarks as to the condition and working of the system.

During the past year, the excellent and satisfactory working of the system has continued. No serious or expensive breaks have occurred. Every blow-off, valve, air-cocks, and hydrants, as far as is possible to be known, is now in perfect condition. There is an abundance supply of water in the Pond, and at no time since the construction of the works has there been less than four feet of water over the intake.

Last summer we found we were not getting sufficient water to keep the Reservoir full, and upon a thorough examination we discovered the cast iron strainers at the

intake were so badly corroded that they would not admit sufficient water to supply the demands, and we removed them and put in their places some copper strainers that have given satisfactory results so far.

There have been eighteen services added this season, making in all, three hundred and fifty-five.

We have moved one hydrant and repaired two, the top being split on one and the other the valve being so injured that we had to procure a new base. In our opinion there should be something done to the Reservoir in the way of making it tight, so there should be no more waste of water through its banks and thereby injuring the Reservoir.
