The goal of this project was to design and build a robotic dog modeled after Goddard from the 2001 television series, *The Adventures of Jimmy Neutron Boy Genius*. Sheet metal was used for the body of the robot in order to keep the frame lightweight. Goddard travels on two wheels powered by electric motors and two caster wheels. The robot utilizes a Raspberry Pi as its master device and an Arduino Uno in order to control the robot. Essentially, Goddard acts and behaves like an ordinary dog from barking, to finding his dog bone, to being a great companion and friend. In addition, Goddard also has access to the extensive knowledge of the Wolfram Alpha database and can be controlled using voice commands or over a wireless internet network using a keypad (shown below and to the left).

- Arduino
- Serial Communication
- Sensor Networks
- Control Systems
- Welding Techniques

**Electronics**

- **Raspberry Pi**: Acts as the interface between user and Goddard while intelligently commanding the robot
- **Pi Hub**: Delivers power to the Arduino and facilitates serial communication between the Arduino and Raspberry Pi
- **Arduino Uno**: Used to control the mechanical actions of Goddard and monitors the sensor network
- **29:1 Metal Gearmotors**: Provides Goddard with the ability to move
- **Dual MC33926 Motor Driver Carrier**: Regulates current and governs the performance of the metal gearmotors
- **Maxbotix Ultrasonic Rangefinder**: Offers directional awareness
- **Pololu IR Beacon Transceiver Pair**: Allows Goddard to locate his dog bone using infrared technology
- **Power HD Micro-Servo**: Controls the movement of Goddard’s tail
- **Power HD Standard Servo**: Manipulates Goddard’s head and neck
- **Pololu 38 kHz IR Proximity Sensor**: Detects human interaction
- **12 V, 9500 mAH Ni-MH Rechargeable Battery**: Powers each electronic component in Goddard

**Commands**

- Bark (plays an mp3 of Goddard’s bark)
- Bump (plays instrumental hip hop while bobbing head)
- Come (Goddard finds his bone)
- Dance (plays music while moving around)
- DJ (plays music)
- Growl (plays an mp3 of Goddard’s growl)
- Help (Displays a list of commands that Goddard understands)
- Who, What, Where, When, Why (queries Wolfram Alpha)
- Kill (stops audio)
- Kiss (plays an mp3 of a kiss)
- Move (manual movement)
- Roam (autonomous mode)
- Say and speak (allows Goddard to verbally communicate)
- Scold (plays mp3 of a whimper and Goddard puts head down)
- Sleep (Goddard snores and puts head down)
- Tweet (tweets to Twitter)
- Wag (tail wag)
- Wake (wakes up from sleep)

**System Block Diagram**
