Child Welfare

Child Health Conference

A Child Health Conference was held by this division in July in cooperation with the local Board of Health, Woman's Club and Red Cross.

Eleven pre-school children were weighed, measured, and then given a complete physical examination.

Seven of the children examined were found to have some defects. Twelve defects were found.

Three defects had been corrected since the last conference, and five were placed under treatment.

Dr. Richard W. Thompson was the examining physician.

VIVIAN M. JENNINGS,
Field Nurse in Charge.

TOWN OF SANDWICH

REPORT OF SCHOOL HEALTH WORK FOR SANDWICH

To the Townspeople, School Board, and Superintendent of Schools:

During the past year and a half that Sandwich has had a school health program it has made great progress. During the first year, among 96 children, 225 defects were found—which was at a rate of 2.3 per child. At the end of the year 144 corrections had been made. As a result 69 children, or 72% of the school population, were physically without defect.

There were 25 children operated upon for tonsils and adenoids, 10 children fitted to glasses, and 60 receiving partial or complete corrections in the dental clinic. In connection with this clinic, we felt that it was only partially a success. Twenty children signed up for it, and the time of the dentist was planned accordingly. When it was found that sixty came, the dentist was very generous with his time, and worked until very late at night, but even then only hurried and very necessary work was able to be done on many of the late comers. Among other important corrections were two serious orthopedic cases. These received attention at the Balsh clinic at Manchester.

In recommending the needs this year the first seems to be a more leisurely dental clinic, with opportunity for careful work for every child. There are now forty-six who need definite work, while the others who were put in good condition before need a careful checking up and at least a polishing job done on the teeth. It is only by a check-up every year that painful and extensive work may be avoided. Once put in good condition, it is not hard to keep children's teeth good if regular check-ups are made. The only thing which prevents this plan from going through is a lack of funds to back it up. Every child deserves the service, and every child is not able to pay the whole cost of the service.

Secondly, there are ten more children who really need a tonsil operation. In connection with the tonsil work, it is interesting to note the difference in the condition of the children who were done last summer. Their cheeks are rosier, they are making a more normal growth gain, they have fewer colds, thus making the average attendance better in the school register. In one school it may be seen just who had the tonsil

TOWN OF SANDWICH

job done and who was left until another year by the appearance of the children's faces.

Thirdly, there are five more children who may need glasses unless their eyes improve a great deal by themselves.

At this time it may be well to thank those whose cooperation made this work possible for the children. First the parents were more than willing to sanction the work for their children and were most helpful in encouraging the little people to look forward to the work, however disagreeable it might be. Secondly, the Red Cross assisted with funds and planning. The Parent Teachers Association assisted also, as well as the School Board, and many private citizens helped with the necessary funds. The Selectmen finally cleared up the last deficit. All agreed that the result was worth the effort.

Analysis of Visits

Visits to schools	90
Visits to homes	229
Total visits	319
Days spent	22.1

Sandwich has registered the determination not to let the health of the children suffer from the depression. It is realized that many necessary things have to be deferred when there is not sufficient funds to go around. Many times it is something that has a great influence upon the future health of the child that is put off during an economic crisis such as the present one. No future work can undo the damage of such procrastination. Thus far all necessary things have been done for the children of this town, and it is expected that the good work can go on.

Respectfully submitted,

RUTH S. LANGILLE,
School Nurse.

February 1, 1933.

TOWN OF SANDWICH

TO THE SCHOOL BOARD AND CITIZENS OF SANDWICH

Last year there were just one hundred pupils enrolled in the Sandwich schools. Six of these had been previously enrolled in other schools.

The remaining ninety-four were graded as follows:

First Grade	19
Second Grade	17
Third Grade	14
Fourth Grade	8
Fifth Grade	12
Sixth Grade	7
Seventh Grade	9
Eighth Grade	8

Over one-half were in the first three grades. This probably indicates something as to changing conditions in the town.

The per pupil cost in Sandwich is about \$20 above the median for the state. This is caused by the excessive per pupil costs in small schools. I do not believe that because a school is small the pupils should be penalized with an inferior teacher. An effort has been made to have the teachers of the small schools of just as high a grade as those in the larger schools. The salaries were a little under the median for the state for teachers of the same training and experience. As I have suggested in other reports, a considerable saving in cost and some educational gain would result from more consolidation, but while we keep open the small schools we should give them as good as the best that we have.

There was quite an improvement in regular attendance last year in all save the North Sandwich School, where 68 out of the 156 tardy marks for the whole town were recorded.

Whiteface had the highest percentage of attendance. 98.5.

Lower Corner had but 4 cases of tardiness.

The following is an honorable mention of all pupils with perfect attendance for one or more terms:
