Harrisville, N. H., Jan. 31, 1925.
REPORT OF SCHOOL BOARD

After numerous visits to the different schools in town we found them orderly, busy and interesting. Co-operation and interest, both in teachers and pupils is a marked feature in all the schools.

The attendance has been remarkable considering the extreme winter.

Harrisville is to be congratulated on the caliber of the present teachers and also on the teaching ability and technical skill displayed in dealing with difficult problems.

A Parents' Association has been formed at the village which bids fair to be a power in the community in the future.

Schools that inculcate into the child an appreciation of good citizenship along with a good foundation in book knowledge, have gone a long way toward educating that child. Above all, a child should be taught love for home and town. He must be taught to do everything to make them attractive to others. He must be taught to make it a town people want to live in.

Towns get reputations as well as men. If we can teach the children who are in our schools today—and who are to be the men and women of tomorrow—that book knowledge is not all of education, that education lies in each one trying to make his town a town where folks are friendly, where progressive movements are appreciated and not frowned upon,—where good living is conducive to good health,—where attractiveness is considered an asset,—where recreation is plentiful for all,—where intolerance is unknown—then we can truly say that we are educating our boys and girls and that we are giving them an education that fits for the future.

$5,660 00

BERNARD F. BEMIS,
FRANK P. SYMONDS,
ELEANOR WINN,
School Board.

Harrisville, January 31, 1925.
REPORT OF SUPERINTENDENT OF SCHOOLS

To the School Board and Citizens of Harrisville:

I herein submit by second annual report as superintendent of your schools. In it, I shall make a brief survey of some of the accomplishments, needs and objectives of the past year.

Throughout the extent of our republic, from Atlantic to the Pacific, from the Great Lakes to the Gulf of Mexico, school officers and interested citizens have asked themselves what vehicle or connecting link has brought us as a nation from the “Yesterdays,” the time when we rode in wagons, plowed with oxen, harvested with the sickle or cradle, threshed with the flail, read by candle light, to the luxuries and modernized activities of the “Today’s,” when we ride in automobiles and airplanes, upheave the fields with tractors, harvest and thresh with the same operation, read and acquire knowledge by electric light and radio.

Out of the dark shadows of the past, comes the answer, yet wearing the scars of struggle and the stripes of toil, but bearing in triumph the wisdom of all ages. We call her education, the torch that enlightens the world, fires the imagination of man and gives wings to the visions of youth, saturates the dreams of the aged and renders might to hand and brain. We, having confidence in this parent of progress, creator of culture and moulder of destiny, look forward with assurance to the “Tomorrows” of our Democracy, believing that education will provide for us the foundations of our future progress, that she will give the youth of our land the backbone of morals. Indeed, we trust our system of free education will become the conservator of the American home, the essential of citizenship and the inspiration for living.
The school is our workshop. Here we must stir the ambitions, stimulate ideals and forge the keys that open the door of opportunity to our children.

HEALTH ACTIVITIES

Dr. L. G. Hildreth, medical examiner for the Harrisville schools, submits the following results of his examinations given last November:

Number of cases of malnutrition, 1
Number of cases of defective vision, 9
Number of cases of defective hearing, 1
Number of cases of anaemia, 1
Number of cases of pediculosis, 2
Number of cases of defective teeth, 78
Number of cases of hypertrophied tonsils, 59
Number of cases of adenoids, 59
Number of cases of enlarged glands, 1
Number of cases of unvaccinated, 30

In looking over reports for several years, I note few corrections from year to year. Herein we fail to realize the greatest benefits from our medical inspection. Either parents should feel themselves responsible to see that defects reported to them by the physician were corrected or a school nurse employed who would attend to the follow up work, if we are to attain the full blessings of our medical advice.

Medical inspection in the schools serves a two-fold function. First, to find out the physical defects of the children and as far as possible to secure such treatment as will remedy the defects. This is the curative part of medical inspection. The second function is positive. It seeks not merely to cure, but also to secure action and habitual practice in the rules which secure right and healthy living. It is not enough to cure physical weakness and disease. The boys and girls must
be taught how to live in accordance with the principles of good health.

SOCIAL ACTIVITIES

The following pupils at the Chesham school completed the eighth grade and were presented with diplomas of graduation: William Bemis, Casper Bemis, Jr., Annie McGrath and Alden Travis.

At East View, the following pupils were presented with diplomas: Harry E. Gilchrist, C. O. Richardson, Irving L. Warrington.

At the Village, a class of ten presented the following Graduating Exercise on the evening of June 12.
