Warrant for Annual Meeting

THE STATE OF NEW HAMPSHIRE
To the Inhabitants of the Town of Amherst in the County of Hillsborough in said State, qualified to vote in town affairs:

You are hereby notified to meet at town hall in said town on Tuesday, the 12th day of March, at nine o'clock in the forenoon, to act upon the following subject:

1. To elect one Selectman for a term of three years.

2. To choose all other necessary town officers.

3. To raise such sums of money as may be necessary to defray town charges for the ensuing year and make appropriations for the same.

4. To see if the town will vote to erect a fence around the new part of cemetery and raise and appropriate money for the same.

5. To see what disposition the town will vote to make of the Parker buildings and instruct the Selectmen in regard to same.

6. To see if the town will raise and appropriate a sum sufficient for repairs on Town Library.

7. To see if the town will vote to continue allowance of discount on taxes.

8. To see if the town will vote to raise and appropriate $180.00 for a road machine.

9. To see if the town will vote to accept and maintain road from Ponemah road to the Downing farm.
10. To see if the town will vote to raise the rent of the town hall.

11. To see if the town will vote to close certain roads.

12. To see if the town will vote to complete with State Aid the road from Amherst village to Ponemah Crossing and raise and appropriate sufficient money for same.

Given under our hand and seal this 25th day of February, nineteen hundred and twenty-nine.

BENJAMIN F. McNAMEE,
WALLACE CHILSON,
SUMNER F. MERRILL,
Selectmen of Amherst.

Warrant for Annual Meeting

THE STATE OF NEW HAMPSHIRE
To the Inhabitants of the School District in the Town of Amherst, qualified to vote in district affairs:

You are hereby notified to meet at the Town Hall in said district on the 19th day of March 1929, at 7.30 o'clock in the evening, to act upon the following subjects:

1. To choose a Moderator for the coming year.
2. To choose a Clerk for the ensuing year.
3. To choose a Member of the School Board for the ensuing three years.
4. To choose a Treasurer for the ensuing year, July 1, 1929 to June 30, 1930.
5. To determine and appoint the salaries of the School Board and Truant Officer, and fix the compensation of any other officers or agents of the district.
6. To hear the reports of Agents, Auditors, Committees, or Officers chosen, and pass any vote relating thereto.
7. To choose Agents, Auditors and Committees in relation to any subject embraced in this warrant.
8. To see if the district will vote to make any alteration in the amount of money required to be assessed for the ensuing year for the support of public schools and the payment of the statutory obligations of the district, as determined by the school board in its annual report.
9. To see how much money the district will raise and appropriate for repairs and alterations of school property, for new equipment, and for insurance.

10. To see if the district will vote to sell any of its schoolhouses not now in use for school purposes or take any other action in relation thereto.

Given under our hands at said Amherst this 18th day of February 1929.

MELVIN W. PERRY,
LEON K. BOUTELLE,
MARION L. CASS,
School Board.

AUDITORS' CERTIFICATE
(Required by the State Board of Education from all State Aided Districts.)

This is to certify that we have examined the books, vouchers, bank statements and other financial records of the treasurer of the school district of
Amherst, N. H., of which the above is a true summary for the fiscal year ending June 30, 1928, and find them correct in all respects.

RODNEY H. PRINCE,  
MALCOLM D. CLARK,  
Auditors.

ABSTRACT OF CLERK'S REPORT

To State Board of Education, School Board and Selectmen

District Revenue voted March 1928 for Fiscal Year  
July 1, 1928 to June 30, 1929

Amount appropriated for:
Support of high school $3,510 00  
Support of elementary school 12,890 00  
Salaries of district officers 192 00  
Truant officer and census 50 00  
Superintendent's salary 425 00  
Expenses of administration 250 00  
$2 per capita tax for supervis'n 478 00

$17,795 00

Deficiency 1927-1928 200 00  
Insurance premium renewals 200 00  
Special repairs 600 00

$18,795 00

Less Income (estimated) 3,179 00

Total Amount of Money to be Raised $15,616 00

WILLIAM W. SLOAN,  
Clerk of the School District.

March 19, 1928.
REPORT OF SUPERINTENDENT OF SCHOOLS

To the School Board of Amherst:

I herewith submit my tenth annual report, which is also the twentieth in the series of such reports.

Organization of Supervisory Union No. 40

Districts forming this union are Amherst, Brookline, Milford and Mont Vernon. The School Boards of these four units together form a joint board which meets each year in the spring and nominates a superintendent. This nomination is approved and contract issued, provided the candidate meets the state requirements which must include: teaching experience of at least five years, college degree, and passing of all state examinations. The joint board determines the superintendent's salary, arranges clerical assistance in his office and provides for such further joint equipment and supplies as the needs of the Union require.

Teachers and Instruction

Two changes only have occurred in the teaching staff since last year, both being in the High School; Mr. Morgan left to accept the headmastership of Epping High School, Miss Swett to take a position at Andover, Mass. The new headmaster is Mr. Mark Emerson of Milford. Mr. Emerson is a graduate of Dartmouth College and has had three years of teaching experience at Robert College, Constantino- nople. Miss Dorothy Story—now Mrs. Harriman—of Hopkinton, N. H., became the new assistant. She is a graduate of New Hampshire University 1928 in the teacher training course. The other teachers, Miss Piper, Miss Tingley, Miss Jenkins, Miss Scott, Miss Gogan, Miss Berry, and Miss Lorden, continue
in the High, Intermediate, Primary, Cricket Corner, Greeley and North schools respectively. Ponemah School has been closed, due to the small enrollment.

After one year without a music teacher it has become possible for the four towns in this union to join in employing a supervisor for full time. Amherst has one day per week (Tuesday). Every school including the rurals is visited weekly, weather permitting. For this work Miss Dorothy Cotton of Derry, N. H., was secured. She is a graduate of Boston Conservatory of Music and has had previous similar experience in a group of towns in Maine. Pupils seem to enjoy music, especially the younger children. In order that citizens may know what is being accomplished, it is planned to include music selections by various groups at high school graduation next June.

If we analyze the qualifications of our present teaching staff, we will find that two are college graduates, five hold normal school diplomas, and the remaining two, who are teachers older in service, have attended three or more normal sessions. Experience varies from three months to twenty years. Every teacher holds as high a form of certification as is possible; six have certificates and three licenses. These last are working toward their certificate, having already started to take the state examinations. A record like this is much above the average for a district with a small high school and several rural schools, and indicates that our teachers are well qualified for their positions. "Good Teaching" is our slogan this year.

**Buildings and Equipment**

First let us review what has been done during the ten years since the new school law has been in
operation in New Hampshire. In addition to usual summer repairs, incident to natural wear and tear and to emergency expenses, the following things have been accomplished—all a part of the general plan to bring every used school building up to modern standards, especially with respect to heat, light, toilets and ventilation.

**Village:** The two-story building has had the old worn-out hot air heating system replaced by a modern steam heating plant, with new chimney. Lighting has been bettered by eliminating cross lights in the primary room and by installing better shades in the two west rooms on the lower floor. The quantity of light should be at least in the proportion of one square foot of lighting area to five square feet of floor area. This ratio does not exist. It is difficult to increase the amount of light, due to the brick construction of the building. The old outside toilets have been replaced by a complete flush type, made possible by a new well and pressure tank operated by an electric pump.

Rearrangement of the building to make room for these toilets made it possible to include a back stairway leading from the upper floor directly to the east entrance, at the same time securing direct access to this exit and toilet rooms from all rooms in the building. Incidentally, a new supply room became necessary and a new cloakroom for the Primary room. All of these things, however, worked into the general plan very conveniently.

Ventilation of all rooms in this building is as yet inadequate to secure a constant supply of fresh air. This can probably be remedied at a small cost. The appearance of the building has been greatly improved by the addition of porches at the front and side doors. These porches, in addition to affording
protection from the weather, give a chance for doors to swing out, a change demanded by state laws. The building has also been shingled and painted.

**Border Street:** This is a comparatively new building with a full sized basement and good lighting from left and rear only. Improvements have been installation of chemical toilets and grading to keep surface water out of the basement. One thing which would still better conditions is the replacement of the old type of box stove with a regular jacketed schoolroom heater, a device that gives more satisfactory results than would a furnace in the cellar. Water has to be brought from neighbors' for use in this school.

**Cricket Corner:** This property has been remodeled recently. Three-sided lighting has been changed to be largely from the left (north), with two windows in the rear (west). An addition was built on the east and a cellar dug under the building. The addition provides two inside toilet rooms with chemical toilets, a good supply room and a stairway to the cellar, where a driven well furnishes good water. A one-pipe furnace supplies heating. However, it has proved difficult to secure a uniform temperature and the fuel consumption is much greater than with a schoolroom jacketed heater. Of course it is a big advantage to have no stove in the room and to have all fuel in the cellar. Incidentally, shingling and painting were done and all out-buildings sold and removed, thus improving the appearance of the building and grounds. The neighborhood is much interested in this school and has contributed some of the labor for these improvements.

**Greeley School:** This building has been the most difficult to bring up to the standard, due to its location in an area surrounded by evergreen trees. By
changing the entrances from the east end to the southwest corner and building a new woodshed, it was possible to use the east and north sides for windows. The proportion of lighting area to floor area is now high, but needs to be on account of conditions mentioned above. Cross lighting, with bad reflections, which would have resulted from the west windows, was avoided by installing a dummy partition, one side of which is used for coat hooks with a shelf above for dinner boxes, while the other side carries blackboards, maps and bulletin board space. This idea works out wonderfully well in remodeling an old building. Heating has been made better by using an inexpensive home-made jacket around a common box stove with an intake of fresh air and an exit into the chimney for foul air. Should this equipment wear out, a schoolroom heater could be installed without alterations of the building. Toilets are of the old out-door type and should not be permanently continued now that satisfactory chemical toilets are available. Water is secured from a well and pump just across the road. This building has a good roof and has been recently painted.

**North or No. 8** schoolhouse was reopened in 1922 after some years of disuse. No attempt has been made to remodel this plant as enrollment is small and there is little probability of its becoming large. However, the interior and exterior have been kept freshly painted so that the schoolroom is suitable for use even though all standards are not met.

**Ponemah:** This was one of the first rural buildings to be remodeled. Although the room is small and low-posted, a change in location of windows, dummy partition, jacketed stove and rebuilding of old type toilets, made this schoolhouse conform closely to desired conditions. At present, the build-
ing is closed and the few children who did attend are transported to the village.

All other rural buildings in town have not been used for school purposes for ten years or more. They are deteriorating so rapidly and will have to be so extensively repaired and remodeled should they be needed for school use, that it would seem inexpedient to keep them and pay insurance and roof repairs year by year. Since they are property of the school district they can be disposed of only by action of the school district.

For this good progress in building improvements, the citizens of Amherst through their readiness to appropriate funds and the members of school boards through their wisdom in recommending and putting through such a far-sighted policy, are to be commended and thanked.

The needs remaining are those things yet to be done to complete the progress of making every building standard in all respects. They may be summed up as follows:

Village: Ventilation system, better lighting.

Border Street: Regular schoolroom heater with ventilating attachment.

Cricket Corner: Minor items only.

Greeley: Better toilets.

North: Slate blackboards at once. Remodeling if enrollment becomes larger and the school is kept open.

Transportation

Two phases of this subject will be considered:

First, transportation of pupils who live more than two miles from any school. For such children, difficulties of remote homes and back roads often are solved by short side routes which lead into larger
motorized routes on a main road, or deliver children directly at a rural school.

Secondly, transportation arranged when a school is closed—due usually to small enrollment. Many factors, however, enter into the question of whether a rural school should be kept open or pupils transported. Some of these are: number of children, age of children, competition in grades, boarding place for teacher, condition of school building, attitude of neighborhood, necessity for transportation to the rural school itself, and distances of children who must walk to the rural school. The advantages resulting from transportation are almost always those received when pupils become part of a larger school unit where there are many pupils in each grade, fewer grades per teacher, and teachers with more experience. When a school becomes small and the condition of roads makes motor transportation possible most of the year, it is usually better for a rural school to be closed. Cost of transporting children seldom exceeds cost of maintaining a rural school and is almost always much less. Each case should be considered on its own merits with the school opportunity for the children themselves the deciding factor.

Professional Activities and Opportunities

During the past ten year period, members of the school board have become more and more interested in professional activities. They have at various times visited Keene Normal School, made trips to other schools to see the work of other teachers, and attended conventions and institutes, both in the state and outside. Visits and meetings of this sort enable those whom you have elected to have charge of your schools to see how pupils are taught elsewhere, to confer with other school board mem-

64
bers and to hear general and special discussions by prominent educators of the country. The result is a broader general outlook, and better understanding of modern school needs and so an increased ability to solve local problems. Teachers, likewise, enjoy these professional meetings and appreciate the willingness and desire of local authorities that they should attend them all. The superintendent of course considers it to be his duty to be present at state and local meetings and, whenever possible, at national meetings. During the ten years past he has been at nearly every meeting of the New Hampshire State Teachers' Association which meets in October, at the spring meetings of the Merrimack Valley Teachers' Association which meets in Manchester in May, and at all of the local institutes conducted by the State Board of Education. These last meetings are usually held in small towns for the benefit of younger and inexperienced teachers. One such institute was held in Brookline on October 11, 1926. In 1924, 1927, 1928, 1929 your superintendent attended the winter meetings of the National Education Association at Chicago, Ill., Dallas, Texas, Boston, Mass., and Cleveland, Ohio. These national meetings are a great inspiration. The one in Boston was so near that practically every teacher and many school board members in this union attended. All time spent in this manner brings good returns to local school systems.

The opportunities for training for teachers in New Hampshire have been much developed during ten years. Whereas a few years ago, high school graduation was the goal of some but not the accomplishment of a majority, today, college graduation has become a common goal and the accomplishment of many. Expressed in another way, this means that
the general public has come to demand that there should be an opportunity open to all for studying beyond the high school—perhaps at college or normal school, or at training schools for nurses, etc. As a result our own state college has now become New Hampshire University, opening its doors widely to girls and boys and receiving them in great numbers. Likewise, our normal schools at Keene and Plymouth have had to expand rapidly to meet the demands upon them. Keene has grown in ten years from 152 to 483 and Plymouth from 88 to 335.

The shortages of teachers during the war has ceased and with it the need for large summer schools to train emergency candidates. Instead the summer courses are held at Keene and Plymouth in alternate years (Keene 1929).

New Hampshire University also maintains a summer school that is very well patronized.

The “aim of the summer school is now to give advanced training, or a period of renewed study to active teachers. No longer is it recommended that the least successful teachers go to the summer school for possible improvement but rather that the thoroughly successful make of their summers a time for advancement and promotion.” (1)

“The normal schools have one purpose only—completely to train sufficient teachers for all public schools of New Hampshire.” (2)

(2) 1927-1928 Report of State Board of Education, page 142

To this end they have a two year course for elementary teachers, a three year course for junior high candidates, and since 1926 a full four year course with a degree of Bachelor of Education for those who plan to teach in senior high schools.

Keene alone offers four year curricula in home economics, English and mechanic arts and Plymouth
alone in commerce and history. The object throughout is to train "teacher" specialists rather than "subject" specialists. Such a procedure is correct because most high school teachers begin their careers in small high schools where more than one subject is assigned to them.

"Enrollment in the four year curricula is strictly limited to selected students and in any year may not exceed thirty graduates for both schools."

**Conclusion**

Now that our buildings are nearly all remodeled into schoolhouses meeting modern standards, presumably adequate for several years to come, our attention may well be given to building up and maintaining a higher level of scholarship than has prevailed during the past ten years. This will come about by focusing our attention on the most important link in the educational chain—"Good Teaching."

Respectfully submitted,

HAROLD C. BALES.

February 14, 1929.

Number of tuition pupils in high school 0
REPORT OF HEADMASTER OF HIGH SCHOOL

To the School Board, Superintendent of Schools and the Citizens of Amherst, N. H.:

I hereby submit my first annual report.

Since this is our only opportunity of informing the citizens of Amherst what we are doing in the school we should like to consider it as addressed to them as well as to the School Board and Superintendent.

There are many people who disparage the utility and efficiency of small high schools. Though we realize very keenly the difficulties which they present, such as a limited curricula, small classes, and a heavy teaching burden, nevertheless we are trying to make your school the best that it possibly can be in spite of these conditions. Our purpose is to make the work as practical and useful as possible through the curricula which we can offer, and at the same time to keep it up to a high standard and make it as interesting as it can be to the pupils. To accomplish this we are doing a large amount of problem and project work in which the pupils actually collect information and material and do things themselves. We are setting the standards high because we believe that though the pupils may find it difficult they will enjoy it more since they will feel that they are actually accomplishing something worth while and getting the most that they can from school. If this seems at times to keep the marks low it makes them the more significant. Moreover low marks are no disgrace as long as the pupil is doing his best. All we desire is that the parents shall see that their children are doing all of which they are capable. In order to get the most from their school work we believe that the average pupil
should spend at least an hour in study at home each day.

Our curricula remain the same as that published in preceding years except for one change. The junior and senior course in Economics and Business Practice has been shortened to half a year and the remaining half is given to a course in elementary sociology, which we believe to be an intensely valuable subject. One very beneficial change has been made in the organization of classes in the seventh and eighth grades. These two grades formerly had English, Geography, and Science together. This made a very large class and one of very widely varying abilities. In order to improve the instruction all the teachers voluntarily agreed to separate the classes in their particular subject though it meant from three to five more teaching periods per week and giving up of all study periods. This results in a teaching load greater than the average for high schools.

Miss Piper continues to teach the History, Latin and Geography; Mrs. Harriman has all of the English and French classes; and the Headmaster handles the Mathematics, Science, Commercial Geography, Economics and Sociology. All of the teachers now have seven periods a day of classes. Such a large number makes it impossible to make the preparation and give the individual attention which we would like and which should be given. If another teacher could be employed or a cadet for part time it would relieve the burden on the present staff, give them more opportunity to specialize, make it possible to further separate some of the classes now combined, and perhaps allow some enlargement in the curricula.

In addition to the actual classroom work we be-
lieve that outside activities have a very legitimate place in the program as a means of instruction and to develop an affection and interest among the pupils for their school. To fulfill this need "The Triple Entente Association," which was organized last year to handle all outside activities, has been continued. Every pupil is a member. The Association meets during the Assembly period every Wednesday and transacts its business in strict parliamentary form, all of which is good training in itself. We have tried to make these activities appropriate to the community. Two examples were a corn roast and a mountain climbing expedition held on Saturdays. In athletics we held a school track meet last fall to encourage healthy physical development. The name of High Point winner was engraved on a permanent cup kept at the school. The girls have had a lot of beneficial exercise and exhilarating sport in their practice for basketball. Unfortunately we have not had enough boys to form a team this year. The Association is now working hard in the preparation of their annual publication, "The Broadcast- er." They are also getting ready to give a play. An Old Fashioned Dance was given in the fall and an appropriate program was put on at Christmas. Two excellent examples of school and community spirit shown by the Association were the purchase of a string of lights to be used on the community Christmas tree, and the matter they are now considering of buying a show case to contain the collection of geological specimens and historic relics presented to the school by Mr. Richard Ware. We herewith express our appreciation of that gift and extend to Mr. Ware our sincere thanks.

The Prize Speaking Contest sponsored by the Grange gave excellent practice in public speaking
to those taking part. This was held in the town hall on the evening of January 18, 1929.

The statistics are interesting this year since the enrollment is the largest we have ever had. There were 68 pupils registered when school began Sept. 6. Of these thirty-seven were in the seventh and eighth grades and thirty-one in the high school. As there are only fifty-eight seats in the main room, the seventh grade had to be put in a home room of their own with Miss Piper in charge. Since the beginning of school eight have left and three have entered, making the present total sixty-three. The enrollment by classes is now: seventh, 27; eight, 9; freshmen, 12; sophomores, 11; juniors, 3; seniors, 1. There are only six boys in the four classes of the high school. The attendance has been good.

The graduates of last year are taking their part in community life as follows. Donald Davis and Leon Gaidmore are working at home. Harold Stroncer and Florence Lamore are working in Milford. Doris Ladd is training to be a nurse at a hospital in Lynn, and Blanche Goodale is planning to enter a hospital soon for the same purpose. Olive Hill has been married and is living in Milford.

The school building is in very good condition. The heating of one of the rooms is still unsatisfactory. The situation has been remedied temporarily by the use of an oil heater, but a permanent remedy should be made as soon as possible. The atmosphere of the building could be made more healthful by the installation of some positive system of ventilation, especially in the toilet rooms.

One of our greatest regrets has been our lack of personal contact with the parents and citizens of Amherst. We would greatly appreciate it if you would come to visit us and the school when it is in
session. We are always only too glad to talk over any problems or suggestions with you.

Respectfully submitted,

MARK F. EMERSON,
Headmaster.

February 12, 1929.
REPORT OF SCHOOL PHYSICIAN

To the School Board of Amherst, N. H.:

I herewith submit my annual report of the school examination, which was made in September 1928:

Number of pupils examined 204
Number of teachers examined 9
Pupils not present 5

- Teeth 135
- Tonsils 32
- Adenoids 32
- Glands (enlarged) 3
- Cardiac disease 5
- Anaemia 3
- Orthopedic 6
- Pulmonary 1
- Pediculosis 5

Unvaccinated (without proper excuse) *13

Respectfully submitted,

OSCAR BURNS, M. D.

February 2, 1929.

*All of these cases now comply with the law.
REPORT OF SCHOOL NURSE

To Mr. Harold C. Bales, Superintendent of Schools,
Amherst, N. H.:

The following is my second report of the health work in the Amherst schools, it being the eleventh year of this work.

The usual medical inspection was carried on last September by Dr. Oscar Burns, the nurse assisting. Dr. Burns' report gives a tabulated account of the physical defects.

The report of the eye and ear tests, completed by the teachers, shows that there are twelve pupils with defective vision and four with defective hearing.

In averaging the height and weight records I find that there are seventy-three pupils ten per cent or more underweight. This seems to be a large number in comparison with the attendance of children in the schools. During the coming year with the assistance of the teachers I feel certain that much of this sub-normal weight may be corrected.

Health talks and general inspections for cleanliness have been given in the schools at intervals, especially in the lower grades.

Thus far this year the schools have been fortunate in avoiding outbreaks of contagious diseases.

It is hoped that with the cooperation of parents and teachers with the school nurse the progress in health work will continue to advance.

Respectfully submitted,

EMMA L. SMITH, R. N.

February 11, 1929.
