### CONTENTS

CALL FOR PAPERS, NOMINATIONS TO EDITORIAL ADVISORY BOARD . . . 93

#### ARTICLES

SYMPOSIUM: PUBLIC PARTICIPATION IN RISK MANAGEMENT [PART II]

PUBLIC PARTICIPATION IN RISK MANAGEMENT DECISIONS: THE RIGHT TO DEFINE,  
THE RIGHT TO KNOW AND THE RIGHT TO ACT . . . . . 95

*Frances M. Lynn*

It is important to solicit public opinions before making decisions about risk, but this is seen as only a first step. The author observes that it is also important that the public be involved in defining the problem, identifying needed information, interpreting information, and choosing among the options for action.

PUBLIC PARTICIPATION IN RISK REGULATION . . . . . 103

*Thomas O. McGarity*

After discussing the increasing recognition of different kinds of claims for public participation in risk regulation, this paper discusses a spectrum of approaches and examines six points along its range.

LEGISLATIVE OVERSIGHT OF ADMINISTRATIVE RULE MAKING  
IN NEW HAMPSHIRE . . . . . 131

*Scott F. Eaton*

This paper explains how administrative rules are made in a small state. It also analyzes the role of a joint legislative committee which oversees the process and concludes that such oversight generally increases opportunities for public scrutiny of rules and public participation in rule making.

SCIENTIFIC CONVENTIONS, ETHICS AND LEGAL INSTITUTIONS . . . . . 155  
*Carl F. Cranor*

This article examines the use of epidemiology to evaluate risks posed by toxic substances. Using illustrations drawn from an elaborate example, it argues that scientists applying usual conventions in doing statistical studies tend to ignore important normative issues.

BOOK REVIEWS . . . . . 185

FRANK B. CROSS, ENVIRONMENTALLY INDUCED CANCER AND THE LAW: RISKS, REGULATION AND VICTIM COMPENSATION

CHEMICAL CONTAMINATION AND ITS VICTIMS, (David W. Schnare and Martin T. Katzman, Eds.)

THE ROLE OF SCIENCE IN TOXIC TORT LITIGATION (Papers Presented at a 1988 American Bar Association Meeting).
