## TOWN WARRANT

### THE STATE OF NEW HAMPSHIRE

*To the Inhabitants of the Town of Deerfield in the  
County of Rockingham in said State, qualified to  
vote in Town Affairs:*

[L. S.]

You are hereby notified to meet at Town Hall in said Deerfield on Tuesday, the fourteenth day of March, next at nine of the clock in the forenoon, to act upon the following subjects:

1. To choose all necessary Town Officers for the year ensuing.

2. To raise such sums of money as may be necessary to defray town charges for the ensuing year and make appropriations of the same.

3. To see if the Town will raise and appropriate the sum of \$1,248.00 to be expended on Mountain Avenue, the State to contribute \$2,496.00.

4. To see if the Town will vote to instruct the Selectmen to hire money in anticipation of taxes.

5. To see if the Town will raise and appropriate a sum of money for water holes.

6. To see if the Town will accept a certain piece of land located on the Adin Morgan Noyes property at Pleasant Lake.

7. To transact any other business that may legally be brought before this meeting.

CARL M. FOGG,  
ROBERT B. SANBORN,  
RUSSELL W. BOWDEN,  
*Selectmen of Deerfield.*

A true copy of Warrant—Attest:

CARL M. FOGG,  
ROBERT B. SANBORN,  
RUSSELL W. BOWDEN,  
*Selectmen of Deerfield.*

## REPORT OF THE FOREST FIRE WARDEN

---

### Forest Fires—Our Most Shameful Waste

Everyone apparently fears fire but too many are careless with it. This is particularly true of fires in and near woodlands. Official figures show that more than 98 per cent of all forest fires result from human carelessness and can be prevented. Consequently, we may say "Forest fires are our most shameful waste."

Annual forest fire losses are tremendous and their effects far reaching. Such fires destroy the raw products of the forests, the protection forests provide for game and the supply of ground water. They upset local economies by drawing men from gainful employment and requiring the expenditure of public funds to extinguish them.

Our forest fire organization is doing a good job in keeping the size of fires small but the number of fires is increasing. In 1949 there were 100 more fires in New Hampshire than in 1948, but they burned 500 acres less. For the warden and his deputies to do the job they are capable of, they must have the cooperation of the public—YOU!

The primary objective of all fire fighters is PREVENTION—fire stoppage. This is the goal toward which your local forest fire warden and his deputies are constantly working. It can be achieved ONLY if YOU and YOU and YOU cooperate with them. It is worth YOUR effort and can be accomplished by:

1. Being careful with fires in or near woodland, being particularly careful with matches and cigarettes.

2. Securing the required written permit from the warden when the ground is not covered with snow.

3. Insisting that others be careful and comply with burning requirements.

4. Calling the warden promptly when fire is detected and aiding him to extinguish it.

Let's reduce the number of forest fires and eliminate our most shameful waste.

1949 Fire Record:

Number of fires .....	3
Acreage burned .....	1/2
Number of fire permits issued .....	26

# ANNUAL REPORT OF THE SUPERINTENDENT OF SCHOOLS, 1950

---

February 1, 1950

*To the School Board of Deerfield:*

It is with a hope for the future and considerable pride in the past to submit to you my third annual report of the schools of Deerfield. May I express my appreciation for your indulgence and help in the tasks which have been and will continue to be important factors in the educational development of the youth of the town.

In compiling the data for this annual report it seems to me that the most important problem confronting the School Board during the next year is the inadequacy of our present school buildings and the urgent and immediate need of a consolidated school.

It has been said that "misery loves company." This probably prompted me to contact the State Department of Education for data that would classify the schools of Deerfield in our State.

Deerfield schools are placed in the category of the one-room one-teacher buildings. To be more exact, there are sixty one-teacher school buildings in the state of two grades, three grades, four grades, or five grades. To go a step further, we have found that Deerfield is still subjecting her children to school houses reminiscent of 25 to 35 years ago with no water and the toilet facilities of such a nature as to defy modern science and educational growth.

To add to these factors we must restrict our boys and girls to limited activity space both in the school-room and on the playground.

It might be interesting to add that if certain factors were brought to your attention regarding the physical conditions within the schools themselves, it

would crystallize your thinking along this line.

At the South Road school there are 30 pupils within a space of about 545 square feet or about 18 square feet per pupil if nothing else was in the room. To add to this small space of 18 square feet per pupil we must crowd in 31 desks and 31 chairs, two tables for activity and busy work, two benches for individual and group work, a teacher's desk and chair, a piano, two bookcases, and a stove without a jacket for protection. You can readily understand, therefore, that this further reduces the space per pupil to less than ten square feet. Because of the wide open spaces in the town this restricted area for the boys and girls who attend our schools seems ironical especially for grades one to four when the education of the children of this age group require the greatest physical activity.

According to data compiled by state and national scientists and educators, every child should have at least 25 square feet of school room space. This means that all new school houses are being built with each classroom 25 by 35 feet in size. The South Road school is 23 by 22 feet.

At the Center School where the larger children are housed we have a similar situation. There are 774 square feet for 37 pupils. This means about 21 square feet per pupil with nothing else in the room. Let us add a piano, 37 desks and 37 chairs, a teacher's desk and chair, a table, three bookcases, a furnace with a metal jacket, four ordinary chairs, and shelves down one side of the room for lunches and various other articles usually found in a schoolroom. Again we can readily understand the handicapped condition of the boys and girls. To make this picture even more vivid, we have a cloak-room and washroom where clothing must be stored during school hours in a temperature from 10 to 15 degrees lower than the main

school room and adjacent to out-moded toilets. We should have the greatest respect and admiration for these young men and women together with their teachers for the continued desire for an education under such conditions.

Let us finish the job of analyzing the schools of the town by visiting the Parade School. This school is in the best physical condition although the same "features" are present as have been shown in the others.

There are about 875 square feet of floor space in this school for 39 pupils. This means a trifle more than 22 square feet per pupil IF there was nothing else in the room. If we add 32 desks and 32 chairs, one large table around which are seated seven pupils in seven chairs, a teacher's desk and chair, a large furnace with a metal jacket, one medium-sized table, a wardrobe built along side of the wall, regular chairs, a grand piano, two bookcases, and an old-fashioned teacher's desk in the back of the room for emergencies, we can estimate about 15 square feet for each pupil. Add to these facts that there is no running water and the toilet facilities are comparable to those of the South Road and the Center Schools.

All three schools allow for very limited playground space also, if we are to accept modern playground recommendations of from three to four acres for every 100 pupils.

In discussing the foregoing data, one must also keep in mind the fact that these buildings were the same last year as well as a few years before that and up to June, 1949, repairs and replacements have been one of the serious problems closely connected with this situation because year after year the present buildings have been deteriorating and each year more

and more money has been and must be spent to make them safe for our children. During the summer this last year the School Board spent approximately \$500.00 for needed repairs and I think that any citizen of the town would understand conditions if a thorough inspection could be made in the same manner as the one made by the School Board following the close of school last June.

However, with this problem uppermost in the minds of all the citizens of the town, we can be proud of the fact that each year our graduates are making very satisfactory records at the high schools in the vicinity. This speaks very well not only for the boys and girl themselves, but also for the teachers in making the best of those facilities at hand which the School Board has tried to provide with its time and available funds.

Regardless of the shortcomings of the physical conditions of our schoolhouses, there is, at least, one ray of hope. Through the persistence of a few sincere members of the Parent-Teachers Association the boys and girls of the schools are now enjoying a hot lunch at noon.

With the cooperation of this organization, teachers, and pupils this program should prove to all the town that given the least possible chance Deerfield can overcome all obstacles and get behind the school movement so vital to the youth of the town and the American Way of Life.

Again I wish to thank sincerely all organizations and individuals who have in any way contributed to the intellectual development of the youth of Deerfield through its schools.

Respectfully submitted,

MURRAY H. WATSON,  
*Superintendent of Schools.*

## FINANCIAL REPORT OF THE DEERFIELD SCHOOL DISTRICT

For the Fiscal Year Ending June 30, 1949
