## SUPERINTENDENT'S REPORT

---

To the Superintending School Committee and  
the Citizens of the Pittsburg School District:

### Foreword

Certainly the wealth of natural resources which abound here in this northernmost section of our Grand Old State of New Hampshire is vividly impressed upon our minds whenever we stop a moment to reflect upon our surroundings. Whether our thoughts are absorbed with the grandeur of Mother Nature's handiwork on every side, or with the rolling by of truck load after truck load of milk, potatoes, pulp or logs, as the case may be, our conclusion is the same, namely we are living in a land of tremendous natural resources and we are doing something with them.

Deeply impressed as we are by the potentiality of these most generally thought of natural resources, we are sometimes prone to overlook the two all important ones. All others are meaningless without them. The intelligence and initiative of our boys and girls—the determining factors of where we will be tomorrow—are our greatest “natural resources.” Where we are today is not primarily a result of our other natural resources—although we have been most fortunate in this respect—but of the abilities which our youths of yesterday developed. Where we will be in the future will be dependent, in turn, upon the abilities which we help our present younger generation to develop.

Faced with this fundamental truth it is imperative that everything possible be done in our schools to meet these needs. Especially is this true, when we realize that we have not only “come a long way” in bringing about the high standards of living enjoyed today but, also, that we have “gone a long way” in depleting our natural resources of a material

nature in bringing them up to our present high level. It means that the demands upon our educational system are paramount as never before to assist in developing the most vitally important of all our "natural resources" the ability of our boys and girls to successfully meet the many complicated situations of life.

### **Teachers**

The vacancy in the headmaster's and mathematics and science position was filled by James A. Jordan, a graduate of Keene Teachers' College with several years of experience. Edith A. Emery, University of New Hampshire, was selected to teach music to all grades, and Social Studies to Grades 7-10. Eva S. Schoff, Plymouth Teachers' College, and an experienced teacher, was selected to teach Grade 1. Doris E. Fissette, Perry Kindergarten and Boston University, also an experienced teacher, filled the vacancy in Grades 5-6. We are extremely fortunate in having Guy A. Bagley return to teach English, French and U. S. History, Marion K. Gray to teach the Commercial subjects and Lillian M. Ball to teach Grades 3-4.

### **Buildings and Equipment**

During the past year minor repairs and improvements made include storm windows for the Home Economics Room, and installation of a transom over door of basement classroom, occupied by Grades 3-4, for purposes of ventilation. The building is in good condition, and exemplifies excellent care.

### **Enrollment and Attendance**

The present enrollment shows a total of 133, as compared with 124 last year, and 110 the previous year. There are three tuition pupils from Clarksville; two in the High School and one in the Elementary School. Five Pittsburg pupils are in attendance at West Stewartstown. The average percentage of attendance for the past year in Grades 1-8 was 94.78,

and for the High School 95.45. One group, Grades 5-6, had an average of 96.66. The number of tardinesses was 23.

### **Notes on the Budget**

The School Boards' Budget for 1948-49 totals \$36,906.00 as compared with \$30,039.00 for last year. With an estimated income of \$1,800.00, this makes the requested appropriation \$35,106.00. This increase over last year's budget is explained somewhat by increases in teachers' salaries and in the cost of supplies. Also, provision is made for expenses of operation incurred through possible expansion.

### **Need for Addition on Present Building**

With the enrollment in the elementary grades steadily increasing, the need for additional space is becoming ever more acute. This will be further enhanced if provision is made for the offering of courses in high school that tend to appeal to boys and results in their remaining for the four years.

Feasible possibilities indicate a doubling of the present enrollment in Grades 9-12, which would mean a substantial increase in the school's total enrollment.

### **Legislature**

The past year has been an epoch making one in the passing of legislation beneficial to education. Of the several bills passed, the ones of state aid and teachers' salaries are extremely important. The former provides for the annual distribution of \$2,000,000. on an equalization and general basis for both elementary and secondary education throughout the state. The latter establishes minimum teacher salaries dependent upon the amount of training and experience of the teacher.

### **Conclusion**

Again may I reiterate the magnitude of our re-

sponsibility to help our boys and girls to develop sterling characters, sound judgments and deep understandings—the prerequisites of extensive ability. The degree to which not only our section, but also our nation, maintains and improves upon its present status is going to be directly proportional to the extent that these traits are established and function in the routine every-day living of its citizens.

May I take this opportunity to express my deep appreciation to the members of the school board, parents, teachers and citizens for all the help received in endeavoring to maintain high standards in our schools.

Respectfully submitted,

ERNEST B. DANA

Superintendent of Schools
