GILFORD, March 1, 1883.

We, the undersigned, Auditors of the Town of Gilford, having examined the foregoing accounts of the Treasurer and Selectmen of said town, find them correctly cast and properly vouched.

G. L. SLEEPER, } *Auditors.*
 B. F. DRAKE, }
 JOHN B. HENDLEY, }

The report shows that the sum of \$3625.65 has been expended on highways and bridges, in addition to the \$2414 for summer repairs, and almost \$2000 for breaking roads, making a total of \$8035.51 expended during the year under these three heads.

The average during the five previous years of the same three items was \$4615.05. This increase of \$3400 is accounted for as follows :

Rebuilding bridges at Lake Village.....	\$1196 47	
Expended on Weirs Bridge.....	1877 51	
Excess for breaking roads above average.....	800 00	
	<hr/>	
Total amount for extraordinary expenses.....		\$3873 98
Estimate for completing Weirs bridge :		
Stone work	\$300 00	
Grading	300 00	
Superstructure	1800 00	
Railing for approach and incidentals.....	222 49	
	<hr/>	
	\$2622 49	
Amount already expended	1877 51	
	<hr/>	
Total cost of bridge (estimate).....		\$4500 00
The average cost for the past five years has been :		
For repairing highways in summer....	\$2416 00	
Breaking roads.....	1393 00	
Highways and bridges	1505 00	
	<hr/>	
		\$5314 00

This large amount, annually raised and expended on our streets, should require more care and attention in its expenditure, and a regular system of drainage, grade, and repairs, especially in the Village, where its necessity is every year becoming more apparent. The condition of our streets and sidewalks is not very creditable to a candidate for City honors.

The experiment, in a neighboring town, of owning a team, and placing all the streets under one management, has proved a great success, not only in the improved condition of the streets, but in the economy of the system. A similar change in this village would no doubt be a great improvement.

The debts reported due from the Laconia District, and the old Town of Gilford, is in accordance with the report of Amos L. Rollins, Esq., the

Referee to whom the question in dispute was referred for settlement by vote of the town one year ago, and the separate accounts with these divisions of the town are now closed.

The indebtedness of the town, above assets, appears to be \$1345.17 All bills presented up to March 1, have been adjusted and paid. There is a claim for alleged damages to the amount of \$5000, for which suit was brought against the town a few days ago, on account of an accident said to have occurred March 2, 1877, from a defect in highway. It would be well to choose an Agent to defend this suit, or any other in which the town may become involved.

The amount of money that will be required for the current year is estimated as follows :

For Highways	\$3000 00	
To complete Bridge at Weirs	2500 00	
For Current Expenses.....	5000 00	
Total,	—————	\$10,500 00

This amount makes no provision for paying any on the debt.

We would recommend that the sum of \$2000 be appropriated for Summer repairs of highways, and \$1000 for breaking roads, all to be raised in money and expended under the direction of the Selectmen.

A portion of the Winter highway money in the village could be spared for laying concrete sidewalks in some of the principal streets.

B. WADLEY, *Overseer of Poor.*

Gilford, March 1, 1883.

We, the undersigned, Auditors of the Town of Gilford, having examined the foregoing accounts of the Overseer of the Poor of said town, find them correctly cast and properly vouched.

REPORT SCHOOL COMMITTEE.

In conformity to the law and general custom, we present you with the following report :

SCHOOL HOUSES.

No improvement has been made in any of the school buildings. In some of the districts

“There might a more attractive site be found,
A more attractive building grace the ground,
Did pluck and public spirit more abound.”

SCHOOLS.

The schools for the year past have generally been profitable ; good progress has for the most part been made. Your committee has not been called upon for any special cases of discipline.

The teachers employed in Districts Nos. 1, 5, 6, 8, 9, 10 and 12, have taught in our schools in previous years successfully, and we are pleased to report a satisfactory degree of success the past year. All of them are good teachers. Some of them we are confident may rank among the best in the State. The teachers employed in Districts No. 3, 7 and 11 came to us well recommended, having had successful experience in other towns ; we consider those schools fortunate in securing their services. Those employed in Nos. 2 and 4 were inexperienced. They labored faithfully, and we predict for them success.

TEACHERS.

We still deplore the disadvantage which our schools sustain from the present district system, in the frequent change of teachers. Six weeks or even six months is a short time to fully prove the worth of a teacher.

In order to have good schools we must have good teachers. “The soul and life of the school resides in the teacher.” We may be able to ascertain their intellectual qualification in the few hours required for the examination of a candidate, but it is only by seeing the result of that teacher’s work in the school-room that we are able to judge of his or her fitness for

the work. We desire that our children may be educated in the broadest sense—morally, mentally and physically; that the whole nature may be drawn out and developed; to this end a teacher should be a person of broad and varied culture and high moral character, with an enthusiasm and love for the work. A good teacher should be a student,

“For little way his learning reaches,
Who reads no more than what he teaches.”

It has been well said, what is to be sought is skill in suggesting points of thought; in questioning so as to lead the understanding on the way, and in placing the subject of study in a variety of lights and relations which may interest different minds.

PARENTS.

As has been frequently said in former years, your visits to the school-room stimulate the children and encourage the teacher.

By this means also you become acquainted with the methods of teaching and with the character of the person under whose influence and instruction you place your children. Your words of kindness and sympathy are a potent force in elevating the standard of our schools.

DISCIPLINE.

This must be the joint work of parents and teachers. The parents are solely responsible for the child's training during the first five years of its life. If this has been wise and judicious, the child will come to school with at least the habit of prompt obedience. Some maintain that the basis of the child's character is laid during this infantile period. This may be true, as it is generally conceded that character is moulded more by feeling than thinking. There should be mutual love and respect between pupils and teachers. Pupils should be taught self-respect. This is a potent factor in developing the power of self-government.

That boy was well taught who, when asked why he did not pocket some pears, for nobody was there to see, replied, “Yes there was; I was there to see myself; and I don't intend ever to see myself do a dishonest thing.”

CONDITION OF DISTRICTS.

While we believe we can truthfully report the average amount of good work and progress in our schools as compared with former years, we cannot say that we believe the greatest good which might have been derived

from the money expended has been obtained. We believe the time has come when the old school districts should be abolished, or "the old lines rearranged and the number of districts sufficiently reduced to provide the way for a more judicious use of school money." If even two districts could unite their forces there would be great gain.

Hon. J. W. Patterson, State Superintendent of Public Instruction, in his last report says: "In almost every town there are schools which should be united, and where, with such a change, the present school tax should furnish the children longer and better schools, and pay for the transportation of the more distant to and from school."

We have eight districts where the number of scholars in each is less than twelve. The law provides "that in any district where the number of scholars to attend a term of school is less than twelve, at any legal meeting called for the purpose, the district may, by vote, authorize the prudential committee to provide for the attendance of the pupils at the schools of adjoining districts, the selection of such districts to be approved by the school committee of the town, and said prudential committee, in such cases may appropriate a sum not exceeding ten per cent of the school money for the conveyance to and from school of pupils living more than one and a half miles distant from school, the remaining money to be divided among the adjoining districts in proportion to the number of scholars who attend each district."

The descendants of the pioneer settlers of the town should have educational advantages more nearly approaching equality with the children in the villages. How can our children otherwise compete with the foreign element growing up in our cities and villages? We should give this matter our candid consideration.

The number of scholars enumerated by the Selectmen in April, 1882, is 417; of this number 224 are boys, 193 are girls. The number of enrolled scholars for 1881 was 403,—243 boys and 160 girls.

The following table includes what the law requires, as far as the teachers have reported.

REPORT OF THE BOARD OF EDUCATION OF DISTRICT No. 18.

To the Superintending School Committee of Gilford :

In submitting our annual report of the schools in District No. 13 of Gilford, we would say the school year commenced under unusually flattering circumstances. A corps of teachers whose ability and earnestness in their work had been tried and proved to be of the highest order ; a larger amount of money to be expended than usual—these were circumstances which gave promise of a successful year. The first term was all we anticipated, but soon after the commencement of the second term the diphtheria broke out in the schools on Pear street. The Primary school suffered most. The teacher, Abbie L. Swain, was attacked by it at close of second week and was unable to resume her labors until near the close of the term. Her place was supplied during her sickness by Hattie Curtis and Ida Blaisdell. Many of the children were taken down with the disease and four died before the close of the term. The schools on Washington and School streets escaped sickness, and were successful, as usual. The third term, like the first, commenced with all the old teachers in their places ; but sickness and death again interrupted. This time it was on the west side. The teacher of the Grammar school was obliged to close his school for several weeks on account of the sickness and death of his sister. The teacher of Intermediate school resigned at the same time, and his place was filled by Cora L. Heath, who also resigned at close of the second week. Her place was filled by Fred Hawkins, who completed the term. We regretted the necessity of having three teachers in a school during one term, but in the two instances referred to, it seemed unavoidable. Sickness and death are beyond the control of Boards of Education. If the mortality among the children has any lesson for us, it is the importance of better accommodations for our schools, where the children will not be so crowded in the school rooms, and where they will have plenty of pure air outside.
