TOWN WARRANT

THE STATE OF NEW HAMPSHIRE

To the inhabitants of the Town of Bartlett in the County of Carroll in said State, qualified to vote in Town Affairs:

You are hereby notified to meet at Town Hall in said Bartlett on Tuesday, the fourteenth day of March, next at ten of the clock in the forenoon to act upon the following subjects:

1. To choose all necessary Town Officers for the year ensuing.
2. To raise such sums of money as may be necessary to defray town charges for the ensuing year and make appropriations of the same.
3. To see if the voters will authorize the Selectmen and Town Treasurer to borrow a sum or sums not exceeding in the aggregate \$50,000.00 in anticipation of the collection of taxes for the current municipal year, and to issue in the name of the town and on the credit of same, negotiable notes therefor, said notes to be repaid during the current year from taxes collected within current municipal year.
4. To see if the town will vote to authorize the Selectmen to distribute the blank inventories at the same time they examine and appraise the property to be taxed.
5. To see if the town will vote to authorize the Selectmen to administer or dispose of any real estate acquired by the town through Tax Collector's deeds or by any other means.
6. To see if the voters will authorize the Selectmen to sell the Intervale School building for industrial use.
7. To see if the town will vote to raise and appropriate a sufficient sum of money to tar the Mt. Surprise Road from the Four Corners in Kearsarge to John Kolln's house, agreeable to a petition by Lillian E. Johnson and others.
8. To see if the town will vote to raise and appropriate the sum of \$250.00 to be turned over to the White Mountain Airport Project to assist in the construction of a hard-surfaced runway at the White Mountain Airport. The project is being financed in part by local business men and interested persons and the total cost of the 3000-foot, black top runway will be approximately \$7,000.00. Engineering aid, runway markers and painting will be provided by the New Hampshire Aeronautics Commission. Agreeable to a petition by Burton H. Patch and others.
9. To see if the Town will vote to raise and appropriate a sum of money for the purchase of a loader.
10. To transact any other business that may legally come before this meeting.

Given under our hands and seal, this 22nd day of February, in the year of our Lord nineteen hundred and sixty-one.

EARLE W. CHANDLER
GEORGE L. HOWARD, JR.

FRED L. GARLAND, Treasurer

LIBRARIAN'S REPORT FOR 1960

1960 was again a very busy year for our library. Our book circulation count was 5002, a 65% increase over last year's count of 3,024. Our per capita circulation is now 4.8 as compared to 2.8 in 1959. The bookmobile came six times and left a total of 750 books. 153 new books were put into circulation. Many were gifts. Many magazines were also given to the library.

Physical improvements in our library are a new magazine display table and a sign beside the road. A new card catalogue file and other cataloging materials were purchased.

We participated in the National Library Week program sponsored by the State Library and were proud to be awarded honorable mention. We had four film programs in 1960 and are planning to continue them during 1961. Fund raising projects netted us \$60.10. This is listed under receipts for 1961 as the full amount was not turned in until after deadline. At the last Trustees meeting, it was decided that starting in March we will be open Friday afternoons 2:30-4:30 in addition to the hours we are now open.

Our budget presented for 1961 is a little higher than 1960 for several reasons.

1. The increase in the circulation has shown a greater need for more books, which incidentally continue to rise in cost.

2. Increase in librarian's salary is due to increase in the hours open. Additional hours were necessary because the increase in circulation left no time to shelve books properly, mend books and send out overdue cards.

3. Supplies — plans have been made to catalogue the books in February. An additional card cabinet and 4,000 catalogue cards are needed for this.

4. Physical improvements — We plan to purchase a library cart and then maybe it will be possible to see the top of the librarian's desk. At the present time, it is almost always covered by books, leaving very little place to work.

Our thanks goes to Mr. Horne for making our new library sign, to Mr. Flint for making the magazine display table and also to the many who helped our library by donating books and magazines, participating in National Library Week and assisting in the fund-raising programs.

Our library hours are as follows:

Monday evenings: 7:30-8:30
 Wednesday afternoons: 2:30-4:40
 Friday afternoon: 2:30-4:30

JEAN GARLAND, Librarian

MRS. FLORA CHANDLER

REPORT OF THE EASTERN SLOPE AIRPORT

The following steps toward building the new airport have been taken by the selectmen of Fryeburg and the Eastern Slope Airport Authority. To begin with:

An engineering contract was made with the James W. Sewall Co. of Old Town, Maine. This was done only after careful consideration of proposals from more than a dozen engineering firms, and after consultations with the Federal Aviation Agency and the Maine and New Hampshire Aeronautics Commissions. The Sewall Co. received the highest praises of all three governmental agencies concerned.

Aerial and ground surveys, including soil borings, have been made. Plans and specifications for an airport, capable of expanding the runway to 5,000 feet (or even more) when needed, have been drawn up.

All land necessary for this project, some 500 acres in all, has been purchased at a cost of \$10,169.50. This is all the land needed for future expansion. The job for constructing the airport has now been advertised for public bids, to be opened on February 23, 1961. The results of those bids will be made available to each interested town before town meeting day.

The Authority is currently negotiating with the Aeronautical Icing Research Laboratories a lease of property on the airport, which, if leased, would house a business employing some 35 to 55 persons. The Laboratories will be leaving the government facilities which they now occupy, in the summer of 1961, and this lease may be our best chance of keeping them within the Eastern Slope area.

Respectfully submitted,
Eastern Slope Airport Authority
Arthur Wilms

REPORT OF FOREST FIRE WARDEN

PREVENTION IS YOUR BUSINESS

Carelessness, HUMAN CARELESSNESS, causes 9 out of 10 forest fires. Each year 200,000 fires burn over 30 million acres in the United States. This represents 5 percent of our nation's woodlands being wasted each year. Every fire takes its toll. Floods follow; stream flow is affected; timber, buildings, grazing and wildlife are destroyed — all because MANY are CARELESS with fire in and near woodland. This can be remedied. YOU can put an end to this shameful waste. PREVENTION is YOUR business!

YOU, whether YOU be a farmer, homemaker, business or professional man or woman, municipal, state or federal official, clerk or woodsman can play an important part in the continuing and vital prevention program.

First — by setting a good example YOURSELF — being sensible and complying with the necessary laws and regulations governing the use of fire in and near woodlands.

Second — by using YOUR individual influence in your community and valued counsel with others in insisting and encouraging them to do likewise.

The following rules may be used as a guide for both YOU and for them.

1. Before burning, secure a permit from your local forest fire warden — the law requires it.
2. Be sure to properly supervise your burning — don't leave it.
3. Make certain your fire, camp or debris, is DEAD OUT before leaving it.
4. Don't throw down lighted matches, cigars and cigarettes or from moving vehicles — make sure they are out — use your ash tray.
5. Don't burn at home — use your town dump and save yourself much possible difficulty, both personal and financial.

Number of local fires, 1, number of acres burned, $\frac{1}{8}$; number of permits issued, 42.

HUBERT C. HARTWELL, JR.
District Chief

ELWOOD M. DINSMORE
Forest Fire Warden

THE STATE OF NEW HAMPSHIRE

To the inhabitants of the School District in the town of Bartlett qualified to vote in district affairs:

You are hereby notified to meet at the Town Hall in Glen in said District on the 14th day of March, 1961, at eight o'clock in the evening to act upon the following subjects:

1. To choose a Moderator for the coming year.
2. To choose a Clerk for the ensuing year.
3. To choose a Member of the School Board for the ensuing three years.
4. To choose a Treasurer for the ensuing year.
5. To choose an Auditor for the ensuing year.
6. To hear the reports of Agents, Auditors, Committees, or Officers chosen, and pass any vote relating thereto.
7. To see what sum of money the district will raise and appropriate for the support of schools, for the salaries of school district officials and agents, and for the payment of statutory obligations of the district, and to authorize the application against said appropriations of such sums as are estimated to be received from the state foundation aid fund together with other income, the school board to certify to the selectmen the balance between the estimated revenue and the appropriation, which balance is to be raised by taxes by the town.
8. To transact any other business that may legally come before this meeting.

Given under our hands at said Bartlett this 23rd day of February, 1961.

Report of School Nurse

Bartlett is most fortunate in having a School Health Program which, each year, helps to recognize defects of pupils that otherwise might not be discovered.

This Program could not be carried on as it is without the splendid co-operation of doctors, dentists, hospital staff, teachers, parents, superintendent of schools, school board and many volunteer workers.

In the fall forty-seven pupils from grades 1, 4, and 7 went to the hospital for their examination. This examination includes the following:

Height	Lungs	Tonsils
Weight	Posture	Nose
Nutrition	Muscle tone	Physical
Skin	Orthopedic defects	Glands
Heart	Eyes and lids	Hernia
Pulse	Ears	Abdomen
Hemoglobin of	Speech	Nervous system
blood	Teeth	Urine test for sugar and
	Gums	albumin

Every year we are more keenly aware of the fact that good education is not complete without good health.

I feel that we are making progress in our Health Program and I wish to thank the many people without whose help we would be unable to accomplish our goals.

Respectfully submitted,

JULIA T. COX, R.N.

School Nurse

1. SCOPE OF THIS STUDY

This study was undertaken at the request of the Conway School Board, under a warrant article passed at the 1959 Conway School Meeting. Its purpose was to explore the possibility of entering into a co-operative agreement between the interested towns, to provide for the rapidly increasing enrollment at Kennett High School. The following school districts participated in the study:

School Union No. 36	School Union No. 9
Effingham	Albany
Freedom	Bartlett
Madison	Conway
Ossipee	Eaton
Tamworth	Jackson

2. OUTLINE OF CONCLUSIONS REACHED

- (a) The best solution to the problem of our increasing school population is a co-operative school for grades 7 through 12.
- (b) This co-operative would
 - make possible a unit large enough for efficient operation
 - assure adequate space for some years to come,
 - make possible a stronger curriculum, and
 - permit the towns to participate in school administration.
- (c) The cost, when compared to present costs for facilities and tuition, would be reasonable.

3. THE PROBLEM

Kennett High School will soon be overcrowded. Even now, some departments (laboratories, shops, home economics) have to limit admissions because of lack of space and facilities. Our educators tell us that when the enrollment at Kennett passes 550, makeshift classes will have to be set up. The estimated enrollment shows that the critical point will be passed in September of 1961 and will require drastic measures by September of 1962.

Year beginning September	Estimated Enrollment Grades 9 - 12
1961	576
1962	626
1963	667
1964	685
1965	669

These figures are based on students now actually attending elementary grades, and allows for a normal drop-out rate in high school.

4. POSSIBLE SOLUTIONS

- (a) **Enlarge Kennett High School.**
After consulting an architect, the Committee decided that this would be very expensive in relation to the additional space provided, would require further expansion of the heating and other service facilities, and would mar the pleasing appearance of the building.
- (b) **Limit the acceptance of tuition students.**
Aside from the consideration that this would not be a neighborly thing to do except as a last resort, Conway would have to refuse about 125 tuition students within the next five years, probably on an individual town basis. Eventually, and perhaps within a very few years, the tuition towns would form their own co-operative, and Conway would end up with no tuition students and a school one-third too large for its own pupils. The resultant disruption in class set-up would inevitably increase the cost per student, and probably force a cut-back in the curriculum. The Committee gave only passing consideration to this alternative, and did not vote on it.
- (c) **Set up a partial co-operative, for grades 10-11-12 only.**
There was some sentiment for this plan, particularly on the assumption that it might be easier to sell to the voters. However, it was generally recognized that this would create as many problems as it solved, and would eventually lead to a full 7-12 co-operative.
- (d) **A full co-operative, grades 7-8-9 in the present Kennett High and grades 10-11-12 in a new building.** A substantial majority of the Committee voted for this plan.

5. THE FULL CO-OPERATIVE

(a) Curriculum

The improvement in curriculum would not be achieved by the addition of a variety of new subjects. At most, the Committee recommends the addition of one foreign language, Spanish or German, if the demand justifies it. Rather, the aim is to come closer to the ideal of a "comprehensive" school, which strives to provide

- (1) to the student who intends to go to college, an opportunity for more extensive preparation in the sciences, mathematics, and languages.
- (2) to the student who will not go to college, an opportunity for more extensive preparation in the industrial and commercial arts, and home economics.

- (3) to all students, the good general education which is the foundation for solid citizenship in a democracy.

To achieve this, courses in manual arts, fine arts, and home economics would be brought down into the Junior High curriculum, leaving time and space for more advanced scheduling in Senior High. After graduation, the student's superior training would greatly facilitate admission to college or integration into industry.

b.) **Facilities**

Senior High

The estimated potential enrollment for grades 10-11-12 during the next six years is as follows:

Year beginning September	Estimated Potential Enrollment
1961	423
1962	447
1963	513
1964	547
1965	535
1966	500

The proposed new Senior High school would consist of 24 classrooms, gymnasium and cafeteria, and would include modern laboratories, shops, and home economics equipment. It would take care of 600 students. The school could be located just across the railroad tracks from Kennett High. The site, which is ideal for the purpose, is believed to be available at a very reasonable price.

Junior High

The estimated potential enrollment for grades 7-8-9 during the next five years is as follows:

Year beginning September	Estimated Potential Enrollment
1961	597
1962	582
1963	537
1964	548
1965	568

The present Kennett High would be adequate for this estimated enrollment, and its facilities, far superior to those of the present junior high building would permit the expansion in Junior High curriculum recommended above.

(c) **Administration**

The co-operative school would, of itself, constitute a separate school district, managed by its own school board. The Committee recommends that this board be made up of an odd number of members, not to exceed 15, with at least one member from each participating town. Town members would be elected by each town at its annual school meeting, and the remaining members-at-large would be elected at the annual meeting of the co-operative school district. (State law would have to be changed to permit a 15-man board and the recommended method of election, but no difficulty is anticipated in obtaining this change).

(d) **Cost**

The estimated cost of the new Senior High School is about \$1,050,000. However, reimbursement up to 55% of the cost would be available from the State of New Hampshire. Kennett High would be acquired by the co-operative for about \$450,000. Annual operation and transportation costs are estimated at \$180,000 for the Senior High, and \$155,000 for the Junior High.

6. FINANCING AND ALLOCATING THE COST

- (a) The cost of facilities acquired by the co-operative would be covered by bonds, to be repaid over a 20-year period.
- (b) The committee recommends that the cost of acquisition and operation be shared among the participants: one-half on the basis of number of students and one-half on the basis of equalized valuation.
- (c) Estimated results of allocation (for the FIRST YEAR) are shown in the table on the facing page.

The co-operative cost, grades 7-12 shown in the table includes not only operation and transportation but the cost of acquisition as well.

The table includes, for the FIRST YEAR, principal and interest on the new building, (less State reimbursement), of \$59,685. This amount is scheduled to decrease each succeeding year, and at the TWENTIETH YEAR would be \$25,172.

7. TIME SCHEDULE

The Committee would like to emphasize the time element involved in this project. Assuming acceptance by the voters in March, 1961, the organization of the co-operative school district and the awarding of contracts for the new Senior High within six months thereafter, would leave only one year for the actual building of the school by the critical date, September of 1962.

Co-operative School Study Committee

COOPERATIVE JUNIOR-SENIOR HIGH SCHOOL STUDY

Report of Subcommittee on Curriculum

At the organizational meeting held in Tamworth on May 1, 1959, this committee was requested to submit by June 30, 1959, a curriculum which could serve as a basis for the study of a proposed cooperative junior and senior high school program encompassing part of Union No. 9 and part of Union No. 36.

It became apparent to the committee, composed entirely of lay persons, that it would be in no position to express an opinion on the complex and involved aspects of the administration and management of a curriculum, the techniques of teaching, or on the subject content of a course of study. All of this falls within the sphere of the trained professional educator.

The committee studied the curricula of the following school systems:

Berlin, New Hampshire
Hanover, New Hampshire
Wrentham, Massachusetts
Suffield, Connecticut
Goshen, New York
Dover, Delaware
Princeton, New Jersey

The first three were selected on the recommendation of the New Hampshire Department of Education. The others could be considered as random choices, being in the survey only by the virtue of the fact that various members of the committee had friends in such schools, through whom the desired information was obtained. "The American High School of Today" by James Conant, often spoken of as "The Conant Report," was an excellent guide. School teachers and principals in Union No. 9 and their counterparts in other areas were a source of valuable information.

During its survey, the committee made some general observations, and with the help of our administrative educators who made their services available to the committee, these were transcribed into what seems to be an operable program.

Historically, the philosophy of an educational system seems to reflect the culture of a people, modified locally by geographical differences. As the culture changes, the demands made upon the educational system result in the introduction of new features and in the elimination of others.

Insufficient recognition of this generalization geographically may result in a lag at the local level. For example, a system adequate for the pre-electricity age, could not reasonably be expected to meet the demands required for living in the atomic age. It was observed that a curriculum tends to develop in a manner based on the retention of currently desirable features, with the addition of such aspects of

a contemporaneous social structure as seem indicated when projected into the foreseeable future.

The "Conant Report" directs attention to the widespread operation of the comprehensive high school — in varying degrees of comprehensiveness. It is defined as "a high school whose programs correspond to the educational needs of **ALL** the youth of the community." This is in contradistinction to the "specialized" high schools which provide either a vocational education or an academic curriculum.

A comprehensive high school should "at one and the same time provide a good general education for **ALL** the pupils as future citizens of a democracy, provide elective programs for the majority to develop useful skills, and educate adequately those with a talent for handling advanced academic subjects."

The committee believes the adoption of this type of junior high-senior high curriculum, modified to meet the local conditions, merits consideration by this cooperative study group.

The curriculum which is submitted seems to provide many more educational advantages to our pupils than are now available under the present system.

First, the means are provided by which the academically talented pupils can have the opportunity to handle the academically advanced subjects.

Second, the large number of terminal boys whose formal training ends with high school graduation can have a wider and more advanced training in the industrial arts, leading to a greater development of useful skills. The girls will have the opportunity in the commercial subjects and in the various fields of home economics.

Third, those pupils who do not possess high scholastic aptitude, or those who develop academically at a slower rate, or those who are in need of remedial work will be able to progress at a pace more nearly commensurate with their rate of learning. This is managed by the use of ability grouping, and by the use of individualized programs under guidance.

Fourth, those pupils who are potential "drop-outs" for one reason or another, can be placed in individualized programs more satisfactorily, because of the wider choice of elective subjects.

The junior high-senior high curriculum may be considered as a single unit — grades 7, 8, 9, 10, 11, 12. The division of 2-4 (two years junior high, grades 7 and 8, and four years senior high, grades 9, 10, 11, 12) or of 3-3 (three years junior high, grades 7, 8, 9, and three years senior high, grades 10, 11, 12) is largely a matter of physical facilities and for administrative ease. The curriculum of the 9th grade would be much the same in either case.

The appearance of courses in manual arts, fine arts, and home economics in the junior high curriculum introduces a new feature.

in this locality. This is a well-established custom throughout the country; it has stood the test of time and is considered favorably by the educational profession. Not only does this make possible an earlier flexible individualized program in the junior high, but it allows time and space for the scheduling at more advanced levels in the senior high school. By strengthening the senior high programs in these fields, the pupil is given a more complete training by the end of his formal education. The committee believes this to have an important potential in this area.

The present trend of moving some of the academic subjects to a lower grade seems worthwhile, especially science, mathematics, and foreign languages, where they may present a challenge to the academically talented.

A well-rounded program of physical fitness for both boys and girls seems desirable.

Only one modern foreign language, French, is in the curriculum. The committee believes there should be another one — German or Spanish, if sufficient interest should be shown at any time.

Latin is included in the curriculum. The committee is aware of its controversial status, but believes it still has sufficient value to be retained for the present.

In evaluating each individual subject, approval was given only to those which met the following criteria:

- (1) Is this subject necessary in order to give our pupils a training comparable to that given to the pupils in other relative school systems?
- (2) Is this subject acceptable by conservative opinion?
- (3) Is the demand for this subject likely to be sufficiently great to warrant placing it in the curriculum?
- (4) Is this subject of considered value in the development of the child?
- (5) Is the estimated cost of this subject within reason?
- (6) Does the value of this subject warrant the cost of including it in the curriculum?

Many courses and subjects which had been suggested to the committee had to be excluded by failure to meet these criteria. At the same time it seemed advisable to include courses not offered currently in our present system.

The committee believes that the curriculum it has offered is basically sound, educationally and financially. The committee's approach has been one of avoiding a mass hysteria and popular clamor for untried courses, fads and so-called frills. It believes they have no place in a stable educational system.

In submitting this curriculum, the committee is aware that it is likely to evoke a discussion over the presence of some subjects. The

stimulation of serious community thought to this important problem would give the report added value. In this connection, it should be noted that this curriculum closely parallels one suggested by the New Hampshire Department of Education for this proposed cooperative school study.

The curriculum committee was asked to submit an estimate of the number of rooms and number of teachers needed. This has been computed by the New Hampshire Department of Education, and is a part of this report. It is calculated on a 6-3-3 system, with 600 pupils in junior high, and 600 pupils in senior high. It should provide a working basis for the facilities committee.

The formula is $T=(k) E/c \cdot M/n$

T = number of teacher stations needed.

E = enrollment anticipated in subject.

c = average class size.

M = number of times class meets each week.

n = total number of periods which teacher station is available per week.

k = 1.25 – a constant to show 80% utilization of pupil stations.

As an example, experience and statistics show that in a comprehensive high school of 600, about (E) 310 would be enrolled in mathematics. The average size of each class is set at (c) 22. There are (M) 5 classes a week, and (n) 30 periods a week available per teacher. How many mathematics teachers are required?

Substitute in the formula $T=(k) E/c \cdot M/n$

$T = (1.25) 310/22 \cdot 5/30$

T = 2.9 mathematics teachers needed.

In general the number of teaching rooms corresponds to the number of teachers, but this is subject to some variation, depending upon the purpose for which a room is designed, such as laboratories, gym, shop, home economics, etc.

A variation in pupil enrollment of 15% from the estimate would not likely necessitate a change in the curriculum to any appreciable degree. It may or may not require a change in facilities. It would, however, make a difference in the cost-per-pupil figure.

COOPERATIVE JUNIOR-SENIOR HIGH SCHOOL STUDY

Report of Subcommittee on School Facilities

Taking our cue from the report of the Curriculum Subcommittee which recommended a new Junior High to accommodate 600 pupils and to make room and facilities for 600 Senior High pupils in the Kennett Plant.

This committee set about to:

1. Make a survey and study of a suitable site for a Junior High Plant.
2. Determine the type, size, and approximate cost of a new Junior High Plant.

Having no funds allotted to us to spend for an authority on costs we were groping rather in the dark during the early stages of our work. (A sum of money was made available to us later.)

Site — Several sites were suggested and checked as to availability and cost. The field across the railroad track from Kennett High seemed to be desirable so one of our members was informed that the land would be available for purchase as a site for a cooperative school.

The Building — A few members of the committee had visited the new Claremont Junior High School and others had read and heard about it. Therefore, that building was taken as a starting project to work from. The size is about what this committee was looking for, and some tentative costs were available — but nothing definite.

When the sum of money was made available to the committee, even though a very small sum, we set out to find an architect who would agree to make rough sketches and give the committee a cost that would stand up if the project was to go through in the near future.

A suggestion was made somewhere along the line that perhaps it might be worked out to use the new plant as a Senior High and the present Kennett Plant as a Junior High. This idea was discussed at quite some length. The present Kennett Plant has at least 3 departments that are very cramped for space right now, which means that additions of four rooms must be built on the Kennett Building at a cost of at least \$90,000 to provide adequate facilities to continue a 600-pupil Senior High School

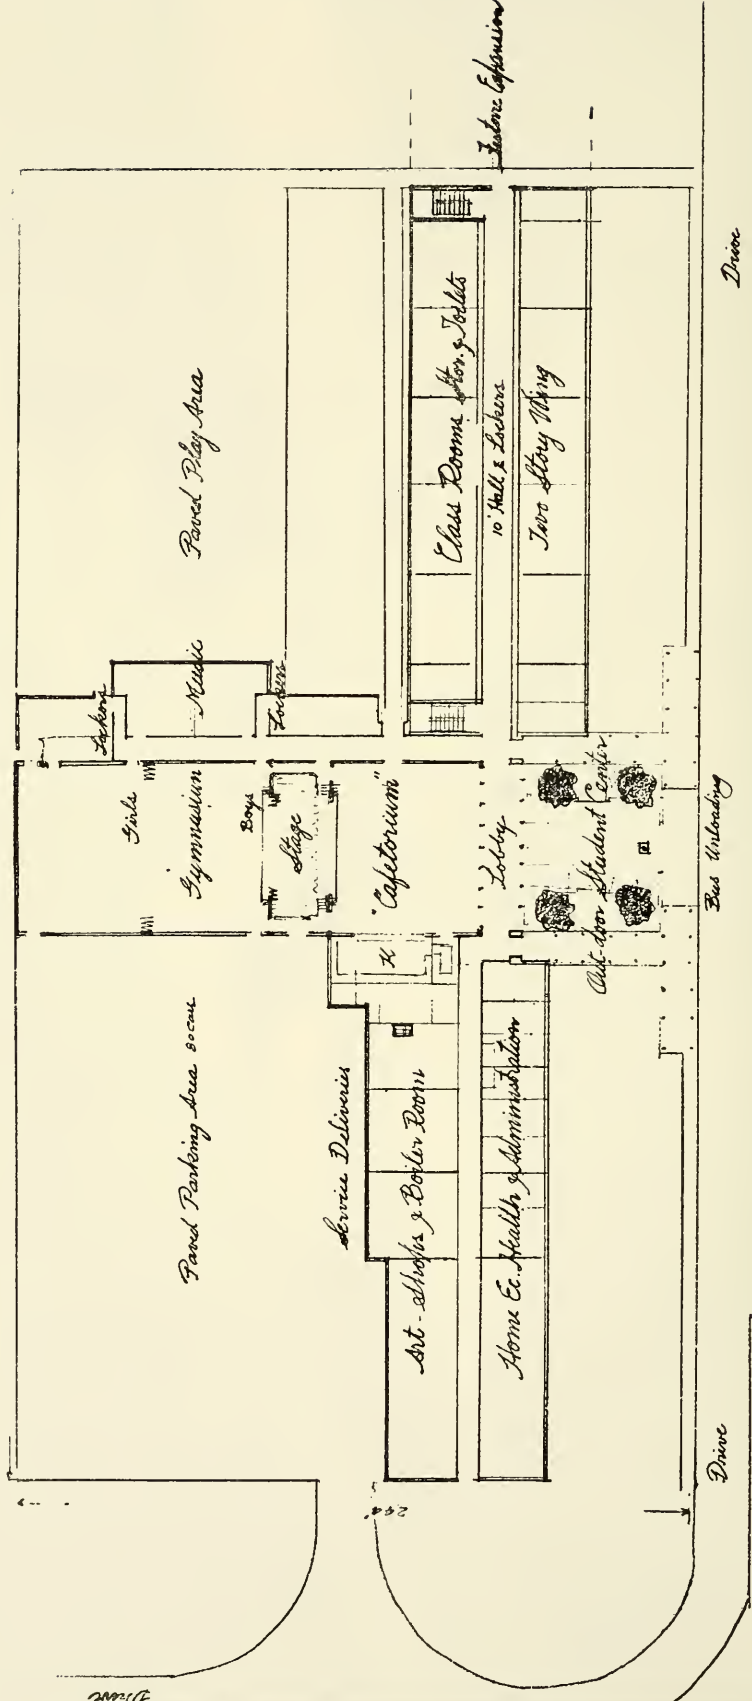

If the present Kennett Plant were to be used as a Kennett Junior High School, there would need to be no addition and very little, if any, added facilities.

Mr. W. Pope Barney of Sandwich, New Hampshire, and Philadelphia, Pennsylvania, has prepared these sketches and developed these costs.

PROPOSED CO-OPERATIVE SENIOR HIGH SCHOOL

Two Play Buildings for Boys & Girls

Parking for cars

Bus Unloading

BASIC FLOOR PLAN OF PROPOSED CO-OPERATIVE SENIOR HIGH SCHOOL

REPORT OF FACILITIES SUBCOMMITTEE

Summary

New Junior High complete according to Architect's drawings and specifications	\$977,400	
Addition of 4 rooms on present Kennett Building if used as a Senior High School	90,000	\$1,067,400

New Senior High complete		1,038,400

Showing a saving of		\$ 29,400
by building a new, modern, well-equipped Senior High School rather than a new Junior High School.		

Facilities Subcommittee

Emmons E. Heald, Tamworth, Chairman
Margaret Colbath, Conway, Secretary
Roland Lord, Ossipee
Rachel Doucette, Jackson
Margaret Littlefield, Freedom
David Schurman, Conway
Leland Drew, Madison
Donalda Howard, Glen

Recommendations

The Facilities Subcommittee makes the following recommendations:

1. The purchase of the 60-acre (more or less) plot of land across the railroad tracks northwesterly from the present Building.
2. Erecting of a 24-room Senior High School plant on the above-mentioned plot of land.

Total cost including land; building and equipment; sewage disposal; grading roads and walks. Also, fees and other costs as shown on accompanying Architect's Specifications and plans — \$1,038,000.

3. Convert the present Kennett Plant into a Kennett Junior High School.

CONWAY COOPERATIVE SENIOR HIGH SCHOOL

ARCHITECT'S REPORT

NOVEMBER 4, 1959

The building, as programmed and designed, represents standards which are recommended as being wise economy, being neither austere to the point of educational inadequacy nor liberal to the point of criticism of extravagance.

The construction is to the minimum standard for safety and low maintenance. If funds are available, some form of tile base and wainscot in halls and gymnasium would be justified as needing no painting.

Skeleton Specifications:

Exterior Walls: Concrete block and common brick facing.

Interior Walls: Concrete block painted except for wainscot in kitchen,

toilets and locker room where structural glazed tile will be used.

Ceiling: Acoustic units in all student areas.

Roof: Wood joists and plank, 20-year bonded tar and gravel roof over 1" solid insulation.

Floors: Reinforced concrete slab on grade for first floor with asphalt tile except in gymnasium, locker rooms, toilets and kitchen. Gymnasium floor iron bound. Maple strips set in mastic on cork. Locker and toilet floors ceramic tile. Kitchen floor grease-proof asphalt tile. For second floor the concrete slab will be over steel-tex and light steel joists

Windows: Structural wood for fixed sash, aluminum for movable units. Gymnasium to have directional glass block on east, west, and south; non-directional glass block on north side.

Heating: Two-pipe vacuum return steam heating system and mechanical ventilation of kitchen, toilets, locker rooms and cafeteria.

Plumbing: Standard school units. Sewage disposal system in site work.

Electrical Fixtures: Cold Cathode and Incandescent.

The preliminary cost estimates are based on the best information locally and currently available and make no allowance for the possible ultimate results of the present steel strike.

PRELIMINARY COST ESTIMATE

Based upon 24 Classrooms 25' x 32' (800 sq. ft.)
 Gymnasium 76' x 90'
 Cafeteria for 300 and program as written for Senior High

Sketches of November, 1959 —	61,700 S.F. at \$12+

Tamworth	3,992,250	119,768	159,690	199,612	239,535		
	\$41,521,965	\$1,245,660	\$1,660,878	\$2,076,099	\$2,419,318	\$523,880	

PART C. — Determination of Debt Service Budget for New Building

Estimated Cost of new building	
Assumed period of bond issue	
Annual payment on principal	\$1,038,000
Assumed interest rate	20 years
	\$51,900
	3.5 per cent
Annual payment on principal	\$51,900
Less State Building Aid computed at 55% of principal payment	28,545
Local share of principal payment	\$23,355
Interest payment for first year	36,330
Local assessment for debt service budget	\$59,685

NOTE — For purposes of this illustration, it has been assumed that the principal payment will remain constant at \$51,900 per year, and that the State Building Aid payment will remain constant at 55 per cent of this amount, or \$28,545.00 per year. The amount to be raised locally for payment of principal would then be \$23,355.00 per year. If the assumed interest rate of 3.5 per cent were obtained, the interest payment would amount to \$36,330.00 the first year, and would decrease at the rate of \$1,816.50 per year.
