DURHAM, NH – A majority of New Hampshire residents continue to approve of the job Chris Sununu is doing as governor and he continues to be broadly popular in the state. Half of Granite Staters approve of the job being done by the State Legislature and nearly three in four feel the state is headed in the right direction. A majority of New Hampshire residents continue to see drug abuse as the most important problem facing the state.

These findings are based on the latest **Granite State Poll***, conducted by the University of New Hampshire Survey Center. Five hundred and seventy-three (573) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between October 3 and October 15, 2017. The margin of sampling error for the survey is +/- 4.1 percent.

Gubernatorial Approval

Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. Five hundred and seventy-three (573) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between October 3 and October 15, 2017. The margin of sampling error for the survey is +/- 4.1 percent. These MSE's have not been adjusted for design effect. The design effect for the survey is 1.2%.

The random sample used in the Granite State Poll was purchased from Marketing Systems Group (MSG), Horsham, PA. MSG screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.
