Wolfeboro, N. H., Feb. 15, 1895.

## REPORT OF HEALTH OFFICER.

---

*To the Board of Selectmen and Citizens of the Town of Wolfeboro:*

In the discharge of the duties as Health Officer for the past year I most respectfully submit the following:

There have been reported to me during the year six cases of scarlet fever, all being of a mild form, and also seven cases of typhoid fever, two of which were fatal.

The deaths for all causes in 1894 were 48; the eldest, 92 years of age; the youngest, 6 hours. The average age of all above one year is 64 years and a fraction, which is a most remarkable exhibit of longevity.

A new duty has been recommended by the State Board of Health to the local boards requiring at least once each year an inspection by them of the land adjacent and surrounding the storage supply of their public water works. This recommendation I have attended to and I am pleased to state that I found it satisfactory.

It was also recommended to furnish to the State Board for analysis a sample of water taken from our storage pond as near as possible to the end of the intake pipe. This has been done and the result of the analysis will be made known to you as soon as communicated to me.

The sanitary condition of our town in my opinion has greatly improved since the duties have been assigned to a special officer.

Respectfully submitted,

JOHN G. CATE, *Health Officer*,

TREASURER'S REPORT.

# FIFTH ANNUAL REPORT.

— OF THE —

SUPERINTENDENT AND THE SELECTMEN

— RELATIVE TO THE —

## Wolfeboro Water Works

FOR THE YEAR ENDING FEBRUARY 15, 1895.

---

SHOWING RECEIPTS AND EXPENDITURES.

---

In submitting our Report we thought it advisable to make a few remarks in regard to the condition of the water works as far as can be found out by careful observance of the workings of the system.

Last spring the Town voted to instruct the Superintendent to cement the reservoir. As soon as the weather would permit, he began to ascertain by visiting several different places where there were reservoirs that were cemented, examined them carefully, and obtained all the best information that he could get in the places visited in regard to how the cement worked and the best way to apply it. After getting all the information he

## *Report of the Superintendent and Selectmen.*

thought necessary, he cemented the reservoir in a thorough manner and has it perfectly tight.

The rest of the system is in as near a perfect running condition as is possible to get it. Of course owing to carelessness on the part of some of the water takers, a few of the services have frozen up, but they have used prompt and effective methods in clearing them.

In regard to collections the Superintendent would say that the water takers are very prompt in paying their rents, and so consequently the rents are all collected, "generally" within the specified time.

The intake is in a good condition as far as can be found out by examination; and there is plenty of water in the pond.

### FINANCIAL STATEMENT.
