DURHAM, NH – Bernie Sanders and Joe Biden continue to be early frontrunners for the 2020 New Hampshire presidential primary, although most Democratic primary voters are still trying to make up their minds who to support. Most Republicans are also trying to decide who to support, but just over half say they plan to vote for Trump in the 2020 primary. Two-thirds of Republican primary voters would vote for Trump in a hypothetical matchup with Ohio Governor John Kasich.

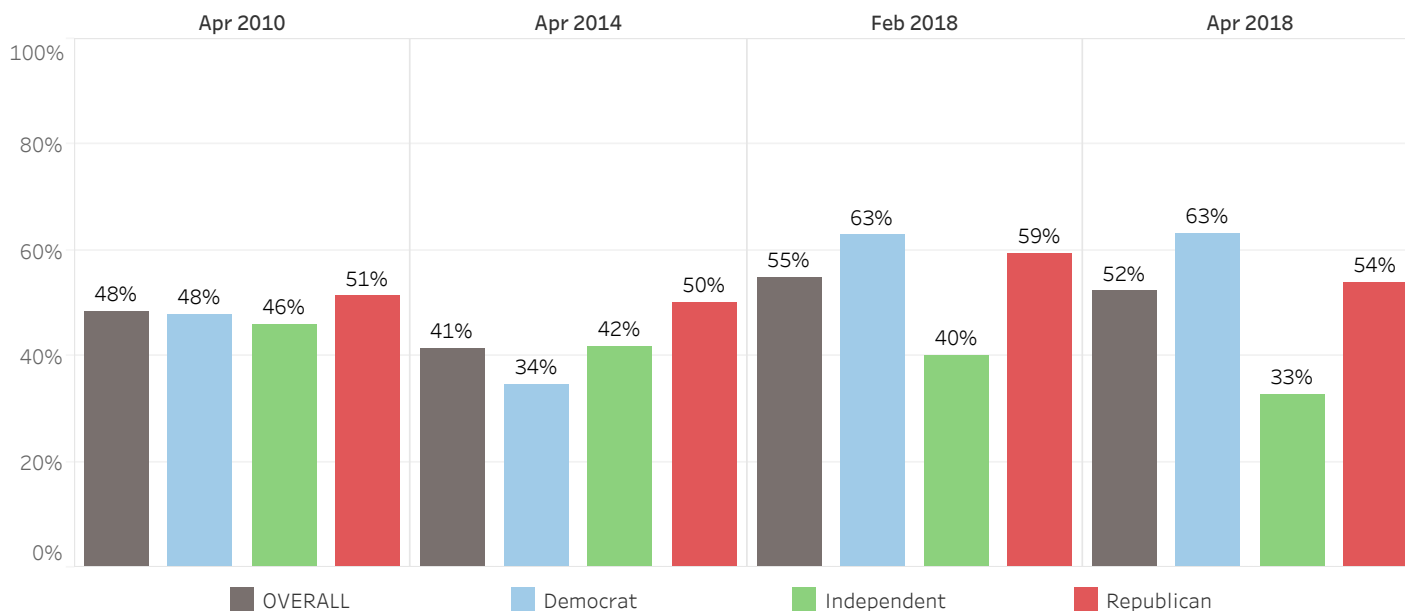

These findings are based on the latest **Granite State Poll\***, conducted by the University of New Hampshire Survey Center. Five hundred and forty-eight (548) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between April 13 and April 22, 2018. The margin of sampling error for the survey is +/- 4.2 percent. Included in the sample were 208 likely 2020 Republican Primary voters (margin of sampling error +/- 6.8 percent) and 188 likely 2020 Democratic Primary voters (margin of sampling error +/- 7.1 percent).

### Interest in 2020 New Hampshire Presidential Primary

With nearly two years until the 2020 New Hampshire presidential primary, just over half of Granite Staters (52%) say they are extremely interested in the primary, while just under a quarter (26%) are very interested, 13% are somewhat interested, and 8% are not very interested. Interest in the 2020 primary is largely unchanged since February (52% extremely interested) and is higher than in April 2014 and April 2010, the last two similar points in the presidential electoral cycle.

Democrats (63%) are slightly more likely than Republicans (54%) to say they are extremely interested while only one-third (33%) of Independents agree. The percentage of Democrats who are extremely interested is unchanged since February but interest among Republicans has slightly declined in that time.

### Extremely Interested in Primary

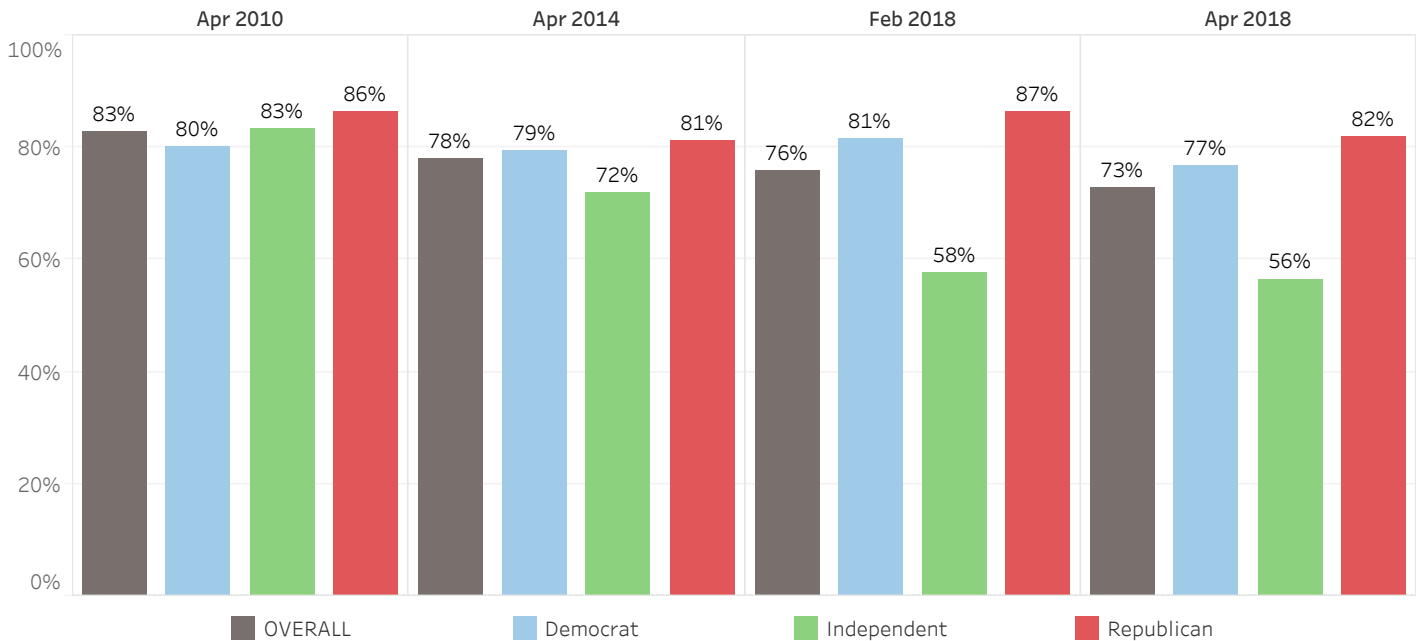

\* We ask that this copyrighted information be referred to as *the Granite State Poll*, conducted by the University of New Hampshire Survey Center.

While respondents say they are more interested in the presidential primary than at the same point in previous electoral cycles, slightly fewer respondents currently say they will definitely vote in the 2020 New Hampshire presidential primary compared to previous years.

Overall, 73% say they will definitely vote in the 2020 presidential primary, 12% will vote unless there is an emergency, and 5% each say they may vote or probably will not vote. Most Democrats (77%) and Republicans (82%) say they will definitely vote in the primary but only 56% of Independents say they will definitely cast a primary ballot. This trend of Independents being far less willing to say they will definitely vote in the primary has continued since February and is unlike previous election cycles when Independents were about as likely as Democrats and Republicans to say they would definitely vote in the forthcoming presidential primary.

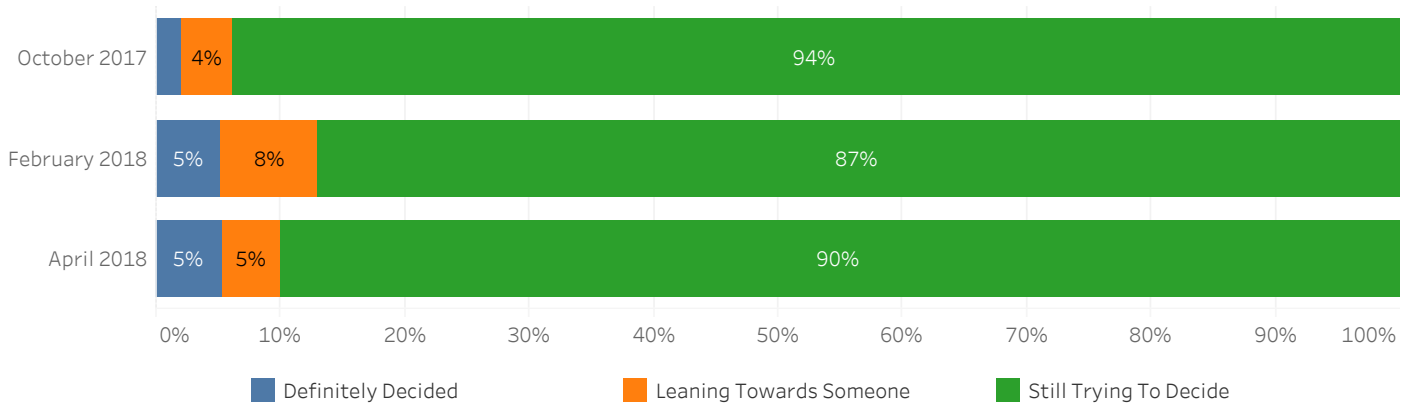

### Will Definitely Vote in Primary - By Party ID

### 2020 Democratic Primary

A large majority of likely Democratic primary voters (90%) say they are still trying to decide who they will support in 2020, while 5% each say they are leaning towards someone or have definitely decided. Slightly more respondents than in February (87%) say they are still trying to decide.

### Definitely Decided on Candidate - Democratic Primary Voters

Most Democratic primary voters (59%) remain undecided or cannot provide a name when asked an open-ended question about whom they would support. Democratic primary voters most frequently mention Bernie Sanders (14%), Joe Biden (11%), Elizabeth Warren (3%), Cory Booker (3%), and Hillary Clinton (2%). Results were similar to those in February as well as October 2017.

**Preferred Democratic 2020 Presidential Nomination Candidate - Open-ended**

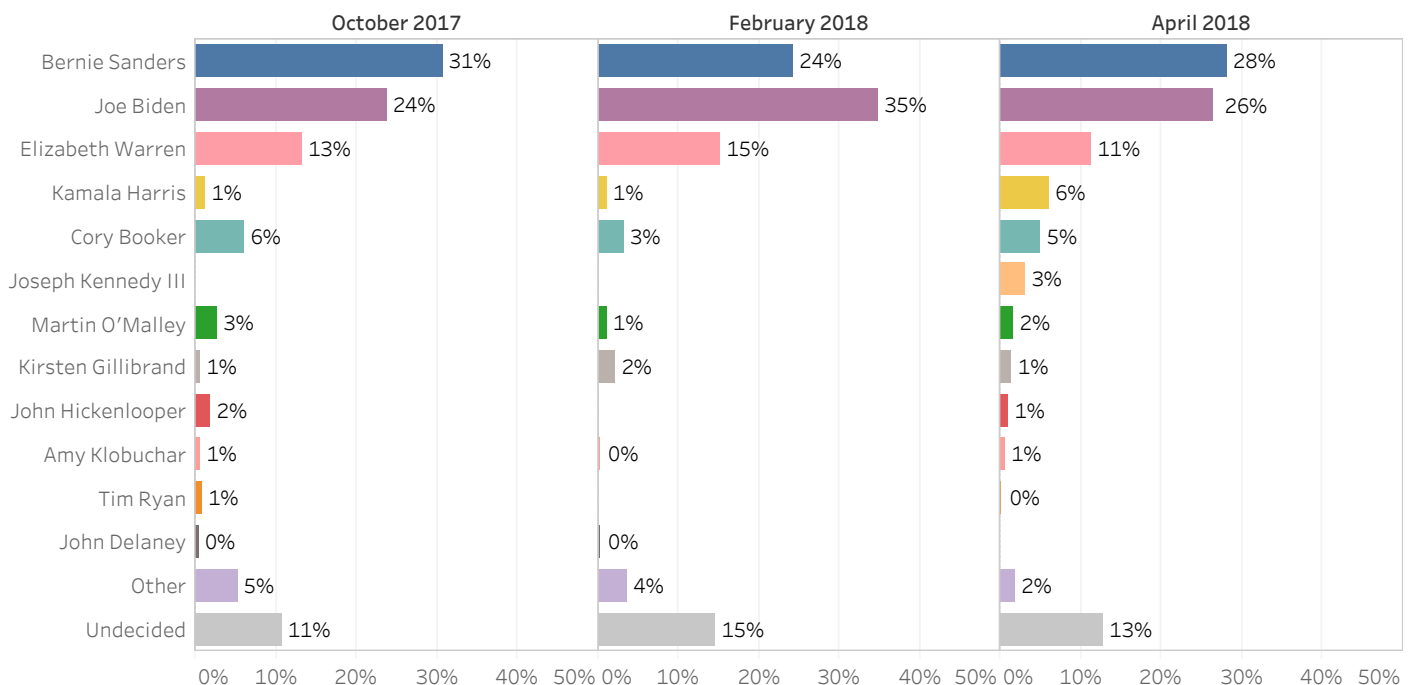

When provided a list of potential candidates to choose from for the 2020 nomination, 28% of likely Democratic primary voters choose the 2016 NH winner, Vermont Senator Bernie Sanders, 26% choose former Vice President Joe Biden, and 11% favor Massachusetts Senator Elizabeth Warren. Fewer likely voters choose Kamala Harris (6%), Cory Booker (5%), Joseph Kennedy III (3%), Martin O'Malley (2%), Kirsten Gillibrand (1%), John Hickenlooper (1%), Amy Klobuchar (1%), or Tim Ryan (<1%). Two percent of respondents mentioned another candidate while 13% remain undecided.

Support for Sanders (28%) has slightly increased since February (24%), while support for Biden (26%) has fallen since February (35%). Support for Warren (11%) has slightly declined since February while Kamala Harris (6%) now garners the fourth highest support in the field.

Likely Democratic primary voters who live in the Connecticut Valley or Manchester Area, and those aged 18 to 34 are more likely than others to support Sanders.

## 2020 Republican Primary

Only one quarter (24%) of Republican primary voters say they have definitely decided whom they will support for the 2020 Republican presidential primary, a slight decrease since February (30%). Eleven percent of Republican primary voters say they are leaning toward someone while two-thirds (66%) are still trying to decide.

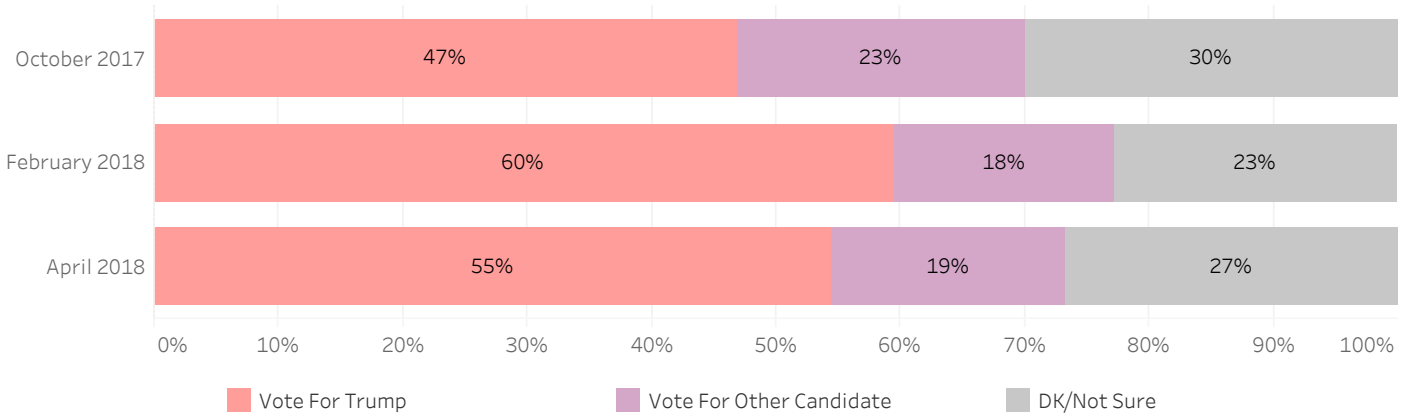

**Definitely Decided on Candidate - Republican Primary Voters**

Fifty-five percent of likely Republican primary voters say they plan on voting for Donald Trump in the 2020 New Hampshire Republican presidential primary, slightly lower than said so in February (60%). Nineteen percent say they plan on voting for another candidate, while 27% don't know or are unsure.

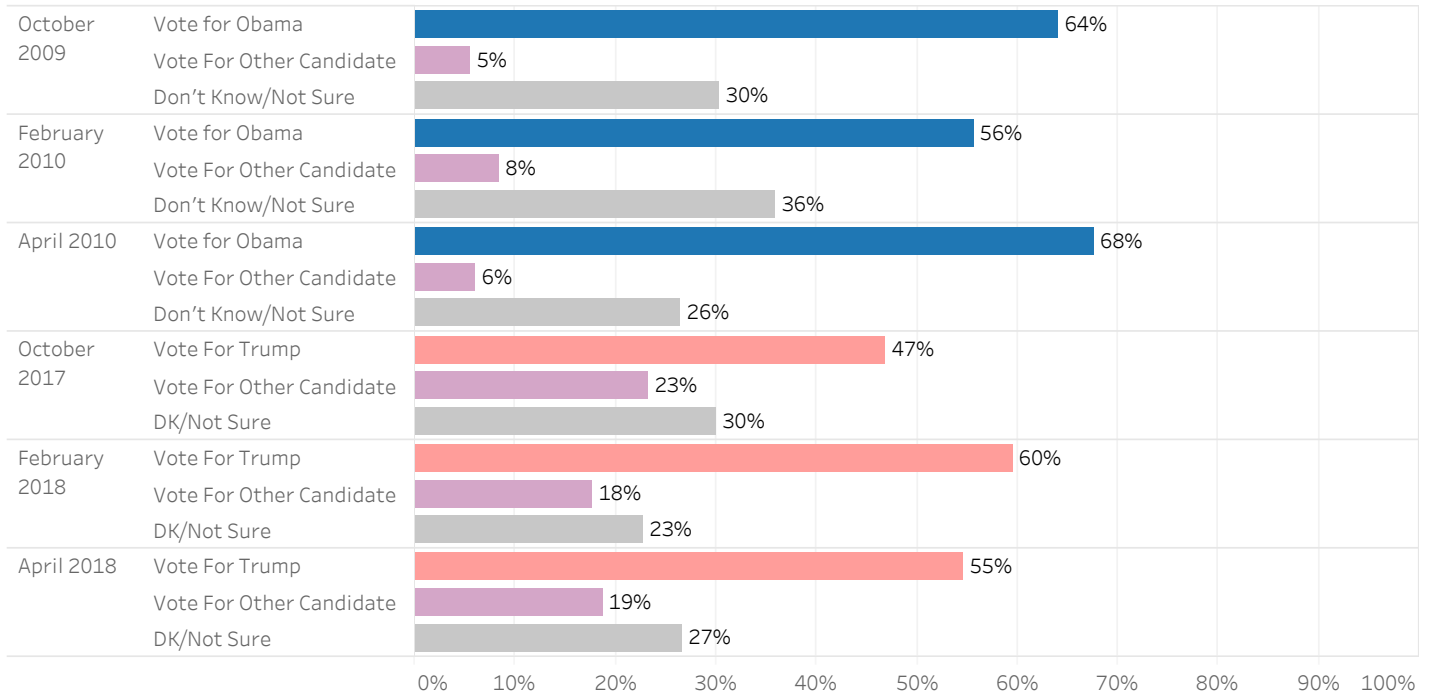

Likely Republican primary voters who listen to conservative talk radio, those who attend religious services once or twice a month, self-described conservatives, those aged 65 and older, and those who voted for Trump in 2016 are more likely than others to say they plan on voting for Trump in the 2020 Republican primary while Republican primary voters aged 18 to 34 and self-described moderates are more likely to say they plan on voting for another candidate.

**Plan on Voting for Trump or Other Republican Candidate?**

Support for Trump among Republican primary voters is weaker than the support President Obama enjoyed among Democrats at the same point in the electoral cycle; 68% of Democrats in April 2010 planned to vote for Obama in the 2012 Democratic presidential primary, while 55% of Republicans now say they plan to vote for Trump in the 2020 Republican presidential primary.

**Plan on Voting for Incumbent President in Primary**

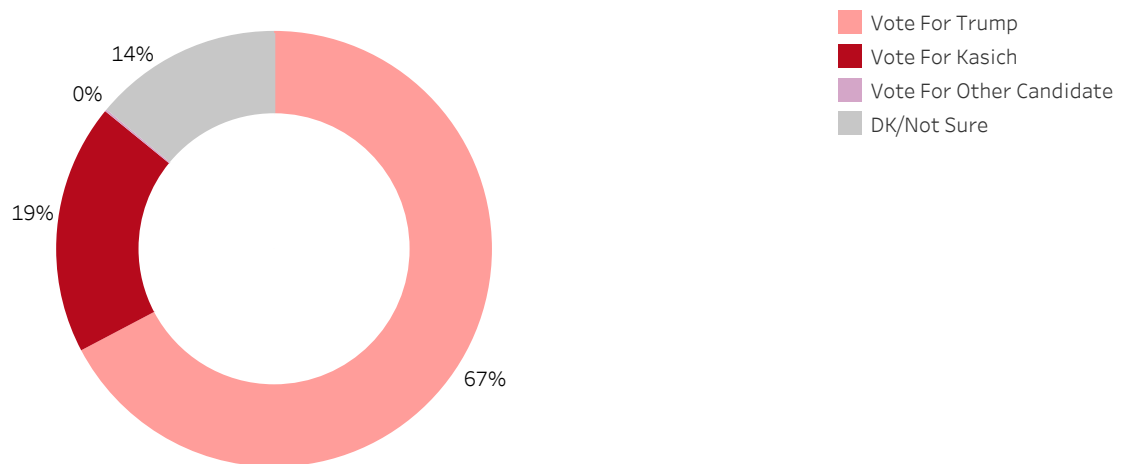

**Prospective 2020 NH Republican Presidential Primary Matchup**

Ohio Governor John Kasich recently visited New Hampshire where he hinted at a challenge to Trump. In a hypothetical matchup between Trump and Kasich, two-thirds (67%) of likely Republican primary voters say they would vote for Trump, 19% would vote for Kasich, less than 1% would vote for another candidate, and 14% don't know or are unsure.

Likely Republican primary voters who listen to conservative talk radio, self-identified Independents, those who attend religious services once or twice a month, Massachusetts Border residents, those who voted for Donald Trump in 2016, and self-described conservatives are more likely than others to say they would vote for Trump in a Republican primary between Trump and Kasich. College graduates and self-described moderates are more likely than others to say they would vote for Kasich in this matchup.

### Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. Five hundred and forty-eight (548) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between April 13 and April 22, 2018. The margin of sampling error for the survey is +/- 4.2 percent. Included in the sample were 208 likely 2020 Republican Primary voters (margin of sampling error +/- 6.8 percent) and 188 likely 2020 Democratic Primary voters (margin of sampling error +/- 7.1 percent). The design effect for the survey is 1.2%.

The random sample used in the Granite State Poll was purchased from Marketing Systems Group (MSG), Horsham, PA. MSG screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers. When a landline number is reached, the interviewer randomly selects a member of the household by asking to speak with the adult currently living in the household who has had the most recent birthday. This selection process ensures that every adult (18 years of age or older) in the household has an equal chance of being included in the survey.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the Granite State Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at [andrew.smith@unh.edu](mailto:andrew.smith@unh.edu).
