## TOWN WARRANT

To the inhabitants of the Town of Conway, County of Carroll, qualified to vote in Town Affairs:

You are hereby notified to meet at the Conway Elementary School Auditorium at Conway, New Hampshire March 10, 1970, at nine o'clock in the forenoon to act upon the following subjects:

Article 1. To choose all necessary officers.

Article 2. To see what sum of money the town will vote to raise and appropriate for the following purposes:

Section a. Town officers' salaries

- b. Town officers' expenses
- c. Office expenses
- d. Election and registration expenses
- e. District Court expenses
- f. Expenses town hall and other town buildings
- g. Appraisal of property
- h. Employees' retirement and social security
- i. Police department
- j. Fire department
- k. Blister rust and care of trees
- l. Insurance
- m. Damage and legal expenses
- n. Civil defense
- o. Health department, including hospitals
- p. Vital statistics
- q. Town dump
- r. Maintenance of highways — summer and winter
- s. Town road aid
- t. Libraries
- u. Town poor
- v. Old age assistance
- w. Memorial Day
- x. Soldiers' aid
- y. Parks and playgrounds
- z. Interest on temporary loans and bonds
- a-1 Class IV urban
- b-1 New equipment
- c-1 Bonds
- d-1 Perambulation of town lines
- e-1 Capital reserve for survey of streets and tax map
- f-1 Tax Map Maintenance
- g-1 County tax

Article 3. To see if the town will vote to authorize the Selectmen to hire upon the credit of the town such sums of money as may be needed, such sums not to exceed the combined School, Town and County tax budget, in anticipation of taxes for Town, County and School purposes.

Article 4. To see if the town will raise and appropriate the sum of \$3,000 to be evenly divided between the Chambers of Commerce in Conway and North Conway for operation of information booths in both villages. Agreeable to a petition signed by W. S. Gleason and others. Recommended by Budget Committee.

Article 5. To see if the town should have a Conservation Commission, as permitted under the New Hampshire Revised Statutes Annotated, Chapter 36-A (Supp), Vol. I. Agreeable to a petition signed by Helen E. Nute and others. Recommended by Budget Committee.

Article 6. To see if the town will vote to raise and appropriate the sum of \$1,200 for the purpose of uniting with the 45 other towns in the White Mountains Region Association in the co-operative development of the North Country's economy. Agreeable to a petition signed by Richard G. White and others. Recommended by Budget Committee.

Article 7. To see if the town will raise and appropriate the sum of \$2,000 to assist the Carroll County Mental Health Service, Inc. Agreeable to a petition signed by Barbara J. C. Deasy and others. Recommended by Budget Committee.

Article 8. To see if the town will vote to raise and appropriate the sum of \$1,000 (one thousand dollars) to help defray the expenses of the Water Safety Program as carried on by the Conway Chapter of the American Red Cross. Agreeable to a petition signed by Charles S. Pierce and others. Recommended by Budget Committee.

Article 9. To see if the town will vote to authorize the Selectmen to discontinue the portion of the road in South Conway, known as the Labrador Pond Road, from the southeast corner of the Hamilton graveyard on the Glackens farm to where same road connects with the Baird Hill Road by the barn on the Spence properties. Agreeable to a petition signed by Carol J. Boynton and others. Submitted by Budget Committee without recommendation.

Article 10. To see if the town will vote to raise and appropriate \$45,000 for the purchase of a snow blower, \$30,000 to be transferred from surplus, the balance to be raised by current taxation. Recommended by Budget Committee.

Article 11. To see if the town will vote to raise and appropriate the sum of \$1,200 for the purchase of radar speed equipment. Recommended by Budget Committee.

Article 12. To see if the town will raise and appropriate the sum of \$1,600 to help support the Home Health Agency. Agreeable

to a petition signed by Ethel Saunders and others, Recommended by Budget Committee.

Article 13. To see if the town will vote to authorize the Selectmen to appoint an assessor to appraise property and maintain the tax map, and to appropriate the sum of \$6,000 for this purpose. Recommended by Budget Committee.

Article 14. To see if the town will vote to authorize the Selectmen to require a notification of intent to build, for all structures or improvements in excess of \$500 and to authorize the Selectmen to enforce a minimum penalty of \$5 for non-compliance. Recommended by Budget Committee.

Article 15. To see if the town will vote to transfer the sum of \$15,000 from the Trust Fund for Survey of Streets and Tax Map to a Conservation Fund for the purchase of land for conservation purposes. Recommended by Budget Committee.

Article 16. To see if the town will vote to authorize and empower the Planning Board to approve or disapprove, in its discretion, new subdivisions as provided in Chapter 36, Sect. 19-29 inclusive, of the New Hampshire Revised Statutes Annotated 1955. Recommended by Budget Committee.

Article 17. To see if the town will vote to subsidize ambulance service in the Town of Conway for a period of two years, and to raise and appropriate the sum of \$17,000 for the first year, April 1, 1970 to April 1, 1971. Recommended by Budget Committee.

Article 18. To see if the town will authorize the selectmen to establish an Ambulance Commission for the purpose of preparing final plans and specifications for a Municipal Ambulance Service, and to raise and appropriate the sum of \$1,000 for any expenses incurred by this Commission. Recommended by Budget Committee.

Article 19. To act upon any other business that may legally come before said meeting.

Given under our hands and seal at Center Conway, this 19th day of February, 1970.

Budget Committee

# Town of Conway Selectmen's Report

The year 1969 was an expensive one for the Town of Conway due to extreme weather conditions. Our budgeted figure for hired equipment was way over expended because of help needed for snow removal and plowing. When the spring run-off started, we had about 30 culverts to be repaired or replaced. There was a section of dirt road on Crown Hill in South Conway that was impassable for a period of two weeks which required several thousand dollars to repair. These are a few of the unusual things which occurred over and above the usual maintenance problems.

Looking on the brighter side, the fall of 1969 required a minimum of winter maintenance in terms of snow removal. The special article concerning rebuilding and draining Seavey Street voted in 1968, was successfully completed. Using a new technique in road re-building, we were able to end up with hot top surfacing instead of the usual asphalt mulch for the same amount of money appropriated. By combining certain State aid funds, the east end of Kearsarge Street drainage was incorporated in the Seavey Street drainage at no extra cost. It is planned to replace in the spring certain trees that had to be cut to facilitate this project.

A program of street surveying was instituted this year which has been long overdue. The Town has been setting aside money for this purpose for quite a few years. The compact area of Seavey St., Kearsarge St. and Mechanic St., in North Conway was surveyed according to original road descriptions, permanent monuments set, and the plan registered with the Secretary of State. A plan to survey the streets involved in the Conway Village Sewer projects was not implemented because Mr. Roger Burnell, Surveyor, was tragically injured early in the summer and was unable to do anything in 1969. It is hoped that this work will be completed in 1970. The Board of Selectmen intends to continue this project of street surveying as it is of utmost importance in a growing community.

In May of 1969 a special town meeting was called at which a Police Commission was approved. Subsequently in June the Commissioners were elected and the operation of the Police Dept. was assumed by the Commission August 1. Previous to this, money was appropriated to purchase cruisers, but after investigation, the Board decided to lease three cruisers for a period of two years. It remains to be seen if this is a satisfactory arrangement.

An overall valuation increase of \$2.4 million dollars helped hold down the tax rate increase to thirteen percent over 1968. Conway is fortunate in this respect because this condition does not prevail throughout the rest of the state.

There were two and a half miles of new roads accepted by the Board in 1969. There are others which will be ready for acceptance this year. Fringe benefits granted Town employees were Blue Cross and Blue Shield accident and health

insurance and an increase in life insurance. The Board instituted a cleanup campaign by applying the State junk yard law which resulted in some 40 to 50 junk cars being taken to the town dump and elsewhere. This will be followed up this spring. An old sign ordinance applying to the village areas was enforced bringing better than average results.

Several parcels of Town-owned real estate were sold bringing \$5,500.00 into the general fund. This is important because it also puts the property back on the tax rolls.

Looking ahead to 1970 the Board hopes to institute new ideas and procedures to increase efficiency and hold down rising costs. Property assessment records will be put on a computer system so that increased accuracy will result as well as time saved in getting out tax bills once the rate has been set. In this department, the Board has inserted a special article in the warrant for the appointment of a part-time Tax Assessor. After much investigation, it is felt that a dollar saving would result as well as greater accuracy and convenience, not only to the Town office, but also to the Taxpayer.

To further assist the assessing officials, the Board has entered a special article to require a permit for intent to build. It is impossible to keep track of all the new construction under the present setup.

The Planning Board has been reactivated and, at its request, a special article has been inserted to establish sub-division regulations. Again, to economically and aesthetically grow, there should be

some sort of advance planning.

Conservation is very much in the forefront these days, and necessarily so. Therefore, there is a petitioned article to establish a Conservation Commission. There is also a second article to fund this Commission. The Board feels this is not only desirable but essential because of the particular type of economy in Conway. As a start in this direction, the Board has entered into a purchase and sales agreement with C Wallace Whitaker who has offered 100 acres of prime land to be purchased by the Town for conservation purposes. This tract is centrally located in North Conway and the Board feels the Town would be remiss not to acquire it, the real estate situation being what it is today.

Pursuant to approval at Town meeting last March, a one-year contract for ambulance service was made with the two local funeral directors. Because of the magnitude of this problem an ambulance committee of five was appointed by the Board and instructed to investigate and recommend a solution at a later date. This has been done and, after several meetings, two special articles resulted. One article asks for \$17,000.00 to support the first of a two-year contract negotiated with the two local funeral directors. The second asks for \$1,000.00 expense money to implement a municipally owned ambulance service of some kind. Details and capital expenditures will be worked out in the future. At this time I am pleased to say that the Board has met with wonderful cooperation from the bordering town

Selectmen. It has been most gratifying.

Because of anti-pollution laws passed at the 1967 Legislature, ways and means to replace our Town dump have been investigated over the past 18 months. As a result, Conway is being considered as a site for an open pit incinerator pilot program, which will be partially funded by state and federal money. This would be a facil-

ity which would take care of the surrounding towns as well as Conway.

The foregoing hits only the highlights. 1969 was a trying as well as a busy year. We look ahead to 1970 eagerly with the presumption that things have to get better. If our plans work out, Conway will be the better for our efforts.

Chester B. Lucy, Chr.  
Board of Selectmen

## Water Safety Program — 1969

In 1969, we again asked for \$1,000 for assistance with the Water Safety Program for the Town of Conway. 363 children were enrolled in classes. Center Conway children attend class at Conway Lake. Conway village children may attend either the first session with children from Madison, which is taught at Silver Lake, or the second session which is at Crystal Lake, with pupils from Eaton. North Conway, Kearsarge, Intervale and Redstone send their children to class at Echo Lake.

The expenses for 1969 are listed. Salaries and mileage are combined:

Crystal Lake	\$438.72
Conway share at Silver Lake	111.17
Echo Lake	553.26
Conway Lake	115.20
	<hr/>
	\$1,218.95

The Conway Chapter, American Red Cross, the co-sponsor for this program, pays all of the other expenses connected with the program. This includes training of the instructors. We did not send a student to Aquatic School in 1969, but must plan to do so in 1970. This costs \$65. Mr. John Currier, Water Safety Director, will need a trained Water Safety Aide at Echo Lake to help with the 40 children in one advanced group of Beginners. This will add about \$83.80. He also wishes that more 14 year olds would sign up as Water Safety Aides in Training. They later become Instructors, better trained because of this experience.

## REPORT OF AMBULANCE COMMITTEE

To the Board of Selectmen, Town of Conway, N. H.:

Pursuant to an article in the Warrant for the Conway Town Meeting in March 1969, the Board of Selectmen appointed a committee to inquire into ways and means of providing the Town of Conway and neighboring communities with emergency and regular ambulance service. The individuals appointed to the Committee were Roger S. Burnell of Conway, Arthur A. Desjardins of Redstone, Dr. William G. Duprey, Jr., and Robert J. Randall of North Conway, and David Y. Taylor of Bartlett of whom Mr. Taylor was elected by the Committee to serve as Chairman. The committee suffered from the loss of services of two of its members for significant periods during the active work of the committee.

At the outset, the committee contemplated contacts with the North Conway Fire Department, the Memorial Hospital, the Conway Police Department, and representatives of area towns to discuss and to develop the most feasible means of providing ambulance service to the area.

The first discussion took place with the North Conway Fire Department:

(a) At the present time there are no full-time men employed by the Fire Department other than the chief, Mr. Raymond Lowd. The commissioners felt that it would be next to impossible to provide emergency ambulance service on a volunteer basis for the reason that they felt that the additional burden on the volunteers (who would to a great extent be the same volunteers who now serve the Fire Department) would tend to discourage or dilute their interest in volunteering for either service. Daytime at present poses no problems with respect to manpower. Nights and during vacation periods response by volunteers diminishes. The solution, of course, is to provide full-time personnel to serve during the periods of difficult volunteer response.

(b) The matter of communications was stressed and the need for 24-hour communication center to serve not only the ambulance service, but the police and the several fire departments, was emphasized. At the present time day calls for fire and rescue services are taken by Lyman's Gas Station and night calls are taken by Bill Dionne.

(c) Space for the ambulance is not available in the present North Conway Fire Department building but enclosed space can be added behind and connected with the present building.

(d) The feeling of those present whose interest was in the North Conway Fire Department, viz., the three commissioners, Dana Haley, Raymond Lowd, and Fudd Chinnock, was of reluctance to undertake the emergency ambulance service. They felt that a more appropriate place for the location and operation of the ambulance

service was at the Memorial Hospital. However, they recognized that, in the absence of any other source of emergency ambulance service, the North Conway Fire Department provided the most logical resource for the service and they agreed to submit a tentative proposal for providing the service. Their proposal is attached to this report.

Arrangements were made for the committee to discuss emergency ambulance service with the Trustees of the Memorial Hospital and this was done at their regular meeting in May. The committee noted that, of the several possible means of providing emergency ambulance service, operation by the hospital seemed to be the most satisfactory method for the following reasons:

(a) Ambulance and its trip personnel would be immediately available at all times.

(b) Ambulance located at the hospital would provide the least possible travel and expense in fulfilling its function of emergency service.

(c) Barring multiple accidents at the same time, reliability of service would be almost infallible.

(d) Personnel whose primary duty would be ambulance operation could be usefully employed in hospital work or training in the hospital, between calls.

(e) Quality of medical skill at the accident site would be the highest.

(f) The hospital is an area asset and area service and operates without regard to political subdivisions such as town and precinct lines. Public support for ambulance service would be much less controversial on this basis than if the ambulance service was to be provided by a political subdivision such as a town or precinct. Support by town and precinct budgets which involves total support by one such subdivision and collection of funds from other such subdivisions involves a difficulty and an acceptance more readily rendered to a recognized charity or public service, than to competitive or rival political subdivisions.

(g) Costing and billing systems are already established in connection with hospital operations and collection results tend to be better. Emergency ambulance service is a cost already recognized by most medical insurance systems.

(h) Emergency ambulance service is a medical function, the hospital being the destination of almost every emergency ambulance call. Emergency ambulance service is good if it brings the victim speedily to the hospital; it is much better if it can bring the hospital to the victim.

Costs of ambulance service were outlined to the trustees and some discussion followed. In general the trustees did not appear to be receptive to operation of an emergency ambulance service by the hospital. The employment of ambulance service personnel in hospital duties between trips seemed to be a stumbling block in that they

thought that such personnel might be engaged in duties from which they could not be released immediately to respond to an ambulance call. Further, the furnishing of facilities and space for ambulance garaging seemed to create problems.

It seemed to the committee that the trustees did not grasp clearly if at all that the cost of the service was to be subsidized and that the subsidy might be made to yield benefits to the hospital even after complete provision of the ambulance service. In any event, after the June meeting of the hospital trustees, the committee was advised that the hospital was unable to assume responsibility for emergency ambulance service (letter attached herewith).

The committee contacted the chairman of the newly-elected Police Commission of Conway to arrange for a meeting with the commission. The chairman indicated that the commission was too much involved in its own shakedown and problems to discuss the operation of an ambulance service at the time but would be pleased to discuss it later after their own affairs were in better order. As of now no meeting has been held with the Police Commissioners.

Because of the apparent importance of communciations to the successful operation of any service which is emergent in nature, a second meeting was held with the North Conway Fire Department for further discussion of this aspect. The points developed at this meeting were that:

(a) An all-purpose 24-hour communication service including all communities in the Mount Washington Valley area and possibly immediately south thereof is most important and urgent, even in connection with presently operating services only. Rising population, rising values, and rising crime presage needs not now anticipated for co-ordinated 24-hour communication between all public services in the area so that prompt, effective, and responsive service can be rendered in any emergency.

(b) Such round-the-clock communication should be operated by an independent public agency, staffed by reasonably paid, competent personnel, capable of operating under emergency conditions, and qualified and authorized to direct initial response to any emergency call.

(c) Installed equipment in the communication center should provide capability for alerting and dispatching any emergency service, relaying and/or monitoring communications between emergency units, sounding public alarms as may be necessary, calling designated duty personnel by means of red networks and similar wire communications systems, assuring adequate communication regardless of weather or climatic conditions, and should provide for instant and automatic standby power for center operations in the event of regular power failure. Field equipment should be such as to eliminate any dead spots in the communication area. Vehicle equipment should provide for two-way communication with the communication center and

with other emergency units. Two-way communication back-pack units should be available for duty personnel responding to emergency calls beyond the reach of vehicles.

(d) Although it is recognized that planning and implementing such an all purpose communication system will take several years, a beginning should be made immediately. Definitive planning should be undertaken utilizing qualified retired individuals residing in the area, if any, and ultimately employing competent electronic and communication consultants. With scope established, used equipment suitable to our operation should be sought through trade channels. Also, although all public and emergent services which might ultimately be covered by a central communication system should be invited to participate, a commencement should not await a commitment from each of these agencies. Rather, a communication center should come into operation for those agencies that will use it, and as reliability and usefulness is proven, other agencies should be urged to come in.

During the tenure of the committee, Mr. Lawrence Stickney, owner and operator of the Gold Cross Ambulance Service in Claremont, New Hampshire, inquired of the Conway Selectmen as to providing ambulance service and was referred to the committee. The committee met with Mr. Stickney and at a later date he indicated that he would undertake the ambulance service at a subsidy of \$17,000, the service to include two fully equipped ambulances and a station wagon equipped for back-up work. His price was based on the granting of an exclusive franchise for ambulance service in the area served and anticipated complementary work for his vehicles such as police cruiser duty. Mr. Stickney conferred with the Conway Selectmen and the committee has had no contact with Mr. Stickney since that time.

Emergency ambulance service for most of the communities in the Mount Washington Valley is currently being provided on an interim basis by two funeral establishments, the Richard D. White Funeral and Ambulance Service of Conway and the Furber Funeral Home and Ambulance Service of North Conway on a subsidy of \$12,000 for one year divided equally between the two establishments. The committee inquired as to the interest of these concerns in providing emergency ambulance service on a continuing basis and was advised informally that they would be interested if the subsidy were to be increased to about \$17,000. The increase in subsidy is necessary because of the need to provide some improvements in ambulance equipment, better garaging, and increase in staff in order to maintain around-the-clock availability of service.

Because the Town of Plymouth, New Hampshire, was faced with the termination of ambulance service by their local undertaker at the same time that the Town of Conway was similarly faced, the committee got in touch with an official of the town to discuss its current situation. At Plymouth's Town Meeting in March 1969, the voters

approved of the town undertaking to provide emergency ambulance service and as of October 1st, the town commenced this work. Plymouth provides its emergency ambulance service to Rumney and other adjacent towns as well.

The emergency ambulance is stationed in the Plymouth Fire Department building and is manned on a volunteer basis. The Plymouth Fire Department building also houses the communication base for the Plymouth Fire Department, the Plymouth Police Department, and the White Mountain National Forest. The communication center is staffed 24 hours a day.

In undertaking its task of providing emergency ambulance service for the community, Plymouth inquired as to sources of funds in support of the venture. The Federal Highway Safety Act of 1966 provided a source. Upon application, federal funds were granted for half the cost of the new emergency ambulance estimated to be \$16,000. Actual cost of the ambulance, fully equipped, proved to be slightly in excess of \$18,000 and Plymouth was, at the time of the committee's visit, requesting additional federal funds to fully cover the half cost.

In connection with providing emergency ambulance to other communities, Plymouth has entered into written contracts with each such community establishing the compensation for each emergency call. The terms of the agreement with the Town of Rumney, for example, set the rate at \$20.00 per call plus \$8.00 per hour for each hour or fraction thereof after the first hour.

The circumstances requiring ambulance service fall into two categories. The first category involves the movement of sick or injured individuals from home or the site of an accident to the hospital. In this circumstance the individual is without medical facilities or attention and needs both in an indeterminate quantity. Speed in providing both is of the essence. The second category involves the movement of sick or injured individuals from one hospital to another or from a hospital to home. In this circumstance the individual has both medical facilities and attention. In most cases of this kind the movement may be scheduled and accomplished during normal working hours. Speed while important is not of the essence. It is recognized that in occasional cases in this category, as when an individual must be moved from one hospital to another because of lack of needed facilities or know-how at the first hospital, emergency conditions will ensue.

Let us take a look at ambulance service in the first category which is in fact, emergency ambulance service. The objective of emergency ambulance service is to provide medical know-how and medical facilities to the individual in need in the shortest possible time, all factors considered. Inasmuch as the needs of the individual are unknown or known only by implication, the ambulance should carry equipment necessary to deal with a variety of treatments: suffocation,

bleeding — internal and external — shock, coronaries, etc. More than one individual may require attention. The time to place the individual involved under adequate medical care will be cut in half if medically trained personnel accompany the ambulance. This service is best rendered by a fully equipped ambulance capable of carrying two to four patients at one time, manned by a driver who is available around the clock and a medically trained attendant.

The objective of regular ambulance service is to provide safe, comfortable transportation for individuals already under medical care. Ambulance equipment suitable for the care of the particular patient while en route should be provided as well as a medically trained attendant if necessary. Usually only one patient is involved. Transportation to points outside the area served by the emergency ambulance will frequently occur. Ambulance service of this type can usually be scheduled and can be performed during usual working hours. This type of service is readily provided by funeral establishments, complementing their regular business.

Another type of emergency service is frequently required in any community. This is rescue work, such as hunting for lost people, extricating people from dangerous or difficult situations, body recovery as in drownings or falls. Emergency ambulance service is not required in these circumstances in the initial call but may be required later.

The town of Conway, with the help of neighboring communities, has subsidized this year the ambulance service provided by the two funeral establishments in the area, without differentiation between emergency and regular service as discussed herein before. The committee believes that the nature of the two services is distinctly different and that community or public responsibility should be limited to emergency ambulance service only. There is a public obligation to respond to emergent distress calls as there is to respond to emergent fire and police calls. The response must be made without time for, or even thought of, compensation or cost of the service rendered. The response must be made with sufficient expertise and equipment to assure the control or elimination of the emergency. Clearly the burden of providing emergency ambulance service is a public one. On the other hand, regular ambulance service is more in the nature of a business operation in that it can be accomplished during usual business hours, encompasses a larger area of operations than does emergency service, has a high probability of collecting for service rendered, and does not readily dovetail with an emergency ambulance operation. The same conclusion has apparently been drawn in Plymouth, as the funeral establishment which terminated all ambulance service last year has agreed to continue to provide regular ambulance service, and the agreements which Plymouth has entered into with neighboring towns specifically exclude calling of the emergency ambulance for regular ambulance service.

A brief listing of probable costs of emergency ambulance service follows.

Item	Capital Expense (1st year only)	Annual Expense		
		Deprec.	Maint.	Operation
Primary ambulance	\$15,000	\$2,000	\$300	\$ 300
Ambulance equipment	3,800	450		100
Support facilities	700	40		600
Garage	11,000	1,560	340	100
Personnel (24-hour staffing)				24,000
Employee benefits				4,000
Insurance				700
Other costs				1,200
Totals	<u>\$30,500</u>	<u>\$4,050</u>	<u>\$640</u>	<u>\$31,000</u> — \$35,690

The above figures contemplate a totally new establishment and a completely new operation. To the extent that equipment can be put to some supplementary use, or personnel can be gainfully employed when not actually rendering service in connection with ambulance functions, the cost of ambulance service can be significantly reduced. This is particularly true of personnel, who constitute better than 70% of the annual cost of emergency ambulance service. This fact dictates consideration of the use of existing community facilities to the greatest extent possible.

As indicated above, the cost of round-the-clock emergency ambulance service, not including initial capital costs, appears to fall between \$30,000 and \$35,000 per year. The committee has not been able to pinpoint the average number of emergency ambulance calls per year in the Mt. Washington Valley area but it is estimated to be between 50 and 60 calls annually. While it is desirable to have such service available readily at all times, particularly from the point of view of the victim, the call frequently does not seem to warrant the maintenance of round-the-clock staffing unless a personnel sharing arrangement can be established. On a personnel sharing basis, the cost of emergency ambulance service could be reduced by about half and on a volunteer basis by about two-thirds.

The committee believes that the ideal base for operation of an emergency ambulance is the local hospital for reasons set forth hereinbefore. A publicly-supported, hospital-operated emergency ambulance uniquely combines the lowest public subsidy with the maximum public service. A survey appearing in "Economics of Highway Emergency Ambulance Services" shows that hospital-based emergency ambulance service has quadrupled in a five-year period (from 1.1% to 4.5%). Particularly, a hospital based emergency ambulance service seems to provide the perfect opportunity for personnel sharing which

is so essential for reducing the cost of emergency ambulance service and so imperative if around-the-clock staffing is to be provided, while at the same time providing a new and important hospital service in the area. The committee notes with regret the decision of the Board of Trustees that Memorial Hospital is unable to assume responsibility for emergency ambulance service and hopes the Trustees will not overlook reconsideration when it seems to them feasible to do so.

The committee believes that support of the emergency ambulance service should come from all towns in the service area in the form of funds appropriated for the purpose by vote of the town at the regular town meeting. For towns not participating in this manner, a contract providing for compensation on a per-call basis might be entered into.

Public funds are available on a federal-state matching fund basis under the Highway Safety Act of 1966. Grants up to 50% of the cost of providing and operating an emergency ambulance service may be made, but only for that part of the service rendered in connection with highway accidents or safety. Grants may not be made or used for emergency ambulance calls made in connection with heart attacks, falls, ski accidents, or any situation not involving highway safety. The acceptance of federal funds inevitably involves the acceptance of federal standards as to equipment and service rendered. Federal funds includes not only the grants under the Highway Safety Act but also payments received in connection with service provided to Medicare patients. The committee feels that these imposed standards will sooner or later preclude the use of funeral vehicles for emergency ambulance service. For this reason the committee feels that it is in the best interest of the town and the area, that the town acquire now a single purpose emergency ambulance fully meeting currently established standards.

The committee discussed the matter of support for emergency ambulance service with Mr. Walter F. Mead, Co-ordinator of Highway Safety, New Hampshire Highway Safety Agency, Stickney Avenue, Concord, N. H., who provided most of the information in the preceding paragraph. Mr. Mead advised that, as of the time of our discussion, his agency had exhausted its funds for grants for the current federal fiscal year. He presumed, however, that funds for grants for Highway Safety Programs would again be available after July 1, 1970. Mr. Mead also advised that the modus operandi for requesting federal-state aid was through locally established Town Highway Safety Committees and that support is available for programs dealing with other aspects of highway safety as set forth in a publication entitled "National Highway Safety Standards," five copies of which are delivered with this report.

The committee recommends:

(1) That the Town of Conway undertake to provide only emergency ambulance service to the Town of Conway and to neigh-

boring towns in the area to the extent that such neighboring towns agree to share the cost thereof.

(2) That the town acquire a single purpose emergency ambulance fully meeting currently established standards and all necessary supporting facilities and equipment including a garage for the ambulance.

(3) That the town seek a federal grant to defray as much of the cost of the second recommendation as is possible.

(4) That the town contract with a suitable agency, public or private, for the operation of the emergency ambulance, staffing to be on a volunteer or part-time basis, the contract to be for a period of not less than three years, with terms subject to reconsideration and adjustment annually.

(5) That the town invite and urge neighboring towns to participate in the support and use of the emergency ambulance facility, support to be shared on an equitable basis such as per capita, miles of road, or some other. For towns not sharing directly in support of the emergency ambulance service, suitable rates on a per-call basis should be established and agreed to.

(6) That, recognizing the need for time to set the course and implement the mode of emergency ambulance service chosen by the town, the town continue the ambulance service now subsidized by the town for such time as may be necessary.

The committee makes no specific recommendation in regard to establishment of a co-ordinated radio communication system in the area except to say that it considers such a system to be an important, even indispensable, capability for effective use of men and equipment in defense against disorder and disaster. There appears to be several agencies in the state who are studying and encouraging local and statewide communication systems, and advice is certainly, and financial help may be, readily available to the town. Specifically, Mr. Leslie A. Smith is Executive Director of Project Airwaves of the New Hampshire Hospital Association and it is Mr. Smith's business to establish channels of communication between New Hampshire's hospitals and the emergency ambulance services with which they work.

The committee will be pleased to discuss this report with you at your convenience.

Respectfully submitted,

ARTHUR A. DESJARDINS  
WILLIAM G. DUPREY, JR. M.D.  
DAVID Y. TAYLOR

January 12, 1970

**PRELIMINARY FEASIBILITY STUDY OF AREA AMBULANCE  
SERVICE TO BE SUPPLIED BY THE NORTH CONWAY  
FIRE DEPARTMENT**

This proposal has been drawn up at the request of the ambulance committee appointed by the Selectmen of Conway in an attempt to determine the feasibility of the North Conway Fire Department supplying ambulance service to the area now being served by the Furber Funeral Home and Richard White Funeral Home. It must be understood that the figures and proposals set forth in this report are tentative in nature and intended only to give a general idea of the situation. All such figures and proposals would have to be reviewed and researched in detail before any commitments were made by the North Conway Fire Department.

As a basis for this report, it has been assumed that at least two trained ambulance attendants would be available at all times with a backup pool of manpower to call on for simultaneous ambulance calls from more than one location. Two vehicles would be supplied, one a first-class ambulance which would be used on all long distance runs as well as a portion of the routine local runs. The other vehicle would be a less costly van type vehicle which would be used when the first one was out on a run as well as for accompanying the Rescue Squad at emergencies.

The supplying of this service would present some serious problems to the North Conway Fire Department as now constituted and would require major realignments in the department. These problems can be broken down under three general headings: vehicles; dispatching; and manpower. These are taken up one at a time in the following report.

**VEHICLES**

A first-class ambulance costs from \$13,000 on up. On this basis, and assuming a five-year life, with \$3,000 salvage value at the end of five years, it would cost \$2,000 per year for depreciation and another \$1,000 for operating expenses, including insurance, repairs, tires, gas, oil, etc. The backup vehicle would be less costly initially but probably would have a shorter life. This is estimated at \$6,000 initial cost, with a three-year life, and \$1,500 salvage value. This means \$1,500 yearly depreciation on this vehicle, plus \$1,000 yearly operating cost.

The housing of these vehicles would require an addition to the fire station of about 15 feet x 50 feet on the south side of the building, with a door facing Main Street. This would cost an estimated \$11,000 based on 750 square feet at a building cost of \$15 per square foot. If this were paid off on a ten-year note, the yearly cost would be about \$1,540 with an added \$460 per year for maintenance and utilities, making a total of \$2,000 for this purpose.

## DISPATCHING

The present dispatching and communications system of the department would be incapable of handling the added load of another whole category of emergency calls, which would require classifying the nature of these emergencies, as well as the various classifications of fires and rescue calls. It also requires the dispatchers to keep track of manpower and call them out from a duty list which would be constantly revised. The answer to the communications problem for the ambulance service should be tied into the answer for the communications problem for the Conway Police Department, and for the several fire departments in the town, and possibly including some neighboring towns. The need already exists for a 24-hour-a-day communications center, manned by competent and alert personnel, whose job would be to handle all emergency calls for police, fire and ambulance for the whole Conway area. This center would be equipped with all necessary communications gear to be in constant radio touch with police cars, fire trucks and ambulances. The fire alarms in any of the fire stations could be sounded from the center by radio controls or by leased phone lines. The dispatchers would be in complete touch with each fire department and would dispatch fire trucks according to the nature of the fire and the location, taking into account known conditions such as the availability of water. This would tie together all the separate fire departments and make possible a much higher degree of fire protection for everybody, with much more efficient utilization of existing equipment in the area.

The Police Department would benefit by having a much higher class of dispatching on a round-the-clock basis, as well as being in constant touch with the other emergency services of the area.

Above all, the people who require the emergency services and who must pay the bill, would benefit by more thorough and efficient service, with the elimination of confusion over whom to call for what service.

The operating cost of such a communications center is estimated at \$22,800 per year, based on four full-time men at \$5,200 per year, and operating costs of \$2,000 for phones and maintenance of radios and other equipment. If this is prorated on the basis of 1/3 police, 1/3 fire and 1/3 ambulance, this would mean a yearly cost of \$7,600 charged to the ambulance service.

## MANPOWER

The proposed method of supplying manpower for the ambulances would be by partial coverage by standby personnel, who would be called as needed by the dispatcher and partial coverage by full time paid men who would cover the hours when most of the standby men were at their regular employment and unavailable. It would still be necessary to depend on backup men to help the full-time men who would be alone on a shift. These backup men would be men who

would be available from their regular employment during work days to go on a local ambulance run.

The cost of two full-time men who would be on duty at the fire station from 6 a.m. to 6 p.m. seven days a week, a total of 84 hours, or 42 hours per week per man, would be \$10,400, based on a yearly salary of \$5,200 per year. Part time backup helpers for these men during these hours five days a week, except Saturdays and Sundays, would cost an estimated \$3,000 per year. Standby men who would probably, but not necessarily, be firemen, would be paid a fee to be available on call to cover ambulance calls from 6 p.m. to 6 a.m. every day, and to assist the day man on Saturdays and Sundays when the parttime backup men would not be at their regular employment and therefor unavailable. An estimate has been made of \$6,000 yearly to pay these men for standby duty.

The total for all categories of ambulance attendants as outlined would be \$19,400 yearly.

In addition to this, in order to get the second ambulance in service, especially during summer weekends when many of the men would be out of town, it might be necessary to sound the fire alarm, in which case, any fireman answering is entitled to one hour's pay, even if he is released immediately. It is difficult to estimate this cost, but an added \$600 to bring the total to \$20,000 would seem reasonable.

This whole problem of manpower is one which would most likely require experimenting and adjustment to find the best combination of full time, part time and standby manpower, but it appears that the \$20,000 yearly figure would be a minimum.

It would be part of the dispatchers' duties to set up manpower schedules to assure adequate coverage at all times.

### SUMMARY

The estimated yearly costs for the North Conway Fire Department to supply ambulance service to the area, as explained in the foregoing report would be as follows:

#### Vehicles

Primary ambulance	
Depreciation	2,000.00
Operating expenses	1,000.00
Backup vehicle	
Depreciation	1,500.00
Operating expenses	1,000.00
Housing	
Addition to station (10 year basis)	
Principal and interest	1,540.00
Maintenance and utilities	460.00
Dispatching	
Ambulance service share (1/3)	7,600.00

Manpower		
Full-time men (2)	10,400.00	
Standby and part-time men	9,600.00	
Total Estimated Yearly Cost		\$35,000.00

This entire proposal is contingent upon the following conditions:

1. All personnel, including dispatchers, would be employees of the North Conway Fire Department and would be under its supervision and operate on its premises.

2. Ambulances and related equipment would be the property of the North Conway Fire Department.

3. Central communications, substantially as outlined, would have to be accepted by the Town of Conway, on behalf of the Police Department, and by various participating fire precincts, and an equitable apportioning of the costs arrived at between all services and municipal bodies involved.

4. Approval of the voters of the North Conway Water Precinct to allow the North Conway Fire Department to undertake such a program, and to raise such money as would constitute its share.

/s/

Raymond Lowd, Chief  
North Conway Fire Department

THE MEMORIAL HOSPITAL  
North Conway, New Hampshire

June 25, 1969

Mr. David Taylor  
Kearsarge, New Hampshire  
Dear Mr. Taylor:

The Board of Trustees has asked me to inform you that at the meeting of the Board held on Wednesday, June 18, 1969, the following motion was made, seconded, and duly passed:—

“That the Hospital inform the Ambulance Study Committee that the Hospital is unable to assume responsibility for ambulance service.”

Sincerely yours,

/s/

HARALD ROTLER  
Administrator

HR/s

## Report of the Police Commission

On the 14th of July, 1969, the Police Commission for the Township of Conway became a reality as the result of passage of House Bill No. 196, State of New Hampshire.

The Commission was quick to realize that although Conway is a small community by most standards, the problems confronting the Police Department are the very same as those facing large metropolitan areas throughout the country. This has resulted in the Commission holding regular weekly meetings and additional meetings as situations require. The first major step taken by the Commission was the preparation of rules and regulations for the operation of the Police Department. The Commission has established a procedure for the hiring and promotion of all police personnel. It is now necessary that all applicants successfully pass a written examination administered by the State of New Hampshire Personnel Department, pass a physical examination and be interviewed by the three members of the Police Commission. Since the establishment of this procedure, the Commissioners have hired two patrolmen, Officer Maurice Salmon and Officer Michael Glavin, and a Chief of Police, Albert G. Lane.

The Commissioners have made several trips to Concord, N. H., visiting various departments of the State, including State Police, Motor Vehicle, Personnel, Purchase and Property, Traffic Safety and Engineering and Highway, and have also examined the operation of other police departments within the State. It has been determined that many services and facilities are available to the Conway Police Department at no or very nominal cost. An example is the six-week training program offered by the State Police Academy to officers of the Conway Police Department and available without cost to the Conway Taxpayer. The Commission will see that at least one Conway Police Officer will attend these training programs when they become available. This will be in addition to any other program being conducted on a local or county level. Other services available include the purchase of equipment and supplies through the Division of Purchase and Property at vastly reduced costs, examinations for all levels of police work administered by the State Department of Personnel, Boards of Review and Evaluation being only one of the many services available from the Division of State Police, and, of course, a great deal of assistance from the State Traffic Safety and Engineering Departments for the traffic problems being experienced by the Town of Conway.

The Police Department is presently operating on a 24-hour schedule with three police cruisers in use by the department. Early in the year 1969 the Selectmen arranged for the leasing of police cruisers rather than outright purchase. It is hoped this method will pro-

duce a savings. The new communications equipment, purchased by the Selectmen in 1969, has now been installed and the department is now able to communicate on one of the two radio channels available. This has proved to be most satisfactory as communications may continue uninterrupted when municipal channels are overloaded by fire and other departments.

Since the formation of the Police Commission, the Commissioners have been working with the Selectmen and have enjoyed a very workable relationship. It is the intention of the Police Commission to produce a trained professional police force which will provide a high level of law enforcement at less cost to the Conway Taxpayer.

Respectfully submitted,

HARVEY C. BLAKE  
WILLIAM R. BARRINGER  
JOHN P. ROBERTS

Commissioners

## Report of the Chief of Police

### To the Inhabitants of the Town of Conway:

First of all, let me take this opportunity to thank all of the people of this Community for the warm welcome that you have shown to my family and myself upon our arrival to this very beautiful town. Your welcome has been so overwhelming that we have had no difficulties in feeling that we are "at home" in this community.

Coming into a Department at the end of a calendar and fiscal year is probably not the most desirable time for a new administration; but with the enthusiasm that the other members of this Department have shown, plus the diligent efforts of the members of the Police Commission and the concern and sincere interest shown by the people of the town — there is no reason why an efficient and smoothly-run Police Department cannot be operated for you, the people, of the Town of Conway.

Since being appointed as Chief of Police by the Police Commissioners in late December 1969, I have observed that there are some people that think that the Police Department is in a sad state of affairs — Yes, we have our problems, and there are a few areas within this Department that need changing in the way of organization; but with the fine group of Conway residents that are members of this Department and their great interest in being a part of one of the finest professions that any man or woman should be proud of, these organizational problems can be solved.

With understanding, encouragement, training and hard work in the future we can have here, in Conway, a Police Department that is looked upon as being one of the finest in the State of New Hampshire.

This year, besides the in-service training, we have already become involved with night-school training sessions in co-operation with other law enforcement agencies in Carroll County. These training sessions are one night a week for a twelve-week period, ending in late April. Besides these sessions we will be given further training in such areas as the FBI Firearms Instruction Course, Criminal Investigation (specialized), Narcotics, Instructional Sessions on Patrol Procedures, and First-Aid Instruction (this Department has its own First-Aid Instructor, Patrolman Maurice Salmon, who received his certificate in January). All members of the Department, Patrolmen and Specials, will be taking part in these courses.

As part of the changes to be made in the Department to enable us to give you better police Services there has been an upgrading of our telephone communications. We have increased our incoming trunk lines from one emergency line to three — hence, no longer should you have the frustrating experience of finding a busy line when you dial Police Headquarters. To make this change, it should be noted, that our emergency number is now — 356-5715.

This year we hope to make a few modifications in our radio, communication system in order to keep pace with the many changes that are taking place in Police Communications throughout the entire State of New Hampshire. These changes taking place in this area of communications are such that eventually police departments throughout the State can be more or less tied together. In a sense, the Conway Police Department will be able to be in constant contact with all Municipal Police Departments, the New Hampshire State Police and all County Sheriff Departments and vice-versa.

Among some of the other additions to the Equipment of the Department, we anticipate the purchase of new Electronic Sirens and Blue Lights for the cruisers. These new lights and sirens will not only afford greater protection to the officer operating the equipment, but will also mean better protection for you the motorist.

Included in the Town Warrant this year is a special article for the purchase of a radar speed detection unit. This unit will be of a great importance in the detection of some of our faster motorists and therefore Conway will have a lot more security on our highways and streets. Not only can this radar be used for the apprehension of the speed violator, but it can also be used to make surveys of our speed zones. These surveys can be used to help formulate better traffic patterns and conditions; an example of this is perhaps some roads are in need of a slower speed zone and others may need a faster speed zone and a radar survey of these areas can tell us if the particular zone can be changed safely.

The increase in wages this year is just one step closer to bring-

ing the members of this Department the wages that are on a scale with other police departments that have similar criminal and traffic problems as Conway.

In January, 1969, this Department recorded 15 summonses and arrests. During January, 1970, we have recorded 64 summonses and arrests. This figure is not to be misconstrued that there has been 400% more crime in Conway, although crime has risen here in Conway as all over the United States, but it is just a reflection of the coordinated efforts of all the members of your Police Department. It is their way of showing the inhabitants of the Town of Conway that when they have a great faith in your backing — they show that they can and will do a just and honest job in their positions as Law Enforcement Officers. Today, more than ever, Law Enforcement is a profession that can only be done by Professionals.

President Nixon in his State-of-the-Union Address this year made several statements as to his feelings of the need for better law enforcement and for more legislation by Congress to give Law Enforcement Agencies more tools to fight crime.

The President in his address while talking to a Joint sessions of Congress said, “. . . we must declare and win the war against the criminal elements which increasingly threaten our cities, our homes and our lives. . . .”

To further emphasize this “War on Crime,” Mr. Nixon goes on to say, in part, “. . . State and local law enforcement agencies are the cutting edge in the effort to eliminate street crime, burglaries and murder, . . .” and “. . . the primary responsibility for crimes that affect individuals is with local and State . . .”

I believe that what President Nixon was saying here was for not only the Congress to rally around in the war on crime, but for every citizen of this very beautiful and prosperous country of ours, the United States of America, to get behind the Law Enforcement Agencies and give them the respect, tools, and equipment to fight crime and restore law and order.

Law Enforcement Officers are not individuals that are doing a job for themselves but for you, the citizens of Conway and the State of New Hampshire, they are here to help and protect you, your family, and your property, and to see that persons or perpetrators of any injury or damage inflicted upon you or your property be dealt with as the laws prescribe. But they cannot do this without your help. They need you to help them be your Professionals in our fight against crime.

With this help, maybe sometime before the end of the “seventies,” like President Nixon, we can “. . . see an America in which we have waged a winning war against Crime. . . .”

ALBERT G. LANE,

Chief of Police

**REPORT**  
**OF AN EXAMINATION AND AUDIT**  
**OF THE ACCOUNTS**  
**OF THE**  
**TOWN OF CONWAY**  
**FOR THE FISCAL YEAR ENDED DECEMBER 31, 1969**  
**MADE BY**  
**The Division of Municipal Accounting**  
**State Tax Commission**  
**JANUARY 19-22, 1970**

**SUMMARY OF FINDINGS AND RECOMMENDATIONS**

January 28, 1970

Board of Selectmen  
Conway, New Hampshire  
Gentlemen:

Submitted herewith is the report of an examination and audit of the accounts of the Town of Conway for the fiscal year ended December 31, 1969 which was made by this Division in accordance with the vote of the Town. Exhibits as hereafter listed are included as part of the report.

One of the enclosed audits must be given the Town Clerk as part of the permanent records.

**SCOPE OF AUDIT**

Included in the examination and audit were the accounts and records of the Board of Selectmen, Treasurer, Tax Collector, Town Clerk, District Court, Library, Trustees of Trust Funds and Highway Bond Fund.

**FINANCIAL STATEMENTS**

**Comparative Balance Sheets – December 31, 1968-December 31, 1969: (Exhibit A-1)**

Comparative Balance Sheets as of December 31, 1968 and December 31, 1969, are presented in Exhibit A-1. As indicated therein, the surplus increased from \$23,947.11 to \$28,870.61 during 1969.

**Analysis of Change in Financial Condition: (Exhibit A-2)**

An analysis of the change in financial condition during the year is made in Exhibit A-2, with the factors which caused the change indicated therein.

**Comparative Statements of Appropriations and Expenditures – Estimated and Actual Revenues:** (Exhibits A-3 and A-4)

Comparative statements of appropriations and expenditures, estimated and actual revenues for the fiscal year ended December 31, 1969, are presented in Exhibits A-3 and A-4. As indicated by the budget summary (Exhibit A-4), a net unexpended balance of appropriations of \$42,814.97, plus a revenue surplus of \$25,692.28, resulted in a net budget surplus of \$68,507.25.

**Summary Statement of Receipts and Expenditures:** (Exhibit B-1)

A summary statement of receipts and expenditures for the fiscal year ended December 31, 1969, made up in accordance with the uniform classification of accounts, is included in Exhibit B-1. Proof of the Treasurer's balance as of December 31, 1969, is indicated in Exhibit B-2.

**District Court:** (Exhibit E)

A statement of the accounts of the District Court for the fiscal year is presented in Exhibit E.

**Library:** (Exhibit F)

A statement of the activities in the Library Account is presented in Exhibit F.

**Highway Bond Fund:** (Exhibit G)

The activity in this account consisted of interest income only.

**Statement of Long Term Indebtedness:** (Exhibit I)

A statement of outstanding bonded indebtedness as of December 31, 1969 showing annual debt service requirements, is contained in Exhibit I.

**AUDIT PROCEDURE**

The accounts and records of all town officials charged with the custody, receipt and disbursement of public funds were examined and audited in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as were considered necessary in the circumstances.

Verification of uncollected and unredeemed taxes was made by mailing notices to delinquent taxpayers as indicated by the Collector's records. The amounts of uncollected and unredeemed taxes as indicated in this report are therefore subject to any changes which may be necessitated by the return of verification notices.

**Current Surplus:**

The current surplus (excess of total assets over current liabilities) increased by \$6,923.50, from \$118,947.11 to \$125,870.61 in 1969 as shown herewith:

	<b>Dec. 31, 1968</b>	<b>Dec. 31, 1969</b>
<b>Total Assets</b>	\$560,199.57	\$633,573.08

<b>Current Liabilities</b>	441,252.46	507,702.47
	<hr/>	<hr/>
<b>Current Surplus</b>	\$118,947.11	\$125,870.61
<b>Tax Collector:</b>		

Added taxes should be recorded in the back section of each warrant for the year of Levy of which the added tax applies.

**Conclusion:**

The provisions of Chapter 184 of the Laws of 1955, require that this report or the summary of findings and recommendations (letter of transmittal) shall be published in the next annual report of the Town.

We extend our thanks to the officials of the Town of Conway for their assistance during the course of the audit.

Yours very truly,

O. MAURICE OLESON

Director

Division of Municipal Accounting  
State Tax Commission

OMO:cc

O. Maurice Oleson	}	Auditors
Hugh J. Cassidy		
John J. Durr, Jr.)		Accountant

DIVISION OF MUNICIPAL ACCOUNTING  
STATE TAX COMMISSION  
Concord, New Hampshire  
January 28, 1970

**CERTIFICATE OF AUDIT**

This is to certify that we have examined and audited the accounts and records of the Town of Conway for the fiscal year ended December 31, 1969.

Our examination was made in accordance with generally accepted auditing standards and accordingly, included such tests of the accounting records and such other auditing procedures as were considered necessary in the circumstances

In our opinion, the Exhibits included herewith present fairly the financial condition of the Town of Conway as of December 31, 1969, together with the results of operations for the fiscal year ended on that date.

Respectfully submitted,

O. MAURICE OLESON

Director

Division of Municipal Accounting  
State Tax Commission
