REPORT OF THE FOREST FIRE WARDEN
AND YOUR DISTRICT CHIEF

The 1964 forest fire season surpassed the record year of 1963 in both length and severity. For the second successive year, we experienced a rainfall deficiency of more than ten inches and the compounding of such drought conditions, together with the many days of strong, dry winds, characterized 1964 as one of the most hazardous years in the past half century. Although our fire season was three weeks longer than that of 1963, the number of fires showed only a slight increase and more remarkable was the fact that the area burned dropped from 2280 acres in 1963 to 900 acres in 1964. Early detection and rapid response kept many potential fire disasters from becoming reality. We all owe a debt of gratitude to the men in this community who responded and fought our fires so efficiently. Our state is now 86% wooded and its economy—
both industrial and recreational—is greatly dependent on this forest resource. The responsibility for adequate fire protection of this great area—4,350,000 acres—is everyone's responsibility and prevention is one of our most effective tools.

Prevention is good common sense.

1. Take your rubbish to the town dump. If you must burn, obtain a permit and watch your fire until it is dead out.

2. Instruct your children in fire safety. Keep matches from young children. Explain to them the dangers of lighting matches and making outdoor fires.

3. Be sure discarded smoking material and matches are out.

A major portion of our preventable fires this year are chargeable to three causes: (1) permit fires allowed to escape; (2) children playing with matches; and (3) smokers. Let's be mindful of the fact that all such fires endanger property and lives.

We wish to thank you for your very fine cooperation during the past fire season and with your continued cooperation we are confident that we can improve our fire record in 1965.

REPORT OF THE
SUPERINTENDENT OF SCHOOLS

The reorganized and enlarged Supervisory School Union No. 9 officially came into being on July 1, 1964. The primary purpose for making the school union larger was to provide better education for more children.

An evaluation of the fulfillment of this major aim with any degree of objectivity would be impossible at this time. We can, however, point out that the elementary school program in Freedom has been carefully planned and is being adequately supervised by the new Assistant Superintendent of Schools.

For Freedom, or for any school district, involvement in a larger administrative unit does not necessarily guarantee better education for its children. This can only come about by securing and retaining certified, well-trained and capable teachers; those that will accept the challenge of teaching multiple grades with the knowledge that good results are somewhat harder to achieve.

Sending Freedom's seventh and eighth grade children to the Conway Jr. High School is a milestone in their education process. Not only did it improve their education, but it helped, through the remaining smaller enrollment and realignment of classes, to improve the education of the children in the Freedom Elementary School.

Your Freedom School Board is a dedicated, sincere, and hard working committee, and it has been my pleasure to have worked with them these few months.

We are pleased that Freedom is in Supervisory
School Union No. 9. We will attempt to provide your school system with such leadership and services that will lead to better education for the children and youth of Freedom.

Respectfully submitted,

DAVID APPLETON
Superintendent of Schools
SCHOOL HEALTH SERVICE REPORT

Medical appraisals at the hospital were introduced into the school health program this year. This educational experience, shared with classmates and friends, was an adventure in a new area for most pupils taking part from this school district. Donning hospital gowns and slippers with the group became a venture that could well be a help at some future date. The whole program helps to dispel fears of medical and dental examinations and treatments.

The teeth and mouth inspection by a dentist as well as the blood test were features that have not been available heretofore in our program.

A report of each examination was sent to the parent by mail. As has been the policy in the past, except in critical emergencies, the school communicates with a child's physician only through his parents. The physician makes his recommendation to the parents, who are primarily responsible for the child's health.

Although dental defects are still more common than we would like to find, it is good to know that more children are starting early in life having periodic comprehensive examinations and corrective services by a dentist. We know that it is through such a program that optimal dental health is attained and maintained.

The cooperative teamwork of all concerned — school people, local medical and dental societies, official and voluntary agencies - have played an important role in the health and safety program.

Respectfully submitted,
REBECCA P. SANBORN
