*Deceased.

ORGANIZATION OF CITY GOVERNMENT

TUESDAY, MARCH 23, 1915.

At ten o'clock in the forenoon of the above date, members-elect of the city council for the municipal year of 1915 and the members from the previous council met for organization at the city council room agreeably to the provisions of the city charter.

The oath of office was administered to the mayor-elect, Hon. George P. Munsey, by the retiring mayor, Hon. George B. Cox.

The mayor administered the oath of office to the following councilmen-elect, viz:

Ward 1—Caleb J. Avery.

Ward 2—Curtis A. Davis.

Ward 3—John B. Moore.

Ward 4—William F. Sanborn.

Ward 5—William D. Veazey.

Ward 6—Clarence E. Rowe.

Prayer was then offered by the Rev. Edwin H. Prescott, after which the mayor delivered his inaugural address.

INAUGURAL ADDRESS

OF HON. GEORGE P. MUNSEY, MARCH 23, 1915.

Gentlemen of the City Council :

In May, 1893, Laconia's first mayor, Charles A. Busiel, took the oath of office. This was 22 years ago. Laconia had just united with that part of Gilford now known as Ward Six and this union was incorporated as the City of Laconia.

I became a resident of Laconia that same year, and in this way I feel that I have grown up with the city. I have watched with interest the progress of every department of the city's life. I have seen the inventory of \$4,000,000 rise to $2\frac{1}{4}$ times this amount.

I have seen every mayor and council from then till now take up the reins of government with a single purpose and earnest endeavor to assist in the city's march onward and upward.

I have felt that every good citizen is in duty bound to do his part in the well-being and advancement of his own city, and become a factor in the uplift of the moral and business life of the community.

Every one who loves the town in which he lives should be willing to make a sacrifice of his time and his preferences when the public demands his assistance.

So, during these 22 years of the city's existence, men have given of their time, judgment and experience for the benefit of the community and today you and I have been called to carry on the work already begun.

You are today assuming your position in the line of public servants to work for the public good, and in being

called to act as mayor of our city, I consider myself fortunate indeed, in having for co-workers such men as have been selected to represent the various wards of the city.

Every man comes making a personal sacrifice of time and energy, and I feel that with such men as you, the city's interests will be well cared for.

Only three new faces appear at the desks and in the remaining three, with your Mayor, we still have a majority of the council of last year and our efforts will be a continuation of the work then undertaken.

Requests for some improvements and suggestions of others have already begun to come in.

Available funds will hardly begin to cover the multitude of desired improvements and we will be somewhat handicapped by more than \$4,000 worth of bills contracted in 1914 that must be paid this year, and our appropriations must be made with this in view.

The public must give patience a prominent place, we must select carefully and in the meantime ask the indulgence of all.

Our appropriations last year amounted to \$177,000, and in deciding for what purposes this money should be used, I believe that every member had in mind only the city's well-being.

Main street was put into permanent condition from Mill street to the bridge, the old paving being removed to Water street where it will be used to complete the work already begun on that thoroughfare.

Elm street bridge, was completed and Laconia can now boast of its first cement bridge of material size, and a bridge of which all our citizens may well be proud. Several new bridges are fast approaching the state of extensive repair and it is very evident that before many years some action along this line must be taken.

Over a mile of surface drains were laid in 1914 resulting in much benefit to localities where located, and I might add that in view of the necessity of much more of this work

and in view of the fact that many of our citizens being out of employment at this time, I would favor extending these drains where needed and that an early appropriation be made for this purpose, that we may give work to our own people while they are in need of employment. This should have attention as soon as the ground will permit.

The natural drain now crossing Court street and passing over much private property should be removed, and made to pass down Lawrence street to the river. The Elm street drain in ward 6 should be completed and I would recommend that a surface drain on High street be laid from Avery street down High street through Union avenue and Jewett street to the river. The Pine street extension should be completed and a piece of land should be secured at Weirs upon which may be erected suitable buildings for the storage of the city tools as recommended by the Superintendent of the Streets.

The city report shows that nearly three miles of sidewalk have been built during the past year; these are an asset to the city and should be extended as fast as conditions will permit, but whatever is done in the way of new work the old walks should be kept in proper repair.

Our macadam roads seem to be giving satisfaction and while the report states that they are maintained at an expense of 1.74 per yard, it should read \$0.0174 per yard, which is somewhat lower than one year ago and would appear to be very reasonable.

I anticipate that some new roads may be built this season, but by all means let us maintain those we already have and build new only as it can be conveniently done.

I have been impressed with the most excellent reports from different departments as printed in the last city report and I believe if everyone would carefully read these reports as they appear they would find themselves becoming more interested in city affairs. The many ideas expressed therein by those who have made the various sub-

jects a matter of study are well worth one's time to read and consider.

One of those recommendations has come to me with such a force and coincides so closely with my own ideas that I ask your indulgence for a moment while I read from the report of the City Engineer. It will be found upon page 83 in the published report and reads as follows: "Considerable money is expended from year to year laying out and grading new streets and it seems to me that much more laying out of streets is done than the demand for house lots would warrant, or that the present progress of building would call for. The result is that we get a number of streets, many of them costly to grade and maintain, on which there is not near enough taxable property to warrant the expenditure. Land is subdivided into house lots and streets laid out by the owners without regard to lines, grades, drainage, sewer extension, or proper development of the city and the result is that in the attempt to establish proper grades, drainage, etc., the tax payers have to pay much more for such works than would be the case if such extensions were made under proper engineering supervision. There are a great many vacant lots on streets that are graded, have sidewalks, water, sewers, gas and drainage, and it would seem like good business policy to utilize such streets where the city and others have already made large investments, rather than develop areas where there are not such appliances and where their installation will cost the tax payers a great deal of money and where they will be used to only a limited extent for many years." If there were no available house lots, the foregoing would not apply, but the building of [streets and sewers before there is sufficient taxable property to demand such outlays should be taken up with great care.

MAIN STREET.

I would recommend that Main street improvements be

finished this year from the bridge to the corner of Court street, thus ridding this street of a larger portion of its disagreeable noise and disturbance.

UNION AVENUE.

In the matter of Union avenue, while this street from Main street to Casino square will ultimately be covered with macadam, I regret that the Board of Public Works are obliged to recommend the beginning of the work at Casino square, owing to the unsatisfactory conditions surrounding both sides of the street at the so-called Union avenue corner. During the past season the city council fixed the northerly side of said street and secured the removal of the market building from the street, all without expense to the city. There are, however, several obstructions remaining and the street is too narrow to permit of a sidewalk on the southerly side.

I hope some agreement may be made between the owners of the property at this point and the city, whereby it will enable us to begin on this part of Union avenue with permanent improvements so much needed. This street is growing in importance every year and traffic at this point is steadily increasing. When this matter is finally adjusted, the city can be congratulated upon being rid of a troublesome question of long standing.

In bringing the matter of Water street for your consideration, I would call your attention to the fact that in the portion already completed the paving is laid on a cement base; this, no doubt, is the most substantial foundation of any upon our streets, but I have my doubts as to its necessity. This paving has been upon Main street for many years, upon only a sand or dirt foundation, and in constant and heavy use, and in relaying it on Water street to complete the work already begun it would seem that the expense of a cement base could be better used elsewhere. It would seem that if this can be done, Water street should be completed, as the paving will be already there and the street sadly needs attention.

Our attention is also called once more to Pleasant street which in the near future must be macadamized.

I would also mention Bowman street and the lower end of Fair street, certain portions of Messer street and North Main street from Oak street to the junction of Main and Pleasant streets.

FIRE DEPARTMENT.

Our fire department is efficient and is to be complimented upon some of the work accomplished. This is a very important department of the city and needs men of cool heads and brave hearts to meet all requirements in this department. One matter which will come up for our attention this season is concerning the matter of compressed air for the fire whistles. The rentals for the room and power required for filling the tanks at present is about \$400 per annum and it would seem wise for the city to provide its own motors and pumps for filling these tanks. After the changes are once made, we should be able to save nearly three-quarters of the amount now paid. The matter was taken up last season and a committee appointed but no report has yet been made. The efficiency of the department must not be allowed to drop, but must be improved upon if possible, for the efficiency of this department is the safety of our city.

The schools must come in for proper and careful attention. Our boys and girls are the biggest asset of the city. The children of today are men and women of tomorrow.

LEGAL.

I do not understand that any serious legal matters are threatening the city. Litigation with Mr. Avery in connection with the Union avenue corner was averted by agreement of parties; and in the matter of damages to the Perley block, Mr. Perley was awarded \$3,000 by jury trial upon the city's appeal from the county commissioners' award of \$3,300; the original award by the city council in this matter was \$2,500.

I would recommend that in making our appropriations,

a certain amount be appropriated for payment upon the floating debt of the city, rather than trust to luck that some balance may remain at the end of the year; this, I believe, should become an annual custom by which our city debt would be systematically reduced.

Let no department exceed its appropriation except under conditions that are beyond control, and the committee on accounts and claims will see that no bill is approved by them beyond the limit of the appropriation covering such bill, unless so directed by the council.

Let our watchword be Economy in the expenditure of the city's funds to the end that the tax payers of the city may be relieved as much as possible from financial burdens.

Many of our people are out of employment and we must be very sure that no heavier burden is placed upon them in the way of taxation.

Fear must not swerve us from the path of duty; selfish influences must not interfere with our obligations to all. We must courageously take up the work before us realizing that problems will arise for solution and difficulties will be met which must be overcome. Criticism will not be lacking and should be accepted as an evidence of our activity, it should be utilized by us in strengthening our determination to give our city the best that in us lies. It should become a stimulant spurring us on to better things and a more conscientious and unselfish administration of the city's affairs.

Gentlemen: I have no enemies to punish, I have no promises to fulfill. Let us lay aside all personal and political prejudices in the knowledge that we are agents of all the people and must labor for their interests and the city's welfare. I trust we may have co-operation of every citizen who believes in the city's future.

May good feeling and harmony prevail and may our administration be marked with approval of those whose servants we are. Let us not fail in our duty, but be faithful to our fellow men, ourselves and the city we serve.

MUNICIPAL REGULATIONS

FOR PAYMENT OF BILLS AGAINST THE CITY.

All bills against the city must be approved by the persons authorizing the charge; and unless this is done, no action can be had upon the bill by the committee on accounts and claims, and no order will be given for its payment.

When bills are certified to as above, and left with the city clerk not later than Thursday at 12 o'clock m., preceding the last Monday of each month, they will be audited by the committee on accounts and claims, and if approved by them and allowed by the council, will be ready for payment on the following Wednesday, at the office of the city treasurer.

Meetings of the committee on accounts and claims are held on the Friday preceding the last Monday of each month at 7.30 o'clock p. m., at the city clerk's office.

CITY GOVERNMENT

LACONIA, N. H.

Inaugurated fourth Tuesday of March, yearly. Stated meetings:
The last Monday of each month, at 7.30 o'clock P. M., at city
council room, Masonic Temple, Main street.

1915

CITY COUNCIL

Mayor

GEORGE P. MUNSEY.

Elected March 9, 1915, for one year. Salary, \$300 per annum.
Office, Masonic Temple, Main street. Residence, No. 60 Pearl
street.

Council

Salary, \$50 each, per annum.

Elected March 9, 1915, for one year.

Ward 1—Caleb J. Avery.

Ward 2—Curtis A. Davis.

Ward 3—John B. Moore.

Ward 4—William F. Sanborn.

Ward 5—William D. Veazey.

Ward 6—Clarence E. Rowe.

Standing Committees

Finance—The Mayor, Rowe and Veazey.

Accounts and Claims—Rowe, Moore and Sanborn.

Public Instruction—Moore, Davis and Sanborn.

Roads and Bridges—Avery, Rowe and Veazey.

Parks and Commons—Sanborn, Moore and Rowe.

Fire Department—Rowe, Avery and Davis.

Lighting Streets—Veazey, Avery and Rowe.

Elections and Returns—Veazey, Moore and Avery.

Engrossed Ordinances—Davis, Rowe and Sanborn.

Police and Licenses—Davis, Sanborn and Moore.

Sewers—Avery, Moore and Davis.

Land and Buildings—Sanborn, Veazey and Davis.

EXECUTIVE DEPARTMENTS

City Clerk

Salary, \$600 per annum and fees provided by law.

EARL FLANDERS

Office: Room 7, Masonic Temple, Main street.

City Treasurer

Salary, \$75.00 per annum.

OSCAR J. GEORGE

Office: 480 Main street.

City Solicitor

Salary, \$300 per annum.

FLETCHER HALE

Office: 609 Main street.

Board of Assessors

Salary, \$1500 per annum for the board.

Office: Room 1, Masonic Temple, Main street.

J. FRANK SLEEPER

Elected March 23, 1915, for three years.

DENNIS W. MCCARTHY

Elected March 25, 1913, for three years.

CHARLES L. SIMPSON

Elected March 24, 1914, for three years.

Collector of Taxes

Salary, \$450 per annum, conditional on amount collected.

MARTHA E. JOHNSON

Office: Room 1, Masonic Temple, Main street.

Auditor

CHARLES J. HAYFORD

Board of Public Works

Created by Act of Legislature, 1901. Elected by the city council. One member of said board to be chosen biennially on the fourth Tuesday of March to serve six years. Annual salary of each member, \$100.

J. HENRY STORY, *President*

Elected March 23, 1915, for six years.

JULIUS E. WILSON, *Secretary*

Elected March 28, 1911, for six years.

Clerk

Earl Flanders. Salary, \$200 per annum.

Probation Officer

Fred A. Young. Salary, \$150 per annum. Appointed by the Justice, under Chapter 125, Laws of New Hampshire, passed January session, 1907.

FIRE DEPARTMENT

Chief Engineer

Arthur W. Spring. Salary, \$175 per annum.

Assistant Engineers

Salary, \$100.00 per annum.

1st, Edward H. Kennedy; 2nd Henry H. Shorey; 3rd, Edward C. Sargent; 4th, Joseph H. Roucher.

Superintendent Fire Alarm Telegraph

Moses W. Twombly. Salary, \$150 per annum.

OTHER CITY OFFICERS

Board of Supervisors of Checklists

Charles E. Carroll, chairman. Elected by City Council, Nov. 30, 1914. Ward 1, Fred F. Eastman; 2, Frank C. Morin; 3, Joseph F. Sleeper; 4, Howard W. Fales; 5, Sherman E. Thompson; 6, Arthur L. Davis, Oscar J. George. Elected at biennial election, November 3, 1914. Salary, \$2.00 per day of service.

Park Commissioners

Charles H. Perkins, *George B. Cox, Mrs. Idella Drew
Lamprey, Mrs. Cora F. Hayward, Mrs. Laura E. Varney.

Surveyors of Lumber

Lewis S. Perley, Pearl S. Lovejoy, Charles L. Kimball,
Lew K. Perley, *L. J. Batchelder, *Albert Griffin,
Alexander J. Harper, Fred W. Moore, Albert E. Dodge,
William H. Cummings, Conrad Clark, *Charles E. Swain,
Tilden H. Avery, David Lang.

Measurers of Wood and Bark

Lewis S. Perley, Alexander J. Harper, Lew K. Perley,
Tilden H. Avery, Frank S. Willey, Ernest J. Higgins.

Weighers of Hay, Straw, Coal and other Articles

Lewis S. Perley, Charles L. Kimball, Charles F. Locke,
George H. Leighton, Frank S. Willey, Ernest J. Higgins,
William G. Cram, G. Walter Hall.

Measurer of Stone

Lewis S. Perley.

Inspector of Petroleum

Julian F. Trask.

Measurer of Brick and Plastering

Charles A. French.

Measurer of Painting

Benjamin Turgeon, John F. Austin.

Sealer of Weights and Measures

Julian F. Trask.

Fence Viewers

Lewis S. Perley, *Charles E. Swain, Arthur A. Tilton.

Tree Warden

Arthur W. Spring.

*Elected but have not qualified.

Board for Examination of Plumbers

Walter H. True, M. D., Charles A. French, John Morrissey.

Licensed Plumbers.

John S. Morrissey, Thomas F. Caveny, Claude C. Dame, Thomas H. Walsh, George J. Perry, Bertram G. Walker, Jos. H. Valier, Leland S. Topham, Joseph J. Morin, Dana W. Hunkins, Merle Coup.

Licensed Drain Layers.

Charles A. Young, Claude C. Dame, Wesley B. Stevens, Thomas Fecteau, H. J. Gagne.

WARD OFFICERS
Moderators

Elected at biennial election, November 3, 1914, for two years.
Salary, \$3.00 per term.

- Ward 1*—*Caleb J. Avery.
2—Louis J. Truland.
3—John B. Moore.
4—Edwin H. Shannon.
5—Alfred C. Wyatt.
6—Harry L. Smith.

Ward Clerks

Elected at biennial election, November 3, 1914, for two years.
Salary, \$7.00 per term.

- Ward 1*—Carl F. Blaisdell.
2—Arthur F. Trask.
3—George Walter Varrell.
4—John J. McDonough.
5—Archie L. Campbell.
6—Clarence E. Rowe.

Selectmen

Salary, \$5.00 per term.

Elected March 11, 1913, for three years.

- Ward 1*—Fred M. Severance.
 2—William B. Johnson.
 3—Charles K. Hawkins.
 4—Edwin A. Thyng.
 5—Albert Bourque.
 6—John Frank Sanders.

Elected March 10, 1914, for three years.

- Ward 1*—*Arthur A. Tilton.
 2—William D. Kempton.
 3—Michael J. Carroll.
 4—*Winfield H. Pearson.
 5—Frank H. Stone.
 6—Oscar A. Flanders.

Elected March 9, 1915, for three years.

- Ward 1*—Amos Chattle.
 2—Victor V. Hartford.
 3—Walter L. Paine.
 4—*M. Roscoe Wright.

Ward 2—William H. McAnerlin, Edward J. Coran, Xavier Trembley, Charles N. Crowell.

*Elected by City Council to fill vacancy.

Ward 3—Amos J. Dinsmoor, Edwin N. Quinby, A. Eugene Hill, Adelbert F. Stevens.

Ward 4—James McGloughlin, Fletcher Hale, John M. Guay, Robert S. Foss.

Ward 5—Arthur J. Vallee, *Ralph B. Gilman, Benj. Turgeon, William N. Charles.

Ward 6—Frank W. Lougee, *Frederick W. Moore, Olin C. Moore, Charles L. Simpson.

*Elected by City Council to fill vacancy.

RESOLUTIONS, ETC.

RESOLUTIONS

In the year of our Lord one thousand nine hundred and fifteen.

A RESOLUTION exempting Max Levane, Joseph W. Stone, and David J. Fox, whose business will hereafter be done in said city under the name of the Laconia Dress Company, from taxation on property used in the manufacture of garments for the term of five years, in a sum not exceeding ten thousand (\$10,000) dollars.

Resolved by the City Council of the City of Laconia as follows:

The City of Laconia hereby exempts from taxation, Max Levane, Joseph W. Stone, and David J. Fox, on all machinery and stock in trade, employed and to be employed, in the manufacture of garments for ladies' wear, in a sum not exceeding ten thousand (\$10,000) dollars for a term of five years from April first, 1915.

Passed and approved March 9, 1915.

GEORGE B. COX, *Mayor.*

In the year of our Lord one thousand nine hundred and fifteen.

A RESOLUTION authorizing the City Treasurer to hire money in anticipation of taxes.

Resolved by the City Council of the City of Laconia as follows:

That the City Treasurer be and hereby is authorized to hire on the credit of the city, a sum of money not exceeding forty thousand dollars (\$40,000) in anticipation of taxes for the present year, the same to be borrowed upon notes of the city, signed by the Mayor and Treasurer, and countersigned by the City Clerk.

Passed and approved March 29, 1915.

GEORGE P. MUNSEY, *Mayor.*

In the year of our Lord one thousand nine hundred and fifteen.

A RESOLUTION relating to the acceptance of a deed from Woodbury L. Melcher, conveying to the City of Laconia certain land on the southerly side of Union avenue, and to the establishment of the southerly line of Union avenue, adjoining the land of Woodbury L. Melcher.

Resolved by the City Council of the City of Laconia as follows:

WHEREAS, the following communication has been received by the Mayor and City Council of said City:

LACONIA, N. H., April 26, 1915.

To His Honor, the Mayor, and to the Honorable City Council of Laconia,

Gentlemen:

Referring to contemplated improvements upon the highway at the Main street end of Union avenue, I am informed that by reason of a compromise settlement with Lyman B. W. Avery, the northerly side line has now been definitely fixed.

It has long been my expressed desire to unite with the city in completing that part of the highway adjoining my residence whenever the northerly side could be definitely fixed. This having been accomplished I now tender to the City as a free gift a strip of land inside my fence along the northerly side of my premises about six feet wide, and described as follows:—being all the land I own northerly of the following described line—beginning at an iron pin driven in the ground near the easterly line of Main street, and described as being fifty-seven and ninety-three hundredths (57.93) feet southerly of the south-west corner of the Fogg shoe shop. so called; thirty-four and two hundredths (34.02) feet from the north-west corner of my house, numbered 445 Main street, and sixty and forty-four hundredths (60.44) feet from the south-west corner of the same house; thence running on the magnetic bear-

ing of north fifty-eight degrees, fifty-three minutes, thirty seconds east (N. 58-53'-30" E.) to the easterly line of my land, adjoining land of Georgia B. Wells—subject to any right of way the said Georgia B. Wells may have over any part thereof. (The above described line being parallel to, and forty-seven and fifty hundredths (47.50) feet distant from the second course easterly from Main street of the northerly line of Union avenue as established by the City Council, February 3, 1914.)

And I am to execute the necessary papers to absolutely fix the line. A condition of a conveyance of this land will be that the city remove at its own expense, the fence on my northerly line to the new line, and further that the city construct and maintain a substantial sidewalk, at least six feet wide, on Union avenue adjoining my remaining land.

This offer being tentative, I reserve the right to withdraw if not accepted and acted upon seasonably.

I am very respectfully your fellow citizen,

W. L. MELCHER.

THEREFORE, BE IT RESOLVED that the foregoing offer be accepted; and that the Mayor be and hereby is authorized to accept the deed from Mr. Woodbury L. Melcher of the land described in the foregoing communication subject to the conditions therein stated; and be it further Resolved that, whereas there is now pending in the Superior Court for Belknap County, a proceeding brought on behalf of the city of Laconia to determine the location of the southerly line of Union avenue as against several abutters, of whom the said Melcher is one, upon delivery of a deed to the Mayor, of the land described in the foregoing communication, and subject to the conditions therein stated, the City Solicitor be and hereby is authorized and instructed to enter into an agreement with the said Woodbury L. Melcher, or his attorney, for a decree to be entered in said proceeding, whereby, by virtue of said deed, as far as the said Melcher

is concerned, the line described in said deed shall be fixed as the southerly line of said Union avenue adjoining said Melcher; that said decree be made without prejudice to the said Melcher as to the allegations set forth in said proceeding; and that said decree be made, further, without prejudice to rights of the city of Laconia, as against any other parties to said proceeding, and without prejudice to the rights of any other party therein against said city.

Passed and approved, April 26, 1915.

GEORGE P. MUNSEY, *Mayor*.

In the year of our Lord one thousand nine hundred and fifteen.

A RESOLUTION appropriating money for Memorial day expenses.

Resolved by the City Council of the City of Laconia as follows:

That the sum of two hundred and seventy-five dollars be and the same is hereby appropriated for the expenses of Memorial day, to be divided as follows:

In the year of our Lord one thousand nine hundred and fifteen.

A RESOLUTION transferring money from miscellaneous expense account to pay the expense of improvement to the road from The Weirs to Meredith.

Resolved by the City Council of the City of Laconia as follows:

That the sum of thirty dollars be and the same hereby is transferred from miscellaneous expense account to satisfy the terms of a proposed contract to be entered into between the City of Laconia and H. Elizabeth Watson, of said Laconia, by which proposed agreement the said Watson, and her heirs and assigns, are to care for the drainage from a certain culvert situate near the junction of Endicott street with the highway leading from Endicott

street past the house of said Watson, in such manner that such drainage shall be conducted across the said Watson's land and not permitted to flow onto said Endicott street; authority hereby being given the Mayor to execute such an agreement on behalf of the city when it shall be drawn to meet the approval of the City Solicitor and the City Engineer.

Passed and approved Aug. 30, 1915.

GEORGE P. MUNSEY, *Mayor*.

In the year of our Lord one thousand nine hundred and fifteen.

A RESOLUTION providing for the transfer of thirty-five hundred dollars from the appropriation for payment on city debt to highways and bridges account, and for the transfer of the balance of fifteen hundred dollars of said appropriation to the miscellaneous expense account.

Resolved by the City Council of the City of Laconia as follows:

That the sum of two thousand dollars be and the same is hereby authorized to be transferred from the appropriation for payment on the city debt to highways and bridges account, to be used for repairs on Clinton street; that the sum of three hundred dollars of said appropriation be and the same is hereby authorized to be transferred to highways and bridges account for grading and repairs on Academy street.

That the sum of twelve hundred dollars be and the same hereby is authorized to be transferred from said appropriation to highways and bridges account to provide for unusual conditions created by extraordinary heavy rains; and that the balance of fifteen hundred dollars of said appropriation be and the same hereby is authorized to be transferred to miscellaneous expense account.

Passed and approved September 27, 1915.

GEORGE P. MUNSEY, *Mayor*.

In the year of our Lord one thousand nine hundred and fifteen.

A RESOLUTION transferring money from miscellaneous account for repairs on fire station at Lakeport.

Resolved by the City Council of the City of Laconia as follows:

That a sum of money not exceeding \$300 be and the same is hereby transferred from miscellaneous expense account for the purpose of repairing heating plant at Lakeport fire station, and the money to be expended under the direction of the councilman from Ward Six.

Passed and approved September 27, 1915.

GEORGE P. MUNSEY, *Mayor.*

In the year of our Lord one thousand nine hundred and fifteen.

A RESOLUTION authorizing the City Treasurer to hire money in anticipation of taxes.

Resolved by the City Council of the City of Laconia as follows:

That the City Treasurer be and hereby is authorized to hire on the credit of the city, a sum of money not exceeding ten thousand (\$10,000) dollars in anticipation of taxes for the present year, the same to be borrowed upon notes of the city signed by the Mayor and Treasurer and countersigned by the City Clerk.

Passed and approved October 25, 1915.

GEORGE P. MUNSEY, *Mayor.*

In the year of our Lord one thousand nine hundred and fifteen.

A RESOLUTION transferring money from the appropriations for Main street and Union avenue permanent improvement and miscellaneous expense, to highways and bridges account.

Resolved by the City Council of the City of Laconia as follows:

That the sum of two hundred dollars be and the same

hereby is authorized to be transferred from miscellaneous expense account to highways and bridges account, to be used for completing Opechee street;

That the unexpended balance of the appropriation for Main street and Union avenue permanent improvement be and the same hereby is authorized to be transferred from said account to highways and bridges account, to be used for maintenance of highways.

Passed and approved November 29, 1915.

GEORGE P. MUNSEY, *Mayor*.

In the year of our Lord one thousand nine hundred and sixteen.

A RESOLUTION transferring ninety-three dollars from miscellaneous expense account for reimbursement of taxes wrongfully assessed to Scott & Williams, Incorporated.

Resolved by the City Council of the City of Laconia as follows:

That the sum of ninety-three dollars be, and the same hereby is transferred from miscellaneous expense account to reimburse Scott & Williams, Incorporated, for taxes wrongfully assessed against it for the year 1914, and the Mayor is hereby authorized to draw his warrant for the same.

Passed and approved February 14, 1916.

GEO. P. MUNSEY, *Mayor*.

ORDINANCES

In the year of our Lord one thousand nine hundred and fifteen.

AN ORDINANCE relating to the salary of the Clerk of the Municipal Court of Laconia, and fixing the amount of his bond.

Be it ordained by the City Council of the City of Laconia as follows:

Section 1. The salary of the Clerk of the Municipal Court of Laconia, under and by virtue of an act of the New Hampshire Legislature entitled, "An act establishing Municipal Courts and abolishing existing Police Courts," approved March 4, 1915, is hereby fixed at two hundred dollars per annum, payable in equal quarterly payments, beginning with March 15, 1915.

Section 2. The Clerk of the Municipal Court of Laconia shall give a bond to said city in the sum of five hundred dollars, with sufficient sureties, for the proper performance of his duty, which bond shall be approved by the Justice of said Court.

Section 3. This ordinance shall take effect upon its passage.

Passed and approved September 27, 1915.

GEORGE P. MUNSEY, *Mayor.*

In the year of our Lord one thousand nine hundred and fifteen.

AN ORDINANCE providing for the election of trustees of trust funds for the City of Laconia.

Be it ordained by the City Council of the City of Laconia as follows:

Section 1. The City Council, as soon as may be after

the passage of this ordinance, shall elect a board of three trustees of trust funds for the City of Laconia, one for one year, one for two years, and one for three years; and annually thereafter the City Council shall elect one trustee for three years.

Section 2. Vacancies occurring in said board shall be filled by the City Council for the remainder of the term.

Section 3. The powers, duties and liabilities of said trustees shall be as provided in Chapter 162 of the Laws of 1915.

Section 4. Said trustees shall give bond in such sum as the City Council may from time to time direct.

Section 5. This ordinance shall take effect upon its passage.

Passed and approved September 27, 1915.

GEORGE P. MUNSEY, *Mayor.*

CONTRACT

BETWEEN THE CITY OF LACONIA, NEW HAMPSHIRE AND THE LACONIA GAS AND ELECTRIC COMPANY.

AGREEMENT made this second day of July, A. D., 1915, by and between the City of Laconia, a municipal corporation established in the County of Belknap, and State of New Hampshire, hereinafter called the City, and the Laconia Gas and Electric Company, a corporation duly organized under New Hampshire laws and doing business in said Laconia, hereinafter called the Company.

The Company in consideration of the agreements of the City hereinafter contained agrees that it will install, maintain, and operate for and during the period of ten years beginning on the date of this contract series alternating current street lamps of the latest type of the capacity in candle power as hereinafter specified, and will furnish and maintain all the fittings, connections and accessories thereto as required for the safe and efficient operation of said lamps during the term of this contract. The City shall grant to the Company necessary authority to erect and maintain upon the public highways within the city all poles, wires and fixtures necessary for supplying electric energy to said lamps.

DESCRIPTION OF LAMPS

The minimum number of lamps to be furnished by the Company and used by the City under this contract is hereby defined as follows: Four hundred (400) Series Incandescent street lights candle power of same to be as ordered by City government.

The foregoing lamps are to be paid for by the City at the following prices:

200 candle power lamps at \$48.50 each per annum.

60 candle power lamps at \$23.50 each per annum.

40 candle power lamps at \$18.00 each per annum.

1200 candle power arc lights at \$90.00 each per annum.

At any time upon request of the City, the Company will quote prices for lamps of other capacities than those above specified, such prices to be proportional to the foregoing prices; and if the City desires any lights of such different capacities and is unable to agree with the Company as to the proportional price to be paid for the same, any difference of opinion shall be settled by a board of arbitration to be chosen as provided below in the paragraph entitled "Improved Methods." Any such light shall be included in the computation of the minimum as above provided.

HOURS OF LIGHTING

The lamps are to be kept lighted continuously every night, and shall be started within thirty minutes after sunset and kept in operation until at least thirty minutes before sunrise, it being understood that when weather conditions require, they shall be turned on and kept lighted as much longer as may be necessary in order to furnish suitable illumination of the streets.

TYPE OF LAMP

The lamps to be furnished under this contract are commonly known as series, street lighting, lamps, and shall be of the latest improved type for said purpose. They shall be renewed by the Company whenever burned out, broken, or reduced in efficiency to a point of eighty per cent. of rated candle power. The shades, brackets and other devices in connection with the lamps shall be of suitable type to the satisfaction of the City or its representatives. Lamps shall be suspended at such height and at such points over the highway as the City may determine, so far as practicable.

SAFETY APPARATUS

The lamps, wires and all accessories shall be thoroughly insulated and so placed and cared for as not to expose the public or property to danger, or necessarily interfere with the fire alarm or fire department. If any repairs or renewals which may be required for any of the apparatus shall be neglected by the Company, they shall be furnished within twenty-four hours after notice from the City: and if not so furnished shall be made by the City at the expense of the Company, to be deducted from any amount due or to become due under this contract.

TESTS

It is understood and agreed that the City may make tests at any time to determine the capacity, candle power or condition of the lamps, and that the Company shall cooperate in every particular to furnish facilities for said purposes.

INDEMNITY

The Company shall indemnify and save harmless the City from any loss, cost or damage which it may suffer by reason of any suits for liability for damage to persons or property resulting from the installation, operation or management by the Company of said lamps or accessories, or the lines and apparatus used in connection therewith, unless such damage shall result from the negligence of the City or its employees.

PATROL AND ALLOWANCES

The City agrees that in the district covered by its police patrol it will have its patrolmen inspect the operation of the lights and report through the police department all cases of failure of lamps to operate. In outlying districts not covered by the police patrol, the Company agrees that in order to provide reliable service it will maintain a reasonable system of patrol.

The Company shall make allowance to the City for any

time during which said lamps or any of the same shall not be kept in operation for any reason, the allowance to be based *pro rata* upon the prices herein provided. In case the parties shall be unable to agree as to the amount of allowance, it shall be referred to a competent disinterested third party to be mutually agreed upon, and in case the parties are unable to agree upon a referee within five days after any such question shall arise, the Judge of the Police Court for the City of Laconia shall select a referee. The decision of said referee shall be final and binding on both parties.

ADDITIONAL LIGHTS

The Company will furnish any additional lights of the sizes herein defined for the same prices as specified above, which shall be furnished and maintain whenever located by the City for the remaining period of the contract, provided, such additional lights are within an average distance of five hundred (500) feet of the then existing pole line; if such additional lights are more than an average of five hundred (500) feet from the then existing pole line, then the City shall pay for the expense of the extension of the line over and in excess of said average of five hundred feet; the City however shall not be obliged to pay any part of the expense of any extension of then existing pole lines, when such extension is used by the Company for commercial purposes, and in the event of any extension towards the expense of which the City has made contribution, as above provided, being subsequently used for commercial purposes, then the Company shall pay back to the City the amount of such contribution, upon all the terms and conditions as herein provided.

IMPROVED METHODS

The Company further agrees that after three years from the date of this contract, if it shall be found that cheaper methods of electric lighting are practicable, it will give to said City the benefit of said cheaper methods, provided

said City will allow as a proper part of the cost, the expense, if any, of making the change to said possible cheaper methods, so far as the cost of change effects the cost to the said Company of doing the business. If the parties hereto cannot agree as to the allowance to be made on account of said cheaper methods, the prices to be paid by the City to the Company after such changes are made shall be determined as follows: The Board of Public Works of the City shall appoint a referee, the Company shall appoint a referee, and the two so chosen shall select a third, who shall be Chairman. The decision of the three referees shall be final, and the contract shall thereafter be modified accordingly.

AGREEMENT OF THE CITY

In consideration of the foregoing agreements of the Company, the City agrees that it will, subject to any and all rights it has or may have under any of the terms and conditions of this agreement, the right of the City to change the candle power of lights as above provided, use all the above described lamps for street lighting during said period of ten years, and will pay the Company for said lighting service for and during said period at the rates above specified for the number of lamps above scheduled, and at the same rate for all additional lamps which may be installed as above provided. Bills to be paid monthly for the service of the preceding month.

BEGINNING SERVICE

The Company agrees to commence immediately to install the lights provided for by this contract, and agrees that it will complete the work as soon as may be accomplished by reasonable diligence, and in any event not later than November 1, 1915. It further agrees that it will make the changes in such manner as will permit the City to have the benefit of additional lights at the earliest possible date.

DISCOUNT OF LIGHTING OF CITY BUILDINGS

The Company also agrees that on the lighting of the City Stables at Laconia and Lakeport; Fire Stations at Laconia and Lakeport; Police Stations at Laconia and Lakeport; City Offices at Laconia; Police Office at Lakeport; Harvard Street School; Gilford Avenue School; Batchelder Street School; Bowman Street School; Laconia High School; Mechanic Street School; Washington Street School; Library at Laconia; Library at Lakeport; Fire Station at Weirs; City Clock; Toilet at Weirs, and the lighting of any other buildings or parts of buildings or for any lighting or power excepting street lighting, hereafter used for City purposes during the life of this contract, they will grant an additional discount of 10% in excess of the regular discounts now granted both on gas and electricity used in the above buildings.

POLES AND ARMS

All poles shall be round, of selected quality, chestnut, white oak, cement, cedar or iron, to be straight, and the wooden poles to be not less than ten inches in diameter at six feet from the butt end and not less than seven inches in diameter at the top, the same to be approved by the Committee on Street Lighting of said City as conforming to said requirements, to be located and set under their direction and with their approval, and to be kept painted of a color designated and approved by them. And said City may use any one of the cross arms on each of said poles for fire alarm or other municipal wires free of cost, the proper location of said wires on any pole to be agreed upon by said Company and the Superintendent of the Fire Alarm and the Chief of the Fire Department of said City. Arms are to be such as will produce the most satisfactory lighting conditions, subject to the approval of the Committee on Street Lighting of said City, and also subject to the approval of any liability insurance company which may insure said Laconia Gas & Electric Company.

PAYMENTS

All bills to be rendered the City the first day of each month, payment of same to be made within ten days after the regular meeting of the City Council next succeeding the rendering of such bills.

SIZE OF LIGHTS

The City shall notify the Company at the latest by August 1st, 1915, the number of lights of different size that they wish placed and the location.

IN WITNESS WHEREOF said City of Laconia by its Mayor duly authorized and said Laconia Gas & Electric Company by its Treasurer duly authorized have hereto set their hands and seals as the act of said City and said Laconia Gas & Electric Company on the day and year first above written.

LACONIA GAS & ELECTRIC COMPANY

By G. M. Rossman, Treasurer.

City of Laconia

A true copy, attest:

Earl Flanders, City Clerk.

LACONIA, NEW HAMPSHIRE.

July Second, Nineteen Fifteen.

*Hon. George P. Munsey,
Laconia, N. H.*

Dear Sir:

As part of the agreement made this day between the City of Laconia and the Laconia Gas & Electric Company, it is hereby agreed that there shall be an extra 10% discount on the City buildings, library, etc., as per contract dated July 2, 1915, in addition to the 10% granted in the contract, also that beginning August 1, 1915, there shall be a reduction in the price of gas charged consumers from \$1.80 to \$1.75 per thousand feet, and it is further agreed that the schedule of rates for street lighting which obtained under the contract between said City and said Company which has resently terminated, shall continue and be in force until the service provided for in the new contract shall have been completely installed; and it is further agreed that the Company will furnish to said City eight (8) sixty (60) candle power lamps to be distributed at such places in said City as the Committee on Street Lighting shall designate, excepting municipal buildings, on fixtures provided by the City, the Company to furnish lamps and current for the same free of cost during the life of this contract.

Very truly yours,

LACONIA GAS & ELECTRIC CO.

By G. M. Rossman, Treasurer.

As the city is entitled to a discount for all lights reported out, citizens will confer a favor by notifying the city clerk or police department of any lights discovered out.

LEGISLATIVE ACTS.

STATE OF NEW HAMPSHIRE.

In the year of our Lord one thousand nine hundred and fifteen.

AN ACT relating to the laying out of highways in the City of Laconia.

Be it enacted by the Senate and House of Representatives in General Court convened:

SECTION 1. Any person, firm, or corporation proposing to cut up into lots any tract of land in the city of Laconia for the purpose of selling the same, either publicly or privately, shall before such sale prepare and submit a plan of said tract of land to the city engineer of the city of Laconia. Such plan shall plainly show the number, size, and location of lots, the location and width of all proposed highways, and the location of the tract of land with reference to an existing public highway. The location of said tract of land shall also be plainly marked on the ground by suitable stakes. If the plan shall meet with the approval of the said city engineer, it shall be his duty to plainly mark the plan "Approved", so that intending purchasers of lots shall have knowledge of the said approval. In case the city engineer shall disapprove of the proposed plan, he shall mark said plan "Disapproved" and file a statement of the reasons of such disapproval with the city clerk for the use of the board of mayor and city councils of the said city, and shall transmit a like statement to the owner of the land. In such case the owner shall submit a new plan in accordance with the requirements of the city engineer, as thus set forth, which he shall mark "Approved" as hereinbefore provided.

SECT. 2. No such highway shall be laid out by the board of mayor and city councils of the said city of Laconia until such plan has been submitted to said city engineer and approved by him as provided in section 1; but it shall not be obligatory upon the said board of mayor and city councils to lay out any proposed highway because of the approval of any such plan by the said city engineer.

SECT. 3. In case the board of mayor and city councils refuse to accept and lay out any such highway, appeal may be taken to the superior court in the same manner as is now provided by law in the laying out of highways.

SECT. 4. This act shall take effect upon its passage.

ARTHUR P. MORRILL,

Speaker pro tem. of the House of Representatives.

GEORGE I. HASELTON,

President of the Senate.

Approved April 21, 1915.

ROLLAND H. SPAULDING,

Governor.

STATE OF NEW HAMPSHIRE.

In the year of our Lord one thousand nine hundred and fifteen.

AN ACT to establish a school district in the City of Laconia.

Be it enacted by the Senate and House of Representatives in General Court convened:

SECTION 1. There is hereby created and established within the limits of the city of Laconia a single school district which shall be called the Laconia School District.

SECT. 2. Said district shall be subject to all the laws now existing or which may be hereafter enacted pertaining to town school districts.

SECT. 3. The board of education, as now constituted, shall continue in office until their respective terms of office shall expire.

SECT. 4. All acts and parts of acts inconsistent with this act are hereby repealed, and this act shall take effect upon its passage.

EDWIN C. BEAN,
Speaker of the House of Representatives.

GEORGE I. HASELTON,
President of the Senate.

Approved March 31, 1915.

ROLLAND H. SPAULDING,
Governor.

Department Reports

SCHOOL DEPARTMENT.

REPORT OF THE BOARD OF EDUCATION.

Citizens of Laconia:

A year ago your school board took considerable pains in their annual report of the public schools of this city, to acquaint you with conditions of your schools, their needs and requirements.

There is need, apparently, of again calling your attention to these needs and requirements. Each succeeding year finds your high school building less capable of filling the needs of a modern high school building than the year previous, and at the present time, these needs and glaring deficiencies are more emphatic than ever.

Nothing has been done, nor can be done in the present instance, to satisfy the cry for any industrial training in the present building. Unnecessary time is spent in climbing stairs and in adjusting the students and the teaching force to seemingly unnecessary inconveniences. We have an anomalous condition of ten high school teachers, and only eight rooms for school purposes; this means that double recitations must be conducted simultaneously in some room each day, while studying must be done in rooms where recitations are constantly going on.

Your children are the prime losers, and the teachers must be satisfied as best they can in being obliged to conduct the important business of fitting youth with a mental equipment for life, by methods that no modern business man can afford to be contented with.

We assure you that these are no idle words, and we ask

that at the coming school meeting of the school district, which by an act of the last legislature the city of Laconia now is, to see to it that something material be done, that we may in the shortest possible time be able to do justice to our growing family of high school students.

Owing partly to increase in number of scholars in this city, and partly to be able to more segregate into one school the children who lagged in the grades, we have acted upon the strong recommendation of State Superintendent of Public Instruction, Mr. H. C. Morrison, and established two ungraded schools, one at each end of the city. These rooms for many reasons are grossly unfit for school purposes, but under the circumstances this was our only alternative, and this only accomplished by materially increasing the cost of caring for our schools.

The school building at the Oaks, and at Weirs have been made more like school houses by having general repairs made upon them. These school-rooms now have a quite modern appearance, and are supplied with jacketed stoves. The grounds, we are sorry to say, have not been improved; the same need of a few native trees and shrubbery exists now as it did a year ago. We were hoping that adjacent people with local pride would supply this deficiency by beautifying these grounds in the way suggested, and make the premises from every point of view more attractive. Especially do we appeal to all people living near school houses to use their influence to establish a regard for these structures as it is incumbent upon them to respect the buildings which constitute homes for the children when not in school. Again, if these buildings and grounds are kept in an inviting condition there is always a natural respect these school homes of children will command and receive, which will not come from any other reason. Every little community needs a social center and the school should be that social center and there should be held social entertainments, neighborhood meetings, literary discussions, children's games and many other affairs that are

helpful to the parents many times, as the lessons the children are obliged to learn are to them.

Thus, a school thought, a school spirit and a school enthusiasm will result where once a dilapidated building stood in a bleak and neglected shape, as a shabby monument of the shabbiness of people.

School houses and school rooms must be supplied that command respect from their own respectability, if we have education and places of education respected. Such things cost money and that is expected, but money is not the dearest thing on earth, though, when properly expended it will produce that which is very dear, indeed. Our people are proverbially liberal and all are interested in our children. Nothing is too good for them at their parental home. Then let there be consistency in supplying and furnishing their school-homes. Let us have trees, pictures, books, comfortable seats and tidy floors. Don't ask your children to sit and work the most important organs of their bodies, where you would not sit yourself, and do not ask the privilege to send your child to instructors that have not the mental and educational equipment to do so properly. Remember that good teachers cost more than poor teachers, and they are illy paid, at that. Let us all pronounce for good schools and let us all work together to that end, and let us not forget that teachers have to live and should live well, if they are to do their work well.

A. H. HARRIMAN,

For the School Board.

SUPERINTENDENT'S REPORT.

To the Board of Education:

In presenting my nineteenth annual report I am following a custom established for some years, of stating somewhat in detail the several changes that have occurred in our teaching force during the year as a matter of historical moment.

The primary school established at Batchelder Street when that school was opened some thirteen years ago was moved to the Old Willard and there remained until last June when it was abolished with the intent that such pupils as would naturally attend that school could be sent either to Gilford Avenue or Bowman Street. Room had to be found somewhere for an eighth grade formerly at Academy Street, and Batchelder Street alone was available. At the beginning of the year, September last, Miss Margaret C. O'Shea formerly of Washington Street school was transferred to Batchelder Street eighth grade; the place left vacant in the former school was taken by Miss Jones and Miss Sanders moved along into Miss Jones' position. Miss Keefe of Dover took Miss Sanders' place.

At Gilford Avenue with the close of the school year in June a complete change of teachers took place. Miss Duke went to Harvard Street and Miss Fisk of the Old Willard School took her place, while Miss Averill of Barre, Vermont, took charge of grade one. This school has become one of the smallest in the city and is now reduced to four grades under the instruction of only two teachers.

At Mechanic Street in place of Misses Sargent, Laffee and Giff, Misses Gooch of Waterville, Maine, Miss Shattuck of Pepperell, Mass., and Miss Marston have been employed.

At the White Oaks school, Miss Julia G. Bradbury of Berlin, N. H., is teacher.

The teachers of the ungraded special schools are Miss Mann at Lakeport, and Miss Kimball at Laconia. These teachers were secured for their interest and training in these special fields.

The work of repairs recommended in my last report for the White Oaks School have been very satisfactorily done under the efficient direction of your president. The additions made have wrought a complete change in the out-buildings, forming a connecting room with the school house and wood shed with two closets and a wood room. The stove has been jacketed and a new floor laid. The exterior of the building has received a coat of paint.

At Batchelder Street, new concrete walks have been laid and cement steps extending down to the crossing leading to the sidewalk on the Pine street side.

At the High school building, the chemical laboratory has been moved from the basement where it has always been located, to a room taken from the High school hall made by a partition extending quite across. This makes a very good and sufficiently large room where all apparatus and supplies are assembled to the great convenience of instructor and pupils. Of course this has so far depleted the size of the main room that Chapel exercises under present crowded conditions seemd unjustifiable to some. The room so long used as a place for the drawing classes was made a part of the main hall adding somewhat to its capacity and admitting light which was so essential.

It can be seen that while the department of science has been benefitted, the drawing teacher has been deprived of all place for her work and is compelled to resort to the upper stair landing as place of refuge.

The superintendent had taken an inventory of all books used in the graded schools of the city for several reasons; first, that a complete uniformity of text books may be secured as it has not always been a good business propo-

sition to introduce into a school system a particular kind of book until it had been tried and found valuable or otherwise; if found good then the book could be introduced into other schools. If on the contrary, a book proved unworthy of general adoption, it could be discarded and no more purchased. This procedure has resulted in some slight difference of reading books in some schools, but all books of unusual merit are universally used. Secondly, to disprove any claim of insufficient reading matter, and third, that a list might be open for inspection by your Board at its convenience. It is impossible to publish such a list in this report as it would comprise pages for its display, but my note book contains the titles, numbers and conditions of all the books. I do wish to say that the first grade at Gilford Avenue, which is a typical school, has on its shelves, ten different primers, 16 copies each, 6 different first readers and 5 second readers, or 21 different readers, besides single to two or three copies of ten primers, six first readers, eight second readers and twenty books of stories.

At Washington Street, Miss Kennedy has six sets of primers, ten sets of first readers and five sets of second readers, Miss Keefe has twelve sets of readers for her pupils.

These are merely typical cases and it does not include geographies, language books, arithmetics, spellers, etc.

All the school rooms are hung with pictures of artistic merit and a display of school work can always be seen upon the walls.

Last spring an attempt was made upon the part of your superintendent in union with the Parent-Teachers association to start school gardens at Opechee Park.

I confess that the enterprise was an undertaking that caused me a great deal of thought and study. Finally a scheme was devised whereby eighty gardens ten by twenty feet in area were laid out with proper pathways and bounds. The gardens were allotted to the children by

number. Two pupils were assigned to a garden and a drawing of numbers was held, followed a few days later by the planting. All went very well up this point, when all nature seemed to conspire against the success of the movement as for several weeks after the seed was placed in the ground the soil was so dry, little of the seed came up. This period was followed by the wettest summer season known for many years and water stood for days on many of the gardens, which were practically ruined. This unhappy condition of affairs was almost disastrous to the success of the gardens, and discouraged the children.

The assignment of gardens needs revision another year.

The pupils should not be scattered about the field, but each teacher's pupils should be by themselves or in other words the gardens should be allotted to schools rather than pupils. This forms family groups so to speak. A school can be kept intact for planting and cultivation and harvest. Organization can be efficient when made by schools and the playground directors' efforts will be concentrated upon a small number of larger groups whose organization will have been effected before the summer vacation begins. I have every reason to believe from the past experience of pupils and teachers that with the average season and the changes in the organization I have suggested the work of the school gardens for another year will be highly successful.

After an average membership in High school of something like 175 pupils an increase of one hundred pupils at once without increased facilities of caring for them placed a burden upon the management of the school almost beyond endurance. This is what happened last September at the beginning of the new school year. New teachers had to be secured. Every room in the building was overcrowded and it was only after several weeks that conditions had adjusted themselves to a tolerable state of satisfaction.

Another year will see a greater congestion of numbers and still more the year following.

If the people of this city wish their children to be submitted to this intolerable condition of things it passes my understanding.

I have recommended year after year the construction of a new High School building but nothing is done and nothing seems likely to be done till the fathers and mothers of these children that are being packed so unwisely but necessarily, rise and immediately demand more room for their schools. The demands upon the strength of our High school scholars are sufficient under the most favorable circumstances but to have them further burdened by physical conditions in the way of narrow quarters, poor light and lack of ventilation is an additional drain upon their well being.

The first business of the public school is to teach the child to live in the world in which he finds himself, to understand his share of it, and to get a good start in adjusting himself to it. There are several things about the old fashioned school which must be changed if they are to reflect the needs of modern society; first, the subject matter, second, the way the teacher handles it, and third, the way the pupils handle it.

The subject matter will not be altered as to name. Reading, writing, arithmetic and geography will always be needed, but their substance will be greatly altered and added to. In the first place, modern society realizes that the care and growth of the body are just as important as the development of the mind; more so, for the latter is dependent upon the former, as schools will become places for children to learn to live physically as well as mentally.

We need to know how to read and to write so that we may be able to do the simplest daily actions, to keep in touch with people and events we cannot see, and in fact do almost everything connected with our occupations.

But schools are inclined to teach reading and writing as if they were ends in themselves, simply luxuries to be acquired by pupils for their private edification. The same

thing is true of geography. Now our world has been so tremendously enlarged and complicated, our horizon so widened and our sympathies so stimulated by the changes of modern life, that a school curriculum which does not show this growth can be only partially successful. The subject matter of the school-room must be enlarged to take in the new elements and needs of society. This can be done without overburdening the pupils by effecting the necessary changes on the part of the teacher and pupil in the way they handle it.

When we consider the facts connected with teaching geography and history of our country or any history for that matter as they embrace the entire range of human knowledge and endeavor, it seems an altogether stupendous task for teachers to expect their classes to read and recite facts from text books. But what must they do? It seems to me that it is but a very few of the facts as such that are valuable but the meaning of those facts is the object sought. The teacher's business is to develop the thinking and reasoning powers in the pupil and that the reading, writing and arithmetic are only means to an end. The child should become an active inquirer and questioner, and the teacher then becomes the one who sees that the pupil gets the proper material and that it is used to produce thought and power to draw conclusions.

With the above conception of modern elementary education in view, the pupil must have the benefit of modern sanitary buildings and clean surroundings, he must have proper opportunity for physical exercise and out-of-door air. The course of study should direct to some extent at least suitable games and plays for the children. School garden correlates readily with nature work. The course of study lately revised has aimed to direct the teacher along these lines as well as to break up if possible the cut and dried text book work in history and geography.

In accordance with the rules of your Board, fire drills have been practiced twice a month in all the schools, and

a good degree of speed has been gained in leaving the buildings. There are some changes necessary in Bowman and Harvard Street Schools, as the doors to the several school rooms opening into the halls open inward instead of outward from the several rooms as well.

Engineer French has kindly examined all the fire escapes and reports as follows:

LACONIA, N. H., Dec. 21, 1915.

Mr. J. H. Blaisdell,
Superintendent of Schools,
Laconia, N. H.

Dear sir:

In accordance with your request, I have examined the several school buildings of the City of Laconia and inspected the fire escapes on the same with regard to their strength and accessibility.

In general, I find the outside iron stairs of good design and well constructed. That they are in good repair and probably of sufficient strength to hold any load that would come upon them.

High School Building.—In my opinion the upper landings of both outside stairs of this building are not securely braced, and I would recommend that they be reinforced by two 2-inch angle iron braces to each landing. It would seem that folding or removable steps should be placed inside under the several windows opening onto outside landings, to enable pupils to readily reach these landings.

Bowman Street Building.—There is one outside stairway on this building leading to one upper schoolroom. In my opinion this is not adequate, and that a similar stairway should be provided for the other upstairs room. The wire screens over windows opening onto fire escapes should be removed.

Harvard Street Building.—There is only one outside stairway on this building, which is entirely inadequate, and a similar stairway should be installed leading to the

other upper school room. Wire screens should be removed from windows opening onto escape landings.

Gilford Avenue Building.—The one outside stairway on this building opening into both upper rooms would seem to be adequate for the number of pupils now stationed in this building.

The screens over the windows opening onto the landings are a nuisance, and destroy almost entirely the usefulness of this stairway. They should be removed at once.

Batchelder Street, Washington Street, Mechanic Street Buildings.—These modern buildings are much better arranged than the others mentioned, and the fire risk is much less, but they are provided with only one outside stairway each, opening into only one upper room, whereas there should be two stairways on each building, one for each upper room.

The suggestion in regard to inside steps leading to landings mentioned in the case of the High School building applies to all the other buildings examined.

It may not be out of place for me to speak of the location of the boiler and its arrangement at the Harvard Street building. As now arranged, it seems that if great care is not taken it might start a fire at any time, and with the best of handling it is a great risk, so much so that I think the matter ought to be investigated and steps taken to make the building more safe.

General.—The outside stairways or fire escapes on the several school buildings have been well cared for, and are in good condition now, but nearly all of them should be scraped and painted in the near future.

In several cases where there are long flights of steps, a brace should be attached between them and the building to prevent vibration and swaying, and to materially strengthen the structures.

Of course all doors through which pupils must pass in a hurry should open outward, and all windows through

which they might have to pass should be easy to open and unincumbered, both inside and outside.

Snow and ice should be removed from outside stairways whenever it accumulates.

Yours respectfully,

CHAS. A. FRENCH,

City Engineer.

His recommendations have been followed so far as removing screens and other minor matters that the superintendent could easily do. I would also say that Chief Spring has examined the fire escapes at the High School building, and pronounced them satisfactory to him.

RECOMMENDATIONS.

I recommend the immediate construction of a High School building.

I recommend a careful consideration of Engineer French's report in regard to our fire escapes.

I would call the attention of the Board to the need of adjustable seats and desks in a number of our schools.

I would call especial attention to the Domestic Science course in the High school, as to its success and value under the present adverse conditions. The classes are very small; the girls are obliged to walk to their recitations in all weather at Gilford avenue, and I am confident that if we cannot very soon get this department into a high school building like other departments, it will fall away as the Greek did, and disappear for lack of numbers. At the present time we have eight freshmen, five sophomores and three juniors taking the course.

I recommend the erection of raised seats in the laboratory for the better accommodation of classes in Physics. By the present arrangement the instructor cannot properly be seen by his class while conducting experiments.

I recommend such change in the flag pole at the High School building that it will be possible in the future to display the flag in accordance with law, and that halyards be put in the pole at Bowman street.

In closing I would say that Laconia has a very efficient body of teachers. Their services should be retained, and under the new rules of your Board, with an annual increase of salary for grade school teachers, a good degree of permanence should be secured.

Very respectfully submitted,

J. H. BLAISDELL, *Superintendent.*

REPORT OF PRINCIPAL OF THE HIGH SCHOOL.

Mr. J. H. Blaisdell, Superintendent of Schools:

I have the honor to submit my sixth annual report as principal of Laconia High School.

It is chiefly concerned with the progress of the school under the new regime as recommended by the State Department and adopted by the Laconia Board of Education, as well as certain conditions of environment by which the scheme in its operation is affected.

Last spring, Mr. Morrison, State Superintendent, after inspecting the Laconia system of public schools, advised the abolition of the ninth grades.

His recommendation was based upon the argument that in public school systems of the present day a ninth grade is an antiquated feature and an unnecessary burden to the taxpayer. Furthermore, Laconia was one of the very few communities in the State where nine grades below the high school were being maintained. The ninth grades throughout the city, would, therefore, better be discontinued.

During the summer our board of education took action upon the matter and voted to adopt the plan of Mr. Morrison. Pupils graduating from the several ninth grades were to be admitted directly to the sophomore class without having done the work of the freshman year. Those promoted from the eighth grades were to become freshmen in High School.

Many in the community viewed the passing of the ninth grade with regret and misgiving. It was felt that the school children would lose by the change a very valuable period of preparation, that they would enter upon their

high school course too young and immature to do effective work there, that those entering as sophomores would lose the important training of the first year and thus be handicapped throughout their entire course. But whether the new policy gave satisfaction or dissatisfaction, official action had committed us to it and, when school opened in September, we were confronted with a perplexing situation. Many problems had to be solved without unnecessary loss of time, many matters called for immediate adjustment. How to manage affairs without undue friction and confusion taxed our powers to the limit. Certain necessary things have been done, other important things remain, but cannot be accomplished under present conditions.

At the beginning of the fall term, 70 ninth grade pupils entered as sophomores, making a total of 115 for the second year class alone. There were 91 entering as freshmen. The advent of these two classes swelled our total to 291, the largest membership Laconia High School has ever known, and over 100 more than its maximum enrollment of former years. To handle a school of this size, the teaching force of last year was insufficient, and three new teachers were added to our faculty, which now numbers eleven regular and two special teachers. As it seems probable that there will be over 300 in school next year, we shall have to get still another teacher.

It has been very difficult to arrange a satisfactory schedule of recitations for the school this year on account of changed conditions, but one has finally been made which works without conflictions. However, it is practically impossible to construct a schedule which will accommodate the pupils from The Weirs because of transportation conditions. During the winter season electric car service to The Weirs is discontinued and children from that section have to make use of the B. & M. trains, which arrive here from the north after school has begun in the morning and leave northward bound before the close of school in the

afternoon. Thus, students lose time at both ends of the day and this loss is seriously affecting their standing. In justice to The Weirs pupils I wish a more satisfactory plan of transportation could be devised.

School has been in session for its first half year and it is now possible to form some opinion as to the manner in which the new system is working out. So far as the students themselves are concerned, this is a favorable year to put it into operation, because those entering the school this year seem to be of greater than average ability. Inspection and the reports of the several teachers indicate that, for the most part, the new pupils are doing well the work assigned them and that, in those classes, there is a minimum of failures. Of course we shall not be able to size up the situation as accurately now as at the close of the school year when all the records and reports are in. To some extent conditions call for adaptation of work and abridgment of subjects, which has not been necessary in former years, particularly in the case of the freshmen where the state of greatest immaturity is naturally to be found. Some pupils of both classes have come into high school too young and cannot be expected to do the work of students older and more mature.

The sophomores are reciting in five divisions as two separate classes, although they are covering practically the same ground and doing the same amount and grade of work. The policy of keeping the two factions of this class apart will be continued as far as practicable throughout their entire course, for they are not on equal terms. The ninth-grade sophomores, so called, in skipping the freshman year, are undoubtedly placed at a disadvantage hard to overcome, in that they have lost the opportunity to get Ancient History and have done considerably less than the required amount of work in Algebra, English and Latin. This work cannot easily be made up and the loss of the first year's drill in these subjects is a serious one. And so there are practically five classes in school this year and

this condition must continue until the present sophomore class graduates. Until then the school will be in a period of transition. After that we can expect that some measure of readjustment will have been reached.

The most serious obstacle to the successful working out of Mr. Morrison's plan is the lack in Laconia of a suitable building in which to make it operative. We are expected to carry on the functions of an approved school in a building which has for years been incommodious and inadequate. The problem is to find working room for nearly 300 students in quarters accommodated only to about 175. No satisfactory solution can be had so long as the school must be confined to this building, for it is very difficult to carry on the exacting work of our present courses and meet the requirements demanded of us by the State under the conditions which affect us.

The congestion is so bad that a quiet study room, with the proper atmosphere for preparing lessons is now quite out of the question. Every room is full to overflowing, every nook in the building is being utilized for one feature or another of the work. Such an environment is very trying to teachers and pupils alike, and I fear that not a few, being forced to work under such miserable conditions of foul air, poor light and overcrowding, will break down under the strain of it.

Our assembly hall on the top floor is no longer available for gathering the school together, for the area of its floor space has been greatly diminished by the running of a partition across the northern end of the hall to improve laboratory facilities, and by the pressing need of an extra class room. It is considered too dangerous in case of fire to crowd the school into so small a space, and chapel exercises have been temporarily suspended.

The commercial department, which has also been on the top floor, had to give way to the demand for a more convenient laboratory, and was moved down to the second floor into rooms 10 and 12. Now the work of a business

course, if it is to count for anything, should be conducted in quarters properly fitted out, and apart by themselves. The work of other courses is also being done in these rooms, and one of them is used for study purposes besides. You cannot get good results under such conditions, and I question the advisability of maintaining the business course in its present environment.

The course in domestic arts is not working out in a fashion entirely satisfactory. It is not a popular course such as was believed it would be when it was established, for only a very small percentage of the girls in school choose that course. There are only 16 out of 140 at present pursuing it. Much time is wasted in getting back and forth, for the work is done at the Gilford Avenue building, and it takes the girls about 40 minutes to walk up there and return. Forty minutes every day wasted in transit. To maintain this course it must cost the city over \$1000 yearly. Do the results obtained warrant the expense and the loss of time incurred? I doubt it. If these practical courses could have proper quarters in a modern, well-equipped building, where the work could be thoroughly organized and conducted on a scientific basis, they would be of great value to the pupils who desire that sort of training.

At present it would be much better, in my opinion, not to dissipate our energies and waste our substance in costly makeshifts, for results are too meagre in proportion to the outlay. Give us proper facilities and we can produce results of the right sort, but we should not be expected to attain the impossible.

I should like to see in this school a thorough course of instruction in mechanical drawing. There is no chance to do it here. Indeed, there is no room in the building, whatever, which can be used for drawing, and this work has to be done anywhere and everywhere as convenience affords.

And so, amid surroundings unsatisfactory in the highest

degree, the various activities of the high school are going on. We are making progress, surprisingly good when one considers the conditions under which we have to work, but one makeshift after another has been resorted to that courses could be put into operation according to specifications. We seem now to have reached the limit of expedients and the city will have to provide more room for the maintenance of its High school, and that, too, without delay. The need is urgent.

In closing I wish to express my grateful acknowledgement to those who have given us unflinching support in the discharge of our duties. Especially appreciated is the great kindness of Mr. O. S. Davis, our city librarian, and his corps of assistants for their service to our students in providing them with material for their work.

Respectfully submitted,

VERNE M. WHITMAN, *Principal.*

REPORT OF TRUANT OFFICER.

J. H. Blaisdell, Superintendent of Schools:

DEAR SIR—I have the honor to present herewith my annual report in tabulated form of all work performed by me for the year ending, January 31, 1916.

Resident school children in the city between five and sixteen years:

	Boys.	GIRLS.	TOTAL.
Ward 1	100	75	175
Ward 2	212	212	424
Ward 3	25	20	45
Ward 4	155	151	306
Ward 5	187	210	397
Ward 6	197	181	378
	876	849	1725
Number between the ages of 10 and 16 not able to read and write English			35
Number between the ages of 5 and 8 who do not regularly attend school			35
Number between the ages of 8 and 14 who do not attend school on account of illness			6
Number between the ages of 14 and 16 who do not attend school on account of holding employment certificate			50
Number born in New Hampshire			1338
Elsewhere			155
Foreign born			232
			1725

Number at St. John Parochial school	148
Number at Sacred Heart school	540
Visits to the schools	4321
Truancy determined by investigation	22
Put into school by officer	58
Furnished with shoes and clothing	60

I am often asked, "How are my children getting along in school? I want them to pass, I don't see why they don't." How many mothers go and visit the schools to see how their children are getting along? Very few of them do.

The department cards show how they stand and yet the parent stays at home and expects the teacher with 40 or 50 pupils to sit down and write the parent how his children are getting along. Now, mothers, why don't you go and call at the school and see for yourselves? The teachers are always glad to have the parents call on them. Don't wait for the teacher to write to you, but help her by visiting the school.

We have had too many half days' absences and tardy marks this year; many have been sent on errands and made late and allowed to stay at home for a half day and thus a half day has been lost, and in a little while this continually happening amounts to a week and the parent wonders why the child is backward in his studies and perhaps fails to pass. I only wish this could be stopped. I can see only one way that it can be done and that is for you mothers to do it, if you can. If you will only try you can help very much.

I have found quite a lot of poor children this year, but have managed to keep them in school by the help of the Women's Sewing Circle and others who have sent in clothing. Shoes are the hardest to get. If we could have money to spend to get them with, it would help us and prevent many children from staying at home and being out of school so much.

It is with pleasure that I have the opportunity of thanking the Superintendent and members of the schoolboard, the teachers and the sisters of both parochial schools for the kindness and cooperation during the last year.

Respectfully submitted,

H. E. ROWEN,

Truant Officer.

REPORT OF DRAWING TEACHER.

Mr. J. H. Blaisdell, Superintendent of Schools:

I herewith submit the report of my work since I entered upon it last September.

We may consider the purpose of the teaching of drawing in the public schools as threefold: 1, The cultivation of the ability to observe closely and to represent truthfully the appearance of objects. 2, The training of the mind and of the hand to accurate and intelligent workmanship in the construction of objects. 3, The developement of an appreciation of beauty in nature and in art. It is evident that in the time given to drawing, the work of any one year cannot go far toward the accomplishment of this aim, yet if the course is systematically carried out from grade to grade, and if the knowledge gained one year in any branch of drawing, whether representation, design or construction, is supplemented the next, by more definite and advanced knowledge of the same kind, the work cannot fail of some practical result. It is also evident that the lessons should be planned, as in any other subject taught in the public schools, to suit the capacity and the needs of the average child, rather than of the one especially gifted. And the same principles that underlie the teaching of other branches should also be applied to the teaching of drawing. The subject should be made so simple and so definite that every child may know at the beginning of a lesson what is expected of him, and at its close whether he has succeeded or failed.

It is needless to say that the work in the high school has been carried on at a great disadvantage, because of the want of proper light, suitable desks on which to use draw-

ing boards, and opportunity for placing models from which to draw before the classes. The work has for these reasons been very elementary in character, and must continue to be so under present conditions. And yet I believe that drawing should be more generally elected in the high school. Forty minutes a week, or less than twenty-four hours of the school year, is very little time to take from the required school work, and yet in that little time the mechanical classes may be given some slight preparation for work along the same lines in the colleges and technical schools and a knowledge of working drawings and projection which cannot fail to be of use in almost any occupation. The free-hand classes may solve practical problems in design and the theory of color, and in studying the representation of nature and of common objects, may be shown the way to the enjoyment of many things which might otherwise pass unnoticed. Of course, little of actual results in either line of work can be obtained in such limited time, but both branches are and should be regarded as of much value to the average boy or girl, whether their study is continued in other schools or not.

In conclusion, I wish to express my appreciation of your liberality in the matter of supplies, and of your support and interest. I wish also to thank the regular teachers for their hearty cooperation, for it is to them that a special teacher must look almost wholly for results.

Respectfully submitted,

JOSEPHINE EMERY.

PLAY GROUND REPORT.

To His Honor the Mayor, and Gentlemen of the Council:

The Laconia Parent-Teacher Association takes pleasure in reporting the work done at the Laconia playgrounds during the summers of 1914-15.

In the spring of 1914 we petitioned the city government for an appropriation with which to establish and maintain a play ground. In July we were notified that our petition had been granted, and we were to receive three hundred dollars for this work.

We immediately communicated with the Young Men's Christian Association College, Springfield, Mass., and secured Mr. Anthony Sannella as director of the playgrounds, and as assistant we engaged Miss Minnie Shattuck of Laconia.

After providing for the salaries of the directors we had seventy-five dollars with which to purchase equipment.

The playground was formally opened July 15, 1914, and met with immediate favor not only with the boys and girls, but with the parents as well.

Baseball, basketball, volleyball, croquet, quoits and running and jumping pits provided amusement and recreation for a large number of young people.

Sand boxes, swings and teeters, gave pleasure to the younger children, while sewing, cards and basket making furnished occupation work for the girls.

The playground was open for six weeks and the attendance for the season was 4348, or an average daily attendance of 108.

At the close of the season a field day was held, and drills by the girls, running, jumping and relay races by

both girls and boys, gave the visitors an idea of the work that had been carried on during the summer.

A large number of parents and friends witnessed these events, and the concensus of opinion was that the playground had proved its right to exist.

In the spring of 1915 we asked the city government for \$400 with which to continue the work, and this sum was generously given us.

The playground opened June 29th, two weeks earlier than the first season, and continued for eight weeks. We hope eventually to be able to keep open twelve weeks, thus providing the young people of our city with a social center during the entire summer vacation.

Mr. Frederick J. Weismiller of the Springfield College was director of the playgrounds this season and Miss Minnie Shattuck was assistant. Miss Shattuck had charge of the children's gardens, a new feature added this year. Owing to the wet weather, the gardens were not the success we had expected, but sufficient interest was manifested in the gardens to warrant our continuing them.

With the increased appropriation we purchased a giant stride and steel slide, built one tennis court and graded for a second one.

The giant stride and steel slide were in constant use, the slide being used in the water as well as on the land.

On pleasant days the tennis court was in constant use from early morn till long after sunset, and furnished pleasure, not only for the boys and girls who regularly attended the playgrounds, but for young men and women who were employed during the day, and for a few summer visitors.

Swimming lessons were one of the new features introduced and proved so popular that four afternoons a week were given over to this recreation.

The first playground picnic was held at Winnesquam August 16, and there were nearly one hundred young

people present, and so enthusiastic were they, that it is quite probable that an annual picnic will be the result.

The director, Mr. Weismiller, took the boys to Mount Belknap on two camping trips and these "hikes" were a source of great pleasure to both the director and the boys.

The attendance was most satisfactory; the total for the season numbered 8308, or an average daily attendance of 173, and we feel, that, had the weather been more favorable for out-door sports, the number would have been much larger. The daily visits of parents and friends showed their interest in the work.

The field meet was held September first, and drew a crowd.

It was estimated that nearly 2000 people witnessed the program of sports arranged by the directors.

At the close of the exhibition Mayor Munsey, in behalf of the boys, presented Mr. Weismiller with a silver loving-cup, and in behalf of the girls presented Miss Shattuck with a set of friendship pins. These gifts expressed the esteem and good-will of the boys and girls for the directors who had so carefully supervised their play during the summer.

The field meet was voted by all to be an unqualified success, and many who had not previously had an opportunity to become acquainted with the aim of the instigators of the playground movement, went away convinced that the playground provided a clean social center for the boys and girls of Laconia.

It may be of interest to state that the boys and girls who attended the playground are so desirous to have Mr. Weismiller's return that they have presented the Association with a petition signed by 194 of the young people who attended the playground "asking for the return of Mr. Frederick J. Weismiller for the summer of 1916."

It is impossible in this brief report to give other than a fleeting glimpse of what has been done at the playground,

but we would ask for the continued interest and support of the citizens of our city.

We would not only cordially invite all parents and friends to visit the playground, not once, but many times during the coming summer, but we would urge that they do so in order that they may see for themselves the value of having a well supervised social center for the young people of Laconia.

We have not taken the space for a detailed financial statement covering the appropriation given us, but have filed a copy with the City Clerk where it can be seen by anyone desiring to do so.

Respectfully submitted,

ALICE S. HARRIMAN,

For the Association.

FIFTEENTH ANNUAL REPORT OF BOARD OF PUBLIC WORKS

To the Honorable Mayor and Council:

Appropriations for the coming year are recommended as follows :

General appropriations	\$ 13,000.00
Recovering sidewalks	1,500.00
Maintenance of macadam	1,500.00
Engineer's department	800.00
Sewer maintenance	1,500.00
Care monument lot, insurance, etc.	250.00
Collecting ashes and waste	2,300.00
Sprinkling and oiling streets	4,500.00
State highway maintenance	5,000.00
" " construction	1,500.00
Elm street drain extension	800.00
Main " "	1,120.00
Messer street drain	600.00
New bridge, Academy street	1,100.00
Macadam, Union avenue	5,000.00
	\$40,470.00

The recommendations we make are for those things we consider most essential and should receive early attention. The continuance of the work commenced on Union avenue, extension of surface drains, State highway improvement, and a new concrete bridge over Durkee brook in Academy street are all important matters for the public good.

The past year was an unfortunate one and caused the city

a loss of many hundreds of dollars to repair the washouts caused by excessive rainfalls. A surface drain has been built in Clinton street which will benefit a section that has suffered severely from floods. A portion of Pine street and several other streets in the South-eastern section of the city were so badly damaged that they had to be rebuilt.

Main street from the river to Court street was repaved and new edge stones set completing the street from Bowman street to Oak street.

A granite block pavement, laid in cement, on Water street now extends nearly to the railroad crossing and is an improvement that will be much appreciated by the public.

Gold street bridge became unsafe for public travel and the Board ordered it closed. This bridge should be discontinued, there is no necessity for its maintenance.

Your attention is called to the report of the Street Commissioner and Engineer. He makes numerous suggestions and recommendations that are worthy of your consideration. Your assistance and cooperation are appreciated by this Board and we ask your favorable action on the several items we submit.

J. H. STORY,
JULIUS E. WILSON,
JOHN T. DODGE,
Board of Public Works.

REPORT OF STREET COMMISSIONER.

To the Board of Public Works:

GENTLEMEN: I present the following as the annual report of the Street Department for the year ending Feb. 15, 1916.

BITUMINOUS MACADAM.

Tarvia macadam pavement was laid on Union avenue from Main street to Pitman's mill and it was given a painting coat of Tarvia B.

The area laid was 1930 square yards and the cost per square yard including the grading of the road bed was 96.2c.

The total area of tarvia macadam laid since 1908 is 60,607 square yards on City streets and 1,300 square yards on State Roads.

The maintenance cost for the year 1915 was \$1,593.83 or 2.63c per square yard.

The entire area of this pavement is in good condition although portions have been subjected to a hard traffic for over seven years.

BRIDGES.

The Mill street bridge was partially retimbered, replanked and the roadway covered with a tar concrete pavement.

Minor repairs were made to various other bridges as occasion demanded.

I was unable to build a concrete bridge at Academy street, as no appropriation was made for that purpose. The present bridge is very badly decayed and required many repairs the past season. It is not safe and should be rebuilt at once.

The Main street bridge was given coats of tar concrete on the roadways and sidewalks but the planking and probably some of the timbers are badly decayed. The Messer street bridge must be replanked soon and otherwise overhauled.

The Fair street bridge will also require much attention and many repairs.

The Weirs Channel bridge must be replanked soon and should have the roadway paved with treated wood blocks as the heavy traffic it now endures wears out the planking very rapidly.

The Gold street bridge is very unsafe and it has been closed to vehicle traffic until such time as the City Council shall take action in regard to it. As the Elm street bridge parallels it within about three hundred feet it would seem unwise to rebuild this bridge, at great expense, at the present time when many other bridges are also in a dangerous condition and must be attended to.

The rapid increase of heavy motor trucks makes our bridge problem more pressing and it would seem like folly not to make our bridges safe for the loads allowed by law especially as towns and cities are liable for all damages which are caused by inadequate or unsafe structures.

The construction of the Winnisquam bridge on the State Road will allow the heaviest motor trucks to now reach this city from the south, whereas in the past it has prevented such traffic to a considerable extent.

The following table of bridges of ten feet or more span shows in a general way their condition.

Street	Span	Material	Condition
1 Academy	15.5	wood	very poor
2 Beacon	23.5	"	poor
3 Church	150.0	"	probably good
4 Court	15.0	concrete	excellent
5 Davis Place	15.0	"	"
6 Davis Place	10.0	wood	poor
7 Elm	232.0	concrete	excellent

CLINTON STREET WASHOUT, AUGUST 1ST, 1915

Street	Span	Material	Condition
8 Fair	201.1	wood	poor
9 Garfield	10.1	"	very poor
10 Gold	145.0	"	closed to traffic
11 Highland	25.0	concrete	excellent
12 Main	71.0	wood	poor
13 Messer	100.0	"	"
14 Mill St. Flume	36.0	concrete	excellent
15 Mill	128.0	wood	fair
16 Union Ave. Jewett Brook	19.0	concrete	excellent
17 Union Ave. Black Brook	13.0	"	"
18 Weirs	100.0	steel	good

SURFACE WATER DRAINS.

The following surface water drains were built during the year. Clinton street, 1219 feet; Lawrence street, 1175 feet; Messer street, 178 feet; Province street, 93 feet; Willow street, 395 feet; total, 3,060 feet.

The almost unprecedented rainfall during July and August, 1915, caused much damage to streets and exceeded the capacity of many drains to carry off the water. The total rainfall in 35 days was eighteen inches and on July 1st there was a rainfall of 3.96 inches in fifty minutes. This cloud-burst caused the overflow of the brook at the top of Clinton street hill, and as a consequence washed out the street four or five feet deep for almost the entire length of the hill. To help this situation the City Council appropriated the money to build a storm sewer from the culvert in Clinton street, near Mechanic street, to the brook at the top of the hill. This drain is large enough to carry the entire flow of the brook during an ordinary rainfall, but an overflow is provided into the old course of the brook, to take surplus water in a heavy storm.

A large drain was built from the river through Lawrence street, across Court street and through private land

to Academy street, this relieving a large area which was a great source of damage and annoyance. This drain should be extended into Bowman street, easterly, and on Academy street, northerly, to care for the drainage of Academy square.

The Willow street drain was stopped at the time of the washout on Clinton street, and it was found necessary to rebuild and to extend it.

The drain at the northerly end of Messer street is still nearly blocked at the Adams dump, and is causing much damage and annoyance to the residents in that vicinity. An appropriation should be made to remedy this matter.

The Gilbert brook channel from Court street to South Main and Pine streets, has been cleared and put in as good repair as funds would allow, but conditions along this brook are very bad, and a large area which might readily be made suitable for building purposes is now so badly drained that its value is greatly lessened.

I have made a survey and estimate of the cost of improvement of this brook, which can be found in the report of the City Engineer.

Drains are needed on Union avenue from Pitman's mill to High street, to Avery street, on High street from Highland to Beaman street, on Joliette, Baldwin, Lovell and Merrimac streets, on Elm street from the present drain westerly to near Massachusetts avenue.

The drain from Depot square and vicinity is now entirely inadequate to carry off the surface water from this area. It runs from Depot square through private land to Main street, thence across Main street through private land to Canal street, and from Canal street through private land to the Perley canal.

The original channel has been much changed and contracted by building operations, and in time of heavy rain-falls the brook overflows into cellars causing damage and inconvenience. This could be remedied by relaying the Main street drain from Perley canal to a point opposite

the passageway between the St. Jean and Baldi buildings, with a larger pipe and building a branch drain through this passageway to connect with the present drain near the Congregational church parsonage. I estimated the cost of this change to be \$1,120.

GENERAL REPAIRS TO SUBURBAN ROADS.

The excessive rainfall during July and August caused much damage to country roads and necessitated much extra work. The department succeeded in getting most of the roads and streets in reasonable repair before freezing weather, but some of them are not in as good condition as they were previous to the rains.

No funds have been available to surface many needed sections, although coal ashes and cinders have been applied, when possible, with good results.

North Main street, from Oak street to Busiel street, should be macadamized. The same road from Elm street to the Tilton farm should be surfaced with gravel. South Main street from Grant street southerly to Cotton hill road is badly in need of resurfacing with a good material. The Lake Shore road from the Zebley farm to the Gilford town line should be surfaced with a sand-clay mixture.

MAIN STREET IMPROVEMENT.

Main street from the river to its junction with Court street was rebuilt the past season.

The underground structures of the public service companies were renewed or put in good repair. Sidewalks were widened and regraded, new granite curb stones set, gutters paved, and the old granite block pavement taken up and replaced with a tar concrete pavement on a cement concrete base. The total cost to the city of this work was \$2,990.36.

That section of the macadam pavement on Main street from Canal street to Masonic Temple should be resurfaced with a bituminous macadam.

REGULATING STREETS AND GRADING SIDEWALKS.

The following streets were graded either wholly or in part and sidewalks graded:

A parking area was graded and seeded on the westerly side of Academy street, between the sidewalk and the roadway, from Court street to Pearl street. Drains and catchbasins were changed to conform to the new profile of the street. Similar treatment should be given the easterly side of this street the coming summer, this greatly improving the condition and appearance of this otherwise beautiful street.

Central street and Jackson street extensions were brought to the established grades and sidewalks graded on either side.

Sidewalks were graded and surfaced on Avery street, Lakeside avenue, Lyford street, Orchard street, Tower street, and Winnecoash street.

Pine street was brought to the established grade from Baldwin street to No. 155. Paved gutters were built from Baldwin street to Merrimac street, and a concrete sidewalk built from Baldwin street to the Batchelder street schoolhouse, together with a cross walk at the schoolhouse.

SCAVENGER SERVICE.

There has been collected 2393 loads of waste and ashes the past year, and they have been disposed at a cost of 95.2 cents per load.

There should be an appropriation of \$2,300 made specially for the collection of waste and ashes each year, and a like amount deducted from the annual appropriation for highway maintenance, so that it would not appear in the yearly report that money appropriated for highway purposes was used for such collection.

STATE ROAD CONSTRUCTION AND MAINTENANCE.

We have expended \$2,012.05 the past year in grading

portions of the Merrimac Valley Trunk Line between The Weirs bridge and the Meredith line, one half of which sum was furnished by the state. There were also many culverts and waterways built. There still remains about one mile in length which needs considerable grading, and a portion of about one thousand feet in length at the Meredith line should be relocated so that the grade may be much reduced and probably the expense of construction made less.

When this grading has been done, the State Highway department will call the construction of the Merrimac Valley Trunk Line through Laconia completed, and whatever surfacing and improvements are then done, the cost is paid from the Highway Maintenance fund, one-half of which is appropriated by the city and one-half comes from the money collected by the state from automobile fees, the work done under the head of construction being paid for from a bond issue which is nearly all used. I would recommend that \$1,500 be appropriated by the city, which together with a like amount from the state, would complete this work in 1916.

There has been expended for maintenance the sum of \$3,365.33, one-half furnished by the city and one-half from the state. Maintenance has consisted of repairing and oiling the water-bound macadam sections, oiling sections of the gravel surface, shaping and dragging sections, and resurfacing a considerable section with a sand-clay mixture.

The entire length of the Trunk Line from its junction with the Oak road to the Meredith line is constructed with natural materials found near the right of way. This material makes an exceedingly good automobile road through the summer months when carefully cared for, but during the spring and fall it is badly cut up by the heavy auto traffic, and at times is in an almost impassable condition. The cost of maintaining this road in good condition only part of the time is very heavy, and at times it is impossi-

ble to keep it even in fair condition. The only remedy is to cover the road with a hard surface, such as bituminous macadam. If this was done, the yearly cost of maintenance would be very much less and the road would be good at all times. It would probably cost from \$7,000 to \$8,000 per mile to cover this road with such a surface, and the cost for the six miles would be from \$42,000 to \$48,000, one-half of which would be paid by the state. It would seem that economy and public necessity would warrant that a start be made on this work this coming season.

STREET SPRINKLING AND OILING.

The sum of \$3,854.16 was expended in street sprinkling and oiling, and a somewhat larger area was covered than was the case the previous year. The great benefit obtained from street oiling is appreciated by every tax payer, and it consists not only in laying the dust but in protecting street surfaces on steep grades from wash in heavy rains. It might be said that the oiling pays for itself on grades by the reduced cost of maintenance of such streets.

UNION AVENUE IMPROVEMENT.

Union avenue from Main street to the mill of the Pitman Mfg. Co. was improved by setting curbing, rebuilding sidewalks, drains, and other underground structures and covering the roadway with a tar macadam pavement. The total cost of this work was \$4,391.55. There are still three buildings which encroach into the street and mar the effect of the improvement to some extent, but all the work done was along permanent lines, and no changes will be necessary to this work when the encroaching buildings are removed and their space filled in.

The street lines from Pitman's mill to High street should be adjusted at once, and the construction work continued toward Casino square the coming season.

WATER STREET IMPROVEMENT.

The pavement, curbing and sidewalks on Water street were extended about 450 feet, at a cost of \$1,635.15. The old granite blocks taken from Main street were laid on a sand foundation and the joints grouted with a rich cement mixture, so that a smooth substantial pavement results. As hardly one-half of the blocks from Main street have been used and are still available for this work, I would recommend that the pavement be extended the coming season, and that an appropriation of \$1800 be made for this purpose. The last section of pavement on Water street was laid nine years ago, and although your Board has recommended continuing the work every year since, nothing has been done until the past season. The street carries a heavy traffic, and is in a deplorable condition except where it has been paved.

GENERAL.

About \$1900 was the total amount expended in the construction of bituminous macadam the past year, which makes rather a small showing along this line.

There are several streets such as Bowman, South Main, Messer, Academy, etc., which are badly in need of a hard surface, and which would not require a large expenditure for grading, drains, curbing, etc., so that an appropriation for any of these street improvements could be spent mostly in macadamizing.

A piece of land, about one half acre, was bought at The Weirs, and a stable and tool shed erected thereon for the street department.

The Ford runabout purchased by the department has been a great help and convenience and has easily paid for its use. A motor truck for picking up ashes and waste and various other purposes would be an economical investment.

The heavy rainfall during the summer caused much unusual expense, not only in repairs but in delays to pieces of work in operation during that time.

The amount expended for the year ending Feb. 15, 1916, is \$46,794.73 and I have itemized it under the following headings:

1 Bituminous Macadam		
Union avenue	\$1,856.53	
Maintenance	1,593.83	\$ 3,450.36

REPORT OF THE CITY ENGINEER.

To the Board of Public Works:

GENTLEMEN:

The appropriation for this department was the same as for previous years and a part of the cost of surveying, etc., was charged to the appropriations for specific pieces of work.

The street lines on Main street and Bank square were located and plotted for future reference.

Accurate levels were run from the City's bench on Dixon's Point over practically all the water hydrants in the city to correct the bench levels previously taken on them.

Surveys were made and lines and grades staked out for street layouts, improvements, sewers, drains, etc.

Estimates were made for all proposed work and furnished to your Board or to the City Council.

A preliminary survey and estimate was made for the improvement of the brook (Gilbert brook) from the river near Rowe's Court to Joliette Street. It was determined that it would require a circular conduit forty-two inches in diameter from the river to Main street, and a thirty-nine inch conduit from Main street to Joliette street to care for the flow of water in times of heavy rains. I estimated the cost of such a conduit built of vitrified blocks with the proper inlets, changing pipes, replacing pavements, and covering the conduit at about \$10,500.00. This estimate was based on 1915 prices and does not include land damages. The construction of this conduit to take the place of the open brook channel now existing would be of

great benefit to this section of the city and would so improve a considerable area that it could be used for building purposes and its value for taxation greatly increased. In addition the drainage from the Pine Hill section (Pine street, Baldwin street, Lovell street, Merrimac street and Warren street) could be cared for without causing an overflow of the brook channel which would now be the case if proper drains were built on the streets mentioned. The proposed drain from Joliette street, to Baldwin street, to Lovell street, to Merrimac street, to Warren street, is probably needed more than any other drain in the city at the present time, but should it be constructed with the Gilbert Brook channel in its present condition a comparatively small rainfall would cause overflows and more serious trouble than we now have.

The street lines on Union avenue from Main street to land of the Pitman Mfg. Co., have been fixed and the boundaries adjusted with all the abutters with one exception.

Mr. Avery, Dr. King, H. B. Clow & Sons, J. S. Morrill waived any right they might have to occupy land taken into the street and Mr. W. L. Melcher gave the city a considerable strip of land inside his fence, for highway purposes, free of cost to the city also sacrificing shade trees where removal was required.

The buildings, one belonging to Lawrence Baldi, one to Mrs. H. C. Wells, and the piazza of the building, No. 63 Union avenue, still encroach on the street, as laid out, no satisfactory adjustment having been reached with the owners.

The lines of Union avenue as now recorded in the Street Records, from the end of the 1915 improvement to High street, do not fit the surroundings and should be changed at once. There is no difficulty in getting a street 49.5 feet wide from Pitman's Mill to High street, and from High street to Casino square the full width is now found.

A survey was made of the surface water drains of the

city the result of which appears in a table in the Report of the Sewer Department.

Respectfully submitted,

CHAS. A. FRENCH,

City Engineer.

REPORT OF SUPERINTENDENT OF SEWERS.

To the Board of Public Works:

GENTLEMEN.

Construction—The following sewers were built the past year: Grove street, 62 feet, cost \$55.93; Joliette street, 647 feet, cost \$657.44; Mechanic street, 1323 feet, cost, \$1048.46; Opechee street, 644 feet, cost \$1371.40. Total length, 2676 feet. New manholes, cost \$85.35.

The Opechee street sewer should be extended to Central street, and branches built in Central and Belknap streets. Other sewers needed are Stark street, from Valley street to 51 Edwards, street, from Joliette street, and on Butler street, Walker street, and Woodland avenue.

Maintenance—There were few stoppages in the sewer system the past year, and only one that was serious. A portion of the Garfield street sewer was found blocked, and upon investigation it was found that a section of pipe about ninety feet in length was broken. This section was through a peat bog and the original sewer was built on a timber platform. Although the platform had not settled the settlement of the surrounding fill had cracked the tile pipe of which the sewer was constructed. This broken section was taken out and replaced with cast iron pipe of the same diameter. The usual amount of tree roots were removed and several new manholes built to gain access to the sewers.

The appropriation of \$1,000 for Sewer Maintenance is not enough, and it was found necessary to transfer from another account to make up the deficiency. \$1,500 should be appropriated for Sewer Maintenance.

The usual amount of trouble was experienced with tree

roots in house connections. The Carolina poplars, which seem to be popular as quick-growing shade trees, cause the most trouble. This matter can be remedied by using iron soil pipe, or if tile pipe is used by making the joints with a bituminous compound instead of cement. This compound makes a joint which will not admit roots, and has the further advantage of being water-tight and preventing leakage into the sewers.

Sixty-one permits were issued to connect buildings with the public sewer.

PLUMBING.

The Board of Examiners of Plumbers examined two applicants for a journeyman plumber's license. As both applicants were found satisfactory they were given a license.

172 permits to do plumbing were issued.

SUMMARY.

Number of house connections, Feb. 15, 1915 . . .	1475
" " " made " . . .	61
" " " Feb. 15, 1916 . . .	<u>1536</u>

LACONIA PUBLIC LIBRARY

REPORT OF THE TRUSTEES

To the Honorable Mayor and City Council of Laconia:

The undersigned, trustees of the Laconia Public Library, herewith transmit to you the reports of the librarian and treasurer of the public library for the year ending December 31, 1915, on the part of the librarian, and for the year ending February 15, 1916, on the part of the treasurer, and respectfully submit them as covering very fully all matters pertaining to the library and its expenditures.

We respectfully recommend that the sum of \$3,000.00 be appropriated for the library for the ensuing year.

JOHN T. BUSIEL,
JOSEPH H. BLAISDELL,
WILLIAM F. KNIGHT,
CHARLES L. PULSIFER,
STANTON OWEN,
FRANK P. WEBSTER,
JOHN W. ASHMAN.

TREASURER'S REPORT

To the Board of Trustees of the Laconia Public Library:

The following is my report of all receipts and expenditures for the year ending February 15, 1916.

SPECIAL FUNDS.

HELEN A. AVERY FUND (\$1,000).

Receipts.

Balance on hand February 15, 1915	\$	40.09
Income from fund during year		40.00
	\$	80.09

Expenditures.

Books purchased	\$	79.90
Balance on hand unexpended19

JULIA A. LADD FUND (\$500).

Receipts.

Amount on hand February 15, 1915	\$	1.38
Income from fund during year		20.20
	\$	21.58

Expenditures.

Books purchased	\$	21.58
---------------------------	----	-------

E. P. JEWELL FUND (\$9,381.03).

Receipts.

Amount on hand February 15, 1915	\$	20.69
Income for the year		238.59
		259.28
Advanced from general fund71
	\$	259.99

Expenditures.

Books purchased	\$	259.99
---------------------------	----	--------

GENERAL FUND.

Amount on hand February 15, 1915	\$	243.58
--	----	--------

Receipts.

Deduct amount received from Stanton Owen, trustee	363.08
	<hr/>
	\$ 377.93

Respectfully submitted,

JOHN W. ASHMAN,

Treasurer.

REPORT OF THE LIBRARIAN.

To the Honorable Board of Trustees of the Laconia Public Library:

GENTLEMEN:—

I have the honor to present to you my thirteenth annual report. The statistics of my report are for the calendar year 1915, while the Treasurer's report is for the fiscal year ending 15 February 1916.

Very few books were bought until October, when \$363 were received from the Trustees of the Goss fund. The closest economy had been practiced for the two previous years in order to buy as many books as possible. The purchase of needed equipment and other expenses can be deferred for a time, but the temporary gain is partly offset by the increased cost of administration or decreased service to the public. The time comes when the expense must be met. What is saved one year is added to the expenses of later years. There has been no increase in salaries for three years, except that the compensation of one assistant has been increased by five dollars a month. The cost of living has increased during the period and it is certain that competent assistants could not be obtained to do the same work at the same salary.

Early in the school year, Miss Swain prepared a list of books that were urgently needed in the English department of the high school. The students could not do the work expected of those who enter the higher institutions of learning unless these books were provided. The librarian estimated that they would cost at least one hundred dollars. He was told that there were no funds available and he could not buy a single book on the list. He ex-

plained the situation to the Mayor, who seemed to be impressed with the need and gave some encouragement that a special appropriation might be made. This was not done, however, and no books were bought until the income from the Goss fund was available. These books, and others for the general public, were then bought and cataloged as rapidly as possible. It was too late to prevent a loss of circulation at the main library for the year of 1,124 volumes, or 3%. Although the books purchased for the high school were not ready for use until November, there was a marked improvement in the character of the books loaned. The circulation of fiction for the year fell off 2,211 volumes, or more than 7%, while the other classes showed a gain of 1,087 volumes, or 26%. The percentage of fiction loaned at the main library was reduced from 85.12% to 81.45%.

It is no longer possible to shelve all our books. The books already ordered will fill all the shelving we have. There are 736 books out at this time. These could not be shelved if they were to be returned and no others were taken. New books cannot be shelved where they belong in the shelf arrangement without moving so many others that it is not possible to do it without extra help. Books are shelved where space can be made for them and later much time is wasted in hunting for books out of regular order. Offers of books as gifts have been declined because there was no vacant shelving to receive them. Unless another floor is added to the stack very soon, or the purchase of new books ceases altogether, books must be removed from the shelves and stored in the basement to make room for the new books or some must be discarded. The card trays in the office and at the loan desk are nearly full. A new card cabinet is greatly needed. A letter file and a desk are needed in the office to save time and promote efficiency.

An effort has been made to obtain material for a history of Laconia. A committee was appointed by the Board of

trade, of which the librarian was a member. The city clerk, Mr. Flanders, supplied town reports for the years 1875-1878 that were lacking at the library. Mr. Ladd brought an old family Bible and the family records were copied. He also gave us a handbill of the olden time and a newspaper clipping of interest. He told of the houses and business blocks on Main and Pleasant streets as long ago as he could remember. Members of the Woman's club completed the library set of the yearbooks. Individuals agreed to obtain histories of various organizations of the city. The members of the committee are busy men, but much can be accomplished if citizens generally will interest themselves in obtaining and contributing material for the future historian. Every resident should prepare and present to the library his or her genealogy so far as known. Pamphlets, programs, dodgers, photographs, &c., of earlier times should be given or willed to it. Hon. Martin A. Haynes has published two invaluable books of local history during the year in very limited editions and has generously presented a copy of each to this library and to the Ossian Wilbur Goss reading rooms. The first contains the "Historical address delivered by Erastus P. Jewell, Esq., at the old home week exercises" at Laconia August 1, 1905. The second contains "Historical sketches of Lakeport, N. H. . . . the historical collections of Horace G. Whittier, ed. by Martin A. Haynes." Col. Haynes has intimated that his invaluable set of the Lake Village Times might come to the library sometime. The librarian plans to prepare a card index of the historical facts mentioned in our file of the Laconia Democrat. It is not creditable to the city that no history of the town and city has been published. If everyone will do what he or she can do, a history may be prepared that will preserve for future generations many facts about the earlier history of the town and its inhabitants that would otherwise be forever lost. Many facts can not be known with certainty that could easily have been verified a few years ago.

Every year of delay adds to the difficulty of obtaining reliable data.

Laconia Council, no. 428, K. of C., presented a fine set of the Catholic encyclopedia in 16 volumes, bound in half leather with gilt tops. This set has been placed in the study room. The Laconia savings bank gave us Moody's Manual of corporation securities for 1913 and 1914 in four volumes, also copies of the New Hampshire directory for 1913 and 1914 and a city directory for 1912 for exchange. Mr. Frank Smith gave us a fine large photograph of his herd of Jersey cows in their pasture at The Oaks, also a "Fac-simile of General George Washington's account with the United States". Owing to lack of funds, we were unable to buy the books needed by the literature department of the woman's club for their study of Irish drama. They obtained "Seven short plays" by Lady Gregory and "The British and American drama of to-day" by Barrett S. Clark and presented them to the library.

We gratefully acknowledge the receipt of the above and other gifts from kind friends of the library as follows:

LAKEPORT BRANCH.

Thirty-nine new books were bought for the branch in 1915. This number is about one-third of the minimum number that should be purchased each year. More than two hundred books are out at one time in the busy season. If the books are not bought for the branch, the patrons try to obtain what they want by having them sent up from

*Cards used at main library and branch are counted but once in the total.

the main library. Twelve hundred and sixty-eight books were obtained in this way during the year. Nearly all of these were popular books in constant demand at the main library. They must be looked for every morning until they happen to be in. The cost of circulating books from the main library through the branch is several times as great as the cost of issuing them through the library where they belong. These books are unavailable while they are being transported from the main library and back, and while they are reserved for the patrons who ordered them. Two or more copies of popular books, in constant demand at both libraries, should be purchased. The staff is unable to do all that might be done for the public if unnecessary and unproductive labor could be saved by providing needed equipment and obviating needless work.

Nine thousand, three hundred and fifty-seven volumes were loaned, a gain of 478 or more than 5%. The circulation at the branch was about 21.5% of the total. The percentage of fiction circulated was slightly reduced from 87.72% to 86.02%.

Among the gifts of the year three, at least, deserve particular notice in this report. During his life, Mr. Horace G. Whittier had collected data for a history of his native village. This material was loaned to Hon. Martin A. Haynes by his daughter. Col. Haynes realized the value of these notes to the future historian and published them, with some other records he was able to obtain and with such editing and revision as seemed desirable, in a limited edition of forty copies, with post-card views of prominent buildings and parts of the village. Col. Haynes presented one of these books to each of the libraries. Their value cannot be measured in money, but it is certain to increase rapidly with the passing years. Mr. Whittier and Col. Haynes have rendered invaluable service to the whole community by collecting and publishing these historical sketches. A fire-proof vault or safe should be provided for such important records that cannot be replaced.

Col. Haynes also published, in a limited edition of twenty copies, the historical address delivered by Erastus P. Jewell, Esq. at the old home week public exercises at Laconia, August 1, 1905. He presented one of these copies also to each library.

Dr. L. M. Palmer, of South Framingham, Mass., presented a fine set of Balzac's works in twenty-five volumes that had belonged to his brother's widow, who was well known to earlier residents of this ward as Isabel M. Sanders.

The complete list of gifts of the year, from the kind friends to whom grateful acknowledgement is hereby made, is given below.

Chambre de commerce de Paris. 8 pamphlets.

Haynes, Hon. Martin A. 2 books.

Lewis, Mr. Oren H. World's famous orations. 10 vols.

Morrison, Miss Ella. 1 book.

New York, New Haven and Hartford railroad co. 8 pamphlets.

Palmer, Dr. L. M. Balzac's works. 25 vols.

Portland (Oregon) chamber of commerce. 2 pamphlets.

Reever, Mr. Orrin M. 1 book.

Village improvement society. 1 hydrangea.

D. K. Marsh & Co., conveying prisoners	10.50
State Departments, fines as required by law	276.20
Witness and officers' fees	160.48
Fred A. Young, premium on clerk's bond	5.00
" " commitment of children to State industrial School	54.48
Oscar J. George, treasurer, balance cash	1,141.17
	<u>\$1,703.15</u>

Respectfully submitted,

EARL FLANDERS, *Clerk.*

CITY SOLICITOR'S REPORT

LACONIA, N. H., February 15, 1916.

To the City Council of Laconia:

I have the honor to submit the following report as city solicitor.

Three tax appeals brought by Emma M. J. Prescott against the City of Laconia for the years 1912, 1913 and 1914 have been settled and disposed of, the taxes having been paid in full for the years 1912 and 1913, and a slight abatement having been made on the appeal for the year 1914.

The petition of Harvell et als against the Police Commissioners for reinstatement on police force has been marked "petition denied."

Three tax appeals of Grace E. Blaisdell against the City for the years 1912, 1913 and 1914 have been marked dismissed.

The appeal of Lewis Perley for damages awarded on account of the widening of Main street was tried by jury by my predecessor at the March term, 1915, and resulted in an award of three thousand dollars.

The tax appeal of Scott & Williams, Incorporated, for 1914, has been disposed of by an abatement of ninety-three dollars, to which the company was obviously entitled by reason of a clerical error in making up the assessment.

The suit of Idella M. Locke, executrix of Simon A. Beard, claiming damages for a change of grade on North street and a consequent diversion of water, has been argued in the Supreme court, and a decision has been rendered in favor of the city, which, while it does not of itself absolutely dispose of the case, will nevertheless very

materially limit any damages which might possibly be recovered, and may result in the discontinuance of the suit.

The proceeding brought by the City to determine the lines of Union avenue from Main street to the hill by the Pitman mill will probably be tried at the coming March term. The line as determined by the City has been established by deed of gift by W. L. Melcher, and confirmatory deeds from all other owners whose line was in controversy excepting Manena Wentworth and Georgia B. Wells, and it is quite probable that before the case comes on for trial a similar deed will have been received from Miss Wentworth so that the only part of the line in controversy at the trial will be that of Georgia B. Wells.

The two suits of Claribel Clark for alleged diversion of water on Union avenue, and the suit of Sidney F. Judd for alleged diversion of water on School street are still on the docket, and no hearing has been had on any of them.

The Independent Ice Company has appealed from taxes assessed for 1914.

E. P. Thompson has appealed from the City Council's lay-out and award of damages to him on Cook court, so called.

The towns of Tilton and Belmont have brought a petition to compel the City to contribute toward the expense of the construction of the new bridge at Winnisquam and this case has been transferred to the Supreme court for the purpose of determining whether, as a matter of law, the City can be compelled so to contribute assuming the facts set forth in the petition to be true.

Wesley B. Stevens, having been prosecuted for practicing plumbing without a license or certificate, has brought a petition to compel the Board of Examiners to issue a license to him, and this case will probably be transferred to the Supreme court on questions of law at the coming March term.

To summarize, the cases now standing on the docket in which the city is interested are:

Claribel Clark vs. Laconia. (Two suits)

Independent Ice Company vs. Laconia.

Locke vs. Laconia. (Two suits)

Judd vs. Laconia.

Tilton and Belmont vs. Sanbornton and Laconia.

E. Thompson vs. Laconia.

Wesley B. Stevens vs. C. A. French et als (and State vs. Wesley B. Stevens.)

C. B. Hibbard, Esq., my predecessor, during the last year, at the request of the previous City Council has done a large amount of work towards revising the city ordinances, the result of which he turned over to me about the first of this year. With his cooperation, and with that of a committee from the present City Council the work on the revision has been so far completed that it is expected that it will be presented to the City Council for action at the regular meeting February, 1916. I would suggest that the revision be published in book form, together with the acts of the legislature concerning the incorporation of the Town of Laconia and subsequent changes of boundaries, the city charter and all amendments thereto, orders of the Board of Public Works, rules and orders of the City Council, a list of the city officials from 1893 to date, and such other historical notes and memoranda as may be deemed advisable, together with a careful index of the whole.

Many other matters have come before me of which a detailed report is not necessary or practicable.

Very respectfully submitted,

FLETCHER HALE,

City Solicitor.

FIRE DEPARTMENT.

REPORT OF THE CHIEF ENGINEER.

To the Honorable Mayor and City Council:

In compliance with the city ordinance I have the honor of submitting for your consideration the annual report of the condition and operation of the Fire department for the year ending Feb. 15, 1916.

During the past year the Department responded to one hundred and twenty-one still alarms and twenty-six pulled in from various boxes and seven (3-3-3) or engineer's calls.

The fire loss has been the smallest in years in Laconia. We have responded to 84 'phone calls for defective chimneys. This should not be so, as defective chimneys are a menace to our city. I do not feel at this time like printing the names of the owners of these buildings, but something must be done to prevent our city from serious fire loss. As chief of the department I would make the following recommendation: the city should at once install our fire alarm system in our own stations at Laconia and Lakeport, thus making it more efficient under the supervision of our regular firemen and not be dependent on outsiders in caring for this most important part of our fire department system.

During the year the city has purchased two lots of hose, 500 feet each. Owing to the long distance between hydrants and the steady growth of our city we maintain a large supply of fire hose.

We have about 127 hydrants in the city of Laconia and Lakeport, which is about half what we should have. The

city pays \$25.00 per year for each hydrant. We have come to the conclusion that hose is cheaper than installing hydrants at that price.

The apparatus of this department is kept in the best possible condition and consists at present of two combination chemical hose wagons, one steamer engine, three hose wagons, two ladder trucks, one supply wagon. The approximate value of the apparatus is about \$18,000. We have eight horses, value about \$1500.00. Four sets of swinging harness. Fire alarm systems value about \$8000.00.

The question of motorizing the fire department should be given your consideration. Owing to the high cost of hay and grain and shoeing horses I would recommend that the city purchase one auto chemical truck this year which would displace three horses and reduce the cost of maintenance; also that the heating apparatus be repaired in the Central fire station.

We have about 6000 feet of good fire hose, but we should have 8000 feet to meet all conditions covering the whole city. We want two dozen fire coats and fire hats for the members.

The personnel of the department is as follows:

Arthur W. Spring, chief.

1st asst., E. H. Kennedy

3rd asst., H. H. Shorey

2nd asst., E. L. Sargent

4th asst., Jos. H. Roucher

DRIVERS—John Watson, A. L. Fancy, Frank Tilton.

M. W. Twombly, Superintendent of Fire Alarm.

ENGINE CO., No. 1, CENTRAL STATION.

Joseph A. Decelles, Capt.

Charles Scott, Lieut.

James Warner, Clerk.

T. H. Avery, Capt.	G. Elwin Moore
W. E. Floyd	F. E. Moore
C. J. Avery	W. T. Cole
George Rattray	G. W. Tarlson
Perley F. Avery	Edgar George

In conclusion I wish to extend my thanks to his honor the Mayor, the members of the Council, for the interest taken in matters pertaining to the fire department. I also wish to thank the officers and members of the department for the ability, faithfulness and willingness shown in the performance of their duties. I wish to extend thanks to the Chief of Police and members of the Police department for the assistance rendered at fires.

Respectfully submitted,

ARTHUR W. SPRING,
Chief of Fire Dept.

HYDRANTS.

The city has 144 hydrants in use including 19 private ones.

FIRE ALARM TELEGRAPH, LOCATION OF BOXES.

DIRECTIONS:—To give an alarm, pull down the handle once and let go.

SIGNALS.

- 1—Test signal which is struck every day at 12.30.
 2—Given after an alarm denotes "fire out."
 Three blasts of the whistle or strokes of the bell at 8 a. m., and 1 p. m., dismiss grades one, two, three and four. Six blasts, separated into threes, dismiss all grades including high school.
 4—Companies not answering first alarm dismissed.
 5—Second alarm.
 7—Third alarm.
 15—Militia call to armory.

PARK COMMISSION

To the Honorable Mayor and City Council of Laconia:

GENTLEMEN:

We have the honor to submit for your consideration the second annual report of the Park Commission. The policy of this commission is that the public grounds of the city should not only add to its physical attractiveness, but should also be made to contribute to the well being and happiness of as many as possible of its citizens. In pursuance of that policy it voted the Laconia Gun Club the use for one year of the point of land on the north-west side of Opechee Park. It also voted a plot in the east corner to the Parent-Teachers association for children's gardens, also inside the track a good tennis court is located. There is ample territory remaining for ornamental purposes whenever funds are available. Opechee Park was also used again this year for playground work. Should this work be continued there is urgent need of dressing rooms for bathers, toilet facilities and drinking water. The commission would recommend that these needs receive the careful consideration of your honorable body.

It seemed this year that the time had arrived when some action must be taken in regard to the old grandstand. It had either to be repaired or removed altogether. The commission conferred with a number of the leading men of the city as well as with your honor. The opinion of the majority was that the building had not outlived its usefulness, and it was repaired to the extent of available funds. A part of it has been fitted up for a ward room.

On September 31, Belknap County Pomona Grange conducted a very successful agricultural fair at Opechee Park

which brought in the people of surrounding towns and was, we hope, of mutual benefit to town and city.

While Opechee Park has been general utility ground Leavitt Park has been quietly undergoing transformation. In the spring 12 Carolina poplars were set out on its south-east boundary.

The Commission acknowledges the gift of a purple beech from Mr. Julius E. Wilson.

In the south corner on Washington street a tennis court has been completed and on two sides of it will be set a barberry hedge the coming spring.

The Commission was fortunate in securing the services of Mr. J. E. Phelps, under whose direction a great deal of heavy work was done. The land on the south side of the pond was cleared of trees, bushes and rocks. The stumps, roots and large stones were buried on the land. The loam on this land was saved for top dressing. A large part of the dirt used for grading was taken from the playground lot on Bell street with the view of eventually making that lot an attractive ball field. The drain that was necessary in this park was laid under the efficient supervision of Mr. French and is a long stride in permanent improvement.

Believing the result would be increased efficiency with less wasted energy the Commission prays that your honorable body provide for the appointment of a Commission of five members one of which shall be appointed each year term of office shall be five years. Also that you whose define the duties and power of the Commission and that all park funds be disbursed through the office of the city treasurer.

CHARLES H. PERKINS,
IDELLA DREW LAMPREY,
CORA F. HAYWARD,
LAURA E. VARNEY.

LACONIA HOSPITAL.

REPORT OF TREASURER.

To the Trustees of the Laconia Hospital Association:

Respectfully submitted,

JOHN W. ASHMAN, *Treasurer.*

LACONIA, N. H., Jan. 14, 1916.

We hereby certify that we have examined the foregoing account of John W. Ashman, treasurer, for the year ending December 31, 1915, and found the same correctly cast and properly vouched.

Balance in his hands, including the unexpended income of the Judge Rollins fund, sixteen hundred and sixty-two dollars and twenty-six cents (\$1,662.26). We have also examined the securities, verified the account of the permanent funds and found such funds invested and the income accounted for and shown by the book kept for that purpose.

A. W. DINSMOOR,

GEO. P. MUNSEY,

Auditors.

Scarlet fever	4
Measles	2

Respectfully submitted,

E. P. HODGDON, M. D., Pres.,

F. C. TRUE,

W. H. TRUE, M. D., Sec.

OVERSEERS OF THE POOR

To the Mayor and City Council of Laconia, N. H.:

We herewith submit our report as overseers of the poor for the year ending February 15, 1916.

It is rather difficult to estimate the amount necessary to meet the expenses of this department for the coming year, as no one can tell the cost of new cases that are liable to appear.

All reasonable requests for aid have been promptly attended to, and in our opinion the expenses of this department for the next year can be taken care of with the same appropriation as or the year 1915.

Respectfully submitted,

FRED A. RAND, for Wards 2, 3, 4 and 5.

OSCAR A. FLANDERS, for Wards 1 and 6.

AUDITOR'S REPORT.

To the Honorable Mayor and City Council of Laconia:

I have examined the books and accounts of the City Clerk, City Treasurer, Board of Public Works, Collector of Taxes, Treasurer of the Public Library, and Clerk of Court, and find them correctly cast and properly vouched.

I find the City Clerk's books in excellent condition, and they show a gain for 1915 of \$8,168.63, notwithstanding the fact of cleaning up of some old tax lists by abatement of over \$3,000.00.

The heavy rainfalls also caused considerable extra expense, the repairs to Clinton street alone amounting to over \$2,000.00. This goes to show that the city affairs have been handled in a creditable manner.

I desire to express my appreciation for all courtesies shown me on the part of all your public officials.

Respectfully submitted,

CHARLES J. HAYFORD,
City Auditor.

Feb. 28, 1916.

TRUST FUNDS.

SUMMARY OF VITAL STATISTICS.

Number of births	267
Number of births not previously recorded	7
Number of marriages	111
Number of deaths	180
Number of deaths occurring at Belknap county farm .	10
Number of bodies brought here for burial	35

Efforts have been made to make the records of vital statistics correct as possible. Should any error be detected, the city clerk will appreciate the kindness conferred by being informed of the same, that the records of the city may be made right.

EARL FLANDERS,
City Clerk.
