## REPORT OF SUPERINTENDENT OF SCHOOLS

---

To the School Board and Citizens of Surry:

I submit my first annual report as Superintendent of Schools. I will first make brief mention of the educational program in the state and the new school law which went into effect September 1, 1919, and then call attention to some of the most important needs and problems that require your immediate action.

In his address at the School Board Conference in Concord last October, Governor Bartlett said, among other things: "To equalize school opportunities, and then to raise that equalized level, has been the thought uppermost in my mind in recommending and stimulating a revision of the school laws. . . . The sunlight of education must shadow no dark spots. It must shine with equal cheer and clearness in the poor kitchens under the far-off hills as in the rich and affluent centers."

The purpose of the new law is to make such equalization effective. By this law an organization is provided which is to administer the school affairs of the state on ordinary business principles. State-wide supervision is made compulsory, and provision is made for standardizing all the schools of the state. A standard school is defined as "one (1) maintained for at least thirty-six weeks in each year, (2) in a suitable and sanitary building, (3) equipped with approved furniture, books, maps and other necessary appliances, (4) taught by an approved teacher, (5) directed and supervised by an approved superintendent, (6) with suitable provision for the health and

physical welfare of all pupils." The law also provides for state aid to towns in which a tax of \$5 on \$1,000 of valuation does not yield sufficient money for maintaining such standard schools.

Such powers are given the State Board and its officers as are necessary to secure a degree of uniformity in procedure and in standards that will insure equality of opportunity to all the children in the state, and the duties of the superintendents in directing and supervising the work of the schools are defined; but the management of all school business in the districts is vested in the local school boards, with power to select the superintendent, teachers, and other employees of the district, and to determine their salaries.

Among the requirements for a standard school, noted above, the fourth is now the most difficult to meet throughout the state, because of the shortage of teachers. Reliable information shows us that some twenty-two per cent of the teachers of the country have quit teaching in the past year. While there are many causes for this condition, it is generally agreed that the chief reason is inadequate pay, and any measures that may be taken to recruit teachers, especially for the rural districts, will fail unless considerably increased wages are paid. I do not mean to imply that we should appropriate more money for teachers' salaries and then pay it to incompetent or poorly trained teachers, but we must be ready to pay the price when good teachers can be secured. If the district at its March meeting will vote an amount of money sufficient to cover a substantial increase in teachers' salaries, the school board will then be in a position to retain good teachers longer and to take advantage of the first opportunity to secure well trained and competent teachers when changes have to be made.

Next to the need for increased salaries for good teachers, the most important problem is that of making the school buildings "suitable and sanitary." In preparing the budget to be

submitted to the March school meeting we shall need to make a careful estimate of the cost of such alterations as may be needed to make the schoolhouses conform to the requirements prescribed by the State Board of Education, in addition to the alterations already made. These alterations cannot be stated in full detail until the Board issues its revised and final regulations, but we know that among the requirements will be the following:

1. Provision for windows on the pupils' left hand, or left and rear only, and in area equal to at least one-fifth of the floor area of the school room; walls and ceilings painted or tinted a light color; and light colored curtains.
2. A jacketed heater with some provisions for drawing fresh air from outside, and means of securing good ventilation without direct drafts on the pupils.
3. Floors put in good condition and oiled or treated in some other manner to keep down the dust.
4. New or remodeled outhouses, opening from the school-room, or at least from within the school building, and not opening from the outside, with properly ventilated, fly-proof vaults and covered seats.
5. Good furniture and equipment.
6. Better facilities for washing, with soap and sanitary towels.

The alterations you have made at the North End school, when completed in the spring, will cover the first, third, and fourth of these requirements, and the plans you have adopted for the Village school, when carried out, will cover the same requirements there. The second is not provided for in any of the buildings; the fifth is not met at the North End and only in part at the Village and West Hill, while the sixth is only partly provided for at any of the buildings. The West Hill school does not meet any of these requirements.

In conclusion, let me say that while we have very little control over the supply of good teachers and may have to wait a year or more for the supply to become normal again, there should be no delay in providing the means for meeting the reasonable demands for the safety and comfort and health of our children in school. The state has embarked on a program of educational development that is bound to have far-reaching results in the training and educating of the boys and girls who are to be the citizens of the future, and we must all stand behind the movement loyally and earnestly.

I have been greatly helped by the earnest co-operation of your School Board and their interest in carrying on the work of the schools has made the performance of my duties a pleasure.

Respectfully,

VERNON S. AMES,

Superintendent of Schools.

Marlboro, N. H., Jan. 31, 1920.
