Health

Good health is one of life's greatest assets. To promote a healthier race of people our efforts should begin not only before school age, but before birth. A mother can do much to insure her child's health by placing herself under medical care early in pregnancy.

During infancy, preschool and school age have periodic medical examinations. Detection and correction of defects should take place at the earliest opportunity.

Guard against communicable and infectious diseases by immunizations, vaccination and inoculations. Complications from communicable diseases can cause very serious damage to a person.

Good nutrition is most important. Nothing is more fundamental in the building of healthy vigorous children than furnishing them the right building materials. One gets that in a good well balanced diet.

The school records show that many defects have been corrected. The most serious problems that confronts us at the present time are dental and throat work. Due to the shortage of dentists we are unable to have dental clinics but parents are realizing the importance of corrective work and in most cases their cooperation is very gratifying.

By building healthy bodies and minds in children we help them to become independent, self supporting and productive citizens, which in turn help to build and maintain a good government, democracy and a better world to live in.

SUPERINTENDENT'S REPORT

To the Superintending School Committee and the
Citizens of the Pittsburg School District:

Foreword

Do you ever turn back the clock to days which sometimes look in retrospect much more attractive than they really were? Our children still need the three R's. But they also need an up-to-date acquaintance with the world in which they live.

The jet motor and the atom bomb, because of their dramatic character, are known to all who can read or hear. They typify a new and fast moving age.

American children have an assignment that is not optional. They are introduced to an incredibly complex world, a world of quickly achieved knowledge and skills, of racial and class tension, of international frictions, of battered traditions, of huge debts and of inevitable change. They must have an education which will help them find their way in the world.

The best educational programs to be found in the nation today can still be improved. We can and must provide a good educational opportunity for every individual. As the school program improves and becomes more closely geared with life, an increasingly heavy responsibility is placed on the teachers. Schools are not operated to provide jobs for teachers. The only excuse they have for existing in the community is for the good they can do for the boys and girls.

Somehow may the horizon be brighter because of a thoughtful well guided program of education and training for youth, started in the home and continually strengthened by their experiences in the home, the church and the school. We can build a greater and nobler America only as we develop human resources.

Teachers

There have been several changes in the teaching personnel since the last report. In the High School, William P. Robbins, U. of N. H., became the new Headmaster; Guy Bagley, U. of Connecticut was chosen to teach English and French and Robert McDonough, Clark University, was selected for the social studies position. Marion Gray returned as teacher of Commerce.

Addie Gray, Lyndon Normal, was elected to the 5-6 grade position and Lillian Ball filled the vacancy in the Primary room. Katherine Dwinell Gadwah returned in the 3-4 grade room.

Due to the completion of a new room the first six grades were re-divided, two grades to a room and an extra teacher was added.

Buildings and Equipment

The biggest single item was the finishing off of a new classroom in the High School building. This room is located in the basement on the West Side. It is finished with plywood, and oak flooring and was furnished with new movable pupil desks and fluorescent lights. Numerous other minor repairs and improvements were made.

The building is in good condition and quite adequately furnished.

The Danforth School remains closed.

Enrollment and Attendance

The total enrollment of the district is 124, as compared with 110 last year and 107 for the previous year.

There are in the High School five tuition pupils from Clarksville and we have five attending the West Stewartstown Elementary School.

Notes on the Budget

The School Board's total budget for 1947-48 is \$28,993.00 as compared with \$25,557.00 for last year. The requested appropriation of \$28,993.00 represents an increase of \$3,436.00 or about 13% over the appropriation for the previous year. The budget reflects anticipated higher costs all along the line.

Legislature

Undoubtedly a record number of educational bills will come before the legislature this session. It is expected that a minimum salary law will be introduced. A bill providing for increased state aid has already been dropped in the hopper. This bill, if passed, would increase the present \$400,000.00 to approximately \$2,080,000 annually for equalization.

You will, I am sure, wish to keep informed on the various bills as they are presented and upon the possible effect they may have on the educational future of

the state.

Conclusion

The destiny of our country remains within our people. We must make education for peace realistic. The best education for peace will be that which provides our young people with a realistic understanding of the world and its peoples, teaches tolerance and goodwill toward the peoples of all lands, but at the same time maintains a firm determination that our nation shall join in a worldwide effort to banish war from the earth.

I take this opportunity to again express my appreciation to the members of the school board, parents, teachers and citizens for their support in our common effort to maintain good schools.

Respectfully submitted,
ALBERT P. KNIGHTLY
Superintendent of Schools
