DURHAM, NH – A majority of Granite Staters favor a proposed law that would legalize possession of a small amount of marijuana and allow adults to grow up to six plants in their home but would not legalize or tax the sale of marijuana. Majorities would like to keep the minimum age to purchase alcohol and tobacco unchanged in New Hampshire.

These findings are based on the latest **Granite State Poll\***, conducted by the University of New Hampshire Survey Center. Five hundred and sixty-six (566) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between February 10 and February 21, 2018. The margin of sampling error for the survey is +/- 4.1 percent.

### Marijuana Legalization Legislation

The New Hampshire legislature is considering a bill that would make it legal to possess up to three-quarters of an ounce of marijuana and allow adults to grow up to six marijuana plants in their home, but would not legalize or tax the sale of marijuana. More than half of New Hampshire residents (56%) say they would strongly (37%) or somewhat (18%) support this legislation, 25% would strongly (17%) or somewhat (8%) oppose it, 7% are neutral, and 13% don't know or are unsure. Support for this legislation is bipartisan: 61% of Democrats, 56% of Independents, and 49% of Republicans support the law.

Respondents aged 18 to 49, *Boston Globe* readers, those with a high school education or less, those who never attend religious services, and self-described liberals are more likely than others to support the legislation, while conservative talk radio listeners, those aged 65 and older, and those who attend religious services once a week or more often are less likely to support the legislation.

### Minimum Age to Purchase Alcohol and Tobacco

The state legislature is also considering changing the minimum age to purchase alcohol in New Hampshire. A bill to raise the minimum age to purchase tobacco in New Hampshire was recently tabled by the State Senate.

One-third of Granite Staters (32%) believe the minimum age for a person to purchase alcohol should be lowered from the current legal age of twenty-one: 1% each say it should be lowered to 20 or 19 years old, 29% say it should be lowered to 18 years old, and 1% say it should be under 18. More than half of New Hampshire residents (62%) say they drinking age should remain at 21 years old, 5% say it should be raised to an age over 21, 1% say alcohol should be outlawed entirely, and less than 1% don't know or are unsure.

Those who did not vote in 2016 are more likely than others to say the minimum age to purchase alcohol should be lowered.

**Alcohol Age**

A majority of Granite Staters (52%) believe the age to purchase tobacco should remain at 18 years old, 41% percent believe the tobacco age should be raised. One-third say the age to purchase tobacco should be 21 years old, 6% say it should be over 21, and 2% say it should be 19 or 20 years old. Four percent say tobacco should be outlawed entirely and 1% don't know or are unsure.

Respondents age 65 and older and those who attend religious services once or twice a month are more likely than others to favor raising the minimum age to purchase tobacco, while those aged 18 to 34 and Connecticut Valley residents are more likely than others to favor keeping the minimum age for tobacco at 18 years old.

**Tobacco Age**

## Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. Five hundred and sixty-six (566) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between February 10 and February 21, 2018. The margin of sampling error for the survey is +/- 4.1 percent. These MSE's have not been adjusted for design effect. The design effect for the survey is 1.2%.

The random sample used in the Granite State Poll was purchased from Marketing Systems Group (MSG), Horsham, PA. MSG screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers. When a landline number is reached, the interviewer randomly selects a member of the household by asking to speak with the adult currently living in the household who has had the most recent birthday. This selection process ensures that every adult (18 years of age or older) in the household has an equal chance of being included in the survey.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the Granite State Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at [andrew.smith@unh.edu](mailto:andrew.smith@unh.edu).
