Repository Citation

RISK Editorial Board, *Prospectus and Evaluation Copies Available, Additional Coverage in Indices*, 2 RISK 1 (1991).

This Editorial is brought to you for free and open access by the University of New Hampshire – School of Law at University of New Hampshire Scholars' Repository. It has been accepted for inclusion in RISK: Health, Safety & Environment (1990-2002) by an authorized editor of University of New Hampshire Scholars' Repository. For more information, please contact ellen.phillips@law.unh.edu.

Prospectus Evaluation Copies Additional Index Coverage

Prospectus availability

We recently published a prospectus containing a **call for papers** (with brief discussion of topics of particular interest), **authors' guidelines** (including our manuscript formatting requirements), a listing of members of our **editorial advisory board**, a discussion of **the use of RISK with personal computers**, a listing of some of the printed **indices and on-line research services** through which the contents of RISK may be accessed — as well an author and title index for volume 1.

Most of that information also appears in volume 1. Still, subscribers may find it helpful to have it all in one place, and those whose subscriptions begin with this volume should find it particularly useful. Please write or call if you would like a copy. Also, we would be happy to send a second (or third) copy to pass along to prospective authors or subscribers.

Evaluation copies of RISK

Evaluation copies of RISK are available to acquisition librarians or committees — subject only to limited supply of some back issues. If evaluation copies are needed, please let us know. We will do our best to supply them.

Additional indices covering RISK

We are pleased to announce that the **Public Affairs Information Service, Inc.** beginning with volume 1, has included RISK in print, on-line and CD-ROM editions of its indices. Also, the **International Academy at Santa Barbara** now covers RISK in its **Environmental Periodicals Bibliography** (published six times a year) and in its **Environmental Bibliography** database that can be accessed on-line via **DIALOG Information Services, Inc.** Finally, the contents are indexed in **Risk Abstracts**, **Pollution Abstracts**, and **Health & Safety Science Abstracts** — all published by **Cambridge Scientific Abstracts**.

Inclusion in these additional databases virtually guarantees that articles appearing in RISK will be accessible to professionals in all disciplines, not just in the U.S. but throughout the world. Nevertheless, we are actively seeking further index coverage and are devoting considerable effort to ensuring that our own indexing is as helpful as possible.

Technology Transfer

Those who found Harnett's article in our last issue of interest may want to consider the starkly contrasting view presented in: Schriesheim, *Toward a Golden Age for Technology Transfer*, **ISSUES IN SCIENCE AND TECHNOLOGY**, Winter 1990-91, at 52.
