9. EFFECT OF REVOCATION: A REVOCATION OF THE FINAL LICENSE OF A MHP SHALL SUSPEND THE RIGHT TO CONTINUE THE SALE OF UNSOLD LOTS OR TO RENT OR LEASE ADDITIONAL LOTS, WITH OR WITHOUT MANUFACTURED HOUSING UNITS, BUT SHALL NOT BE CONSTRUED TO PREVENT THE USE OF RESALE OF LOTS PREVIOUSLY PURCHASED BY THIRD PARTIES. IN THE CASE OF MHP'S IN WHICH THE OBLIGATIONS OF THE DEVELOPER HAVE BEEN ASSUMED BY AN OWNERS' ASSOCIATION, THE REQUIREMENTS HEREOF SHALL BE ENFORCED BY A FINE OF \$100.00 PER DAY FOR EACH DAY OF VIOLATION AFTER NOTICE THEREOF TO THE ASSOCIATION BY THE BOARD OF SELECTMEN.

SELECTMEN'S REPORT

The Town of Plainfield has operated quite smoothly for fiscal year 1986. There were few personnel changes this year. The highway crew, under the management of John McNamara, has done a nice job of maintaining the town roads and equipment. Gordon Gillens has kept the Police Department running well with a substantial increase in calls. Nancy Baker has been busier than ever keeping things under control in the Town Office for the Selectmen. All the town employees have worked above and beyond the call of duty. Selectmen Baird and Haubrich have regretfully accepted the resignation of Sherry Kelley. They shall miss her cheerful attitude, good judgment, and hard work.

Lots of meetings and long hours and hard work by the members of the Planning Board has resulted in the completion of the Town Master Plan. This document will support other documents and be a guide to the Town Officers.

The heavy rains of last summer took their toll on Croydon Turnpike which resulted in several relatively expensive and temporary repairs. The Selectmen support John McNamara's proposal for some repairs this summer of a more permanent nature.

We will see the beginning this year of the new refuse disposal system in Claremont. Its cost is about one dollar on the tax rate. Fortunately other capital expenditures have been simultaneously reduced by a similar amount. Insurance is still a sellers market and continues to rise, though somewhat more slowly.

The Selectmen have recommended, and the Finance Committee approved, a plan for a Capital Reserve Fund to be set aside each year after the highway equipment note is paid off in two years. This would allow this equipment to be replaced in an orderly fashion with no increase in taxes and no need to borrow money for that purpose.

The Selectmen wish to extend their sincere thanks to those town employees and citizens who have helped to administer the town's business throughout the past year.

Respectfully submitted,

Peter W. Haubrich, Chairman
Bruce W. Baird
Sherry W. Kelley

REPORT OF REPRESENTATIVE SARA M. TOWNSEND
REPRESENTATIVE TO THE NEW HAMPSHIRE GENERAL COURT

While the first-in-history annual session in NH ended in rather a stalemate between the House, Senate, and Governor as to the Connecticut River Valley Resource Authority, so important to this region, we did manage to do quite a few useful things for the people. I shall cover only a very limited number, but would be happy to go over with anyone the complete record of exactly what we did -- over 400 new laws.

A 10-year highway construction plan was developed; we enacted emergency "tort reform" which pleased the insurance folks but has been something of a disappointment to nearly everyone else so far; a children's protective fund was established under a matching grant system and lots of private sector contributions (we hope); the problem of moorings and docking facilities was partially addressed with a study committee to come in with recommendations--unfortunately, this seems to have been incomplete and the problems are being handled by rules thus far; under certain conditions students of approved high school vocational, electrical and plumbing programs may do installations in individual houses; there was a financial disclosure bill passed, but it needs to be revised already; it is now illegal to smoke in grocery stores; the enforcement of bingo was transferred to the Dept. of Safety; the foundation aid formula for schools was changed, but underfunded (what else is new in NH?). It is now illegal to sell cigarettes to minors; libraries must now make annual reports of their trust funds to the Office of the Attorney General; NH will now have annual instead of semi-annual motor vehicle inspections as soon as the Dept. of Motor Vehicles gets its act together (their handling of this was a major disappointment to all those who supported the bill during the legislative process); part-time employees who work 15 hours a week may now be given healthcare group insurance coverage; elderly affairs will now be placed in the division of adult and elderly services; we created a Dept of Environmental Services under the reorganization program; and we have a full-time county attorney now.

As I said, this is but the tip of the iceberg. Please be in touch with me should you wish to know more about these or other new laws. It is always interesting to me that I receive calls from many people who live far out of my district and I am always happy to help.

New Hampshire is "in the black" with a surplus. How do you feel about that? Call (or write) 469-3313.

REPORT OF MERLE W. SCHOTANUS
REPRESENTATIVE TO THE NEW HAMPSHIRE GENERAL COURT

The advent of annual sessions in 1986 served me well to achieve a modicum of effectiveness which otherwise would have been very difficult under the biennial system. Although learning county government while chairing the County Delegation in my first term was difficult, I now feel comfortable in that area as well.

The 1986 General Court witnessed a legislature in transition. Many good pieces of legislation fell victim to House-Senate wrangling over supplemental budgets and annual sessions. Even so, teamwork achieved by the Sullivan County Delegation resulted in several laws beneficial to the county and the district. Sara Townsend and I were able to obtain funding to restore the Cornish-Windsor bridge. I was also successful in getting legislation passed to establish the office of full time County Attorney which is beginning to pay dividends in assistance to our local police departments. The Connecticut River Valley Authority bill succumbed for the second time to unsavory political fights.

The 1987 session will be very busy. Cutbacks in federal funds, together with the Governor's inaugural acceptance of State responsibility for programs and funding previously supplied by the federal government promises many demands on the budget surplus enjoyed by New Hampshire. I will again serve on the Environment and Agriculture Committee and expect to be busy helping to formulate and act on legislation to make our hazardous waste, solid waste, and air quality standards and laws responsive to our rapidly growing State. Preserving open space will be a significant part of my work. I intend to support current initiatives on the Land Trust and to help find ways to give local planning boards and conservation commissions better tools to help guide growth without damaging our quality of life.

Some of the bills I am co-sponsoring in the 1987 session are: Connecticut River Valley Resource Authority; agricultural promotion; formula for increased State revenue sharing to the towns; Cooperative Extension Service funding; and another bill (the seventh Cornish-Windsor bridge act since 1784) to increase bridge restoration funding and get the project underway in 1987. I will also be monitoring education bills which can assist our towns to provide quality education without increasing our tax burden.

I am again serving as chairman of the 16 member County Delegation. I have taken the initiative to reorganize the Delegation to strengthen county representation in the House. Four committees have been established-Commerce, Resources & Environment, Human Services, and Administration- to better monitor legislation of interest to Sullivan County. I am confident this organization will continue to foster the teamwork that has assisted us in strengthening Sullivan County's voice in Concord, as well as to keep the county budget at manageable tax levels.

Your comments on bills before the legislature are extremely important in helping me to represent you effectively. Please drop me a note or call (863-1928 or 271-3661) to keep me informed of your views, or when you need help in Concord.

Representative Merle W. Schotanus; Grantham
District 1, Sullivan County

WELFARE REPORT

In 1986 \$1,171.63 was spent on General Welfare. \$2,086.74 was spent on Old Age Assistance from 1985, and \$2,000 was refunded by an individual who had received assistance in the past.

We must keep prepared to assist the needy due to the increase in State-mandated costs that have been placed on towns.

MERIDEN LIBRARY TRUSTEES REPORT

Some new changes in the Library include an office space - thanks to Sue Timmons and Audrey Logan and their help the room downstairs located next to the childrens room has been cleaned of useless items, painted and set up to clear the area on the main floor of office clutter.

Programming for children in 1986 included a summer reading program, special parties, monthly movies and a monthly story hour presented by Ann McAllister. Many little ones enjoyed her costumes, puppets and stories.

A book sale held in September was very successful and a thank you to all who helped and to those who donated many books for the sale. Books for the sale are accepted all year round and some are put in the front hallway for yearly purchasing. All proceeds go toward the purchase of new books.

The Chellis showcase is available for anyone who wishes to display a collection. In 1986 Alton Barnes exhibited old farm items; Sue Timmons exhibited old postcards, old books, patriotic items and old kitchen wares and Howard and Connie Zea exhibited their collection of old toys. During open house in November, those attending enjoyed the photography exhibit of birds by Betty Robinson and carved birds by Kevin Garrison along with collections and papers relating to the history of the Meriden Bird Club and items telling the history of the Meriden Library.

The librarians participated in meetings and workshops on the local and state level and continued with classes offered by the State Library through the school for Lifelong Learning.

We want to remind the public of the Meriden Library Building Fund initially funded with a gift from the estate of Murray Stevens. Gifts may be made to the fund at any time by contacting the trustees of Meriden Library.

The librarian and trustees have always welcomed patron's suggestions of titles they would like to see in our collection and many of you have been most helpful. Now through two core groups, two book committees have been reactivated. Adult committee members are: Audrey Logan, Jack Ragle, Pollie Davie, Sherry Keller, Marc Rosenbaum, Mayme Noda, Marie Steinsieck and Sharon O'Leary. The children's committee members are: Ann McAllister, Donna Beaupre, Mollie Sheehan and Judy Durant. Meetings will be held once or twice each year. Anyone is invited to attend or contact any member or the Librarian with his or her suggestions for future acquisitions. It is hoped that the activities of these committees will facilitate the broadest response to the varied interests of our residents who use their Library.

A reminder to all clubs, the Library is available for use for meetings. The 4-H club and Cub Scouts use our downstairs room for meetings monthly and weekly. You may contact the Librarian during library hours at 469-3252 or at home any time, 469-3459 if your group wishes to use the library for a meeting place.

A thank you to Fred Cushing for his service as a trustee this past year, his presence will be missed. Fred was completing the term on the board of the late Mary Cushing.

We thank all our supportive patrons and invite any resident who has not yet visited their Library to do so in the near future.

PHILIP READ MEMORIAL LIBRARY
TRUSTEES REPORT

Circulation at our library increased almost 5% in 1986 with a total of 9,788 books, magazines, tapes, puzzles and other library materials circulated compared to 9,335 in 1985. In addition to 455 books purchased, 141 books as well as magazines and other items were given to the library.

Lack of room for expansion continues to be a serious problem: books must now be "shelved" on the floor and window sills. The forthcoming Master Plan recommends that an addition be built on our library. With this in mind we have prepared a questionnaire for circulation throughout the town to determine the attitude of the citizens regarding this proposal and other matters concerning the facilities and services of both libraries.

We are very grateful to Ruth and Jesse Stalker for their gift to the library of an Apple II Computer, which will be ready for use in early 1987. Within a year or so, when funding becomes available, we hope to join the New Hampshire Automated Information System.

Our children's programs, which include the monthly free movies, the story hour on Friday afternoons and the summer reading program, continue to bring many children to the library. Several contests and holiday parties were held. "The Old Woman in the Shoe" presided over the float of the Meriden and Plainfield Libraries in the Fourth of July parade.

The third annual book-discussion program, funded by a grant from the New Hampshire Council for the Humanities, was again well attended. Also, a small group began an informal morning book-discussion group in December to be held once a month if there is sufficient interest. All are welcome to participate in these programs; our library will supply further details.

A quilting course was conducted by Ruth Wheeler, and a group of women collaborated on a wall hanging depicting scenes of the town. Travel programs included "A Trek to Mt Everest" and a view of life in his homeland by a Swiss exchange student living in Plainfield Village. The Shakers, New Hampshire gravestones, and the use of herbs were the subjects of other programs.

There was a combined attendance of 1,030 adults and children at the various programs. Thirteen individual groups used the library as a meeting place during the year. Both town libraries sponsored a Candidates' Night at the Plainfield Town Hall for the area candidates for the office of state representative.

The memorial showcase, which has held a wide variety of exhibits in 1986, is open to anyone wishing to display interesting or unusual items.

Librarian Nancy Norwalk completed two library-science courses in 1986 and will take additional courses in 1987 to meet the requirements set forth in the N. H. State Library Standards.

A successful book sale in September as well as memorial and other donations have enabled us to purchase more books (including an unabridged dictionary and a five-volume science encyclopedia) than we otherwise would have. The Friends of the Library, under the able leadership of Diane Rogers, continue their fund-raising activities year round (sale of flags on Fourth of July, sale of notepaper and other items, food sale, etc.) and assist the library as their finances permit. This year the Friends purchased a collection of adult book tapes. New members are always welcome.

We are very fortunate that our librarian, Nancy Norwalk, possesses the abilities and has the willingness to fill a position which runs the gamut from administrator to purchasing agent to grant writer to janitor. We are grateful to the friends for their support, to the volunteers and other helpers for their valuable assistance, and to those who gave books and donations in 1986.

The library is a public service which provides something for everyone from age two to 102. We need the support of the entire community to maintain standards and to grow to meet the needs and expectations of our patrons.

Respectfully submitted,

Kathleen Garrison

REPORT OF THE PATRIOTIC COMMITTEE

The Plainfield Patriotic Committee undertook two major projects during 1986.

First was the Fourth of July observance, which included celebration of the 225th anniversary of the town's founding. A variety of events and activities marked the day, all held at Plainfield Plain and attended by several hundred people.

A highlight of the Fourth was the reenactment of the chartering of Plainfield by Governor Benning Wentworth in 1761.

The committee began work on publication of a history of Plainfield. A publisher was retained to set the type, print and bind the book and the committee began lining up townspeople to write various chapters, gather maps and photographs and handle the myriad of other details this project will entail.

The committee hopes that a history can be completed in two or three years.

HAZARDOUS WASTE COMMITTEE REPORT

The Hazardous Waste Committee has not met this past year. This is mainly due to the death of our Committee chairwoman, Emily Quimby.

While Mrs. Quimby was still among us, we held several meetings with State officials to define the exact nature of Hazardous Waste and to see how the problem presents itself in the local community.

The Committee promises to renew its interest in Hazardous Waste disposal; especially since the Federal government is interested in finding nuclear waste burial grounds and has given a high priority to clean water action, passing a \$20,000,000,000 bill to this end.

Respectfully.

1986 ANNUAL REPORT
CONSERVATION COMMISSION

The Commission regretfully accepted the resignation of two members, Basil McNamara and Thomas Jekanowski, in 1986. We also welcomed two new members, Nancy Mogielnicki and Mary Ellen Sullivan.

In the spring, the Commission assisted the 8th Grade graduating class with the planting of their Class Tree. An oak, chosen for its endurance and longevity, was planted at the flag triangle at the school.

Two eighth grade girls, Shawn Carpenter and Connie Robb, were selected to attend the June Conservation Camp.

Throughout the summer and early fall, the members assisted the Committee for the Plainfield Village Recreation Land in preparing the grant application.

For 1987, the Commission, in conjunction with the newly formed Trust for N.H. Lands, will be concentrating our efforts on creating an inventory of Plainfield lands that would be seriously endangered by overdevelopment. The Master Plan chapters on Open Land and Recreation clearly defines a need and desire to preserve areas in our town for both recreational and aesthetic values. With an inventory available, we hope to work with landowners to find ways to protect some of the most essential and valuable tracts for wildlife, scenic impact, farming, and recreation.

We also feel that there is a strong need for monitoring our water resources for potential problems. We would do this by water tests on a regular basis at key spots.

We need the assistance and input of Plainfield residents to prepare the inventory and to identify potential problem areas. We also want to work with landowners who would like information on how they might preserve their land without having to sell or if they are considering selling, in finding ways to insure that development is done with a minimum impact on environment.

Please contact a Conservation member with your ideas and questions.

Respectfully, Ruth Ann Wheeler, Chairman
Carl Strong, Nancy Mogielnicki, Steve Beaupre,
Mary Ellen Sullivan, and John Zimmer

1986 REPORT OF THE
PLAINFIELD BOARD OF ADJUSTMENT

Special Exceptions were granted during the year to:

1. Nancy Robes to allow the operation of a small woodworking business in the existing workshop on her property on Jenney Road in the Rural Residential Zone subject to the condition that the lot upon which the shop is located must have sub-division approval.

2. Sidney Hammond to allow for the manufacturing of wooden trusses and panels at the old snath factory in the village Residential Zone on Route 12A in Plainfield Village subject to the following conditions:

(1) Hours of operation shall be limited to Monday thru Friday 6 A.M. to 5 P.M.

(2) All fabricating work shall take place inside.

(3) The factory shall be adequately screened on the west side of the lot facing Route 12A with evergreen trees 6 to 8 feet tall, planted 15 feet apart inside the present fence.

Samuel E. Mintz was granted a permit to allow the creation of a planned residential development consisting of six condo-minium units and an apartment on the former Maxfield Parish property in the VR, RC-1, and RC-2 Zones.

Henry Therrien requested a rehearing and was again denied a variance to permit him to house an employee as a security guard in an apartment in his retail space on Route 12A in the Residential Zone.

A rehearing was requested and again denied to:

Henry Therrien, under RSA 674.33 1.(a), from an error made by the Administrative Officials of the Town of Plainfield regarding the interpretation of the term "Accessory Use" under Article Eight, Section 8.7, DEFINITIONS wherein Mr. Therrien asks that the ZBA hold that the definition of "Accessory Use" allows the use of a small residential apartment on his retail premises as an allowed use "incidental and subordinate to the principal use of the premises, and which does not change the basic character thereof".

RECREATION COMMISSION

The Recreation Commission organizes athletic events and programs for Plainfield residents. The programs emphasize personal enjoyment, physical fitness, and skill development, and provide opportunity for each person to participate. Conduct and sportsmanship from players, coaches, and spectators have a higher priority than winning or perfectionism.

During the past year the Commission sponsored a baseball program and a Red Cross certified swimming program during the summer. In the fall there is a soccer program for girls and boys in 2nd, 3rd, and 4th grades with weekly games with similar groups from neighboring towns. The 4th of July road race and Thanksgiving Turkey Trot are also organized by the Recreation Commission.

Some possibilities for new activities include an intramural basketball program, X-C ski trails, and tennis lessons. New ideas and comments on existing programs are always welcome.

Beginning this year a nominal user fee will be charged for each program. The money raised will be used for equipment purchases, facilities maintenance, and to offset the ever-increasing insurance costs. A scholarship fund will be maintained to ensure that no one will be excluded for financial reasons.

Recreation Commission members are:

Jane Fielder	John Zimmer	Alex Cherington
Katie Feichtinger	Jay Waldner	Charlie Tabor

MERIDEN GOOD CHEER AND CHRISTMAS COMMITTEE

A big thank you to the Meriden community for your generous gifts made to the Good Cheer during the Christmas season.

A number of families or individuals received food certificates or gifts of money when there was a need in 1986 through your generosity and love. A gift of \$500.00 was given, in memory of all our friends who left us in 1986, to the school for equipment or teaching needs of the special ed or handicapped students. Given in memory of Mary Akerstrom, Allen Bailey, Mary Cushing, Peter Holland, Florence McNamara, Ray Pardo, Emily Quimby, Dorothy Strong and Edith Whitney this gift was accepted with many thanks.

As the new year goes on, the committee will continue to use your gifts to brighten a neighbor's day.

EMILY QUIMBY

12/13/31-02/28/86

Emily Quimby represented, in so many ways, the finest qualities of the people of Plainfield. We are glad to call Plainfield our home because of people like her.

A shepherdess, sugarer, herbalist, gardener - Emily loved our Plainfield land and sought to preserve its beauty. A pianist, singer, penny whistler - Emily made feet tap and hearts warm to music sung around a living room piano, chorused in church, or doodled down Main Street on July 4th. A friend and neighbor - Emily's tea and lemonade were enjoyed by more than a few. She knew how to listen, teach, calm, and encourage. Hers was a home away from home. A peace pilgrim - Emily struggled to find what was just and right. Her journey led down the roads of our town and out into the world.

Emily would have loved to read this town report and been glad to know that Plainfield is peopled by good folk who in their own way have contributed to our community life. Some of their names and their efforts are recognized in this report. Emily was one of those people, just one of many, one of us. And that is good!

REPORT OF
SOCIETY FOR THE PRESERVATION OF THE COBBLESTONE TIGER BEETLE

1986 was a banner year for Plainfield's Cobblestone Tiger Beetle. Elected "Town Insect" at our March Town Meeting, it has risen from obscurity beneath the cobblestones of Burnap Island to an unexpected measure of fame and, for the taxpayers of Plainfield, a small bit of fortune.

The prize for creative Tiger Beetle support must go to Paul Gross in Hanover, who designed and donated a solid gold beetle for raffle during our 4th of July festivities. Funds from the raffle enabled us to create the Plainfield Tiger Beetle Fund which has handled the purchase and sale of Tiger Beetle T-shirts.

John Tonseth's rendition of *Cicindela Marginipennis* has been screened onto almost one thousand T-shirts which have been bought with delight by Plainfield residents and many others as well. Sale on the 4th of July netted \$500.00 for the Town Treasury and subsequent income has been used to provide environmental education to Plainfield school-children. We are very grateful to the retail organizations which enthusiastically and cheerfully added T-shirts to their inventories. Sales by Edgewater Farm, Mericrafters, the Meriden Country Store, Mink Brook Outfitters, the Plainfield General Store, and Soucy's are largely responsible for the success of the PTBF.

Recognition of the Cobblestone Tiger Beetle has spread far beyond our borders. News reports have appeared around the country and shirts have been sent to at least 12 states, Canada, England, Poland, Finland, and the Soviet Union. Most gratifying, perhaps, is the fact that in August, the State of Vermont declared our beetle their first officially protected insect.

A scrapbook of news clippings, Tiger Beetle Memorabilia and a tape of a New Hampshire Public Radio program on this subject has been presented to the Plainfield Historical Society.

REPORT OF THE PLANNING BOARD

The Planning Board met regularly on the third Monday of each month in the Town Office starting at 7:00 PM. In 1986, in addition to regular meetings, eleven special meetings were held. A total of 43 new lots were created by subdivision. By comparison, 34 new lots were created in 1985 and there were 5 annexations. 35 preliminary consultations were held, many of which resulted in subsequent subdivision. The many special meetings were held in connection with work on and acceptance of the various chapters of the Master Plan. The Board continued making recommendations on all Special Exception and Variance applications, as requested by the Zoning Board of Adjustment.

The Master Plan Chapters have all been voted on and adopted by the Board after public hearings, revisions, and corrections. The input of the public, the Selectmen, and the Zoning Board of Adjustment has been vital to the whole process which was a two year project. The next step is to change Zoning Ordinances and Subdivision Regulations to reflect the directions in growth as set forth in the Master Plan. While a few changes will be voted on at the 1987 Town Meeting, the Board expects to implement more changes in the 1988 Town Meeting.

The past year has seen the predicted growth of the Upper Valley area begin to impact Plainfield more heavily. With a larger number of approved subdivisions, more preliminary consultations, and an increasing number of real estate transactions, the Board can look forward to a very active 1987.

The membership of the Planning Board changed during the year. Raymond Morin and Armand Rondeau were appointed to fill vacancies left by Michael McNamara and Marc Rosenbaum. Peter Haubrich replaced Sherry Kelley as ex officio member.

ROAD AGENT REPORT

The cost of winter sand has been kept way down due to the availability of sand from our Town Pit. We used 5,000 yards of sand in 1986. This works to our advantage in keeping underbudget.

Last year's projects were Whitaker Road, Beauty Hill and Old County Roads. Along with our general maintenance, we installed 35 new driveway aprons.

The Dutch Elm disease has taken it's toll, creating alot of tree work which will be continued this year.

The 1987 proposed projects are Croydon Turnpike - widening to make sufficient drainage and room for snow removal; a portion of Methodist Hill Road - excavated for proper drainage (work load shared with the Town of Enfield); a short portion of Chellis Road needs to be widened; general grading and ditching; and, we hope to do more gravelling of roads.

John H. McNamara, Jr.
Road Agent

CORNISH RESCUE SQUAD

1986 was a very busy year for the Rescue Squad. We had 114 calls for our services as well as many additional hours providing coverage for the Triathlon, the Youth Hockey Tournament in Meriden, and the Cornish Fair.

We would like to thank everybody in town for the support that has been shown to us on our recent fund raising event. As you know, we have purchased a new truck chassis and are putting our old rescue body on it. Part of our latest fund raising efforts is to save money for a new rescue body sometime down the road. Also, we are looking at some major expenses in the future to up-date our communications equipment and to keep up with the new technology and innovations in our medical equipment.

Again, thank you for your support.

1986 ANNUAL REPORT COMMITTEE FOR PLAINFIELD VILLAGE RECREATION AND CEMETERY LANDS

At the March 1986 Town Meeting, Article XIV was passed, appropriating \$17,000 towards the purchase of a 17 acre parcel of land at the corner of Route 12A and Stage Road to be used as an extension of the village cemetery and to provide a much needed piece of recreation land for the Plainfield Village.

In June, an application was received for a Land and Water Grant from the N.H. Parks Department. The committee worked throughout the summer and early fall obtaining the materials and information needed to complete this application and meet the requirements of the grant.

This was a community project and we received letters of support from Cheryl Mills on behalf of the softball group who play regularly on the field; Julia Brennan and Priscilla Barnett on behalf of the young parents in the village; the Plainfield School and the School Board; the Recreation Commission; Plainfield Conservation Commission; Upper Valley-Lake Sunapee Council; the Upper Valley Land Trust; the Society for the Preservation of N.H. Forests; and our Planning Board. Maps were drawn by Robert Soderman showing potential use of the field and woods; photos were donated by Carl Strong, Basil McNamara and Ruth Wheeler. A possible playground plan was submitted by Kim Wheeler and Amy Norwalk.

In October, all the materials and information were formally compiled by Donella Meadows and the grant application sent to the Land and Water Division of the N.H. Parks and Forests. The land was formally inspected by Mr. Joseph Quinn in late November.

In mid-December, we were notified that we have received State Approval of the grant, which has now been submitted for Federal approval. Our next step is to obtain an appraisal to meet Federal standards.

It will be a while before we know the final results and due to the timing of the actual release of funds, an indefinite period of time before the deeds actually pass to the town.

We wish to thank all of you who have supported our efforts. We will release further information as we have it available.

Respectfully, Ruth Ann Wheeler, Donella Meadows, and Basil McNamara

REPORT OF TOWN FOREST FIRE WARDEN
AND
STATE FOREST RANGER

Between July 1985 and June 1986, we experienced fewer forest fires than normal. The two leading causes of forest fires were again children and fires kindled without written permission of a Forest Fire Warden. Both causes are preventable, but only with your help.

Please help our town and state forest fire officials with forest fire prevention. Contact your Forest Fire Warden for more information.

Enforcement of state timber harvest regulation is the responsibility of State Forestry officials. Our state has excellent timber harvest regulations; however, your assistance is needed.

If you know of a logging operation and suspect a state timber harvest law may be violated, call your Forest Fire Warden.

If you own forest land, you became responsible for the timber tax payment starting April 1, 1986. This is a change in the Timber Tax Law that will impact all forest landowners. Contact your Board of Selectmen for timber tax forms.

PLAINFIELD VOLUNTEER FIRE DEPARTMENT
ANNUAL REPORT 1986

During the course of the last twelve months the Plainfield Volunteer Fire Department has answered a total of 34 calls. We had Engine 1 painted and the lettering done and we installed a new clutch. We have purchased 8 lengths of 1 3/4 inch hose, two new Tack Force Nozzles and 6 pagers.

I would like to extend my thanks to Emma Spalding, department members, and the Ladies' Auxiliary for their continued support of Saturday night socials.

Lastly, persons having outside fireplaces must obtain a seasonal burning permit. Burning permits can be obtained from either Deputy Forest Fire Wardens G. Gardiner MacLeay and Douglas Chapman or Forest Fire Warden Peter A. Berry.

SULLIVAN COUNTY REGIONAL REFUSE DISPOSAL DISTRICT

1986 ANNUAL REPORT OF ACTIVITIES

Construction of the Signal Environmental Systems, Inc. waste-energy facility is nearing completion. Based on the current schedule, Signal expects to begin accepting waste for test purposes by the end of February, 1987 and to begin commercial operation during May, 1987.

Changes to the facility due to new State regulations include dry lime scrubbers and fabric filters to meet new acid gas emission standards and auxiliary burners to control trace organic emissions during start-up. The cost of constructing and operating this new control equipment will add over seven dollars per ton to disposal costs.

The permit application for an ash landfill on land owned by the Sullivan County District in Newport, New Hampshire was filed with the State in September 1986. It is expected that the permitting process, including any appeals by opponents, should be completed during 1987. Discussions have been held with Browning Ferris Industries to use a newly lined section of the Rockingham landfill in the interim.

A Recycling Project Manager was hired in March 1986. During May, 1986, household hazardous waste collection days were held in Springfield, Vermont and Claremont and New London, New Hampshire. Eighty barrels of material were collected from citizens and schools in the two districts. This fall, the access road to the waste-energy facility was paved with asphalt, using 120 tons of recycled glass collected from the Districts and other recycling facilities.

A report illustrating potential cost savings associated with recycling in each member town was completed, and meetings with interested town officials are on-going. It is hoped that during 1987, citizens and businesses will have the opportunity to recycle glass, metal, newsprint and cardboard at various locations throughout the District.

Removal of trace metals is also a priority for recycling because these metals may cause unacceptable air emissions when burned and increase metal concentrations in leachate from the ash landfill. Signal has provided the Districts with a \$2,500.00 grant to begin a household battery recycling program. Discussions are being held with battery retailers about providing containers to collect used batteries for recycling or disposal in a proper manner.

This coming year will be a difficult one as the District and Towns switch from the old system to the new one. The District will be working to make the transition as smooth as possible. If anyone has questions or suggestions, they should not hesitate to attend District meetings or contact their District Representative or the Project office.

Respectfully submitted,

Denise M. Egbert
Secretary

REPORT OF COMMISSIONERS
MERIDEN VILLAGE WATER DISTRICT

The past year resulted in several changes in the Meriden Village Water District. Larry Danyluk resigned as Commissioner, when he and his family moved to Hanover. Lee Lynd was appointed to replace him. Michael McNamara resigned as operator of the water supply and wastewater treatment system. The Commissioners were fortunate to obtain the services of Kevin Kingston, foreman of the Lebanon Wastewater Treatment Facility, to operate our Wastewater Treatment Facility. Ira Townsend is snowplowing and maintaining the grounds. The Commissioners are operating the water supply system. We expect to continue operating this way for the foreseeable future.

District insurance coverage was reviewed with our agent, A.B.Gile Co., and modified to reflect increases in property value and changes in operating personnel and procedures.

Voters residing within the Meriden Village Water District are encouraged to attend our annual meeting on Tuesday, March 17, 1987 to vote on district affairs. Interested persons are also reminded that the Commissioners meet the first Tuesday of every month at 7:30 PM at the Wastewater Treatment Facility.

1986 ANNUAL REPORT OF COMMISSIONERS

The year 1986 was the first time we tried to get water from another well. We were not successful. The engineers who studied the present well site felt that the shallow well wasn't the answer. They felt that a drilled well was the answer, so we financed the search and the cost of drilling, which in our opinion was a waste of money.

This time we are going for another shallow well. The one we are pumping from is a shallow well and this is what the state recommended in the first place. This is what we will attempt this year.

The present well does a marvelous job of supplying 17,000-18,000 gallons of tested water per day. Thanks to the conservation-minded subscribers, we managed to stay in water.

We did have the misfortune of having a couple of leaks last winter. One was a gusher which almost put us out of business, but with the three commissioners working through the night with rented mechanical equipment, we finally found the leak which we shut off until the owner took care of the repairs.

We would like the subscribers to continue conservation this coming year, at least until we are blessed with another producing well furnishing us with the same quality of water.

We had to make a few modest repairs in the pumping station. New seals were installed on the remote (outside) meters where there were none. Outside of all this, it was a very normal year.

The financial condition of the Plainfield Water District is excellent at the present time, although we do expect a lot of expense once we enter into a contract for a new well.

Respectfully submitted,

Commissioners of the
Plainfield Village Water District

David W. Scott

REPORT OF THE SUPERINTENDENT OF SCHOOLS

GROWTH: At the March 8, 1986 Annual District Meeting, the Plainfield School Board asked for volunteers to serve on a Building Needs Study Committee. Nine committee members were chosen by the Board representing senior citizens, Selectmen, Planning Board, parents, Friends Association, School Board, teachers and administrators.

This committee met regularly and studied present and future school population, building design, educational programs, community growth patterns, construction costs, and options including: tuitioning our students, merging with other school districts, using mobile classrooms, limiting existing educational programs, and using double sessions. On November 18, 1986, the Committee recommended an addition to the school to include: two regular classrooms, two specialized classrooms, guidance and conference space, library storage, general storage space, and girl's bathroom and locker space. Additional space for Town Offices was also recommended.

The Warrant calls for adjournment of this Annual Meeting until later this spring to act upon these recommendations. In considering these recommendations, the District voters will have to balance the educational needs of the children against the tax rate. **NOT AN EASY TASK!** Please keep in mind that **GROWTH IN POPULATION** not growth in program result in the need for an addition.

In the early 1970's, Plainfield made far-reaching decisions regarding zoning and the future of the community. These decisions confirmed Plainfield as a residential and agricultural community. The implications of this confirmation are simple: every new residence consumes more in school and town services than it produces in tax revenue; therefore, with each new residence the tax rate must increase.

THE FUTURE: On the School District side of the tax bill, some hope exists in State government fully funding their existing statutory obligations. If all sweepstakes revenues went to education as intended, and foundation, building, special education, and incentive aid were funded, Plainfield's local tax burden could be reduced by \$2.00 - \$3.00 per thousand of assessed valuation. New legislation recognizing State obligations for equal educational opportunity state-wide would help even more. Our local legislators are considered to be leaders in legislative efforts to improve the State's commitment to meeting its obligations. They need our continued support and our efforts to influence the Governor to implement legislation designed to provide us with tax relief.

Daniel J. Whitaker

1985-86 Principal's Report

The 1985-86 school year marked the culmination of events begun in 1984 which has earned the school a Category 1-A Approval, the highest rating given by the New Hampshire State Department of Education. To achieve this, the school program had to include: a kindergarten, a guidance counselor, and a certified media generalist (librarian). In addition, the school took steps to upgrade its art and music programs with weekly classes scheduled for all grades and instruments, band, and junior and senior choruses offered for music electives.

The guidance counselor filled a much needed gap in school services for children. She works with classes, small groups, and individuals on issues that can impede children's learning and development. Topics included family changes and/or crises, self-concept, interpersonal relationships, problem solving, personal safety, drugs, career choices, and school adjustments to cite only a few. She is a resource to teachers and parents seeking strategies to deal effectively with child related problems and issues.

Computers are being increasingly used at all grade levels with students using word processors, simulation games (eg. archeological digs), and problem solving activities. There has been a dramatic increase in computer use for special needs students. One such example is use of the Crammer Braille to transcribe braille electronically in conjunction with the Apple computer.

Plainfield, like all New Hampshire schools, was required to participate in the state testing program conducted in the fall of 1985 for students in grades 4, 8, and 10. Eighth grade Plainfield students ranked fifth in achievement in the state as measured by the California Achievement Test. With the exception of Hanover (which ranked second), the closest rank for an area school was twenty-first. The test scores for fourth grade Plainfield students were more similar to area schools. The Plainfield results are consistent with testing conducted annually at these grade levels. Feedback from Lebanon High School teachers and from former students indicates that Plainfield students are well prepared for their high school experience, frequently surpassing their non-Plainfield counterparts.

Until this year, students taking algebra have been sent to KUA for classes. With half the eighth grade class ready for algebra, a course was begun at Plainfield with Denis Reisch as the teacher. Eighth grade foreign language students continued to take classes at KUA.

In other activities, there was an art show, music performances, the second annual Project Fair, athletic events (where Plainfield is described as "awesome"), the math team (which finished second in competition against much larger schools), two musicals, (for upper grade students) and the play Tom Sawyer (performed by students from grades 1-5).

The year portended the coming of school crowding. The school population increased 7% from the previous year. Increased activities and programs exasperated the problem. Where to store the scenery for the plays (storage had been cut from the original building design as a cost-saving measure), where to hold staffings in a place that was both private and had the capacity for ten or more people (PL 94-142 had not been enacted when the school was built), where to locate support staff (required by law and by IEP's for handicapped students), where to hold band practice (without interfering with learning in the surrounding classrooms), and where to put art projects (to keep them safe for next week's class).

The year was not without problems. The gym floor flooded several times before the source of the problem was found. Electrical problems developed when a transformer burned out and water got in the conduit. Power failures and power surges disrupted the computers at KUA and set off the fire alarms. A smoking "volcano" failed to trigger the school's smoke alarm system, our first indication that the system did not work.

The year marked the end of Elva Mikula's teaching career. Mrs. Mikula, a long-time primary teacher in the Plainfield School, retired in June. She will be remembered for many things: her tireless dedication to her students and to teaching, her introduction of computers into the primary grades, her work on the playground, the ties she strengthened between the Plainfield School and KUA, and her willingness to assist in any way needed in the operation and care of the school. She is missed. For all she has done, our appreciation and gratitude.

Joan Garipay, Principal

1985-86 Nurse's Report

The health records of all the students enrolled at the Plainfield School were kept up-to-date with pertinent information as the 1985-86 school year progressed. Screenings of vision, hearing, nutrition and dental conditions were completed on all students. The third and fourth graders were screened for scoliosis (curvature of the spine) and the seventh graders had their blood pressure checked. Any abnormal or unfavorable findings from the above screenings were reported to the parents and an offer of assistance on follow-up care was made by the school nurse.

The problem of pediculus capitus (head lice) was greater this year than before. It seemed to be a "state wide problem", but with the cooperation of parents it was subdued.

During this school year there were 1,358 recorded visits to the school nurse's office, which is a greater number than in years past. One hundred and seven of these students, approximately 75%, received some form of treatment. There were 14 accidents of which 7 required additional follow-up care by a physician. Prescription medicines were dispensed to 5 students on a regular basis and to 51 others on an occasional basis as prescribed by their physicians.

Registration for the incoming kindergarten students was held at school in the spring. Immunization records were reviewed and the parents were informed that their children were expected to have their required pre-school physical examinations and their immunizations completed before the 1986-87 school year began.

Health education is continually being taught with the cooperation of the classroom teacher. The goal is to encourage good health and individual initiative in maintaining it. A new course was started for the kindergarten students called "My Body" which is to help the children to understand their bodies and how the basic organs function.

Chapter I - Basic Skills Improvement Program - 1986/87

Chapter I is a federally funded program for compensatory education (ECIA). Programs funded under Chapter I are developed locally to successfully meet the supplementary instructional needs of educationally disadvantaged children. Our local Chapter I program provides supplementary instruction in math in grades 2-6.

Funds for the Chapter I program are based upon the percentage of "low income" families residing in the Plainfield area but students participate on the basis of educational need, not income.

The Chapter I math program is run in the mornings and is designed to be administered by a math aide. The aide provides instruction to small groups of students who need help in mastering math skills. The students have been referred by their classroom teachers and/or parents. Students who are enrolled receive instruction in their classrooms or in a quiet comfortable area elsewhere in the building. The aide provides math activities to students as directed by the classroom teacher. Activities directly relate to the students classroom math program.

Most often the aide circulates around the regular classroom during math lessons and helps the classroom teacher deliver the math program unless otherwise directed by the classroom teacher.

My thanks to Joan Garipay, the school principal, for her guidance and understanding. Chapter I achieves its rewards and successes through efforts of administrators, teachers and teachers aides who work so dedicatedly for their students.

BUILDING NEEDS COMMITTEE - FINAL REPORT AND RECOMMENDATIONS

I. INTRODUCTION

During the last several years the Upper Valley area has experienced economic and population growth. The Plainfield School District has and continues to feel the effect of this growth. The Plainfield School Board was advised at their November 26, 1985 meeting that the continued student population growth and how it would impact on the current educational programs should be reviewed and studied.

After a review and discussion of the short and long term student growth projections, the Plainfield School Board took the following action at their December 17, 1985 meeting.

TO ESTABLISH A NINE (9) MEMBER BUILDING NEEDS STUDY COMMITTEE COMPOSED OF INDIVIDUALS REPRESENTING THE FOLLOWING CONSTITUENTS: RETIRED INDIVIDUALS, SCHOOL BOARD, BUILDING PRINCIPAL, PLAINFIELD TEACHERS, SAU #32 ADMINISTRATOR, PARENTS, FRIENDS OF THE PLAINFIELD SCHOOL, PLANNING BOARD AND A REPRESENTATIVE APPOINTED BY THE SELECTMEN.

At the School Districts' Annual Meeting on March 8, 1986, the Board made the community aware of the formation of the study committee, the committee's tasks, and solicited volunteers to serve.

The School Board adopted the following task statement at its April 29, 1986 meeting and appointed members to the building needs study committee.

A. To ensure continued quality education, the Plainfield School Board has appointed a building needs study committee to review current and long-range building needs for the District. The committee has the following charges.

1. Review population growth patterns as they relate to student population.
2. Review current and proposed standards for approved elementary schools in New Hampshire.
3. Review space needs to ensure current and projected program.
4. Recommend a proposal(s) that will meet the current and long-range program and building needs for the District.

The committee is asked to report progress to the Board on a monthly basis and to have a final report completed by November 30, 1986.

B. Building Needs Study Committee:

Senior Citizens	-	Mr. Howard Zea
Selectmen	-	Mr. Bruce Baird

The committee held its first meeting on May 8, 1986 and met regularly up to November 18, 1986 when it finalized their recommendations.

During the investigation and study period the committee reviewed and discussed numerous items. The items included:

1. Current and proposed state of New Hampshire standards for approved elementary schools.
2. Student population projections along with past and current enrollments.
3. The original building design, educational programming and student capacity.

4. Educational program changes since construction of the school and current utilization.
5. Community population and growth patterns.
6. Review of residential building trends in the community.
7. Educational costs for Plainfield students and surrounding communities.
8. Review of current and future space needs of the Town.
9. Construction costs for school space.
10. Tuitioning 7th and 8th graders out to another school.
11. Construction of new space with another community(ies).
12. Providing additional space using temporary or mobile classrooms.
13. Rescheduling the student day by having double shifts, split shifts, and/or larger classroom enrollments.
14. Modification current educational program; specifically art, music, and/or kindergarten.
15. The development of a school building master plan.
16. Type/technique of building - two story versus single story construction.

The committee also involved outside consultants from the State Department of Education and the architectural firm of Banwell, White, Arnold and Hemberger to assist them in their study.

II. RECOMMENDATIONS

It is the recommendation of the Plainfield Building Needs Planning Committee that the Plainfield School Board seek the following additions to the Plainfield Elementary School to appropriately meet the educational needs of students for at least the next five years.

- A. Contract with an architect for the development of a master plan for future building expansion.
Estimated Cost: \$1,000.00
- B. Provide space for the following:
 1. Two regular classrooms @ 900 square feet.
 2. Two specialized spaces, one each for art and music, @ 1200 square feet.
 3. Guidance and conference space of 250 square feet.
 4. Storage space of 250 square feet.
 5. Additional girls bathroom and locker space of at least 100 square feet.
 6. Library work area and storage space of 200 square feet.
- C. In conjunction with the Town of Plainfield, provide for an additional 300 square feet for use by the Town.
- D. The Board should seek approval for construction during the Spring of 1987.

The Committee would also state that the recommendations do not include staffing and/or equipping any of the new spaces.

While the recommendations identify two regular classes and two specialized spaces, it should be realized that by all but the most conservative population projections that the specialized spaces will have to become classrooms in a short time.

In summary, this is a concept, not a design. It is as far as we can go without hiring an architect. The concept shows the space needed to house the number of students we expect in the next five years and allow us to maintain current programming.

The following sections address the three major components of the Committee's Study: Population Growths, Space Needs, and Finance.

III. POPULATION GROWTH

A major question to be addressed in determining space needs was the matter of population growth. The committee's task was to obtain and evaluate estimates of population changes and then to delineate implications for space. At its initial meeting the committee was presented with the school district's preliminary estimate of the school-age population in Plainfield over the next five years. This estimate was developed using one application of the cohort survival methods, a standard procedure used in school facilities planning. The results were of some concern, since the projections suggested the possibility of quite substantial growth in only a few years. The committee directed significant effort toward understanding better the assumptions and application of this methodology.

We invited Doug Brown, the primary consultant on these matters from the New Hampshire State Office of Education, to come and speak with us. He testified as to the utility of the cohort survival projection method in other school districts. The essence of this method lies in using actual school population figures and local birth rates as well as changes in these figures over selected time periods to project future school population figures. It is apparently standard practice to generate projections from three different sets of progression ratios -- the factors that are used to generate estimated figures from actual ones -- by basing them on: a five year average of year-to-year changes; the one year changes immediately preceding the first year to be projected; and a three-year weighted average, which takes into account figures and changes over the three year period, but gives increasing emphasis to more recent years. Mr. Brown indicated that the three-year weighted average was typically the most useful.

Because an estimate, however tried and true the method, is still only an estimate the committee had to look at the extent to which the assumptions and results fit with other information about Plainfield. Although the town population had been rising steadily, the school population has remained relatively stable for a few years, dropped one year, and now has risen sharply. Might it go back down again? Census figures suggest that it will not: substantial growth has occurred over the last ten years or so among age groups which are only now producing increases in the school population. The patterns of age-distribution and growth appear to be set: even if the currently high rate of growth as indicated, for example, by the number of building permits issued should reduce sharply in a recession, the population changes already established seem likely to keep the school population growing for some years. The Upper Valley is growing. Plainfield is seen as a desirable place to settle - in part because of its good school! - and has the land to support additional growth. As others have done in interpreting the projections, the committee felt that the one-year ratios were too vulnerable to the chance variation of the immediate past to be trusted; that the five-year ratios might be too insensitive to current trend, but could be used as conservative estimate; and that the three-year-weighted ratios seemed best able to account for both and should be given the greatest credence.

It now became necessary to work out actual implications for space. In a graded educational system the real issue is not so much total school population as it is how many are in a given grade and thus how many classrooms are needed. Most of the single classes in the school are very near their upper limit. This means that a very small increase in absolute numbers of children-can force a given grade into two classrooms, resources permitting. But this upper limit is not entirely rigid. Some classes are already too large. The school staff try to limit class size to 20 below third grade and to 25 for the rest. K through 2 are already split, 3-8 are over 25, and seventh grade is currently at 30. Since the staff tries to respond flexibly to the particular characteristics and needs of each group of children, it becomes difficult to estimate precisely how many classrooms will be absolutely required, even if population projections are assumed to be correct. Because Plainfield is so close to the edge right now, what number the staff will pick as the tolerable upper limit of a class turn out to exert a much more powerful influence in determining the necessary number of rooms than do the subtleties of population projection methods over the next five years. If the 20/25 standard were strictly observed, the school would need five additional classrooms just to operate this year. The committee therefore assumed that the staff would continue to adapt to classes somewhat larger than its ideal.

Taking all of the factors into account, the committee has come to believe that at least two to four additional classrooms will be needed over the next five years to account for growth in the school population alone, independent of program needs. This is as minimal an estimate as can be justified. Tables are appended to show two population projections, using respectively the very conservative five-year-unweighted and the recommended three-year-weighted progression ratios (see Appendix A); the number of classrooms required at each grade level for each year is indicated. The committee believes that the three-year weighted figures are most credible, yet holding expansion to four additional rooms requires accepting larger classes than we now have. Because of the thoroughly pragmatic political and financial considerations involved in proposing school expansion, the committee recommends that two additional classrooms be constructed for reasons of growth alone -- in addition to the art and music classrooms proposed. If growth is much slower than predicted, the taxpayers will have spent no more than was necessary in the short run. If growth is as expected or a little less, the new art and music spaces will gradually be taken over and converted primarily to basic classroom space. If growth exceeds expectations, serious consideration of new expansion will probably be necessary before the five years have expired. In any event, the committee feels it unwise to speculate beyond five years and for that reason would like to be very clear that this is by no means necessarily the final word on growth in the Plainfield school. Whatever planning is done on this occasion should anticipate the possibility that growth may continue at the current rate and that additional expansion may well be necessary in the future.

IV. SPACE NEEDS

Based upon current and projected growth, current educational programming, and New Hampshire State Department of Education requirements for approved elementary schools, the following space needs were considered.

A. Two regular classroom - 900 square feet

1. These are the needs necessary in order to maintain a classroom student/teacher ratio of 20:1 for grades K-2 and 25:1 for grades 3-8.
 - a. Current practice in the Plainfield School District has been to maintain such student/teacher ratios in K-2, but has not been accomplished in grades 3-8.
 - b. State Department of Education recommended standards would be met by maintaining such ratios.

- c. Current enrollment (see Appendix B) will require either a combination second/third, third/fourth, or 2 third grades next year. The lack of space at this time would prevent the implementation of any of the preceding options.
 - d. The increased mainstreaming of special needs students places a greater demand on the classroom teacher and facilities. Such students usually require more attention and therefore reduces the available time for other students. To maintain appropriate time for all students necessitates a smaller student/teacher ratio below that of 25:1.
 - e. If current first grade enrollment trends continue, the space problem will be compounded when the current second grade enters the fourth grade. The issue of class size will again be with us, in that projected enrollments will be 35 for grade four and 36 for grade five.
2. Cost (All costs in this memo are based on the Building Construction Cost Data for 1986, 44th annual edition, using the 75% level for elementary schools. The Upper Valley area normally falls in the 75% range.)

$$2 \times 900 \text{ square feet} \times \$69.45/\text{square foot} = \$ 125,010.00$$

B. Art and Music Space

1. Currently art is available a total of 2 days/week and music 3 days/week.
 - a. All classes receive art for 1 period/week. The length of classes range from 25 to 40 minutes. In addition to regular classes, an art enrichment program is offered on a 1 period/week basis and 1 period of art is offered to students in grades 6-8 as an elective.
 - b. All classes receive music for 1 period/week. The length of classes range from 35 to 45 minutes. In addition to regular classes, a 45 minute period of junior chorus, senior chorus, and band are provided. The balance of time provides for small group instrumental lessons of 20 to 30 minutes in length.
 - c. Combined, a multi-purpose room would be used fulltime for five (5) days/week. A multi-purpose space of 1500 square feet is needed to meet current programming.
 - 1) A single space would limit the expansion of art and music in the future, unless it was determined to reduce time allocations to existing programs or to have additional classes taught in the classroom(s).
2. If additional program time is anticipated, we would recommend two separate spaces for art and music, each being 1200 square feet for a total of 2400 square feet.
 - a. Separate spaces would allow for future program expansion without cutting back on current time or using classrooms for the activities.
 - b. Two separate spaces would allow for appropriate storage and project space for both art and music.
3. General Comments
 - a. Additional space needs are caused by program expansion and increased number of students.

- b. Currently, the offering of these activities is not appropriate in the spaces available. Noise intrusion is the greatest problem.
- c. Currently, valuable time is lost to set-up and take-down which erodes the actual available educational time. Self-contained rooms would decrease set-up and take-down time.
 - 1) Shared rooms would not reduce set-up and take-down time as much as separate rooms.
- d. Separate space would allow for more appropriate use of equipment.
- e. Adequate and appropriate storage space would be available.
- f. Separate spaces would reduce most of the current visual distractions that now occur.
- g. Separate spaces would allow each to use their own space more appropriately.
- h. New space for these activities would allow the non-speciality classroom teachers to work in their classroom during preparation time.
- i. Both art and music positions are part-time with these teachers working in other schools. It is difficult to find good people for these positions. It is not always possible to afford people who can work their schedules to match the school schedules when a room is shared.

4. Cost

a. Combined Space

1) 1500 square feet x \$ 69.45/square foot = \$104,175.00

b. Separate Spaces

1) 2 spaces x 1200 sq. ft. x \$69.45/sq. ft. = \$166,680.00

C. Storage Space - 250 square feet

1. Existing storage space is inadequate.

a. Storage space was cut from the initial building plan to save on costs. It was the intent to add storage space at a later time.

b. Space is needed to:

- i) store large quantities of school supplies,
- ii) store athletic equipment,
- iii) store chairs (folding),
- iv) store unused classroom furniture,
- v) store the lawnmower,
- vi) store the snow blower,
- vii) store field marking materials and,
- viii) provide a work space to repair furniture and equipment.

2. If new space were provided for art and music and an outside metal storage shed obtained (this could be done via the regular budget as an immediate need) the storage space problem would be resolved.

- a. An outside storage space would partially take care of ii, and take care of items iv, v, vi, and vii. The removal of these items from the current area would provide space in the room outside of the boiler room to partially take care of item a. and all of vii. New and/or existing space would provide adequate space for all other items. I would note that the current principal/guidance office could be used as a library, work space and related storage needs.

3. Cost

- a. 250 square feet x \$69.45/square foot = \$ 17,362.50
- b. A cold storage shed would cost approximately \$1,000.00, depending on size and type of material.

D. Guidance Office and Conference Space - 250 Square Feet

1. Currently - no such space exists
2. Currently, the principal and guidance counselor share the same space.
 - a. Privacy is not available and currently requires one of the individuals to leave if privacy is required. The problem is compounded, in that the person leaving doesn't always have an appropriate area to go to.
3. Space is needed for conferences with parents, staffing teams, students, and numerous other meetings that occur.
4. The space could also be utilized for testing and special evaluations.
5. Cost
 - a. 250 square feet x \$ 69.45/square foot = \$ 17,362.50

E. Library Work and Storage Area

1. The library has an expanding collection that requires more space.
2. The library does not have an adequate storage area or work space.
3. The current guidance/principal office could be used for library storage and work space.
4. Cost
 - a. Space for the principals office, 200 square feet
200 square feet x \$69.45/square foot = \$ 13,890.00

F. Locker/Bathroom Space for Girls

1. The current space serves 84 girls and has 4 toilets, 48 lockers, and standing area of less than 70 square feet.
2. The space is used as a regular bathroom, changing area for gym, and sports (both visiting and local teams).
3. Cost
 - a. 100 square feet x \$69.45/square foot = \$ 6,945.00

G. Town Space Needs

1. The partnership between the town and school in sharing space has worked well. The space needs of the town have also increased during the last several years. To provide appropriate work spaces for town employees and storage for town documents, a doubling of current space is needed. If the space were to be provided in conjunction with a school expansion and the space remain school district property, state aid would also be available on that additional space.

2. Cost

a. 300 square feet x \$ 69.45/square foot = \$ 20,835.00

V. FINANCE

The financial implications of the proposed building project were explored by speaking with Doug Brown of the New Hampshire State Department of Education and with officers from The First New Hampshire Bank. Mr. Brown indicated that there were essentially three routes by which towns could obtain money for such projects: The New Hampshire Municipal Bond Bank, large independent banks, and local banks. He further stated that rates recently obtained through the New Hampshire Municipal Bond Bank have ranged from 5.6% to 7.3% and a recent bond issue through tating in the project but were unable to estimate a rate because of recent changes in the tax law.

Given the previous comments regarding present and projected need for two classrooms at 900 square feet each, art and music spaces each at 1200 square feet, storage space at 250 square feet, guidance office and conference space at 250 square feet and additional library space at 200 square feet and using an estimated cost of \$70.00 per square foot the new space program will probably amount to \$70.00 x 4900 square feet = \$343,000.00. Renovation and possible enlargement of the bathroom and locker space, and inclusion of town space could add another \$50-\$60,000 to the project. Hence for planning purposes the building project could be thought of as costing approximately \$400,000.00.

Assuming Plainfield is able to obtain a bond rate of 7% and chooses to pay off this bond over ten years the bond payment for year one will be \$68,000.00 and for year ten will be \$42,000.00. A decision to repay the bond over five years would mean that the payment for year one would be \$108,000.00 and year five would be \$85,000.00. New Hampshire state building aid is currently reimburses the school district for 30% of the principle payment on these building costs. Thus, for a ten year bond repayment at 7%, the net cost to the town would be \$56,000.00 for year one and \$30,000.00 for year ten; for a five year bond issue at 7% The net cost to the town would be \$84,000.00 for year one and \$61,600.00 for year five.

At present valuation each \$34,500.00 in the school district budget adds \$1.00 per thousand to the tax rate. Most recent tax rate calculations set the Plainfield tax rate at \$45.20 per thousand.

Bond payments indicated above would have the following impact on the tax rate:

\$30,400.00	additional to the school budget will raise taxes \$0.88/thousand or 1.9%
\$56,000.00	additional to the school budget will raise taxes \$1.62/thousand or 3.5%
\$61,600.00	additional to the school budget will raise taxes \$1.78/thousand or 3.9%
\$84,000.00	additional to the school budget will raise taxes \$2.43/thousand or 5.3%
