REPORT OF BOARD OF EDUCATION

To the Citizens of Bethlehem:

The school board herewith submits its annual report. The report includes the treasurer's report for the fiscal year July 1, 1938 to June 30, 1939 with an itemized statement of expenditures; budgets and estimated receipts for the present school year and for next year; written reports by the superintendent of schools and by the headmaster of the high school.

We recommend that the school district raise the sum of \$28,000.00 for the support of schools for the year beginning July 1, 1940.

Respectfully submitted,

Anne I. Wolcott
Mabel F. Harrigan
J. Elmer Harrington
Raymond C. Brooks
Bernard Harvey
Charles Brown

Support of Schools includes all instructional expense, maintenance of school building, health, transportation, and other special activities.

General Expenses include administration, per capita tax, insurance, and new equipment.

Debt and Interest include the bonds and interest on the new building.

Per Pupil Cost—Total is found by dividing the total payments by the average membership.

Per Pupil Cost—Current Costs is found by dividing the payments after the deduction of debt and interest charges by the average membership.

Superintendent's Report

To the School Board:

I am pleased to submit the annual report relative to your schools.

Attendance figures for the present school year by grades and total enrollment for the past nine years follow:

Grade	I	II	III	IV	V	VI	VII	VIII
	16	13	24	10	17	19	22	16

Grade	IX	X	XI	XII	P. G.	Total
	15	7	12	15	2	188

Total Enrollment:

1932	1933	1934	1935	1936	1937	1938	1939	1940
228	231	233	231	233	213	203	194	188

The enrollment is slightly less at this time than last year and considerably less than five years ago. It is about the same as it was 12-15 years ago. The enrollment figures given above are greater than the average membership figures given in the table of school finances. School costs per pupil are usually figured on average membership.

A study of the table headed "Bethlehem School Finances" shows that the difference in costs since the construction of the present building and the years preceding that date is about equal to the debt and interest charges. You have now about the same number of pupils that you had in the years previous to 1931. For five or six years, from 1932 to 1936, the school membership increased slightly, due to the larger resident population. The total costs increased only slightly and the per pupil cost consequently decreased. Since 1936 the number of pupils has decreased and the total costs have remained about the same.

The cost per pupil has consequently increased. The current costs, per pupil, however, have been slightly less than for the four years before the present building was constructed.

In voting for the present school building you realized that your total costs would be increased. You doubtless knew that the cost per pupil would be one of the highest in the state because of the small number of pupils. You also knew that the tax cost in comparison with other school districts would not be excessive. Last year your cost, current expenses, per thousand dollars of equalized valuation was \$6.12, one of the lowest of the 241 school districts. The additional cost, counting the debt and interest charges on the building was \$2.17. The combined costs make the school tax burden relatively low. You wanted a better school home for your pupils. You have provided an excellent one without a serious tax burden.

Last year the appropriation was \$27,500.00. Some expenses not planned for will make the total expenditures for the year greater than the budget. The school year will close with a deficit. The amount of the Forest Reserve Fund and of the dog tax cannot be accurately predicted. The average amount of these items for the past five years has been \$538.54. If that amount is available this year the deficit should not be more than \$300.00. Adding that deficit to the budget you have approved, the total requirements for next year would be \$28,895. An appropriation of \$28,000.00 should be made at the district meeting. While it may not be quite enough to balance the accounts in June, 1941, that and the same amount the following year will probably meet the expenditures over the two year period. The school building bonds are now reduced to \$60,000.00.

Last year \$450.88 was spent for repairs and improvements of the building and grounds. The largest item was for painting. A part of the expense from the damage done to the heating system by the high water pressure was paid last year and a part of it this. The Traveler's Insurance Company has paid the district the sum of \$135.91 for this damage. At the time of settlement all items of expense were fairly considered and accounted for. During the present year, how-

ever, additional expenditure has been necessary for the installation of a new motor to operate the stoker and for extensive repairs on the motor operating the pump. The sum of \$400.00 has been listed in the repair item in the next year's budget. The necessary repairs should not exceed this amount. Some improvements should be made each year so that building needs will not accumulate to make the expense large in later years.

The report of medical inspection and remedial work last year shows that dental clinics were held twice a month and 21 pupils received treatment, that 10 pupils received glasses, that 3 pupils had throat operations, and that many of the pupils suffering from underweight made substantial gain. Hot lunches were served for three months. The money for this work was given by the local ladies' club or by persons interested in the work of the Community Nursing Association. For several years the school district has appropriated \$150.00 for the nursing association and the town of Bethlehem has appropriated \$300.00. These contributions with the appropriations by the town and school district of Littleton, and the aid of the Red Cross for the use of the automobile, maintain the district nurse in Littleton and Bethlehem. The district nurse gives valuable service to the schools and in the homes. The appropriation for this work should be continued.

In most school systems instruction in health and physical education has been neglected. A more thorough medical examination should be given all pupils, more funds should be provided for corrective work, and more class instruction in physical education should be planned for the upper grades of the public schools. You have the gymnasium, auditorium and playground opportunities for an adequate program. Teacher time and equipment have limited the scope of the work in physical education in the high school to the development of the athletic teams and some gymnasium games. The elementary pupils have health instruction and safety instruction through the grades, and have gymnasium and playground games. The general public, as well as those professionally interested in education, are focussing their attention upon safe and healthful living. The program in your schools should be more definitely organized and should be gradually extended.

For several years I have recommended the introduction of courses in practical arts—in woodworking and in home economics. Last year I called your attention to the possible offering of a course in crafts. Some of these courses should be included in your high school program as soon as you believe funds are available for the equipment and teacher time.

A motion picture machine has been purchased for the school this winter. This is a sound machine of the latest type and should be of considerable value for instructional purposes in all grades. Many educational films can be procured without cost other than express charges. Visual instruction will doubtless be a more definite part of the educational program in the future.

Two changes in the teaching staff have occurred this year. Miss Eaton resigned to accept a position in Laconia. Miss Isabel Rhome was selected for the primary room and is doing very satisfactory work. Mr. Terrence Rafferty was selected to take the position made vacant by Miss Hogan's resignation. Mr. Rafferty is teaching English and French and coaching the boys' athletic teams. He is efficient and popular and is proving the value of having a second man on the staff. The other teachers are doing excellent classroom work.

Again, I wish to thank you for your interest and helpfulness in the consideration of all school problems.

Respectfully submitted,

DANA S. JORDAN.

Headmaster's Report

To the Superintendent of Schools:

The following is my annual report and summary of work. The total enrollment for the present year is fifty-one pupils. There are fourteen seniors, twelve juniors, seven sophomores, fifteen freshmen, and two post-graduates. The percentage of attendance for the present year is good, and the number of tardinesses low.

The standards set by the State Department of Education were fully met for the year ending June 24, 1939. Of those who were graduated, none entered institutions of higher learning. The senior class did very well in reading tests given by the State Department of Education, most of them exceeding the median set for this test.

The pupils have shown to the teachers that fine spirit of cooperation which is essential for good work. What is particularly gratifying is the seriousness with which most of the pupils regard their school work. At this time I wish to emphasize a point which I have taken up before. From a teacher's point of view one of the most important gains from ranking grades is to diagnose a pupil's difficulty. We realize the futility of grading for its own sake as being both meaningless and misleading. I feel that undue importance has been placed on grades as if they indicate a true criterion of a pupil's work. Some students who are gifted may, by doing little studying, receive high grades, while slower ones may study much harder and receive poorer grades. As a teacher, I realize how impossible it is to judge a boy or girl on the basis of a numerical marking scale.

The only real standard I am interested in is the constructive and diligent attempt of the pupil to do as well as he possibly can. Is the pupil taking full advantage of the opportunities made possible by

our tax-supported, educational system? If not, no matter what his grades, he is failing in his work. I am much more interested in effort than in grades. To get the most out of school, the minimum amount of home work done every night by the average high school pupil should be not less than two hours. Below the high school level, with the exception of occasional project work, each pupil is allotted time enough to do his preparation in school. Pupils in the junior high grades may be expected to do some home preparation, but any pupil at this level who does not waste time in school need never take home much work.

Formal studies should not by any means take up all of a pupil's time. There are many other worthwhile things in school that are beginning to receive more and more attention by educators everywhere. Not the least important of these are activities that deal with citizenship. When our children leave school they must be able to take their responsible places in a democracy and learn to live with other people. The foundation for this training should properly begin in school. The pupil who cannot be depended on, who shirks responsibilities placed on him, and who will not cooperate with others will make a very poor citizen. The pupil who is allowed to be frequently absent or late to school not only interferes with the school program, but in a sense is laying a poor foundation for citizenship.

Our extra curricular activities have, thanks to the Activities Association, been self-supporting. However, transportation costs due to winter sports and golf will be a severe drain on the treasury. The basketball teams are enjoying a better season than they have had for several years. The spirit of the teams is excellent due in part to the fine supervision of the coaches. There is a tendency to place more emphasis on sports such as golf and winter sports which have a definite carry-over value. These sports, also, enable many more contestants to compete. In addition they have a health value, because golf and winter sports are carried on out-of-doors. Pupils are showing increased interest in activities which call for self-expression, such as play and skit acting. This interest is being encouraged, as much valuable training may be derived therefrom.

I am very pleased to report that having another man teacher has been of great benefit to the school.

The health of the boys and girls has been unusually good this year. Again hot lunches are being served. Two girls under the supervision of a teacher prepare the lunches.

In closing I wish to thank you for your valuable help to the teachers and to me. I also wish to express my appreciation to the school board, to Mr. Norman, and to the citizens for their hearty cooperation throughout the year. To the teachers I am indebted for the fine spirit which they have shown—a spirit which has done much to make the past year a successful one.

Respectfully submitted,

EDWIN BETZ.
