School District Report.

Superintendent's Report.

The Hill schools have been handicapped in their work since September by the overcrowded condition of both the Primary and Grammar rooms. Extra chairs and desks have been installed in both rooms until no more space is available.

At the present writing all seats are occupied and if no more pupils enter we can get along the remainder of the year as we have done so far.

The School Board has been awake to the situation but financially powerless to remedy it. Another teacher was needed if best efficiency was to be secured, but a suitable room was not available and no money to pay another teacher.

The condition has been unsatisfactory to all concerned, but the teachers have tried to make the best of it. A teacher can successfully manage a room of thirty-five pupils and give each a fair amount of attention if all are in one grade; but with four grades the conditions are approaching too near the old rural school status, which we have been trying to get away from for the past fifteen years.

What can be done to remedy the situation?

An additional room could be added to the present building and a third teacher hired. The expense of such a plan would seem to be unwarranted considering the present economic condition of the town especially as this condition would indicate that the number of pupils in the future probably would not equal the present number.

It would be a cheaper proposition to relieve the congestion by transporting and paying the tuition elsewhere for the seventh grade pupils, as is now done for the eighth grade.

I should advise doing the best we can under existing conditions awaiting the developments of another year and thus avoid additional expense for attempting to remedy what may be only a temporary need.

It may be of interest to know that the per pupil cost of the elementary schools of Hill, Grades I-VIII for the year 1935-36, exclusive of those whose tuition and transportation is paid to outside schools, was \$81.72. The lowest per pupil cost to any town in the state was \$44.66, and the highest \$296.36. The median per pupil cost for elementary schools of the state was \$77.93.

The factors determining this per pupil cost are so varied that these figures are of little value for comparison, but may be of interest. It is of more value to know that of each \$1000 of equalized valuation of the town of Hill \$6.99 is paid for the current cost of education; that there are only 33 towns in the state which pay less, 208 which pay more.

The town reports of Hill show that its schools have been economically administered and results obtained exceptionally good. Those advancing to high schools have made good records and have averaged high scholarship. The exceptions have been very few.

The school exhibit and entertainment given during National Education Week a year ago, illustrating as it did the changes in methods of instruction in the past fifty years was much appreciated and pleasantly commented upon by all present.

I would suggest that each year in June a similar entertainment be given, embodying simple graduation exercises for those completing the seventh grade.

I call your attention to the statistical table accompanying this report; also the roll of honor.

I desire also to commend most highly the excellent work being done by our school nurse, Miss Moynihan, who is untiring in her efforts to maintain the best health conditions possible among the pupils.

The sanitary arrangements in the basement of the school building are at present unsatisfactory and unhealthy. I recommend that special attention be given to making some very essential improvements as soon as possible.

In closing this report I wish to express my appreciation of the interest shown, and co-operation given by the School Board and teachers. All of us have been working together for what seems for the best welfare of the school children of Hill.

Respectfully submitted,

F. S. LIBBEY, *Superintendent of Schools.*
