RISK Editorial Board, *Call for Papers, Nominations to Editorial Advisory Board*, 1 RISK 93 (1990).

This Prefatory Matter is brought to you for free and open access by the University of New Hampshire – Franklin Pierce School of Law at University of New Hampshire Scholars' Repository. It has been accepted for inclusion in RISK: Health, Safety & Environment (1990-2002) by an authorized editor of University of New Hampshire Scholars' Repository. For more information, please contact ellen.phillips@law.unh.edu.

Call for Papers, Nominations to the Editorial Advisory Board

Call for Papers

Potential contributors are urged to request our authors' guidelines or to make inquiry as indicated on the inside front cover of this issue. Readers are also reminded that we are eager to receive publishable letters commenting on articles, the journal in general, or events of possible interest. Moreover, we are interested in receiving book reviews¹ and books to be reviewed.

The range of acceptable material is indicated in this and the last issue. It is also indicated by the titles of papers accepted for future issues, including: *Public Accountability of Advisory Committees*, *Pharmaceutical Risk and the Quality of Life*, *Using Management Techniques to Solve Environmental Problems*, *Patient Perceptions of Drug Risks and Benefits*, *Coke Oven Emissions: A Case Study of Technology-Based Regulation*, and *Mandatory Continuing Education: Does it Really Protect Society?* Those articles and essays have been written by a broad professional cross section drawn from the U.S. and abroad — including physical and social scientists, economists, medical personnel, engineers and philosophers, as well as lawyers. The common denominators are that each paper deals with health and safety issues, has implications outside of a single subset of risk management, e.g., pharmaceutical regulation, and has potential appeal to a broad range of professionals, as well as to generalists.

¹ These must contain all of the information provided in the reviews at the end of this issue. They may be of any length, but it is easier to find room for shorter reviews. Finally, outside reviews will indicate the author.

Editorial Advisory Board

Now that publication of RISK is well underway, we are attempting to build an editorial advisory board. If you are so inclined, please feel free to submit your own name, indicating your background and basis for interest. We would also like to receive nominations of others. Whether you nominate yourself or another, please keep in mind that the objective is not to acquire well-known names to add to our masthead. Rather, we need a diverse group of people who are both committed and able, one way or another, to contribute to the success of our fledgling venture.

Complimentary Copies

We will be happy to send a complimentary issue to anyone that you might suggest or to anyone who requests one. Please mention this to your colleagues, to your librarian, and in your newsletters.²

² Again, we are grateful to those who have already done so. As a result, we have already achieved most of our subscription goal for the year.
