REPORT OF THE FOREST FIRE WARDEN and DISTRICT CHIEF

In New Hampshire, forest fire control is a cooperative State-Town program. The Town Forest Fire Warden, appointed by the Director, Division of Resources Development upon recommendation of the Selectmen and the State's District Forest Fire Chief is responsible for fire suppression and other related duties. The State shares equally with the Town in the cost of most forest fires, except illegal and careless fires, which are charged to the responsible party. The State further provides fire detection services, prevention programs, fire training for town wardens and crews, and back up equipment for fire suppression.

By authority of the State, the Town Forest Fire Warden controls all outside burning in his town except backyard cooking fires. Any person wishing to kindle a fire when the ground is not covered with snow must obtain a fire permit, free of cost, from the Town Forest Fire Warden. No permits will be issued for fires between 9:00 A.M. and 5:00 P.M. unless it is raining, except commercial purposes.

Please be careful when using fire, remember it can be an extremely useful tool when under control but once allowed to run wild it can become a disastrous and devastating force. Only you can prevent a forest fire.

Number of fires reported and acres burned - 1972 season:

STATE	410 fires	361 acres burned

SUPERINTENDENT'S MESSAGE

Our youth are educated on the basis of transmitting our culture and society so that they in turn will evaluate the ideas and bring about constructive change. The basic premise of education is to teach children to be critical thinkers, good citizens and to provide base skills for employment. Planning and effecting educational change to secure the desired ends entails internal teacher education, community involvement and support and effecting programing modifications while maintaining evaluation, proper financial support, and providing accountability. As society becomes more knowledgeable the perplexities of the educational process increase also.

We have been called upon to establish priorities, elicit objectives and propose procedures to be followed. The cycle of education has revolved again to total emphasis on the individual child with provisions for individual differences and formulation of programs and procedures to meet these differences. The factor of failure is largely eliminated as pupils proceed at their individual rates, interest is high, and relevancy to current society, economics, and politics is apparent. It is difficult for the adult world as interested citizens, parents and certainly educators to revise or abandon "traditionalism" in our frame of reference. Large group instruction, the captive audience lecture approach, and labeling large numbers of children with skill deficiencies as special class or disabled are fast disappearing from the educational scene. The teacher must have a priority commitment to first understanding and teaching children and secondly pursuing and relating his subject area. There are many imperatives in current education and performance goals are of prime significance.

With emphasis on pre-school education, stress on individualization of instruction, removal of the lock step of grade arrangement, wider use of teacher aides, increased technology, and more diversification in the curriculum to meet the needs of all, we find great disparity between school districts with some in an enviable position and others seeking rational answers. The educational process has become increasingly more expensive but not disproportionately as compared to other increasing costs.

My initial orientation to this Supervisory Union has

been most eventful with challenges appearing from several directions. The timing was critical from my aspect with the immediacy of researching budget preparation before knowing staff and programs. Salary negotiations have also thrust differing approaches for School Board action.

The schools basically operate well and the problems are inherently unique to each district. My educational philosophy urges broadening educational experiences for children and providing diversification and more intensified preparation in vocational areas. Work experience programs are excellent, but would be greatly enhanced through greater depth of preparation. I strongly urge sharing programs in the three high schools to (1) avoid duplication and triplication of capital outlay, (2) providing a sufficient number of students to create program efficiency, and (3) utilizing valuable space in the most productive and economical basis possible.

We will hopefully gain more State and Federal financial assistance for education in the future. Categorical aid has certainly been the catalytic factor in implementing some new programs.

This Supervisory Union is fortunate to have concerted interest in professional in-service education, strong support for the C.A.P.E. program, and now fostering the Instructional Materials Center for central dissemination of audio-visual materials.

Excellence in education is achieved only through professional dedication, strong supportive services and an interested, concerned and supportive public. Research and practice have shown refinements within the capabilities of all school systems as long as flexibility and willingness to modify exist. Learning can be most enjoyable. We have a moral obligation to plan, support, and operate programs adapted to the differing capabilities and needs of all children to ensure the strength and future well-being of our society. By creating a learning atmosphere that is interesting, exciting and challenging we are providing the vehicle for each individual to explore and discover processes and procedures for himself and in end result make it possible for him to grasp changes in taking his place in the working world.

Members of the School Boards have a multiplicity of issues confronting them and your support is essential. The

need for public understanding and support has never been more necessary.

Thank you

Respectfully submitted,

NEIL E. CROSS
