Report of Superintendent of Schools

To the School Board of New Castle:

I herewith present to you my nineteenth report as Superintendent of your schools. Included will be the statistical report for the school year 1947-48, and the pupil enrollment in our local schools as well as a list of the pupils attending the Portsmouth schools during the current year. The report of the school nurse will also appear.

The present year began Wednesday, September 8, 1948, with an enrollment of forty-three pupils, twenty-eight in the primary room and fifteen in the upper rooms. This compares with an enrollment of thirty-six last year. The earlier opening of the school year was made necessary by the ruling of the State Board of Education that the calendar must consist of 180 days spent in actual school service.

It is a pleasure to report that New Castle now employs a teacher of Art. Mrs. Doris Parker explained her plans and objectives to the Parent-Teacher group at a regular meeting of the association. She was cordially welcomed. Mrs. Parker works understandingly with children. The pupils like to have her come and are receiving results in increased ability to reproduce the pictures they themselves have in their minds. Art, as taught in the modern way, moves from within the pupil's mind to outside activity. This is exactly the opposite direction that was taken in former years. It is a development of the pupil and not something superimposed from without. The fact that Mrs. Parker teaches music also leads to an interesting unity of purpose in these subjects.

Reports coming to us from Portsmouth schools

show our graduates doing fine work. In fact, some of the teachers have volunteered commendation for the preparation the New Castle schools offer. This result is, of course, due to our teachers, Mrs. Woodeson and Mrs. Thompson. Their pupils do consistently good work. Their standards of scholarship are high.

Mrs. Lindsey, our school nurse, is ever watchful of the welfare of our pupils. In addition to regular inspections, she assists during the medical inspections and supervises clinics as needed. The patch test for tuberculosis tendencies was conducted this year. It is planned to repeat this every few years.

The legislature of two years ago appropriated two million dollars for educational aid to the local districts. New Castle received \$920.64 of this fund. This was wholly "General Aid"—that is, money based upon pupil membership. If, as is now proposed, all aid shall be given on an equalization basis, New Castle's share is uncertain. The budget should be considered in view of this condition.

The schools of Union 21 combined with those of the Exeter Union to hold a workshop for the teachers from November 15 to November 19, 1948. These five days were spent for "in-service training" for all the teachers. The state supervisors were in charge and brought to us the latest and most approved methods of presenting subject matter. The first two days were under the direction of Dr. Gertrude Lewis, director of Elementary School Services for the New Hampshire Board of Education. She discussed the Social Studies of the elementary school, outlining the entire program and helping to solve many of the problems found by teachers in their daily work. It was literally a workshop in which teacher committees worked on definite problems and arrived at their own conclusions based upon modern practices. The last three days of the

week were in charge of Dr. Lura Bruce, State Supervisor of Health, and Miss Grace E. Felker, director of Physical Education. The health program for the schools was discussed and ways of guarding the health of the children were considered. The proper use of the playground and of the school rooms for physical education was explained and illustrated. These workshops were held in a majority of districts and those who did not receive the services will be offered them next year.

The small towns are constantly allowing some of the talent developed locally to move to the larger cities despite the fact that the small town offers many opportunities for young people. It would seem that the pupils in our schools should know what the local community has to offer them. The schools, even in the lower grades, should develop a greater interest by school children in their own town. To this end it is suggested that definite time be allotted in the school program for the study of local history—the story of its founding, landmarks, folklore and special events of interest. Also included in the work should be the story of how our people now make a living together with the advantages of working in the town. The question, as to what the town now does to benefit its citizens, would prove of value in stimulating future participation in government officers. The development of an interested and active citizenry will surely react to the benefit of any town or city.

Since such a program is not now available in suitable form for children, the information must be brought together and evaluated before presented as school work. Would it not be possible for a group of interested citizens to work with the teachers in formulating an outline as guide for this study? Any citizen who is willing to help should contact the teachers in order that a committee may be formed.

The New Castle Parent-Teacher Association is actively interested in the school. Its meetings are held regularly and the subjects discussed are pertinent. Membership in all PTA's is open to any person interested in the school or its pupils.

I wish to thank the School Board for their cooperation during the past year. Their understanding of the problems of modern education has been most helpful.

ROY W. GILLMORE,
Superintendent of Schools.
