WARRANT FOR ANNUAL MEETING THE STATE OF NEW HAMPSHIRE

To the Inhabitants of the Town of Milford in the County of Hillsborough in said State, qualified to vote in Town Affairs:

You are hereby notified to meet at Town Hall in said Milford on Tuesday, the eleventh day of March, next at six of the clock in the forenoon, to act upon the following subjects:

1. To choose all necessary Town Officers for the year ensuing.

2. To raise such sums of money as may be necessary to defray town charges for the ensuing year and make appropriations of the same.

3. To act upon the reports of all Town Officers, Agents, and Committees, and raise and appropriate money relative thereto.

4. To see if the town will vote to authorize the Selectmen to borrow money in anticipation of taxes, if necessary, as provided by law of 1907.

5. To see what sum of money the town will vote to raise and appropriate for town officers' salaries, town officers' expenses, tax map revision, election and registration expenses, municipal court expenses, repairs and supplies for the town house, Milford Public Works, police protection, fire protection, moth extermination, collection of garbage, health department, vital statistics, town maintenance of highways, general expense of highway department, street lighting, Milford Free Library, town poor, parks and playgrounds, cemeteries, interest on temporary loans, interest on bonded debts, interest on serial notes, water and electric utilities, Livermore Community Association, work on town trees, damages and legal expense, town construction of highways, sidewalk construction, sewer construction and maintenance, town dump, Memorial Day, World War II history, employees' retirement, payment on principal of debts, and county taxes.

6. To see if the town will vote to raise and appropriate the sum of \$447.00 for advertising the town through the Monadnock Region Association.

7. To see if the town will authorize the Selectmen to administer or dispose of any real estate acquired by the town through Tax Collector's deeds. 8. To see if the town will vote to raise and appropriate the sum of \$676.97 for T. R. A. work on highways.

9. To see if the town will vote to continue the practice of allowing the discount for early payment of taxes.

10. To see if the town will vote to raise and appropriate the sum of 725.00 to purchase five hundred feet (500 feet) of new fire hose.

11. To see if the town will vote to raise and appropriate the sum of \$1,700.00 for the purchase of a tractor mower equipped with a blade for sidewalk plowing.

12. To see if the town will vote to raise and appropriate the sum of \$15,300.00 for the purchase of a Walters-Sno-Fiter.

13. To see if the town will vote to raise and appropriate the sum of \$23,867.00 to rebuild South Street from Union Square to the residence of Elgin Burtt; and Mont Vernon Street from Stone Arch Bridge to Granite Street.

14. To see if the town will vote to raise and appropriate the sum of \$750.00 for Workmen's Compensation Insurance on all employees excepting elected officers.

15. To see if the town will instruct the Selectmen to appoint an Airport Committee authorized to act for the town in all matters pertaining to the establishment, construction and operation of aircraft landing areas and to confer and consult with state and federal officials and to execute in the name of the town any and all necessary or desirable instruments and agreements in connection therewith. Also to see if the town will raise and appropriate the sum of \$1,000.00, this money not to be expended until approval of plans is granted and money allotted by Civil Aeronautics Commission.

16. To see if the town will vote to renew the lease to the Ricciardi-Hartshorn Post, No. 23, American Legion, of the rooms now occupied by this organization for another period of five years at the terms of the previous lease.

17. To see if the town will vote to raise and appropriate the sum of \$5,000.00 to be paid to the Souhegan National Bank as full settlement for taxes collected by error on their non-taxable preferred stock between 1934 and 1944 amounting to \$9,416.00.

18. To see if the town will vote to accept as a gift the land laying between the Post Office Lot and the Souhegan River.

19. To see if the town will vote to raise and appropriate the sum of \$200.00 for use of the Planning Board in the development of plans for projects which meet the approval of the Selectmen.

20. To see what action the town will take on the following resolution: "That all streets accepted by the town after this date shall not be less than forty feet (40') in width (the more desirable being fifty feet) and a plan thereof drawn by a civil engineer be submitted." (By request of Planning Board.)

21. To see if the town will vote not to rent or lend any Town equipment to any private firm or individual, except that equipment may be loaned or rented to another municipality through a written reciprocal agreement with the Town of Milford.

22. To see what action the town will take relative to amending and adding to the present Building Ordinances.

23. To see if the town will vote to raise and appropriate the sum of \$20,000.00 to underwrite the extension of the water main from the Hayward brick house on the Wilton Road to the Monadnock Sales and Service Co., this amount of \$20,000.00 to be restored to the town from the funds of the Water Department.

24. To see if the town will vote to raise and appropriate the sum of \$16,600.00 to underwrite the relaying of the water main on Dean Moore Hill from George Street to the Ricciardi house on Mason Road, and for extending this main as far as the residence of Walter Philbrick and the residence of Maurice Daniels, this amount of \$16,600.00 to be restored to the town from funds of the Water Department.

25. To see if the town will vote to raise and appropriate the sum of \$2,315.72 for additional insurance on town buildings and contents.

26. To see if the town will authorize the selectmen to secure the assistance of the State Tax Commission in reappraising the taxable property in the town in order to secure greater equality as between taxpayers, and to insure the assessment of all property in the town on the same standard of value, and to raise and appropriate money to pay for the same. (By request of State Tax Commission.)

27. To see if the town will vote to petition the State Tax Commission to have an audit made by the Division of Municipal Accounting, and to make an appropriation to cover the expense of such audit. (By request of State Tax Commission.)

28. To see if the town will vote to authorize the Selectmen to sell the land on Elm Street where the former town dump was located.

29. To see if the town will vote to raise and appropriate the sum of \$400.00 to purchase from Mary Whittemore, a triangular shaped plot of land bordering Grove Street, for the purpose of widening the corner from Grove Street to Mont Vernon Street, or take any action relative thereto.

30. To see if the town will vote to amend the resolutions adopted at last Town Meeting by adding the following: Resolved: That in case of a discharge by the Selectmen, of the Superintendent of Public Works, the Superintendent shall be informed in writing of the reasons for the discharge and shall be given opportunity, within one week, to demand, and shall be granted a public hearing before the Selectmen, relative thereto, and the discharge shall not become effective if a hearing is demanded, until the hearing shall have been completed.

31. To transact any other business that may legally come before said meeting.

Given under our hands and seal, this 24th day of February, in the year of our Lord nineteen hundred and forty-seven.

> A. WALLACE WILKINS, LUNNIE H. PARKER, ANDREW C. ELLIOTT, Selectmen of Milford.

REPORT OF AUDITORS

We certify that we have examined the items, accounts and vouchers of the following departments for the fiscal year ending December 31, 1946, and to the best of our knowledge and belief they are correct:

Clerk of Selectmen Town Treasurer Clerk of Municipal Court Treasurer, Milford Free Library D. C. Bruce, Town Clerk D. C. Bruce, Tax Collector Treasurer, Livermore Community House Treasurer, Memorial Day Committee Treasurer, Planning Board Treasurer, Library Site Committee Overseer of the Poor Treasurer, Board of Firewards Treasurer, Trustees Trust Funds Treasurer, World War II History Milford Public Works Department, which consists of the following accounts: **Building Inspection** Winter Maintenance Cemeteries Lull Memorial Trust Ash Collection Oiling Sidewalks

Summer Maintenance Town Road Aid

Parks and Playgrounds Public Works Depart. Sewer Department: Construction Maintenance

Town Buildings Tree Work

Water Department

Fire insurance policies on town properties were examined and found to be in force.

Surety Bonds covering the several Town Officers were examined and found to be in force.

The securities in the custody of the Trustees of Trust Funds were examined and found to be in proper ' order.

Respectfully submitted,

L. C. KIDDER, J. A. WHITE, Auditors.

SYNOPSIS OF RECORD OF TOWN MEETING March 12, 1946

Total Number of Votes Cast, 790

The polls were opened at 6 o'clock A. M. and the business meeting at 9:30 A. M. Prayer was offered by Rev. Ernest Maguire.

Acting under Article 1 of the Town Warrant, the following Town Officers were elected: Town Clerk, Donald C. Bruce; Town Treasurer, Hugo E. Trentini; Selectman for Two Years, Lunnie H. Parker; Selectman for Three Years, Andrew C. Elliott; Trustee of Trust Funds for Two Years, Hugo E. Trentini; Trustee of Trust Funds for Three Years, Archibald A. Murray; Library Trustee for Three Years, Harland H. Holt; Fire Wardens, Jeremiah J. Casey, John J. Casey and Paul N. Hutchinson; Auditors, Frederick S. Kimball and Joseph A. White.

Article 2. It was voted to raise and appropriate such sums of money as may be necessary to defray town charges.

Article 3. A motion was made by Fred T. Wadleigh that all reports of town officials be accepted as printed, and placed on file. Voted unanimously.

Article 4. It was voted unanimously that the town be authorized to borrow money in anticipation of taxes.

Article 5. Working under this article,	the follow-
ing sums of money were raised and appre	opriated:
Town Officers' Salaries	\$3020 00
Town Officers' Expenses	2200 00
Election and Registration Expenses	300 00
Municipal Court Expenses	500 00
Expenses Town Hall and Other Town	
- Buildings	3500 00

Taxes Bought	1000 00
County Taxes	19,255 46

[\]Article 6. It was voted to raise and appropriate the sum of \$200.00 for advertising the town through the Monadnock Region Association . This amount was recommended by the Budget Committee.

Article 7. On motion of Fred T. Wadleigh, it was voted unanimously to authorize the Selectmen to administer or dispose of any real estate acquired by the Town through Tax Collector's deeds.

Article 8. It was recommended by the Budget

40

Committee, and voted unanimously, that \$672.73 be raised for TRA road work, to be matched by \$2690.90 from the State.

Article 9. It was recommended by the Budget Committee, and voted unanimously, that the Town should buy a three-ton truck with a V-plow and wing, also one extra V-plow, four extra wings and three blades, and recommended the sum of \$8000.00 be raised and appropriated for the same.

Article 10. The Budget Committee felt that Article 9 adequately takes care of the Town's needs for snow removal, and that the purchase of a snow fiter is unnecessary. This was voted by the majority.

Article 11. It was recommended by the Budget Committee, and voted unanimously, that the Ladies' Rest Room on Nashua Street be re-opened, and that the money for repairs and maintenance be taken from the item of expenses of Town Hall and other buildings.

Article 12. It was recommended by the Budget Committee, and voted unanimously, that the gravel bank will be adequate for a Town Dump for the next ten or fifteen years, and approved the appropriation of \$175.00 for this purpose.

Article 13. It was recommended by the Budget Committee, and voted unanimously, that the sum of \$300.00 be raised and appropriated for the repair of the present road near the Harlan Burns place, as the present road will be the cheapest one to maintain.

Article 14. It was recommended by the Budget Committee, and voted unanimously, that the sum of \$2000.00 be raised and appropriated for a homecoming celebration for returned veterans of World War No. 2, also \$500.00 more be raised, making a total of \$2500.00; and that the Moderator appoint a committee of five to make the necessary arrangements. Committee appointed by the Moderator: A. Wallace Wilkins, Chairman, Lunnie H. Parker, Andrew C. Elliott, Charles S. Emerson, and Miss Margaret Howison.

Article 15. It was recommended by the Budget Committee, and voted unanimously, that the Town donate a War Memorial Book to all Veterans of World War No. 2, and raise and appropriate the sum of \$2000.00; and instruct the Moderator to appoint a Committee to prepare and edit such a book.

Committee appointed by the Moderator: Mrs. Winnifred Wright, William Ferguson, and Mrs. Eula Foster.

Article 16. To see if the Town will vote to repay the Souhegan National Bank the amount of taxes paid and collected by error on non-taxable preferred stock between 1934 and 1944, amounting to \$9416.00, and raise and appropriate money therefore, or take any other action relating thereto. After explanation by Arthur B. Rotch and C. J. Hamblett of Nashua for the bank, and after considerable discussion, C. S. Emerson presented the following resolution: That the Town authorize the Selectmen to make a compromise agreement of the claim of the Souhegan National Bank for the return of money collected by the Town in taxes on non-taxable preferred stock of the bank between 1934 and 1944, and report at next Town Meeting. This was voted unanimously.

Article 17. Owen Fisk explained the benefits from the Employees' Retirement System of the State of New Hampshire, and after some discussion Mr. Fisk made the motion to raise and appropriate the sum of \$600.00. This was voted unanimously.

Article 18. The appropriation of \$600.00 was taken • care of under Article 17.

Article 19. It was recommended by the Budget Committee that the sum of \$1600.00 be raised and appropriated for sand-blasting and painting the Jones Crossing Bridge. Voted unanimously.

Article 20. The Budget Committee felt the Airport Committee made the best possible report for the present, and suggested that \$500.00 be raised and appropriated. This was voted unanimously.

Article 21. It was voted unanimously to continue the practice of allowing the discount for early payment of taxes.

Article 22. It was recommended by the Budget Committee, and voted unanimously, to accept a deed from Karl W. and Mary G. Brown, of a parcel of land 161 feet 4 inches in length by 40 feet in width, the same to be used for the extension of Webster Street and extending from the southerly end of Webster Street to Fay Street, and to extend the sewer and water services under said street.

Article 23. On recommendation of the Budget Committee it was voted unanimously, in as much as Karl W. and Mary G. Brown were giving the land under Article 22, and their adjoining property is not to be improved, to abate any sewer tax pertaining to the extension of Webster Street which might be assessed against Karl W. and Mary G. Brown.

Article 24. The Budget Committee feels the committee appointed to study the subject of a Superintendent of Public Works made a thorough investigation and an exceptionally complete report, and it was voted unanimously to authorize the Selectmen to appoint a Superintendent of Public Works to assume management of the Highway Department, the Water Department, the Sewer Department, Parks and Playgrounds, Cemeteries, Building Inspector, Maintenance of Town Buildings, and such other public departments or agencies as may now or in the future be deemed feas-

ible. Such Superintendent of Public Works shall be subject to the direction and supervision, shall hold office at the will of the Selectmen, and shall be a person specially fitted by education, training and experience to perform the duties of said office. He shall be appointed without regard to his political belief, and he may or may not, when appointed, be a resident of the Town or State. He shall be responsible for the efficient administration of all departments under his control. Before entering upon the duties of his office, the Superintendent of Public Works shall be sworn to the faithful and impartial performance thereof by the Chairman of the Selectmen, or by the Town Clerk, or by a Justice of the Peace. He shall execute a surety company bond in favor of the Town for the faithful performance of his duties in such sum as may be fixed by the Selectmen.

The powers and duties of the Superintendent of Public Works shall include the following: To organize, continue or discontinue such divisions or departments from time to time as may be determined by vote of the Selectmen, or, in the absence of such vote, as he shall determine to be required for the efficient conduct of his office. To appoint upon merit and fitness alone and, except as herein otherwise provided, to remove all subordinate officers and employees in such departments, and to fix all salaries and wages of all subordinates and employees, subject to law. To exercise control over all such departments or divisions created, or that may hereafter be created and made subject to his supervision. To attend all regular meetings of the Selectmen, and to recommend to the Selectmen for adoption, such measures requiring action by them or by the Town, as he may deem necessary or expedient. To keep full and complete records of the doings of his office, and to render as often as may be required by the Selectmen a full report of all operations during the period reported on; and annually, or more often

if required by the Selectmen, to make a synopsis of all reports for publication.

To keep the Selectmen fully advised as to the needs of the Town within the scope of his duties, and to furnish the Selectmen on or before the thirty-first day of December of each year with a detailed list in writing of the appropriations required during the next fiscal year for the proper conduct of all departments of the Town under his control.

To advise on the purchase of all supplies and materials for all departments of the Town under control of the Superintendent.

To perform such other duties consistent with his office, as may be required of him by the by-laws of the Town or by vote of the Selectmen.

Article 25. The Budget Committee recommended, and it was voted unanimously, to have the supervisory bodies of the departments being consolidated by adoption of Article 24, dissolved, and authorize the Selectmen to re-establish those supervisory bodies in an advisory capacity.

Article 26. It was recommended by the Budget Committee and voted unanimously to raise and appropriate the sum of \$2500.00 to carry out the provisions of Article 24.

Article 27. Hugo Trentini presented the following resolution and it was voted unanimously: Whereas, the voters of the Town of Milford at its annual meeting assembled on the 12th day of March 1946 have voted to raise and appropriate the sum of \$8000.00 for the purpose of purchasing a truck and snow removal equipment, and Whereas, the voters of the said Town of Milford also voted to raise and appropriate the sum of \$12,000. for the purpose of resurfacing and widening South Street from Union Square to Elgin Burtt's, and Whereas, the said voters of the Town of Milford voted to pay out of this year's appropriations the sum of \$5000.00, be it therefore Resolved, that the balance of the combined cost of both projects be financed and covered by the issuing of serial notes of the said Town of Milford, to be the direct obligation of said Town, in a sum not to exceed \$15,000.00, and to be dated on or about July 1, 1946 and to bear interest at a rate not to exceed $2\frac{1}{2}$ % per annum payable semi-annually, said notes to be issued in serial form maturing in each year beginning with the year 1947, at an amount of \$3000.00 each year, and to be in denominations of \$500.00 each payable as they mature in the office of the Town Treasurer.

A motion was made, and voted, that a committee be appointed by the Selectmen to make a recommendation to the town at the next annual meeting as to what should be done to correct the hazard to pedestrians that now exists at the double curbed sidewalk on the north side of Nashua Street, between Putnam Street and School Street.

Committee appointed by the Selectmen: Dr. Joseph C. Jasper, Harold E. Reed, and Egidio J. Bianchi.

Recommendation made by the Budget Committee and voted unanimously that the report of the William Y. Wadleigh Memorial Library Building Committee be accepted, and the same committee be continued for another year.

Report of Recreation Committee was read by Mrs. Gertrude N. Howison, Chairman, and it was voted to accept her report, and unanimously voted that the present committee be retained for the coming year to finish all the details of this project.

Charles S. Emerson presented resolution on the death of Frederick W. Sawyer, and it was voted unanimously to accept the same, and that a copy of this resolution with its preamble be entered in the town book of records and a like copy be forwarded to each of his children.

Fred N. Hutchinson presented resolution on the

death of Robert F. Campbell and it was voted unanimously that this resolution be accepted, and spread on the town records, and a copy sent to the family of the deceased.

By vote of those present Town Meeting was adjourned at 3:05 p.m.

> DONALD C. BRUCE, Town Clerk.

REPORT OF TRUSTEES OF FREE LIBRARY

The trustees of the Milford Free Library report a good year for the town library. They wish to commend the librarians who have done good work in overcrowded quarters. The filing of magazines and the care of books becomes increasingly difficult, and the new library is greatly needed.

We recommend that the sum of \$3000 be appropriated by the Town of Milford for the use of the Library for the ensuing year.

> Respectfully submitted, HARLAND H. HOLT, BENJAMIN F. PRESCOTT, RUTH D. FRENCH.

REPORT OF LIBRARIAN

I herewith submit the report of the Milford Free Library for the year January 1, 1946 to December 31, 1946. The circulation of juvenile books increased 400 over that of last year, while the adult circulation was less.

We had gifts of books from Miss Howison, Mrs. Barry, W. Carroll Hill, Miss Norris, Miss Ames, Woman's Garden Club, and two unnamed friends. Mrs. Spear presented a year's subscription to a magazine.

The Woman's Garden Club, Josiah Crosby Chapter D.A.R., Granite Grange and Ricciardi-Hartshorn Post continued their magazine subscriptions to the library.

The Womans Garden Club has supplied the library with attractive displays through the year.

"Book Week" was celebrated as usual with a collection of new books for children and a table display illustrating the slogan for the year "Books are bridges."

We began our Children's story hour again in November and have had a good attendance. At Christmas time Miss Ames had a special celebration with Christmas decorations and stories.

Respectfully,

ANNABELL C. SECOMBE, Librarian.

REPORT OF LIVERMORE COMMUNITY ASSOCIATION

To Town Appropriation

\$200 00

This amount has been used as part payment of fuel bill, balance being paid from receipts of house.

The Committee appreciates this appropriation and sincerely hopes that the citizens of the town appreciate what the Community House stands for in the town.

Over 400 people have used this house during the past year.

Respectfully submitted, GERTRUDE N. HOWISON, Chairman.

REPORT OF MILFORD PLANNING BOARD

Establishment of Board

On 27th September 1946 the Selectmen established a Planning Board with the following members: Charles D. Scully, Chairman Term of 4 years Carl H. Holland Term of 3 years Charles F. Naimie Term of 2 years Mario Infanti Term of 1 year Lunnie H. Parker, Selectman member

Salvatore P. Grasso, Advisory member

On 29th October 1946 the Board met and elected Mario Infanti, Treasurer, and Charles F. Naimie, Secretary.

Purpose and Objective of Board

1. Assist the Selectmen in long range planning for the best interest of Milford.

2. Develop and suggest plans to the Selectmen.

3. At request of Selectmen study proposed projects.

4. Study the need for establishing ordinances and projects established in other towns to see if they are needed in Milford.

5. The Board shall be advisory to the Selectmen. Brief of Work

The Board has held six meetings to date. Nearly all its time has been spent studying the Town roads and streets, and making a list showing the name, width, when accepted by the town, and where the road or street starts and ends.

The Board expects to make some recommendations to the Selectmen in regard to roads and streets in the near future.

> Respectfully submitted, CHARLES F. NAIMIE, Secretary.

REPORT OF FIREWARDS

The Board of Firewards submits the following report for the year ending December 31, 1946.

Apparatus

Engine No. 1, Engine No. 2, Ladder No. 1, Pine Valley hose wagon, and a forest fire truck; 3200 feet of $2\frac{1}{2}$ inch hose in good condition, 1000 feet in fair condition; 900 feet of $1\frac{1}{2}$ inch in good condition; 300 feet 1 inch hose in good condition; 150 feet in fair condition; 200 feet of garden hose in good condition.

During the year the department has answered 26 box alarms, 53 still alarms; and the brush fire squad has responded to 11 brush fire calls.

For fire protection we recommend the appropriation of \$7600.

Leaving scene of accidents	5
Mental cases	2
Obscene writing	2
Operating unregistered motor vehicles	6
Permitting unlicensed person to operate	1
Reckless operating	3
Street lights out	60
Speeding	9
Suicide	1

I wish to extend my sincere thanks to Sergeant Conti and Trooper McBain for the generous cooperation they have rendered the Police Department.

> OLIVER G. WILLIAMSON, Chief of Police.

REPORT OF W. Y. WADLEICH MEMORIAL LIBRARY BUILDING COMMITTEE

Your committee on the W. Y. Wadleigh Memorial Library Building is of the opinion that construction should not be undertaken until conditions as to labor and material are more favorable than at present, or until home construction, particularly for veterans, has progressed much more than is the case at the present time.

The report of the Treasurer of the committee shows a balance of \$449.19 of the \$500 provided by the town for committee expenses, \$6.28 has been collected for interest, and \$14.76 expended, for expenses of committee in conferring with architect in Boston.

We recommend that the committee be continued with instructions to proceed to build when in their judgment the opportune time has arrived.

Respectfully submitted,

C. S. EMERSON, Chairman, MRS. MINNIE FALCONER, Clerk, B. F. PRESCOTT, Treasurer, MRS. GERTRUDE HOWISON, MARIO D. BIANCHI, OWEN P. FISK, A. WALLACE WILKINS.

REPORT OF WAR HISTORY COMMITTEE FOR 1946

Appointed by the selectmen after the town meeting of March 1946 as a History Committee to compile the book of Milford's part in World War II were Mrs. Raymond Wright, Chairman, Mrs. George Foster, serving as Treasurer and Secretary, and Mr. William Ferguson, 3rd, serving as Chairman of the Editorial Committee of which Mr. William B. Rotch and Mr. George Nelson are members.

The undertaking is a huge one and something that very few towns the size of Milford have the courage to do. Previous to V-J Day there were 549 whose service is credited to Milford, thirteen of whom made the supreme sacrifice and twenty-five received the purple heart for wounds received in action. The majority of information for the book is in and 335 copper engravings of the pictures are finished. The committee has the major details of the book planned and hopes to finish the job this coming year if possible. The scrap book of Cabinet war clippings covering from September 1940 through August 1946 and the home coming celebration, is complete and ready for binding.

While the cost of materials and labor is high as with all things at this time, the committee has planned a book of more value than the average and feels that the time and money involved will result in a book Milford can be proud to present to those whose splendid record is included within its pages.

The following is the financial statement for 1946:March 1946, appropriation\$2000 00335 copper engravings\$1427 68Cabinet Press, printing and

Respectfully submitted,

MRS. RAYMOND WRIGHT,

War History Chairman.

REPORT OF AIRPORT COMMITTEE

The Airport Committee appointed by the Selectmen, submits the following report.

This committee has worked with a similar committee from Wilton with the desire of locating an airport which would serve both towns. It was the intention of the committee to lease as a temporary field a section of the interval land between Milford and Wilton, but, due to inability to procure suitable land in the locality, we are forced to give up the idea.

The location picked by your committee as a desirable permanent site is the Hayward pasture on the southerly side of the Milford-Wilton highway. The land is well drained, high and free from obstructions. It is largely covered with scrub growth, which would necessitate clearing and some grading. The committee retained as engineer Mr. Charles Morse of Haverhill, Mass., who made a topographical survey of the land together with estimates of cost.

Forms with requests for grants have been filed with the Federal Works Agency and also with the Civil Aeronautics Commission. Our plans have not as yet received the approval of the commission, but we have been advised by Mr. Russell Hilliard, Director of the N. H. Aeronautics Commission, that they may be approved during 1947.

There is a bill before the New Hampshire legislature at the present time (House Bill No. 345) which provides for the raising of funds by a four cent tax on aviation gasoline similar to the road tax on automobile gasoline. Fifty per cent of the money so raised will be used for state assistance in the building of small airports such as ours. If this bill is passed and in order that we might be able to take advantage of the federal and state money it is the feeling of the committee that \$1,000.00 should be raised and appropriated by the town this year, the money not to be used until such time as the state money shall become available.

> RODNEY C. WOODMAN, ANDREW C. ELLIOTT, VALMORE BEAUDREAULT.

REPORT OF COMMITTEE FOR MILFORD HOME COMING CELEBRATION FOR RETURNED VETERANS OF WORLD WAR II

Before proceeding with a report of this committee, we wish to express to the Moderator and to the Town our appreciation for the opportunity and the honor of having served on this important committee.

At the first of our weekly meetings, A. Wallace Wilkins having been designated by the Moderator as Chairman, we proceeded to organize further by electing Miss Margaret H. Howison as Secretary. Because the three members of the Board of Selectmen were also members of this committee, it was decided that the expenditure of our appropriation of \$2500 should be handled directly from the office of the Selectmen. Therefore, the detail of our expenses will be found under the report of the Selectmen on another page of this Town Report.

One of the first acts of the Committee was the establishment of the dates of August 16 and 17 for the celebration, this week-end being nearest to the anniversary of VJ Day.

At our first meeting various suggestions were received and discussed as to the nature of the celebration, and a tentative-program was drawn up. In order that we might assure ourselves that none of the appropriation would be spent for any feature in which our guests, the veterans, might not be interested, we submitted this program to them through their organizations, the Veterans of Foreign Wars and the American Legion, and asked for their suggestions. After stating that they would be grateful and appreciative of any program which might be arranged in their honor, they very modestly expressed their interest in a parade because they felt it would help boost Milford. They also manifested a desire for a barbecue where they could all enjoy a meal together as Milford men and women who had served together in a common cause.

With these suggestions, our tentative plans were changed somewhat, and we proceeded to organize a program to include the following features: Friday evening, August 16, dance in Town Hall. Saturday, August 17, parade, speaking and musical program, barbecue, vaudeville entertainment, band concerts, and street dancing.

We budgeted our appropriation and solicited the assistance of the civic organizations of the town, making the following assignments: Civic Club, all activities in Town Hall; American Legion, parade; Woman's Club, arrangements for speaking and musical exercises; Lions Club, all activities at Endicott Park including barbecue and vaudeville entertainment; American Legion Band, band music for parade, concerts and street dancing; Firemen, street dancing; and Police Department, policing.

All of these civic organizations very willingly assumed the responsibility of their assignments and sent some representative to meet with us each week as the plans developed.

In one way or another practically every organization in town—civic, fraternal, religious, patriotic, industrial, etc., as well as innumerable individuals— engaged in some manner in support of this celebration, and all worked together in complete harmony and cooperation to make the Welcome Home a success.

As a matter of historical interest, there follows a detailed program and a write-up of the celebration, most of which is condensed from the Milford Cabinet.

In closing we wish to repeat our expression of thanks to the citizens of Milford as published in the Milford Cabinet of August 22, 1946.

THANKS AND THANKS AGAIN

"This very modestly states what your committee wishes

to say to every one who in any way contributed to the success of Milford's Welcome Home celebration to our veterans of World War II.

"From the start this committee was determined to make this celebration worthy of its purpose. As our plans developed and work and responsibility was assigned to various organizations and individuals, it became apparent that we were to enjoy the support of the entire community.

"The celebration is over. In their Welcome Home we believe that our veterans have had presented before them a demonstration of the greatest community cooperation ever displayed in the Town of Milford. We thank you all for your help."

HOMECOMING CELEBRATION COMMITTEE A. WALLACE WILKINS, Chairman

LUNNIE H. PARKER, ANDREW C. ELLIOTT, CHARLES. S. EMERSON, MARGERET H. HOWISON.

8:00 p. m. Concert on Oval by Milford Legion Band 8:30 to 10:30 p. m. Street dancing in front of Town

Hall.

Six years of war for more than 500 Milford veterans were brought to a happy climax when their town turned out to honor them in a home coming celebration favored by ideal weather and a historic demonstration of civic cooperation and genuine feeling.

Heavy rain Friday night cleared before morning and the program in which hundreds of townspeople had labored went off without confusion, from the early morning assembly of the parade to the band concert and street dancing in the evening. Veterans agreed that the celebration was all they could have desired.

The town committee which arranged the celebration was headed by A. Wallace Wilkins, assisted by Lunnie H. Parker, Andrew C. Elliott, Charles S. Emerson, and Miss Margaret Howison. Assisting them were the committees from local organizations, and hundreds of volunteer workers who helped decorate floats and did the routine chores which contributed to the success of the celebration. Nearly all Milford stores closed Saturday morning, and some were closed all day. Festoons of bunting decorated the town hall, bandstand, and most business blocks in Union Square. Some member of the Committee was available for information at the Selectmens Room on Saturday, August 17, from 7:30 a. m. until after the parade, to answer last-minute questions and coordinate the activities of the day.

Gold star mothers and wives were remembered with flowers from the town.

The Friday night dance, the barbecue, and the bleacher seats at Endicott Park were exclusively for the honored men and women. Each veteran was entitled to bring one guest only. Admission to these features was by badges which had been sent by mail with invitations. All other features of the celebration were open and free to the public.

Dance

The dance Friday brought several hundred veterans and guests to the town hall, where, despite rain outside, the music of Carl Broggi's orchestra kept the crowd in holiday spirits until 1:00 a. m. Men and boys who had spent long months far from Milford thinking about familiar dances in the town hall, had one all their own, each with the guest of his choice, with all arrangements made and paid for by the town. All furniture was cleared from the hall, and the banquet hall was used as a lounge where punch was served.

Parade

A tribute to the effort that went into plans for Milford's biggest parade was the universal admiration for the floats and the organization that led hundreds of people to remark: "That was the best parade I ever saw."

Parallel parking was allowed on the route of the parade only on the south side of Nashua and Elm Streets. Traffic coming through Milford Saturday morning was detoured at Ponemah and at Jones Crossing to avoid interference with the parade. No travel along the parade route was allowed after 9 a. m. There was no parking around the Oval, but police designated parking areas adjacent to the sidewalks.

The Police Department deserves much credit for the efficient manner in which they handled the traffic and the large crowd. So far as is known, not the slightest accident occurred during the entire celebration.

Seventy-three floats, four bands, columns of marching veterans and half a dozen miscellaneous features delighted the 5,000 people who turned out to see the event.

The prize of \$25 for the most original float went to Hillsboro Mills' presentation of the flag-raising at Iwo Jima, a tableau enacted on a large truck body heaped with soil and mounted by uniformed fighting men. Rodney C. Woodman's gladioli-decorated float took the \$15 prize for being the most beautiful, and the Granite Fish and Game Club's float won the \$10 prize for being the most original. The Fish and Game float depicted an idealized hunting scene; a log cabin with much game in evidence, a boy catching a horned pout, and all that a sportsman, or perhaps an overseas veteran, might dream about. Prizes of \$5, \$3, and \$2 were awarded for decorated bicycles.

Judges were James C. Court of Mont Vernon, Malcolm D. Clark of Amherst, and James E. Burke of Wilton. Prizes were announced at Endicott Park following the parade. The difficulty of the judges' decision was indicated by the widespread praise for at least several dozen of the floats. Harold Reed's high tally-ho, driven by H. Elephant Reed himself in appropriate costume, was outstanding. Spaulding and Sons had several varieties of farm animals. The Grange showed a tableau welcoming home the returned veteran.

Best-known of the bands was the Ricciardi-Hartshorn Post unit, but music was also furnished by the band from the V. F. W. Post of Nashua, the Peterboro band, and the Nashua V. F. W. drum corps. The 40and-8 locomotives from Nashua and Keene also participated in the parade.

Speaking and Musical Program

A. Wallace Wilkins, chairman of the town committee, opened the speaking program at Endicott Park and served as master of ceremonies. Names of Milford men who lost their lives in the war were read by Miss Howison and included Carl K. Bowen, Jr., Hartley W. Harley, Theodore Hutchinson, John H. Keddy, George W. Kimball, William W. G. Maxwell, Robert Phillips, James J. Picard, Howard E. Sanford, Leroy A. Smith, Raymond Smith and Alan E. Stitham. The reading of these names was followed by volleys from a firing squad, and the playing of taps, while the assembly stood at attention.

Charles S. Emerson saluted the veterans on behalf of the town, and his talk was summed up by the assertion: "Liberty requires effort at all times." He urged the veterans never to forget that "liberty is worth fighting and working for, and comes to those who are willing to sacrifice for it."

All speakers emphasized the heritage of those who took part in the war, and the pride that will be felt in years to come.

Rev. Edmund F. Quirk, formerly of St. Patrick's parish, was the principal speaker at the program. Father Quirk drew a comparison between the present occasion and the time he addressed a much smaller crowd on the Oval on Armistice Day in 1943. The weather was gray; Hitler seemed at the peak of his power; Japan was stronger than ever. The contrast between that gray day and the warm home coming program was described as a tribute to the men and women who fought to make it possible.

Mrs. Raymond Wright, whose efforts kept hundreds

of Milford men and women in touch with their town during the war, was honored by a place on the speakers' platform.

Barbecue

Tops on the program was the barbecue, which was served to 1,000 veterans and guests without delay and with heaping generosity.

Original plans were to have the food for the barbecue supplied and served by a caterer. Caterers wanted a flat price of \$2.50 per plate. For a thousand veterans and guests that would have used up the entire town appropriation. The planning and volunteer effort contributed by Louis Kregos and the Lions Club saved the town about \$1,400, for when bills were totaled, it was disclosed that the allotment of \$1.100 for this event had been exceeded by only 57 cents. Their menu called for 775 pounds of chicken, 225 pounds of ham, 250 pounds of lamb, 90 dozen ears of corn, 1,000 cups of coffee, 40 watermelons, and untold quantities of miscellaneous foods. This food was carried to Nashua on Friday night in one of Edgar Liberty's trucks, cooked by Louis Kregos and Arthur Comolli in a Nashua bakery, and brought back to Milford in time to be served to the hungry horde by the Lions and their wives. A stack of specially-made pans to cook the food was made by the John Martin Company, and a dozen new carving knives were purchased to slice the meat.

The Lions Club erected a tent 30 x 60 feet in the outfield section of the baseball diamond and dispensed food to the veterans and guests. A typical serving consisted of a full quarter of a chicken, a large slice of baked ham. two pieces of roast lamb, a roll, ear of corn, coffee, tonic and beer, followed by a slab of watermelon. When that was gone there was more. Veterans and guests lined the river bank and sat under the pine trees absorbing a meal such as they had often dreamed about. The club as a whole was the committee in charge, but Louis Kregos and Arthur Comolli were generally given credit for preparing the meal that highlighted the entire celebration for many veterans.

Entertainment

While the veterans relaxed after their meal, the Lone Star Ranch performers from Merrimack and radio singer Georgia Mae put on an excellent vaudeville performance. The Ricciardi-Hartshorn Post band played at the conclusion.

Concert and Street Dancing

Street dancing in front of the town hall climaxed the home coming celebration. Firemen roped off the street and spread 200 pounds of corn meal to smooth the pavement, which had been washed by fire hose in the afternoon. The Legion band rounded out a strenuous day by playing for the street dancing after a concert on the Oval. Late Saturday evening a hard shower struck Milford, but too late to interfere with the program. It only emphasized the town's good luck in having near-perfect weather for the historic event.

Warrant for Annual School Meeting

THE STATE OF NEW HAMPSHIRE

To the Inhabitant of the School District in the town of * Milford, qualified to vote in district affairs:

You are hereby notified to meet at the Town Hall in said district on the eleventh day of March 1947 at 3:30 o'clock in the afternoon, to act upon the following subjects:

1. To choose a Moderator for the coming year.

2. To choose a Clerk for the ensuing year.

3. To choose a Member of the School Board for the ensuing three years.

4. To choose a Treasurer for the ensuing year.

5. To determine and appoint the salaries of the School Board and Truant Officer, and fix the compensation of any other officers or agent of the district.

6. To hear the reports of Agents, Auditors, Committees, or Officers chosen, and pass any vote relating thereto.

7. To choose Agents, Auditors and Committees in relation to any subject embraced in this warrant.

8. To see if the district will vote to make any alteration in the amount of money required to be assessed for the ensuing year for the support of public schools and the payment of the statutory obligations of the district, as determined by the school board in its annual report.

9. To see how much money the district will raise and appropriate for insurance on school property.

10. To see how much money the district will raise

and appropriate for special repairs and alterations of school buildings and grounds, for new equipment, new construction, and for furnishings and replacements.

11. To transact any other business that may legally come before said meeting.

Given under our hands at said Milford this 12th day of February 1947.

ANNIE M. DEANS, RAYMOND A. DYER, PHILIP N. BROWN, School Board.

BUDGET July 1, 1947 to June 30, 1948

	Voted Ma 1946 for 1946-1947		Proposed M 1947 for 1947-1948	/Iar.

AUDITOR'S CERTIFICATE

(Required by the State Board of Education from all State Aided Districts)

This is to certify that we have examined the books and other financial records of the school board of Milford, N. H., of which this is a true summary for the fiscal year ending June 30, 1946, and find them correctly cast and properly vouched.

> J. A. WHITE, F. S. KIMBALL,

Auditors.

CERTIFICATE

This is to certify that the information contained in this report was taken from official records and is complete and correct to the best of our knowledge and belief. The accounts are kept in accordance with Section 24 of Chapter 82 of the Revised Laws of New Hampshire 1942, and upon forms prescribed by the State Tax Commission.

> ANNIE M. DEANS, RAYMOND A. DYER, PHILIP N. BROWN, School Board.

REPORT OF AUDITORS

This is to certify that the books of the Milford School District and the Treasurer of the Milford School District were examined as of the fiscal year ended June

30, 1946, and found to be in order and correct to the best of our knowledge and belief.

Fire insurance policies on the School properties were examined and found to be in force.

Surety bond covering the Treasurer of the Milford School District was examined and found to be in force.

Respectfully submitted,

F. S. KIMBALL, J. A. WHITE, Auditors.

23a

To the School Board and Citizens of Milford:

I herewith present my eighth annual report, the twenty-eighth in the series. I present three topics for your consideration; Teachers, Accomplishments, Suggestions.

Teachers

As a list of present teachers is printed elsewhere, I will call attention only to the changes since the last report. In the elementary building, we opened this school year with three new teachers-Mrs. Cooney of Milford, Miss Dina Donati of Manchester and Miss Elsie Railton of Salem Depot. Mrs. Cooney took Miss Stirk's place and Miss Donati Mrs. Abbott's, while Miss Railton is an additional teacher this year to work in the fourth grade. Miss Ida May Colby of Rumney Depot replaced Miss Hull at the Laurel School. At the high school building, Miss Enes Bazzocchi of Portsmouth, Miss Doris Johnson of Manchester, and Mr. Eugene Littlefield of Penacook, are new teachers. Mr. Louis Pichierri returned to take up his work in music, which Miss Edwards had done while he was in the service. Miss Bazzocchi teaches Latin and French in place of Mrs. Barry; Miss Johnson, English in place of Mrs. White; Mr. Littlefield, Shop Electricity and Science in place of Mr. Bourdon. The latest change occurred this week with Mrs. Kathryn R. Hart of South Lyndeboro succeeding Mrs. Cooney in the sixth grade.

Salaries are again of major importance. I again urge you to increase them to as high a point as you possibly can. Without adequate increases, we will have difficulties in securing teachers and keeping all departments in operation. I have presented a plan calling for salaries ranging from \$1,800 to \$2,400 for teachers with bachelor's degrees; more for master's and less with less preparation. I hope that plan or a better one will be used as a basis for employment next year and will assure an adequate staff. The teachers have suggested a plan. The two are under study at the present time with the hope of arriving at agreeable terms which will be within the means of the town to pay and acceptable to the teachers concerned.

There are a few points I wish to discuss relative to the employment of teachers. They are the barriers I must face and argue against as I interview teachers to go to smaller towns. First, the salary is inclined to be low in comparison with a larger town or city. Second, living conditions for board and room might not compare with that to which the candidates are accustomed. Third, the schools are organized with more than one grade to a teacher. Fourth, candidates have heard that people in the smaller towns are very critical of teachers, often to the extent of verbal abuse and social isolation. All these factors contribute to my difficulties. Possibly they point to the salary scalethat it ought to be higher than the city or larger town in order to attract people and overcome these handicaps mentioned above. Surely, everyone can examine his part in the affairs of the town and see if there is something he can do to correct the difficulty.

Accomplishments

I trust more stable conditions will soon prevail so that more time can be devoted to this subject. I desire to continue a testing program to determine educational possibilities as well as educational accomplishments. Without the benefit of this material, teachers feel handicapped in their work. We now have some test material at hand ready to use in the next two or three months.

A study of pupil promotions and the difficulties encountered, is interesting. The five towns of this Union are listed below by number only.

	Promoted to	Trial	Not
Town	Next Grade	Promotions	Promoted
1	94.2%	$^{-}$ 2.5 $\%$	3.3%
2	69.4%	16.0%	14.6% $^-$
3 .	89.8%	6.4%	3.8%
4,	89.4%	8.0%	2.6%
5	75.8%	8.0%	16.2%

The above refers to pupils in the first eight grades and shows the numbers in per cent promoted, trial promoted, or not promoted. Your town is number three on the list and represents a fair accomplishment. All told approximately 10% of our children in these grades are having difficulty; 6% continue with their advanced grade and 4% repeat their grade. Some extra remedial work is under way in an attempt to help this 10%.

Suggestions

I will trust you will give careful reading to the other reports.

Some difficulty in organization was experienced this year due to an unexpected and unprecedented large enrollment in Grade I. Transportation to and from Laurel School was furnished and that school became a third group of first graders. Present studies of birth figures and the school census indicate that the schools may be organized with two rooms for each of the six grades at the Elementary Building and continue Laurel as it was prior to this year.

Transportation for high school students should be provided under the same conditions as prevail for elementary pupils. Our thinking has advanced from the time the present law was passed to the present belief that high school training for this complicated age is as important now as was elementary education then.

New tuition scales for next year have been an-

nounced. They are \$105 for Grades 9-12; \$90 for Grades 7-8; and \$75 for Grades 1-6.

We need to do some painting during the summer such as the ends of the Auditorium and the third floor corridor and Laboratory of the high school. The power lawn mower should be replaced. It is so old that parts are difficult to obtain and maintenance is a problem.

I am very grateful to all who have contributed so much to achieve the schools' goals, especially the School Board and the teachers.

> Very respectfully, HAROLD C. BOWLEY, Superintendent of Schools.

February 11, 1947.

REPORT OF HEADMASTER

To Mr. Harold C. Bowley, Superintendent of Schools in Milford, N. H., I herewith submit my second annual report as Headmaster of Milford High School:

The total enrollment of the school was 360 pupils January 28, 1947. The number of tuition pupils of the same date was as follows:

Grade 7	1	
Grade 8	5	
Grade 9	18	
Grade 10	21	
Grade 11	15	
Grade 12	11

Clubs

71

There have been ten clubs organized in the school this year. The pupils have an opportunity to choose and are allowed to change their clubs during the midyear. The clubs organized to date are as follows:

Projector Club——This club teaches pupils to set up and run a movie projector. To date 10 boys have learned this operation. It is under the direction of Mr. Clark.

Auto Driving Club——This club is under the direction of Mr. Littlefield. The main purposes are to study and practice the mechanical features of driving. Special emphasis is placed on safety measures. Fifteen pupils are interested in this club.

First Aid Club——Mr. McBride, who is an authorized instructor of the American Red Cross, conducts this course for about 20 pupils. These pupils are studying the essentials and basic principles of First Aid, and are trying to become proficient in this field in order to merit first aid certificates.

Press Club——The Press Club was organized for the purpose of giving instruction in the proper writing of news items and in any other pertinent facts connected with newspaper work. This club functions under the jurisdiction of R. E. Pomeroy.

Various newspapers in the surrounding territory were contacted, and groups of members were organized to send articles to them for publication. Practice was had by writing up fictitious happenings and having the accounts criticized in club meetings.

Speakers were obtained from outside plants to give talks on various phases of news gathering. A visit was made by the club to the newspaper plant of the Manchester Leader to observe mechanical operation in publishing a newspaper.

Typewriting Club——This year a new club was added to the list. This is the Typewriting Club which was formed for the purpose of teaching the fundamentals of typing to those students who were unable to fit it into their regular programs. This club is composed of 25 members, of which the majority are shop, boys. Miss Byrnes is in charge.

Dancing Club——This club still continues to be the most popular of all. It is divided into two divisions, Senior High and Junior High. The sponsors of the Senior High Club are Miss Tonks, Mrs. Tonella, Mr. Leskowitz and Mr. Pichierri. Miss Noble and Miss Carden are the sponsors of the Junior High Dancing Club. Instead of having an instructor, they are trying out the buddy system which is used extensively in schools today. This consists of the students who are proficient in the art of dancing working with those who need assistance.

Cooking Club——This club, consisting of about ten pupils, is under the direction of Miss Langley. The members seem to be making rapid progress in learning the culinary art.

Arts and Crafts Club——Miss Noble and Miss Johnson have made this club very popular this year, with about 25 pupils enrolled. Directions have been given for the making of a wide variety of articles. Many of the girls were able to make gifts for the Christmas season. The results have been very satisfactory.

Block Printing Club——Miss French is in charge of this club. The students practice and learn the construction of block prints to be used in the school magazine, the Student Prints.

Girls' Shop——This club is under the direction of Mr. Camp. The students taking this club make many fine articles that can be used in their own homes. There are about 15 girls taking this course.

Hi-Y Club——Under the direction of Mr. Littlefield, this club meets the sectional and local groups who are interested in discussing problems of school life and social obligations to society.

Tri-Y Club——Not much has been accomplished in this club up to the present time. However, a program is being arranged for the last half year under the direction of Mrs. Tonella.

Music Report

The music program for the second semester of 1945 and 1946 school year included the presentation of an operetta, "The Galloping Ghost," by the Junior High School, a concert in Hollis, Wilton and Milford by the combined groups of each school, and special music for the Woman's Club, D.A.R., Class Day and Graduation. Several students were chosen to attend the annual State Concert Festival in Nashua.

In September of this year the music program was expanded to include a separate girls' Glee Club and a long-range instrumental program. Pupils may now take private lessons on any orchestra or band instrument at their own expense. Each lesson is a half hour in length and is given during school hours by a private instructor.

Band rehearsals were started in January and it is hoped that a demonstration may be given for the parents this spring.

The Girls' Glee Club has presented short programs at Open House during Education Week, Woman's Club, the Student Prints Assembly and participated in the Chrismtas Concert. They will have the opportunity to render further selections during the remainder of this school year.

A Christmas Concert was given by the junior and senior high school combined choral groups.

Plans are now under way for the presentation of an operetta this coming April.

Several members of the Glee Club will represent Milford High School in the coming Concert Festival to be held in Rochester and the Auditions Festival to be held in Laconia this spring.

Shop_

Several new pieces of equipment have been added to the shop through the courtesy of the State Department of Education. These include a Pratt and Whitney tool maker's lathe, a Brown and Sharpe surface grinder, a power hack saw and a post drill.

We have enjoyed many moving pictures on subjects relating to shop work. These films have been supplied by various manufacturers.

The Cabinet Making Course is operated under Federal Standards, requiring fifteen hours a week, and a three hour day. Objectives of this course are skills and understanding of hand and machine tools.

Much time has been spent in repairing and replacing furniture, and building equipment.

^{*}Construction of furniture of various types from small pieces such as tie racks and stools, to tables, piano benches and lamps, have been completed in this course.

In Electricity the following items have been completed: Study of Covered Bell Wiring, Batteries, and House Wiring. The class has helped install the new electric score board, adjusted clocks, installed new wiring to the boiler motor, is making a lighting survey of the building and has carried out numerous small installations.

Mathematics

In 8th Grade math the class has covered three units in their study of Everyday Junior Mathematics. The students greatly enjoy the constructing of figures and the making of graphs. Much practical information was gained in the study of the social uses of arithmetic, namely, insurance and taxes.

In 7th Grade math the class has completed two units in their study of arithmetic. Much practical knowledge was gained in the drawing of designs and the study of position.

The Advanced Mathematics class started the year with a quick review of Elementary Algebra after which intensive work on the following was done: quadratics through imaginary numbers, the binomial theorem, ratio, proportion, progressions, and logarithms. At the end of the half year the class will take plane trigonometry through the third quarter and spend the last quarter on solid geometry.

Social Studies

In the Constitutional History Class a mock Election was conducted Election Day, November 6, 1946, in which all members of the Senior and Junior High School participated. Booths were set up in the Auditorium, checklists were prepared, sample ballots typed, a moderator presided, clerk, checklist supervisors and election officials functioned in their respective duties and several campaign speeches were delivered. After ballot was closed and the tabulation made the ballots were sealed and laid away for the usual sixty days. No recount being asked for, the ballots were then destroyed.

Current Events and Panel Discussions are conducted using Congressional Record, U. N. reports, American Observer, Our Times, Senior Scholastic and daily papers. When the N. H. General Court convened in January at Concord a "Model Legislature" was organized in the class. Division A with thirty-four members formed a House of Representatives and Division B with twenty-one members formed a Senate. For Governor, Mr. Pomeroy of the faculty was chosen and duly inaugurated. Names of legislators were assumed, officials were elected, bills were introduced and committees chosen. Meetings are being held bi-weekly and strict parliamentary procedure is being observed.

In the Sociology class in connection with the study of a unit on "Crime" Mr. Reagan of the State Probation Department gave an interesting and enlightening talk. Later on in the year a field trip will be taken to the State Prison, Industrial School at Manchester and the Hillsboro County Hospital at Grasmere.

Many original charts, graphs and cartoons have been exhibited showing varoius phases of units on "Culture," "Customs," "Education," "Family Life," "Recreation" and "Care of the Handicapped."

In the study of "Housing" each pupil designed a house and furnishings for at least one room. The class inspected seven new houses here in Milford in various stages of construction. Later a trip will be taken to the Carpet Factory and the local furniture factories. In the 8th Grade History Class a great deal of small group work has been done, in which committees of three or four have been working on different projects in class. Each group has had its own books for reference work and when its work was completed the group made a report to the class as a whole. Some of these reports have taken the form of radio programs, plays or bulletin boards. Also in this class, a unit on South America has been done. During this unit each child has worked on the history, geography and customs of his particular country, and class discussions were held at which time the child had the opportunity to tell about his country. Some interesting picture maps and excellent bulletin boards resulted from this activity.

In 8th Grade Civics Class we have studied the various responsibilities of local, state and national government. The State Constitution was analyzed and discussed. A unit on New England government, history, geography and industry was covered. 'During this unit some excellent bulletin boards made by students were developed. During the study of town government the class visited the local fire department. At town meeting time in the spring, the class will hold its own town meeting to discuss and vote upon the town warrant. The latter part of the year will be spent in learning about occupations so that the students may be helped in choosing future occupations.

Consumers' Education is a half term subject in which the topic of every day living is discussed. The students learn the necessity of studying Consumer Education.

The use and handling of money is taken up. An analysis of the student's actual spending is made so he can see if he is expending too much money in one direction. He also studies budgeting for the various size families.

Buying Practices and Principles and Standardization of Consumer's Goods are discussed. The government agencies, as well as private ones, are listed for their use. The students are shown how to contact these standardization agencies.

The girls in the class are taught to buy drugs, food and cosmetics and toilet preparations. Actual samples were brought into class, and analyzed. The students plan and arrange bulletin boards on their various topics. They also work in groups on some phase of the topic. Contracts are completed in class time with maximum and minimum assignments.

Textiles are taught and tests are performed on textiles to show how to detect quality and kinds of cloth. Women's clothes-buying is discussed as well as men's clothing. Several field trips to local textile firms are planned to illustrate unit.

The last topics to be taken up will be the buying of homes, home furnishings and household goods.

The second semester of the course is devoted to Salesmanship. The students will actually be given a Training Program for Salesmanship that is used in a Boston Department Store for their employees.

The Economic Geography Class treats of World Geography and how it is governed by economic principles.

The South American unit was taught as the study of four products, coffee, sugar, bananas and cacao. The students use material sent from South American countries, work in groups, plan bulletin boards, set up exhibits which were loaned to class by women who had been to South America, and present the results of their research in a novel form. The unit is climaxed with a South American party where the students dance the South American Rhythms, sample the products studied and stage a quiz program in which all the members of the class have a part. Prizes are given to the winners of the quiz program.

The Soviet Union was studied first with a current event approach. The pupils read propaganda material sent out by the Soviet Union Embassy in Washington, D. C. They learn to spot propaganda and to recognize it. They construct maps, charts, graphs and collect recent pictures of Soviet Union Agriculture, industrial development and culture. The political situation is discussed.

Canada was taken up. Many of the students have visited this country and they told of their adventures while there. A chart showing Canada's Trade was especially well worked out by the class.

A Petroleum unit was planned by the Standard Oil Company supplying the books. The pamphlets were used by the pupils. They made charts and diagrams showing how oil is formed, where it is found, and traced the story of oil from the well to the consumer.

The future units will cover European Countries, the Orient, the Land Down Under and the United States.

In Modern European History the students first study a review of ancient and medieval history to give them a background for the Modern European History.

Each of the Great Revolutions, English, French and American, are studied for their value to present day Democracy. This year the students have done a great deal of committee work, that is, groups of three or four students with a student chairman are assigned a phase of the topic. They then present it to the class in the form of a radio program, dramas, oral reports, or some sort of a forum discussion. Each group is the authority in its topic field.

Current Events are especially featured. The students are taught to interpret this present day happenings in the light of past events. The idea of nothing new is discussed. New present day ideas are traced back to their foundations so they can better be understood.

Economics has covered the following units: Meaning of Economics, Ways of Making a Living, Nature of Wealth and Income, Production, Owning and Managing Business, Corporations, Cooperative Societies, How Goods Reach Consumers (Marketing), Domestic and Foreign Trade, Value and Prices.

They have also had Current Events Topics, and several graphs have been constructed on prices and on Imports and Exports.

Commercial Work

In Office Practice a great deal of time has been spent in building up shorthand speed. All of the students in this class have passed the 80 words a minute shorthand test and have received shorthand certificates for their work. About half of the students have passed the 100 words a minute shorthand test. For passing this test the students have received small gold pins with the speed of the test engraved on them.

In typing we also have speed tests, and as incentives, the students may get pins and certificates by passing the required tests. A great number of the students have obtained these gold pins engraved with the number of words a minute they typed.

The students have been gaining a great deal of business experience by working in the office of the Headmaster. Each student spends a period of two weeks in the office, and this gives her a great deal of practical experience.

This year in Junior Business Training the students have studied the Business World. They study the techniques of writing application letters, order letters, and letters of inquiry. They discuss the qualities necessary to success in a business office. They also stage interviews.

The use of telephone and telegraph is discussed. Good telephone procedure is taught as well as how to use a dial phone or coin box. The students make model dials to bring situations to them in the class room. The mails are studied, the various mail services and their use. A visit to the post office is planned for the near future.

Filing methods are taught. Each student makes his own files and puts some sixty names into it. Therefore, they learn the filing rules by actually putting them to use.

The use of money and how it should be handled is discussed. The students work in committees and learn to send money orders, telegraphic money orders, express money orders, cashier's checks, registered mail and personal checks. They use the real forms in class and fill them out. They also brought examples of foreign coins and early American coins to class for display.

The other subjects taken up are Wise Buying, Budgeting, Life Insurance, Travel, Selling, Bank's Services, Where to Find Facts and Finding Student's Place in Business World.

An excellent film has already been shown on Life Insurance, "The Search for Security."

English

For Junior and Senior English the objectives have been writing accurately from observation and experience, and reading widely with understanding. Juniors have covered a course in American Literature with additional journalistic articles on the war and present conditions. Senior literature has featured modern writers, including radio and film plays. Seniors have had a short story course in the study of the newspaper and in news writing.

In all three divisions of Freshman English we have been doing fundamentally the same type of work, though differences in the amount of drill and types of discussion have varied because of the inequality of class and student ability.

Study has been made of the accepted forms of

A great deal of the time has been spent on drill work centering on the parts of speech, punctuation, capitalization, use of plurals and possessives, and the recognition of complete sentences and sentence fragments.

Written compositions have been done and two days have been set aside as "Student Prints" Day on which everybody has written something pertaining to thetheme of the forthcoming issue. Four book reports, about one a month, have been given—some of these have been oral—the others written.

In the literature field, a study of the short story and its developments has been made. Contracts were developed on this unit—some of them revealing definite talent along the lines of originality and writing. We are also working into the literature program a Reader's Digest project. Copies are purchased through the school, if so desired, and some time each month is devoted to their study and discussion. One person in each class is responsible for collection of money and distribution. Approximately half of the class subscribe through school; the others either have it at home or borrow from someone in another class. Each month a different committee of four students plans a program based on our reading and discussion in the form of a quiz show, truth or consequences, and so on.

Sophomore English has undergone rather an extensive study of the parts of speech, classifications and properties of verbs, appositives, punctuation, phrases, and so on.

A short story unit has been undertaken, and in Division B a study of ballads and lyric poetry has been covered. In connection with this, a "Favorites" Day was held—the period being devoted to the reading aloud of the favorite poems which had been brought in by the class. In Sophomore English, as well as Freshman English, a Reader's Digest project is being carried along similar lines.

Written work, as well as oral, has been done along the lines of book reports and compositions. A letter unit was developed and was based on social and business letters both. Forms were studied for letters of inquiry, application, complaint, and request; letters of thanks, invitation, regret, acceptance, sympathy, congratulations, and so on.

In Junior High English we hope to overcome, at least in part, a weakness in reading which handicaps the pupil in all his other studies, which is apparent in a great many cases. The Iowa Basic Reading Tests have been given to the Junior High pupils with the aim to find each pupil's reading level. We hope we will be able to adjust the textbooks so that a pupil will have subject matter at his level, but from the books at his reading level in an endeavor to overcome many of the present weaknesses. All of the Junior High teachers, as well as others in the system, have taken the Durrell-Sullivan Reading Course under the direct supervision of Dr. Durrell and Dr. Sullivan at Nashua this year as a Harvard-Boston University Extension Course. We have gained much from it and hope to apply it in the classroom to aid in overcoming present reading difficulties.

In seventh and eighth grade English we are still trying to develop a larger vocabulary and overcome spelling difficulties. We devote part of each English period to this.

Much emphasis is placed on the Mechanics of English with an aim towards better English use and better speech habits.

In literature, exercises and drills are given in comprehension of material read. The seventh and eighth grade literature books are of a series used through the High School. The seventh grade Prose and Poetry, "Journeys," contains stories of many lands and parts of our own land. The eighth grade Prose and Poetry, "Adventures," deal more with stories and poems of adventure with animals and nature. They both contain stories by well-known authors and many stories are those that every child should read at that age.

Science

In the course for Grade 7 in Junior High Science we have already completed units on the Environment, Adaptations in Plant and Animal Life, Air, Heat and Light. Through these units the pupil becomes conscious of the part science plays in our everyday life and often is the nucleus for a broader study of science in his later life. A very worthwhile notebook accompanies the text we use containing self-testing exercises by which the pupil can test his knowledge on the various problems in each unit. The pupils have also seen several films pertaining to the units.

In Physiography, a science which takes up the physical features of the earth and shows their relationship to man, which is a course open to Juniors and Seniors, we have covered several units including: The Earth, as a member of the Solar System, The Earth's Parts,-Lithosphere, Hydrosphere and Atmosphere, Rivers and River Valleys, Volcanoes, Glaciers, Mountains, Lakes and Swamps, and others to be taken up later. Interesting illustrated contracts have been done by the pupils as well as many drawings illustrating phases of the work. Visual education works in very nicely in this course, as there are many films pertaining to the units studied and the pupils have viewed several of these and will witness more during the year. In the spring we hope to see evidence of what we have studied by taking field trips.

General Science in the 8th grade has covered units on Environment, its Control and Improvement, Adaptations-what, why, etc.; Air-Breathing, Favorable Conditions, Air Conditioning; Water-Sources, How Obtained, Control in Home, Providing Safe Water for Cities, Water and Removal of Waste; Héat-Heating of Homes, Types of Heating Systems, How Heat is Used in Cooking, Fire Hazards, Extinguishing of Fires.

The high school sciences taught this year are Biology and Physics. In Biology the emphasis is on understanding the basic biological principles and how these principles apply to the individual.

In Physics understanding of Principles is emphasized in terms of how these principles apply to the things around us and on machines, weather, light, sound, atomic energy, electricity, and other common phenomena.

Home Economics

The Home Economics courses offered in senior high this year were Foods and Nutrition, and the Home. In the fall the Foods class canned tomatoes and carrots for school lunch. The girls have also made quick breads, raised breads and rolls for the lunch program. Many excellent movies have been shown, and the class enjoyed a field trip to Hayward's Freezer Locker Plant. Home project work is a part of the program for all senior high enrolled in Home Economics.

Girls in grades VII and VIII opened the fall term with a unit on Food Preservation. The 7th grade spent several weeks on the Breakfast Unit. Each girl acted as a guest or hostess at a family-style breakfast. Menus were simple, consisting of fruit, hot cereal, muffins, and cocoa. At the present time the girls in the 7th grade are making cooking aprons, and the 8th grade girls are making a simple dress.

The school lunch program began the first of November with lunch and milk available to noon pupils. A charge of twenty-one cents per day is made for lunch and milk. The federal government reimburses the lunch program nine cents per pupil per day. Three cooks are employed and the lunch is served in both the elementary and high school buildings. A new sink was installed in the summer and an electric refrigerator was purchased in the fall. The big need at the present time is an adequate stove or stoves for cooking. There was an average of 146 pupils served lunch each day during the month of December.

A Boys' Cooking Club was organized which meets once a week. Various foods have been prepared, including raised rolls.

Languages

In French I during the past weeks fundamental grammar and basic vocabulary have been the main activities of this class. Favorable progress has been made in both. In addition common idiomatic conversational French has been a feature of the work. As in all language courses, a knowledge of the background of the people whose language is being studied is important. Reading has been done to further this necessary aspect. The history of France, its diffecent geographical sections, the customs of her people and contributions to civilization were included in the reading. Pupils have been encouraged to collect and bring to class material which will add to the class. This has included modern trends and famous personages of yesterday and today.

In second year French, literature and conversation are stressed. The novel, "Sans Famille" by Hector Malot, was first read.

As enrichment, the class buys the newspaper "La Vie" which contains news, anecdotes, items of interest and a nvoel written in serial form. The story is hte famous "Eugenie Grandet" by Honore Balzac.

The cultural aspect is continued and carried on through special reading. A study of the great literary men of France is planned for the near future.

In Latin I the grammar is the main class activity of the year. Great effort is made to connect Latin with modern life, to diminish the thought that Latin is a "dead language." Derivative study aids in this line. Also, watching newsapers and magazines for Latin used in advertisements. One of the important parts of the Latin course is a study of the Romans' religion which is commonly called mythology. The class enjoyed finding out about the gods and goddesses. Roman clothing, customs and literature has also been studied.

One of the main activities of Latin II has been a collection of advertisements using Latin or making reference to classical names. This showed the pupils how much the language they were studying is used.

A review was made of the first year's grammar. Stories were read dealing with mythology. To supplement this a study of Vergil's "Aeneid" and Homer's "Illiad" and "Odyssey" was made.

Now the class is engrossed in Julius Caesar's "Gallic Wars," the main feature of second year Latin. Caeser is interesting as his Gallic conquests have modern parallel. Caesar, the man, is an item in itself.

For another modern touch the class subscribes to a Latin magazine "Luxilium Latinum" which is eagerly awaited each time.

Physical Education

This activity is handled by Miss Noble, Mr. Pomeroy and Mr. Clark.

In girls' Physical Education this fall, instructions were given in field hockey. The eighth grade did exceptionally well during the intra-class games. Basketball is now being played. On fair days the skating rink at the rear of the school is in use.

In boys' Physical Education touch football, soft ball, baseball and basketball are the sports that are taught and practiced. Our objective at the school is to develop a sound mind in a sound body. One of our chief aims is to have the boys learn to associate pleasantly with one another and to play games in which whole groups benefit.

Visual Education

Through our contracts with the University of New Hampshire and private film centers, we are able to furnish the students with a fine variety of films in all subjects. This activity is one of the most popular phases of present day teaching and instruction.

Other Activities

The Senior Class presented the play "Me and My Shadow" on November 22. The proceeds went towards the class trip. The cast included the following: R. Philbrick, R. Skinner, P. Sweetman, B. Rocca, C. Howland, E. Merrill, M. Bragdon, L. Prestipino and C. Wolffer.

Every member of the Senior Class served on a committee and so helped to make the play a success. It was directed by Miss Carden and Miss Tonks acted as business manager.

In September, 25 girls reported for field hockey. Much enthusiasm was shown by all. In the interclass games the seniors were the victors. We were unable to secure any games except with Keene Teachers College. Keene won the game 2-0.

This year a new plan has been introduced into basketball. Four towns have been invited to visit Milford for a basketball play-day. The girls will be divided into color teams and compete against one another. This will do away with the highly competitive idea of any one school winning.

The Seventh Grade has 64 members this year. The class met in September to elect officers, who are: President, R. Germino; Vice-president, G. Sprague; Secretary, Barbara Bianchi; Treasurer, Joan Lemay; Student Council, J. Forsyth and Carol Wheeler.

The only activities which the seventh grade has had so far are a Christmas party and a Valentine party. Later in the spring there will be one evening social for the seventh and eighth grades.

Some members of the class are very clever at decorating the boards with chalk drawings. The class adviser is Miss Carden.

Canteen

In developing the Canteen program the following purposes of education were kept in mind:

A student is a participant as well as a spectator in sports and pastimes.

A student knows how to play and work with other people.

A student enjoys a rich, sincere, and varied social life.

It is gratifying to see how the attendance has increased this year over last year. Last year the attendance at the socials averaged about 110 students. This year to date it has averaged between 149 and 150 students.

Because of the great interest shown in these social affairs, special socials were held for the Junior High students in the fall. At these socials the students were taught social games, principles of behavior at socials, and given a chance to overcome shyness.

The Canteen in cooperation with the Music Organizations, Student Prints, and the Dancing Club bought an amplification system and record changer. In less than three months the machine has been used by the Canteen, at social parties, dances, dancing club, during noon hour, for basketball games, and in music appreciation work.

VLADIMIR LESKOWITZ, Canteen Director.

Guidance

The purpose of a guidance program and a summary of the program that is being developed at Milford is outlined in the 1946 town report. As the program developed last year it became apparent that guidance, to be effective, must start in as low a grade as possible. Therefore this year more emphasis is being placed on the Junior High group.

To further our work in the Junior High this year each child was tested to find out how well he can use the tool subjects which are Reading, Mathematics, English Usage, and Spelling. The seventh grade had additional tests on Work and Study Habits, and a Mental Maturity Test. From these tests the teachers can develop special programs for the students who show weaknesses in a tool subject.

The importance of adequate preparation in the tool subjects can be readily seen when we consider that a child has little chance of success in all Social Studies courses, some Home Economics courses, the Sciences, and some Commercial subjects if he is retarded in reading ability. A mathematics deficiency shows up in all mathematics classes, sciences, bookkeeping, and Junior Business. It can similarly be shown how the other tool subjects can limit a child's success in high school.

In the high school we are trying to do more with individual counselling. A private interview with the counselor is more effective than any other method that is in use. It is hoped that more time can be made available for this activity.

Last year each child's high school program was carefully studied by the guidance director and in many cases worked out with the director. The results of this are extremely gratifying. In one year we have witnessed a large decrease in the number of students carrying subjects in which they had little chance of success and also a large decrease of students taking wrong subjects as preparation for post-secondary school study.

> VLADIMIR LESKOWITZ, Guidance Director.

Traffic Squad

To reduce confusion in passing from class to class, at close of school and to and from Assembly, a traffic squad was organized three years ago and has been reorganized annually. At the present time twenty-five seniors are on regular duty and four are substitutes. They are placed at strategic positions on all three floors, on stairways and exits, and keep the traffic lines moving smoothly and quietly. At assemblies this group escorts the pupils of the various rooms to the auditorium and seat them in their respective places. An innovation this year was to have the senior class march in to assembly and sit in a block down front.

Sometime in May a group of juniors will be chosen to replace the seniors and will be all trained and ready for duty in September 1947. This activity was organized and has been directed by Miss Herlihy since its inception.

Conclusions

Since the Annual Report last year we as teachers feel that most of the major problems in the school have been analyzed or corrected. There are many small problems still to be ironed out. More time for guidance work is necessary. More time for individual help and conference periods are needed. The cooperation of the teaching staff still continues to be high and the general attitude of the pupils seems to be one of good adjustment and security. Great strides have been made in the reduction of discipline cases. The deportment of the pupils in and around the school is for the most part highly commendable.

The staff and school officials want to express their appreciation for the help and aid given by the citizens and organizations during the past year. We have particular reference to the Trustees of the Keyes Fund who have made it possible for the school to get much needed equipment.

Our main goal for the balance of the school year will be to stress the presentation of remedial work. This will mean extra loads for the teachers and change of assignments and schedules, but we feel sure that we can furnish the pupil with this long needed phase of school work.

We are greatly encouraged with the increase of parents and friends who have made it a point to visit the school while it is in session. We sincerely hope that this policy will continue to be carried out in Milford. As teachers and as administrators we feel that the taxpayers of the town of Milford have become one of the leading groups in the state of New Hampshire in regard to up-to-date solution of the teacher-school problems. In 1947 it is encouraging to know that the townspeople and the school authorities will support the teachers and acknowledge the teachers' economic problems.

In conclusion the teaching staff and I, myself, would like, at this opportunity, to pay our respects to the School Board, Mr. Bowley and those who have given to the school their advice, guidance and tangible property.

Respectfully submitted,

JOHN R. CLARK,

Headmaster.

GENERAL STATISTICS FOR SCHOOL YEAR 1945-1946

Number of different pupils registered during year:	
Boys 323; Girls 367; Total 69	90
Enrollment by grades:	
I-55; II-61; III-61; IV-49; V-46; VI-55;	
VII-52; VIII-61; IX-61; X-72; XI-62;	
XII-52; Total 69	90
(In addition to this number, 17 pupils were	
previously enrolled in some other N. H.	
public school, making a total enrollment	
in Milford 707 for the year.)

Of the Deaths in town in 1946, 32 were carried out of town for burial: Amherst, 8; Bradford, Mass., 1; Brookline, 1; Dan-vers, Mass., 1; Gardner, Mass., 1; Greenfield, Mass., 1; Hancock, 1; Kennebunk, Me., 1; Lincoln, 1; Manchester, 1; Marlboro, 1; Morrisville, Vt., 1; Nashua, 4; New Boston, 1; New Ipswich, 1; Pelham, 1; Peterborough, 1; Townshend, Vt., 1; Wilton, 4. Eighteen were brought from away for burial. Of the 79 Deaths recorded, 3 were between 90 and 100, 15 be-tween 80 and 90, 24 between 70 and 80, 16 between 60 and 70, 5

between 50 and 60, 3 between 40 and 50, 2 between 30 and 40, 1 between 20 and 30, 1 between 10 and 20, and 9 under 10 years old.

Of these deaths 45 were male and 34 female.

One or both parents of 30 were born in foreign countries.

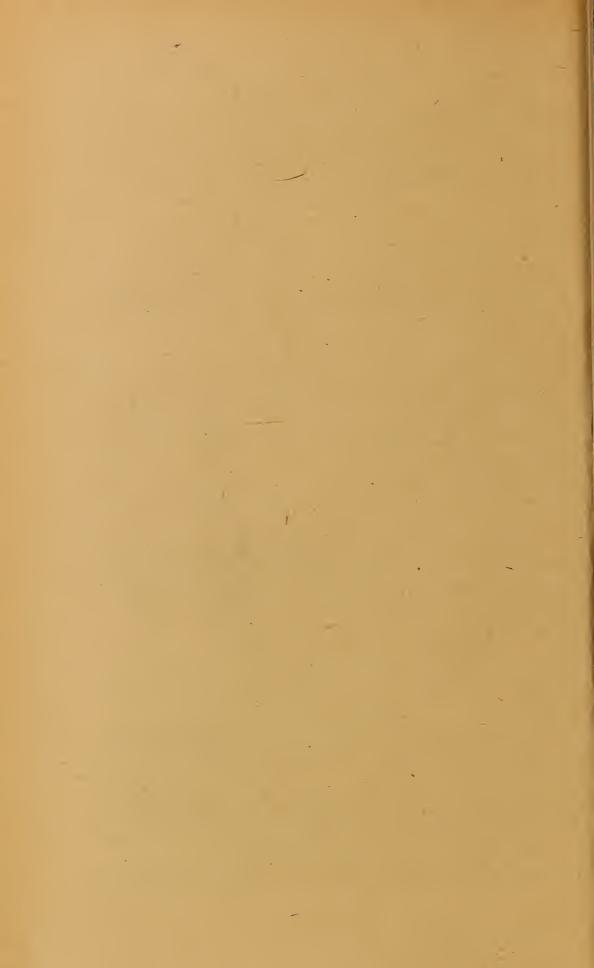

The Vital Statistics of a town are one of its important records, not merely for today but for generations to come. If everyone would see to it that the records of their own families were fully and correctly filled out on the Marriage, Birth, and Death certificates when handed in, it might be of great use to them or their descendants at some future day, and a great help to us in making out the records of today.

I hereby certify that the foregoing returns are correct according to the best of my knowledge and belief.

Respectfully submitted,

DONALD C. BRUCE,

Town Clerk.

SUPERINTENDENT OF PUBLIC WORKS Salvatore P. Grasso

Board of Selectmen Milford, New Hampshire

Sirs:

The Milford Public Works has the honor to submit herewith the first annual report of its activities and accomplishments for the last half of year 1946.

The outstanding feature of the past six months is the most wholehearted spirit of cooperation that has been evidenced by the Board of Selectmen, commissioners and trustees, local committees, town employees and local citizens in organizing and establishing this new system known as Public Works.

Although much has been accomplished, considerable work still remains to be done, and we look forward to continued progress in the development of a more efficient organization.

Through you I desire to express my thanks and appreciation to all of those who have assisted in this work whether or not they are mentioned herein.

The work of the various departments has been carried on in a normal manner of routine maintenance and improvements. The Public Works has covered such a broad field that in order to fully convey its activities to the board of selectmen and people of Milford it becomes necessary to go into the various departments somewhat in detail as will appear by the annexed report.

Respectfully submitted,

SALVATORE GRASSO, Superintendent of Public Works.

INTRODUCTION

Milford's Public Works was started on June 1, 1946 with the superintendent reporting for duty on that date. Article 24 of the 1946 town warrant was used as a guide in organizing this grouping of the various town departments and it continues to be the nucleus of the organization.

The work of consolidating these various departments has been necessarily slow and though much has been accomplished a great deal remains to be done before developing the most efficient and economical organization.

The office of the Milford Water Works in the town hall was 'selected as the new Public Works Office. Minor physical changes were made in order to yield the maximum of space because the office was admittedly lacking in room. At the time that room made a satisfactory headquarters. The gradual influx of records and materials, concerning the various departments, at this one point constituted the major change. Existing records, especially their centralization, were at a minimum for nearly all departments on June 1st and it will be quite some time before they begin to approach a complete set. A system of filing these records has been started but much remains to be done before available and new records are at fingertips. This work will be slow because nearly all of the available time is needed to keep up with our normal activities.

Many lengthy meetings were held with the Board of Selectmen in order to establish the policy of Milford's Public Works so that it would conform with the intentions of Article 24 of the 1946 town warrant. The Board of Selectmen is to be highly commended for the time, effort and patience that they have contributed toward the success of the new organization.

During the months that followed meetings were held in conjunction with the cemetery trustees and the water commissioners in order to coordinate their respective departments with the new organization. These meetings were in addition to the regular Friday night meetings that the superintendent of Public Works holds with the Board of Selectmen.

By early November all of the departments concerned had

finally been concentrated at the new office. Current operations were carried on in a normal manner for each department and it will be quite some time before the effect of the new set-up will make itself evident.

During the month of September the Board of Selectmen reestablished the Milford Planning Board. Their first project was suggested by the Public Works and consists of the determination of the accepted names, widths and locations of Milford's streets. This information when totally gathered should prove valuable to both the townspeople and the Public Works in determining the extent of the town's liabilities in the summer and winter maintenance of the town streets and roads.

The policy of giving recognition to local merchants in making purchases is being continued. Past experience had shown, however, that it was impossible to make a fair distribution of the gasoline purchases. Thus, late in the summer a gasoline pump was installed at the town barns. This resulted in a considerable saving to the town since now all gasoline used by the town vehicles under Public Works is obtained from the town gasoline pump.

A very striking example of the advantage of the present setup is the interchangeability of the town employees. The men are used where they are needed most and on several occasions this past year both the water works crew and the highway crew have worked together on jobs. This past winter the water department men and truck have put in a large amount of time helping with the winter maintenance. This interchangeability lends itself to greater efficiency and economy for the town.

On November 1st the Blue Cross hospitalization plan went into effect for town employees. This along with the state retirement system which also went into effect late this past year begins to make town work much more desirable. It is hoped to add compensation insurance for town employees thus protecting the town from any liabilities and offering better protection for our workers. All this makes better employee relations.

In order to present a clear picture of the activities and accomplishments of this system it is best to report on each department in turn as will be found on the following pages.

BUILDING INSPECTION

On September 1, 1946 the Public Works took over the duties of building inspection. Building permits were issued for the erection, additions, and alterations of buildings in accordance with Milford's Building Ordinances which were originally adopted in March 1929 with additions adopted in March 1937. These ordinances are in need of revision and the Board of Selectmen has appointed a committee to develop a more suitable and fitting building code.

In keeping with the trends of progress of modern communities it would seem advisable at this time to give some consideration to the establishment of some simple yet effective plumbing code. The purpose of such a code would be to safeguard the public health of the community.

A statistical report of the permits issued during the past year follows:

Permits Issued	No.	Approximate Cost	Fee
New Dwellings	9	\$ 43,600.00	\$29.50
Additions and Alterations			
to Dwellings	27	52,325.00	48.00
Garages	3	7,300.00	6.00
Additions to Barns	1	2,000.00	2.00
Small Buildings	1	2,000.00	2.00
TOTALS	41	\$107,225.00	\$87.50
Cash Income	~	\$75.50	
Printing Forms	5	9.00	
Credit (Paid af	ter Jan	. 1, 1947) 3.00	
Total Cash		\$87.50	

CEMETERIES

Late in the summer the Superintendent of Public Works met with the Board of Selectmen and the Cemetery Trustees in order to bring the town's cemeteries under the new office. This meeting revealed that much work needs to be done with the cemeteries.

Mrs. Georgianna Simoneau continued to carry on the clerical

and bookkeeping work of the department until late November when all of the records were transferred to the Public Works office. At that time complete control of the cemeteries passed on to the Public Works.

Antimo Carpentieri continues in the capacity of foreman of the cemetery workmen, and has rendered valuable service with his knowledge of Milford cemeteries. His task has been harder by virtue of the fact that the cemetery funds are rather limited considering the amount of work that needs to be done.

Milford's cemeteries total five in number and include the following: Elm Street Cemetery, North Yard, Riverside Cemetery, Union Street Cemetery and West Street Cemetery. The Elm Street, Union Street and West Street cemeteries are completely sold out and new lots are not available. A limited number of lots are available in the North Yard, but Riverside Cemetery is really Milford's active cemetery. There are ample potential lots available in this cemetery with a great deal of room left for further cemetery development.

The problems of the Elm Street, Union Street and West Street cemeteries are those of regular maintenance which involve keeping the cemeteries looking well. Various portions of these cemeteries are cared for by perpetual care and annual care but a good percentage by relatives or friends who do their own maintenance work.

Many lots are left uncared for because there is no one left to take an interest in them. The money available to the Cemetery Department is not enough to maintain these forgotten lots and it is these lots that mar the appearance of our cemeteries. This problem involves all of Milford's cemeteries and before too long a time a solution must be found to meet this condition. This will be only one of many problems that the Public Works has to work on.

Considerable planning and development must be done at Riverside Cemetery. Sufficient land is available but it must be cleared, graded and grassed over before the lots can be staked out and sold.

It appears at the moment that lots, foundations, opening of graves, grading, perpetual care and annual care are being sold at a loss. This can only be confirmed by a careful study which will eventually be undertaken by the Public Works office. It is admitted that the above services should not be rendered at a profit yet neither should they be sold at a loss to the taxpayer.

A great deal of space is wasted in Riverside Cemetery by selling only single grave and eight grave lots. It is planned to have available in addition to the above, both two and four grave lots so that two people won't have to buy an eight grave lot and thereby waste six.

HIGHWAY DEPARTMENT

The Highway Department was taken over by the Public Works early in June. At that time the work and projects of the department had been laid out and the Public Works completed these projects in addition to carrying on the regular maintenance of the town's streets, sidewalks and roads.

This department is housed in the town barns and contains a minimum of major equipment. The inventory of the town's major equipment includes a pretty much worn out 1934 Dodge dump truck, one small (too small) Fordson road grader, one road broom, one International tractor snowplow, one broken down road roller (beyond repair), three sand spreaders, one steamer for thawing out catch basins, one road hone, and miscellaneous small tools such as chains, shovels, crow bars, picks, etc. Over the coming years much needs to be accomplished toward building up a well equipped department.

A new International Model K-7 dump truck was ordered in June, and we are still waiting delivery. The delivery of this truck will find us moving in the right direction and should be the start toward getting better equipment.

The accomplishments can best be described by discussing the activities of each branch of this department since June 1, 1946.

ASH COLLECTIONS

The regular highway maintenance crew handles the ash col-

12

lections. This year the policy of requiring payment in advance was started, and it has worked out very well. Many of the outstanding accounts were settled and now all ash customers are paid up accounts. As will be noted in the financial statement, \$259.50 was collected this year as compared to \$87.00 in 1945 and \$66.00 in 1944. This fact alone demonstrates the success of requiring payments in advance.

The rate was maintained at the established charge of one dollar (\$1.00) per standard size ash can or its equivalent. The financial statement of ash collections shows that this represents approximately one-fifth of the actual cost, meaning that ash collections are being subsidized by the winter maintenance appropriation. It is my opinion that this condition should not exist and that ash collections should at least meet its own expenses. This is especially so since ash collections are benefiting neither the taxpayers who burn oil nor the taxpayers who live outside of the compact area. I recommend that this office be permitted to determine the charge for ash collections on the basis of the previous year's cost and that it be established so that it at least pays its own way.

The financial statement is as follow	'S:	
Outstanding from previous years; colle	cted \$121 00	
1946-1947 Season Customers	138 50	
Total Income		\$259 50

A cost analysis of this service is as follows: Three men and the truck are required for one full day a week to collect the ashes. The services continue for a period of approximately 25 weeks, resulting in 25 collections. The rate for the truck is based on what we have to pay to rent a truck of equivalent capacity.

Labor 25 days	\$520 00	
Truck 25 days	- 200 00	
Published Notices	11 35	
Total cost for one season		\$731 35
Income for season		138 50

Paid from W	Vinter Maintenance	Appropriation	\$592	85
-------------	--------------------	---------------	-------	----

Number of barrels contracted at \$1.00	138.5
Actual season's cost per barrel	\$5.29
Season's loss on each barrel collected	\$4.29
Recommended charge per can for 1947-1948 season	\$4.50

OILING

This work is also done by the regular highway crew with the assistance of hired trucks for sanding. A great deal was accomplished this year and much remains to be done. The planned projects were completed, namely oiling the road from Jones Bridge, on the north side of the river by the old Steele place to beyond the last house; the road from Jones Bridge to Phelan's over Rattlesnake Hill to the Wilton line at the Biggons place; and from the same four corners to the Mason road; the Harlan Burns road; the upper end of the Levesque road and the upper end of the Ball Hill road. These were all oiled for the first time and will need another coat of oil this coming year. In addition to these the road around the Water Department's pumping station was given a coating of oil. These above roads represent a total of approximately five miles of road.

The area near the Milford Bakery and the Milford Coal and Grain Co., was given a coating of oil this last fall. Most of this area is not town property but the numerous pot holes were such an eye sore and detriment to the town that this office took steps to alleviate the condition. By cooperation with the owners of the two properties an arrangement was made whereby the town gravelled and graded the area and gave it two coats of oil. The property owners paid for the oil and the town accepted the rest of the expense which was indeed small. This small fraction of the summer maintenance money was well spent.

A great deal of maintenance work needs to be done on Milford's oiled streets and highways, because this past season the maintenance was kept at a minimum. It is my recommendation that the oiling of new roads be kept at a minimum this year and that the oil be used in salvaging our already oiled roads.

The financial statement of the appropriation follows:

Expenses:

Barrett, Howard

\$ 7 75

\$3857 66
\$257 66
216 00
\$41 66
\$36 00 00

To

Sta

SIDEWALKS

The maintenance and construction of sidewalks is carried on by the town's highway department. There were four planned projects for the past year, namely a new concrete sidewalk in front of the Peter-Carol apartments, resurfacing the sidewalk in front of the Wadleigh-Sargent block on Nashua street, a new sidewalk on Dane street, and a new sidewalk on Lincoln street from South street to the bridge. Only the first two of these projects were completed, the remaining two being carried over into the coming year.

15

In addition to the above projects regular sidewalk maintenance such as patching, etc., was carried on.

The sidewalk in front of Fred Powers' property on Summer street was resurfaced. The expense for this work was shared equally between Mr. Powers and the town.

The established policy on sidewalks has been that where a sidewalk is in existence the financial responsibility for maintenance rests with the town. New construction will be made at the town's expense in terms of normal growth and the program will progress in the direction of the greatest need for safety of pedestrians. If a property owner desires a sidewalk before his property is reached by the planned construction program the abutting property owner must pay one-half the cost of such construction.

The financial statement of this appropriation follows:

STREET CLEANING

The regular highway maintenance crew did the street cleaning until mid-June when a street cleaner was hired for the season. His job was to keep Milford's business district free from litter and trash and he performed his duties well.

It is hoped that this coming season trash containers can be placed in strategic places about town. With the cooperation of the townspeople these containers can do much in keeping our town looking clean.

Street cleaning is financed with the summer maintenance appropriation, and is carried on from late spring until the first snow storm. This past year the cost was approximately \$500.00 from mid-June until late November. The practice of hiring a regular street cleaner will be continued.

SUMMER MAINTENANCE

Summer maintenance constitutes the major portion of the highway department's summer work. Normal maintenance included the grading and shaping of our gravel roads, cutting brush, installing and maintaining culverts, patching our surfaced roads and streets, regravelling and improving our class V roads with town road aid, and cleaning and maintaining the catch basins which control the highway drainage.

Effective equipment is necessary to carry on this work and the town is really in need of essential equipment. The Fordson road grader is too small to do our average work so this past year, as in years gone by, it has been necessary to rent a road grader. The town has been fortunate to be able to rent one from the O. F. Winslow Co. this past season Yet, in spite of the excellent cooperation of the O. F. Winslow Co. there were times that work had to be postponed until the grader was available for rental. A road grader of the size we require rents at an established state rate of four dollars per hour without an operator. This means that each eight hour day devours thirty two dollars of our summer maintenance appropriation. Eventually serious thought must be given to the purchase of a grader. It is my suggestion, however, that we get along for another (and the need is great) and concentrate on winter maintenance equipment where the need is greater.

The brush on the country roads is far ahead of us and it will take more than the coming season to get caught up with it. Cutting brush is slow work and doing it by hand is slower. The time has come when serious consideration should be given to a tractor equipped with a cutting bar. This request can be supported by the fact that our cemeteries, parks and streets require several mowings each summer. A tractor can be kept working constantly throughout the summer months. This tractor can have a snow plow attachment for sidewalk plowing during the winter months. Sidewalk plowing would be an off seasonal use for this tractor but it can be expected to be a partial answer to our problems of plowing sidewalks. I do not believe that horsedrawn plowing should be discontinued because plowing is a secondary and off seasonal use for the tractor.

There is no doubt that equipment is necessary to do efficient and economical work and that eventually the town will need more of it. However, should we be able to get the above piece of equipment we would find it a step in the right direction and a start toward solving our equipment problems. A tractor to do the above described work is available at a cost of approximately \$1700.

In spite of being handicapped by the lack of equipment a great deal of work was accomplished this past season. In addition to the planned projects regular maintenance of the roads and streets was carried out. The major project under summer maintenance was the resurfacing of Dean Moore Hill. This work was done late in the fall and then only with the cooperation of O. F. Winslow Co. who rented us their shovel, trucks, grader and roller at a time when equipment was difficult to rent. O. F. Winslow Co. donated the gravel and I wish to take this opportunity to thank them on behalf of the town.

Two coats of tar were applied on the newly shaped road and one coat placed on Park Street. The hill should have another coat of tar this coming season in order to yield a lasting pavement.

The road through the Harlan Burns property off the Mason Road was widened and gravelled and covered with two coats of tar. This project was actually a new road location and by doing it at the same time as the T.R.A. work it was completed for the appropriation of three hundred (\$300) dollars.

In reference to the expenditures it is well to call attention to the fact that \$330.75 was paid from this appropriation for street signs. This not planned for expense resulted in over-expenditure of the appropriation.

The financial report of this appropriation follows:

Harlan Burns Road Appropriation	\$300 00
Expenditures-Labor, Equipment, Oil	\$300 00

The financial report of the summer maintenance does not present a complete picture of the accounting of this appropriation because the item of \$1004.43 to O. F. Winslow Co. includes the \$265.00 expense item shown below. Actually the financial report should show an expense of \$1239.43 to O. F. Winslow Co. and from them an additional income of \$235.00 resulting in the balances as given in the report. In order to clarify this matter the following statement is included as part of the summer maintenance financial report.

Due to O. F. Winslow Co. for Constructi	ion Equipmer	nt:	
Road Roller 24 hours at \$3.00	\$ 72 00		
Road Grader 72 hours at \$4.00	288 00		
Sand Loader 80 hours at \$1.75	140.00		
	·	\$500 00	
Due to Milford Highway Department for rental			
of Town Equipment:			
Water tank, 30 days at \$1.00	· \$30 00		
Road Broom, 24 days at \$5.00	120 00		
Sand Spreader, 30 days at \$2.00	60 00		
Road Grader, 10 hours at \$2.50	25 00		
Total due Town of Milford		\$235 00	
Balance due O. F. Winslow Co.		\$265 00	

TOWN ROAD AID

T.R.A. is spent on our Class V highways which are the roads outside of the compactly settled areas of the town. This

22

work is also done by our regular highway crew plus hired trucks, grader and shovel. A great deal was accomplished with our T. R. A. funds this past year. The McGettigan road, which for all practical purposes was impassable, was gravelled and shaped; portions of the Levesque Road were gravelled; Rattlesnake Hill was scarafied, regravelled, shaped and oiled; and a major improvement was made on the Kittredge Quarry Road. At the suggestion of this office, Henry Curtis granted the town sufficient land to make a 33-foot roadway from Route 13 to the culvert in return for a barbed wire fence to replace his stone wall. On behalf of the town I want to take this opportunity to thank Henry Curtis for his splendid cooperation. This stone wall was removed, the road widened, gravelled, shaped, and the hill given a coat of oil to keep the gravel from washing away.

The final results of the T.R.A. work show approximately three miles of newly gravelled and shaped roads at a cost of \$3420.84 which constitutes the total T.R.A. appropriation. The state highway department figures on about \$1500 per mile for this type of work. Milford's T.R.A. roads cost about \$1140 per mile.

The financial report of the T.R.A. money follows:

TREE WORK

This program consists of the removal of dead limbs and trees that are hazardous to the travelling public and the removal of limbs and trees that fall on the travelled way of roads and streets. The work is done by the regular highway crew and unless there are special tree removal projects there is no real reason why the work should be segregated from the routine summer maintenance work. It is my recommendation that this appropriation be discontinued and that the work be continued as routine summer maintenance work. Should any special tree work project arise it can be covered by a special appropriation.

WINTER MAINTENANCE

General

All work done on the town streets, roads and sidewalks, and the maintenance of highway department equipment during the winter months come under this classification.

Sanding and Salting

On several occasions during the winter season it is necessary to sand or salt the highways and sidewalks in order to keep them passable. As a general rule the town truck can handle the dangerous intersections, hills, and town streets under the average ice conditions. Yet in several cases it becomes necessary to use hired trucks for sanding, and this results in more expensive maintenance. With the equipment and appropriations available it is impossible to cover all highways and sidewalks in a short period of time and the members of the highway crew have done very well considering the conditions under which they have had to work. The problems are many, the job difficult and the appreciation, understanding and thanks very few. Sanding and salting require no special expensive equipment, just fast hard work on the part of the crews and patience on the part of the townspeople. The time required to get sand and salt on all streets, roads and sidewalks will vary directly with the appropriation.

Snow Removal

The major and most difficult problem of winter maintenance is snow removal because it requires expensive equipment, dependable trucks and so much must be accomplished with the least possible delay.

In June of 1946 the tractor was the town's only piece of snow fighting equipment. By late June an order had been placed for the two Vee plows, three blade plows and wings as recommended by the budget committee and voted by the townspeople at the last town meeting. By mid-November it became apparent that because of the shortage of materials, and scarcity of equipment delivery would not be made in time for our first snow storm. In fact, delivery of our original order is still impossible. Thus, three other blade plows were purchased, two new and one used, two used vee plows, and two wings. More wings were not and are not yet available.

The purchase of the above equipment has not been the answer to Milford's snow removal problem. Plows and wings will not go over the highways under their own power, they must be mounted on trucks rented at state snow plowing rates. As a general rule local truck owners use their trucks in their normal course of business and snow plowing is incidental with them. For that reason, the state snow plowing of state owned plows and rented trucks, can never be accomplished as effectively by a town as it can by the state.

The ideal solution is for the town to own, maintain and operate all necessary equipment. Since it is impossible to reach this stage immediately a step in approaching that object is a step toward the ideal solution.

The men who plowed snow this past winter worked hard and

under several handicaps. The above is in no way any reflection on them. Their problems have been many and were it not for their splendid cooperation Milford might well have been snowbound after each storm. They have done a fine job.

The tractor is a good effective snow fighter but it is slow and its maintenance expensive. The maximum plowing speed is in the vicinity of two miles per hour. The fact that it is not a rubber tired vehicle makes it hard on roads and increases our road repair expenses in the spring. Used over thoroughly frozen roads and in deeper snows the damage is slight. It did not run properly this past winter so that most of the winter Milford was almost totally dependent on its five rented trucks. Fortunately we have experienced one of the lowest snow falls on record. Late in December a part in the oil pump broke causing damage to bearings and pistons. This was purely accidental and unfortunate with no blame placed on negligence. Neither pumps nor parts were available so that a new part had to be machined to order. As a result the tractor has yet to be returned to Milford.

Even though our roads cannot all be plowed with our tractor it is a good dependable piece of snow plowing equipment and is good snow removal insurance even though it spends most of its time sitting in the barn. I would not recommend selling this tractor, because at the present its value as a standby plow far exceeds the dollars it would bring on a sale.

A partial answer and move in the right direction would be the Walter Sno-Fighter recommended by last year's budget committee. This would be an effective and worthwhile piece of equipment for the town to own. There is no doubt that it can do the work of at least two of our rented trucks and do it more effectively than any rented truck on the road. It has the further advantage of being used as a dump truck in the summer months. It is hoped that this office can announce a public showing of movies demonstrating the Walter Sno-Fighter in action some time before town meeting.

For the first time in the history of Milford, a clear cut town responsibility has been established for snow plowing. This past year town-operated snow plows were instructed to keep off private property within the compact settled area of Milford. A limited number of exceptions were made outside of the compact area because of the hardships that would develop to the people concerned. However, a verbal agreement was made in these cases relieving the town of any responsibility of damage that might be done to the property by the snow plows. It was also agreed that accepted roads and streets would first be opened and that the town would be reimbursed for the cost of said plowing. This arrangement worked out very well once the townspeople understood the setup. In previous years there had been no set rule and no one knew where the town's responsibility started or ended. This office is in total agreement with maintaining the above established policy and hopes the policy can be further strengthened by a vote of town meeting. Should the townspeople of Milford see fit to change this policy it is hoped that whatever policy they do establish will be clear cut leaving no ambiguities. This office will do its utmost to carry out the decisions of town meeting.

It is well to call attention at this point to the advantages of the policy of plowing only the town accepted roads and streets established this past winter. These advantages and interesting points may be enumerated as follows:

1. The town's snow plowing responsibility is definite and exact.

2. All townspeople and taxpayers receive equal benefits, eliminating the stigma of favoritism in snow plowing.

3. The town's accepted roads and streets are maintained in the summer and are of sufficient width to permit a snow plow to pass over them without endangering equipment or loss of time.

4. Road and street plowing equipment is too big and bulky for the plowing of individual driveways.

5. With the equipment and appropriations available it is a task to keep our travelled way open, say nothing of adding private driveways.

6. It eliminates the common complaint, "so and so's driveway was plowed out, why can't you plow mine?"

7. Private roads and driveways are generally too narrow for town equipment and require so much turning around that they are time consuming. 8. If a road is used by the public to the extent of requiring plowing it should be an accepted town road so that the town can properly maintain it for safety and convenience of the public.

9. As a general rule these private roads expect priority in plowing and do not want to wait until all travelled ways are opened.

10. If roads and driveways other than accepted town roads or streets are to be plowed a list showing the order of plowing must be prepared because everybody wants to be first.

11. Some local taxpayers make a business of plowing private driveways and can get to these driveways long in advance of town's equipment. Should the town enter private competition?

12. The town is liable for any damage done by plows on private property and in one case a few years back had to repave a driveway.

13. The likelihood of damage to the town's equipment is increased many times due to the width and conditions of these private roads and areas.

14. Last but not least, who will decide which taxpayers must open their driveways by individual shoveling?

It is apparent from the discouse above that the feelings of this office are strongly in favor of the established policy because it feels it is the fairest policy for the individual taxpayer, and best for the town. Plows were sent out to private roads in cases of emergency, however, and this procedure of course is of prime importance. In spite of favoring this plan I reiterate that this office will do its utmost to accomplish any plan set up by the people at town meeting.

Snow Removal (Sidewalks)

As in years gone by, the plowing of sidewalks was a problem this past winter. The major difficulty is that the sidewalk plows push the snow from the sidewalk to the road and the road plows push it back on the sidewalks.

A suggestion toward easing this condition is to require future streets to be of such a width as to permit the maintenance of a grassed area between the sidewalk and the edge of the street. It can be used to store snow in the winter time, and to house the water and utility lines, thereby eliminating the necessity of damaging the road surface when repairs must be made to utility lines. It can also be used for fire hydrants, granting them greater protection from damage by cars. Some portions of the Elm Street sidewalk are illustrations of this layout. Such a layout would make possible the plowing of the street and the sidewalk without interference with each other except in unusual conditions.

The little sidewalk plowing that was done this past winter was done with worn out horse-drawn plows. These plows are beyond repair and must be replaced in order to have satisfactory sidewalk plowing. The tractor mentioned for mowing under the summer maintenance program can assist in this plowing but one tractor will not solve the sidewalk plowing. This does make a winter use for the recommended tractor, thus giving the town year round use of this equipment.

The best solution under the present conditions seems to be to open only one sidewalk after leaving the business district. This would leave one side of the street to store the snow. Unless we are told to do otherwise by town meeting or presented a better solution this plan will be used this coming year. Whenever possible all sidewalks will be kept open. The size of the storm will more or less dictate the method of handling the sidewalks. Snow Removal (General)

The question of carrying the snow away from the business section of town and the oval makes a very interesting topic. The snow can effectively be moved, after the storm by the regular maintenance crew. On New Year's day a shovel was used, on an experimental basis, to remove snow from the vicinity of the oval where a dangerous traffic hazard was admitted to exist. This method of removal was very effective, the snow being removed from two places in six hours for a total cost of sixty-five dollars. Much comment has been made by local citizens concerning the snow piled around the oval and it would be nice to know whether the townspeople want the snow carried away or left piled on the oval.

Referring to the financial report of this appropriation, it is quickly noted that there is a considerable over expenditure in this department. In general, explanations for such over expenditures are easily made, yet in this case most any explanation is open to argument. A sizeable portion of this appropriation (roughly \$1500.00) went into major repairs on the tractor snowplow. Aside from this major item on the tractor the remainder of the expense was incurred in routine winter maintenance operations which start early in November. At that time all work done by the highway crew is placed in the category of winter maintenance whether the work is snow removal or patching holes in the road. Highway equipment, maintenance and ash collections come under this classification, as well as salting and sanding the roads and sidewalks. Snow removal is of course a major item in this program, yet because of the numerous variable factors it is impossible to make any logical and sound cost comparisons of snow removal. A six-inch snowfall may be plowed for a certain price under one set of conditions, yet given the same amount of snow under another set of conditions the cost can be entirely different. Thus it is impossible to make cost comparisons of any storms. It is true that the average annual cost can be determined over a period of years, but even in that case the final results and services rendered are impossible to evaluate.

Opinions vary and there is ample opportunity for lengthy discussion and argument in a problem of this nature because nothing is tangible and nothing is constant.

It is my opinion that the present system of town owned plows and hired trucks is too expensive. The fact that the town has no town owned or operated plowing unit plays an important role in this over expenditure. Rented trucks require pay for their service and the taxpayers want service. Under the present setup roads and streets not only have to be broken open with rented trucks but they also have to be widened. Then if John Q. Public can't get through a particular road a rented truck has to be sent to open the road. Each one of these special trips whether it is to sand with the town truck or plow with a rented truck costs the town from five to fifteen dollars. It is admitted that this question is open to argument but I do believe that until the town can own complete snow plowing units, snow removal will be an expensive item.

Much comment has been expressed by local citizens about the number of snow plows travelling our roads with their plows in the air. It should be noted that the majority of the plows that go through town in that manner are state owned and have no responsibility toward the plowing of Milford's streets. As a point of general information, the division between town and state lines in the matter of maintenance and snow removal are as follows: Where Adams Street joins the Mont Vernon road, on Amherst Street at the Milford-Amherst line, on Nashua Street where the road turns off to the old Ponemah Hotel, and on South Street where Marshall Street rejoins South Street. The state roads outside of these markers are the state's responsibility and within these markers the town's responsibility.

It is still the opinion of this office that the winter maintenance was done as efficiently and effectively as possible with equipment available. The expenses incurred were all necessary and the only reduction that could have been made under the circumstances would have been the curtailment of winter maintenance operations. This would have resulted in much more unsatisfactory service and results.

PARKS AND PLAYGROUNDS

This department operated entirely on a maintenance basis throughout the year. The parks were kept mowed all summer and the bandstand on the oval was repaired and painted before the start of the band concerts.

During the winter this department kept the Shepard Park Skating Rink (sponsored by the East Milford Improvement Society) cleared of snow and maintained a skating rink at Endicott Park. The Endicott Park skating rink showed very definite possibilities and another winter should find us with a very good skating rink in that location.

Plans have been started for the development of a children's playground at Endicott Park and it is hoped that the coming year will see the fulfillment of these plans.

Serious thought will have to be given to our trees this year. In mid-summer the trees on the oval turned brown, earlier than usual, and the Bartlett Tree Expert Co. was asked to make an inspection. Their report was that this was a result of the elm tree beetle rather than the suspected Dutch Elm disease. They have informed us however, that the Dutch Elm disease did reach Quincy, Massachusetts, last year and unless control measures are taken it will spread further through New England. They recommend at least three sprayings this coming year. The spray will contain the new highly effective insecticide D.D.T. They also suggest feeding and pruning the trees on the oval. It is recommended that for this year sufficient money be appropriated to make three sprayings and to feed the trees. The pruning can be allowed to wait for another year.

The financial report of this appropriation follows:

PUBLIC WORKS

The public works appropriation was made for the purpose of carrying out the provisions of Article 24 of the 1945 town warrant which set up the Milford Public Works. This appropriation amply provided for the necessary expenses with a sizable balance remaining. The money was used for things that could

37

not be charged against any particular department because they were common to all departments.

The greater portion of this expenditure was used to establish the office which serves all departments. The purchase of new equipment has been kept at a minimum with only the essential materials being purchased.

During the month of August a bookkeeping system was set up by accountant Donald Henderson of Nashua. The establishment of these books provides an excellent financial record of each department under Public Works.

Late in the summer surveying equipment consisting of a transit, level rod, tape and smaller items were purchased for the town. These items appear on the expense sheet as a Public Works expenditure.

Serious consideration should be given to the possibility of making an annual appropriation for Public Works for the purpose of meeting the expenses that are common to all departments. These expenses include the salary of the superintendent and office help, office supplies and equipment. During the past year these expenses have been shared on a percentage basis by the Water Works, Summer and Winter Maintenance and the Sewer Maintnance appropriation with nothing being contributed by the other departments that are receiving the benefits of the consolidation. It is impossible to make a fair and just apportionment and the attempt to do so adds unnecessary work to the office bookkeeping.

Since these expenses have to be paid and because meeting each bill by allotting percentages to the various departments is uneconomical and unnecessary work, it is my recommendation that a direct appropriation be made for Public Works each year. An alternative solution is to set up a Public Works fund by setting aside a percentage of each appropriation at the beginning of the year.

The financial report of this appropriation follows:

SEWER DEPARTMENT

This was one of the town's most inactive departments. As a department it has been practically non-existent and records have to be started and maintained in order to create one.

Early in the year a new sewer cleaning device was purchased and this equipment has proved to be a very worthwhile investment for the town. Since this purchase was not planned when the appropriations were made it resulted in an overdraft of the sum appropriated for sewer maintenance.

Due to the lack of both materials and time the sewer construction program was not carried out but it is hoped that this coming year will see those planned projects completed. The work completed under this department was entirely maintenance which consisted of cleaning out clogged sewers.

Fifteen new house connections were made last year.

The coming year requires more maintenance work than was accomplished last year. Several catch basins and manhole covers that interfere with the snow plows must be lowered. The catch basins in front of Lee Kendall's on Elm Street has a broken pipe between the basin and the main and must be repaired.

A new catch basin must be installed in front of the Hiltz residence on Summer Street.

It is my recommendation that the sewer construction appropriation be permitted to carry over into the coming year and that no additional appropriation be made. Last year's appropriation will complete the planned project and it is very unlikely that available time, labor or materials will permit the completion of further projects.

The financial report of this appropriation follows:

TOWN HALL AND OTHER BUILDINGS

This phase of public works involved only the maintenance of the town hall and no other work was done during the past year. However, the town owns a group of buildings known as the town barns, and these will need considerable attention during the coming year. They will have to be made more spacious so that more of the town equipment can be kept under cover. This necessarily established policy of keeping some of the town equipment outside should not be tolerated because it only results in a financial loss to the taxpayers.

During the year the question of basketball in the town hall has come up several times and a decision should be made as to whether or not basketball is to be permitted in the town hall. This must be decided before any plans can be made to redecorate the hall.

Several improvements must be made in the town hall this coming year and it is recommended that as many as possible of the following be completed: rewire the town hall because of the fire hazard; install one electric meter for the town hall, resulting in a considerable saving on electricity rates; complete minor repairs on the roof which has two bad leaks; install a ladies' rest room on the first floor; put a new floor in the men's room in the basement and for this, a terra cotta floor is recommended because it will be possible to keep it clean, and a drinking fountain, preferably an electric water cooler, should be installed on the first floor.

42

The town barns have been neglected for several years and will require several repairs in the line of maintenance. These repairs can be spread over the coming years and the barns brought back to good condition. The recommendation is to make two major changes. One is to enlarge the present garage by removing the existing partition and laying a concrete floor over the opened space. The other is to improve the main barn by laying a concrete floor on the Maple street end, thereby approximately tripling our space for housing equipment.

It is also recommended that the Highway Department acquire, if possible, the building now used by the fire department to house two old hand pumps. The Highway Department could put this building to very good use.

WATER DEPARTMENT

The water department is one of the most important departments under the public works. This past year it operated totally on a maintenance basis excepting for the addition of twelve new house services and the removal of fifteen services.

More than any other department, records in this department are of prime importance and it is a herculean task to assemble them and keep them in the most efficient manner. It will be many months before they reach the stage desired.

Although the work of this department has been regular routine, much has been accomplished during the past year. Mr. Fred Cooley rendered valuable service to this department and made several improvements. During the early fall he constructed a much needed well cover over one of our shallow wells.

Eventually more building space will have to be made available in order to carry on the regular work of the department and to house the equipment and supplies. Sometime meter testing and meter repair equipment will have to be installed.

More recording devices are needed around the station and these should be centrally located on an instrument panel. For example, the only way to find the amount of water present in the standpipe is to climb the standpipe and use a weighted string. This information should be instantly available on an instrument panel in the station.

Early in the spring one of the standpipes was painted and later in the summer the filter sand replaced. These were major items of expense and played their part in making our expenses as high as they are.

Contrary to popular belief among the townspeople Milford does not have a water supply whose quality is rated either high or low by any standards, because such ratings have never been made or issued. In fact the results of water samples tested by the State Board of Health over a long period of years indicate that Milford's water needs chlorination, and the State Board of Health Department has called our attention to this fact several times. There are always people who object to chlorination, claiming that they can taste the chlorine, yet during one week of October, while one filter sand was being replaced, Milford's water was given emergency chlorination in order to safeguard the health of the community. The townspeople were totally unaware of this fact and only two of Milford's water takers inquired about the possibility of chlorine in the water. Late in the fall a guest register was started at the Station. It is interesting to note that of a total of ten guests, only five were local townspeople who had come there on business other than to visit the station. Local citizens are urged to visit the station and become familiar with how Milford gets its water. Let's all make it a point to visit the station.

The distribution system has been in the ground for a little over fifty years and the time has come when a considerable amount of work needs to be done. In one small section of town eight out of ten main line valves were found to be ineffective. This means a valve repair and replacement program will have to be inaugurated in the spring. In general it can be said that the distribution system is old and much time and money will be required to restore it to a high state of efficiency.

With the increased cost of materials and labor and the work that must be done our expenses have gone skyward and it would be safe to say that we are selling water below cost. It was planned to have a cost study available for this report but this has not been completed. It is hoped, however, that the results of the analysis will reach you in the form of a special report sometime in the near future.

Many thanks are due to Mr. Fred Cooley for the work, time and effort that he put into the water department both prior and after the arrival of the superintendent of public works. He carried on until the departments were satisfactorily consolidated and with his knowledge of the water department he rendered valuable service.

During the month of September, Miss Katherine O'Connell tendered her resignation after having served twelve years in the water department office. By her resignation the water department lost a good worker and the town a faithful servant.

Since the original writing of this report the question of a water line extension on Elm Street has been brought to the attention of this office. We suggested that since the Mason Road extension has been under consideration for several years that the two projects be considered together. The committee sponsoring the Elm Street project requested a cost estimate of the proposed extension. The consulting engineering firm, Whitman and Howard of Boston, Mass., was contacted and their complete report follows.

The decision for either or both of these proposed extensions rests with the voters in March and this office will cooperate to the fullest extent in carrying out whatever decisions are made. Dear Sir:

Pursuant to your request, we have made a study of the hydraulics of certain sections of the Town's water system where it is contemplated to extend the present mains and herewith submit our findings together with estimates of cost for making the proposed extensions.

Flow tests were made on Elm Street in the vicinity of West Street and it was found that a flow of 880 gallons per minute dropped the pressure from 85 pounds to 28 pounds. A flow test was also made at the end of the present 6-inch main near Richardson's Crossing where a flow of approximately 150 gallons per minute dropped the pressure from 92 pounds to 0 pounds. These tests also determined that the friction due to tuberculation in the existing mains has increased to such an extent that their carrying capacity is at present approximately one half the original capacity.

The Elm Street tests also showed the necessity of beginning any extensions at West Street and it was found that by using 8-inch cement lined cast iron pipe a flow of 500 gallons per minute can be obtained at the Williams and Hussey Machine Shop with the required residual pressure of 20 pounds per square inch. In this design we have kept in mind the idea of extending this main to Pine Valley which might be done in the future.

The Mason Road Extension to South Milford was studied in the same manner. Tests made in the vicinity of George, Union and Dean Streets gave a flow of 840 gallons per minute and dropped the pressure from 87 pounds to 25 pounds per square inch. As a result of these tests it was found that a 6-inch cement lined water main about one mile long beginning at the corner of George and Union Streets would give a flow in South Milford of approximately 500 gallons per minute with a residual pressure of 20 pounds per square inch. Allowance has not been made for future extension to the south and west from South Milford. If this is contemplated a larger pipe must be used.

The carrying capacity of the present main in Union Street from George to Mason Road has greatly decreased due to tuberculation, thus necessitating the parallel new main.

You will see by the attached estimates of cost that the Elm Street Extension is estimated to cost approximately \$51,400 and the Mason Road Extension \$16,600.

Please keep us informed of any new developments and we will be glad to be of service to you.

Yours truly,

WHITMAN & HOWARD, Engineers.

RECOMMENDATIONS

The recommendations made throughout the report are factors that should be taken into consideration this coming year. The majority of these require immediate attention and it is the feeling of this office that as many of them as time and money will allow should be completed during the coming year.

Building Inspection

It is recommended that the work of the committee appointed to develop a more suitable and fitting building code be carried to completion.

Cemeteries

It is recommended that additional sections of Riverside Cemetery be developed and more lots staked out for sale. Provision should be made for offering two and four grave lots in addition to the one and eight grave lots that are now being sold. Should a careful study of the sale of lots, foundations, opening of graves, grading, perpetual care and annual care prove these to be sold at a loss, the prices should be raised so that they at least meet their own expenses.

HIGHWAY DEPARTMENT

Ash Collection: It is recommended that this office be permitted to determine the charge for ash collections on the basis of the previous year's cost and that it be established so that it at least pays its own way. Based on the 1946-1947 costs the recommended charge for the coming year would be \$4.50 per ash barrel or its equivalent.

Oiling: It is recommended that the oiling of new roads be kept at a minimum and that the oil be used to salvage roads that have already been oiled. Ponemah Hill road and the road by Kittredge's Quarry to South Milford are exceptions to this because we understand the oiling of these roads has been promised for some time.

Sidewalks: It is recommended that the Lincoln Street and Dane Street projects that were planned for last year be completed. The small portion of Amherst Street sidewalk that was worked on last year should be completed. The sidewalks need patching and planned repair and extensions should be started.

Street Cleaning: It is recommended that wire baskets be placed in strategic locations about the business section of town and that the practice of hiring a regular street cleaner be continued.

Summer Maintenance: It is recommended that a small tractor

equipped with a cutting bar for mowing and cutting brush, and equipped with a snow plow attachment be purchased for this department. Routine summer maintenance work must be continued. A great deal of work is needed along this line and in general it will include the following: equipment maintenance, highway signs such as route signs, warning signs, etc., which are desperately needed, patching of the roads and streets, development of streets accepted during the year, grading of our gravelled roads, mantenance of the highway drainage system, and cutting and burning of the roadside brush. Many of the town's roads and streets, especially the upper end of Spaulding Street, are in need of repairs because of the lack of proper maintenance and attention is needed this coming year. A program for the correction of highway and street drainage must be started at once. Clinton Street must sometime be resurfaced at a higher grade and Lincoln Street has a drainage problem as well as numerous other places about town.

SPECIAL HIGHWAY PROJECTS:

1. A decision of some kind must be made on South Street this year. The size of the project necessary to repair the street (estimated by the State Highway Department to cost in the vicinity of \$32,000) is beyound the time and equipment available to the town department and should be let out to a contractor either on a bid or cost-plus basis.

2. The State Highway Department has prepared plans for a proposed improvement on the Mont Vernon Road, eliminating the curve by the V.F.W. Home. A decision may have to be made on this project this coming year. The stretch of road from the Stone Bridge by the post office to the begining of the project at Granite Street should be resurfaced and tied in with the project. However, should the voters decide to lay the Mont Vernon Street project aside for a future development, then the Mont Vernon road from the bridge to Grove Street should be tied in with the South Street project.

TREE WORK

It is recommended that this appropriation be discontinued

and that the routine work of this appropriation be accomplished as normal summer maintenance work. However, if tree work should sometime reach a point of requiring a great deal of work then an appropriation could be made for the special project.

WINTER MAINTENANCE

It is recommended that a Walter Sno-Fighter (approximate cost \$15,500) be purchased for snow removal and that whatever snow plows are found to be surplus should be turned in for credit toward this unit.

Since the turn in or resale value of the tractor is low it is my recommendation that it be kept as snow plow insurance and whatever use we can put it to rather than trading it in. Especially now that it is being completely overhauled.

At least two new or good second hand horse drawn sidewalk plows should be purchased for the coming year.

SEWER DEPARTMENT

Sewer Construction: It is recommended that the sewer construction appropriation that was made for the Mont Vernon Street sewer last year be earmarked to carry over into the coming year and that no further appropriation be made because it is very unlikely that the available time, labor and materials will permit the completion of further projects.

Sewer Maintenance: It is recommended that more work be done than was done this past year. Several catch basins and manhole covers that interfere with the snow plows must be lowered.

The catch basins in front of Lee Kendall's on Elm Street has a broken pipe between the basin and the sewer and must be repaired. A new catch basin should be installed in front of the Hiltz residence on Summer Street.

PARKS AND PLAYGROUNDS

It is recommended that the routine maintenance be continued. Plans for the development of a children's playground at Endicott Park should be fulfilled and will involve only minor expense on the part of the town. It is also recommended that the elm trees be given three sprayings this coming year as a preventative against the spreading Dutch Elm Disease. The trees on the Oval should be fed and this will cost approximately \$200. These same trees need pruning but this can be let go for another year.

TOWN HALL AND OTHER BUILDINGS

The following recommendations are made for the town hall and other town buildings for the coming year. As many as possible of these recommendations should be completed.

A decision should be reached on whether or not the town hall is to be used for basketball.

In reference to the town hall, the building should be completely rewired, one electric meter should be installed, the roof should be repaired, a ladies' rest room should be installed on the first floor, a new floor should be put in the men's toilet, and an electric water cooler should be purchased for the first floor.

The required maintenance should be completed at the town barns. The present garage should be enlarged by removal of the partition and addition of a concrete floor and the main barn should be improved by the addition of a concrete floor on the lower end.

If possible it is also my recommendation to have the highway department acquire the building in the town barn group now used by the Fire department.

PUBLIC WORKS

For the ease and efficiency of record and bookkeeping it is recommended that a Public Works appropriation be established to meet the expense common to all departments. This can be accomplished by reducing each individual appropriation enough to grant this appropriation.

WATER DEPARTMENT

The expenses of the Water department are higher than in previous years. Tools, equipment and supplies are at a minimum and must be stocked. A valve repair, replacement and maintenance program must be started in the early spring. Unless the revenue is increased the department will continue to operate at a loss as it has done nearly every year since the loss of the hydrant rentals. Eventually serious thought should be given to the establishment of a sinking fund for this department.

The recommendation for this department is that an arbitrary increase be made in the water rates until such time that a study of costs can be completed to give us a basis for establishing a definite legitimate rate.

Depending upon the findings of the study in progress, the final established rate may be higher or lower than the one tentatively established.

GENERAL RECOMMENDATIONS

It is most imperative that the town give serious consideration to compensation insurance for the empoyees. Under the present setup, the town could be sued by an employee injured on the job. It is my recommendation that either a direct appropriation be made for the purchase of such insurance or that each individual appropriation be increased enough to permit the financing of this insurance. Compensation insurance is mandatory for private employers, and town employees should receive the same benefits.

Since the original writing of the body of this report, the point has been brought out that in previous years highway winter maintenance referred to snow removal. This past year winter maintenance money was used to finance all highway operations that occurred from early November. For the reason that this term winter maintenance can be so easily misunderstood, it is recommended that either one appropriation be made, called highway maintenance for the entire year, or that two appropriations be made, one called Highway Maintenance and the other Snow Removal. The recommended breakdown would eliminate the vague terms winter maintenance and summer maintenance. Undoubtedly this misinterpretation of winter maintenance by this office has had some bearing on the over-expenditure of the winter maintenance appropriation which in previous years was used only for snow removal operations.

CONCLUSIONS

Milford's Public Works has now been in operation since June 1, 1946. The creation of this system being a radical change from the normal New England form of town government, there is no doubt that the neighboring towns are looking upon it for results. The citizens of Milford undoubtedly are also quite interested in the results achieved.

The progress has been slow, much slower than I personally had anticipated when I agreed to return to Milford as Superintendent of Public Works. Nevertheless there has been progress, progress that is continual and beneficial to the individual taxpayer. The principles of the setup are sound and each year should find it more satisfying to the townspeople.

One of the major improvements has been the centralization of the records of the various departments. Heretofore records have been more or less helter-skelter and for this reason it is impossible to make any fair comparisons of the old setup and the new. Records of accomplishments of previous years are for all practical purposes non-existent, and the few that are in existence are gradually being made readily available. Expenditures for previous years as they appear in the town reports or on budget sheets are meaningless unless they can be tied in with accomplishments and services rendered.

In addition to the consolidation of records, the creation of this office has given the citizens of Milford a place to make their complaints and suggestions and to get action. A complaint and suggestion book was started early in the year with the intention of keeping a complete record of the complaints handled. It must be admitted that the numerous activities have brushed aside the records of these complaints, but not the complaints nor the actions. Very few complaints have gone unattended. All complaints and suggestions have been faithfully investigated and whenever possible the situation corrected with the least possible delay. This feature alone must certainly be of some added value and gratifying to the individual taxpayer. The objective of this office is to serve the people of Milford and we do appreciate constructive criticisms and suggestions that lead to the rendition of better service. Unless people call our attention to bad roads, drainage and other conditions, some of these are likely to exist without this office becoming aware of them.

The setup has made possible the interchange of employees from one department to another, leading to the achievement of better results and a higher state of efficiency on our town projects.

Contrary to popular belief the salary of the Superintendent is not costing the town more than the salaries under the old system. The present salary is \$3500 per year as compared to the \$4380 of the old setup, made up as follows:

Water Works Superintendent	\$2340.00
Sewer Superintendent	200.00
Road Agent	1820.00
Building Inspection	20.00
<u> </u>	,

Total

\$4380.00

For this sum of \$3500 is added the responsibility of the cemeteries, parks and playgrounds, town hall and other buildings, and the Lull Memorial Trust Fund, which were previously handled by either the selectmen or commissions. Thus from the point of view of salary the town is getting more service for less money.

The problems of the new setup are many and the hours of the Superintendent long and tedious, but the accomplishments are well worth it. Most of the accomplishments are not visual, physical or readily apparent and the benefits will not spring up overnight, but they will appear slowly and without fanfare.

Before closing, it is well to mention that during the war years many things were neglected because we had a war to win and men and materials were used in the war effort rather than private projects.

Now that the war is over and we are at peace, materials are slowly coming back and Milford finds itself with an abnormal amount of work to be done. It would not be sound economy to try to correct everything in one year. For this reason this office is recommending the minimum of new equipment for the coming year. My suggestion is to move slowly and to choose the projects wisely, keeping in mind that the tax rate is affected directly as the money is appropriated. Milford's Public Works is endeavoring to render the best service possible in the direction of the best interest of the taxpayers and the town, and it looks to the expressions and decisions of town meeting for its guidance.

HELP YOUR FOREST FIRE WARDEN PREVENT FIRES – IT PAYS !

Prevention is one of the most important phases of all fire effort. This is particularly true of forest fire control work. Preventing forest fires preserves valuable forest growth and other property, conserves man power and permits their use in productive channels, saves taxpayers' money and conserves fire fighting equipment.

- 1. Use ordinary common sense with fire in and near woodland.
- 2. Comply with requirements on the use of fire in and near woodland and when the ground is not covered with snow, secure written permission to burn from the forest fire warden.
- 3. Be careful when smoking in or near woodlands. Don't throw lighted material from moving vehicles.
- 4. Cooperate with and assist the warden and urge others to do so.
- 5. HELP YOUR FOREST FIRE WARDEN PRE-VENT FIRES—his efforts are only as effective as is the cooperation you give him!

Your forest fire warden is Chief J. J. Casey.

CHARLES F. YOUNG,

District Fire Chief

N. H. Forestry and Recreation Dept.
