REPORT OF THE COUNTY COMMISSIONERS.

In obedience to the requirements of the laws of New Hampshire, the County Commissioners of Hillsborough County hereinafter present a statement of all the expenditures of the county, over which they have any control, for the year ending January Term, 1870, inclusive. Also, the report of the County Treasurer for the year ending December 31, 1869.

So far as pertains to the management of our almshouse and farm, the year just ended has been one of continued prosperity and success. The institution has not been visited by any epidemic or contagious disease during the year. Notwithstanding the weather was unusually cold last summer, the production of the farm was quite satisfactory, and our expectations at the beginning of the season were more than realized in the abundance of harvest. There was raised on the farm this year, 250 bushels of corn of excellent quality, 1845 bushels of potatoes, 505 bushels of barley, and 83 tons of hay. The farm is being greatly improved and enriched each year, thus increasing the quantity and profits from the farm, without incurring any additional expenditure for labor over and above the usual number of hands now employed. Should the next season be favorable, we may confidently expect many tons more hay will be raised on the farm than has been cut any prior year since the county has owned it, 12 acres having been laid down to grass this year, which has an excellent catch, and the present indications are highly favorable for a large increase of hay over last year. As the old land is laid down to grass year by year, and enriched by a liberal supply of manure, which is made on the farm in large

quantities from loam, mixed with the contents of the vaults, and barn and hog manure, it must certainly increase the quantity and quality of hay for many years to come, without any corresponding increase of expenditure.

The physical condition of the inmates is no better than it was last year, but rather worse on an average, as will be seen by the report of the county physician, in another place in this report. The number of insane, partially insane and idiotic is 61, at the present time, making 15 more of this class than there was last year. There were 27 deaths this year, against 26 last year. Admitted to the almshouse during the year, 110, against 96 last year. We have admitted this year more sick people than any previous year since the almshouse has been at Wilton. Quite a large number were old people, broken-down constitutions and imbeciles. These, of course, on admission to the institution, were at once placed in the sick wards, requiring constant nursing and medical attendance. There are 25 in the almshouse under 20 years of age. Of this number, not more than 4 or 5 are bright and smart, or suitable to put out to private families. The remainder are far below the average in intellect, and are disabled by chronic disease—in fact, are confirmed invalids. To the number under 20 years of age add 61, the number of insane and idiotic, making 86 nearly helpless. We have 30 more, besides those before named, to complete the whole number, 116, almost all of whom are old, feeble and sick, some of them confined in the sick wards. Of the 30 last named, 10 are over 60 years old, 15 over 70, 4 over 80, and 1 over 90. Thus it is perfectly apparent that we have comparatively no producers in our almshouse; but, on the other hand, most of the inmates are costly and expensive consumers. The average age of 20 of the persons who died at the almshouse this year is $73\frac{15}{100}$ years. Although most of the inmates of the almshouse are unable to perform any productive labor, yet we do not anticipate any increase of expenditures for supporting the same number we have this year; but, on the contrary, we may reasonably expect that the average annual expenses will be less for each person supported as the numbers of inmates increase and a greater quantity of produce is raised on the farm.

We have erected this year, at the farm, a building $87 \times$

20, 1½ stories high. The basement is used to put in agricultural tools, carts, sleds, sleighs and wagons. The next story is used for a granary, store-room, etc. This building is absolutely indispensable, as we had no place under cover to put most of the articles named above until this building was erected. The damage and injury to agricultural tools, carts and sleds, by being exposed to the weather summer and winter, is no inconsiderable amount. The foundation and part of the labor in erecting this building, was done by the employees on the farm. There is now needed at the farm another building for a wood-shed, the cost of which will not probably exceed \$500.00. Also, a large stone vault for the almshouse, the cost of which will not exceed \$400.00. When these are completed, the arrangements and facilities for economical and successful management of the farm and almshouse will be nearly complete in every detail, and we do not anticipate any unusual drain from the county treasury for the farm for several years to come.

The farm has been very well managed, as the results clearly testify. All the apartments throughout the buildings are kept neat and clean. The inmates are kept tidy and clean as possible under the circumstances. We presume there are persons in our county who honestly think that the paupers at our county almshouse are not so well cared for or so comfortable as they were when they were supported on the respective town farms in the county. So far as we are advised, the persons entertaining these opinions are those who have never even visited the institution, and consequently must be entirely unacquainted with the internal arrangements and workings of the same. We will here suggest to any such who really and honestly desire to ascertain all the facts and particulars in regard to the comforts and conveniences enjoyed by the inmates of the institution, and the management and workings of the same, to visit the institution, and make a thorough examination of the establishment, inside and outside. In every instance where such examination and investigation has been made, the investigator has been quite satisfied with the result. To those who have had many years' experience in taking charge of the poor, the fact is so clearly evident that the paupers at the county almshouse enjoy many more privileges, comforts and conveniences than ever

were afforded them while at any of the town poorhouses, that argument is needless. Years of careful observation fortify and confirm the fact.

We have constantly endeavored to pursue the policy of placing the children coming to the almshouse, who have no homes or friends to provide and care for them, as soon as it is proper to do so, in good, respectable families, where they can have parental care and kindness, be properly instructed, and made acquainted with the ordinary duties of life. Experience and observation teach us that there is no place so well adapted to the wants of the young as the family. It is, of course, our bounden duty to exercise a proper supervision over these children, to see that they are kindly and tenderly cared for, and to guard their interests generally.

A considerable number of men and women are sent annually to the jail or house of correction, for limited periods, for simple drunkenness, or some slight offence, where the fine, in some instances, does not exceed five dollars. Perhaps with most of this class no other stain rests on their good name. We think this class should not be sent to the same prison with the worst characters. These persons should be placed where only the best influences prevail, and where the spirit of reform is inculcated, so that when they leave the institution they may feel that no person can point to them as felons. We have established, by authority of law, a house of correction, at Wilton, for this class of persons. There have been sent to the house of correction this year, five men and one woman, all of whom were able to work, and have fully earned their board during the time they were sentenced.

Full details of the sanitary condition of the almshouse will be found in another place in this report,—in the report of Dr. H. Trevitt, county physician, who has been very faithful and attentive to those requiring medical attendance.

It will be noticed in the report of Rev. S. C. Fletcher, in another place hereinafter, that “the poor have the gospel preached to them” in the institution, and have enjoyed many religious privileges during the year just closed, mainly through the self-sacrificing efforts of Mr. Fletcher, who has devoted much time and rendered very important

services in behalf and for the good of those in the institution, during the whole time it has been in Wilton, by many kindly acts and tender words of hope and encouragement to the disconsolate and those overwhelmed with sorrow and sadness, inspiring good resolutions and a stronger faith that our Heavenly Father will smooth their pathway down the remaining steep declivity of human life. We desire to tender our warmest thanks to Mr. Fletcher for the deep interest he has taken to promote the spiritual welfare and happiness of the inmates in the institution.

We again express our renewed confidence in George G. Bumpus, Esq., Superintendent, and Mrs. Bumpus, Matron, both of whom have been at the head of the institution, as superintendent and matron, more than eight years, anxieties, cares and perplexities surrounding them continually, oftentimes trying their utmost patience to a degree which no person unacquainted with the duties and responsibilities devolving upon them could accurately comprehend or realize. Whenever we have had occasion to send persons to our almshouse who could no longer support themselves, of all ages and conditions, from infancy to four score years or more, it has been a great relief for us to know that this unfortunate class of the poor were to have a home where ample provision is made for their comfort and welfare in sickness and health — indeed, a better home than most of them ever had before — where humane treatment and kind and tender care is ever predominant. Mr. and Mrs. Bumpus have discharged their respective duties and trusts with great fidelity and integrity, during this long period in the public service, which entitle them to our highest commendation and encouragement. We also tender our kindest acknowledgments to the employees of the institution, for the faithful discharge of their respective duties.

It will be seen elsewhere in this report that \$1,000.00 were expended in erecting the new building, to which reference has hereinbefore been made, which sum deducted from \$10,368.96, leaves \$9,368.96 as the exact amount drawn from the county treasury for support of paupers at the farm this year.

Deduct produce and stock sold from the farm the same having been paid to the county treasurer	\$5,145 75
Total amount expended, including interest on real estate, for support of paupers	\$11,804 19

Dividing by 115 1-2, the average weekly number, we have as the cost of each inmate one year, \$102.20.

Dividing by 52, the number of weeks, we have as the average weekly cost of each inmate \$1.96 53-100 (one dollar ninety-six and fifty-three hundredths cents).

The expense for supporting each pauper at the farm this year is 25 47-100 cents per week less than last year. It will be observed that the weekly average number in 1868 was 96, making 19 1-2 more in 1869 than there were in 1868.

In our last annual report we referred to the passage of the law in June, 1863, abolishing all town settlements gained prior to January 1, 1840. The practical effect of this law has transferred most of the paupers from the town farms in the county to the county almshouse, as we anticipated at the time the law passed, and accordingly made suitable provision for the same. Most of the towns in the county have already sold their town poor-farms, and some of the town paupers are boarding at the county almshouse, at a cost far less than the towns can support them elsewhere. The county has received for boarding paupers for several towns in the county this year, \$840.82 and from the county of Rockingham, \$213.75, making in all \$1054.57.

The Treasurer's report shows an increase of the county debt for the year ending December 31, 1869, of \$5,048.40. This increase of expenditure is accounted for by the erection of a house for the insane, at Wilton, at a cost of \$1639.19. Steam-heating apparatus in the jail at a cost of \$931.00. This outlay was indispensable, and could no longer be postponed or delayed without entire disregard of the best interest of the county. We have at the almshouse, as before stated, forty insane and partially insane, who have been supported there at a cost of \$102.20 for each person one year, making the sum of \$4,088.00 for supporting forty one year. It will cost to support the same number at the Asylum for the Insane at \$4.80 per week for each person, the sum of \$9,984.00, a sum nearly equal to the cost of supporting 115 1-2 this year. The court expenses are considerable more this year than they were in 1868, which, together with the sum paid for the purposes above named, accounts for the increase of the county debt this year.

It may appear to some of our tax-payers, that our county expenses are large compared with the expenses of other counties in this state, and with our population and valuation. But upon a careful examination and comparison, we find the facts to be quite the reverse. The population of Hillsborough county in 1860 was 62,242. It is estimated that we now have 70,000. Valuation in 1864, \$29,180,047. Valuation in 1868, \$35,430,425. Valuation increased during four years ending 1868, \$6,250,378. It will be remembered that the county sustained considerable loss by fire November 14, 1866, when all the almshouse buildings in

Goffstown were burned. Yet the county expenses have not increased in proportion to the increase of population and valuation. We desire to make a brief statement of facts only, and do not intend to make any invidious comparison elsewhere. Upon inquiry we find that the expenses in most of the counties in this state are considerably larger than ours in proportion to valuation and population, and, so far as we are advised, our expenses are less than any other county in the state, on the basis of population and valuation. We have made most ample provision for the support and maintenance of the poor and dependent, chargeable to the county; at the same time we have insisted that wise and judicious economy should be used in the disbursement of the large sums necessary for this purpose.

The following statement shows the amount paid for supporting county paupers each year, at the farm and off the farm, for six years ending January term 1870, inclusive, excluding all sums paid for buildings and permanent improvements upon the farm and buildings; interest on real estate included.

	Average weekly number at farm.	Amount paid for paupers at farm.	Amount paid for paupers off farm.	Totals.

PHYSICIAN'S REPORT.

TO THE COMMISSIONERS OF HILLSBOROUGH COUNTY:

Gentlemen,—I again have the honor to present to you an annual report of the sanitary condition of the county almshouse.

The whole number of persons provided for in the institution during the year has been two hundred and ten, nearly all of whom have been invalids. Nor could we expect it to be otherwise, when we take into consideration the fact that they were those, who, by old age, sickness, insanity and other misfortunes, or, as is too often the case, by lives of intemperance and debauchery, had been rendered unable to provide for themselves, and many of them laboring under chronic diseases in some form which must sooner or later prove fatal.

The health of the inmates, under the above mentioned circumstances, has been comparatively good. No severe epidemic has invaded the institution, and but few cases of severe illness have had their origin there.

The whole number of deaths during the year, as will be seen by reference to the accompanying table, has been twenty-seven. All except two were the result of old age, chronic disease or insanity. There were two deaths from typhoid fever in a severe form. One of the patients was delirious from the time he was attacked until he died. The

other, a lad of thirteen, naturally of feeble constitution, became convalescent, but had a relapse and died.

Much credit is due to the Superintendent and his most worthy lady, for the strict enforcement of the sanitary regulations of the institution, and to their care and watchfulness over the health of the inmates, to which, in a great measure, may be attributed their freedom from acute and epidemic diseases, especially among the children.

There have been but two births in the institution during the year.

Very respectfully,
Your obedient servant,
H. TREVITT, M. D.

CHAPLAIN'S REPORT.

TO THE COMMISSIONERS OF HILLSBOROUGH COUNTY:

Sirs,—I have the honor to submit the following report. The duty of imparting religious instruction at a place such as this, while very pleasant, is very perplexing and in results uncertain.

The large number of idiotic, partially deranged and weak-minded persons afford soil of very little depth for sowing the good seed, and one is often at his wit's end in seeking methods suited to their capacity. The large number of unfortunate persons brought to poverty in old age, and in some cases unjustly, and under circumstances to embitter their whole being, give an opportunity to sow among thorns. The occasional prisoner, with a mind full of crime, the Catholic, with a full determination to receive no truth from a Protestant, give a choice for wayside sowing, as some truth, despite their crime and prejudice, sinks into their hearts. The children, and some of the aged persons whom misfortune could not sour, afford the good ground on which the truth of God's word takes root, and we trust shall bring forth fruit to His glory and the benefit of mankind. Hence, in imitation of the Master, who went forth to sow, and a sign of whose kingdom was "The poor have the gospel preached unto them," together with the superintendent and matron and most of the employees, we have done what we could to afford the inmates an opportunity to attend religious services at least once a month, and also socially to encourage, sympathize and instruct.

Compared with past years, we think a better tone of religious interest has been manifest the last year than before since the removal of the county farm to Wilton. This is attributed principally to the ample chapel room of the new building and a better acquaintance with the inmates.

The increasing numbers of children and youth, in connection with the Institution, claim that all possible shall be done for their spiritual development in the ways of truth.

Yours very respectfully,
S. C. FLETCHER.

JAILER'S REPORT.

	\$1,256 84

All of which is most respectfully submitted.

A. G. FAIRBANKS, *Jailer.*

In 1866, a building was erected on the east end of the jail and adjoining thereto. The first story is used for the storage of wood, and a place for carriages. The second story has been used since Nov. 10, 1866, for a work-shop for the prisoners, or such of them as prefer to work, rather than close confinement in the jail, leaving it optional for the prisoners to choose for themselves either to work or be confined. Most of the prisoners prefer to work. The principal business carried on in the shop is chair bottoming. This branch of business is very clean and easy, not requiring very long practice and experience for those who are capable and tractable to become sufficiently skilled to do this kind of work acceptably. We cannot carry on any mechanical business here which requires skillful and experienced workmen, as most of those sent to jail come there with but little knowledge of any useful trade, and generally on short sentence, not sufficient length of time to learn any trade requiring skill and experience and become accomplished workmen; in consequence of which the county cannot realize so much for their services for the kind of work done here, as could be realized from some other branches of business more profitable, but needing more experience, skill and ingenuity.

It is a noticeable fact that the prisoners are more quiet, better contented and more orderly since they commenced working. Under the judicious management of A. G. Fairbanks, Esq., jailer, the best of order and discipline is observed in every department of the institution.

From Nov. 10, 1866, to January 10, 1870, the sum of seventeen hundred dollars (\$1700.00) was paid to the county treasurer for labor of the prisoners. From January term, 1866, to January term, 1870, the sum of thirteen thousand seven hundred sixty-four dollars and thirty-five cents (\$13,764.35) was paid to the county treasurer, being money collected for forfeitures of bonds, fines and costs; added to the amount for labor of prisoners, is fifteen thousand four hundred sixty-four dollars and thirty-five cents (\$15,464.35).
