Graduate Education At the University of New Hampshire

The University awarded its first Ph.D. degree in 1896, placing it among the first American universities to award that degree. Doctoral programs in their present form began in the 1950's.

Graduate education is supervised by a graduate faculty of over 400. The Graduate School is led by the dean, who implements the policies of the graduate faculty. The Graduate Council is composed of elected faculty and student representatives and serves in an advisory capacity to the dean.

Quality graduate education requires development of new knowledge and communication of existing knowledge. The dedicated teaching faculty carry on an active research program which supports graduate education by developing new knowledge and providing training opportunities for graduate students in residence. As one of the nation's 71 land grant institutions, the University is responsible for conducting research and disseminating information to the public in areas affecting the nation's welfare.

The University of New Hampshire is the only university in the state of New Hampshire, and is the University System of New Hampshire institution charged with providing graduate programs which meet state and regional needs. Doctoral programs are offered exclusively on the University campus although other units of the University System offer some master's programs.

Master's Programs

The University offers master's degree programs in a wide variety of disciplines. The master's degree can serve either as a professional terminal degree or as an intermediate degree for those intending to pursue further graduate study. Master's programs at the University of New Hampshire have been carefully developed and are reviewed by the graduate dean and faculty to ensure their continuing quality. In most programs, students can elect options that will permit them either to study one aspect of a discipline in depth by preparing a thesis or to gain a broader mastery of a discipline by electing to take course work in lieu of a thesis. While most master's programs are designed to be completed in a calendar year of full-time study, it is also possible to pursue many programs on a part-time basis.

Doctoral Programs

The University offers programs leading to the Doctor of Philosophy in those disciplines where it has both faculty and facilities to support advanced graduate education of high quality. Care has also been taken to ensure that the programs will make a significant contribution to the opportunities for doctoral education in the New England region. Doctoral education properly focuses upon preparing the student to contribute to the growth of knowledge through research. However, since a

large percentage of doctoral students find employment in higher education, most doctoral programs provide opportunities for students to work as teaching assistants and to participate in seminars on teaching led by experienced faculty members. This preparation for the student's future role as both developer and communicator of knowledge has enabled recipients of the doctoral degree from the University of New Hampshire to obtain attractive teaching and research positions.

Interdisciplinary Programs

Many of the problems faced by modern society demand that students be trained in more than one of the traditional academic disciplines. Consequently, the Graduate School encourages programs which involve the faculty of more than one discipline or department. This may be done through such formal organizations as the Genetics Program, which involves geneticists from many departments in both master's and doctoral programs; or the Institute of Natural and Environmental Resources, which brings together resource economists, foresters, wildlife specialists, hydrologists, and soil scientists to address the problems of our environment; or the Intercollege Biological Sciences Organization, which makes the resources of the biological science departments available to students in master's programs designed for secondary and junior college teachers. Several options for interdisciplinary study also exist under the Marine Program (see p. 10). To encourage the development of additional interdisciplinary opportunities, the graduate faculty recently adopted procedures which permit establishment of interdisciplinary options within established doctoral programs. The recently established nutrition option in the Biochemistry Ph.D. program involves nutritionists from the Departments of Biochemistry, Animal Sciences, and Home Economics and is one result of these procedures.

Other forms of cooperation are less formal, as when students from one department work with faculty from other departments to develop a program, thus combining the strengths of several disciplines. An example of this is the Soil and Water-Chemistry Program, which involves faculty in soils and hydrology cooperating with faculty in chemistry. Students in zoology frequently work with faculty in such other departments as animal sciences and entomology to broaden their scope in their graduate programs. In the social sciences, the psychology and sociology departments cooperate in a social-psychology doctoral program. The Engineering Ph.D. Program is a cooperative, interdisciplinary effort of the electrical and computer engineering, civil engineering, mechanical engineering, and chemical engineering departments.

Students in all programs are encouraged to identify, with their advisers, courses outside of their disciplines that are appropriate to their professional goals.

Teaching, Service, and Research

Research is an essential part of graduate education. It sustains a continuing infusion of knowledge, enhances the level of instruction, extends the frontiers of understanding, and makes human progress possible. It provides an opportunity for graduate students to learn by working with instructors on independent projects or as part of research teams. Ultimately, the goal is to share discoveries and applications with others in the state, region, and world. To ensure that the University's research efforts are closely tied to its educational efforts, the dean of the Graduate School is also director of research.

Research and Service Facilities

The University has many diversified research projects, ranging from highly specialized investigations in the physical and biological sciences to broad interdisciplinary marine studies. Graduate students are involved in research as project assistants working on research leading to master's theses and doctoral dissertations. These projects are conducted in individual departments, in University research centers, and in larger service units on the campus.

Among the centers are the Center for Industrial and Institutional Development, the Water Resources Research Center, and the Resources Development Center—all of which provide specialized research and service to New Hampshire business, industry, and government. The Marine Program, supported by an institutional Sea Grant Award and state funding, has facilities both on campus and at the Jackson Estuarine Laboratory. The Space Science Center and Engineering Design and Analysis Laboratory provide highly specialized facilities for faculty and graduate students to participate in sophisticated engineering and science research projects.

The Public Administration Service acts as a consultant group for town and city officials. The Agricultural Experiment Station, one of the largest research and service units at the University, provides research, information, and testing for the state agricultural industry. The Ritzman Animal Nutrition Laboratory offers specialized research facilities. The recently established University Instrumentation Center coordinates the utilization of many highly specialized instruments and provides service to the many researchers on campus using instruments such as mass spectrometers, spectrophotometers, nuclear magnetic resonance spectrometers, amino acid analyzers, etc. The University Instrumentation Center has established a new electron microscope facility which houses a transmission electron microscope and electron microprobe and a scanning electron microscope. Two DEC 10 systems, the principal bases for the University Computer Center, are used by students from all disciplines on campus.

Marine Program: The University's central location on the northern New England coast near a variety of estuarine, coastal, insular, and continental-shelf environments has fostered a broad range of marine educational and research activities for many years. These varied activities, which occur within all of the University's colleges, are coordinated and supported by the Marine Program. Both master's and Ph.D. degree programs are offered on a departmental and interdisciplinary basis in the areas of marine physical, life, and social sciences; ocean engineering; and physical education. Departments involved are animal science, biochemistry, botany, chemistry, chemical engineering, civil engineering, earth sciences, electrical and computer engineering, mathematics and computer science, mechanical engineering, microbiology, physical education, political science, sociology and anthropology, and zoology. Also involved are the Institute of Natural and Environmental Resources and the Whittamore School of Business and Economics.

Marine research by faculty and students proceeds on both an intra- and interdisciplinary basis and is supported by University and private funds as well as by organizations such as the National Science Foundation, the Office of Naval Research, the National Institutes of Health, the U.S. Coast Guard, the Woods Hole Oceanographic Institution, Sanders Associates, and the National Sea Grant Program. UNH and the University of Maine together are a Sea Grant Institution.

Marine research activities are principally pursued in the neighboring environments of the Great Bay estuarine system, the coastal zone, the near-shore coastal zone, the Isles of Shoals, and the Gulf of Maine, but also in the more remote areas of the world such as the North Sea and the Arctic, Antarctic, and mid-Pacific Oceans. Some examples of research studies include those relating to marine food chains; marine biotoxins; trace metals; biological and thermal pollution; marine mineral resources; mariculture; marine resource management; marine law; environmental base-line studies; arctic under-ice systems; diving systems; submersibles, underwater habitats, and sealabs; and buoy systems and breakwaters.

Facilities specifically supporting graduate education and research include those on the University's campus—the Marine Program building, the Engineering Design and Analysis Laboratory, and the Mechanics Research Laboratory—and those off campus—the Jackson Estuarine Laboratory, the Diamond Island Ocean Engineering Station, the Shoals Marine Laboratory, a near-coast pier facility, and the R/V *Jere Chase* together with several smaller vessels and facilities used in cooperation with other institutions such as MIT and the Woods Hole Oceanographic Institution. In addition, the excellent University diving program directly supports research and annually qualifies numerous faculty and student divers.

The Marine Program building houses work spaces for ocean engineering, physical sciences, and other marine activities, as well as the Marine Program Office. The Engineering Design and Analysis Laboratory serves faculty and students from the

four engineering departments and others associated with its activities supporting projects and applied research in the marine environment. The Mechanics Research Laboratory, an entity within the Department of Mechanical Engineering, emphasizes both theoretical and applied engineering research in the ocean environment. The Jackson Estuarine Laboratory, located on Great Bay about five miles from the campus and fourteen miles from the ocean via the Piscataqua River, supports the research of the marine life sciences and earth sciences departments. Research vessels dock at the adjacent pier. The Diamond Island Ocean Engineering Station, located about forty miles from Durham on Diamond Island in Lake Winnepesaukee, furnishes an excellent fresh-water testing site for ocean systems. The Shoals Marine Laboratory, located about seven miles off the New Hampshire coast on Appledore Island of the Isles of Shoals, is a joint facility of UNH and Cornell, and is principally concerned with marine life sciences educational and research activities. A near-coast pier facility, situated about ten miles from Durham in Portsmouth, New Hampshire, and two miles from the ocean on the Piscataqua River, serves research vessels up to approximately 50 feet in length and commercial fishing boats of the

area. The *R/V Jere Chase* is a 45-foot research vessel equipped for a wide variety of marine research activities in the estuarine and near-coast waters.

The New England Center for Continuing Education is adjacent to campus. This architecturally striking complex was built with a gift from the Kellogg Foundation and is supported by the six New England state universities. The center provides residence and conference facilities for a wide variety of adult education programs. A closed circuit TV system permits conference programs to be reviewed in the participants' rooms.

Library

The University Library houses over 750,000 volumes, 6,000 periodicals, and substantial microform and audio-tape collections. Specialized subject collections are housed in four branches: chemistry in Parsons Hall, engineering and mathematics in Kingsbury Hall, biological sciences in Kendall Hall, and physics in DeMeritt Hall. The branches are administered by a physical sciences librarian and a biological sciences librarian. Media Services, a department of the library, offers a large film collection, equipment loans including projectors and portable TV cameras and monitors, photographic and graphic design assistance, and audiovisual project consultation.

Special services offered to graduate students include graduate study areas, with assignable locked book trucks. Graduate students may use the Interlibrary Loan System to supplement material available in the University Library. The library is a U.S. government document depository, and a full-time documents librarian is available. On-line data base search services are offered at cost through the Reference and Branch Departments.

The library serves the University and the town of Durham. A graduate student's spouse and children may use the facilities, which include a professionally staffed children's room.

During the regular academic year, the library is open seven days a week. On vacations and during the summer, a more limited schedule is in effect.

Admission, Financial Aid, Academic Regulations

Admission

Requirements

Admission to the Graduate School may be granted to graduates of all colleges and universities of approved standing, provided the applicant's undergraduate record is satisfactory. It is the policy of the University of New Hampshire not to discriminate on the basis of sex, race, color, age, religion, national origin, or handicap in its recruitment and admission of students or awarding of financial aid, in accordance with all relevant federal and state laws and regulations.

Applicants for admission must present evidence that they have had the necessary academic preparation to enable them to pursue the graduate program for which they are applying. Candidates for admission must have a superior undergraduate record. An applicant who has undertaken graduate work at another institution should have completed the courses or program attempted with a record equivalent to that required for graduate students to remain in good academic standing at UNH.

Individual programs may designate specific requirements that applicants must meet; such requirements may include the scores achieved on the aptitude and appropriate advanced sections of the Graduate Record Examination or the Graduate Management Admission Test, or specific undergraduate preparation. The program descriptions listed in this catalog and the information sheet supplied with the application forms should be consulted for these special requirements.

Applicants to programs leading to the Master of Science for Teachers degree must meet, in addition to the normal requirements, one of the following admission requirements: 1) completion of education courses sufficient for certification, 2) three years of teaching experience, or 3) a current full-time teaching position.

The number of applicants to some graduate programs exceeds the number that can be accommodated by the University faculty and facilities; thus, not all qualified applicants can be admitted. To insure the greatest opportunity for admission, applicants should submit their applications by the deadlines listed on page 17.

Application Procedures

An applicant for admission must submit directly to the Graduate School, Social Science Center, University of New Hampshire, Durham, New Hampshire 03824, the following materials:

1. The official application forms for admission to graduate study (available from the Graduate School).
2. Two official transcripts, submitted from each institution attended, showing the grades earned in all of the applicant's previous academic work (graduate and undergraduate).
3. Three letters of recommendation (on the Graduate School's recommendation form) from persons in a position to judge the applicant's preparation for and ability to undertake graduate study. Letters must be forwarded directly by the writer to the Graduate School. Letters of recommendation and material from college placement offices must have been prepared within twelve months prior to submission to the Graduate School.
4. A \$10 application fee. This fee is nonrefundable.
5. Any additional materials, such as the official report of scores achieved on the Graduate Record Examination or Graduate Management Admission Test, which are required by the department or program to which the applicant is applying. Such scores must be forwarded directly from the testing agency and must be from tests taken within five years of the date of application.
6. Completed "Statement of Residence for Applicants to Graduate School at UNH." This form will be included with application forms.

All application material becomes part of the permanent records of the University of New Hampshire and will not be returned.

When the application and all of the required supporting material have been received, the application is reviewed by faculty members of the appropriate programs. This review normally is conducted by an admissions committee composed of graduate faculty members, which makes recommendations to the Graduate School concerning the admission of applicants to the program. Upon receipt of the committee's recommendation, the Graduate School carefully reviews the applicant's file. After making the final decision, the Graduate School will inform all applicants of the action taken.

Since the specific criteria for admission differ from program to program, it is impossible to itemize all of the factors that are weighed in the admission process. Because of this, the Graduate School has not established such specific criteria as minimum acceptable scores on standardized tests such as the GRE or GMAT. Rather, all of the material that is submitted as part of an application receives careful consideration.

A student who wishes to pursue a degree or program other than the one to which admission was granted originally should file an application for a change in degree

with the Graduate School. The dean of the Graduate School will notify the student of the decision after consulting with the appropriate departments.

Students enrolled in UNH master's programs who intend to pursue the Ph.D. in the same department in which they were admitted for the master's degree should submit to the dean of the Graduate School an application for a change in degree program. This application will be reviewed by the Graduate School, which will notify the student of the decision. If such students do not file a change-in-degree application before receiving the master's degree, they will be required to submit a new application for admission to study for the Ph.D. degree.

A New England resident enrolling in a graduate program offered at one of the New England state universities but not offered at the state university in the student's home state is eligible for the tuition rates established under the New England Regional Student Program. Application procedures are in the *New England Regional Student Program Graduate Level* booklet, available from the New England Board of Higher Education, 40 Grove Street, Wellesley, MA 02181.

Applicants from Foreign Countries

In addition to the material noted above, all applicants from non-English-speaking countries must furnish proof of their proficiency in English by submitting scores achieved on the Test of English as a Foreign Language administered by Educational Testing Service. Arrangements for taking this examination should be made directly with the Educational Testing Service, Box 899, Princeton, New Jersey, USA, 08540.

Because of the time involved in processing applications from residents of foreign countries, completed applications and supporting documents should be received at the Graduate School four months prior to the semester for which the admission is desired.

Application Dates

Completed applications and supporting documents should be submitted before July 15 for the first semester, December 15 for the second semester, and April 1 for the summer session. There is no guarantee that applications submitted after these deadlines can be acted upon in time to permit registration in the desired semester. Applicants for financial aid for the following academic year must submit completed applications and supporting documents for admission and financial aid prior to February 15. Applicants to programs in Education should comply with the special deadlines listed in the "Education" section, page 70.

Types of Admission

Regular Admission: Regular admission may be granted to those applicants whose academic records and supporting documents indicate that they are fully qualified to undertake graduate study in their chosen field.

Conditional Admission: Conditional admission may be granted to those applicants whose academic records indicate deficiencies but suggest some promise of success in graduate study. Students granted conditional admission must meet the specific requirements stated at the time of their admission. Conditional admission will not be granted to applicants who reside in foreign countries.

Special Students: Individuals holding baccalaureate degrees may register for courses with the approval of the instructor and dean of the Graduate School. They are designated as "special students," and are not admitted to the Graduate School and are not candidates for a graduate degree. Special students register with the Division of Continuing Education in Verrette House on campus and are not required to file an application for admission to the Graduate School. Special students are not normally permitted to register as full-time students.

If a special student is subsequently admitted to a degree program, a maximum of nine credits earned in University of New Hampshire graduate courses as a special student may, upon recommendation of the program faculty, be applied to a student's degree program. The nine credit limitation applies to all courses completed or in process on the date when the official letter of admission is written.

Applicants Not Admitted: Applicants who are denied admission may have their applications reconsidered only if they furnish significant additional material that was not available at the time of the original decision, such as evidence of further academic achievement, or more recent and significantly improved GRE or GMAT scores.

University of New Hampshire Seniors: Qualified senior students in the University of New Hampshire may be admitted to the Graduate School and must have been admitted before enrolling in courses for graduate credit. Such seniors should follow the application procedures outlined on page 16 and should file their applications by the specified dates.

Upon recommendation of the department, superior University of New Hampshire senior students may petition the Graduate School to be allowed to count credits for a maximum of two 800-level courses toward both a bachelor's and master's degree, provided the student has been admitted to the master's program.

Students wishing to enroll in one of the five-year combined bachelor's degree/Master of Business Administration programs should consult their advisers concerning the regulations relevant to them.

University of New Hampshire Employees: Members of the University of New Hampshire faculty with the rank of assistant professor or above will not be admitted to the graduate programs. Full-time staff employees of the University who do not hold academic rank will not ordinarily be admitted to doctoral programs in the department in which they are employed. The above regulations pertain even to individuals who resign their positions.

Honorary Fellows: Qualified scholars who may temporarily desire the privilege of using the library and research facilities of the University and who are not candidates for a degree may, upon recommendation of the dean of the Graduate School and the approval of the president of the University, be appointed honorary fellows without stipend. Honorary fellows shall not be required to pay any charges except the cost of unusually expensive supplies or equipment.

Financial Information

Course Charges and Fees

Tuition/course charges vary depending on the number of credits for which a graduate student registers.

9-16 Credits per Semester: Full tuition is charged. New Hampshire residents—\$1,150 per academic year (\$575 per semester); nonresidents of New Hampshire—\$3,500 per academic year (\$1,750 per semester).

1-8 Credits per Semester: Students are charged according to the number of credits for which they register. Residents, \$55 per credit; nonresidents, \$150 per credit.

More Than 16 Credits per Semester: Graduate students are charged full tuition at the appropriate rate plus the appropriate course charge for each credit beyond 16 if registered for more than 16 credits 30 days after the semester has begun. (No refund will be made if a student subsequently drops a course lowering his/her load to 16 or fewer credits.)

The above charges will apply to admitted graduate students enrolling for courses at the University during the academic year. Admitted graduate students planning to enroll for courses at Merrimack Valley College, through the School of Continuing Studies, or during the summer session should consult the relevant catalogs for information regarding fees.

The University reserves the right to adjust rates for tuition, course charges, and fees. Such adjustments will be announced as far in advance as possible.

Rules Governing Residence Classification: A student is classified as a resident or a nonresident for tuition purposes at the time of admission to the University. The decision is based upon information furnished by the student's application and any other relevant information.

All applicants living in New Hampshire are required to submit a notarized statement to the effect that they have been legally domiciled in New Hampshire continuously for at least twelve months immediately prior to registering for the term for which in-state status is claimed.

Thesis, In Absentia, and Other Fees

Students admitted from states other than New Hampshire or from foreign countries are considered nonresident throughout their entire attendance at the University unless they shall have acquired bona fide domicile in New Hampshire. Changes in residency will only occur if the student can clearly establish that his or her residence in New Hampshire is for some purpose other than the temporary one of obtaining an education at the University.

The burden of proof in all cases is upon the applicant. In all cases, the University reserves the right to make the final decision as to resident status for tuition purposes. The University Rules Governing Tuition Rates are fully set forth on the application for admission, and all students are bound by them.

Master's Students: Master's students registering for thesis credits (course number 899) will be assessed tuition for their thesis according to the number of thesis credits for which they register in a specific semester until they have registered for the maximum number of thesis credits permitted in their specific program. Master's students who have previously registered for the maximum number of thesis credits and who are on campus completing their theses will pay a *Continuing Enrollment Charge* of \$100 per semester.

Master's students who are not registered for on-campus work at the time they complete their degree requirements (i.e., examinations, theses) will be assessed an *In Absentia Charge* of \$25 one month prior to the conferral of their degree. This charge will not apply to students removing course incompletes.

Doctoral Students: Doctoral students who are in residence and engaged in dissertation research must register for Doctoral Research (course number 999). A minimum of two semesters of registration for 999 is required. However, doctoral students using University facilities while engaging in dissertation research must register for 999 each semester even if the minimum requirement has been met. The charge for this registration will be \$300 per semester or \$150 per summer session.

Doctoral candidates not in residence at the time they complete their degree requirements (i.e., examinations, submission of dissertation) will be assessed an *In Absentia Charge* of \$100 one month prior to the conferral of their degree.

A Memorial Union Fee of \$21.25 per semester and a Student Services Fee of \$5 per semester must be paid by all full-time admitted graduate students. Part-time students pay a Memorial Union Fee of \$10.65 per semester, are not liable for the Student Services Fee, but are charged a registration fee of \$5 for New Hampshire residents or \$10 for nonresidents.

Students may audit courses with the consent of their adviser and the instructor involved. *Charges for auditing a course are the same as taking it for credit.*

University-supported graduate assistants and project assistants receiving the full academic year stipend may be exempted from the payment of tuition and course

charges during the academic year of their appointment and the following summer session. University supported graduate assistants receiving half the normal academic year stipend may be exempted from the payment of half or their tuition and course charges in the academic year of their appointment and the following summer session.

Charges and Refunds for Changes: Three-fourths of tuition charges will be refunded to a student withdrawing from UNH within the first week of classes; one-half, after the first week but within thirty days of the first class day; and none thereafter. (See University Calendar, page 156.) A \$10 fee must be paid by all students dropping a course after the first two weeks of classes. The \$10 fee will not be charged to students changing to a reduced load or students withdrawing; and in both cases, the regular tuition rebate policy will apply. A \$10 fee will also be assessed for courses added after the three-week add period. The occasional student who registers very late (after the add period) will be assessed the \$10 fee for each course in the late registration. A change of section (within the same course) is accomplished by a “drop” of one section and an “add” of another section. The fee will not be assessed for the add portion of a late section change; but the \$10 drop fee will still apply for the drop portion of a late section change. There are no refunds of the Memorial Union Fee and Student Services Fee.

Financial Aid

Fellowships and Scholarships

University of New Hampshire Fellowships: A limited number of three-year “University of New Hampshire Fellowships” are awarded to outstanding doctoral students. Each recipient is given an opportunity to spend the first year in full-time study, the second year as a teaching assistant, and the third year as a research assistant. The stipends for this program are \$3,400 for the first academic year, \$3,600 for the second academic year, and \$3,800 for the third academic year. In addition, the award provides \$1,000 support for each of two summers and waiver of tuition. These awards are made by the Graduate School Student Fellowship Selection Committee from nominations from the various programs.

Graduate Merit Scholarships: A recipient of a graduate assistantship or a project assistantship who is newly admitted to a Ph.D. program and has outstanding qualifications may be awarded a Graduate Merit Scholarship. The Scholarship will supplement the stipend to provide a total level of academic year support of \$4,000. Continuation of a Graduate Merit Scholarship into succeeding years will be contingent upon the student’s demonstration of superior performance in a doctoral program.

Tuition Scholarships: Up to 50 superior students may be granted academic-year tuition scholarships. These awards provide only for waiver of tuition charges and are

subject to the maintenance of a high scholastic record in the Graduate School. Full-time students apply through the department; part-time, the Graduate School.

Dissertation Fellowships: Dissertation Fellowships with stipends of up to \$3,400 for a maximum tenure of one academic year are available. These awards include a waiver of the doctoral research registration fee for the period of the award. Applications should be made to the dean of the Graduate School.

Martin Luther King Assistantships: Martin Luther King Assistantships provide support for qualified members of minority groups. Applications should be made to the Graduate School Office.

Summer Fellowships for Teaching Assistants: A limited number of Summer Fellowships are available for students who have held graduate assistantships involving teaching during a previous academic year. The stipend for summer study is \$1,000.

Assistantships

Approximately 360 graduate and project assistantships are awarded annually to superior students; appointments are for one academic year but may be renewable. Assistants normally are involved in assistantship activities for 20 hours a week. All graduate students holding appointments as graduate or project assistants must be regularly admitted to the Graduate School and must register for two or more full courses or equivalent thesis credits or doctoral research during each semester in which they hold their appointments. Such students are considered full-time students.

Inquiries regarding assistantships should be addressed to the chairperson of the appropriate department or program.

Appointments are made in the following categories:

Graduate Assistants: Most assistants are involved in assisting faculty members in instructional activities. A limited number of appointments involves assisting in research activities in the Agricultural Experiment Station. Stipends for graduate assistants are \$3,400 per academic year. Doctoral students who have held an assistantship for two years may qualify for a stipend of \$3,800 per academic year. (See Graduate Merit Scholarships program on page 21.) University supported graduate assistants receiving the full academic-year stipend may be exempted from the payment of tuition and course charges during the academic year of their appointment and the following summer session. University supported graduate assistants receiving half the normal academic-year stipend may be exempted from the payment of half of their tuition and course charges in the academic year of their appointment and the following summer session.

Project Assistants: These assistants aid faculty members in externally funded research projects. Stipends for project assistants are \$3,400 for academic year. Doc-

toral students who have held an assistantship for two years may qualify for a stipend of \$3,800 per academic year. Project assistants receiving the full academic-year stipend may be exempted from the payment of tuition and course charges during the academic year of their appointment and the following summer session. Project assistants receiving half the normal academic-year stipend may be exempted from the payment of half of their course charges and academic fees in the academic year of their appointment and the following summer session. (See Graduate Merit Scholarships program on page 21.)

Graduate Associates: A very limited number of highly qualified graduate students may be appointed to teaching or research positions as graduate associates. The academic load for students appointed to these positions will not exceed two full courses or doctoral research registration per semester. Stipends are negotiable up to \$6,500 per academic year according to the qualifications and duties of the student. Graduate associates receiving a stipend of more than \$3,000 per academic year may be exempted from the payment of tuition and course charges during the academic year of their appointment. Graduate associates receiving \$3,000 or less per academic year may be exempted from the payment of half of their tuition and course charges during the academic year of their appointment.

Summer Assistantships: Full-time summer employment may be available for project assistants or graduate assistants. The monthly rate for full-time employment is \$680 for students having an academic year stipend of \$3,400, and \$760 for students having an academic year stipend of \$3,800, for a maximum of two and a half months of full-time employment. Students so employed are not normally permitted to register for summer session courses.

Federally Funded Traineeships and Fellowships

Subject to the availability of federal funds, a variety of federal fellowships and traineeships are available for outstanding graduate students. These awards are open to U.S. citizens only. The stipends for these awards vary somewhat but average \$3,900 for 12 months of study plus tuition waiver.

It is suggested that applicants contact the National Science Foundation, Fellowship Office, National Research Council, 2101 Constitution Avenue, N.W., Washington, D.C. 20418 and/or Career Development Review Branch, Division of Research Grant, National Institutes of Health, Public Health Service, Bethesda, Maryland 20014.

Loan and Work-Study Programs

National Direct Student Loans: To be eligible for consideration, a student must be an admitted degree candidate carrying at least one-half the full-time academic load as defined by the University, be a U.S. citizen or a permanent resident of the U.S., and establish need for a loan that is to be used for educational purposes only.

Academic Regulations

Graduate Credits and Grades

UNH Loans: To be eligible for consideration, a student must be a registered degree candidate. Financial need must be clearly established, and if approved, the loan may be used for educational purposes only. The maximum amount granted to a student is \$1,000 during his or her undergraduate and/or graduate work.

College Work-Study Program: With the aid of federal funds, the University is able to provide employment opportunities on campus or in various off-campus agencies. To be eligible for consideration, a student must be an admitted degree candidate carrying at least one-half the full-time academic load as defined by the University and demonstrate financial need as determined by the Financial Aid Office. Work during the academic year is usually on campus.

Applications for the above programs may be obtained from the Financial Aid Office, Thompson Hall, and must be returned not later than May 1.

Guaranteed Student Loan Program: Students may apply for as much as \$5,000 per year from a bank or other financial institution participating in the Guaranteed Student Loan Program. Qualified borrowers pay no interest while attending college. Repayment of principal and interest begins nine months after the student ceases a full-time course of study. Check with your local bank for further details and current interest charges.

Credits: Graduate credits may be earned in courses numbered from 700 through 898 and in the thesis. Graduate credits will not be given for any courses which are open to freshmen and sophomores. Under certain conditions, graduate credit may be allowed for 600-level courses in master's degree programs. (See general requirements for master's degrees.)

In many departments or programs it is possible for students to do part of their work during the summer session. Students should consult the Summer Session Office in Verrette House concerning the courses offered and course schedules. Students intending to graduate in September 1980 must present dissertation or thesis to the Graduate School Office by August 8; the last day for final Ph.D. and master's examinations and completion of all degree requirements is August 15.

Grades: The following grades are used in the University: A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F. Graduate credit is normally granted only for course work completed with a grade of B- or higher. Any grade below the B- level will normally not count for graduate credit and will count toward the accumulation of nine failing credits which will normally result in a student being required to withdraw from the Graduate School. However, a student's advisory committee, or adviser and appropriate departmental committee, may recommend to the dean of the Graduate

School that up to eight credits of C or C+ be granted for graduate credit. When a student's advisory committee or his/her adviser in conjunction with the appropriate departmental committee wishes to recommend that credit be given for work completed with a C or C+, the advisory committee shall forward its recommendation with appropriate justification within one month after conclusion of the course.

A Credit (Cr.) grade is given for complete, approved theses and dissertations.

With the permission of the instructor at the time of registration, a graduate student may elect to take independent study courses on a credit/fail basis. Students electing this option should ask the instructor to send written notification to the Graduate School and Registrar's Office that the graduate student is taking the course credit/fail. The undergraduate pass/fail option is not available to graduate students taking graduate courses.

An incomplete grade earned by a graduate student must be removed by the end of the semester following the one in which the incomplete grade was obtained. An incomplete grade automatically becomes an F if not removed within the allowed time period. It is the responsibility of the student to complete work required for the removal of the incomplete within the allotted time period. This rule does not apply to the completion of the thesis.

Academic Standards: Any graduate student receiving failing grades in 9 or more credits will be dismissed from the Graduate School. Any grade below the B- level, including grades of C or C+ which may have been approved for graduate credit, will, for the purposes of determining academic standing, be considered failing grades. Students are advised that this academic standing requirement is the minimum standard required by the Graduate School. Each individual program may set and announce standards for coursework and research achievement which are more rigorous than this minimum standard. Thus, students in some programs may be dismissed if they accumulate less than 9 credits of failing grades and/or fail to make adequate progress in other aspects of their graduate program.

Transfer Credit, Master's Programs: Candidates for the master's degree and the Certificate of Advanced Graduate Study (C.A.G.S.) may request that up to six graduate credits earned at another institution which is regionally accredited at the graduate level be transferred to count toward a master's program. All courses presented for transfer must have been completed with a grade of B or better. The transferability of any credits will be determined by the faculty of the graduate program and the Graduate School. Students presenting credits earned in nontraditional courses and/or in courses taken at locations other than the main campus of the offering institution are advised that such courses will receive careful review to insure that they are of acceptable graduate quality. Students should also be aware that transfer credits reduce the number of credits (12) which can be earned in UNH courses taken off the Durham campus.

Requirements for Master's Degrees

Transfer Credit, Doctoral Programs: Since the doctoral degree does not require a specific number of courses, credits are not formally transferred onto doctoral students' transcripts.

General Requirements: A minimum of 30 graduate credits is required for all master's degrees. Many programs require substantially more than the minimum 30 credits. Consult the appropriate program description in this catalog. Graduate credits are normally earned in courses numbered 700-899. Master's candidates must earn at least eight credits in courses numbered 800-898. (Thesis credits cannot be used to meet this requirement.) Up to 12 credits earned in courses numbered 600-699 may be counted toward master's degrees if the courses are given in a department other than the one in which the degree is earned. The faculty of each graduate program will prescribe the courses which make up the degree program. Somewhat different requirements obtain for the Master of Science for Teachers degree. Consult the appropriate program description in this catalog.

A student will normally spend at least one calendar year, or the equivalent, in satisfying the requirements for the degree. No more than 12 credits, not including thesis, may be earned in UNH courses taken off the Durham campus. Credits transferred from another graduate school will count as part of the 12 credits which may be earned off the Durham campus. Transfer and off-campus credits will be applied toward the degree only if recommended by the major department and approved by the Graduate School.

All graduate work for any master's degree must be completed within six years of the time of registration for the first graduate work applied toward the degree. Progress toward the degree will be carefully monitored by the adviser and the Graduate School to ensure that adequate advancement is made toward the completion of the program and that any deficiencies noted at the time of admission are removed.

In any department or program requiring a final examination for the master's degree, the examination may be oral, written, or both. A candidate will be permitted only two opportunities to take the final examination for the master's degree. The time of final examinations will be at the convenience of the department concerned, except that all such examinations must be given at least two weeks before the Commencement date in the year in which the degree is to be conferred. Further regulations governing the final written examination, when required, will be made by the department concerned, subject to the approval of the dean of the Graduate School. Oral examining committees, when required, are appointed by the dean of the Graduate School, upon the recommendation of the department concerned. The dean of the Graduate School is, ex officio, a member of all examining committees.

Master's Thesis: A thesis may be required of candidates for the master's degree. Consult the individual program descriptions for thesis requirements. A master's

thesis must be approved by a committee composed of the faculty member under whose direction it was written and two other members of the graduate faculty nominated by the department chairperson and appointed by the dean of the Graduate School.

Each department will determine the date when the candidate must submit for approval a statement of the subject of the thesis and the date when the thesis must be completed.

From six to ten thesis credits may be applied toward a master's degree. The exact number of credits to be assigned will be determined by the faculty of the individual programs. No thesis credit shall be given until the completed thesis has been approved by the thesis committee. No letter grade shall be given for the thesis, but its satisfactory acceptance will be recorded with a Credit (Cr.).

Students writing theses should obtain from the Graduate School Office the latest regulations for the form and typing of theses.

Whenever a thesis is published or otherwise reproduced, it must be designated as having been accepted as a master's thesis by the University of New Hampshire.

The original and one copy of the approved thesis, ready for binding, shall be submitted to the Graduate School Office as soon after approval as possible but not less than two weeks before Commencement. Binding fees will be paid at the Graduate School. Most programs require one copy of the thesis in addition to the above-mentioned two copies. Students should consult their advisers concerning thesis requirements.

Requirements for Doctor's Degrees

General Requirements: The degree of Doctor of Philosophy is conferred on qualified candidates who have passed an oral or written examination on the subject matter of their field of study, who have completed an original investigation in this field and have embodied the results in an acceptable dissertation, and who have passed an oral examination in defense of the dissertation. The degree of Doctor of Philosophy is essentially a research degree. It is not given merely for the completion of course credits. Programs leading to the degree of Doctor of Philosophy are offered in biochemistry, botany, chemistry, economics, English, engineering, genetics, history, mathematics, mathematics education, microbiology, physics, plant science, psychology, sociology, and zoology.

All doctoral students must be registered each semester that they use University facilities. A minimum of three academic years of graduate study is required for the doctorate. Resident graduate work done at other universities may be counted toward the minimum requirement upon approval of the guidance committee and the dean of the Graduate School, but one full academic year must be in residence at the University of New Hampshire. In individual cases, the major department and the

dean of the Graduate School may grant permission to pursue the research for the dissertation at another institution where access to special facilities would be advantageous.

All graduate work for the doctorate must be completed by the end of the fifth academic year following that in which the student completes the requirements for advancement to candidacy.

Degree Candidacy: A guidance committee will be appointed by the dean of the Graduate School upon the recommendation of the program faculty as soon as possible after a student has begun study for the doctoral degree. The committee will have the responsibility of assisting the student in outlining a program and preparing for the qualifying examination and will administer the examination.

The qualifying examination may be written, oral, or both. This examination will test: 1) the student's general knowledge in the student's major and minor work and 2) the student's fitness for engaging in research, particularly in the subject proposed for the dissertation. The results of the examination will be communicated by the chairperson of the student's program to the dean of the Graduate School.

After the successful completion of the qualifying examination, a doctoral committee will be appointed to supervise and pass on the dissertation and administer the final examination. This committee will be nominated by the department of major concentration and appointed by the dean of the Graduate School. It shall consist of a minimum of five members, usually three from the major department and two from related departments. The dean of the Graduate School is an ex officio member of all doctoral committees.

The student may not be advanced to candidacy for the Ph.D. until he/she has passed the qualifying examination and met such language or proficiency requirements as are deemed desirable by the faculty of the student's program and/or guidance committee. The proposed subject of the student's dissertation must be declared at the time of the advancement to candidacy.

Dissertation: The dissertation must be a contribution to scholarship in the student's discipline, embodying the results of significant and original research, and a mature and competent piece of writing. Students writing dissertations should obtain from the Graduate School Office the latest regulations for the form and typing of dissertations.

A copy of the completed dissertation must be made available to the members of the examining committee two weeks before the final examination date. As soon after the examination as possible but not less than two weeks prior to Commencement, the original and one copy of the approved dissertation, ready for binding, shall be turned in to the Graduate Office. Binding, microfilming, and copyright fees will be paid at the Graduate School. Most departments require one copy of the thesis in

addition to the above-mentioned two copies. Students should consult their advisers concerning dissertation requirements.

Publication of the dissertation by University Microfilms will be required, and the cost will be assumed by the student. Students are urged to protect their research by copyrighting their dissertation at the time of microfilming. If the material presented in the dissertation is published, it should be designated as having been accepted as a doctoral dissertation by the University of New Hampshire.

The final oral examination is conducted by the doctoral committee and is intended to give the candidate an opportunity to defend the dissertation. A written final examination, on subject matter not covered in the qualifying examination, may also be required. This written examination is conducted by the major department. These final examinations must be completed at least two weeks prior to the date of receiving the degree. After consultation with the major department, the dean may appoint, for participation in the final oral examination, additional members of the faculty under whom the student has worked. The doctoral committee alone shall decide on the merits of the candidate's performance by a majority vote.

Registration Procedure

Students admitted to the Graduate School must have their programs approved by the chairperson of the department or the chairperson of the guidance committee and by the dean of the Graduate School. Registration is held the first Monday after classes begin each semester and on the first day of the summer session. All tuition and fees are payable at the time of registration. Consult the calendar in this catalog for the date of registration.

Preregistration for continuing students is at the option of the department; students required to preregister should do so at the Registrar's Office during the time designated in the calendar. A \$10 fee is charged for not preregistering if required. Registration information and Time and Room Schedules may be obtained from the Registrar's Office, Thompson Hall.

Students who find it necessary to interrupt their graduate programs may request a leave of absence by writing to the dean of the Graduate School stating the reasons for, and the anticipated length of, the interruption.

Students who do not register during a twelve-month period and have not notified the Graduate School of their intention to continue in their degree programs must reapply for admission in order to resume their graduate work.

Full-time Graduate Students: Full-time graduate students are those who have received either a conditional or regular admission to the Graduate School and are enrolled each semester for sufficient course or thesis (899) credits to be liable for full tuition. Students registered for Doctoral Research (course number 999) or paying a Master's Continuing Enrollment Charge are also classified as full-time

students. Students holding appointments as graduate assistants or project assistants are considered full-time students and must be enrolled for a minimum of two full courses, equivalent thesis credits, or doctoral research each semester.

The maximum graduate load allowed is sixteen credits for a regular semester, four credits for a four-week summer session, and eight credits for an eight-week summer session. Only under unusual circumstances will a student be allowed to exceed these limits, and then only with the recommendation of the student's adviser and the approval of the dean of the Graduate School.

Dropping and Adding Courses: Graduate students may drop courses without penalty through the second Friday of classes by filing with the Registrar's Office a "drop-add" card obtained from the instructor of the course and signed by the instructor and the student's adviser. After the second Friday of classes a \$10 fee is charged for each dropped course. A student may drop a course after mid-semester only for compelling nonacademic reasons, which must be presented in a petition signed by the course instructor and approved by the student's adviser and the assistant dean of the Graduate School. A course may be added through the third Friday of classes, after which a \$10 fee is charged for each added course and the approval of the assistant dean of the Graduate School is necessary.

Withdrawal Procedure: A student may withdraw from the Graduate School during any semester by obtaining a withdrawal form from the registrar. This form should be signed by the student's adviser, the dean of the Graduate School, and other appropriate University officials (e.g., the director of residences). When completed, the form should be filed with the registrar.

If a student withdraws from a course prior to mid-semester, the course will not appear on his/her permanent record. If, for compelling nonacademic reasons, a student submits an approved petition to drop a course after mid-semester, a notation of "W" will be shown on his/her academic record together with the grade in the course at the time the course is dropped.

UNH and Graduate Life

The home of the University is Durham—one of the oldest towns in northern New England. The town is semirural and still retains traces of its colonial past. Easy accessibility to Boston's cultural opportunities (65 miles to the south); unsurpassed skiing, hiking, and scenery of the White Mountains (60 miles northwest); and sandy beaches and rocky coast of New Hampshire and Maine (10 miles east) make it an ideal location.

The campus, 188 acres in size, is surrounded by more than 3,000 acres of fields, farms, and woodlands owned by the University. A stream flowing through a large wooded area in the middle of the campus enhances the natural open space among the buildings—35 for teaching, research, and service, and 30 residence halls for men and women.

The University is composed of the College of Liberal Arts, College of Life Sciences and Agriculture, College of Engineering and Physical Sciences, Whittemore School of Business and Economics, School of Health Studies, Thompson School of Applied Science, Division of Continuing Education, and the Graduate School. In addition to these colleges and schools located on the University campus, the University System of New Hampshire also includes Keene State, Plymouth State, and Merrimack Valley Colleges and the School of Continuing Studies.

The University enrolls more than 10,000 students, has a full-time faculty of more than 500, and offers 89 undergraduate and 63 graduate programs. The student body includes 1,000 graduate students taught by a faculty of over 400.

The University of New Hampshire is one of 117 colleges made possible by federal land grants which aided states in developing institutions to serve all the people. The institution was founded as New Hampshire College of Agriculture and Mechanic Arts in 1866 to train young men and women for service to the state through agriculture and technology. In 1893, New Hampshire College (as it was called at that time) moved from Hanover to Durham, as the result of a bequest of lands and funds by Benjamin Thompson, and began to develop more rapidly. University status was conferred in 1923.

Graduate Student Life

Graduate students play an active role in the life of the University community. In most departments, students are consulted concerning issues affecting their programs and serve as full voting members on important departmental committees. Three graduate students are elected by the graduate student organization as full voting members of the Graduate Council, the body which advises the graduate dean on all matters concerning Graduate School policy. Graduate students, elected

Recreation and Cultural Activities

by districts, serve in the Student Caucus and University Senate. Graduate students serve on such University-wide committees as the Research Council and the Teaching and Learning Council.

Babcock House, the graduate student residence hall, has become a center for both academic and nonacademic graduate student activities. Events in the past year have included seminars on job opportunities, art exhibits, film series, evening gatherings, fishing trips, and trips to Boston Pops concerts. Most events at Babcock House are open to all graduate students. Graduate students are also invited to participate in most undergraduate clubs and social organizations.

Graduate students may participate in a variety of recreational, social, and cultural programs that take place on the campus throughout the year.

Each year UNH's Celebrity Series brings a colorful array of professional talent to the University. Offerings include classical, modern, baroque, and jazz music, and programs centered on human communication, whether in song, dance, speech, or mime. A sampling of recent programs includes Michael Rothwell in *The World of Lewis Carroll*, Moscow Chamber Orchestra, Twyla Tharp Dance Foundation, Pilobolus Dance Theater, Waverly Consort's presentation of "Las Cantigas de Santa Maria," New York New Music Ensemble, and Preservation Hall Jazz Band.

The Sidore Series brings provocative well-known speakers and experimental programs throughout the year. Donald Woods, Antonia Brico, Shere Hite, and Ellis Rivkin lectured as guests of the Series in 1978-79.

University students perform frequently in concerts, recitals, and theatrical productions. These programs originate in the music and the theater and communication departments and are open to graduate students for participation. The Department of the Arts hosts exhibitions in the newly redesigned University Galleries. The University's two theaters and the art galleries are located in the Paul Creative Arts Center.

Student organizations bring folk and rock concerts to campus and provide a wide variety of social events including dances and gourmet dinners. The Memorial Union houses the student-operated FM radio station, the student newspaper, offices for student organizations, and facilities for student film services.

The Memorial Union games area runs the length of the building's lower level and contains pool tables, ping pong, pinball machines, and candlepin bowling lanes. The area is open to all; no recreation passes are required.

The Memorial Union also offers craft courses. Other student and University organizations schedule lectures, concerts, plays, or films throughout the year. There is a charge for some events but many are free.

The University Library has music listening rooms and a collection of more than 8,500 tapes and records. New Hampshire's educational television station, WENH-

TV, broadcasts in-school programs for 110,000 young people and, during evening hours, cultural and educational programs. Additional information is available through the offices of the Memorial Union and Student Activities.

Student Services

Graduate School Office

The staff of the Graduate School Office in the Horton Social Science Center is available to assist graduate students in both academic and personal matters affecting their study at the University with information and advice concerning such academic issues as admission, degree requirements, thesis and dissertation format, procedures for changing programs, interdisciplinary options, availability of fellowships and other forms of financial aid (both UNH and external), and part-time employment opportunities. The Graduate School supports graduate student organizations and assists in planning social, informational, and academic programs and events for graduate students and faculty. Students are urged to contact the office concerning any questions about the availability or applicability of various University sponsored student services to graduate students.

Graduate Student Residences

Babcock House: The graduate residence hall is designed to provide housing for full-time graduate students and to provide quiet, dignified areas for graduate students to meet informally with one another and with members of the faculty. Babcock House is located on McDaniel Drive within easy walking distance of a number of major classroom areas as well as the University Library, University theaters, and the Memorial Union Building. Parking is available on campus.

The structure, consisting of two six-story towers connected at each floor by a common lounge, accommodates 180 men and women. The house also has a large main lounge with fireplace, two recreation rooms, a food vending room, coin-operated laundry, TV room, luggage storage, individual mailboxes, and optional private room telephones. All rooms are single occupancy, allowing complete privacy for consultation with students or faculty. Each room is furnished with a bed, mattress, easy chair, desk chair, and built-in desk-dresser-wardrobe unit with book shelves, mirror, medicine chest, and desk lamp. Residents provide their own bedding. An optional linen service furnishes bed linen, towels, and blankets at a minimal cost.

A full-time resident director lives in the apartment on the ground floor and works in conjunction with a graduate student House Council to provide cultural and social programs for the graduate community. The resident director and four graduate resident assistants carry out the administrative responsibilities of the house and are knowledgeable about University policies and available personal services.

The rental charge for Babcock House is \$900 per student per academic year. All rental fees are subject to revision by the Board of Trustees. Following acceptance

Dining

to the Graduate School, a student interested in Babcock residence should contact the Office of Residential Life, Pettee House, Durham, N.H. 03824, for Babcock House application information. There are usually more applicants than there are spaces available, so it is important that a student return the application and prepayment promptly. A waiting list is maintained.

Forest Park Apartments: The University owns and operates Forest Park, a complex of 154 studio (efficiency) and one- and two-bedroom apartments for students, faculty, and staff with families. The development is composed of two- and three-story buildings located on the edge of campus, convenient to all University facilities and within walking distance of the Durham shopping area and schools. Residency is not limited to graduate student families, and the demand for these apartments is great. To be eligible for the University apartments, a graduate student must have been admitted to the University and be a full-time student as defined in this catalog. Students may apply for Forest Park before fulfilling the above requirements as long as they are met at the time of assignment.

Since the waiting time can approach one year from date of receipt of application until assignment, students should apply as early as possible. A brochure with the application blank and information about Forest Park is available from: Forest Park Resident Manager, Building 16, Forest Park, Durham, N.H. 03824.

Summer Housing: A limited number of rooms in Babcock House are available to graduate students taking courses during the summer. Students interested in summer accommodations should contact the Summer Housing Office, University of New Hampshire, Durham, N.H. 03824. Summer graduate students, studying through the Division of Continuing Education, need only complete and return the Summer Housing Application Form in the DCE Summer catalog.

Off-Campus Housing: The Residence Office operates an office to assist students in obtaining off-campus housing. As in most university communities, rents in the Durham area can be high and the supply limited. The office does have listings of off-campus rentals in Durham and the surrounding area which are updated weekly.

Students are encouraged to make every effort to come to campus so that the Off-Campus Housing Office will be able to assist in finding accommodations. The office is located near the commuter lounge of the Memorial Union Building and is open Monday through Friday.

Graduate students may elect to take their meals on a contractual basis with the University dining halls whether or not they live on campus. There are limited cooking facilities in Babcock House but none in individual rooms. Information concerning meal plans is available from the Office of Residential Life, Pettee House, Durham, N.H. 03824.

Counseling and Health Services

University Health Service: This service, located in Hood House, has a well-equipped clinic for initial diagnosis and treatment of student health problems. Services include: out- and in-patient care, laboratory tests, x-rays, limited mental health care, and routine medications. For serious medical problems students are generally referred to consultants and/or a local hospital. An emergency ambulance service is available.

During the regular academic year, Hood House is staffed by full-time physicians, nurses, and part-time consultants. Regular clinic hours are held and appointments may be made upon request. Nurses are available twenty-four hours a day and a duty doctor is always on call.

Hood House is closed during holidays and semester breaks and operates on a very limited basis during summer session. The spouses and children of students and University employees are not eligible for treatment at Hood House.

Full time graduate students using Hood House may prepay a voluntary health fee or pay a fee for services used. In addition, an optional group accident and sickness insurance policy is available through Hood House.

Counseling and Testing Center: The Counseling and Testing Center offers students, without charge, professional assistance in meeting a variety of personal, educational, and vocational problems. Services include individual and group counseling, vocational testing, and information on national testing programs such as the Graduate Record Examination and the Miller Analogies Test. Individual clinical testing is available when indicated.

The Center sponsors a variety of student-oriented activities, e.g., personal skills groups on such topics as communication, values clarification, and life planning.

All information about students' visits to the Counseling and Testing Center is confidential and cannot be released without the permission of the student.

Career Planning and Placement Service

The Career Planning and Placement Service assists students in planning for professional careers following completion of their degree work. The assistance available to students includes an on-campus interview program, which brings recruiting personnel to the campus between November and May; a library of information on employers and career opportunities; vocational counseling; and placement techniques workshops.

The service will update students' records and provide assistance to alumni.

Campus Minister and Churches

A full-time on-campus minister is funded by the Ecumenical Ministry to the University of New Hampshire. In addition, several denominations have designated denominational chaplains. Places of worship for many faiths are convenient to the campus area. In Dover are a synagogue, Greek Orthodox Church, and a Friends Meeting; Protestant, Catholic, Episcopal, and Latter-day Saints churches are located in Durham.

The Alumni Association

All recipients of a graduate degree from the University are considered members of the Alumni Association. It organizes alumni activities including social and educational programs both on and off the campus. The *New Hampshire Alumnus* publishes news of alumni, the University, students, staff, and faculty.

Departmental Requirements and Course Descriptions

Key

When two course numbers precede a course title and are connected by a hyphen, the first semester of the course, or its equivalent, is a prerequisite to the second semester. If the course numbers are separated by a comma, qualified students may take the second semester without having had the first.

The notation "Lab" indicates that laboratory sessions are a part of the course.

Each prerequisite for a course is separated from the other prerequisites by a semicolon; e.g., Prereq: Educ 601; Psyc 635. If permission (of the instructor, department, adviser, or committee) is a prerequisite for all students, it is listed among the prerequisites; e.g., Prereq: Educ 601; Psyc 635; permission. If, on the other hand, permission may be substituted for one or more of the listed prerequisites, it follows the other prerequisites and is separated from them by a slash mark; e.g., Prereq: Educ 601; Psyc 635;/or permission. If permission may be substituted for only one of the prerequisite courses, it is listed with the course for which it may be substituted; e.g., Prereq: Educ 601 or permission; Psyc 635.

Cr/F following the description indicates that no letter grade is given but that the course is graded credit/fail.

For up-to-date information about when a course is offered; who teaches the course; the number of recitations, lectures, labs, and such, students are referred to each semester's *Time and Room Schedule*, which carries a complete schedule of courses for the semester.

Ancient and Modern Languages and Literatures

Chairperson: Grover E. Marshall

PROFESSORS: R. Alberto Casas, Warren H. Held, Jr.; Louis J. Hudon, Charles H. Leighton

ASSOCIATE PROFESSORS: Rose T. Antosiewicz, Richard J. Callan, Lydia Crowson, F. William Forbes, Marron C. Fort, Helmut F. Pfanner, Michael J. Rosenbush, John C. Rouman, Jack R. Vrooman

ASSISTANT PROFESSORS: Roger S. Brown, Barbara T. Cooper, Richard V. Desrosiers, Caren S. Greenberg, Bernadette Komonchak, Grover E. Marshall, James L. Sherman

German (Germ)

The German section of the Department of Ancient and Modern Languages and Literatures offers a program of graduate study leading to the degree of Master of Arts. This program is offered only through the German Summer School of the Atlantic, which combines the resources of UNH and the Goethe Institute of the Federal Republic of Germany. It provides students with a thorough knowledge of the German language, literature, and culture, and is designed to allow completion of the degree in a minimum of four summers.

To be admitted to graduate study, students must have completed an undergraduate program with significant concentration in German studies and have a good command of spoken and written German. They must also submit scores on the Graduate Record Examination, both the Aptitude Test and the Advanced Test in German. Students who have not had German 781, History and Development of the German Language, or its equivalent must take it before completing their graduate studies.

To satisfy the requirements for the Master of Arts degree, students must successfully complete ten full courses, including two seminars. (Courses of three or four credits count as full courses; two 2-credit courses equal a full course.) Candidates must also pass the departmental comprehensive examination based upon the master's reading list. Up to 18 credits may be taken at the University of Salzburg; interested students should consult the Director of Studies Abroad. Courses numbered 700-799 are for graduate students and advanced undergraduates. Courses numbered 800-899 are open to graduate students only. M.A. candidates must take a minimum of three courses at the 800 level.

723. SURVEY OF PRECLASSICAL GERMAN LITERATURE

German literature from its beginning till the late 18th century. Prereq: intro to Germ lit. 4 cr.

724. THE AGE OF GOETHE

Major literary movements between 1770 and 1832. Reading and analysis of selected works. Prereq: intro to Germ lit. 4 cr.

725. HISTORY OF GERMAN SPEAKING COUNTRIES

Survey of political, ethnological, and economic history of Germany, Austria, and Switzerland. 4 cr. (Summer Session only.)

726. GERMAN CULTURE AND CIVILIZATION

Historical, social, artistic, and folkloristic developments in German-speaking countries from the beginnings to the present. 4 cr.

727. GERMAN LITERATURE OF THE 19TH CENTURY

Major literary movements from Goethe's death to the unification of Germany by Bismarck (1832-1872). Reading and analysis of selected works. Prereq: intro to Germ lit. 4 cr.

728. MODERN GERMAN LITERATURE

Major literary movements from 1872 to the present. Reading and analysis of selected works. Prereq: intro to Germ lit. 4 cr.

771. INTRODUCTION TO MEDIEVAL GERMAN LITERATURE

Reading and critical analysis of selected works of the German Middle Ages. Texts in the original and in modern German translation. 4 cr. (Summer Session only.)

772. GERMAN LITERATURE OF THE ENLIGHTENMENT

Literature and criticism of the eighteenth century, including Gottsched, the Swiss critics, Lessing, Wieland, and the "Sturm und Drang." 4 cr. (Summer Session only.)

773. CLASSICAL PERIOD IN GERMAN LITERATURE

Reading and critical analysis; emphasis on Goethe and Schiller. 4 cr. (Summer Session only.)

774. GERMAN ROMANTICISM

Romantic movement from W. Schlegel to Eichendorff including writers outside the Romantic school, such as Kleist and Hölderlin. 4 cr. (Summer Session only.)

775. THE AGE OF REALISM

The outstanding prose and lyrics of Keller, Meyer, Storm, Fontane, and others. 4 cr. (Summer Session only.)

776. GERMAN LITERATURE FROM NATURALISM TO EXPRESSIONISM

Major literary movements 1880-1925, including Hauptmann, Wedekind, Mann, Hesse, Kafka, Rilke, and Benn. 4 cr. (Summer Session only.)

777. GERMAN LITERATURE FROM 1918 TO 1948

Literature of Germany between the two world wars and German exile literature. 4 cr. (Summer Session only.)

781. HISTORY AND DEVELOPMENT OF THE GERMAN LANGUAGE

The changes in sounds, structure, and vocabulary from the earliest record to the present. Required for German majors. 4 cr.

792. METHODS OF TEACHING GERMAN

Critical study of modern language teaching from elementary school through college; use of equipment, including films, tapes, and other audio-visual aids. 4 cr. (Summer Session only.)

795, 796. SPECIAL STUDIES IN GERMANIC LANGUAGES, LITERATURE, AND CULTURE

Topics to be arranged. Examples of typical courses: A Cultural Comparison of Germany and the United States; Phonology; Structure of Modern German. 1-4 cr. (Summer Session only.)

878. CONTEMPORARY GERMAN LITERATURE

Literary trends since 1948 in the two German states, Austria and Switzerland. 4 cr. (Summer Session only.)

885-886. GRADUATE STUDIES ABROAD

Program of studies at University of Salzburg, Austria, for students who have been admitted to the Graduate School. Students should consult with the director of the Studies Abroad program.

888. SEMINAR

Intensive study of a literary or cultural topic. May be repeated for credit barring duplication of material. 3 cr. (Summer Session only.)

895. SPECIAL STUDIES IN GERMAN LANGUAGE AND LITERATURE

Independent investigation of a range of subjects. Barring duplication of material, course may be repeated for credit. 3 cr. (Summer Session only.)

Spanish (Span)

The Spanish section offers courses leading to two degrees in Spanish: the Master of Arts and the Master of Science for Teachers.

Master of Arts

To be admitted to graduate study for the Master of Arts degree in Spanish, a student must have completed 30 credits in Spanish language and literature beyond first year Spanish, including a survey of

Spanish literature and two other literature courses. In addition, all candidates for admission must take the Graduate Record Examination Aptitude Test and Advanced Test in Spanish. To obtain the degree, the student must fulfill the course requirements, pass a comprehensive examination based on a master's degree reading list, and submit an acceptable thesis if such an option is chosen.

To satisfy the course requirements, the student must: a) successfully complete 10 graduate courses (of which eight should be from the Spanish offerings); or, b) successfully complete at least eight courses in Spanish and submit a thesis (six credits, thus completing the minimum of 30 credits required by the Graduate School). All advanced literature courses are conducted in Spanish.

In addition, M.A. students are required to take 801. Teaching assistants must also take 803. No student may register for a graduate course if s/he has already taken the corresponding undergraduate course here or its equivalent elsewhere.

A comprehensive examination based on a master's degree reading list will be given four times a year: in January, May, August, and September. The candidate will be permitted to take the examination only twice. Students failing their first attempt must wait at least three months before taking it again. The thesis option must embody the results of independent investigation and be written in a form acceptable to the Spanish section. It must be submitted to the thesis director six weeks before expected time of degree conferral.

Master of Science for Teachers

To be admitted to graduate study for the Master of Science for Teachers degree in Spanish, a candidate must have satisfactorily completed the requirements for secondary school teacher certification in the language. To obtain the degree, s/he must complete ten graduate courses of which eight will be from among Spanish offerings. Candidates must pass a department examination based on the master's degree reading list. Secondary school teachers interested in this degree should consult the section coordinator.

801. BIBLIOGRAPHY AND METHODS OF RESEARCH

Required of all graduate students in their first year of study. An introduction to standard bibliographical techniques and to form and style in the preparation and writing of research findings. Preparation of a research paper. 1 cr.

803. APPLIED LINGUISTICS

Required of all graduate assistants teaching in the departmental program, but open to all graduate students in Spanish. Discussion of current methodology and linguistic approaches to the teaching of Spanish. Instruction in the use of audio-visual aids including language laboratories. Readings, discussion, class observation. May be repeated for a total of 3 cr. 1 cr.

Ancient and Modern Languages and Literatures

811. MEDIEVAL SPANISH LITERATURE

Spanish literature including social and historical backgrounds, 1100-1500: *Poema de mio Cid*, *Berceo*, *Mester de clerecía*, *Libro de buen amor*, *Cancionero* poets, and *La Celestina*. 3 cr. (Not offered every year.)

831. RIVER PLATE LITERATURE

Sarmiento, José Hernández, Rodó, Florencio Sánchez, Mallea. Focus on the question of *Argentinidad*. 3 cr. (Not offered every year.)

852. DRAMA AND POETRY OF THE SIGLO DE ORO

Social and historical background of Baroque period. Representative plays of Lope de Vega, Tirso de Molina, Calderón; lyric poetry of Lope, Góngora, and Quevedo; prose developments. 3 cr. (Not offered every year.)

854. CERVANTES

Cervantes' literary art. Selections from the major works. The *Quijote*, its originality and significance; its antecedents; its religious, philosophical, and sociological aspects; and its artistic structure. 3 cr. (Not offered every year.)

855. LITERATURE OF THE 19th CENTURY

Larra, Espronceda, Bécquer, Pérez Galdós, and Blasco Ibáñez. Romanticism, realism, and naturalism. 3 cr. (Not offered every year.)

857. THEATER AND POETRY OF THE 20th CENTURY

The Generation of 1898 and *Modernismo*: Lorca, Casona, Buero Vallejo, Sastre, Salinas, Guillén, and Miguel Hernández. 3 cr. (Not offered every year.)

858. SPANISH PROSE OF THE 20th CENTURY

Novels, short stories, and essays. Unamuno, Baroja, Menéndez Pidal, Ortega y Gasset, Julián Marías, Aranguren, Pérez de Ayala, Gironella, and Cela; survey of contemporary prose. 3 cr. (Not offered every year.)

860. UNAMUNO AND ORTEGA Y GASSET

Philosophical ideology and literary content of major contributions of Miguel de Unamuno and José Ortega y Gasset. 3 cr. (Not offered every year.)

871. SPANISH-AMERICAN DRAMA

From pre-Hispanic origins to the present; modern playwrights of Mexico and Puerto Rico. 3 cr. (Not offered every year.)

872. SPANISH-AMERICAN NOVEL

Development from Romanticism to the present; contemporary trends and techniques. 3 cr. (Not offered every year.)

873. SPANISH-AMERICAN SHORT STORY

Representative authors; stress on 20th century. Principles of interpretation. 3 cr. (Not offered every year.)

874. MAJOR SPANISH-AMERICAN AUTHORS

3 cr. (Not offered every year.)

891. METHODS OF FOREIGN LANGUAGE TEACHING—SPANISH

Interdepartmental course. Objectives, methods, and techniques in teaching Spanish, French, German, and Latin from elementary grades through college. Discussion, demonstration, preparation of instructional materials, microteaching of the language skills. Prereq: permission. 3 cr.

895, 896. SPECIAL STUDIES IN SPANISH LANGUAGE AND LITERATURE

A) The History of the Spanish Language; B) Medieval Spanish Literature; C) Spanish Literature of the Renaissance; D) Spanish Literature of the Golden Age; E) Spanish Literature of the 18th and 19th Centuries; F) Spanish Literature of the 20th Century (1898-1936); G) Contemporary Spanish Literature; H) Spanish-American Literature of the 16th and 17th Centuries; I) Spanish-American Literature of the 18th and 19th Centuries; J) Spanish-American Literature of the 20th Century; K) Contemporary Spanish-American Literature; L) Structural and Applied Linguistics; M) Spanish Literary Criticism; N) Spanish-American Essay; O) Latin America; P) Catalan; Q) Spanish Poetry; R) Spanish-American Poetry; S) Galdós; T) Archetype Latin American Literature; U) Special Teaching Problems; V) Spanish Civilization and Culture; W) Latin American Civilization and Culture; X) Borges; Y) Spanish Theater; Z) Spanish for Graduates (two-semester course must be taken in sequence); AA) Hispanic Minorities of the United States; BB) Portuguese. Guided study with training in bibliography and organization of material. Topics selected by instructor and student in conference. Prereq: permission of the major supervisor. 1-3 cr.

899. MASTER'S THESIS

6 cr.

Animal Sciences (AnSc)

Chairperson: W.C. Skoglund

PROFESSORS: Walter M. Collins, William R. Dunlop, James B. Holter, Winthrop C. Skoglund, Samuel C. Smith, Richard G. Strout

ASSOCIATE PROFESSORS: Thomas P. Fairchild, Gerald L. Smith, Larry L. Stackhouse

ASSISTANT PROFESSORS: William Condon, Ginny Darr, Walter Hylton, Charles Schwab.

LECTURER: Elizabeth Smith

To be admitted to graduate study in animal sciences an applicant is expected to have had sufficient undergraduate training in the basic biological sciences to qualify for special work in this field.

Students pursuing the Master of Science degree in animal sciences may select courses in genetics, nutrition, physiology, management, and diseases and parasites. A thesis is required, and a candidate for the master's degree shall register for six thesis credits and pass an oral examination covering the graduate courses and thesis.

Doctoral-level study in areas related to animal sciences is offered through other biological science departments. Specifically, an interdisciplinary option is offered by the Departments of Biochemistry and Animal Sciences leading to the Ph.D. degree in Biochemistry (Nutrition); and the Ph.D. degree is offered in genetics through an Interdepartmental Genetics Program (see Genetics Program in this catalog).

Opportunities are provided for students to obtain teaching as well as research experience during their graduate studies.

701. PHYSIOLOGY OF REPRODUCTION

Physiology, embryology, endocrinology, reproduction, and lactation in domestic animals. Mr. Condon. Lab. 4 cr.

702. EXPERIMENTAL ENDOCRINOLOGY OF REPRODUCTION AND LACTATION

An in-depth study of the hormonal control of the estrous cycle; pregnancy and mammary gland growth and lactation; emphasis will be placed on current experimental data. Mr. Condon. Prereq: AnSc 701 and permission. Lab. 4 cr.

704. PRINCIPLES OF PATHOBIOLOGY

Principles of disease processes; reactivity of the diseased cell, tissue, and organ. Prereq: animal anatomy, health, and disease courses; /or permission. Mr. Stackhouse. 3 cr.

709. BIOCHEMISTRY OF NUTRITION

Intermediary metabolism of nutrients and energy; metabolism transport mechanisms; biological oxidation; interrelationships of

carbohydrate, fat, and protein metabolism; obesity; control of hunger and appetite. Staff. Prereq: college course in biochemistry. (Also offered as HEC 709.) 4 cr.

710. RUMINANT NUTRITION

Feeding and management of dairy animals; calf feeding, raising young stock, feeding for economical milk production. Mr. Holter. Lab. 4 cr.

711. COMPARATIVE ANIMAL GENETICS

How heredity affects domestic animals, poultry, other mammals, and fish; emphasis on the organism and population. Quantitative inheritance; principles of selection; disease resistance; statistical and experimental techniques. Prereq: 4 cr. of genetics; /or permission. Mr. Collins. Lab. 4 cr.

712. ANIMAL BREEDING AND IMPROVEMENT

Population genetics and selection in dairy cattle, livestock, and horses. Prereq: AnSc 711. Mr. Fairchild. Lab. 4 cr. (Not offered every year.)

714. INTRODUCTION TO ELECTRON MICROSCOPY

Principles, theories, and methods used in preparing and examining vertebrate tissues in the transmission and scanning electron microscopes; interpretation of electron micrographs. Prereq: chemistry; permission. Ms. Darr. 3 cr.

715. INTRODUCTION TO ELECTRON MICROSCOPY LAB

Application of principles and theories presented in AnSc 714. Students will carry out fixation embedding ultra microtomy, critical point drying operation of transmission and scanning electron microscopes, and photographic procedures. Coreq: AnSc 714; permission Ms. Darr. 2 cr.

795-796. INVESTIGATIONS IN DAIRY, LIVESTOCK, POULTRY

A) Genetics—Mr. G.L. Smith, Mr. Collins, Mr. Fairchild; B) Nutrition—Mr. G.L. Smith, Mr. Holter, Mr. Schwab; C) Management—Mr. G.L. Smith, Mr. Skoglund; D) Diseases— Mr. Dunlop, Mr. Hylton, Mr. Strout, Mr. S.C. Smith, Mr. Stackhouse, Ms. Darr; E) Products—Mr. G.L. Smith; F) Light Horses—Ms. Briggs, Mr. Gaiser; G) Physiology—Mr. Condon; The student may select a special problem in any of the fields listed under the guidance of the instructor. Elective only after consultation with the instructor in charge. May be repeated. 1-4 cr.

801. ADVANCED STUDIES IN ANIMAL BREEDING

Independent study and research on modern breeding methods and newer systems of selection for quantitative traits. Prereq: AnSc 712. Mr. Collins, Mr. Fairchild, Mr. G.L. Smith. Hours to be arranged. 3 cr.

802. MEATS, LIVESTOCK MARKETS, AND PRODUCTS

The essential factors in meat selection, cutting, curing, and smoking; study and discussion relative to the problems of livestock marketing and the procedure in the large central markets. Trips are taken to various packing plants. Mr. G. L. Smith. Lab. 4 cr.

803. ENERGY METABOLISM AND NUTRITION

Incidental lectures, assigned reading, and laboratory practice in methods of research with major emphasis on protein and energy metabolism. Mr. Holter. 3 cr. (Not offered every year.)

804. PROTEIN METABOLISM AND NUTRITION

Metabolism of dietary amino acids in the mammalian system with emphasis on various aspects of protein nutrition. Prereq: permission. Mr. Schwab. 3 cr. (Not offered every year.)

805-806. AVIAN MICROBIOLOGY

The disease process (acute or chronic) in the intact host at cellular levels when invaded by viruses or virus-like agents, fungi, and protozoans. Physiological and cytopathological changes in tissue culture. Mr. Dunlop, Mr. Strout. 3 cr.

807-808. AVIAN HISTOPATHOLOGY

First semester: general histopathology. Second semester: the special histopathology of common diseases with emphasis on correlation of light and electron microscopy of tumors and tumor formation. Prereq: histology or the equivalent. Mr. Dunlop and Mr. Strout. 3 cr.

810. MINERALS AND VITAMINS IN NUTRITION

Metabolism and function of mineral elements and vitamins in higher animals. Prereq: permission. Staff. 4 cr. (Not offered every year.)

812. QUANTITATIVE GENETICS AND SELECTION

Gene frequency, genetic and environmental variation, heritability, fitness, selection, inbreeding, outbreeding, correlated characters. Prereq: 1 course each in genetics and statistics. Mr. Collins. 3 cr. (Not offered every year.)

851. CELL CULTURE

Theory; principles fundamental to the culture of cells in vitro. Introduction to techniques of preparation and maintenance of animal, plant, insect, fish cell cultures. Application of cell culture to contemporary research in biological sciences. Prereq: gen micro; permission. Mr. Strout and staff, Mr. Metcalf and Mr. Minocha. Lab. (Also offered as Micr 851 and Bot 851.) 4 cr.

853. ADVANCED CELL BIOLOGY

A study of the ultrastructure and function of cell organelles followed by an analysis of various specialized animal cells to show how differences in form and location of various organelles lead to differences in function. Prereq: biochemistry; physiology; vertebrate anatomy; /or permission. Ms. Darr. 4 cr. (Not offered every year.)

897, 898. ANIMAL SCIENCE SEMINAR

A survey of recent literature and research in the animal sciences. Staff. 1 cr. May be repeated.

899. THESIS

Hours to be arranged. 6-10 cr.

Biochemistry (Bchm)

Chairperson: James A. Stewart

PROFESSORS: Donald M. Green, Edward J. Herbst, Miyoshi Ikawa, Gerald L. Klippenstein, Samuel C. Smith, Arthur E. Teeri
ASSOCIATE PROFESSOR: James A. Stewart

For admission to graduate study in biochemistry an applicant is expected to have completed basic courses in chemistry, biological sciences, mathematics, and physics. Otherwise well qualified applicants will be permitted to correct deficiencies in undergraduate education by enrollment in the appropriate courses or by independent study.

The department offers opportunities for specialization in developmental biochemistry, biochemistry of natural products, physical biochemistry, biochemical genetics, and structure and metabolism of macromolecules. Opportunities also exist for interdisciplinary research specialization in marine biochemistry, biochemical nutrition, and cell biology in adjunct facilities on campus and at the Jackson Estuarine Laboratory. In addition to the graduate courses in biochemistry, courses in advanced organic chemistry, radiochemistry, advanced microbiology, and genetics are usually recommended.

Participation of all graduate students will be required in the instructional activities of the department, either in the laboratory, in lectures, or in an individual instruction format. These teaching assignments are an essential part of the graduate academic programs of the department and are designed to give graduate students practical teaching experience. Normally one year of part-time teaching will be required of each student.

Master of Science degree candidates will be expected to develop a thesis on a basic research problem or to prepare a report or publication based on an applied project in biochemistry. All candidates for the M.S.

degree will be required to pass an oral examination based on the thesis or project report and on the graduate courses completed in the degree program.

Doctor of Philosophy degree candidates will be required to complete a dissertation on original research in biochemistry. At the end of the first year of graduate study, a preliminary examination on organic chemistry, physical chemistry, and general biochemistry will be presented to students in the doctoral program. The results of this examination and the student's academic record will be evaluated at this time to ascertain eligibility to proceed to candidacy in the doctoral program. Upon completion of graduate courses recommended by a guidance committee and demonstration of proficiency in the translation of biochemical literature in either German, French, or Russian, a doctoral student will be required to pass an oral qualifying examination conducted by the guidance committee. The successful completion of these requirements and advancement to candidacy for the Ph.D. degree must occur at least six months prior to the final oral defense of the Ph.D. dissertation administered by the student's doctoral committee.

601. GENERAL BIOCHEMISTRY

General principles. Prereq: organic chemistry. Students receiving credit for Bchm 601 may not receive credit for Bchm 501. Mr. Ikawa. Lab. 4 cr.

656. PHYSIOLOGICAL CHEMISTRY AND NUTRITION

Mammalian biochemistry with emphasis on the human. Lab study includes procedures basic to chemical methods of medical diagnosis. Prereq: organic chemistry. Mr. Teeri. Lab. 4 cr.

702. COMPARATIVE MARINE BIOCHEMISTRY

Nutrition, metabolism, and composition of marine organisms and relation to phylogeny; marine natural products. Mr. Ikawa. Prereq: Bchm 601 or equivalent. 3 cr. (Alternate years; offered 1979-80.)

721. NEUROCHEMISTRY

Biochemistry of the nervous system; metabolism and alterations of normal brain chemistry by drugs, chemicals, nutrition, memory, and learning; pathological changes. Mr. Stewart. Prereq: a biochemistry course. 3 cr. (Alternate years; offered 1980-81.)

751-752. PRINCIPLES OF BIOCHEMISTRY

Fundamental biochemistry; chemistry, metabolism, and biological function of nucleic acids, proteins, carbohydrates, and lipids. Prereq: organic chemistry or permission. Mr. Klippenstein and Mr. Stewart. Lab. 4 cr.

760. ENZYME CHEMISTRY

Structure, properties, and function of enzymes; kinetics and mechanisms of enzyme-catalyzed reactions; purification, characteriza-

tion, and assay of enzymes. Prereq: Bchm 601 or 751. Mr. Klippenstein. Lab. 4 cr. (Alternate years; offered 1980-81.)

770. BIOCHEMICAL GENETICS

Mechanisms of storage, replication, transmission, transcription, recombination, mutation, and expression of genetic information by cells and viruses. Prereq: Bchm 751 or permission. Mr. Green. Lab. 4 cr. (Alternate years; offered 1979-80.)

781. THE NUCLEIC ACIDS

Chemistry and metabolism of nucleic acids; molecular structures, purification and separation, biosynthesis, and biological functions. Mr. Herbst. Prereq: organic chemistry; biochemistry. 3 cr.

795, 796. INVESTIGATIONS IN BIOCHEMISTRY

Prereq: permission. Subject matter and hours to be arranged. 2 cr.

811. BIOCHEMISTRY OF LIPIDS

Chemistry, metabolism, and function of lipids. Prereq: Bchm 752 or equivalent. Mr. Smith. 3 cr. (Alternate years; offered 1979-80.)

832. BIOCHEMISTRY OF CARBOHYDRATES

Chemistry, metabolism, and functions of carbohydrates. Polysaccharides, glycoproteins, and the nature of cell surfaces. Prereq: Bchm 601 or equivalent. Mr. Ikawa. 3 cr. (Alternate years; offered 1980-81.)

842. BIOCHEMICAL REGULATORY MECHANISMS

Nonreplicative functions of DNA; transcription and translational control of protein synthesis; quantitative regulation of proteins; regulation of metabolism by hormones, allosteric regulation and repression; regulatory mechanisms operating during development and differentiation. Prereq: a course in biochemistry. Mr. Stewart. 3 cr. (Alternate years; offered 1979-80.)

850. PHYSICAL BIOCHEMISTRY

Structure, interactions, and physical properties of biomolecules. Thermodynamic, hydrodynamic, and spectroscopic methods for study of proteins and nucleic acids. Prereq: physical chemistry and biochemistry. Mr. Klippenstein. 3 cr. (Alternate years; offered 1979-80.)

897, 898. BIOCHEMISTRY SEMINAR

Prereq: permission. 0 cr.

899. MASTER OF SCIENCE THESIS

To be arranged. 6-10 cr.

999. DOCTORAL RESEARCH

Biology: Intercollege Biological Sciences Organization

Chairperson: Subhash C. Minocha

Chairperson of Graduate Advising Committee: Alan Baker

The Master of Science and Master of Science for Teachers programs in biology are administered by the Intercollege Biological Sciences Organization, which is composed of faculty members involved in teaching and research in various biological sciences. Students in these degree programs consult with the Graduate Advising Committee in planning their individual programs. At present, participating faculty are drawn from the following areas: molecular, cellular, and developmental biology; systematics, ecology, and evolution; physiology, anatomy, and nutrition; genetics; pathobiology.

Master of Science

This is a general, nonthesis program which is applicable to interests which may not be met in a formal department. Curricula may be individually designed for persons working for agencies which require advanced, broad training in the biological sciences, or for those who wish to prepare for junior or community college teaching. Applicants should have a bachelor's degree in biology, zoology, botany, microbiology, or a strong background in biological and physical sciences including physics, college mathematics, and organic chemistry. Those admitted to the program will be required to pass a final comprehensive examination on coursework taken for the degree.

Master of Science for Teachers (MST)

This is a nonthesis program designed to provide experienced and/or certified secondary school teachers with an opportunity to update and expand their knowledge of biology. Applicants must have three years' experience as biology teachers, be teaching high school at the time of application, or have a valid teaching certificate for secondary school science. An applicant's teaching experience will be considered as well as undergraduate academic performance. Courses are chosen from the participating biological science disciplines in consultation with the graduate student's adviser.

Persons interested in either of these programs should contact the chairperson, Graduate Advising Committee, for further information.

Botany and Plant Pathology (Bot)

Chairperson: A. Linn Bogle

PROFESSORS: Arthur C. Mathieson, Avery Rich, Richard W. Schreiber
ASSOCIATE PROFESSORS: Alan L. Baker, Robert O. Blanchard, A.

Linn Bogle, William E. MacHardy

ASSISTANT PROFESSORS: Garrett Crow, Leland S. Jahnke, Russell S. Kinerson, Jr., Subhash C. Minocha

ADJUNCT PROFESSORS: John M. Kingsbury, Alex L. Shigo

ADJUNCT ASSISTANT PROFESSOR: Walter C. Shortle

Students admitted to graduate study in botany and plant pathology are expected to have adequate preparation in basic botany courses and in the physical sciences. All applicants must submit scores on the aptitude and advanced portions of the graduate record examination.

The candidate for the Master of Science degree will meet the Graduate School's requirements for the degree and, in addition, will be required to defend a thesis based on field or laboratory research.

A student who is working toward the Doctor of Philosophy degree will be advanced to candidacy for the Ph.D. after a successful comprehensive examination and completion of the following language requirement: a reading knowledge of at least one foreign language. The guidance committee may request a reading knowledge of two foreign languages, or a reading knowledge of one foreign language and proficiency in a cognate field such as statistics or computer techniques. The student will be required to defend a dissertation that is to be a substantial contribution to botanical knowledge.

All botany and plant pathology graduate students without professional teaching experience will satisfy the following departmental teaching requirement: each student will assist a faculty member for one semester in teaching an introductory botany course; a Ph.D. candidate will assist for one additional semester in an advanced botany course. Each student will also register for one semester of Section I, Botanical Teaching, of either Bot 795-796 or Bot 895-896.

The department's areas for graduate study include: plant physiology, Mr. Jahnke, Mr. Minocha; plant ecology, Mr. Kinerson; systematic botany, Mr. Crow; phycology, marine-freshwater, Mr. Mathieson, Mr. Baker; plant pathology, Mr. Rich, Mr. Blanchard, Mr. MacHardy; plant morphology and anatomy, Mr. Bogle; mycology, Mr. Blanchard; cell biology, Mr. Schreiber; developmental botany, Mr. Minocha.

606. PLANT PHYSIOLOGY

Function in higher plants: water relations, metabolism, growth, and development. Prereq: elementary botany, survey of the plant kingdom, or concepts of plant growth; and one year of chemistry; /or permission. Mr. Minocha, Mr. Pollard. Lab. 4 cr.

717. GENERAL LIMNOLOGY

Special relationships of freshwater organisms to the chemical, physical, and biological aspects of their environment; factors regulating their distribution; and the primary and secondary productivity of lakes. Individual projects. Prereq: general ecology or equivalent. Mr. Baker, Mr. Haney. 4 cr.

719. FIELD LIMNOLOGY

Principles of freshwater ecology, from a variety of habitats; the methods used to study lakes and interpret data. Occasional Saturday field trips. Pre- or coreq: Bot 717; permission. Mr. Baker and Mr. Haney. Lab. 4 cr.

721. THE MICROSCOPIC ALGAE

Survey of phytoplankton and periphyton in local marine and freshwater habitats. Identification, systematics, and evolution. Class and individual collection trips. Prereq: elem bot or survey of the plant kingdom. Mr. Baker. Lab. 4 cr.

722. MARINE PHYCOLOGY

Identification, classification, ecology, and life histories of the major groups of marine algae, particularly the benthonic marine algae of New England. Periodic field trips. Prereq: elem bot or survey of the plant kingdom. Mr. Mathieson. Lab. 4 cr. (Alternate years; offered 1979-80.)

723. MARINE ALGAL ECOLOGY

Distribution, abundance, and growth of marine plants in relation to their environment. Scheduled field trips and an independent research project are required. Prereq: Bot 722, Zool 715; /or permission. Mr. Mathieson. Lab. 4 cr. (Alternate years; offered 1980-81.)

724. FRESHWATER ALGAL ECOLOGY

Survey of freshwater algal habitats; physiological explanation of advanced population models. Individual experimental projects. Prereq: Bot 717 or 721; or permission. Mr. Baker. 4 cr.

727. ALGAL PHYSIOLOGY

Survey of major topics in the physiology and biochemistry of marine and freshwater algae including: nutrition, metabolic pathways, reproductive physiology, storage and extracellular products, cell inclusion, growth and development. Prereq: plant physiology and introductory biochemistry or permission. Mr. Jahnke. 2 cr. (Alternate years; offered 1979-80.)

729. ALGAL PHYSIOLOGY LABORATORY

Useful laboratory techniques in studying the physiology of freshwater and marine algae. Experiments in nutrition, metabolism, pigment and enzyme analysis. Small research project required. Prereq: concurrent registration in Bot 727 and permission. Mr. Jahnke. 2 cr. (Alternate years: offered 1979-80.)

730. MORPHOGENESIS

Principles of differentiation; internal and external factors in cellular and organismic development. Prereq: Bot 606 or permission. Mr. Minocha. 4 cr. (Alternate years; offered 1979-80.)

732. CELL BIOLOGY

Structure, behavior, and development of cells; the cellular basis of heredity. Prereq: one year of biological science and chemistry. Mr. Schreiber. 4 cr.

741. ECOSYSTEM ANALYSIS

Ecosystem structure and function; energy flow and biochemical cycles. Computer simulations of natural ecosystems. Prereq: general ecology or permission. Mr. Kinerson. Lab. 4 cr.

742. PHYSIOLOGICAL ECOLOGY

Physiological responses of plants to the physical environment; photosynthesis, water relations, mass and energy flow. Prereq: Bot 606 or permission. Mr. Kinerson. Lab. 4 cr.

747. AQUATIC HIGHER PLANTS

Flowering plants and fern relatives found in and about bodies of water in the northeastern United States; extensive field and herbarium work, preparation techniques, and collections. Prereq: plant taxonomy. Mr. Crow. Lab. 4 cr. (Alternate years; offered 1980-81.)

751. PLANT PATHOLOGY

Nature, symptomatology, etiology, classification, and control of important plant diseases. Prereq: elem bot or equivalent. Mr. Rich. Lab. 4 cr.

752. MYCOLOGY

Parasitic and saprophytic fungi; growth, reproduction, and identification; preparation of pure cultures. Prereq: elem bot or equivalent. Mr. Blanchard. Lab. 4 cr. (Alternate years; offered 1980-81.)

753. FOREST PATHOLOGY

Principles, etiology, epidemiology, and control of forest and shade tree diseases. Prereq: elem bot or equivalent. Mr. Blanchard. Lab. 4 cr.

Botany and Plant Pathology

754. PRINCIPLES OF PLANT DISEASE CONTROL

Epidemiology of plant diseases and relationship to cultural practices; resistant varieties; biological control and chemical control. Crop loss assessment; disease forecasting and disease pest management. Lab. Prereq: Bot 751 or 753. Mr. MacHardy. 4 cr. (Alternate years; offered 1979-80.)

761. PLANT GEOGRAPHY

Distribution of plants, a consideration of vegetation types and floras, and problems of endemism with emphasis on North America; major influential factors such as geologic, climatic, edaphic, and biotic. Major contributions from Humboldt to the present time. Prereq: plant taxonomy or permission. Mr. Crow. 4 cr. (Alternate years; offered 1980-81.)

762. MORPHOLOGY OF THE VASCULAR PLANTS

Comparative form and structure of the major living and extinct groups; evolutionary modifications of the vegetative and reproductive organs, and the basic life history pattern. Prereq: survey of the plant kingdom. Mr. Bogle. Lab. 4 cr. (Alternate years; offered 1979-80.)

764. MICROTECHNIQUE

Methods of preserving cell and tissue structure, embedding, sectioning, and staining plant tissues, and an introduction to microscopy. Prereq: permission. Mr. Bogle. Lab. 4 cr. (Alternate years; offered 1980-81.)

795, 796. INVESTIGATIONS IN:

A) Systematic Botany; B) Plant Physiology; C) Plant Pathology; D) Plant Anatomy; E) Plant Ecology; F) Mycology; G) Cell Biology; H) Phycology; I) Botanical Teaching; J) Morphology; K) Cell Physiology; L) Scientific Writing. Individual projects under faculty guidance. Prereq: permission. 2-4 cr.

803, 804. TOPICS IN DEVELOPMENTAL PLANT PHYSIOLOGY

A) Fungal Physiology; B) Photosynthesis I; C) Photosynthesis II; D) Nitrogen Fixation; E) Morphogenesis; F) Reproductive Physiology of Plants; G) Photomorphogenesis; H) Plant Hormones; I) Water and Solute Translocation; J) Stress Physiology; K) Genetic Control of Plant Development; L) Regulation of Gene Expression; M) Metabolic Control Mechanisms in Plants. A series of 7-week, 2-credit, in-depth modules; 2 modules per semester (may vary); consult Time and Room schedule. Consult PISc or Bot departments for future semester offerings. Prereq: permission. PISc and Bot staff. 2-26 cr.

822. ADVANCED MARINE PHYCOLOGY

Classification, ecology, and life histories of marine algae considered at an advanced level. Seminars, discussion, assigned reading, and laboratory. Mr. Mathieson. Prereq: Bot 722 or equivalent. 4 cr.

843. THE PLANT AND THE MICROCLIMATE

Productivity, water-relations, plant distribution as dependent upon soil and atmospheric physics. Laboratories provide experience with instrument design, calibration, and use for measurement of plant-environment factors. Prereq: permission. Mr. Kinerson. 4 cr. (Alternate years; offered 1980-81.)

851. CELL CULTURE

Theory; principles fundamental to the culture of cells in vitro. Introduction to techniques of preparation and maintenance of animal, plant, insect, and fish cell cultures. Application of cell culture to contemporary research in biological sciences. Prereq: gen micr; permission. Mr. Strout and staff, Mr. Metcalf, and Mr. Minocha. Lab. (Also offered as Micr 851 and AnSc 851.) 4 cr.

852. METHODS IN MYCOLOGY

Laboratory procedures employed in various aspects of mycological research from selection of research problem to journal publication. Prereq: Bot 752 or permission. Mr. Blanchard. 4 cr. (Alternate years; offered 1979-80.)

853. ADVANCED PLANT PATHOLOGY

Advanced theories and methods in plant pathology; plant pathogenesis; host/pathogen interactions. Prereq: Bot 751 or 753; permission. Mr. MacHardy. 4 cr. (Alternate years; offered 1980-81.)

858. PLANT ANATOMY

Anatomy of vascular plants; structure and development of basic cell and tissue types and of major organs of woody plants. Term project and final report. Prereq: intro bot or survey of the plant kingdom; permission. Mr. Bogle. 4 cr. (Alternate years; offered 1980-81.)

867. ADVANCED SYSTEMATIC BOTANY

Principles and rules of plant classification and nomenclature; plant families; field and herbarium work. Prereq: plant taxonomy. Mr. Crow. 4 cr. (Alternate years; offered 1979-80.)

895-896. INVESTIGATIONS IN BOTANY

A) Systematic Botany; B) Plant Physiology; C) Plant Pathology; D) Plant Anatomy; E) Plant Ecology; F) Mycology; G) Cell Biology; H) Phycology; I) Botanical Teaching; J) Morphology; K) Cell Physiology; L) Scientific Writing. Individual projects under faculty guidance. Elective only by permission of the appropriate instructor. 2-6 cr.

899. MASTER OF SCIENCE THESIS

Six credits required. 6-10 cr.

999. DOCTORAL DISSERTATION

Business Administration (Admn)

Director of M.B.A. Programs: Allan R. Cohen

PROFESSORS: Robert F. Barlow, John A. Beckett, Jan E. Clee, Allan R. Cohen, Stephen L. Fink, Herman Gadon, Russell Haley, James O. Horrigan, Manley Irwin, John L. Korbel, Dwight R. Ladd, Charles B. Warden, Jr., Robin D. Willits, Dwayne E. Wrightsman.

ASSOCIATE PROFESSORS: John B. Burt, Jr., Dale G. Broderick, Fred R. Kaen, Richard L. Mills, Melvin Sandtor, Barry Shore, Linda G. Sprague, Allen B. Thompson, William E. Wetzel, Jr.

VISITING ASSOCIATE PROFESSOR: Roger Millen

ASSISTANT PROFESSORS: Marc Herold, Michael Jones, Michael Merenda, Steven L. Obert, Eric Orkin, Gordon D. Smith, Rita Weathersby.

INSTRUCTORS: Michael Kole, Starr Schlobohm

The Whittemore School offers a program leading to the M.B.A. in formats designed for day students and practicing executives. The program is designed to prepare graduates for professional careers in administration in both profit and not-for-profit organizations in a rapidly changing world. The M.B.A. program is directed toward a broad preparation in general administration through the study of: 1) the increasing body of relevant knowledge drawn from the behavioral sciences, mathematics, and economics; 2) the existing and emerging processes and institutions of the functional fields of administration; and 3) the role of business and other organizations in a complex and turbulent society.

There is a consistent emphasis on developing basic analytical skills rather than on developing extensive technical expertise. Also, the program fosters the ability to utilize conceptual and theoretical material in the analysis and solution of practical problems.

Candidates for admission must possess a bachelor's degree from an accredited college or university. In addition, all candidates are expected to take the Graduate Management Admission Test (GMAT) given by the Educational Testing Service. Details concerning the dates and locations for these examinations may be obtained from Educational Testing Service, Box 955, Princeton, New Jersey 08540.

The Whittemore School welcomes applicants with an above-average academic record in any undergraduate specialty other than business or commerce. No previous exposure to business courses is expected. However, previous work in mathematics, economics, the behavioral

sciences, and the branches of engineering is particularly useful for graduate study in administration. Because of the increasing use of mathematical concepts, models, and notation in the practice and study of administration, applicants should normally have successfully completed one year of college mathematics, preferably including an introduction to calculus. Students lacking this background may still enroll in the program provided they obtain adequate substitute preparation prior to beginning the program.

In all cases, the applicant's entire educational background, relevant experience, references, and professional aims will be considered in the admissions process. Exceptions may be made to any of the foregoing requirements by the committee on admissions.

The Whittemore School curriculum for day students consists of an integrated sequence of 18 courses requiring two years of study which can be started only in the fall semester. During the first year, 11 required courses or part courses in the basic disciplines (quantitative analysis, economics, and behavioral science) and the functional areas of management (accounting, marketing, operations management, and financial management) are integrated into an overall study of the process of administration. Special attention is also given to the study of the modern corporation as an economic, legal, and social organization by requiring all students to complete the course, The Organization and Its Environment.

The second year of the day curriculum continues the emphasis on overall management by requiring all students to complete the integrative course, Business Policy. In addition with the help of a faculty adviser, the student will select the equivalent of six four-credit elective courses with some concentration in an area of special interest. Students are encouraged to select appropriate graduate-level courses offered by other colleges of the University as well as by the Whittemore School, and to undertake field studies or internships.

The curriculum for practicing executives contains the same course requirements as the day M.B.A. program but is tailored to the content and scheduling needs of those working full-time at executive-level jobs. The executive program may be started only in the spring term and, because of the cumulative nature of the program, students should expect to stay on schedule with their class. The program is offered on-site in the Digital Equipment Corporation plant in Merrimack, N. H. Classes are scheduled on evenings and weekends.

702. APPLIED STATISTICS

Time series and cross-sectioned data; regression analysis; computerized statistical packages. Experimental design; surveys; contingency analysis. Prereq: Admn 801 or basic statistics; permission. 4 cr.

Business Administration

705. OPERATIONS RESEARCH

Synthesis and analysis of basic principles and methods of operations research applied to managerial decisions. Mathematical programming, networks, inventory, queuing, sequencing, scheduling, and Markovian models. Prereq: permission. 4 cr.

706. ADVANCED OPERATIONS RESEARCH

Analysis and synthesis of complex operations research models. Project is undertaken by all students. Advanced mathematical programming (nonlinear, parametric linear, stochastic, and dynamic), stochastic inventory models, advanced queuing models, and heuristic programs. Prereq: Admn 705 or permission. 4 cr.

708. MODELING AND SIMULATION

Modeling: formulation, data preparation, translation, validation, interpretation, and implementation. Discrete simulation models are developed and applied using a special purpose simulation language. Prereq: Admn 801 and 810 or basic probability and statistics; permission. 4 cr.

712. ORGANIZATIONAL CHANGE

Process of change in organizations. Change strategies; the change agent's role and relation to the client system. Bases of resistance to change and problems encountered by internal and external change agents. Theoretical reading material, cases, and exercises. Prereq: permission. 4 cr.

713. INTERPERSONAL AND GROUP DYNAMICS

Dynamics of small groups through the use of the class itself as an intensive laboratory study group. Students examine their own behavior and its effects on others through the use of the Laboratory Training Group (T-group) and develop conceptual ability and behavioral skills. Readings in group dynamics, interpersonal relations, and sensitivity training. Prereq: permission. 4 cr.

714. CONFLICT MANAGEMENT

Conflict among individuals, small groups, and organizations. Analysis of cases, readings, simulations, and roleplays (often using video tape) develops useful concepts and skills for dealing with conflict. Students examine their own behavior in coping with conflicts within the class. Field project required. Prereq: permission. 4 cr.

715. THEORY AND PRACTICE OF GROUP LEADERSHIP

Comparison of and practice in leading task- and process-oriented groups. Student teams design presentations on leadership topics, then study their own leadership-membership issues. Each student also participates in and leads a process-oriented group. Prereq: Admn 713 or equivalent; permission. 4 cr.

717. ADVANCED FINANCIAL ACCOUNTING

Theory and practice as they contribute to the significance and limitations of the financial statements. Prereq: permission. 4 cr.

718. COST AND MANAGEMENT

Effective use of cost accounting, cost analysis, and budgeting in planning and controlling operations. Analysis of cost behavior, direct and absorption costing, cost-price-volume relationships, distribution costs, transfer pricing, and capital budgeting analysis. Prereq: permission. 4 cr.

720. AUDITING

The attest function, and the responsibility and professional ethics of the independent auditor in our society. Audit concepts, procedures, objectives, and reports. Operational audits, social audits, and management services. Prereq: Admn 717 or permission. 4 cr.

722. TOPICS IN ACCOUNTING

Special topics. Prereq: Admn 717 or 718, depending on topics; permission. 4 cr.

723. TOPICS IN FINANCE

Prereq: Admn 653 or 806. 4 cr.

728. STATISTICAL DECISION MAKING

Probability and statistics applied to decision problems. Bayesian approach to decisions under uncertainty, which explicitly injects prior judgements of decision makers and the consequences of alternative actions. Prereq: Admn 801 or equivalent. 4 cr.

730. INVESTMENTS ANALYSIS

Capital market patterns and techniques useful for security analysis. Securities, market institutions, yield series, random walks, intrinsic-value analyses, and portfolio management. Security analysis research projects. Prereq: permission. 4 cr.

732. EXPLORATION IN ENTREPRENEURIAL MANAGEMENT

Examination of the management of change and innovation with particular attention to the role of the entrepreneur in the management of new ventures. Characteristic behavioral, organizational, financial, and marketing problems of entrepreneurs and new enterprises. Prereq: permission. 4 cr.

741. TRANSPORTATION

Problems of American transportation system. Economic structure of transportation industries; competition among the several modes. Public policy questions: merger, cost-benefit analysis of facilities, for example. Freight transportation; problems of passenger transportation, especially in urban areas. Prereq: permission. 4 cr.

742. MANAGEMENT INFORMATION SYSTEMS

Concepts, design, and implementation of systems to provide information and support for managerial decision making. Use of computers, models, and behavioral factors from the manager's perspective. 4 cr.

745. INTERNATIONAL BUSINESS

Issues and problems confronting managers in the international economy. Emphasis on problems of working across national borders rather than on those encountered within the framework of different national economies, cultures, and institutions. For managers working in a multinational enterprise. Prereq: permission. 4 cr.

747. FEDERAL TAXATION

Current federal income, estate, and gift taxes and their impact on corporations, partnerships, and individuals. Tax analysis and decision making. 4 cr.

750. MARKETING MANAGEMENT

Practical application of theories taught in marketing. Planning, organization, and control of marketing activities in large corporations and small businesses; new-product development; pricing policies; selection of channels of distribution; interrelationships between marketing, production, and finance. Sound policy formulation and decision making established through analysis of cases and computer simulation. Prereq: a basic marketing course. 4 cr.

751. ADVERTISING AND PROMOTION

Advertising, personal selling, and other promotional tools to help solve marketing problems; advertising as a medium of communication and as a social-cultural force in the Western world. Prereq: Admn 808 or permission. 4 cr.

752. MARKETING RESEARCH

Identification, collection, and analysis of data for the marketing process. Strengths, limitation, environment, and evaluation of research in the marketing process. Prereq: Admn 801; 808. 4 cr.

755. ADVANCED BUSINESS FINANCE

Development of analytical tools and practical skills for recognizing and solving complex problems of business finance. Working-capital management, capital budgeting, cost of capital, capital structure, and dividend policy. Prereq: Admn 806. 4 cr.

756. MANAGEMENT OF FINANCIAL INSTITUTIONS

How financial institutions manage their sources and uses of funds; impact of external environmental factors upon the operation and performance of financial institutions. Optimal portfolio strategies for commercial banks, savings and loan associations, mutual savings banks, insurance companies, and pension funds. Implications of monetary theory for individual financial institution policies; credit analysis; competition among financial institutions; regulation of financial institutions. Prereq: Admn 806. 4 cr.

761. SALES MANAGEMENT

Principles and methods of successful salesmanship and management of the sales function. Selling experiences in fields of student interest; case studies, sales presentations; oral and written analyses of sales management issues. Prereq: Admn 808. 4 cr.

762. MARKETING WORKSHOP

Integrative study of a real marketing situation in a business, non-profit institution, or government agency. Student teams identify problem, research or collect data, suggest alternate solutions, and submit a recommended course of action. Prereq: Admn 808; one additional advanced marketing course; permission. 4 cr.

770. PERSONNEL ADMINISTRATION

Role of personnel administration and human resource management in achieving goals in "for-profit" and "not-for-profit" organizations. Functions of management; scope, technique, and current issues of personnel administration; organization of personnel activities and staff. How managers relate to personnel administration and interact with personnel administration staff and services. Prereq: permission. 4 cr.

780. WOMEN IN MANAGEMENT

Issues faced by women managers in complex organizations; problems associated with role expectations of women as they move into managerial positions traditionally filled by men. Prereq: senior or graduate standing. 4 cr.

795. INTERNSHIP

On-the-job skill development through fieldwork in an organization (business, industry, health, public service, etc.). Normally, supervision provided by qualified individual in the organization, with frequent consultation by a faculty sponsor. Written report required. Internships may be part- or full-time, with course credits assigned accordingly. 1-16 cr.

Business Administration

798. TOPICS IN ADMINISTRATION

Special topics; may be repeated. Prereq: consent of adviser and instructor. 1-4 cr.

801. QUANTITATIVE METHODS

Basic mathematical and statistical concepts applied to managerial decision making. Probability, statistics, decision trees, and mathematical models. 4 cr.

803. HUMAN BEHAVIOR IN ORGANIZATIONS

Understanding of behavioral science concepts and their use in the analysis of individual, group, and leadership relationships in organizations; skills in dealing with others at work. 3 cr.

804. MANAGEMENT ORGANIZATION

Theories of organization and analysis of contemporary forms and structure. Concern is with development of rational management processes in a dynamic society. 2 cr.

806. FINANCIAL MANAGEMENT

Concepts and techniques for determining the need for, the acquisition of, and the management of, financial resources of the business. 3 cr.

808. MARKETING

Identification, development, and retention of markets for the goods and services offered by the firm. Attention is given to the dynamics of demand and to the blending of the marketing mix. 3 cr.

810. OPERATIONS MANAGEMENT

Analysis of operational problems in the product and service sectors, focusing on production system design and development; emphasis on standards, capacity, inventory, scheduling, and control. 3 cr.

811. THE ORGANIZATION AND ITS ENVIRONMENT

Study of the modern corporation as a partly economic, legal, and social organization, including examination of widely held views of business and views of managers about themselves. 3 cr.

815. FINANCIAL ACCOUNTING

Introduction to the accounting methods employed in organizations to determine and communicate their financial position to interested parties outside the organization. 3 cr.

816. BUDGETING AND CONTROL

Introduction to various models employed by organizations in the financial planning and control processes. 2 cr.

817. BUSINESS CONDITIONS AND ECONOMIC FORECASTING

Managerial effects of historical and forecasted movements in interest rates, national income, inflation, and unemployment. 3 cr.

818. MANAGERIAL ECONOMICS

An economics approach to the conceptualization, analysis, and management of revenues, costs, and profits. 3 cr.

820. BUSINESS POLICY

A "capstone" course, focused on industries, companies, and other organizations in operation, and studied through case examples, with emphasis on integration of materials covered in prior courses. 4 cr.

830. INVESTMENTS ANALYSIS

Capital market patterns and techniques useful for security analysis. Securities, market institutions, yield series, random walks, intrinsic-value analyses, analysis research projects. Prereq: permission. 4 cr.

848. LAW: USE AND APPLICATION IN BUSINESS

Use and understanding of law as it applies to business judgement and policy decision making; basic legal rules and their application. Contracts, corporations, agencies, partnerships, administrative agencies, commissions, and other related business matters. Case-method teaching with outside research. 4 cr.

851. GOVERNMENT REGULATION OF BUSINESS

Government policy as it affects managerial decision making. Conspiracy, monopoly, mergers, unfair practices, discrimination, and recent social legislation. 4 cr.

855. ADVANCED BUSINESS FINANCE

Analytical tools and practical skills for recognizing and solving complex problems of business finance. Working-capital management; capital budgeting; cost of capital; capital structure; dividend policy. Prereq: Admn 806. 4 cr.

861. THE PHILOSOPHY OF MANAGEMENT SCIENCE

Study of management from a systems-analysis point of view. 4 cr.

895. SPECIAL PROJECTS AND INDEPENDENT STUDY

Projects, research, and reading programs in areas required for concentration. Sixty days' advance approval of the student's plan of study by adviser and by proposed instructor required. Variable cr. (May be repeated.)

Chemical Engineering (Ch E)

Chairperson: Stephen S.T. Fan

PROFESSOR: Stephen S.T. Fan

ASSOCIATE PROFESSOR: Virendra K. Mathur, Gail D. Ulrich

ASSISTANT PROFESSORS: Ihab H. Farag, Donald C. Sundberg

To be admitted to graduate study in chemical engineering, an applicant is expected to have completed a course of study substantially equivalent to that required for the degree of Bachelor of Science in Chemical Engineering in this University. However, students with good undergraduate records but with deficiencies in certain areas may be admitted on condition that they complete specified courses without credit to make up for their deficiencies.

A minimum of 30 credits, which must include Ch E 813, 815, 816, 823, and 832, is required for the Master of Science in Chemical Engineering degree. The core-courses requirement can be waived only in special cases with permission from the department faculty. A candidate for the Master of Science degree must prepare a thesis, for which up to six credits will be allowed, unless the candidate is specifically exempted by the faculty because of previous research experience.

For students who are interested in graduate studies beyond the Master of Science degree, an interdepartmental Engineering Doctor of Philosophy program is available which includes the following areas of specialization: engineering system design, signal processing, theoretical and applied mechanics, and transport phenomena. For details refer to the section entitled Engineering Ph.D. Program.

Courses numbered between 600 and 699 may be taken for graduate credit by nonmajors only.

Permission of the instructor and consent of the student's adviser are required for enrollment in all chemical engineering courses.

701. HIGH POLYMERS

Principles and practice of industrial methods of polymerization and processing. Physical and chemical testing of various polymers. Lab. 4 cr.

705. NATURAL AND SYNTHETIC FOSSIL FUELS

Study of U.S. and foreign reserves of coal, oil, and natural gas. Petroleum processing and refining. Coal, oil shale, and tar sand. Gasification and liquefaction of coal. Lab. 4 cr.

712. INTRODUCTION TO NUCLEAR ENGINEERING

Development of nuclear reactors; basic binding-energy physics; radioactivity; elements of nuclear reactor theory; engineering problems of heat transfer, fluid flow, materials selection, and shielding; environmental impacts. 4 cr.

751. PROCESS SIMULATION AND OPTIMIZATION

Techniques for computer-aided analysis of chemical processing systems. Development of mathematical models to describe process behavior. Application of optimization techniques. Prereq: a knowledge of FORTRAN programming. Lab. 4 cr.

752. PROCESS DYNAMICS AND CONTROL

Dynamic behavior of chemical engineering processes described by differential equations; feedback control concepts and techniques; stability and analysis. Lab. 4 cr.

772. PHYSICOCHEMICAL PROCESSES FOR WATER AND AIR QUALITY CONTROL

Origin and characterization of pollutants. Controls, including filtration, sedimentation, coagulation and flocculation, absorption and adsorption. Applied fluid mechanics, mass transfer, and kinetics. Thermal pollution, chemical treatment, oil spills on water, and aeration. Lab. 4 cr.

804. RADIATIVE HEAT TRANSFER

Heat transmission in high temperature operations and interaction of radiative and other transport mechanisms; radiation geometry; application of matrix algebra to radiative transfer in enclosures; zoning methods of temperature measurements. Analytical and empirical approximations of engineering use. Quantitative design of several furnaces and high-temperature systems. 3 cr.

813. ADVANCED FLUID MECHANICS

Basic equations describing behavior of static and dynamic fluid systems. The equations of motions and application to laminar and turbulent flow. Momentum and energy equations for advanced problems associated with flow inside conduits. Flow of compressible fluids and boundary layer phenomena. 3 cr.

815. HEAT TRANSFER

Steady-state and transient heat conduction in solids; heat convection; analytic solutions, similarity relations, boundary layer methods; radiation. 3 cr.

816. DIFFUSIVE MASS TRANSFER

Physical aspects of diffusion; theories of diffusion in dilute gases, dense gases, liquids, and solids; surface diffusion; mixing processes. Simultaneous heat and mass transfer. 3 cr.

823. ADVANCED CHEMICAL ENGINEERING THERMODYNAMICS

The multicomponent open system; the volumetric and phase behavior of pure substances and of multi-component systems at physical and chemical equilibrium; fugacity and activity; thermal properties of equilibrium, chemically reacting systems; introduction to statistical thermodynamics. 3 cr.

Chemistry

832. ADVANCED CHEMICAL ENGINEERING KINETICS

Specialized applied kinetics problems; catalysis; fast reaction and shock tubes; combustion and detonation processes; nonisothermal kinetics; heat and mass transfer in nonequilibrium, chemically reacting systems. 3 cr.

852. ADVANCED PROCESS DYNAMICS

Process dynamics for higher order processes and nonlinear processes. Modeling of complex process by differential equations, linearizing nonlinear elements, and adequately controlling the entire system. 3 cr. (Not offered every year.)

890. LITERATURE REPORT

Instruction in the use of the library for chemical engineering research, culminating in the preparation of a literature report on a topic of mutual interest to the student and the chemical engineering faculty. 1 cr.

895, 896. GRADUATE INDEPENDENT STUDY

Directed reading or investigation at the advanced level on topics in chemical engineering. 2-4 cr.

897, 898. GRADUATE SEMINAR

Discussion on topics of interest to graduate students and staff; reports of research progress; invited lectures by outside speakers. 0 cr.

899. MASTER'S THESIS

Original investigations in chemical engineering. 1-6 cr.

Chemistry (Chem)

Chairperson: C.L. Grant

PROFESSORS: Alexander R. Amell, Kenneth K. Andersen, Clarence L. Grant, Paul R. Jones, James D. Morrison, Charles W. Owens, Frank L. Pilar, Albert K. Sawyer, J. John Uebel, James H. Weber, Charles M. Wheeler, Jr.

ASSOCIATE PROFESSORS: N. Dennis Chasteen, Colin D. Hubbard
ASSISTANT PROFESSORS: W. Rudolf Seitz, Gary R. Weisman, Edward H. Wong

GRADUATE COORDINATOR: Frank L. Pilar

The Department of Chemistry offers programs leading to three graduate degrees: Doctor of Philosophy, Master of Science, and Master of Science for Teachers. Entering graduate students (except for those desiring the M.S.T. degree) are expected to take proficiency exam-

inations in chemistry to assist in starting each new student's graduate work at the proper level. These examinations will be offered at the beginning of the semester in September and in February.

The faculty of the chemistry department feels that the experience of teaching is a valuable part of the training of the graduate student. Therefore, all graduate students who are Doctor of Philosophy or Master of Science candidates will obtain some teaching experience during their tenure.

Doctor of Philosophy Degree

Admission to this program is based upon superior work in the usual undergraduate courses in inorganic chemistry, analytical chemistry, organic chemistry, and physical chemistry, as well as the normal supporting courses in mathematics and physics. This degree requires the completion of a research problem presented in the form of a thesis.

The Ph.D. candidate will be expected to demonstrate proficiency in reading chemical literature in German and French or Russian. He/she will also demonstrate to the doctoral committee that he/she has a broad basic knowledge of the field of chemistry: 1) by completing certain fundamental graduate courses; and 2) by means of a series of examinations in the major field. The principal emphasis of the last two years will be on the research project that will constitute the dissertation. During this time the doctoral candidate will present and defend an original research proposal before the doctoral committee.

Master of Science Degree

Admission to this program is based upon a superior undergraduate average and requires satisfactory work in the usual undergraduate courses in inorganic chemistry, analytical chemistry, organic chemistry, and physical chemistry, as well as the normal supporting courses in mathematics and physics. This degree requires the completion of a research problem presented in the form of a thesis.

Master of Science for Teachers Degree

This program is offered for candidates who hold a secondary-school teacher certification in chemistry. This degree requires 30 semester hours in courses approved by the graduate coordinator. Persons interested in this degree should confer with the graduate coordinator.

Interdisciplinary Programs in Chemistry

Graduate students in chemistry may elect to enter one of the interdisciplinary programs offered jointly with the chemistry department and other departments. In these programs, the graduate student, with the advice of the guidance committee, elects courses in chemistry and

in the related disciplines, and writes the dissertation on a research problem appropriate to interdisciplinary treatment. Students interested in these programs should write to the chairperson of the department for further information.

Analytical Chemistry

762. INSTRUMENTAL METHODS OF CHEMICAL ANALYSIS

Theory, instrumentation, and application of methods such as atomic absorption, conductimetry, coulometry, emission spectrography, gas chromatography, polarography, potentiometry, and spectrophotometry to chemical analysis. Prereq: quantitative analysis; Chem 684 pre- or corequisite; /or permission. Coreq: Chem 763. 3 cr.

763. INSTRUMENTAL METHODS OF CHEMICAL ANALYSIS LABORATORY

Experimental parameters, error analysis, and applications of the methods covered in Chem 762. Coreq: Chem 762. 2 cr.

830. ADVANCED OPTICAL METHODS

Techniques of chemical identification and analysis utilizing optical instrumentation from the standpoint of both theory and application. Topics include NMR, ESR, x-ray fluorescence, mass spectrometry, electron beam microprobe. 3 cr. (Not offered every year.)

831. ADVANCED ELECTRICAL METHODS

Introductory electronics for chemists; theory and applications of important electrochemical techniques such as polarography and cyclic voltammetry. 3 cr. (Not offered every year.)

833. CHEMICAL SEPARATIONS

The use of various separation techniques prior to analysis; separations as a method of analysis. 3 cr. (Not offered every year.)

Inorganic Chemistry

774. INORGANIC CHEMISTRY

Basic theoretical concepts and their applications to inorganic reactions and compounds. Prereq: Chem 683; Chem 684 pre- or corequisite; /or permission. 3 cr.

775. INORGANIC CHEMISTRY LABORATORY

Synthesis and characterization of inorganic compounds with an emphasis on techniques not taught in other laboratory courses. 2 cr.

803. ADVANCED INORGANIC CHEMISTRY I

Survey of some concepts of modern inorganic chemistry, serving as general background material for all graduate students and as basic fundamentals for further courses in inorganic chemistry: periodicity, stereochemistry and bonding in inorganic compounds, the crystalline state, reactions in solution, energetics, and elementary coordination chemistry. 4 cr.

804. ADVANCED INORGANIC CHEMISTRY II

Specialized topics for the advanced student. Topics may include advanced discussions of topics in Chem 803, inorganic reaction mechanisms, nonaqueous solvent systems, fluorine chemistry, bioinorganic chemistry, solid state chemistry. 3 cr.

847. ADVANCED INORGANIC CHEMISTRY III

Modern theory applied to spectra, magnetism, kinetics, and thermodynamics of coordination compounds. The formation of and reactions of coordination compounds including catalytic reactions. Prereq: Chem 803 or permission. 3 cr. (Not offered every year.)

848. ADVANCED INORGANIC CHEMISTRY IV

The theory and practice of x-ray diffraction and the determination of crystal structure. Prereq: Chem 803 or permission. 3 cr. (Not offered every year.)

Organic Chemistry

651-652. ORGANIC CHEMISTRY

Principal classes of organic compounds, aliphatic and aromatic, class reactions and structural theory. Intended primarily for prehealing arts, biological science, and health science students. Prereq: introductory chemistry or permission. (653-654 must be taken concurrently.) 3 cr.

653-654. ORGANIC CHEMISTRY LABORATORY

(Must be taken concurrently with 651-652.) 2 cr.

755. ADVANCED ORGANIC CHEMISTRY

Methods of synthesis and determination of structure, including stereochemistry of complex organic compounds. Prereq: organic chemistry or permission. 3 cr.

756. ADVANCED ORGANIC CHEMISTRY LABORATORY

Synthesis and structural determination of complex organic compounds, techniques for the separation, determination of purity, and identification of compounds by spectroscopic and chemical means. 2 cr.

Chemistry

801. THEORETICAL ORGANIC CHEMISTRY I

Discussion of theoretical and experimental methods used in study or reaction mechanisms and molecular stereochemistry. 4 cr.

802. THEORETICAL ORGANIC CHEMISTRY II

A continuation of Chem 801. 3 cr.

811. SYNTHETIC ORGANIC CHEMISTRY I

Advanced synthetic methods for preparing organic molecules. Prereq: permission. 3 cr.

812. SYNTHETIC ORGANIC CHEMISTRY II

A continuation of Chem 811. Prereq: permission. 3 cr.

817, 818. SPECIAL TOPICS IN ORGANIC CHEMISTRY

Specialized courses for the advanced student. Topics may include reaction mechanisms, stereochemistry, spectroscopy, molecular biochemistry, steroids, and organic sulfur compounds. 2 or 3 cr.

Physical Chemistry

663. INTRODUCTORY RADIOCHEMICAL TECHNIQUES

Techniques and laboratory practice in the use of apparatus in many fields of science employing radiochemical operations. Prereq: general inorganic chemistry and general physics. Lab. 4 cr. (Not offered every year.)

683-684. PHYSICAL CHEMISTRY I, II

The properties of gases, liquids, and solids; thermochemistry and thermodynamics; solutions, chemical equilibria, reaction rates, conductance, and electromotive force. Prereq: Calculus II and physics. 3 cr.

685-686. PHYSICAL CHEMISTRY LABORATORY

Measurement of thermodynamic properties, chemical kinetics, and methods of determining the structure of matter. Prereq: Calculus II and physics. 2 cr.

776. PHYSICAL CHEMISTRY III

Quantum theory; spectroscopy; chemical bonding; statistical thermodynamics. Prereq: Chem 683-684. Lab. 4 cr.

778. CHEMISTRY OF LARGE MOLECULES

Basic chemistry of high-molecular-weight compounds, including synthetic polymers and substances occurring in living systems. Elementary aspects of the structures, syntheses, and properties of large molecules, and their roles in modern science, technology, and living systems. Prereq: one semester of organic chemistry. 4 cr.

805. ADVANCED PHYSICAL CHEMISTRY I

An introduction to topics in quantum mechanics, group theory, and statistical thermodynamics which form the background of all areas of modern chemistry. 4 cr.

806. ADVANCED PHYSICAL CHEMISTRY II

Wave mechanics and quantum chemistry, spectroscopy, molecular structure; statistical thermodynamics, kinetics, and mechanism. Prereq: one year of physical chemistry. 3 cr.

821. PHYSICAL CHEMISTRY—CHEMICAL KINETICS

The kinetics of homogeneous and heterogeneous reactions in gaseous and liquid systems, including an introduction to very rapid reactions. Prereq: one year of physical chemistry. 3 cr.

822. PHYSICAL CHEMISTRY—CHEMICAL THERMODYNAMICS

The foundations and interrelationships of the theory of thermodynamics. The methods by which the theoretical principles may be applied to practical problems. 3 cr.

826. NUCLEAR AND RADIOCHEMISTRY

Nuclear structure and reactions, particle accelerators, radioactive decay, detection of particles, and the interaction of particles with matter. Application of radiochemistry to chemical systems and research. 3 cr.

827, 828. THEORETICAL CHEMISTRY I, II

The modern concepts and mathematical formalism of quantum mechanics and applications to electronic structures of atoms and molecules, spectroscopy, and the solid state. 3 cr.

829. THEORETICAL CHEMISTRY III

Statistical mechanics with applications to thermodynamics of nonideal systems, intermolecular forces, and chemical kinetics. Prereq: permission. 3 cr.

General Offerings

Courses in which all areas of specialization participate.

708. RESEARCH TECHNIQUES

Lectures and laboratory to show experimental methods and interpretation of results. Topics include chromatography, data handling, nuclear magnetic resonance, mass spectrometry, elementary electronics, infrared and ultraviolet spectroscopy, experimental design, and x-ray. 1-3 cr.

807. INTRODUCTION TO RESEARCH

A course to introduce the Doctor of Philosophy student to the planning, experimental methods, and interpretation of a research problem. Student presents and defends an original research proposal before a faculty committee. Must be completed satisfactorily by all doctoral students. Cannot be used for credit by Master of Science candidates. 2 cr.

895, 896. COLLOQUIUM IN CHEMISTRY

A) Inorganic Chemistry; B) Organic Chemistry; C) Theoretical Organic Chemistry; D) Physical Chemistry; E) Analytical Chemistry. 1-4 cr. Sections of the course may be taken to a total of 12 cr.

897, 898. SEMINAR

Presentation and discussion of recent investigations in chemistry. 1 cr.

899. THESIS—PROBLEMS IN CHEMISTRY

Conferences, library, and experimental work in some field of chemistry. Credit to be arranged.

999. DOCTORAL RESEARCH**Civil Engineering (Ci E)**

Chairperson: Paul L. Bishop

PROFESSOR: Tung-Ming Wang

ASSOCIATE PROFESSORS: Paul L. Bishop, Louis H. Klotz, Paul J. Ossenbruggen

ASSISTANT PROFESSORS: Yen-hsi Chu, Pedro A. De Alba, David L. Gress, Dennis J. O'Brien, John A. Olofsson, Jr.

ADJUNCT ASSOCIATE PROFESSOR: Gerald H. Batchelder

ADJUNCT ASSISTANT PROFESSOR: Robert G. Moynihan

GRADUATE COORDINATOR: Tung-Ming Wang

The Department of Civil Engineering offers the master's degree in civil engineering with the following areas of specialization: Environmental Engineering, Ocean and Coastal Engineering, Soils and Materials Engineering, and Structural Engineering.

A degree candidate must have completed a baccalaureate degree in engineering, mathematics, or science at an accredited college or university. If undergraduate training is deficient, the candidate will be required to successfully complete undergraduate courses without graduate credit in order to present proper prerequisites for graduate courses. In addition, other undergraduate courses may be required by

the student's adviser in order to achieve a well-integrated program of study.

On entering the graduate program each student will be assigned an academic adviser whose responsibility it is to guide the academic progress of the student. The adviser will assist the student in the development of a program of study and in the selection of an academic advisory committee, usually before the end of the first semester of enrollment. The advisory committee will normally be composed of at least two civil engineering faculty members and one additional faculty member selected from another department within the University. The academic advisory committee provides guidance to the student in course selection, thesis research, and project papers, and will serve to evaluate the student's overall progress.

Candidates for the master's degree may elect a thesis or nonthesis option. The thesis option requires a minimum of 24 credits of graduate level courses (exclusive of Ci E 800), plus a master's thesis (Ci E 899) for which a minimum of six graduate credits is awarded. Candidates electing the thesis option are required to pass a final oral examination consisting of a formal presentation and defense of the thesis including an examination of related fundamental engineering concepts. Bound copies of the thesis are required to be presented to the department and the candidate's adviser. The thesis shall be prepared according to requirements outlined in the University publication, "Manual for the Preparation of Theses."

The nonthesis option requires a minimum of 30 credits of graduate-level course work (exclusive of Ci E 800), of which 6 credits will normally be in an approved minor area. Candidates electing the nonthesis option are required to prepare in addition to formal course work a project paper, which shall include a final oral presentation, defense, and examination of related fundamental engineering concepts. Guidelines for the preparation of the project paper are available from the department.

The final presentation, defense, and examination related to project papers and theses shall be conducted by an examination committee appointed by the dean of the graduate school from nominations by the department chairperson. The examination committee is usually composed of those individuals who have served on the candidate's academic advisory committee.

A minimum grade point average of 3.0 must be achieved for graduation. All graduate students are required to register for Civil Engineering Seminar (Ci E 800) for a minimum of two semesters.

Areas of Interest

The faculty of the civil engineering department have research interests in the following areas. Students in the M.S. in civil engineering or the Engineering Ph.D. program may select courses and research topics in these areas.

Civil Engineering

Environmental Engineering: Areas of interest include water and wastewater treatment; treatment of industrial wastes such as those from tanneries, paper mills, metal finishers, and lithographers; formation and control of trihalomethanes in drinking water; dynamic control of the coagulation process in water treatment; and kinetics of algal growth and nutrient uptake.

Ocean and Coastal Engineering: Areas of research include the design and analysis of offshore structures, soil-foundation interaction of offshore structures, estuarine circulation, sediment transport processes, and dynamic responses of coastal and ocean structures.

Soils and Materials Engineering: Topics of interest include fabric identification in sands by acoustic methods, instability of offshore slopes, influence of pore size and pore-size distribution on frost heaving of granular materials, influence of aggregate gradation on controlling the water cement ratio of portland cement concrete while maintaining workability, and internally sealed concrete.

Structural Engineering: Research topics include coupled, twisting-bending vibrations of continuous curved beams; effects of rotary inertia and shear on multispans curved frames; vibrations of cable-stayed structures; computer-aided structural planning and design of buildings; soil-structure interactions; and design investigations for the reconstruction of small/low-head, hydro-power facilities.

701. ADVANCED SURVEYING

Instrumental and analytical photogrammetry. Conformal mapping and its application to the state plane coordinate systems. Geodetic surveying. Error theory and its application to the planning and adjustment of surveys. Application of electronic computers to surveying calculations. Prereq: surveying. Lab. 4 cr.

711. COMMUNITY PLANNING

Student project course focusing on real community problems. Issues investigated include population growth, community needs, economic and legal problems. Land-use models, survey techniques, and economic evaluation methods. Prereq: permission. A year-long course; 2 credits each semester. "IA" grade (continuous course) will be given at the end of the first semester. 4 cr.

714. CONTRACTS, SPECIFICATIONS, AND PROFESSIONAL RELATIONS

Essential elements and legal requirements of engineering contracts; purposes and content of specifications; professional conduct, relations, registration, and ethics. Construction planning and management; cost analysis based on quantity surveys and unit-cost methods. Prereq: permission. 3 cr.

721. PAVEMENT DESIGN

Flexible and rigid pavements and bases for highways, airports, and city streets; pavement selection, construction methods, materials, specifications, and engineering cost estimates. Prereq: soil mechanics. 3 cr.

722. PROPERTIES AND PRODUCTION OF CONCRETE

Basic properties of hydraulic cements and mineral aggregates and their interactions in the properties of plastic and hardened concrete; modifications through admixtures; production handling and placement problems; specifications; quality control and acceptance testing; lightweight, heavyweight, and other special concretes. Prereq: engineering materials or permission. 3 cr.

723. BITUMINOUS MATERIALS AND MIXTURES

Considerations of major types of bituminous materials, asphalt cements, cutback asphalts, asphalt emulsions, and tars; influence of chemical composition on physical properties; desirable aggregate characteristics for bituminous mixtures; construction techniques; current practices for determining optimum asphalt contents. Prereq: engineering materials or permission. 3 cr.

731. NETWORK PLANNING AND SCHEDULING

Application of critical path methods (CPM) and project evaluation review technique (PERT) to the design and control of engineering projects. Lab. 2 cr.

740. RURAL WASTEWATER ENGINEERING

Methods for collecting and treating wastewater in small communities and rural areas. Biological and physicochemical treatment systems for small communities; land application; soil absorption; gray water treatment; and septage treatment. Prereq: intro environ pollution cont. 3 cr.

741. OPEN CHANNEL FLOW

Energy and momentum principles in open channel flow; flow resistance; channel controls and transitions; unsteady open channel flows; convective and dispersive transportation of pollutants; and basic modeling techniques. Prereq: fluid mechanics. 3 cr.

743. ENVIRONMENTAL SAMPLING AND ANALYSIS

Laboratory exercises in the techniques of water, wastewater, and solid-waste sampling and analysis. Interpretation of results from pollution surveys and operation of pollution control facilities; statistics of sampling and statistical evaluation of analytical data. Prereq: gen chem. Lab. 2 cr.

744. ENVIRONMENTAL LIMNOLOGY

Biological, chemical, and physical processes that occur in lakes and impoundments are explored and interpreted with respect to the cultural activities of man. Basic concepts of lake origin, morphometric and trophic status, water movement and stratification, nutrient cycling, etc. Current limnologically related problems are explored from the environmental engineering standpoint. Term projects involving laboratory field work and readings in the current scientific literature are required. Prereq: permission. Lab. 4 cr.

745. HYDROLOGY AND HYDRAULICS

Occurrence and physical effects of water on the earth; meteorology, groundwater runoff and stream-flow routing, open-channel flow, reservoirs, control works, hydroelectric power, irrigation, drainage, and multipurpose projects. Prereq: fluid mechanics. 3 cr.

746. WASTEWATER TREATMENT PLANT DESIGN

Choice of treatment units. Design of the components; preparation of a plan for a particular city that includes a suitable combination of the units previously designed. Prereq: water and wastewater engineering. 3 cr.

748. SOLID WASTE DISPOSAL

Basic concepts and theory of collection and disposal systems. Design methods involved in disposal systems. Prereq: intro to environ pollution control or permission. 3 cr.

749. CHEMISTRY OF NATURAL WATERS

Chemical equilibrium concepts applied to natural waters. Buffer systems; carbonate equilibria, acid-base equilibria. Chemical principles of water and wastewater treatment. Equilibrium modeling of natural waters and treatment processes. Water softening, phosphate removal, chemical precipitation. Prereq: gen chem. 3 cr.

751. TRANSPORTATION PLANNING

Transportation demand forecasting techniques applied to regional and urban situations. Calibration and use of mathematical models for forecasting land use, trip generation, trip distribution, modal choice, and trip assignment. Prereq: probability and/or statistics. 3 cr.

752. TRAFFIC ENGINEERING

Statistical and probabilistic methods to analyze and design roadway facilities. Level of service and capacity analysis of roadways under uninterrupted and interrupted flow conditions. Queuing theory and simulation models, design of traffic facilities. Prereq: applied probability and statistics. 3 cr.

757. COASTAL ENGINEERING AND PROCESSES

Introduction to small amplitude and finite amplitude wave theories. Wave forecasting by significant wave method and wave spectrum method. Coastal processes and shoreline protection. Wave forces and wave structure interaction. Introduction to mathematical and physical modeling. Prereq: fluid mechanics or permission. 3 cr.

763. ADVANCED SOIL MECHANICS I

Current methods of determining soil strength and compressibility. Application to earth pressure, bearing capacity, slope stability, and settlement problems. Prereq: soil mech. 4 cr.

765. FOUNDATION ENGINEERING

Subsurface investigation, excavation problems. Selection of foundation type. Design of footings, rafts, pile foundations, bulkhead walls. Prereq: Ci E 763; structural design concepts. 4 cr.

768. SEEPAGE THROUGH EARTH STRUCTURES

Groundwater flow, Darcy's Law, flow nets, Dupuit's theory and application, conformal mapping techniques, confined flow, flow through earth and rock structures, seepage toward wells. Prereq: fluid mechanics; soil mechanics. 2 cr.

782. TIMBER DESIGN

Properties and characteristics of structural woods, mechanics of wood, connection methods, design of timber members, and connections in beams, columns, and trusses, and glued laminates of wood. Prereq: structural design concepts; permission. 2 cr.

784. STRUCTURAL ANALYSIS BY MATRIX AND NUMERICAL METHODS

Unifying concept of basic structural analysis theories; matrix and numerical methods of analysis, and their application by linear graph concepts using computers. Prereq: indeterminate structures. 4 cr.

785. INTRODUCTION TO STRUCTURAL DYNAMICS

Dynamic analysis of single- and multi-degree-of-freedom systems. Simple beam and frame structures. Earthquake analysis and design. Co- or prereq: indeterminate structures. 3 cr.

790. INELASTIC STRUCTURAL DESIGN

Continuation of modern design theory; ultimate design of reinforced concrete; plastic analysis of steel structures. 4 cr.

793. STRUCTURAL DESIGN IN STEEL

The design of members and connections: tension and compression members, beams, plate girders; riveted, bolted, and welded joints. Introduction to plastic design of beams and frames. Prereq: structural design concepts or permission. 4 cr.

Civil Engineering

794. REINFORCED CONCRETE DESIGN

The design of reinforced concrete members by Strength Design Theory including beams, columns, beam-columns, and slabs for strength and deformations. Prereq: structural design concepts or permission. 4 cr.

795, 796. INDEPENDENT STUDY

A limited number of qualified senior and graduate students will be permitted to pursue independent studies under faculty guidance. Seniors may write terminal theses reporting the results of their investigations. 1-4 cr.

800. CIVIL ENGINEERING SEMINAR

Topics of interest to graduate students and staff; reports of research ideas, progress, and results; invited lectures by outside speakers. 0 cr.

822. HIGHWAY AND AIRPORT ENGINEERING

Design of flexible and rigid pavements and bases for highways, airports, and city streets, pavement selection, construction methods, materials, specifications, and engineering cost estimates. Prereq: Ci E 721. 2-4 cr.

855. MICROBIOLOGY OF WASTEWATER TREATMENT

Detailed study of the microbiological aspects of wastewater treatment and the techniques used in the biological testing of water and wastewater. Prereq: water and wastewater engineering; gen micro; /or permission. Lab. 4 cr.

856. INDUSTRIAL WASTEWATER TREATMENT

Detailed consideration of the origin, characteristics, and treatment of industrial wastewater; the theory and application of unit operations unique to the treatment and disposal of industrial wastes. Prereq: Water and Wastewater Engineering. 4 cr.

857. ADVANCED WASTEWATER TREATMENT

Theory, application, and evaluation of new processes and developing techniques in water and wastewater reclamation and reuse. Prereq: Ci E 746. 4 cr.

858. ADVANCED WASTEWATER SYSTEMS DESIGN

A formal design to solve a practical problem in wastewater treatment; field data will be gathered, a laboratory-scale unit run, and a design submitted based upon the experimental finding. Prereq: Ci E 746; Ci E 856. Lab. 4 cr.

864. ADVANCED SOIL MECHANICS II

The physical and mechanical properties of soil in relation to engineering structures. The theory of consolidation, shearing resis-

tance, bearing capacity, settlement, slope stability, earth pressure, and seepage studies. Prereq: permission. 4 cr.

865. SOILS ENGINEERING

Application of soil mechanics principles to the selection of the type of substructure and the development of its bearing capacity, based on the theories of stability analysis and consolidation. Earth-pressure load determinations by various active and passive earth-pressure theories. Earth dam and foundation construction methods. Prereq: Ci E 763 or equivalent. 4 cr.

866. SOIL TESTING FOR ENGINEERING PURPOSES

The essential tests for the physical properties: permeability, capillarity, compressibility, rate and magnitude of consolidation, and shearing resistance. Prereq: Ci E 763 or equivalent. 2-4 cr.

867. SOIL DYNAMICS

Vibrations of elementary systems, wave propagation, elastic waves in layered systems, behavior of dynamically loaded soils, vibrations of foundations, isolation of footings, field measurements and instrumentation, design procedures for dynamically loaded foundations. Prereq: Ci E 765; Ci E 763. 2 cr.

881. ADVANCED STRUCTURAL ANALYSIS I

Advanced structural theory and analysis, including multistory structures, beam columns, frames with variable moment of inertia, continuous trusses and bents, arches and curved frames, stiff rings, and closed frames. 4 cr.

882. ADVANCED STRUCTURAL ANALYSIS II

Advanced treatment, including flexible and axially loaded flexural members, beams with variable cross-section subject to axial loads, suspension bridges and flexible arches, and torsional problems of noncircular sections. 4 cr.

883. STRUCTURAL STABILITY

Study of the elastic and inelastic buckling behavior of structures. Topics include: stability of columns, mathematical treatment of buckling problems and buckling criteria, lateral stability of beams, buckling of trusses and framed structures, and stability of rings and curved beams. 4 cr.

884. DYNAMICS OF STRUCTURES

Analysis of structures subjected to dynamic loadings. Free and forced vibrations with one- and multi-degrees of freedom. Vibrations of curved beams, multistory frames, and plate structures. Prereq: Ci E 785 or permission. 4 cr.

885. APPLICATION OF SYSTEM THEORY TO STRUCTURAL ANALYSIS

Comprehensive development of the stiffness matrix of structures. Intuitive concepts of topology and linear graphs and their application to structural frameworks. Analysis of structures using linear graphs. 4 cr.

886. FACILITY PROJECT ENGINEERING

A critical review of the approaches to the planning and decision processes of facilities, including codes and specifications, concepts of engineering economy, index numbers and cost estimation procedures (including an introduction to their statistical basis), mathematical modeling concepts, and the development of design loads and criteria for specific application. 4 cr.

887. APPLICATION OF LINEAR GRAPHS TO CIVIL ENGINEERING

Concepts of topology and linear graphs and their application to civil engineering planning of transportation, water and sewage distribution, and other networks. Network planning and management systems, including Project Evaluation Review Technique (PERT), Critical Path Methods (CPM), and PERT/cost procedures. 4 cr.

890. TOPICS IN STRUCTURES

Studies of topics of special interest and need of the student in structural design, analysis, and optimization. 2-4 cr.

895, 896, 897. CIVIL ENGINEERING PROBLEMS

The study and investigation of problems selected to meet the needs of the students. 2-4 cr.

899. MASTER'S THESIS

6-9 cr.

Communication Disorders (Comm)

Chairperson: F. Harry Tokay

ASSOCIATE PROFESSORS: F. P. Murray, F. H. Tokay
ASSISTANT PROFESSORS: F. C. Lewis, C. W. Martin

Program Objectives: Students are prepared to function independently as clinicians within the field of communication disorders and to meet the academic and practicum requirements for the Certificate of Clinical Competence of the American Speech and Hearing Association in the area of Speech Pathology.

Admission Procedures: Before considering a graduate application, the Communication Disorders Program must have received: application, transcripts of previous academic work, three letters of recommendation, and the Graduate Record Examination, aptitude test, or Miller Analogy Scores.

Major Curriculum

Applicants are expected to have a baccalaureate degree in communication disorders. The program is designed for part-time students; courses are offered in the evening and, on a concentrated basis, during the summer.

Required Courses: The following courses are required of all students: 706, Stuttering; 801, Articulation Disorders; 803, Organic Pathologies in Children; 804, Neuropathologies of Speech and Language; 812, Diagnosis and Remediation of Language Disorders; 881, Research Methodology.

Electives: The following courses may be taken to supplement required courses to satisfy minimum credit hours and to accomplish academic requirements for certification by the American Speech and Hearing Association: 704, Basic Audiology; 705, Aural Rehabilitation; 780, Diagnostic Procedures in Speech Pathology; 810, Clinical Practicum; 816, Advanced Clinical Audiology; 820, Seminar in Communication Disorders; 895, Special topics in Communication Disorders; 899, Thesis.

Clinical Practicum: Up to 8 credits may be completed in practicum registration. The specific number of credits needed by a student will depend on undergraduate program and experience. Students are scheduled for three hours per week of direct client contact for each credit of practicum registration and will be helped to gain the practicum requirements for certification by the American Speech and Hearing Association.

Written Examination: All students must pass a written comprehensive examination designed to assess their mastery of the professional concepts of communication disorders in the areas of normative processes, pathologies, and remediation.

Thesis Option: A student may elect the option of writing a thesis. Such a student must satisfactorily complete the course in Research Methodology and must present a proposal for acceptance. Upon completion of the research project, each student must defend the thesis in an oral examination and must gain approval of his/her thesis committee. Six credits will be awarded for satisfactory completion of a thesis.

801. ARTICULATION DISORDERS

Phonological theories as they relate to analysis and remediation of articulation disorders. 3 cr.

Earth Sciences

803. ORGANIC PATHOLOGIES IN CHILDREN

Speech/language disorders associated with neuromotor and orofacial pathologies in children; etiologies; methods of evaluation and treatment. 3 cr.

804. NEUROPATHOLOGIES OF SPEECH AND LANGUAGE

Principles concerning etiologies, instruments for evaluation, classification, and methods of clinical management including the team approach to rehabilitation of speech and language neuropathologies. 3 cr.

806. VOICE DISORDERS

Types, causes, and characteristics of functional and organic voice disorders. Specific evaluation of deviant vocal characteristics; treatment techniques for children and adults. 3 cr.

810. CLINICAL PRACTICUM

Supervised experience in diagnosis and therapy with speech/language handicapped children and adults. Prereq: permission. (May be repeated up to 8 credits.) 2-8 cr.

812. DIAGNOSIS AND REMEDIATION OF LANGUAGE DISORDERS

Current diagnostic procedures and remediation techniques to evaluate and treat language disorders. 3 cr.

816. ADVANCED CLINICAL AUDIOLOGY

Advanced clinical testing for identification of organic and nonorganic hearing disorders; instrumentation and calibration procedures; ISO and ANSI standards. 3 cr.

820. GRADUATE SEMINAR

Current topics and recent research. May be repeated up to 9 cr. provided no topic is repeated. 3 cr.

895. SPECIAL TOPICS IN COMMUNICATION DISORDERS

Advanced study in specific areas; will involve an independent project. (May be taken more than once.) Prereq: permission. 1-3 cr.

899. MASTER'S THESIS

Prereq: departmental permission. 6 cr.

Earth Sciences (ESci)

Chairperson: Herbert Tischler

PROFESSORS: Henri E. Gaudette, Cecil J. Schmeer, Herbert Tischler
ASSOCIATE PROFESSORS: Franz E. Anderson, Francis S. Birch, Wallace A. Bothner, Glenn W. Stewart

ASSISTANT PROFESSORS: Wendell S. Brown, Theodore C. Loder, Paul A. Mayewski

ADJUNCT PROFESSOR: Robert I. Davis

COORDINATOR OF GRADUATE PROGRAM: Francis S. Birch

The Department of Earth Sciences offers graduate work leading to the Master of Science in Earth Sciences with options in either geology or oceanography.

Admission Requirements

1) Students are expected to have completed at least a year of college chemistry, physics, and calculus;

2) Students with an undergraduate equivalent to a major in geology, chemistry, physics, mathematics, engineering, or in the biological sciences will be considered;

3) All applicants must submit scores on the aptitude portion of the graduate record examination. Students lacking some background in a particular area may be admitted provided they are prepared to complete courses, without graduate credit, in which they may be deficient.

The option (geology or oceanography) a student wishes to follow will determine the level of necessary preparation. For instance, a student with an undergraduate major in physics who wishes to change direction to marine geology would have a number of deficiencies in geology to complete beside completing the core curriculum in oceanography. However, if that student wished to pursue a program stressing physical oceanography, fewer deficiencies would probably have to be completed. The preparation of each student will be determined prior to the beginning of the first semester in residence in order to plan the course of study.

Degree Requirements

General Minimum Requirement: In addition to any deficiencies, students must satisfactorily complete a minimum of 30 credits of which 8 (not including 899) must be taken at the 800 level, and complete a thesis.

Geology Option Requirements: This option is designed primarily for students with an undergraduate background in geology. Emphasis in this option may be placed upon: Petrology-Mineralogy-High Tempera-

ture Geochemistry; Geomorphology-Glacial Geology; Geophysics; Sedimentation-Low Temperature Geochemistry; Stratigraphy-Paleontology.

The option in geology normally includes:

1) The core curriculum (total of 22 cr.): ESci 732, Geological Field Methods, 4 cr.; ESci 734, Applied Geophysics, 4 cr.; ESci 741, Geochemistry, 4 cr.; ESci 897/898, Seminar in Earth Sciences, 2 cr. each semester of the first year; ESci 899, Master's Thesis, 6 cr. and an oral defense of the thesis.

2) Additional courses to a minimum of 8 cr.: These courses are to be selected from 700- or 800-level courses in the department and/or from courses numbered 600 or above in disciplines outside of the department (chemistry, hydrology, soil science, physics, mathematics, etc.).

Election of the core curriculum as well as the additional courses will depend upon each individual student's specialization and upon his/her preparation at the time s/he enters the program.

Oceanography Option Requirements: This option is designed for students who wish to pursue the chemical, geological, and/or physical aspects of oceanography. Although the broad scope of the marine sciences will be presented, the emphasis in the program will be placed on estuarine, coastal, and continental shelf oceanography.

The option in oceanography normally includes:

1) The core curriculum (total of 22 cr.): ESci 752, Chemical Oceanography, 4 cr.; ESci 758, Physical Oceanography, 4 cr.; ESci 759, Geological Oceanography, 4 cr.; ESci 897-898, Seminar in Earth Sciences, 2 cr. taken each semester of the first year; ESci 899, Master's Thesis, 6 cr., and an oral defense of the thesis.

2) Additional Courses to a minimum of 8 cr.: The following are examples of courses that would be elected by students in the various specializations within the oceanography option:

For Chemical Oceanography: chemistry courses numbered 600 or higher; ESci 895-Y, Advanced Chemical Oceanography; ESci 856, Estuarine and Marine Sedimentation.

For Geological Oceanography: ESci 734, Applied Geophysics; ESci 856, Estuarine and Marine Sedimentation; mathematics and/or chemistry courses numbered 600 or higher; other 700- or 800-level courses in earth sciences.

For Physical Oceanography: Fluid Dynamics; mathematics and/or physics courses numbered 600 or higher; ESci 734, Applied Geophysics; ESci 858, Dynamical Oceanography.

Because most students enter this option with an undergraduate major in one of the traditional sciences or engineering disciplines, it is expected that their exposure to formal courses in oceanography will be minimal. Election of the core curriculum as well as the additional courses will depend upon each individual student's particular specialization and upon his/her preparation at the time of entrance into the program.

725. IGNEOUS AND METAMORPHIC PETROLOGY

Textural, mineralogical, and chemical analysis, and phase rule and phase diagram interpretation applied to petrogenesis. Prereq: principles of mineralogy; petrography; /or permission. Lab. 4 cr.

732. GEOLOGIC MAPPING AND INTERPRETATION

Standard methods of geologic field mapping; interpretation of geologic maps and aerial photographs of selected areas. Course includes field mapping excursions to local areas and an 8-10 day exercise in a selected area of the Appalachian Mountains. \$75 lab fee includes transportation and housing in the field. Prereq: permission. Lab. 4 cr.

734. APPLIED GEOPHYSICS

Gravity, magnetic, seismic, electrical, and thermal methods of investigating subsurface geology. Fieldwork and use of computers in data analysis. Prereq: calculus passed or taken concurrently; intro geol; one year of college physics; /or permission. Lab. 4 cr.

741. GEOCHEMISTRY

Thermodynamics applied to geological processes; geochemical differentiation of the earth; the principles and processes that control the distribution and migration of elements in geological environments. 4 cr.

752. CHEMICAL OCEANOGRAPHY

Water structure, chemical composition and equilibrium models, gas exchange, biological effects on chemistry, trace metals, and analytical methods. Laboratory includes short cruise aboard R/V Jere A. Chase. Prereq: permission. Lab (optional). 3 or 4 cr.

754. SEDIMENTATION-STRATIGRAPHY

Sedimentation: weathering, transportation, and deposition of modern sediments. Stratigraphy: classification of sedimentary rocks and principles of stratigraphic correlation. Lab. 4 cr.

758. INTRODUCTION TO PHYSICAL OCEANOGRAPHY

Ocean basins; physical properties of seawater; atmosphere-ocean interaction; general ocean circulation; waves and tides; continental shelf and near-shore processes; instrumentation and methods used in ocean research. Simplified physical and mathematical models demonstrate the important concepts. Prereq: one year of calculus and college physics; intro oceanog; /or permission. Lab and field project. 4 cr.

759. GEOLOGICAL OCEANOGRAPHY

Major geological features and processes of the ocean floor; geological and geophysical methods; plate tectonics. Prereq: intro geol; intro oceanog; /or permission. 4 cr.

Earth Sciences

762. GLACIAL GEOLOGY

The glacial environment: glacier dynamics and glacial erosion and deposition. Review of world glacial stratigraphy in light of causes of glaciation and climatic change. Field trips. Prereq: intro geol; geomorphology; /or permission. Lab. 4 cr.

781. PHYSICAL GEOLOGY

Materials and structures of the earth and erosive agents that modify them. Laboratory and field trips. For certified elementary or high school science teachers or for students in master's degree programs in education who need an introduction to the earth sciences. (Not available for credit after completing ESci 401 or equivalent.) 4 cr.

782. HISTORICAL GEOLOGY

Evolution of physical features and life on the earth. Fossil organisms; methods of historical geology; laboratory and field trips. Prereq: ESci 781 or equivalent. For certified elementary or high school science teachers or for students in master's degree programs in education who need an introduction to the earth sciences. (Not available for credit after completing ESci 402 or equivalent.) 4 cr.

795. TOPICS IN EARTH SCIENCES

A) Areal Geology; B) Geochemistry; C) Geomorphology, Advanced; D) Geophysics; E) Glacial Geology, Advanced; F) Groundwater Geology; G) Historical Geology, Advanced; H) Industrial Minerals; I) Micropaleontology; J) Mineral Fuels; K) Mineralogy, Advanced; L) Optical Crystallography; M) Ore Deposits; N) Paleontology, Advanced; O) Petrology, Advanced; P) Regional Geology; Q) Sedimentation; R) Stratigraphy; S) Structural Geology, Advanced; T) Marine Geology; U) Physical Oceanography; V) History of Geology; W) Earth Science Teaching Methods; X) Senior Synthesis; Y) Chemical Oceanography; Z) Glaciology, Advanced. Special problems by means of conferences, assigned readings, and field or laboratory work, fitted to individual needs from one of the areas listed above. 1-4 cr.

813. X-RAY CRYSTALLOGRAPHY

Theory and practice of diffraction of x-rays by crystals; lattices, symmetry, and structure analysis. Prereq: mineralogy or physical chemistry or equivalent. 3 cr. (Not offered every year.)

820. ADVANCED IGNEOUS PETROLOGY

Extensive readings and discussions of original sources and recent literature with reference to classical petrologic provinces. Application of thermodynamics and phase-rule chemistry to igneous petrogenesis. Prereq: permission. 3 cr. (Not offered every year.)

821. ADVANCED METAMORPHIC PETROLOGY

Extensive readings and discussions of original sources and recent literature dealing with the facies concept, equilibrium reactions, reaction kinetics, and other chemical aspects of metamorphic petrogenesis. Prereq: permission. 3 cr. (Not offered every year.)

841. ANALYTICAL GEOCHEMISTRY

Introduction to the theory, instrumentation, and applications of analytical methods in geochemistry. Prereq: permission. 3 cr. (Not offered every year.)

852. ADVANCED CHEMICAL OCEANOGRAPHY

Readings on physical, chemical, and biological processes that affect the distribution of chemical components in estuaries and the open ocean. Laboratory includes projects investigating selected processes. Prereq: ESci 752 or permission. 4 cr.

856. ESTUARINE AND MARINE SEDIMENTATION

Unique aspects of sedimentation in marine and estuarine water with special emphasis on cohesive, fine-grained estuarine sediment erosion, transportation, and deposition. Laboratory includes basic statistical analysis of sedimentological data. Course includes completion of a project. Prereq: permission. 3 cr. (Not offered every year.)

858. DYNAMICAL OCEANOGRAPHY

The hydrodynamics of such ocean phenomena as waves, tides, and ocean turbulence; wind driven circulation on the continental shelf and deep ocean will be treated in detail. Prereq: ESci 758; M E 707; /or permission. 4 cr. (Not offered every year.)

859. DATA ANALYSIS METHODS IN OCEAN AND EARTH SCIENCES

Methods of analysis of oceanographic, geophysical, geological, and environmental data. An introductory tutorial on important mathematical concepts precedes the development of the bases for a number of data analysis techniques; digital filtering, regression analysis, cross-spectral analysis, objective analysis, and elementary inverse theory, etc. Students use these techniques on real data. Prereq: differential equations or equivalent. 3 cr.

895, 896. TOPICS IN EARTH SCIENCES

Advanced work on an individual or group basis under members of the graduate staff. Sections of this course are the same as those listed under ESci 795. Prereq: permission of department chairperson and staff concerned. 1-4 cr. (May be taken more than once.)

897, 898. SEMINAR IN EARTH SCIENCES

A review and discussion of recent literature in the earth sciences. Required of graduate students in earth sciences. 1-3 cr.

899. EARTH SCIENCES MASTER'S THESIS

4 cr.

Economics (Econ)

Director of Economics Studies: Richard Hurd

PROFESSORS: Robert F. Barlow, Manley R. Irwin, John J. Korbel, Sam Rosen, Kenneth J. Rothwell, Charles B. Warden, Jr., Dwayne E. Wrightsman

ASSOCIATE PROFESSORS: Allan J. Braff, John M. Burt, Jr., Richard Hurd, Fred R. Kaen, Richard L. Mills, Robert C. Puth, Allen Thompson

ASSISTANT PROFESSORS: Richard W. England, Marc Herold, Evangelos Simos

Whittemore School of Business and Economics

The economics faculty of the Whittemore School, together with the resource economics faculty of the Institute of Natural and Environmental Resources, offers a program leading to the degree of Doctor of Philosophy. In addition, the economics faculty offers a plan of study culminating in the degree of Master of Arts.

Admission to both programs is open to students whose undergraduate work shows evidence of superior ability and motivation and who manifest promise of serious scholarship. Normally, the appropriate undergraduate preparation will include exposure to economic reasoning and methodology, including mathematics and statistics. Those who warrant special consideration, even though their backgrounds are deficient, should be aware that remedial work may be required.

Admission requirements in addition to those established by the Graduate School include: the Graduate Record Examinations (aptitude and advanced test in economics); T.O.E.F.L. for applicants from non-English speaking countries; three letters of recommendation from those acquainted with the applicant's work in his/her major.

Doctor of Philosophy Degree

Ph.D. candidacy requires written evidence of proficiency in economic theory, the history of economic thought and methodology, and quantitative methods. In special cases, oral examinations may also be required. The Ph.D. candidate is also required to participate in a minimum of two research workshops. At present, workshops exist in finance, political economy, labor economics, econometrics, and resource economics.

Information about fields available for the dissertation as well as other details of the doctoral program can be obtained from the director of economics studies.

Master of Arts Degree

The candidate for a master's degree may take a general course of study or the thesis option. The general requirements of the Graduate School and the following major requirements must be met:

- 1) 32 semester hours of graduate study which may include 8 hours of thesis work;
- 2) Minimum of 24 semester hours in courses numbered 700 and above and at least 12 hours in courses numbered 800 and above apart from Econ 899, Thesis;
- 3) Maximum of 8 semester hours in approved courses numbered 600 and above taken in related disciplines;
- 4) Written evidence of proficiency in economic theory and *either* history of economic thought and methodology or quantitative methods.

711. ECONOMIC FLUCTUATIONS

Recurrent movements of prosperity and depression; emphasis on causes and public-policy implications. Prereq: intermed macro or permission. 4 cr.

715. MARXIAN ECONOMIC ANALYSIS

Marx's analysis of capitalism within the classical and radical tradition; methodology; organization of capital; labor theory of value; accumulation of capital; growth and distribution; economic crises. Critical evaluation of Marx's analysis. Prereq: intermed micro; intermed macro; /or permission. 4 cr.

720. U.S. ECONOMIC HISTORY

From colonial times to the present. Applied economic theory; economic models and interpretation of data. Influence of technology, industrialization, foreign trade, monetary factors, and government; noneconomic factors. Prereq: intermed micro and macro; /and permission. 4 cr.

721. EUROPEAN ECONOMIC HISTORY

Western European and Mediterranean economies from medieval times to the Common Market. Economic models and interpretation of data. Capital accumulation, technology, trade, industrialization, monetary factors, and the role of government; relevant non-economic factors. Prereq: intermed micro and macro; /or permission. 4 cr.

Economics

725. STATISTICAL THEORY

Univariate and bivariate mathematical statistics; i.e., probability theory, discrete and continuous random variables and their distributions, moments and moment-generating functions, parameter estimation, hypothesis testing, correlation and regression analysis, analysis of variance. Prereq: calculus. 4 cr.

727. ECONOMETRIC THEORY

Representation of economic phenomena in mathematical terms; formulation of models of economic activity and the derivation therefrom of propositions that are subject to statistical test, primarily by means of multivariate regression analysis. Prereq: Econ 725 or permission. 4 cr.

735. ECONOMICS OF FINANCIAL MARKETS

Economic analysis of financial market systems. Topics include financial market functions, theories of saving and investment, financial intermediation, flow-of-funds analysis, loanable funds theory, interest rate forecasting, portfolio theory, capital-asset pricing models, structure of interest rates (including term-structure theory), and macroeconomic models of the financial sector. Prereq: Money and Banking or permission. 4 cr.

736. SEMINAR IN MONETARY THEORY AND POLICY

Contemporary developments in monetary theory and the evaluation of policy measures. Prereq: Money and Banking or permission. 4 cr.

737. DECISION THEORY AND BAYESIAN METHODS

Utility, decision problems, prior and posterior distributions, sufficiency, estimation and hypothesis testing, linear models, and sequential sampling. Emphasis on applications to business and economics. Prereq: Math 735. (Also offered as Math 737.) 4 cr. (Not offered every year.)

741. SEMINAR IN PUBLIC FINANCE—THEORY AND POLICY

Selected topics in contemporary theoretical and policy problems of public finance. Prereq: public finance or permission. 4 cr.

742. SURVEY OF URBAN ECONOMICS

Theoretical and empirical bases; policy alternatives for the problems of poverty, housing, urban renewal, transportation, local fiscal affairs, and pollution. Prereq: intermed micro or permission. 4 cr.

745. INTERNATIONAL TRADE

Contemporary issues in international economic theory and policy. Analysis of trade theory, dynamics of world trade and exchange, and international commercial policy. Prereq: international econ or permission. 4 cr.

746. INTERNATIONAL FINANCE

International monetary mechanism; balance of payments, international investment; exchange rates, adjustment systems, international liquidity, foreign aid, multinational corporations. Prereq: prin of econ. 4 cr.

747. MULTINATIONAL ENTERPRISES

The internationalization of economies. Growth and implications of the multinational corporation at the level of systems. Theories of imperialism, international unity/rivalry; theories of direct investment; the exercise of influence and conflict, technology transfer, bargaining with host country; effects on U.S. economy. Prereq: permission. 4 cr.

751. GOVERNMENT REGULATION OF BUSINESS

Analysis of government policy with reference to such problems as conspiracy, monopoly, mergers, unfair practices, and discrimination; legal and economic appraisal of government policy alternatives. Prereq: gov't reg of busi or permission. 4 cr.

752. SEMINAR IN INDUSTRIAL ORGANIZATION AND PUBLIC POLICY

Historical and contemporary developments in the theoretical and applied areas of industrial and commercial market structures, behavior, and performance. Prereq: gov't reg of busi; permission. 4 cr.

755. COLLECTIVE BARGAINING

Historical development of the U.S. labor movement and the industrial relations system. Contemporary collective bargaining issues; the role of public policy in industrial relations. Prereq: labor unions and the working class or permission. 4 cr.

756. LABOR ECONOMICS

Recent developments in labor market analysis and public policies related to contemporary labor issues. Labor supply, the structure and stratification of labor markets, economic discrimination, unemployment and poverty, inflation, and wage-price controls. Prereq: labor econ or permission. 4 cr.

757. ECONOMICS OF WORK

Organization of work under capitalism. Competing management philosophies, response of workers to management practices. Satisfaction of workers with their jobs, trends in worker productivity, alternative work arrangements, and worker participation in management. Prereq: labor unions and the working class; labor econ; /or permission. 4 cr.

758. MANPOWER AND EDUCATION PLANNING

Flows of human beings within and between the educational and manpower sectors of the economy, also related to flows of goods and services in the industrial sector. Interrelationships of these flows; construction of a computer simulation model tracing the impact throughout the economy of manpower and educational planning decisions. Prereq: prin of econ or permission. 4 cr.

761. NATIONAL ECONOMIC PLANNING

Planning in a market economy: the new industrial state. Planning as a substitute for markets: the developing countries. Planning as a way of transforming society; socialist economies; techniques of planning social and political issues related to various planning methods. Prereq: intermed micro and macro; /or permission. 4 cr.

768. SEMINAR IN ECONOMIC DEVELOPMENT

Theories of the development process; role of various forces of economic change in developing countries. Prereq: econ dev or permission. 4 cr.

769. CASE STUDIES IN ECONOMIC DEVELOPMENT

Problems and policies in selected countries; evaluations of national plans, programs, and projects; comparative analysis. Sections: A) Southeast Asia; B) Cost-Benefit and Project Analysis; C) Africa; D) South America. Prereq: prin of econ or permission. 4 cr.

798. ECONOMIC PROBLEMS

Special topics; may be repeated. Prereq: permission of adviser and instructor. 2 or 4 cr.

825. MATHEMATICAL ECONOMICS

Principal mathematical techniques and their application in economics. Prereq: permission. 4 cr.

826. EMPIRICAL ECONOMIC METHODS

Application of statistical and econometric methods to problems in economics. Special emphasis on problems such as multicollinearity and autocorrelation and their resolution. Computer application is stressed throughout the course. Prereq: permission. 4 cr.

857-858. HISTORY OF ECONOMIC THOUGHT

The evolution of economic thought. Examination and critical appraisal of the work of major economists and major schools of economists. 4 cr.

873. MACROECONOMIC THEORY

Advanced analysis of such aggregates as national income, total output, employment, and the general price-level. Examination of the major aggregate models. 4 cr.

874. ECONOMIC DYNAMICS

Dynamic analysis of macro- and microeconomic models. Dynamic stability, disequilibrium dynamics, growth theory, and stochastic processes. Prereq: Econ 825, 873, and 877; /or equivalent. 4 cr.

877. MICROECONOMIC THEORY

Topics in microeconomics with emphasis on recent developments in such areas as general equilibrium analysis, welfare economics, demand theory, and capital theory. 4 cr.

878. ECONOMICS OF CENTRALIZED AND MIXED SYSTEMS

Economic analysis of pricing; resource allocation and income distribution problems in systems in which private property is absent or minimized and private market mechanisms are circumvented. Input-output analysis and optimal control theory. Prereq: Econ 877. 4 cr.

895. INDEPENDENT STUDY

Variable cr.

896. RESEARCH WORKSHOP

A) Finance; B) Political Economy; C) Labor Economics; D) Econometrics; E) Resource Economics. 2 cr.

899. THESIS

8 cr.

999. DOCTORAL RESEARCH

Education (Educ)

Chairperson: Roland B. Kimball

PROFESSORS: Angelo V. Boy, Bud B. Khleif, Roland B. Kimball, Carleton P. Menge, Gerald J. Pine

ASSOCIATE PROFESSORS: Michael D. Andrew, Charles H. Ashley, Jason E. Boynton, John G. Chaltas, Ellen P. Corcoran, David D. Draves, Donald H. Graves, David J. Hebert, M. Daniel Smith, Deborah E. Stone, W. Dwight Webb

ASSISTANT PROFESSORS: Richard F. Antonak, Patricia M. Arredondo-Dowd, Robert B. Babcock, John J. Carney, Barbara J. Cline, Michael C. Diamonti, Ann L. Diller, Leo D. Geoffrion, Cynthia L. Homer, Sharon N. Oja, Mary B. Winslow

ADJUNCT PROFESSOR: Donald D. Durrell

ADJUNCT ASSOCIATE PROFESSORS: Edward D. Durnall, Richard H. Goodman

ADJUNCT ASSISTANT PROFESSORS: John R. Cavanaugh, David M. J. Cross

GRADUATE STUDIES COORDINATOR: David D. Draves

Admission to Graduate Standing

Admission to graduate standing in the Department of Education is granted to applicants meeting the entrance requirements of the Graduate School and accepted by the department. Applications must include Graduate Record Examination scores for the Aptitude Test.

Admission Requirements

1) Above average academic credentials; 2) above average scores on the Graduate Record Examination; 3) three strongly supportive letters of recommendation attesting to intellectual and personal competence from persons in a position to judge the applicant's preparation and fitness for graduate work; 4) applicants for the Certificate of Advanced Graduate Study must meet the preceding admission requirements and also possess a master's degree in an appropriate specialty, and follow general admission procedures.

The admissions committee of the education department meets according to the following schedule to review applications and make recommendations concerning admission of students to the Graduate School. Applications for part-time study in all programs and for full-time study in administration, developmental disabilities, early childhood, elementary education, secondary education, five-year teacher education, post-M.A.T. and M.Ed. programs, and reading must be complete at least one week prior to the following action dates: December 3, 1979, for Semester II; March 31, 1980, for the summer

session; and July 21, 1980, for Semester I, 1980-81. Applications for full-time study in counseling must be complete at least one week before the program's single action date: March 31, 1980.

Concluding Degree Experience

Candidates in a Master of Education program usually conclude degree work by completing one of four types of concluding experiences: 1) research thesis; 2) written comprehensive examination; 3) development of a written set of professional theses followed by an oral examination; 4) clinical experience. Students must enroll in Education 899: Thesis, when the research thesis is selected.

Candidates in the Master of Arts in Teaching program usually conclude degree work by completing a project closely related to the teaching internship.

Candidates in the Certificate of Advanced Graduate Study program in counseling usually conclude degree work by completing one of three types of concluding experiences: 1) research thesis; 2) written comprehensive examination; 3) development of a written set of professional theses followed by an oral examination.

Master's Degree Programs in Education

Seven graduate programs lead to the Master of Education degree: counseling, developmental disabilities, early childhood education, educational administration and supervision, elementary education, reading, and secondary education.

Some programs are available to part-time admitted graduate students. Since not all courses are offered each semester, students should consult the current *Time and Room Schedule* for course offerings.

Counseling

Program Information: Patricia Arredondo-Dowd, Robert Babcock, Angelo Boy, David Cross, David Hebert, Gerald Pine, and Dwight Webb.

The Counseling Program offers students a choice of either the Master of Arts degree or the Master of Education degree. The M.A. degree requires completion of seven core courses (28 credits), elective courses (8 credits), and the completion of a research thesis (6 credits), for a total of 42 credits. These 42 credits should be viewed as a minimum number because in many cases it is determined that the student needs additional coursework in statistics and research methodology in order to complete the thesis requirement. The Master of Education degree requires completion of the seven core courses (28 credits), elective courses (8 credits), and successful completion of a written comprehensive essay examination.

These programs prepare professional counselors to function in a variety of institutions, organizations, and agencies dedicated to the

educational, vocational, social, and psychological development of the person, within the context of school and university settings, human service programs, human development centers, and rehabilitation agencies. Graduates of the program are engaged in providing preventive and restorative services to persons who possess normal and developmental concerns. Graduates are typically involved in the team delivery of services and work in collaboration with other human services professionals.

Core Requirements (28 credits): Educ 820, Counseling Theory and Practice; 821, Psychology of Career and Personal Development; 822, Assessment in Counseling; 823, Group Counseling; 824, Psychological Adaptation; 825, Counseling Laboratory; and 826, Counseling Internship.

Electives (8 credits): Educ 818 and 819 may serve as electives. In addition, in consultation with the adviser, electives may be selected from graduate-level courses which are related to the behavioral sciences and offered by a department or school in the University.

Developmental Disabilities

Program Information: Richard F. Antonak, S. Barbara Cline, M. Daniel Smith, (Education); Ann D. Ury, (Occupational Therapy); F. Harry Tokay, (Communication Disorders)

This program prepares graduates to assume responsibility in the service delivery system for developmentally disabled citizens (i.e., mental retardation, cerebral palsy, convulsive disorders, autism, multiple handicaps), including: 1) directing the interaction of various therapies and disciplines providing service to the developmentally disabled, 2) coordinating, supervising, and administering human service programs for developmentally disabled, 3) planning and evaluating human service programs, and 4) maintaining and improving such programs through public relations, community awareness, and grant procurement activities.

Candidates are expected to have prior experience in one of several related professions (such as nursing, medicine, occupational therapy, communications disorders, psychology, physical therapy, social work, education) and/or a strong theoretical background in these disciplines. At present, this program is available only to part-time admitted graduate students.

Required Courses (28 credits): Educ 883, Advanced Psychology of Human Learning; 854, Survey of Developmental Disabilities; 855, Service Delivery Systems in Developmental Disabilities; School of Health Studies 798, Survey of Therapeutic Approaches Employed by Professionals Related to Developmental Disabilities; Educ 856-857, Field Practicum and Seminars in Developmental Disabilities; and one course in the area of administration.

Electives (8 credits, minimum): elective courses may be selected, in consultation with the adviser, from the offerings of graduate departments of the University to meet individual needs and professional

objectives. A maximum of eight elective credits may be earned by completing a master's research thesis (Educ 899).

Concluding Experience: Each degree candidate must pass a written comprehensive examination.

Early Childhood

Program Information: Donald Graves, Deborah Stone.

The early childhood program is a full-time program beginning with the summer session and continuing through the academic year. (A part-time plan is also available.) The program prepares participants as early childhood resource specialists with competence to assume roles as master teacher, program supervisor, curriculum consultant, staff development director, parent/home educator, family agency coordinator, or college-level instructor. The emphasis is on practicum experience coordinated with extensive coursework in related academic disciplines.

Intensive summer experience is devoted to study of the young child and an analysis of appropriate learning environments.

September through June, graduate students are completely responsible for setting up and staffing early learning centers in local school districts, private schools, and day-care facilities in which they work in a co-teaching situation with another participant in the program as well as with volunteer aides from the community. Candidates engaged in coursework and seminars concurrent with practicum experience through study on the campus two afternoons and evenings per week. They are expected also to produce a monthly newsletter, provide workshops for staff and parent groups, and do independent study that results in papers of significance to be shared at the annual early childhood conference.

Visits to follow-through models and intervisitation among public schools, private schools, day-care centers, and other child-related agencies is encouraged.

Curriculum: Educ 841, Child Development for the Early Childhood Professional; 843, Environment for Early Childhood; 800-801, Internship and Seminar in Teaching; 846, Assessment in Early Childhood; 848, Contemporary Influences in Early Childhood; 850, Foundations of Early Childhood Education; 853, Seminar in Curriculum Study; 865 Educational Supervision; and 895 Independent Study in Education (36 credits).

Electives: Other graduate-level courses within or outside of the Department of Education are acceptable alternatives to some of the above courses depending upon the student's background, individual goals, and adviser's approval.

Concluding Experience: Degree candidates must successfully complete one of the following: comprehensive examination, research thesis, or major integrating project.

Education

Educational Administration and Supervision

Program Information: Charles Ashley, Jason Boynton, Roland Kimball, and Mary Winslow.

The program is designed for the experienced teacher to become qualified in the broad area of supervision and administration, grades K-12. Emphasis is on the elementary and secondary school principalship and general instructional supervision.

Core Requirements (28 credits): Educ 872, Educational Program Evaluation; 865, Educational Supervision; 853, Seminar in Curriculum Study; 861, Public School Administration; 863, Seminar in Educational Administration; 867, Legal Aspects of School Administration; and 869, Practicum in Educational Administration.

Electives (8 credits) are individually planned, with major portion selected from the following: Educ: 797, Seminar in Contemporary Educational Problems; 864, Personnel and Communication in Educational Organizations; 868, Collective Bargaining; 886, Philosophy of Education; 888, Sociology of Education; 895, Independent Study in Education; Admn 713, Interpersonal and Group Dynamics; Admn 803, Human Behavior in Organizations; Soc 740, Culture Changes; and Soc 770, Culture, Personality, and Society.

Concluding Experience: 1) Comprehensive oral examination based upon the thesis prepared by the candidate or 2) major research study related to school administration, curricula, or educational supervision.

Elementary and Secondary Education

Program Information: Teacher Education Committee: Michael Andrew; Stephen Birrell, coordinator of teacher education; Ellen Corcoran; Ann Diller; David Draves; Carleton Menge; Sharon Oja; and John Williamson.

The elementary and secondary education programs are designed for teachers who have been granted teaching certificates and who intend to become or to continue to be classroom teachers.

Core Curriculum (12 credits): Selections may be made from: Educ 785, Tests and Measurements; 838, Sociology of Education: Social Organization of Schools and Community; 853, Seminar in Curriculum Study; 883, Advanced Psychology of Human Learning; 884, Advanced Human Development; 886, Philosophy of Education.

Electives (18 credits): In consultation with the student's adviser and with his/her approval, electives may be taken in specialized areas from within the Department of Education, in the student's major field, or in some combination of the two. A student using the research thesis option of the concluding experience will normally use twelve elective credits for Educ 881: Methods and Techniques of Educational Research (4 cr.) and Educ 899: Thesis (8 cr.).

Concluding Experience: Degree candidates must successfully complete one of the following: theses plus oral examination, or research thesis.

Reading

Program Information: John Carney, Leo Geoffrion, Cynthia Homer.

The reading program provides professional training as special teacher of reading, clinician, and consultant for individuals seeking certification as reading specialists. The program is designed to meet standards recommended by the International Reading Association for the professional training of reading personnel and certification requirements of the state of New Hampshire for reading specialists. The program trains students in the areas of elementary and secondary reading foundations, clinical competencies, consultant and supervisory skills, and research capabilities.

Core Curriculum (28 credits): Educ 807, Foundations of Reading Instruction; 808, Diagnosis of Reading Difficulties; 809, Remediation of Reading Difficulties; 810, Comprehensive Reading Methods in the Secondary School; 813, Field Practicum in Reading; 814, Seminar in Reading. Choose one of the following: 811, Clinical Experience in Reading—Elementary; 812, Clinical Experience in Reading—Secondary.

Electives (8 credits): The remainder of courses are selected in consultation with the adviser. They may be from the offerings of the Department of Education or reflect an interdisciplinary approach with other graduate departments at the University. A student using the research thesis option as a concluding experience will use the 8 credits for Educ 899: Thesis.

Concluding Experience: Degree candidates will successfully complete one of the following: written examination, theses plus oral examination, or research thesis.

Degree Programs for Preservice Teachers: Master of Arts in Teaching and Master of Education

Program Information: Stephen Birrell, coordinator of teacher education.

The Department of Education offers two graduate programs for prospective elementary and secondary teachers, leading to either the Master of Arts in Teaching (M.A.T.) degree or the Master of Education (M.Ed.) degree. Both programs require a minimum of 30 credits and are designed for two types of students: 1) those in the Five Year, Undergraduate-Graduate Program who entered the teacher preparation program as undergraduates at UNH and have thus satisfied some of the requirements for teacher certification prior to graduate study; 2) those who have completed an undergraduate program, either at UNH or elsewhere, with little or no coursework in education. Specialization may be developed for teaching at the primary, middle, and/or high school levels. Students entering these master's degree programs normally have completed a bachelor's degree program with a major outside the field of education.

All professional education requirements for certification must be met either prior to or as a part of the master's degree programs for preservice teachers. These professional requirements include: Educ 500, Exploring Teaching; 700, Educational Structure and Change; 701, Human Learning and Development; 703, Alternative Teaching Models; 705, Alternative Perspectives on the Nature of Education; and 800-801, Internship and Seminar in Teaching. Additional requirements for all prospective elementary teacher candidates include 706, Introduction to Reading Instruction in the Elementary School, and two from the following: Math 621, Number Systems for Elementary School Teachers; Math 622, Geometry for Elementary School Teachers; Math 623, Topics for Elementary School Teachers; or Math 703, Mathematics-Education K-6.

All candidates who do not participate in the Live, Learn, and Teach program must complete, or have completed prior to admission, either: 1) 500, Exploring Teaching, or 2) a one-semester teacher aide experience, or its equivalent, with a supportive recommendation from school staff. Participants in the Live, Learn, and Teach program experience the equivalent of Educ 500.

The Live, Learn, and Teach program is a 10-credit, seven-week experiential summer program which may be an integral part of the master's degree program, particularly for those students who have done no previous coursework in education. The summer program consists of Educ 831 or 835 (4 cr.), 703 (4 cr.), and 700 (2 cr.). The program also satisfies the requirement for Educ 500.

Concluding Experiences: One of following is required of all candidates for either degree: development of a set of professional theses followed by an oral examination, research thesis, or project.

Master of Arts in Teaching (Elementary and Secondary)

The M.A.T. program is most appropriate for students who wish to do a portion of their degree coursework outside of the Department of Education, in their major teaching field or associated fields.

Professional Education Requirements (12-40 credits): Either as part of the degree program or prior to admission, required certification courses or their equivalents must be successfully completed: Educ 500, 700, 701, 703, 705, 800, 801. (In addition, for elementary teacher certification: Educ 706 and two courses from Math 621, 622, 623, 703.)

Courses Related to the Teaching Field (12 credits): These courses are to be selected in consultation with one's adviser from departments other than the Department of Education. (For those seeking elementary teacher certification, a required mathematics course may be included.)

Electives (0-6 credits): These courses, selected in consultation with one's adviser, may be from those offered by the Department of Education or other departments. Credits in Educ 700, 701, 703, and 705 beyond those used to fulfill the professional education requirements may serve as electives.

Concluding Experience: Degree candidates must successfully complete one of the following: project, theses plus oral examination, or research thesis.

Master of Education (Elementary and Secondary)

The Master of Education degree for preservice teachers is designed for those students who wish to concentrate their graduate study in the Department of Education.

Professional Education Requirements (12-40 credits): Either as part of the degree program or prior to admission, required certification courses or their equivalents must be successfully completed: Educ 500, 700, 701, 703, 705, 800, 801. (In addition, for elementary teacher certification: Educ 706 and two courses from Math 621, 622, 623, 703.)

Courses for an Education Area Concentration (12 credits): In consultation with one's adviser, courses offered by the Department of Education will be selected which concentrate on some aspect of the field of education. (For those seeking elementary teacher certification, Educ 706 may be included.)

Electives (0-6 credits): These courses, selected in consultation with one's adviser, may be from those offered by the Department of Education or other departments. Credits in Educ 700, 701, 703, and 705 beyond those used to fulfill the professional education requirements may serve as electives.

Concluding Experience: Degree candidates must successfully complete one of the following: project, theses plus oral examination, or research thesis.

Certificate of Advanced Graduate Study

A Certificate of Advanced Graduate Study (C.A.G.S.) is available in two programs: Counseling, and Educational Administration and Supervision.

Counseling (C.A.G.S.)

This program is designed for those who possess a master's degree in counseling or an equivalent master's degree and want to pursue further study toward the Certificate of Advanced Graduate Study. The candidate for this certificate must successfully complete 32 graduate credits beyond the master's degree, and one of the following before graduation: written examination, oral examination, or research thesis.

Required Education Courses (20 credits): Educ 827, Administration of Counseling Services; 828, Advanced Counseling Theory and Practice; 829, Advanced Counseling Internship; 830, Research in Counseling; and 884, Advanced Human Development.

Electives (12 credits): Elective courses available within the Counselor Education Program are: Principles and Procedures in Rehabilitation, Social and Psychological Aspects of Disability, Psychological Stress and Adaptation.

In consultation with one's adviser, electives may be selected from graduate-level courses offered by the departments of education, busi-

Education

ness administration, economics, English, history, home economics, mathematics, political science, psychology, and sociology.

Concluding Experience: Degree candidates must successfully complete one of the following: research thesis or written examination.

Educational Administration and Supervision (C.A.G.S.)

Designed for individuals who possess a master's degree or graduate study equivalent to that outlined in the University of New Hampshire M.Ed. program in Educational Administration and Supervision and who wish advanced preparation for careers as school superintendents, assistant superintendents, business managers, state department of education personnel, vocational education coordinators, curriculum coordinators, or educational personnel in private organizations.

Candidates must complete a significant field project and internship of 12 semester hours within the administrative environment in which they intend to function. Courses are required in five competency areas: Institutional Analysis, Organizational Behavior, Policy Analysis, Managerial Leadership, and Instructional Leadership. Twelve semester hours include electives outside the Department of Education.

The program is based upon the following:

1) Students in this program pursue basic courses in educational administration and supervision as well as electives which will enable them to function more adequately within a specific administrative environment.

2) Because of the complex role of the school administrator, persons seeking preparation as administrators must demonstrate intellectual and personal competence of superior quality.

3) The graduate program for administrators will emphasize the ability to apply the relevant facts and formulations derived from administrative theory and research in the solution of significant operational problems.

Contact: Charles H. Ashley, associate professor of education, Morrill Hall, for further details.

700. EDUCATIONAL STRUCTURE AND CHANGE

A) Education in America: Background, Structure, and Function; B) Who Runs the Schools? C) Curriculum Structure; D) Curriculum Change Strategies; E) New Directions in Curriculum; F) Outdoor Learning Environments; G) New Directions in Education; H) Alternative Schools; I) Experiential Curricula; J) Alternative Learning Environments; K) Curriculum for the Disenchanted Student; L) Education in the Middle Years; M) What *Is* an Elementary School? N) Public Attitudes toward American Schools; O) Communication Styles and Conflict Resolution; P) Personal and Institutional Change; Q) Educational Structure and Change. Organization, structure, and function of American schools; processes of change in education; how successful innovation is accomplished. Field experience options. Students may choose from variable-credit modules offered each semester (listed in department prior to preregis-

tration; refer to Time and Room Schedule). Minimum of 4 cr. required for teacher certification. Prereq: Exploring Teaching or permission. 1, 2, or 4 cr.

701. HUMAN LEARNING AND DEVELOPMENT: EDUCATIONAL PSYCHOLOGY

A) Human Learning and Development: Educational Psychology; B) Human Development and Learning: Educational Psychology; C) Human Development; D) Ages and Stages: Aspects of Development; E) Behavior Modification and Classroom Management; F) Learning, Emotional, and Behavior Disabilities; G) Learning, Motivation, and Evaluation; H) The Development of Thinking; I) Cognitive and Moral Development; J) Evaluating Classroom Learning; K) Child Development, Individual Differences, and Teacher Characteristics; L) Intelligence and Creativity; M) Sex Role Learning and School Achievement; N) Language Development in Children. Development, learning theory, and instructional theory applied to teaching. Students may choose from variable-credit modules offered each semester (listed in department prior to preregistration; refer to Time and Room Schedule). Minimum of 4 cr. required for teacher certification. Prereq: Exploring Teaching or permission. 1, 2, or 4 cr.

703. ALTERNATIVE TEACHING MODELS

A) Alternative Teaching Models; B) Maintaining Classroom Control; C) Teaching Strategies; D) Individualized and Varied Learning; E) The Integrated Unit: Plan Development; F) Language Arts Concepts for Elementary School Teachers; G) Teaching Elementary and Middle School Science; H) Verbal-Nonverbal Teaching Behaviors; I) Simulation and Learning Games; J) Nature and Goals of Social Studies: K-12; K) Instructional Materials of Social Studies: K-12. Analysis and application of basic teaching models and techniques (from teacher-directed to student-centered). Observation of master classroom teachers and exemplary videotapes; service as aides to master-teachers; seminars. Techniques and analysis systems through observation of videotapes, micro-teaching, completion of appropriate self-instruction units, and seminars. Students may choose from a number of variable-credit modules offered each semester (listed in department prior to preregistration; refer to Time and Room Schedule). Minimum of 4 cr. required for teacher certification. Prereq: Exploring Teaching or permission. 1, 2, or 4 cr.

705. ALTERNATIVE PERSPECTIVES ON THE NATURE OF EDUCATION

A) Contemporary Educational Perspectives; B) Controversial Issues in Education I; C) Controversial Issues in Education II; D) Concepts of Teaching: Differing Views; E) Curriculum Theory and Development; F) Readings on Educational Perspectives; G) Philosophy of Education; H) The Scope of Education; I) Education as a Form of

Social Control; J) School Reform Theories; K) Schooling and the Rights of Children; L) Education, Inequality, and the Meritocracy; M) Readings in Philosophies of Outdoor Education; N) Alternative Perspectives on the Nature of Education. Students formulate, develop, and evaluate their own educational principles, standards, and priorities. Alternative philosophies of education; contemporary educational issues. Students may choose from a number of variable-credit modules offered each semester (listed in department prior to preregistration; refer to Time and Room Schedule). Minimum of 4 cr. required for teacher certification. Prereq: Exploring Teaching or permission. 1, 2, or 4 cr.

706. INTRODUCTION TO READING INSTRUCTION IN THE ELEMENTARY SCHOOLS

Reading process; current procedures and materials; diagnostic techniques; practicum experience. Course satisfies reading requirement for prospective elementary teachers in the five-year teacher education program and may be included in the 12 required graduate credits in education at the graduate level. Course may also be taken for undergraduate credit before entrance into fifth year; in this case the course satisfies reading requirement but is not applicable toward the 12 required graduate credits. Prereq: Educ 500. 4 cr.

707. APPROACHES TO TEACHING READING AT THE SECONDARY LEVEL

The Reading Curriculum in The Secondary School: structural components (developmental, corrective, remedial); materials and methods of instruction and appraisal; instruments of measurement and evaluation in the comprehensive secondary reading program. 2 cr. *Teaching Reading through the Content Areas: Alternatives and Application*: new approaches, concepts, and methodologies of teaching reading through content materials; workshop to develop and produce instructional strategies and materials for an integrated reading-content program. 2 cr. (Two credits of 707 may be used to satisfy 2 credits of Educ 700.)

734. CHILDREN'S LITERATURE

Interpretive and critical study of literature for children in the elementary, middle, and junior high schools. Methods of using literature with children. 4 cr.

750. INTRODUCTION TO EXCEPTIONALITY

Social, psychological, and physical characteristics of exceptional individuals including intellectual (gifted, retarded, learning disabled); sensory (visual, auditory); motor (orthopedic); health; and communication. Implications for educational and human service delivery. 4 cr.

751. EDUCATING EXCEPTIONAL LEARNERS

Issues in special education (labeling, mainstreaming, efficacy); techniques of special teaching (referral, assessment, observation, task analysis, profiling, selecting materials, intervention). Issues in special teaching (behavior modification, ability training). Primary application to mild and moderate handicaps. Co- or prereq: Educ 750 or permission. 4 cr.

752. DIAGNOSIS AND REMEDIATION OF LEARNING DISABILITIES

Terminology, etiology, common characteristics, and symptoms; theory and practice in gross-motor, visual, and auditory remediation; testing procedures used in diagnosis and remediation programs. 4 cr.

753. TEACHING THE CHILD WITH EMOTIONAL AND SOCIAL DIFFICULTIES

Nature and scope of emotional disturbances and social maladjustment in children, including causes, characteristics, and treatment programs. 2 cr.

763. INTRODUCTION TO EDUCATIONAL MEDIA

Educational media in the learning process; curricular integration of materials and equipment in the school library media center; design and implementation of learning systems that provide a framework for the development of individual skills. 4 cr.

775. DIAGNOSTIC TEACHING OF READING

Classroom implementation of diagnosis and remediation of reading disabilities; for teachers, counselors, administrators, and other school personnel. 4 cr.

785. EDUCATIONAL TESTS AND MEASUREMENTS

Theory and practice of educational evaluation; uses of test results in classroom teaching and student counseling; introductory statistical techniques. 4 cr.

795, 796. INDEPENDENT STUDY

Juniors and seniors only, with approval by appropriate faculty member. 2 or 4 cr.

797. SEMINAR IN CONTEMPORARY EDUCATIONAL PROBLEMS

Issues and problems of special contemporary significance, usually on a subject of recent special study by faculty member(s). Prereq: permission. May be repeated for different topics. 1-4 cr.

Education

800, 801. INTERNSHIP AND SEMINAR IN TEACHING

A two-semester, full-time, supervised internship consisting of less than full teaching responsibility in selected educational settings and programs. Weekly seminars and occasional workshops held concurrently with internship. Admission by application. 3 or 6 cr.

806. APPROACHES TO LANGUAGE ART INSTRUCTION

Analysis of current research and trends. Language development and literature, including contributions of allied disciplines such as semantics and linguistics. Focus on processes of communication and application to school curriculum. 4 cr.

807. FOUNDATIONS OF READING INSTRUCTION

Survey of reading process, theoretical models, and basic approaches to the teaching of reading. Emphasis on current methods, materials, and programs. 4 cr.

808. DIAGNOSIS OF READING DIFFICULTIES

Investigation of the nature, causes, and correlates of reading disability. Study of diagnostic procedures and materials through case studies, discussions, demonstrations, and practice. Co- or prereq: Educ 807; Educ 810. 4 cr.

809. REMEDIATION OF READING DIFFICULTIES

Procedures for remediating reading deficiencies and modifications of teaching necessary to adjust to diverse reading handicaps. Emphasis on a diagnostic teaching approach to reading remediation. Prereq: Educ 807 and 810; 808 (may be taken concurrently with 809). 4 cr.

810. COMPREHENSIVE READING METHODS IN THE SECONDARY SCHOOL

The nature of the reading process, diagnostic and developmental methods and materials, study skills, and reading in the content areas at the secondary level. Designed for secondary school teachers who wish to foster continuous development of students' reading and study skills. 4 cr.

811. CLINICAL EXPERIENCE IN READING—ELEMENTARY

Individual and small-group work with children provides opportunity for clinical analysis, microteaching, and evaluation. Seminars focus on the process of reading and language and the effects of a variety of materials and methods on learning. Prereq: Educ 809. 4 cr.

812. CLINICAL EXPERIENCE IN READING—SECONDARY

Supervised tutoring of secondary school students in order to develop techniques for improving reading skills. Seminars will focus on corrective techniques and the integration of reading skills to the content areas. Prereq: Educ 809. 4 cr.

813. FIELD PRACTICUM

Field-based experience focusing on roles of the reading specialist in the school setting. Prereq: permission. 4 cr.

814. SEMINAR IN READING

Investigation of current research findings in reading and the related language arts. Seminars will focus on significant research projects, program designs, and analysis of the field of reading research and ramifications for the reading specialist. Prereq: permission. 4 cr.

818. PRINCIPLES AND PROCEDURES IN REHABILITATION

Introductory course integrating theory and practice in the field of rehabilitation. History and philosophy of rehabilitation as a social movement, including relevant legislation. Study of institutions. Role, function, and work of the counselor. Relation of the rehabilitation process to the total health and helping service delivery systems. Prereq: permission. 4 cr.

819. SOCIAL AND PSYCHOLOGICAL ASPECTS OF DISABILITY

Examination of historical and cultural concepts of human deviance and disability. Analysis of social, psychological, and vocational factors resulting from disabling and disadvantaged human conditions. Relationship of rehabilitation to disability and to individual adjustments. Field-based consultation with disabled individuals and rehabilitation agencies. Simulated, eight-hour disability project for each student. Prereq: permission. 4 cr.

820. COUNSELING THEORY AND PRACTICE

Basic approaches to counseling are examined—their theoretical foundations, process components, goals, and outcomes. 4 cr.

821. PSYCHOLOGY OF CAREER AND PERSONAL DEVELOPMENT

Career and personal development and how each influences the other; literature and research examined to clarify application to individual and group career-counseling and to career education. 4 cr.

822. ASSESSMENT IN COUNSELING

Evaluative instruments and methods which have particular use in counseling. Systematic procedures for measuring samples of an individual's behavior and statistical concepts which underlie psychological testing. Assessment is viewed from the perspective of its use in the counseling process as well as its use in accountability. 4 cr.

823. GROUP COUNSELING

Theoretical and applied dimensions of the group counseling process. Class may include laboratory experience to examine one's interactive behavior as a group member and leader. Prereq: Educ 820; permission. 4 cr.

824. PSYCHOLOGICAL STRESS AND ADAPTATION

Problems in stress that are significant for human adaptation. Behavior patterns which pose the most common problems encountered by contemporary counselors are reviewed, with emphasis upon the concepts and processes of adaptation. 4 cr.

825. COUNSELING LABORATORY

Field experience in counseling with supervision and seminar to integrate theory and practice. Class will provide a format for micro-counseling, simulations, and contemporary professional issues. Prereq: Educ 820; permission. 4 cr.

826. COUNSELING INTERNSHIP

Supervised application of fundamentals of counseling theory and practice in actual counseling relationships. Samplings of the fundamental counseling practices of students will be analyzed and evaluated. Open only to master's degree candidates in UNH graduate program in counseling. Prereq: permission. 4 cr.

827. ADMINISTRATION OF COUNSELING SERVICES

Organizational patterns and administrative procedures that influence the effectiveness of counseling services. Emphasis upon staff development, accountability, professional issues, and productive supervisory behaviors. Prereq: permission. 4 cr.

828. ADVANCED COUNSELING THEORY AND PRACTICE

Detailed analysis of the counseling relationship: its characteristics, processes, and outcomes. Prereq: permission. 4 cr.

829. ADVANCED COUNSELING INTERNSHIP

Supervised application of advanced counseling theory and practice in actual counseling relationships. Samplings of the advanced counseling practices of students will be analyzed and evaluated. Open only to C.A.G.S. candidates in UNH graduate program in counseling. Prereq: Educ 828; permission. 4 cr.

830. RESEARCH IN COUNSELING

Research design and methodology in counseling. Students develop research projects which demonstrate knowledge of research procedures in evaluating the processes and outcomes of counseling. Prereq: permission. 4 cr.

831. SEMINAR AND PRACTICUM IN ELEMENTARY SCHOOL TEACHING

Supervised Practicum: Exploratory summer practicum in a local summer elementary school to examine teaching as a career and to prepare for the internship in the fall. Summer includes: 1) a prepracticum workshop focusing on interpersonal skill development;

2) a prepracticum curriculum and instructional laboratory; 3) a six-week practicum in which candidates, with the help of the staff, serve as the teaching staff in a local summer school; 4) seminars in curriculum and instruction. Opportunities for teaching high school students are available for candidates who wish to determine better what level of teaching they prefer. Prereq: admission to the M.A.T. program or M.Ed. program for preservice teachers. 4 cr. (Summer Session only.)

835. SEMINAR AND PRACTICUM IN SECONDARY SCHOOL TEACHING

Supervised Practicum: An exploratory summer practicum in a local summer high school to examine teaching as a career and to prepare for the internship in the fall. Summer includes: 1) a prepracticum workshop focusing on interpersonal skill development; 2) a prepracticum curriculum and instruction laboratory; 3) a six-week practicum in which candidates, with the help of the staff, serve as the teaching staff in a local summer school; 4) seminars in curriculum and instruction. Opportunities for teaching on elementary level are available for candidates who wish to determine better what level of teaching they prefer. Prereq: admission to the M.A.T. or M.Ed. programs for preservice teachers. 4 cr. (Summer Session only.)

838. SOCIOLOGY OF EDUCATION: SOCIAL ORGANIZATION OF SCHOOLS AND COMMUNITY

Schools in their socio-cultural contexts and as part of the institutional network of society. Relation to stratification and social control. Teaching as a religious occupation and as an emergent profession. (Also offered as Soc 838.) 4 cr.

841. CHILD DEVELOPMENT FOR THE EARLY CHILDHOOD PROFESSIONAL

To understand child growth, components of the course involve students in extended contacts with significant adults related to children in an early learning environment. Includes home visits to interview parents, relatives, and to observe the child in the family setting. Extensive readings, discussions, case study models, film viewings, and continued in-depth child study. Prereq: previous experience with young children. 4 cr.

843. ENVIRONMENT FOR EARLY CHILDHOOD

Examination of various environments with attention to use of time, space, and materials. Study multiple professional roles needed in providing appropriate Learning Center adjustments to maximize individual child development. 4 cr.

Education

846. ASSESSMENT IN EARLY CHILDHOOD

Study, administer, and design a range of assessment materials. Develop strategies for selection and utilization of clusters of assessment materials. Collect and organize relevant data. Prereq: Educ 841; 843. 4 cr.

848. CONTEMPORARY INFLUENCES UPON EARLY CHILDHOOD EDUCATION

Survey of contemporary models in this country and abroad, largely through field experiences (United States, Canada, and England). Application of principles to individual student and specific early learning situations. Prereq: current involvement with a specific group of children. 4 cr.

850. FOUNDATIONS OF EARLY CHILDHOOD EDUCATION

Historical roots of contemporary practices. Perspective of historical precedents in content, methodology, and change. Study and review of child development, assessment, classroom environments. Prereq: Educ 841; 843; 846; and 848. 4 cr.

853. SEMINAR IN CURRICULUM STUDY

Analysis of recent trends in public school curriculum; curricular structures, philosophy, development, change, and evaluation. Primarily for experienced teachers and administrators. Prereq: teaching experience. 4 cr.

854. SURVEY OF DEVELOPMENTAL DISABILITIES

Mental retardation, cerebral palsy, epilepsy, and related handicapping conditions; causal factors, physical and psychological characteristics, educational and therapeutic implications. Observations of programs and services for the developmentally disabled are required. 4 cr.

855. SERVICE DELIVERY SYSTEMS IN DEVELOPMENTAL DISABILITIES

Service delivery system models in developmental disabilities; pre- and postnatal, preschool, elementary, secondary, postschool, and adult occupational. Examination of the New Hampshire state plan for the provision of services and facilities for the developmentally disabled, as well as the plans of other states in the New England region; administrative, social, legal, and educational implications. 4 cr.

856-857. FIELD PRACTICUM AND SEMINAR IN DEVELOPMENTAL DISABILITIES

One semester of supervised experiences in a diversity of agencies and facilities serving the developmentally disabled, a one-semester practicum experience in a particular setting approximating the stu-

dent's career choice, and biweekly seminars on topics related to the delivery of service to the developmentally disabled. Supervision will be provided by University faculty and staff. Prereq: permission. 8 cr.

858. ANALYSIS OF TEACHING

Comparative analysis of current techniques and instrumentation for studying the process of teaching in the classroom. Consideration of substantive and procedural issues involved in planning for teaching. Prereq: teaching experience. 4 cr.

861. PUBLIC SCHOOL ADMINISTRATION

Introductory course; major issues in policy making, school management, personnel, public relations, finance, and research in school administration. Prereq: teaching experience. 4 cr.

862. EDUCATIONAL FINANCE AND BUSINESS MANAGEMENT

Principles of financing education, budgetary procedures, accounting, auditing, school indebtedness, financial reporting, and business management. Handling practical school finance problems will be part of the project work. Prereq: Educ 861. 4 cr.

863. SEMINAR IN EDUCATIONAL ADMINISTRATION

Cases and concepts in educational administration. Prereq: Educ 861. 4 cr.

864. PERSONNEL AND COMMUNICATION IN EDUCATIONAL ORGANIZATIONS

Problems arising from the communications process. Implications of group problem-solving processes. Interpersonal relations and group dynamics among students, faculty, staff, administration, and the community. Application of theories. 4 cr.

865. EDUCATIONAL SUPERVISION

Theoretical foundations of supervisory behavior as a means of effecting changes in instructional practices; consideration of instruments and techniques based on those theoretical foundations; some opportunity for field projects utilizing instruments and techniques. Prereq: teaching experience. 4 cr.

866. PRACTICUM IN SUPERVISION AND CURRICULUM

Supervision of teaching and curriculum development projects in the schools. Opportunity to apply skills in supervising and curriculum development techniques. Prereq: Educ 853; 865; permission. 4 cr.

867. LEGAL ASPECTS OF SCHOOL ADMINISTRATION

Relationship of law to public education. Emphasis on federal constitution, New Hampshire statutes, and case law related to public interests served by elementary and secondary education. Special topics: church-state relationship, due process, desegregation, state agencies, supervisory unions, school districts, school boards, teacher employment, negotiations, student rights, tort liability, school finance. Prereq: Educ 861; 863. 4 cr.

868. COLLECTIVE BARGAINING IN PUBLIC EDUCATION

An examination of collective bargaining as practiced by school boards, administrators, and teacher organizations. Consideration will be given to collective bargaining statutes, case law, employee relations boards, unit determinations, exclusive representation, union security provisions, scope of bargaining, good faith, grievance procedures, bargaining strategies, strikes, public interest, mediation, factfinding, arbitration, and the administration of the negotiated contract. Prereq: Educ 863. 4 cr.

869. PRACTICUM IN EDUCATIONAL ADMINISTRATION

Supervised practical experience in dealing with problems in educational administration. Prereq: Educ 863. 4 cr.

870. THE CHANGE PROCESS IN EDUCATION

Role of change agent and the change process in education as related to school personnel; structural characteristics of the school culture; change theory and systems analysis techniques. Students will be required to apply some of the theories in an institutional setting. 4 cr.

871. SCHOOL PLANT PLANNING

A study will be made of the techniques and procedures involved in the long-range planning of school facilities; for example, school populations projections, characteristics of the educational program, space requirements, evaluation of existing facilities, future use of existing buildings, analysis of financial resources available, identification of reasonable alternatives, and an examination of the probable consequences of such alternatives to include educational effectiveness and tax impact. Prereq: Educ 863 or permission. 4 cr.

872. EDUCATIONAL PROGRAM EVALUATION

Selected models for educational program evaluation; rationale underlying these models examined and compared; practical applications developed. Each student will plan a complete evaluation design for an appropriate educational program. Prereq: Educ 853; 861; /or permission. 4 cr.

874, 875. ADMINISTRATIVE INTERNSHIP AND FIELD PROJECT

Field-based internship. Administrative experiences in one or several educational and community agencies. Participation in administrative and supervisory work of the agencies. Each intern completes a major field project requiring analysis and action appropriate for resolution of a significant administrative problem at the intern-site. Supervision by University faculty. Prereq: permission of graduate adviser. A grade of credit (CR) will be given upon successful completion of the internship and field project. 6 cr.

881. METHODS AND TECHNIQUES OF EDUCATIONAL RESEARCH

Overview of the conceptual aspects and practical realities of the research process applied to problems in education and human service disciplines; develops skills necessary to use and conduct research. 4 cr.

883. ADVANCED PSYCHOLOGY OF HUMAN LEARNING

Review and integration of learning theory, teacher effectiveness, motivation theory, and development through adolescence; application of these to teaching generally and to the areas of specialization of the participants. Prereq: Educ 701 or equivalent. 4 cr.

884. ADVANCED HUMAN DEVELOPMENT

Selected principles and skills mankind must consider in the attempt to maximize individual, social, and educational potential; emphasis on personal implementation. Prereq: Educ 701, intro to psych, or equivalents. 4 cr.

886. PHILOSOPHY OF EDUCATION

Seminar in comparative analysis of contemporary educational objectives and practices and the philosophical foundations upon which they are based. Application of theoretical criteria for assessing educational philosophies and for developing one's own position. 4 cr.

888. SOCIOLOGY OF EDUCATION: THE CULTURES OF POVERTY AND AFFLUENCE

The schooling of "culturally deprived" and "culturally endowed" pupils. Problems of social and geographic mobility and immobility. Rise of the counseling and healing trades. (Also offered as Soc 888.) 4 cr.

889. SOCIOLOGY OF EDUCATION: RACE AND ETHNIC RELATIONS IN SCHOOLS AND SOCIETY

Ethnic stratification inside and outside the school. The schooling of whites and nonwhites. Issues of bilingualism, culture, and identity. (Also offered as Soc 889.) 4 cr.

Electrical and Computer Engineering

895. INDEPENDENT STUDY IN EDUCATION

Opportunity for intensive investigation of a special problem or issue in the field of education. Prereq: permission. 2-4 cr. May be repeated to a maximum of 8 cr.

899. THESIS

Prereq: permission of the department. 6-10 cr. Related Course in the School of Health Studies (SHS)

Related Course in the School of Health Studies

798. A-Z. SPECIAL TOPICS IN HEALTH STUDIES

A) Communication Disorders; B) Health Studies; C) Medical Technology; D) Nursing; E) Occupational Therapy; F) Physical Education; G) Recreation and Parks; K) Survey of Therapeutic Approaches to Developmental Disabilities (Interdisciplinary); H-J and L-Z) Interdisciplinary. Students may explore areas related to specific professional health interests. May repeat but not duplicate subject areas. Prereq: permission. 1-4 cr.

Electrical and Computer Engineering (E E)

Chairperson: Ronald R. Clark

PROFESSORS: Fletcher A. Blanchard, Ronald R. Clark, Albert D. Frost, Joseph B. Murdoch, Alden L. Winn
ASSOCIATE PROFESSORS: Glen C. Gerhard, Filson H. Glanz, Donald W. Melvin, John L. Pokoski, Kerwin C. Stotz, K. Sivaprasad
ASSISTANT PROFESSORS: L. Gordon Kraft, Paul J. Nahin, Dana B. Rogers
GRADUATE COORDINATOR: Glen C. Gerhard

To be admitted to graduate study in electrical engineering, a student should have completed a baccalaureate degree in electrical engineering or comparable training which included courses in mathematics and physical science, network theory, fields and waves, electronics, solid state circuits, semiconductor device theory, with appropriate laboratory experiences.

A minimum of 24 credits of coursework plus 6 credits of thesis or project are required for the master's degree. No specific course requirements are mandated; each candidate will meet with the departmental graduate committee to set up a program of study. Students are further required to demonstrate the ability to do independent and creative work by taking either E E 899 or 891-892. With the consent of the Graduate Committee, a student who has satisfied this requirement through industrial experience may substitute approved coursework.

E E 899 and 891-892 both involve equivalent independent theoretical and/or applied work under the guidance of a faculty member. The sequence 891-892 is to be completed in two consecutive semesters, with a letter grade given at the end of each semester. An interim report is submitted at the end of 891, and a final (oral and written) report at the end of 892. E E 899 requirements include the submission of a formal thesis suitable for binding. However, no two-semester time limit is imposed, and no interim or final letter grade is given.

Those who intend to undertake graduate work in electrical engineering must consult with the department graduate adviser in order to plan the program of study, since all courses are not given each year. Normally, a minimum of 12 credits of 800-level courses is required, not including 891-892 or 899.

The Electrical and Computer Engineering Department considers the development of professional communication skills, through a teaching assignment, a basic component of a graduate education. Every master's candidate is required to satisfactorily complete one year of E E 800 seminar; participation includes presentations as needed to satisfy the teaching requirements.

An interdepartmental Engineering Ph.D. Program is also available in the following areas of specialization: engineering system design, signal processing, theoretical and applied mechanics, and transport phenomena. Electrical engineering students would normally work in one of the first two areas. For details refer to the section entitled Engineering Ph.D. Program.

Since many graduate courses are given by demand, actual course offerings vary from semester to semester.

Areas of Specialization

The faculty of the Electrical and Computer Engineering Department has research interests in the following areas. Students in the M.S. Electrical Engineering or the Engineering Ph.D. program may select courses and research topics in these areas.

Biomedical and Clinical Engineering

Topics of study in these areas include biomedical instrumentation, computer applications to medical problems, patient safety, direct patient care, health delivery systems, and applications of signal processing and instrumentation techniques to medical areas.

A specialization in either of these areas may be elected by the student. Students specializing in Biomedical Engineering must complete E E 783, 784, and 836 plus approved professional electives. Students in Clinical Engineering, in addition to the courses listed above, complete one year of internship in the Clinical Engineering Center (E E 833-834). Additional details are available upon request.

Communications Systems and Information Theory

Areas of interest and activity include electromagnetic and acoustic wave technologies, and the identification of signals in the presence of noise through the use of coding, correlation, or optimal filtering. Related facilities for experiments extending from VLF to microwaves are available at a roof-top communications system for space, terrestrial, and ocean applications.

Computer Engineering and Digital Systems

Theoretical aspects of switching theory; systems that recognize patterns, learn, and exhibit intelligence; application of switching logic, design and interfacing of minicomputer peripherals; application of minicomputers to process control and bioelectronics. The Digital Systems Laboratory includes four minicomputers with magnetic tape units, teletype terminals, high speed paper tape units, AD and DA converters, graphics output, and interconnect capability with a TR-48 analog computer.

Control and Systems Engineering

Digital, hybrid, and analog computer control of industrial processes and systems. Discontinuous and fluidic control theory for industrial, marine, and oceanographic applications. Linear and stochastic analysis, synthesis techniques in the frequency domain, optimal control, and systems optimization.

Geophysical Sensing and Propagation

Ground-based electromagnetic techniques for probing of upper atmosphere and the ionosphere; electromagnetic pulse techniques for probing of ice, snow, and other material media. Wave propagation studies in weakly turbulent media such as the sea, the atmosphere, and plasmas. Acoustic probing of bottom and subbottom sediment in water.

Illumination Engineering

Design techniques for evaluating contrast rendition factor and equivalent sphere illumination; Inverse-square-law approximations for nonpoint light sources; design of daylighting systems; hand calculator programs for interior and exterior lighting design; lighting energy budgets.

Ocean Engineering and Instrumentation

Instrument systems (digital and analog) for measuring and recording physical, chemical, and biological parameters primarily associated with ocean behavior, e.g., temperature, pressure, and salinity measurements at midocean depths; wave height and direction determination; buoy performance as affected by waves and currents; remote sensing of the ocean surface; diver physiological data monitoring; and underwater acoustics.

Permission of instructor is required for enrollment in all electrical and computer engineering courses taken for graduate credit. 700-level courses are offered subject to adequate student demand.

620. ELECTRONICS AND INSTRUMENTATION

For nonengineering and nonphysics students; no mathematical or engineering detail. Techniques for using electronic instruments and equipment. DC and AC circuits, electronic amplifiers, grounding and shielding problems, transducers, electronic instruments, schematic reading, transients, noise problems, and digital techniques. Prereq: junior standing. 4 cr.

711. DIGITAL SYSTEMS

Advanced switching theory techniques (design of unclocked sequential circuits, minimization of multiple output circuits, etc.) and digital design tools (L.S.I., multiplexing, etc.). Applications. Prereq: intro to digital systems. Lab. 4 cr.

712. LOGICAL DESIGN OF DIGITAL COMPUTERS

Computer architectures, including arithmetic, memory, control, and input-output units; the trade offs between hardware, software, and cost. "Hands-on" laboratory experience with machine language programming, interfacing of peripherals, etc., on minicomputers and microcomputers. Prereq: intro to digital systems. Lab. 4 cr.

714. MINICOMPUTER APPLICATIONS ENGINEERING

Organization and operation of minicomputer-based systems. Interfacing of special purpose peripherals, data structures, control structures, program and data organization, microprogramming, real-time monitor systems. Applications to communication, automated-measurement, and process-control systems. Prereq: intro to digital systems; programming experience. Lab. 4 cr.

727. POWER SYSTEMS

Modeling and planning of electric power transmission systems. Prereq: electromechanical devices. 4 cr.

741. FLUID CONTROL SYSTEMS

Mathematical modeling of hydraulic, pneumatic, and fluidic control elements and control systems. Methods for 1) analysis of systems of using gases or liquids as the working fluid; 2) synthesis of the parameters of the control elements used in automatic control systems; 3) design of these systems. (Also offered as M E 741.) 4 cr.

Electrical and Computer Engineering

745. FUNDAMENTALS OF ACOUSTICS

Acoustic wave equation for air; law of reflection, refraction, and absorption; characteristics and measurement of acoustical sources; microphones; sound level; acoustical materials; ultrasonics; architectural acoustics. Prereq: one year general physics; differential equations. Lab. 4 cr.

757. FUNDAMENTALS OF COMMUNICATIONS

Communication systems, Fourier analysis of signals, AM and FM detection, digital and sampled-data signals, noise in electrical circuits. Lab. 4 cr.

758. COMMUNICATION SYSTEMS

Design of high-frequency communication systems. RF amplification, modulators for AM and FM systems, receiving techniques, antennas, free-space propagation, propagation characteristics of the ionosphere. Prereq: electromagnetic fields and waves; E E 757 or equivalent. Lab. 4 cr.

762. ILLUMINATION

Radiation; color and spectra; physics of light production; sources of ultraviolet, visible, and infrared energy; lamp circuitry; control of light; lighting design, applications of light in business, industry, school, home, and outdoors. Open to juniors and seniors in engineering and physics. Lab. 4 cr.

775. APPLICATIONS OF INTEGRATED CIRCUITS

Design and construction of linear and nonlinear electronic circuits using existing integrated circuits. Use of operational amplifiers. Laboratory course in practical applications of nondigital integrated circuit devices. 4 cr.

781. OCEAN INSTRUMENTATION PROJECT

Interdisciplinary solution of a real-world problem; measurements of physical, chemical, or biological parameters in an ocean or freshwater environment. Student team formulates system specifications, assembles components, and designs a test procedure for demonstrating the feasibility of the prototype system. Written final report and oral demonstration before a panel of invited experts. 4 cr.

782. CONTROL SYSTEMS

Fundamental principles involved in the design and analysis of feedback control systems. Topics include stability criterion, time-domain analysis, frequency-domain analysis, and introduction to nonlinear systems. Lab. (Also offered as M E 782.) 4 cr.

783. BIOMEDICAL ENGINEERING

Engineering applied to cardiovascular, renal, gastrointestinal, sensory, reproductive, and other organ systems. Design and utilization of diagnostic, monitoring, and prosthetic techniques and devices. Lab. 4 cr.

784. BIOMEDICAL INSTRUMENTATION

Principles of physiological and biological instrumentation design including transducers, signal conditioning, recording equipment, and patient safety. Laboratory includes the design and use of instrumentation for monitoring of electrocardiogram, electromyogram, electroencephalogram, pulse, and temperature. Current research topics, such as biotelemetry, ultrasonic diagnosis, and computer applications. Lab. 4 cr.

785. UNDERWATER ACOUSTICS

Vibrations, propagation, reflection, scattering, reverberation, attenuation, sonar equations, ray and mode theory, radiation of sound, transducers, and small- and large-signal considerations. 4 cr.

786. INTRODUCTION TO RADIO ASTRONOMY

Electromagnetic radiation, propagation. Positional astronomy and the radio sky, discrete radio sources, source-structure distribution, the sun as a radio source, flare and burst activity, planetary emissions, quasars, pulsars, techniques of observation and data reduction, radiometry, polarimeters, correlation interferometers, aperture synthesis. 4 cr.

796. SPECIAL TOPICS IN ELECTRICAL ENGINEERING

New or specialized courses and/or independent study. 2 or 4 cr.

800. GRADUATE SEMINAR

This course includes periodically scheduled seminars presented by outside speakers, UNH faculty, and graduate students. Topics will be in general areas of interest to electrical and electronics engineers. Participants will prepare and give presentations to satisfy teaching practice requirements. 0 cr. Cr/F.

801. ELECTROMAGNETIC FIELD THEORY

Maxwell's equations; plane wave propagation; reflection and refraction; guided wave propagation; wave guides; simple resonators; elements of microwave circuits, linear and aperture antennas, arrays of dipoles; receiving antennas. Prereq: electromagnetic fields and waves or equivalent. 3 cr.

802. ELECTROMAGNETIC WAVE THEORY

Selected advanced topics in electromagnetic wave theory taken from such areas as: antennas; propagation in various media; diffraction and scattering; microwave generation and waveguide propagation. Prereq: E E 801. 3 cr.

811. FUNDAMENTALS OF SIGNAL PROCESSING

Matrices and determinants, introductory graph theory. Laplace transforms, and pole-zero concepts, complex variable theory, convolution, concept of state, formulation and solution of state equations. 3 cr.

812. FILTER DESIGN AND SYNTHESIS

Network theoretical techniques basic to the design of electrical filters of various sorts. Approximation theory; driving point and transfer synthesis techniques; passive, active, and digital filters. Prereq: E E 811. 3 cr.

815. ADVANCED ACTIVE CIRCUITS

Investigation of devices and techniques used in advanced circuit design using discrete solid-state devices and integrated circuits. Oscillators, phase-locked systems, low noise techniques, etc. 3 cr.

820. ILLUMINATION DESIGN

Advanced illumination design; task visibility levels, bidirectional reflectance factors, contrast rendition factor, equivalent-sphere illumination, visual performance criteria, visual comfort probability, daylighting systems, inverse-square-law approximating techniques, luminaire effectiveness, and lighting energy budgets. Students write computer programs and lighting design projects. Prereq: E E 762 or equivalent experience. 3 cr.

833-834. PRACTICUM IN CLINICAL ENGINEERING

Seminars in medical equipment management; evaluation, testing, and standards; working experience in laboratory and in community hospitals in conjunction with the Clinical Engineering Center. Prereq: permission of instructor and director of CEC. A year-long continuous course; 3 credits each semester. "IA" grade (continuous course) will be given at the end of the first semester. 3 cr.

836. BIOMEDICAL ENGINEERING II

Applications of engineering in such areas as surgery, critical-care units, neurophysiology, biotelemetry, modeling, and interaction of waves with biological tissues. Prereq: E E 783 or equivalent. 3 cr.

839. STATISTICAL THEORY OF COMMUNICATIONS

Introduction to probability theory and random waveforms; optimum receiver principles. Random variables, random processes, correlation, power spectral density, sampling theory, and optimum decision rules. 3 cr.

840. INFORMATION THEORY

A continuation of E E 839. Information-theory concepts. Message sources, entropy, channel capacity, fundamentals of encoding, Shannon's theorems. Prereq: E E 839. 3 cr.

841. DIGITAL SIGNAL PROCESSING

Theory and practice of digital signal processing; elements of non-recursive and recursive digital filters, random number generators and simulation of time series, the fast Fourier transform, spectral estimation, envelopes and phases, modeling of time series. Samples of data from various physical experiments will be analyzed as student projects. Some exposure to programming is desirable. 3 cr.

842. DISCONTINUOUS CONTROL

Analysis and synthesis of feedback control systems operating on quantized information; compensation and performance improvement methods which use the quantized nature of the information are also developed. (Also offered as M E 842.) 4 cr.

844. NONLINEAR CONTROL SYSTEMS

Analysis and design of nonlinear control systems from the classical and modern viewpoints are discussed. Liapunov's stability theory; phase space methods; linearization techniques; simulation; frequency response methods; generalized describing functions; transient analysis utilizing functional analysis; and decoupling of multivariable systems. Prereq: E E 851. (Also offered as M E 844.) 4 cr.

851. ADVANCED CONTROL SYSTEMS I

State-space representation of multivariable systems; analysis using state transition matrix. Controllability and observability; pole placement using state and output feedback; Luenberger observers. Introduction to computer controlled systems (sampling, discrete state representation, hybrid systems), nonlinear analysis (Liapunov, Popov, describing function). Prereq: E E/M E 782. (Also offered as M E 851.) 3 cr.

852. ADVANCED CONTROL SYSTEMS II

Special topics in control theory: continuous and discrete systems; optimal control systems, including calculus of variations, maximum principle, dynamic programming, Wiener and Kalman filtering techniques, stochastic systems, adaptive control systems. Prereq: E E/M E 851. (Also offered as M E 852.) 3 cr.

Engineering Ph.D. Program

853. ARTIFICIAL INTELLIGENCE

Current approaches to machine intelligence and the simulation of human cognitive processes, including an introduction to recursive functions and programming with the LISP language. Heuristic programming, programs for game playing and natural language understanding, elementary theory of computability. Individual computer project required. Prereq: programming experience. (Also offered as C S 853.) 3 cr.

854. AUTOMATA THEORY

Formal languages and theoretical "machines" or automata. Formal grammars; context-dependent, context-free, and regular languages; finite state machines; and regular expression recognizers; infinite state machines; Turing machines; unsolvable problems and the halting problem; linear-bounded and push-down automata; cellular and reproducing automata. Prereq: programming experience. (Also offered as C S 854.) 3 cr.

856. SWITCHING THEORY

Combinational circuits—including functional decomposition, non-binary logic, and cellular networks. Sequential networks—including analysis, transient behavior, state reduction methods, state assignment, and synthesis. Prereq: E E 711. 3 cr.

860. COMPUTER ARCHITECTURE

Advanced topics in computer organization. Parallel and pipeline processing; associative and stack computers; microprogramming; virtual memory; current topics. Prereq: E E 712. 3 cr.

865. INTRODUCTION TO PATTERN RECOGNITION

Machine classification of data, feature space, clustering, linear separability, fictitious play algorithm, Braverman's hyperplane training and learning algorithm, learning and game playing computer programs that recognize patterns. Prereq: knowledge of computer terminal operation; BASIC language; probability and statistics or equivalents. 3 cr.

891-892. RESEARCH

3 cr.

898. INDEPENDENT STUDY

Independent theoretical and/or experimental investigation of an electrical engineering problem under the guidance of a faculty member. 1-3 cr.

899. MASTER'S THESIS

6 cr.

Engineering Ph.D. Program (Engr)

PROFESSORS: Fletcher A. Blanchard, Ronald R. Clark, Robert W. Corell, Stephen S.T. Fan, Stephen L. Fink, Albert D. Frost, Shan S. Kuo, Joseph B. Murdoch, Godfrey H. Savage, Charles K. Taft, Robin D. Willits, Tung-Ming Wang, Alden L. Winn, Asim Yildiz

ASSOCIATE PROFESSORS: Paul L. Bishop, Barbaros Celikkol, Glen C. Gerhard, Filson H. Glanz, Louis H. Klotz, David E. Limbert, Virendra K. Mathur, Donald W. Melvin, William Mosberg, P.J. Ossenbruggen, John L. Pokoski, Kondagunta Sivaprasad, Linda G. Sprague, Kerwin C. Stotz, Gail D. Ulrich, Russell L. Valentine, John A. Wilson

ASSISTANT PROFESSORS: Wendell S. Brown, Yen-Hsi Chu, Pedro A. DeAlba, Ihab H. Farag, D.L. Gress, L. Gordon Kratt, Paul J. Nahin, Dennis J. O'Brien, John A. Olofsson, Dana B. Rogers, Donald C. Sundberg, M. Robinson Swift

ENGINEERING Ph.D. COMMITTEE: Asim Yildiz, Glen C. Gerhard, Stephen S.T. Fan, Robert W. Corell

The interdepartmental engineering program offers graduate work leading to the degree of Doctor of Philosophy and is conducted by a combined engineering faculty. The program consists of areas of specialization within an interdepartmental structure, depending principally upon strengths in engineering, the engineering sciences, mathematics, and the physical sciences. An interdepartmental program is felt to be most meaningful since many contemporary engineering and scientific problems can be solved only through the cooperation of a variety of disciplines. Further, the boundaries between the classical disciplines in engineering and science have become less distinct. The particular advantage of the nondepartmental program structure is that improved communication and cooperation develop among faculty and students of the different disciplines resulting in more meaningful academic and professional experiences.

Areas of Specialization

The Engineering Ph.D. program includes the following four areas of specialization:

Engineering System Design: Robert W. Corell, chairperson

Students entering this area of the Engineering Ph.D. Program can elect either one of two professional directions. The first seeks to develop professionals with the technical expertise of a Ph.D. and with the ability to work with and direct groups of people working on large-scale technical projects. The second direction seeks to develop engineers with capabilities in the theory and analysis of large-scale complex systems. Concentration in an area of specific individual interest is combined with participation in a larger interdisciplinary project.

Current projects related to the area include coastal engineering, marine soil mechanics, submersibles and underwater habitats, ocean instrumentation, marine structures and buoy systems, arctic engineering, discontinuous control systems, vehicle and transportation systems, fluid power systems, nonlinear decoupling control, computer systems, vehicle dynamics, societal systems, facility systems, social and business systems, biomedical systems and instrumentation, and environmental engineering.

Signal Processing: Glen C. Gerhard, chairperson

This area of specialization is concerned with those analytic and experimental techniques that are involved in some aspect of the acquisition, detection, identification, analysis, or control of signals. In this context a signal is defined as any quantity which contains or conveys information. While the majority of signal processing systems are partially or wholly electrical in nature, many of the basic aspects of signal processing and utilization are common to a wide range of problems and applications in communications, medicine, environmental modeling, instrumentation, and control.

Current research areas include: acoustics, biomedical systems and instrumentation, computer and digital systems, digital signal processing, energy and power systems control, fluidics, geophysical sensing, lighting design, nonlinear interacting system control, signal propagation, and systems modeling.

Theoretical and Applied Mechanics: Asim Yildiz, chairperson

Treated as an engineering science, this area brings together those aspects of engineering, physics, and applied mathematics that are relevant to the understanding and application of the dynamical and equilibrium behavior of materials and structures. Included are the fields of solid mechanics, structural mechanics, classical and continuum mechanics, rheology, theoretical soil mechanics, biomechanics, elastodynamics, and acoustics.

Current research topics include macro- and micromechanics of composite-material behavior, wood-fiber mechanics, viscoelastic material properties, structural dynamics, dynamics of ocean structures, structural optimization, elastodynamics, elastic wave propagation, scattering of elastic waves, electromagnetic wave propagation, theoretical soil mechanics, nonlinear dynamics, ocean engineering, ocean subbottom resources, oceanography, acoustic determination of the properties of layered media, Cosserat fields, dislocation theories, hydrodynamic turbulence, random vibrations, and estuary modeling.

Transport Phenomena: Stephen S.T. Fan, chairperson

This area deals with the subjects of fluid mechanics, heat transfer, mass transfer, and coupled phenomena in such areas. In addition to their fundamental role in traditional engineering activities, transport-phenomena studies are making significant contributions in the areas of energy production and utilization, environmental control, oceanography, space exploration, and biomedical engineering.

Current research activities include solar energy, new energy sources, pollution control, biomedical engineering, combustion, adsorption, heat transfer with phase change, liquid pumping cavitation, vortex flow, coal liquefaction and particle formation, and polymer processing.

Requirements

Qualified students with bachelor's or master's degrees in engineering, mathematics, or the physical sciences are eligible for admission to the program. To be admitted, a student must present evidence that s/he has sufficient background in the area in which s/he proposes to specialize.

Following entrance into the program, a guidance committee will be appointed for the student by the dean of the Graduate School upon recommendation of the chairperson of the student's area. This committee will assist the student in outlining the program and in preparing for the qualifying examination and may require him/her to take specified course work, with or without credit. The committee will also conduct an annual in-depth review of the student's progress, through written and/or oral examinations, and following the substantial completion of the student's coursework, will administer the qualifying examination. This committee is also responsible for administering any language examination and/or research tool proficiency requirements that are required of the area of specialization.

Upon the successful completion of the qualifying examination and other proficiency requirements, a doctoral committee will be appointed by the dean of the Graduate School upon the recommendation of the chairperson of the student's area. The doctoral committee shall conduct an annual review of the student's progress, supervise and approve the doctoral dissertation, and administer the final examination.

To obtain a Ph.D. degree in engineering, a student must meet all of the general requirements as stated under Regulations of the Graduate School. A student will normally be required to either demonstrate the ability to read scientific and technical literature in an approved foreign language or demonstrate a facility in one or more special "tool of research" techniques. The student, depending on his/her educational objectives, may also be required by the guidance committee to undertake a classroom teaching experience. To complete the Ph.D. degree in engineering a student will normally be expected to take coursework equivalent to two full-time academic years beyond the baccalaureate and to complete a dissertation that will require at least one full-time year of study and original research. Specific course requirements have been established for each area of specialization. All these requirements should normally be completed by the end of the second year of full-time graduate study, and must be completed before the student can be advanced to candidacy.

English

Course Requirements

Coursework requirements will be developed on an individual basis by each student's guidance committee. Since each area of specialization has its own specific course requirements, an interested student should contact the area chairperson to determine the particular coursework and research activity that may be applicable to his/her educational goals.

Except for Doctoral Research (999), students will follow a program of study consisting of courses from within the chemical, civil, electrical, and mechanical engineering departments, many of which have been established particularly for this program, and from related departments appropriate to the student's needs. A student should consult specific course offerings and descriptions.

999. DOCTORAL RESEARCH

English (Engl)

Chairperson: Jean E. Kennard

PROFESSORS: Thomas A. Carnicelli, Carl Dawson, Lewis C. Goffe, Robert Hapgood, Jean E. Kennard, Edmund G. Miller, Donald M. Murray, Philip L. Nicoloff, John C. Richardson, Mark R. Smith, Thomas A. Williams, John A. Yount

ASSOC. PROFESSORS: Michael DePorte, Karl Diller, Elizabeth H. Hageman, Gary H. Lindberg, Terence P. Logan, Andrew H. Merton, Susan M. Schibanoff, Charles Simic

ASST. PROFESSORS: Mary M. Clark, Lester A. Fisher, Melody G. Graulich, Thomas R. Newkirk, Hugh M. Potter III, David V. Siddall, David G. Watters, Ronald A. Winslow, Jr.

The Department of English offers three advanced degrees, Master of Arts, Master of Science for Teachers, and Doctor of Philosophy. All applicants are required to submit Graduate Record Examination scores for the Aptitude Test and the Advanced Test of Literature in English. Applicants for the Ph.D. are normally expected to have a reading knowledge of at least one foreign language.

Master of Arts Programs

Master of Arts in Literature

The Master of Arts may be undertaken as a terminal degree or as preparation for a doctoral program. The program encourages students to pursue their individual interests and to correct deficiencies in their undergraduate training.

An M.A. candidate must pass eight four-credit courses. Six courses, including at least three seminars and either Engl 895 or 896, must be at

the 800 level. At least four courses must be in English or American literature (as distinct from courses in critical analysis, linguistics, writing, teaching methods, or other literatures). Each M.A. candidate must pass at least one course in the English language or in the teaching of composition. As a general rule, all courses counting toward the M.A. degree should be taken in the English department. In special circumstances, however, a student may be allowed to apply toward the degree up to two graduate courses offered by other departments. For students planning a teaching career, the department requires at least one semester of teaching experience (subject to availability of funds).

An M.A. candidate must pass a reading examination in one of the following languages: French, German, Greek, Italian, Latin, Russian, Spanish. Each candidate for the M.A. degree must register for four credits of English 895 or 896 and produce a substantial scholarly paper.

Master of Arts in Writing

The Master of Arts in Writing is designed for students who intend to become professional writers. Seven working writers supervise the program. Students may elect to specialize in fiction, nonfiction, or poetry. Each member of the writing faculty is accomplished in at least one of these fields.

The writers at UNH emphasize conference teaching. Each student meets frequently with writers specializing in the student's area of study. In addition, each student works closely with a writer-adviser throughout the program.

Workshop courses provide forums for prompt, detailed criticism of each student's writing by instructors and fellow students. Each student takes at least two workshops in his or her specialty and may elect to take an additional workshop in another area as well. Form-and-theory courses and literature courses complete the program.

Upon completion of the required courses the student submits a portfolio of writing to the staff. The portfolio might consist of short stories, a novel, nonfiction articles, nonfiction book, or a collection of poetry. The degree is awarded upon approval of the portfolio by a committee of writers. There is no foreign language requirement.

Master of Arts in English Language and Linguistics

Students who wish to specialize in any of the various areas of English language and linguistics may design an M.A. program to meet their interests. Specialties include Applied Linguistics and the Teaching of English as a Second Language as well as the traditional subfields of linguistics. Psycholinguistics courses are offered through the psychology department.

To earn the M.A. degree, students must complete at least seven four-credit courses, including two seminars, plus an independent study course leading to a scholarly paper. Unless the student already has a strong background in linguistic theory, the program of study must include one course in phonetics and phonology (Engl 893) and one in

syntax and semantics (Engl 894). Reading knowledge of one foreign language is required. The student's course of study must be approved by the program advisor.

Master of Arts with an Emphasis on Junior College Teaching

This is a special M.A. program designed for students committed to junior-college teaching. Regular graduate courses, specially designed seminars, and teaching internships are features of the program. A candidate must pass a reading examination in a foreign language or take a course in applied linguistics. Further details are available from the secretary for graduate programs, Department of English.

Master of Science For Teachers

The Master of Science for Teachers is designed for high school teachers. No foreign language is required. The student must pass eight 4-credit courses in English, numbered 700 and above, normally including at least one course in the teaching of writing and in the study of language, which will not be a repetition of undergraduate work. Applicants should consult the General Regulations of the Graduate School for the special admissions requirements for this program.

Doctor of Philosophy

To be admitted to the Ph.D. program, the student must hold an M.A. degree or be in the final stage of completing requirements for the degree.

The Ph.D. program offers professional training in the teaching of literature and language. The program combines the essential guidance and discipline of coursework with the equally essential freedom of independent study and research. Accordingly, in the first year the student is encouraged to follow a program suited to individual interests and needs. In addition to meeting course requirements, each student must pass: 1) reading examinations in two foreign languages (French, German, Greek, Italian, Latin, Russian, Spanish); 2) after preliminary work for the Ph.D. degree, a general examination; and 3) a later qualifying examination in three areas related to his/her proposed dissertation and projected teaching specialties. A student must also write a dissertation and defend it at a final oral examination.

M.A. and Ph.D. students holding assistantships teach under supervision; such teaching is considered a vital part of the student's professional training. At least a year of intern teaching or its equivalent is required of all doctoral candidates.

Graduate students should note that not all seminars are offered every year. A detailed guide to the department's programs is available from the secretary for graduate programs, Department of English.

See English department brochure for detailed descriptions of current course offerings.

701, 702/801, 802. ADVANCED WRITING OF FICTION

Workshop discussion of advanced writing problems and readings of students' fiction. Individual conferences with instructor. Prereq: Writing Fiction or equivalent. Written permission of instructor required for registration. May be repeated for credit with the approval of the department chairperson. 4 cr.

703, 704/803, 804. ADVANCED NONFICTION WRITING

A workshop course for students intending to write publishable magazine articles or nonfiction books. Equal stress on research and writing techniques. Prereq: Newswriting. Written permission of instructor required. May be repeated for credit with the approval of the department chairperson. 4 cr.

705, 706/805, 806. ADVANCED WRITING OF POETRY

Workshop discussion of advanced writing problems and submitted poems. Individual conferences with instructor. Prereq: Writing Poetry or equivalent. Written permission of instructor required for registration. May be repeated for credit with the approval of the department chairperson. 4 cr.

707/807. FORM AND THEORY OF FICTION

A writer's view of the forms, techniques, and theories of fiction. The novels, short stories, and works of criticism studied will vary, depending on the instructor. 4 cr.

708/808. FORM AND THEORY OF NONFICTION

A writer's view of contemporary nonfiction, emphasizing the choices the writer faces in the process of research and writing. 4 cr. (Not offered every year.)

709/809. FORM AND THEORY OF POETRY

A writer's view of the problems, traditions, and structures of poetry. 4 cr.

710/810. TEACHING WRITING

An introduction to various methods of teaching writing. Combines a review of theories, methods, and texts with direct observation of teaching practice. 4 cr.

712. CRITICAL ANALYSIS OF EXPOSITION

For the English-teaching major; students analyze essays and write nonfiction prose. Variety of critical approaches; several methods of teaching composition. 4 cr. (Not offered every year.)

English

713, 714/813, 814. LITERARY CRITICISM

Major critics from Plato to the present; the chief critical approaches to literature. 4 cr. (Not offered every year.)

715/815. APPLIED LINGUISTICS

Methods of teaching and learning foreign languages; background work on theories of language acquisition; the methodology of teaching English as a second language. Students interested in teaching other languages may do their projects on those languages. 4 cr.

716/816. PROBLEMS IN APPLIED LINGUISTICS

Variable topics course; problems such as language acquisition in children and adults, bilingualism, and linguistic field methods. 4 cr. (Not offered every year.)

718/818. ENGLISH LINGUISTICS

Introduction to the study of language; dialects and social and psychological problems of language; intensive work on the techniques of modern grammar (syntax, phonology, semantics). 4 cr. (Not offered every year.)

719. ENGLISH GRAMMAR

Traditional and contemporary approaches to the study of the structure of the English language: its history, phonology, morphology, syntax including consideration of parts of speech, phrases, clauses, sentences, etymology, punctuation. Some emphasis on the teaching of English grammar. 4 cr.

720. NEWSPAPER INTERNSHIP

Students intending to pursue careers in journalism spend a semester working full- or part-time for a daily newspaper under close supervision of editors. Reporting is stressed, but students may do some editing as well. The number of internships is very limited. Prereq: Newswriting or equivalent; permission. 4-16 cr.

741/841. LITERATURE OF EARLY AMERICA

Prose and poetry of the periods of exploration, colonization, early nationalism, Puritanism, Enlightenment. Individual works and historical-cultural background. 4 cr. (Not offered every year.)

742/842. AMERICAN LITERATURE, 1815-1865

Fiction, nonfiction, and poetry in the period of romanticism, transcendentalism, nationalism. Individual works and cultural background. 4 cr. (Not offered every year.)

743/843. AMERICAN LITERATURE, 1865-1915

Fiction, nonfiction, and poetry in the period of realism, naturalism, industrialism, big money. Individual works and cultural background. 4 cr.

744/844. AMERICAN LITERATURE, 1915-1945

Fiction, poetry, and drama in the period of avant-garde and leftism, jazz age, and depression. Individual works and cultural background. 4 cr.

745/845. CONTEMPORARY AMERICAN LITERATURE

A gathering of forms, figures, and movements since 1945. Individual works and cultural background. 4 cr.

746/846. STUDIES IN AMERICAN DRAMA

Topics vary from year to year. Examples: 20th-century American drama; contemporary playwrights; theatricality in American life. 4 cr. (Not offered every year.)

747/847. STUDIES IN AMERICAN POETRY

Topics vary from year to year. Examples: poets of the open road; Pound and his followers; major American poets; contemporary American poetry. 4 cr. (Not offered every year.)

748/848. STUDIES IN AMERICAN FICTION

Topics vary from year to year. Examples: the romance in America; the short story; realism and naturalism; the city novel; fiction of the thirties. 4 cr.

749/849. MAJOR AMERICAN AUTHORS

Intensive study of two or three writers. Examples: Melville and Faulkner; Fuller, Emerson, and Thoreau; James and Wharton; Dickinson and Frost. 4 cr.

750/850. SPECIAL STUDIES IN AMERICAN LITERATURE

Topics vary from year to year. Examples: the Puritan heritage; ethnic literatures in America; landscape in American literature; five American lives; pragmatism; American humor; transcendentalism; women regionalists. 4 cr.

751/851. MEDIEVAL EPIC AND ROMANCE

The two major types of medieval narrative; comparative study of works from England, France, Germany, and Iceland, including *Beowulf*, *Song of Roland*, *Nibelungenlied*, *Gottfried's Tristan*, *Njal's Saga*, and *Malory's Morte d'Arthur*. All works read in modern English translations. 4 cr. (Not offered every year.)

752/852. HISTORY OF THE ENGLISH LANGUAGE

Evolution of English from the Anglo-Saxon period to the present day. Relations between linguistic change and literary style. 4 cr. (Not offered every year.)

753/853. OLD ENGLISH

Introduction to Old English language and literature through the readings of selected poetry and prose. 4 cr.

754/854. BEOWULF

A reading of the poem and an introduction to the scholarship. Prereq: Engl 753. 4 cr.

755, 756/855, 856. CHAUCER

755: *Troilus and Criseyde*, in the context of medieval continental literature by Boccaccio and other influences.

756: *The Canterbury Tales*. 4 cr.

758/858. SHAKESPEARE

A few plays studied intensively. Live and filmed performances included as available. 4 cr.

759/859. MILTON

Milton and his age. Generous selection of Milton's prose and poetry, with secondary readings of his sources and contemporaries. 4 cr. (Not offered every year.)

763/863. CONTINENTAL BACKGROUNDS OF THE ENGLISH RENAISSANCE

Major philosophers, artists, and writers of the continental Renaissance (in translation): Petrarch, Ficino, Pico, Vives, Valla, Castiglione, Machiavelli, Luther, Calvin, Rabelais, Montaigne, Cervantes, Erasmus, and Thomas More, as representative of the early English Renaissance. 4 cr. (Not offered every year.)

764/864. PROSE AND POETRY OF THE ELIZABETHANS

Shakespeare and his contemporaries. Major works, including Spenser's *Fairie Queene*, Sidney's *Astrophil and Stella*, Shakespeare's *Sonnets*; Marlowe's *Dr. Faustus*: their literary and intellectual backgrounds. 4 cr. (Not offered every year.)

765. ENGLISH LITERATURE IN THE 17TH CENTURY

Major writers of the 17th century, including Donne, Jonson, Herbert, Bacon, and Hobbes. 4 cr. (Not offered every year.)

767, 768/867, 868. LITERATURE OF THE RESTORATION AND 18TH CENTURY

Representative works; text studied closely; the ways they reflect the central intellectual problems of their age. 767: Dryden, Rochester, Restoration plays, Bunyan, Defoe, Montesquieu, and Swift. 768: Pope, Fielding, Johnson, Boswell, Voltaire, Sterne, Rousseau, Beckford, Diderot, and Blake. 4 cr.

769, 770/869, 870. THE ENGLISH ROMANTIC PERIOD

Major literary trends and authors, 1798 to 1832. Focus on poetry but attention also to prose works and critical theories. 769: Wordsworth, Coleridge, Lamb, Hazlitt, DeQuincey; 770: Byron, Shelley, Keats. 4 cr. (Not offered every year.)

771, 772/871, 872. VICTORIAN PROSE AND POETRY

Major writers; social and cultural history. Typically included in 771, Carlyle, Ruskin, Newman, Tennyson, Browning, and others; in 772, Arnold, the pre-Raphaelites, Swinburne, Hopkins, and others. 4 cr. (Not offered every year.)

773, 774/873, 874. BRITISH LITERATURE OF THE 20TH CENTURY

Poets and novelists; the concept of modernity in literature. Offerings vary by year and by instructor, but normally include such figures as Joyce, Lawrence, Yeats, Woolf, Forster, and more contemporary writers such as Burgess, Fowles, Murdoch, and Golding. 4 cr.

775/875. IRISH LITERATURE

Survey from the beginnings to the present; works in Irish (read in translation) such as *The Cattle Raid of Cooley*, medieval lyrics, and *Mad Sweeney*; and works in English from Swift to the present. Twentieth-century authors: Joyce, Yeats, Synge, O'Casey, Beckett, and Flann O'Brien. 4 cr. (Not offered every year.)

778/878. BRAIN AND LANGUAGE

An introduction to neurolinguistics, a study of how language is related to the structure of the brain. The biological foundations of linguistic universals and language acquisition. Examination of evidence from aphasia and from normal language use. 4 cr.

779/879. LINGUISTIC FIELD METHODS

Devoted to the study, with use of an informant, of some non-Indo-European language that is unfamiliar to both the students and the instructor at the beginning of the class. The primary aim of the course is to give students a practical introduction to linguistic analysis without the support of a text. Theoretical concepts will be introduced as needed. 4 cr.

781/881. ENGLISH DRAMA TO 1800

Development from the Middle Ages through the 18th century, emphasizing the Elizabethan-Jacobean contemporaries of Shakespeare (Marlowe, Jonson, Webster). Selected plays from the middle ages, the Restoration period, and the 18th century. 4 cr. (Not offered every year.)

English

782/882. MODERN DRAMA

Major English, American, and (translated) European plays of the modern period by such playwrights as Shaw, Ibsen, Chekhov, Strindberg, Pirandello, O'Neill, Brecht, Beckett, Williams, Miller, Pinter. Live and filmed performances studied as available. 4 cr. (Not offered every year.)

783/883. THE ENGLISH NOVEL OF THE 18TH CENTURY

The rise and development of the novel through study of selected major works by Defoe, Richardson, Fielding, Smollett, Sterne, and Austen. 4 cr.

784/884. THE ENGLISH NOVEL OF THE 19TH CENTURY

Representative novels from among Austen, Scott, Dickens, Thackeray, Emily Bronte, Charlotte Bronte, Trollope, George Eliot, Hardy, and Conrad. 4 cr.

785/885. MAJOR WOMEN WRITERS

Intensive study of one or more women writers. Selections vary from year to year. 4 cr.

790/890. SPECIAL TOPICS IN LINGUISTIC THEORY

An advanced course on a topic to be chosen by the instructor. Inquire at the English Department office for a full course description each time the course is offered. Topics such as Dialectology, Montague Grammar, African Linguistics, Linguistics and Literature, Metrics, Cross-disciplinary studies relating to linguistics. Barring duplication of subject, may be repeated for credit. 4 cr.

791-792. ENGLISH EDUCATION—PROBLEMS IN THE TEACHING OF HIGH SCHOOL ENGLISH

Methods and techniques in teaching language, composition, and literature in grades 7-12. Required of all students in the English teaching major. Open to others with permission. No credit toward the English major. 2 cr.

793/893. PHONETICS AND PHONOLOGY

The sounds and sound systems of English in the context of linguistic theory: comparisons of English to other languages. Prereq: a basic linguistic course or permission. 4 cr. (Not offered every year.)

794/894. SYNTAX AND SEMANTIC THEORY

The relationship of grammar and meaning as viewed from the standpoint of modern linguistic theory. Emphasis on the syntax and semantics of English, with special attention to the construction of arguments for or against particular analyses. Prereq: a basic linguistic course or permission. 4 cr.

795, 796. INDEPENDENT STUDY

Open to highly qualified juniors and seniors. To be elected only with permission of the department chairperson and of the supervising faculty member or members. Barring duplication of subject, may be repeated for credit up to a maximum of 16 credits. 1-16 cr.

797, 798/897, 898. SPECIAL STUDIES IN LITERATURE

A) Old English Literature; B) Medieval Literature; C) 16th Century; D) 17th Century; E) 18th Century; F) English Romantic Period; G) Victorian Period; H) 20th Century; I) Drama; J) Novel; K) Poetry; L) Nonfiction; M) American Literature; N) A Literary Problem. The precise topics and methods of each section will vary. Barring duplication of subject, may be repeated for credit. For details, see the course descriptions available in the English department. 4 cr.

817. SEMINAR IN TEACHING WRITING

Review of the current professional literature on composition; research projects in areas selected in consultation with instructor. Prereq: Engl 810 or permission. 4 cr.

820. SEMINAR IN LINGUISTICS

4 cr.

821. SEMINAR—STUDIES IN OLD ENGLISH

4 cr.

824. SEMINAR—STUDIES IN MEDIEVAL LITERATURE

4 cr.

825. SEMINAR—STUDIES IN 16TH-CENTURY LITERATURE

4 cr.

827. SEMINAR—STUDIES IN SHAKESPEARE

4 cr.

828. SEMINAR—STUDIES IN MILTON

4 cr.

829. SEMINAR—STUDIES IN EARLY 17TH-CENTURY LITERATURE

4 cr.

830. SEMINAR—STUDIES IN 18TH-CENTURY LITERATURE

4 cr.

832. SEMINAR—STUDIES IN THE ROMANTIC PERIOD

4 cr.

833. SEMINAR—STUDIES IN THE VICTORIAN PERIOD

4 cr.

834. SEMINAR—STUDIES IN 20TH-CENTURY BRITISH LITERATURE

4 cr.

837. SEMINAR—STUDIES IN 19TH-CENTURY AMERICAN LITERATURE

4 cr.

838. SEMINAR—STUDIES IN 20TH-CENTURY AMERICAN LITERATURE

4 cr.

839. PROBLEMS IN TEACHING ENGLISH

Special topics in teaching within the discipline of English. Inquire at the department to see what topics in the teaching of literature, language, or writing may be scheduled. Open only to graduate students with a professional interest in teaching or to practicing teachers. 1-6 credits depending on the specific course.

840. SEMINAR—STUDIES IN ENGLISH DRAMA

4 cr.

895, 896. READING AND RESEARCH

Graduate faculty. 4 or 8 cr.

899. MASTER'S THESIS

6 cr.

999. DOCTORAL RESEARCH**Entomology (Ento)**

Chairperson: G. Thomas Fisher

PROFESSOR: Robert L. Blickle

ASSOCIATE PROFESSORS: James S. Bowman, G. Thomas Fisher, R. Marcel Reeves

ASSISTANT PROFESSOR: John F. Burger

For admission to graduate study in entomology an applicant is expected to have at least the basic (Ento 402) course in entomology as well as adequate preparation in the allied sciences of chemistry, botany, and zoology. Students lacking the necessary background courses may be required to complete certain of these courses which do not carry credit before they are admitted to full candidacy for a degree.

The program of graduate study is designed to meet the needs of those students planning to take further work leading to a career in professional entomology. Areas of specialization include taxonomy, ecology, ethology, biological control, pest management, chemical control, problems in medical entomology, forest entomology, and agricultural entomology. A thesis is required of all candidates for the master's degree. An oral examination on the thesis is required. Students are given the opportunity to assist the professional staff in field research and as laboratory assistants, and they are also encouraged to attend professional meetings in their appropriate fields.

No language requirements are made for the M.S. degree.

704. MEDICAL ENTOMOLOGY

Especially for students interested in public health or medicine. Insects and arachnids in relation to public health; the biology and control of important disease carriers. Lab. 4 cr.

705. TAXONOMY OF INSECTS

Concepts, history, procedure, nomenclature, and use, as applied to a selected taxon. Prereq: permission. 4 cr.

706. SOIL ARTHROPODS

Biology and systematics of terrestrial arthropods, with emphasis on the springtails, sowbugs, myriapods, mites, spiders, and other arachnids. Prereq: permission. Mr. Reeves. Lab. 4 cr.

707. IMMATURE INSECTS

Identification of immature stages of insects, especially of holometabolus orders. Aquatic forms not included. Morphological features necessary for determination. Prereq: permission. 4 cr.

708. INSECT MORPHOLOGY

External and internal anatomy of insects. Prereq: permission. 4 cr.

709. AQUATIC INSECTS

Identification and biology of aquatic forms of insects. Prereq: permission. 4 cr.

710. INSECT PHYSIOLOGY

Integration of insect structure and functions at the cellular, tissue, and organ levels. Mr. Burger. 4 cr. (Not offered every year.)

720. AGRICULTURAL ENTOMOLOGY

For advanced students interested in agribusiness. Economic insect pests on forage, fruit, and vegetable crops. Life cycles; damage and current methods of control. Prereq: permission. Mr. Fisher. Lab. 4 cr.

Genetics Program

721. PRINCIPLES OF BIOLOGICAL CONTROL

Natural and applied aspects of biological control of insect and plant pests. Prereq: permission. Mr. Reeves. 4 cr. (Not offered every year.)

722. CHEMICAL CONTROL OF INSECTS

For advanced students in applied entomology. Review of the chemical compounds for insect control. Modes of pesticide entry; toxicology. Basic understanding of chemistry is desired. Prereq: permission. Mr. Fisher. Lab. 4 cr.

723. REGULATORY PEST CONTROL

For students preparing for careers dealing directly with or associated with the movement of agricultural commodities in internal and foreign trade. Legal documents; federal and state statutes. Prereq: basic entomology and plant pathology courses; permission. 2 or 4 cr. (Not offered every year.)

724. STRUCTURAL PEST CONTROL

For students wishing to study household and industrial entomology. Prereq: permission. Mr. Fisher. Lab. 4 cr.

801, 802. GRADUATE ENTOMOLOGY

Concentrated studies in insect biology, systematics, and biological control or chemical control of insects. Mr. Reeves, Mr. Burger, Mr. Fisher, and Mr. Bowman. Subject matter, hours, and credits to be arranged.

805. INSECT ECOLOGY

Role of insects in: coevolution of plant-herbivores and predator/parasite-prey, ecosystem energetics, population dynamics, niche theory, competition, coexistence, diversity, and stability. Prereq: permission. Mr. Burger, Mr. Reeves. 4 cr.

897, 898. ENTOMOLOGY SEMINAR

Selected topics and current developments. Required of all graduate entomology students. May be repeated. Staff. 1 cr.

899. GRADUATE ENTOMOLOGY—MASTER'S THESIS

Mr. Burger, Mr. Fisher, Mr. Reeves, and staff. Hours and credits to be arranged. 6-10 cr.

Genetics Program (Gen)

Chairperson: Owen M. Rogers

PROFESSORS: James P. Barrett, Walter M. Collins, Gerald M. Dunn, Donald M. Green, Harold W. Hocker, Jr., Frank K. Hoornebeek, Lincoln C. Peirce, Owen M. Rogers

ASSOCIATE PROFESSORS: Thomas P. Fairchild, Yun Tzu Kiang, J. Brent Loy, Willard E. Urban, Jr., Robert M. Zsigray

ASSISTANT PROFESSOR: R.T. Eckert

ADJUNCT ASSISTANT PROFESSOR: Peter W. Garrett

The interdepartmental Genetics Program offers graduate work leading to the degrees of Master of Science and Doctor of Philosophy.

A qualified student is admitted to the program with the approval of the genetics faculty and the chairperson of the department in which s/he has a major interest. Undergraduate preparation should include mathematics through calculus, chemistry through organic, physics, animal or plant biology courses and laboratories, and genetics with laboratory. Preparation in statistics and computer science is desirable. All students will be examined shortly after they arrive in order to diagnose their preparation in basic genetics. Students lacking the appropriate preparation may be admitted but will be required to complete certain courses without graduate credit. The Aptitude section of the Graduate Record Examination is required.

The program is conducted by faculty members from animal sciences, biochemistry, the Institute of Natural and Environmental Resources, microbiology, plant science, and zoology, as well as faculty from the Agricultural Experiment Station and the U.S. Forest Service, Northeastern Forest Experiment Station.

The core curriculum in genetics requires students in the Ph.D. program to take a minimum of one course from each of the following groups of courses: 1) Population Genetics—Introductory course, Gen 705; 2) Molecular Genetics—Biochemical Genetics, Gen 770; Microbial Genetics, Micr 804; Regulation of Gene Expression, PISc 803; 3) Classical Genetics—Plant Genetics, PISc 851; Cytogenetics, PISc 853; Quantitative Genetics, AnSc 811; Human Genetics, Zool 707. All students are required to participate in a one-year directed teaching experience and are required to attend genetics seminars.

The requirements for the M.S. candidates will be a minimum of one course from each of any two of the above three groups of courses.

Master of Science Degree

The program for the Master of Science degree is formulated by the student with the approval of the guidance committee. Candidates for the degree will be required to complete a thesis, pass an oral examination covering graduate courses and thesis, and complete courses designated in the core curriculum.

Doctor of Philosophy Degree

The chairperson of the Genetics Program, with the concurrence of the chairperson of the department of major interest, will nominate the student's guidance and doctoral committees which will administer the qualifying and final examinations. Specific course requirements will be developed by the student and the guidance committee, and will include the courses in the core curriculum. Students must complete a dissertation on original research in genetics.

The guidance committee for each graduate student will determine whether a foreign language will be required.

705. POPULATION GENETICS

Population growth and regulation; distribution of genes; factors affecting gene frequency; genetic variation and genetic load; cost of natural selection; ecological genetics. Prereq: prin of genetics; appl statistics; /or permission. Mr. Kiang. 4 cr. (Offered Spring 1980.)

740. EVOLUTIONARY BIOLOGY

Synthetic theory of evolutionary processes in the origin of life, species, and higher groups; sources of genetic variability, population structure, causes of evolution; ecological adaptations in animals, plants, and man; evolution of communities; molecular evolution and rate of evolution. Prereq: prin of genetics or permission. Mr. Kiang. 4 cr. (Not offered every year.)

770. BIOCHEMICAL GENETICS

Mechanisms of storage, replication, transmission, transcription, recombination, mutation, and expression of genetic information by cells and viruses. Prereq: Bchm 751 or permission. Mr. Green. 4 cr. (Not offered every year.)

802. DESIGN OF EXPERIMENTS

The philosophy of experimental design and how it relates to standard statistical designs. Topics include the roles of replication and randomization, factorially arranged treatments, latin squares, incomplete nonfactorial designs, fractional replication and confounding, and crossover designs. Mr. Urban. Prereq: FoRs 711; Digital Computer Systems; /or permission. 3 cr. (Not offered every year.)

812. ADVANCED STATISTICAL METHODS

Methods and techniques for handling typical problems which arise in the analysis of data. Topics include the multiple comparison of means, analysis of unweighted means, proportional subclass numbers, weighted squares of means, orthogonal polynomials, and least squares. Mr. Urban. Prereq: FoRs 711; Digital Computer Systems; /or permission. 3 cr. (Not offered every year.)

895, 896. SPECIAL TOPICS IN GENETICS

Intended for study in specialty areas not ordinarily included in other courses. May involve formal classes, discussions, or independent investigations. Prereq: permission of staff concerned. 2-4 cr.

898. GENETICS SEMINAR

Presentation and discussion of selected genetic topics. Staff. 1 cr. (May be repeated.)

899. MASTER'S THESIS

6-10 cr.

999. DOCTORAL RESEARCH

Courses Available in Related Areas

These courses are fully described below and under the course descriptions of the appropriate department for the convenience of the student.

Animal Sciences

711. COMPARATIVE ANIMAL GENETICS

How heredity affects domestic animals, poultry, other mammals, and fish; emphasis on the organism and population. Quantitative inheritance; principles of selection; disease resistance; statistical and experimental techniques. Prereq: 4 cr. of genetics; /or permission. Mr. Collins. Lab. 4 cr.

812. QUANTITATIVE GENETICS AND SELECTION

Gene frequency, genetic and environmental variation, heritability, fitness, selection, inbreeding, outbreeding, correlated characters. Mr. Collins. Prereq: one course each in genetics and statistics. 3 cr. (Not offered every year.)

Institute of Natural and Environmental Resources

711. STATISTICAL METHODS II

Intermediate course in statistics; basic concepts of sampling, linear models and analyses for one-way and multiway classification, factorial arrangement of treatments, multiple regression, and covariance. Computer programs used in analyzing data. Examples from environmental sciences. Prereq: Applied Statistics I; /or equivalent. Mr. Barrett. 4 cr.

History

Forest Resources

720. FOREST GENETICS

Genetics of forest tree improvement; variation in natural populations, breeding methods, physiological characters, quantitative data analysis. Prereq: Principles of Genetics; Silviculture; /or permission. Transportation fee. Mr. Eckert. Lab. 3 cr. (Not offered every year.)

Microbiology

804. MICROBIAL GENETICS

Expression, regulation, recombination, and transmission of genetic information in prokaryotic and eukaryotic microorganisms. Consideration of chromosomal inheritance. Prereq: gen micr; permission. Lab. 4 cr. (Not offered every year.)

Plant Science

732. PLANT DEVELOPMENTAL GENETICS

Gene action in relation to development in plants; isozymes and differentiation; chromosomal proteins and gene regulation; temporal specificity of gene action; nuclear-cytoplasmic interaction; chemical gradients and gene activation. Prereq: introductory genetics and physiology. 4 cr. (Not offered every year.)

773. METHODS AND THEORY OF PLANT BREEDING

Plant breeding systems for qualitative and quantitative plant improvement. Prereq: introductory genetics; introductory statistics; /or permission. Mr. Peirce. 3 cr. (Not offered every year.)

851. PLANT GENETICS

Euploidy, aneuploidy, cytoplasmic inheritance, somatic cell genetics, and genetics of disease resistance in plants. Mr. Dunn. Prereq: intro genetics. 3 cr. (Offered Fall 1979.)

853. CYTOGENETICS

Chromosome aberrations and their behavior. Effect of radiation on chromosomes. Mapping and laboratory techniques in cytogenetic analysis. Prereq: genetics; cytology. 3 cr. (Not offered every year.)

Zoology

707. HUMAN GENETICS

Inheritance patterns, gene and chromosome mutation rates and effects, linkage, and gene frequency. Prereq: principles of genetics or permission. 4 cr.

History (Hist)

Chairperson: Charles E. Clark

PROFESSORS: Charles E. Clark, Hans Heilbronner, Charles A. Jellison, William R. Jones, David F. Long, Robert M. Mennel, Darrett B. Rutman, Cecil J. Schneer, Douglas L. Wheeler, Donald J. Wilcox
ASSOCIATE PROFESSORS: Robert C. Gilmore, Marion E. James, Allen B. Linden, Frank D. McCann, Marc L. Schwarz, Harvard Sitkoff, John O. Voll

ASSISTANT PROFESSORS: Jeffry Diefendorf, Judith A. Silver

DIRECTOR OF GRADUATE STUDIES: Robert M. Mennel

Admission

The department usually requires completion on the undergraduate level of eight semester courses in history together with some preparation in other areas of the humanities and social sciences.

Applicants for admission to any graduate program in history should have a minimum of B+ average in history and allied humanities and social sciences. In addition applicants must submit Aptitude (verbal and quantitative) and Advanced History scores on the Graduate Record Examinations. The department assesses the student's entire application, including letters of recommendation, in making its decision on admission. Deficiencies in an undergraduate program may be rectified by course work as a special student but such coursework cannot be used to satisfy requirements for an advanced degree. The department also recommends that a beginning graduate student have some training in a foreign language. It should be noted that students who expect to participate in seminar or reading courses in other than American history are usually required to have a reading knowledge of at least one foreign language appropriate to the particular course. Applicants intending the Ph.D. degree should include with their applications a personal statement indicating their reason for and intentions in undertaking graduate study at the University of New Hampshire.

All graduate students are reviewed annually by the faculty of the department. A student accumulating two course failures is automatically barred from continuing in any degree program in history, but the department reserves the right to exclude others whose overall performance does not give reasonable assurance of a successful program completion. Students are allowed no more than three attempts to meet any language requirements.

Degree Programs

The department offers the Master of Arts and Doctor of Philosophy degrees. The general degree requirements are outlined below, but specific programs are tailored to the goals of the student. The director

of graduate studies of the department serves as the initial adviser to entering graduate students, the adviser-of-record to all students throughout their years of graduate study, and, with the Graduate Committee of the department, has general supervision of all student programs. By the beginning of a student's second semester in residence, the student intending a degree will ordinarily have selected a single member of the faculty as the program chairperson and, with that faculty member as principal adviser, will have worked out a specific program of studies leading toward a degree.

The director of graduate studies must approve the registration of special students and students from other departments in graduate history courses. The department welcomes the opportunity to work with students from other departments.

Master of Arts

The student intending the M.A. degree has the choice of designing a specific program to meet either of two sets of requirements; the first allows substantial training and research in a single subfield of history but within a foundation of broader coursework; the second allows substantial breadth over at least two subfields. The subfields in history are as follows: the Ancient World; Medieval Europe; Early Modern Europe; Modern Europe; European Intellectual History; Medieval England; Early Modern England; Modern England; Iberian History; Russia; Early American History; Modern American History; Colonial Latin America; Modern Latin America; the Far East; the Near East; Sub-Saharan Africa; and the History of Science.

Completion of the degree under either set of requirements normally requires between three and four semesters of full-time study (three to four courses per semester). Either plan may prepare a student for entrance to the Ph.D. program. Plan B is particularly recommended for practicing teachers.

Plan A: The student shall complete successfully at least eight courses in history numbered above 700, of which a minimum of four shall be numbered between 800 and 898 (seminar and directed readings). In addition, the student shall prepare within the context of any single subfield a thesis meriting the unanimous approval of a thesis committee consisting of the student's program chairperson, under whose direction the thesis shall be prepared, and two other members of the graduate faculty (at least one of them in history). The preparation of the thesis is considered to be the equivalent of two additional semester courses each bearing the designation History 899 for the purpose of meeting the general regulations of the Graduate School.

Plan B: The student shall complete successfully at least ten courses in history numbered above 700 of which a minimum of four shall be numbered between 800 and 898. Following completion of coursework or during the final semester of coursework, the student shall demonstrate a broad competence in two subfields of history ordinarily in oral examination before a committee of three consisting of the student's

program chairperson and two other members of the faculty in history. Students proceeding under Plan B shall have stood examination no less than three weeks prior to the Commencement at which the degree is to be granted.

Students should note that Plan A thesis readings and Plan B examinations are available during the summer, only with the consent of all faculty involved.

Doctor of Philosophy

The department offers work leading toward the degree of Doctor of Philosophy with a concentration in either of the two subfields of American history. The degree requires more than formal coursework; it is awarded in recognition of high attainment and ability in history as shown by performance in qualifying examinations and by preparation and defense of a dissertation. Normally an entering student intending to be a candidate for the doctorate will complete an M.A. program as a prerequisite. Students with the M.A. from another institution, however, can begin the doctoral program immediately, and a student in residence can, with the consent of the department, omit the M.A. and proceed directly toward the Ph.D.

The doctoral student's cardinal intellectual relationship is with that member of the faculty under whom he/she will write the dissertation and who serves as the student's program chairperson. This relationship should be established early and a broad program supportive of the intended area of dissertation research worked out in consultation with the program chairperson. The program, which must be approved by the Graduate Committee of the department, shall involve each of the following:

1) Two required research seminars in American history, one in early America and one in modern America.

The history department offers these required research seminars in the first semester of each year, alternating between the two fields. Each entering student, with or without the M.A., should take one in each of the first two years in the program. Other seminars and reading courses at the 800 level will also form part of the program drawn up in consultation with the student's program chairperson.

2) Required courses in historiography and historical methods. The history department will offer one of these courses in the second semester of each year, alternating between the historiography course and the historical methods course. Each entering student, with or without the M.A., should take one in each of the first two years in the program.

Note: No student will be considered to be intending to pursue a Ph.D. program who is not in the process of satisfying these requirements. Only students who are intending to pursue the Ph.D. are considered for graduate assistantships.

3) Two languages or one language and a special research technique, whichever is deemed most relevant to the area of research.

4) The entirety of American history, with accent upon either of the subfields of early or modern America, and two subfields outside of American history.

5) A cognate field outside of history entirely or a subfield of nonwestern history.

The student's preparation for the qualifying examinations will be guided by representatives of each subfield or cognate field in his/her program. These representatives will make up the student's guidance and, subsequently, examining and dissertation committees. The student will normally not take the qualifying examination until s/he has completed sixteen semester courses or more (including work undertaken in a master's program). This requires three years of study beyond the bachelor's degree, the greater portion of which is ordinarily accomplished in full residence. The student should bear in mind, however, that qualifying examinations will test a mastery of broad subfields of historical knowledge rather than of particular courses. The student is, therefore, expected to read widely and independently in order to expand his/her knowledge beyond formal coursework and to become acquainted with aspects of the subfields not covered in that coursework.

Normally there will be eight steps in attaining the degree. Students are expected to be registered in the University for all regular academic semesters during their progress.

1) Satisfaction of historiography, historical methods, and research seminar requirements.

2) Correction of any deficiencies in the student's previous program, for example, lack of a first language.

3) The demonstration of proficiency in a second language or a special research technique. (Departmental regulations regarding the latter are available from the director of graduate studies.)

4) Successful performance in a two-part qualifying examination: the first part, a four-hour written examination covering breadth of knowledge in the subfield of specialization (early or modern American history); the second part, oral and covering all subfields and (if any) the cognate field specified in the program.

5) Within the same semester as Step Three, admission to candidacy and the approval by the candidate's dissertation committee of the specified topic and research plan for the dissertation.

6) Submission of an acceptable dissertation no more than three years after the admission to candidacy.

7) Successful public defense of the dissertation before the dissertation committee.

8) Formal submission of the dissertation to the department and Graduate School at least two weeks prior to the commencement at which the degree is to be conferred.

Apprenticeship

The department considers that graduate work in history, and particularly doctoral work, is professional training. All entering graduate students intending a Ph.D. are, consequently, required (and all others are urged) to participate on a continuing basis in History 801, Proseminar: History as a Profession. Moreover, the department recognizes the dual concerns of the historian's life—teaching and research; when feasible, therefore, all doctoral students are expected to undertake teaching in the department during a part of their residence. Participation in proseminar and in teaching constitutes an apprenticeship in conjunction with formal study.

703. EARLY AMERICAN HISTORY

The development of an Anglo-American society and culture along the eastern seaboard of North America, 1600-1750. 4 cr.

705, 706. AMERICA IN THE 18th CENTURY AND THE REVOLUTION

American colonial and revolutionary history from 1740 through the adoption of the Constitution and the establishment of Washington's first administration. 4 cr.

711, 712. 19th-CENTURY AMERICA

Domestic and international factors in the development of the American republic, its institutions and people, from the inception of the new nation in 1789 to the emergence of the United States as a world power in 1900. 4 cr.

715, 716. 20th-CENTURY AMERICA

U.S. after 1900; cultural, political, and social factors causing major changes in American life. Semester I: progressivism through the New Deal. Semester II: World War II to the present. 4 cr.

719, 720. THE FOREIGN RELATIONS OF THE UNITED STATES

Primarily the history of American diplomacy, with attention given to the nondiplomatic aspects. Semester I: American Revolution to 1890. Semester II: 1890 to date. 4 cr.

721, 722. HISTORY OF AMERICAN THOUGHT

Significant American thinkers considered in their social context. Semester I: 1600 to 1860. Semester II: 1860 to present. 4 cr. (Not offered every year.)

724. AMERICAN URBAN HISTORY

Urbanization process from the colonial period to the present. 4 cr.

731. LATIN AMERICAN HISTORY: REGIONAL OR COUNTRY STUDIES

Seminar; readings and discussions of literature relative to region or country being studied. See department listing for the current semester's topic. Students will be guided through preparation of a research proposal. Latin American History recommended. 4 cr.

732. LATIN AMERICAN HISTORY: TOPICAL STUDIES

Thematic seminar; reading and discussions of literature relative to selected topics. See department listing for the current semester. Students will be guided through preparation of a research proposal. Latin American History recommended. 4 cr.

739, 740. THREE MEDIEVAL CIVILIZATIONS

Demise of classical antiquity in the lands bordering the Mediterranean and the genesis and fruition of three new cultural traditions: Latin Christian, Islamic, and Byzantine. Religious, literary, and scholarly survivals and innovations from 400 A.D. to 1400 A.D. 4 cr.

741. THE AGE OF THE RENAISSANCE

Renaissance from 1300 to 1600, stressing intellectual and cultural history and concentrating on events in Italy; aspects of northern Europe. 4 cr.

742. THE AGE OF REFORMATION

Northern Europe from 1300 to 1600, stressing the intellectual and cultural aspects of the European Reformation. Concentrates on the 16th century, but important trends in the 14th and 15th centuries will be given considerable attention. 4 cr.

747. FRANCE FROM LOUIS XIV TO THE FRENCH REVOLUTION

Pressures and influences which led to the French Revolution. 4 cr.

748. EUROPEAN SOCIAL CHANGE AND INDUSTRIALIZATION

Impact of the Industrial Revolution and the French Revolution on workers, peasants, middle class, and women of England, France, and Germany in the 19th century. 4 cr.

751, 752. EUROPEAN INTELLECTUAL HISTORY

European intellectual tradition from the Greek philosophers to the end of World War II. How basic ideas have developed out of previous modes of thought in response to new challenges. 4 cr.

756. 20th-CENTURY EUROPE

World War I, European totalitarianisms, World War II, the loss of European primacy, and the search for a new Europe. 4 cr.

759. HISTORY OF MODERN SPAIN AND PORTUGAL

Iberian states and their peoples from the coming of liberalism to the present. Failure of Iberian liberalism and liberal government. Political and social change, imperial and intellectual movements, influences of Western European thought and activity. 4 cr.

761, 762. ENGLAND IN THE TUDOR AND STUART PERIODS

Political, religious, socio-economic, and intellectual forces for change at work in England from the accession of Henry VII to the revolution of 1688-89. 4 cr.

763. RUSSIA: ORIGINS TO MODERNIZATION

Russia from its foundation to emancipation and reform. Political developments, foreign relations, intellectual and ideological currents. 4 cr.

764. RUSSIA: FROM TSARIST TO SOVIET EMPIRE

The cost of modernization; Leninist and Stalinist revolutions; Soviet consolidation. 4 cr.

767. EARLY MODERN GERMANY: REFORMATION TO THE REVOLUTION OF 1848

Conflict between Holy Roman Empire and petty states; rise of Prussia; religious conflict and Enlightenment. 4 cr.

768. MODERN GERMANY SINCE 1848

Bismarck and Imperial Germany; Weimar and the rise of Hitler; post-World War II divided Germany. 4 cr.

774. HISTORIOGRAPHY

Analysis of ancient and modern historians. Required of all entering Ph.D. candidates, open to undergraduates with permission. 4 cr. (Not offered every year.)

775. HISTORICAL METHODS

Introduction to contemporary historical methods. Required of all entering Ph.D. candidates, open to undergraduates with permission. 4 cr. (Not offered every year.)

777. THE HELLENISTIC-ROMAN WORLD

The Mediterranean and Near East from the time of Alexander to the reign of Constantine. Covers the main political and social developments, but stresses artistic, scientific, philosophical, and religious trends, with particular emphasis on the rise of Christianity, Zoroastrianism, and the general religious climate that prepared the way for Islam. 4 cr.

History

781. HISTORY OF MODERN CHINA, 1839—PRESENT

Modernization of China. Political, social, and cultural changes that have occurred in China from its early contacts with the West. 4 cr.

784. HISTORY OF SOUTHERN AFRICA SINCE 1820

Struggle for political and economic control in the only region of Africa where European groups remain in power. Impact of European imperialism, European-settler nationalism, racial conflict, economic competition and industrialization, apartheid, and assimilation with special attention to development of European hegemony. Official American policy. 4 cr.

785. THE MODERN MIDDLE EAST

From 18th century to the present. Problems created by modernization and reform of the traditional society; conservative reaction to reform, impact of nationalism, and appearance of new ideologies. 4 cr.

787. BLACK CONSCIOUSNESS AND PROTEST

Origins and causes of the rising consciousness and consequent activism of the peoples of Negro descent in the New World and in Africa from the early 19th century to the present. Protest literature, Black nationalism. Pan-Negroism, Pan-Africanism, negritude, the Nation of Islam, and separatist religious sects in the Americas and Africa. Crosscultural and multidisciplinary. 4 cr.

789. SEMINAR IN THE HISTORY OF SCIENCE

Selected topics conducted through special lectures, individual study, oral and written reports. Subject varies. Cannot be used for credit in history without permission of the department. Prereq: permission of adviser and instructor. 4 cr.

790. QUANTIFICATION AND COMPUTERS FOR THE HISTORIAN

The historian's use of computers and statistics; practical applications of both interactive terminal operations and batch processing. Data generation and processing, computer languages (BASIC, FORTRAN), programming and library programs, elementary statistics; students will undertake operations of their own on material supplied and will consider particular quantitative studies in history in terms of techniques used. No previous knowledge of computers or college mathematics required. Prereq: admission as an undergraduate major or graduate student in history; /or permission. 4 cr.

791. RELIGION IN WORLD HISTORY

The religious experience of man from the perspective of world history. The major modes of religion; development of the major religious traditions and institutions. 4 cr.

797. COLLOQUIA IN HISTORY

Selected topics in American, European, and non-Western history. Students must select section in department office at the time of registration. 4 cr.

Graduate Readings and Seminars

801. PROSEMINAR: HISTORY AS A PROFESSION

Entering graduate students intending the doctorate and all advanced graduate students serving as research, program, or teaching assistants in the department meet periodically to discuss the obligations and mechanics of the historian's profession, including teaching, scholarship, university and college structures, and the role of the faculty therein. 0 cr.

819, 820. SEMINAR IN EARLY AMERICAN HISTORY

1) Mr. Clark (social and cultural); 2) Mr. Gilmore (Revolution); 3) Mr. Rutman (Anglo-American society). Prereq: permission. 3 cr.

823, 824. SEMINAR IN AMERICAN NATIONAL HISTORY

1) (Afro-American) 2) Mr. Sitkoff (20th century); 3) Mr. Jellison (19th century and biography); 4) Mr. Mennel (social); 5) Mr. Long (foreign relations). Prereq: permission. 3 cr.

836. SEMINAR IN LATIN AMERICAN HISTORY

Topics will vary and will include: conservatism and conformity in Latin America; the Portuguese Empire; Brazil and Africa; the Mexican Revolution; nationalism and neocolonial Latin America; Brazil; empire and republic; and slavery in the Americas: a comparison. Mr. McCann. 3 cr.

843, 844. SEMINAR/READINGS IN EUROPEAN HISTORY

1) Mr. Heilbronner (modern Russia); 2) Mr. Jones (Medieval); 3) Ms. Silver (France and European social history); 4) Mr. Wheeler (Spain and Portugal); 5) Mr. Wilcox (Renaissance). 3 cr.

859, 860. SEMINAR IN ENGLISH HISTORY

1) Mr. Schwarz (Tudor-Stuart). Prereq: permission. 3 cr.

888. PROBLEMS IN MODERN AFRICAN HISTORY

Topics will vary each year the seminar is offered. Emphasis will be on Africa south of the Sahara in the colonial and postcolonial eras. Among the topics will be: African resistance movements in pre-colonial and colonial Africa; African nationalism; problems of the independent African states; the role of the military in postcolonial Africa; and issues in Portuguese African history. Students will write research papers and give oral presentations. Mr. Wheeler. 3 cr.

895, 896. TUTORIAL READING AND RESEARCH IN HISTORY

A) Early American History; B) American National History; C) Canada; D) Latin America; E) Medieval History; F) Early Modern Europe; G) Modern European History; H) Ancient History; I) Far East and India; J) Near East and Africa; K) European Historiography; L) American Historiography; M) Russia; N) World History; O) English History; P) New Hampshire History; Q) Historical Methodology. Prereq: permission. 3 cr.

899. MASTER'S THESIS**999. DOCTORAL RESEARCH****Home Economics (HEc)**

Chairperson: Mary E. Holder

ASSOCIATE PROFESSORS: Mary E. Holder, Victor R. Messier, Elizabeth A. Snell

ASSISTANT PROFESSORS: Larry J. Hansen, Anthony R. Tagliaferro, Sharon F. Young

The department offers graduate work leading to a Master of Science degree in home economics, with the major emphasis in areas which strengthen professional competence in family, community, and educational services. Each student's program will be planned to achieve professional objectives based on specific interests, ability, and undergraduate preparation.

Admission: Students admitted to the graduate program in home economics are expected to have an undergraduate degree in home economics or a related field. If there are deficiencies in the undergraduate program, students may be admitted on condition that they complete specified prerequisites which will not be counted toward the degree. Students seeking admission must submit recent scores from the Miller's Analogies Test or the Aptitude section of the Graduate Record Examination.

Requirements: A candidate for a Master of Science in home economics is expected to fulfill the general requirements of the Graduate School and the following departmental requirements:

1) A minimum of 22 semester credits in home economics courses including Research Seminar, HEc 897; and Research Project, HEc 898, or Thesis, HEc 899.

2) A maximum of 8 semester credits from the liberal arts or other areas which support the major may be applied toward the degree.

3) Before the second semester of graduate study the student will have planned a program of studies with the approval of his/her advisory committee.

4) A final oral and/or written examination.

707. PRACTICUM IN HOME ECONOMICS

Supervised in-depth experience with observation and participation to increase the student's understanding in a specific area of home economics. Choice of practicum from A) Child; B) Family; C) Consumer; D) Food and Nutrition. Prereq: HEc major; permission. 4 cr.

709. BIOCHEMISTRY OF NUTRITION

Intermediary metabolism of nutrients and energy; metabolism transport mechanisms; biological oxidations; interrelationships of carbohydrate, fat, and protein metabolism; obesity; control of hunger and appetite. Prereq: college course in biochemistry. (Also offered as AnSc 709.) 4 cr.

715. CLOTHING IN RELATION TO HUMAN BEHAVIOR

Research and theory in the social psychological aspects of clothing; clothing behavior of individuals and groups; stages of the life cycle, development of the self, and the phenomenon of fashion. 4 cr.

725. PRESCHOOL PROGRAMS

Organization of time, space, materials, and people to attain goals in early childhood programs. Historic and current programs. Prereq: preschool methods and materials or permission. 4 cr.

727. STUDENT TEACHING IN THE PRESCHOOL-KINDERGARTEN

Supervised teaching experience. Students spend 14 weeks, 18-20 hours per week, in a selected preschool working with a cooperating teacher. The student must apply at least one semester previous to the semester in which s(he) plans to student teach. Prereq: permission. Coreq: HEc 728. 6 cr. Cr/F.

728. SEMINAR FOR STUDENT TEACHERS IN THE PRESCHOOL-KINDERGARTEN

Students will enrich their student teaching experience with biweekly seminars throughout the semester as a supplement to their practical experience in the field. Prereq: permission. Coreq: HEc 727. 2 cr.

754. PERSONAL AND FAMILY FINANCE

Financial alternatives available to individuals and families during stages of the family life cycle. 4 cr.

757. CONSUMER PROBLEMS

Consumer problems analyzed from the perspective of family, business, and government interests. Prereq: 8 cr. in consumer studies; permission. 4 cr.

Institute of Natural and Environmental Resources

758. CONSUMER PROTECTION

Types of protection available to consumers; investigation and evaluation of the structure and operating procedures of regulatory agencies. Prereq: permission. 4 cr.

774. CLINICAL DIETETICS

Principles of normal nutrition applied to clinical problems; altered nutrient requirements in human disease. Diet therapy as applied to clinical nutrition. Prereq: prin of nutrition; human nutrition; biochemistry; permission. 4 cr.

776. CONTEMPORARY ISSUES IN NUTRITION

Focus on national and worldwide nutrition concerns. Approaches and materials used in nutrition education. Prereq: basic nutrition course; permission. 4 cr.

786. DYNAMICS OF FAMILY CHANGE

Theories and research for the assessment of family interaction patterns; planned intervention techniques. Students examine their interaction processes and their possible effect on intervention efforts. Prereq: family relations; clinical approaches to human behavior. 4 cr.

791. METHODS OF TEACHING HOME ECONOMICS

Home economics in the school program; curriculum materials methods, and resources in teaching. 4 cr.

793. FAMILY LIFE EDUCATION

Critical review of current issues and literature; materials and methods for programs such as sex education and parent education. Prereq: Family Relations; permission. 4 cr.

883. AMERICAN FAMILIES IN POVERTY

Problems of economically deprived rural and urban families. Objective, intellectual, and human involvement in dealing with poor families. Understanding the strengths and weaknesses typical of American families in poverty. 4 cr.

886. CRITICAL PROBLEMS IN FAMILY LIFE

Evaluation of the needs and resources of families with critical problems; maturational and situational sources of stress influencing the contemporary American family; students will demonstrate mastery of theoretical concepts by developing self-help strategies to be used by families experiencing stress. Prereq: permission. 4 cr.

893. PARENTS AND CHILDREN

In-depth study of the reciprocal relationships among parents and children. Evaluation of service programs in terms of current research. Prereq: The Young Child, Family Relations, or permission. 4 cr.

895. SEMINAR AND SPECIAL PROBLEMS

A) Clothing and Textiles, B) Consumer Education, C) Family Relations, D) Food and Nutrition, E) Home Economics Education, F) Management and Family Finance, and G) Human Development. The student will contribute to a selective review and critical evaluation of the research and current literature and an examination of issues and trends. Independent projects may be a part of the experience. These seminars are open to graduate students with sufficient background and will not be scheduled every semester. One or more semesters, maximum of 4 credits in one area. 2 to 4 cr.

897. RESEARCH SEMINAR

Survey, evaluation, and use of research in the field of home economics. Methods and techniques used in defining a problem for study, collecting data, analyzing, and writing a report. 2 cr.

898. RESEARCH PROJECT

A study or project which may be selected in lieu of a thesis. To be taken concurrently with or following HEc 897. 2-4 cr.

899. THESIS

6 cr.

Institute of Natural and Environmental Resources

Director: David P. Olson

Chairperson of Graduate Studies: Robert D. Harter

PROFESSORS: Richard A. Andrews, James P. Barrett, Paul E. Bruns, Gordon L. Byers, William H. Drew, Owen B. Durgin, Bennett B. Foster, Francis R. Hall, William F. Henry, John L. Hill, Harold W. Hocker, Jr., Allan B. Prince

ASSOCIATE PROFESSORS: John E. Carroll, S. Lawrence Dingman, Robert D. Harter, Edmund F. Jansen, Jr., William W. Mautz, David P. Olson, Nobel K. Peterson, R. Marcel Reeves, Oliver P. Wallace, Sr., Richard R. Weyrick

ASSISTANT PROFESSORS: Robert T. Eckert, Peter H. Greenwood, Bruce E. Lindsay, Albert E. Luloff, Donald R. Miller, Kurt N. Olson

ADJUNCT PROFESSORS: George E. Frick, Nelson L. LeRay

ADJUNCT ASSOCIATE PROFESSORS: C. Anthony Federer, William B. Leak, Robert S. Pierce

ADJUNCT ASSISTANT PROFESSOR: Peter W. Garrett

Master of Science, Natural and Environmental Resources

A single master's degree is offered by the Institute with six specific options:

Forest Resources: Forest resource management; forest recreation; forest marketing; wood industry management; forest mensuration; forest tree improvement; and wood science and technology.

Hydrology: Hydrochemistry; ground water hydrology; surface water; and water resource management.

Resource Economics: Agricultural economics; community development; regional economics; land and water economics; rural manpower; and marine economics.

Soil Science: Soil chemistry; soil classification and genesis; soil microbiology; and forest soils.

Resource Administration and Management: Management of publicly and privately owned natural resources; administration of natural resource laws and policies; management of natural-resource-based firms.

Wildlife Ecology: Habitat evaluation and management; wildlife nutrition and physiology; and land-use planning for wildlife.

Entrance requirements

Students admitted to Institute programs in these options are expected to have completed either an undergraduate degree in the field in which they plan to specialize or show adequate preparation in the basic support courses of the field. Students with good undergraduate records who lack a background in a particular field may be admitted to a program, provided they are prepared to correct the deficiencies. The Graduate Record Examination is required of all applicants.

Students entering the forest resources option are usually expected to have completed a bachelor's degree in forestry equivalent to that obtained at a school accredited by the Society of American Foresters. Students planning for the resource economics option will need satisfactory undergraduate training that includes four or more courses in economics or resource economics. Entering students in hydrology and soil science are required to have adequate preparation in chemistry, physics, mathematics, and the biological or earth sciences. Students interested in wildlife ecology are expected to have adequate preparation in biological sciences, chemistry, and mathematics including statistics. Students interested in resource administration and management are expected to have had a minimum of three courses in the areas of ecology or natural resources, and resource economics, or be expected to make up this deficiency; priority for admission to this option will be given applicants having post-B.S. work experience in resource administration or management.

Academic Requirements

The M.S. degree is conferred upon successful completion of the following:

1) A program amounting to not less than 30 credits (34 credits for Res. Admin. and Mgt.), including the following course requirements or equivalent: INER 893-894 seminar, 2 cr.; INER 803, Approach to Research, 2 cr.; quantitative methods or analytical techniques; and INER 898, Directed Research, 4-6 cr. or INER 899, Thesis, 6-10 cr.

2) A final oral and/or written examination.

Intercollege Cooperative Programs

The Institute participates in four doctoral degree programs on a cooperative basis with other departments in the University. The Department of Chemistry offers a soil and water chemistry option in its Ph.D. program, which is coordinated through joint efforts of the soils and hydrology faculties and the chemistry faculty (see Interdisciplinary Options and Programs). A Ph.D. program in genetics is available to students in forest resources through the Genetics Program (see Genetics Program). Students can earn a Ph.D. in economics in the cooperative program with resource economics and the Whittemore School of Business and Economics (see Economics). Through informal cooperative arrangements with the electrical and computer engineering and mechanical engineering departments, opportunities are available for graduate study in wood science and technology in the College of Engineering and Physical Sciences, leading to either the master's degree in electrical engineering or mechanical engineering or the Ph.D. degree in engineering. (See Engineering Ph.D. Program: Theoretical and Applied Mechanics or Signal Processing.)

Natural and Environmental Resources (INER)

701. STATISTICAL METHODS I

Analysis of variance and general linear models; measured numbers, nature of statistical evidence, sampling distributions, and principles of statistical inference; application of specific linear models to given sets of data. Prereq: upper-division undergraduate or graduate standing. Mr. Durgin. 4 cr. (Not offered every semester.)

702. NATURAL RESOURCES POLICY

Contemporary issues in the management and allocation of natural resources; impact of humans on agricultural and forest lands, water, wildlife, fisheries, and minerals; historical perspective of current resource policies. Prereq: permission. Mr. Carroll. 4 cr.

Institute of Natural and Environmental Resources

709. SOILS AND COMMUNITY PLANNING

Using a town plan and soils map, students develop reports for multiple urban and rural land-use—housing, sewage, recreation, transportation, runoff, etc. USDA soil classification system; Soil Conservation Service rating criteria; New Hampshire soils. Guest lecturers. Prereq: permission. Mr. Peterson. 2 cr.

711. STATISTICAL METHODS II

Intermediate course in statistics; basic concepts of sampling, linear models and analyses for one-way and multiway classification, factorial arrangement of treatments, multiple regression, and covariance. Computer programs used in analyzing data. Examples from environmental sciences. Prereq: Applied Statistics I or equivalent. Mr. Barrett. 4 cr.

712. SAMPLING TECHNIQUES

Techniques of sampling finite populations in environmental sciences; choice of sampling unit and frame, estimation of sample size, confidence limits, and comparisons of sample designs. Prereq: Applied Statistics I or equivalent. Mr. Barrett. 2-4 cr.

713. QUANTITATIVE ECOLOGY

Applied quantitative techniques: basic concepts in probability and statistics applied to ecological systems; population dynamics; spatial patterns; species abundance and diversity; classification and ordination; production; and energy and nutrient flow. Additional credit for in-depth mathematical analysis of a particular topic. Prereq: introductory courses in calculus, statistics, and ecology. Mr. Barrett. 3 or 4 cr.

718. LAW OF NATURAL RESOURCES AND ENVIRONMENT

For resource managers: the legal system pertaining to resource management, protection of the environment, and possibilities for future action. Prereq: contemp conserv issues, or land economics and use, or permission. Mr. Tucker. 3 cr.

757. BASICS OF REMOTE SENSING

Fundamentals for application of photographic and nonphotographic sensors to information gathering in natural resource fields; emphasis is on the interpretation of aerial photographs. Applications to forestry, wildlife, land-use planning, earth sciences, soils, hydrology, and engineering. Transportation fee. Mr. Bruns, Mr. K. Olson. Lab. 2 cr.

758. APPLICATIONS OF REMOTE SENSING

Applications of remote sensing to the student's disciplinary interest. Student projects developed using available conventional aerial photography or other imagery. Prereq: INER 757 or equivalent. Transportation fee. Mr. K. Olson. Lab. 2 cr.

795, 796. INVESTIGATIONS

A) Resource Administration; B) Resource Management; C) Resource Policy; D) Public Laws and Resources. May be repeated. Prereq: permission. Staff. 2-4 cr.

797. FOREST RECREATION SEMINAR

Recreational use of nonurban lands; economics of public and private developments; planning for state and private recreational use, social aspects. Class project. Prereq: permission. Staff. 4 cr.

803. APPROACH TO RESEARCH

The meaning of science and the application of logic in the scientific method. Principles and techniques of scientific research. Survey of experimental design procedures. Organization of investigative work, problem analyses, working plans, and scientific writing. Prereq: permission. 2 cr.

811. NATURAL AND ENVIRONMENTAL RESOURCE MANAGEMENT

To develop an understanding of the fundamental scientific, aesthetic, and ethical principles involved in the management of renewable natural resources and ways to apply these principles in the formulation and evaluation of resource-management policies including the identification of unifying concepts in the management of specific renewable resources, soils, water, forests, and wildlife. Prereq: permission. Mr. Dingman. 4 cr.

812. ADMINISTRATION OF RESOURCE LAWS AND POLICIES

Largely devoted to legalistic, policy, and political science aspects of natural and community resource administration. Attention is also given to concepts of private property, home rule, social value, tradeoffs, and bureaucracy as elements in administration. Transportation fee. Prereq: permission. Mr. Carroll. 4 cr.

815. LINEAR PROGRAMMING METHODS

Setting up and solving problems by the simplex and distribution methods; variation in linear programming methods with applications; nonlinear programming, discrete programming; and solving input-output and game-theory problems. Prereq: elem matrix alg or permission. Mr. Andrews. 2 cr.

816. QUANTITATIVE-FOREST ECOLOGY SEMINAR

Preparation, presentation, and discussion of recent topics in quantitative ecology such as remote sensing, population growth, competition between species, modeling of a population, and energy flow. Seminar is 2 credits; an additional 2 credits available for an in-depth study of a particular topic. Mr. Leak and Mr. Barrett. 2-4 cr.

893, 894. NATURAL AND ENVIRONMENTAL RESOURCES SEMINAR

Presentation and discussion of recent research, literature, and policy problems in the natural and social sciences influencing resource use. May be repeated. 1 cr. Cr/F.

898. DIRECTED RESEARCH

Hours and credits to be arranged. Prereq: permission. Not available if credit obtained for INER 899. Continuous course; "IA" grade given. 2-6 cr. Cr/F.

899. THESIS

Hours and credits to be arranged. Prereq: permission. 3-10 cr.

Forest Resources (FoRs)

720. FOREST GENETICS

Genetics of forest tree improvement; variation in natural populations, breeding methods, physiological characters, quantitative data analysis. Prereq: prin of genetics; silviculture; statistics; /or permission. Transportation fee. Mr. Eckert. Lab. 3 cr. (Not offered every year.)

722. ADVANCED SILVICULTURE

Intensive silviculture of forest stands. Artificial regeneration (e.g., alternative regeneration methods and site preparation); plantation management (e.g. thinning schedules and fertilization); natural systems. Prereq: silviculture; permission. Transportation fee. Mr. Hocker. 3 cr. (Offered 1979-80.)

734. FOREST PROTECTION SEMINAR

Discussion and special problems based on principles and techniques of forest protection. Prereq: permission. Mr. Weyrick. 3 cr.

737. GAME MANAGEMENT I

Biological characteristics, habitat requirements, research and management practices of upland game birds and big game animals. Several all-day field trips required (possibly on weekends) to New England wildlife areas. Transportation fee. Prereq: wildlife management major or permission. Mr. Mautz. Lab. 4 cr.

738. GAME MANAGEMENT II

Biological characteristics, habitat requirements, research and management practices of small game animals, furbearers, predators, and waterfowl. Several all-day field trips required (possibly on weekends) to New England wildlife areas. Transportation fee. Prereq: Wildlife management major or permission. Mr. Miller. Lab. 4 cr.

745. FOREST MANAGEMENT

Forest land ownership; management objectives; forest inventory regulation and economic analysis; forest administration; professional responsibilities and opportunities. Prereq: senior standing in FoRs major. Transportation fee. Mr. Weyrick, Mr. Bruns. Lab. 4 cr.

753. OPERATIONS CONTROL AND ANALYSIS

Quantitative tools for decision making in forest resource management activities; development and analysis of cost functions, timber and stumpage valuation, forecasting, linear programming. Monte Carlo simulation, PERT. Prereq: calculus; forest economics; statistics; mensuration. Mr. Foster. Lab. 4 cr.

754. WOOD PRODUCTS MANUFACTURE AND MARKETING

Wood products from harvesting and procurement of raw material to finished product processes; management decisions, marketing, and promotion problems. Visits to harvesting operations and manufacturing plants in New England. Transportation fee. Prereq: wood technology or permission. Mr. Hill. Lab. 4 cr.

755. REGIONAL SILVICULTURE AND FOREST MANAGEMENT

Extended field trip to another forest region. Prereq: senior standing; FoRs 745; /or permission. (Limited enrollment.) 2 cr. Cr/F.

764/864. FOREST INDUSTRY ECONOMICS

Business methods and economics in the forest industry; planning for minimum cost operations and profitable use of capital in a forest enterprise. Individual projects. Prereq: permission. Mr. Wallace. 4 cr. (Not offered every year.)

798. FOREST RESOURCES MANAGEMENT SEMINAR

Population trends and human needs in relation to forest land productivity for timber, wildlife, water, recreation, and environmental quality. Class organized for group planning of forest productivity. Prereq: FoRs 745. Mr. Wallace. Lab. 4 cr.

801. FOREST MANAGEMENT SEMINAR

Seminar discussions of current literature, plans, principles, and new developments in the general field of forest management. Transportation fee. Prereq: permission. Mr. Bruns and others. 2 cr.

805. UTILIZATION SEMINAR

Conferences, discussions, and reports on assigned topics. Consideration of current literature and developments in the general field of wood utilization. Prereq: permission. Mr. Hill. 2 cr.

806. OPERATIONS CONTROL SEMINAR

Conferences, discussions, and reports on assigned topics. Considerations of current developments in the field of quantitative control of forest operations. Prereq: permission. Mr. Foster. 2 cr. (Not offered every year.)

809, 810. WILDLIFE MANAGEMENT SEMINAR

Discussions and assigned reports on current investigations and developments in wildlife management. Prereq: undergraduate courses in wildlife management. Mr. Olson, Mr. Mautz, and Mr. Miller. 1-4 cr.

895, 896. INVESTIGATIONS IN:

A) Forest Ecology; B) Remote Sensing; C) Wood Utilization; D) Game Management; E) Mensuration; F) Forest Economics; G) Forest Management; H) Operations Control and Analysis; I) Recreation; J) Policy; K) Wildlife Physiology; L) Forest Genetics. Elective only after consultation with the instructor in charge. 1-4 cr.

Hydrology (Hydr)

705. PRINCIPLES OF HYDROLOGY

Physical principles important in the hydrologic cycle, including: basic equations, properties of water, movement of water in natural environments, formation of precipitation, relations between precipitation and streamflow, snow-melt, evapotranspiration, interception, infiltration, relations between groundwater and streamflow, and hydrologic aspects of water quality. Problems of measurement and aspects of statistical treatment of hydrologic data. Transportation fee. Prereq: calculus. Mr. Dingman. Lab. 4 cr.

710. GROUNDWATER HYDROLOGY

Principles governing occurrence, location, and development of groundwater; well hydraulics, geophysical exploration, and chemical quality of water; use of fluid and electrical models; and selected problems. Basic course for hydrology majors and other qualified students. Prereq: one year of calculus. Mr. Hall. Lab. 4 cr.

795, 796. INDEPENDENT WORK IN HYDROLOGY

A) Hydrology; B) Chemistry of Water; C) Water Resource Management. Student may choose topic and faculty consultant. Staff. 1-4 cr.

803. ADVANCED HYDROLOGY

Application of quantitative methods to selected hydrologic problems. Critical examination of deterministic and stochastic models, with emphasis on conceptualizing the hydrologic problem, developing appropriate models, obtaining solutions, and evaluating models

and solutions in terms of basic assumptions, data requirements, and verification of results. Prereq: prin of hydrology; computer meth; basic statistics. Mr. Hall, Mr. Dingman. 3 cr.

804. HYDROCHEMISTRY

Chemical principles for dilute aqueous solutions at relatively low temperatures and pressures are applied to the study of fresh waters at or near the earth's surface. Major topics: equilibrium concepts, buffering mechanisms, oxidation-reduction reactions, and ion exchange. Emphasis is given to selected systems involving water, carbon dioxide, calcium carbonate, and silicate minerals. Laboratory exercises utilize simple experiments to give experience with methods of measurement and interpretation of results. Prereq: two years of chemistry or equivalent or permission. Mr. Hall. Lab. 3 cr.

808. WATER RESOURCE MANAGEMENT

Hydrologic and statistical aspects of water resource management; nature of water resource problems and application of models in their solution; geographical aspects of water-resource problems in the U.S.; economic, social, institutional, and environmental aspects of water resource problems. Prereq: prin of hydrology; basic statistics; /or permission. Mr. Dingman. 4 cr.

895-896. INVESTIGATIONS IN:

A) Hydrology; B) Chemistry of Water; C) Water Resource Management. Elective only after consultation with the instructor in charge. 1-4 cr.

Resource Economics (REco)

705. PLANNED CHANGE IN NONMETROPOLITAN COMMUNITIES

Discussion and application of community development theory and principles using appropriate research methodologies. Areas of study chosen from: population growth, community planning and development, provision and distribution of services, rural-urban difference, and systems management. Emphasis on empirical research studies. Students may participate in community-development activities. May include placement in field agency. Prereq: Applied Community Development; statistics; permission. Mr. Luloff. 4 cr. (Offered in even years only.)

706. ECONOMICS OF RESOURCE DEVELOPMENT

Resource scarcity and theories of economic development; major resource development problems of land and natural resources, urban-rural conflicting demands, and conservation and water supply; capital needs, externalities, and market failure. Prereq: intermediate economic theory. Mr. Jansen. 4 cr. (Offered every third semester.)

710. RESOURCE ECONOMICS SEMINAR

A) Agricultural Economics and Food Policy; B) Rural Development; C) Marine Economics; D) Location of Economic Activity; E) Land and Water Economics; F) Quantitative Methods; G) Environmental Economics. In-depth treatment of area, including classic works. Seminars arranged to students' needs and offered as demand warrants. May be repeated. Staff. 2-4 cr.

717. LAW OF COMMUNITY PLANNING

Common law and the Constitution with respect to property law, including eminent domain, land-use planning, urban renewal, and zoning. Makes the nonlawyer aware of the influence and operation of the legal system in community development. Mr. Tucker. 4 cr.

756. REGIONAL ECONOMIC ANALYSIS

Concepts and methods of delineating regional economies, methods of measuring activity, regional development, and public policies. Emphasis on empirical research studies. Prereq: intermediate economic theory or permission. Mr. Lindsay. 4 cr. (Offered every third semester.)

804. APPLIED ECONOMICS OF RESOURCE USE

The theory of resource allocation used in solving public and private economic problems. Resource-product relationships, nature of cost, returns to scale, factor valuation and pricing, and uncertainty are analyzed with appropriate methodology. Primary emphasis will be placed on empirical research studies and their implications. Prereq: applied statistics; intermediate microeconomic analysis. 4 cr.

809. AGRICULTURAL ECONOMICS

Analysis of supply, demand, and price relationships. Appraisal of the economic theory relevant to decision making in food production, marketing, and consumption; the competitive structure of the food industry. 4 cr.

820. ENVIRONMENTAL ECONOMICS SEMINAR

The use of economic concepts for analyzing current environmental problems. Student reports and class discussion will deal with the application of economic analysis to real world environmental problems at the local, state, and national levels; costs and benefits of alternative methods of dealing with environmental objectives; and other economic goals of society. Prereq: intermediate micro- and macroeconomic analysis or equivalent; permission. Mr. Lindsay, Mr. Greenwood. 2 cr.

838. INTRODUCTION TO THE LOCATION OF ECONOMIC ACTIVITY

Economic theories explaining the behavior of individual firms and consumers in selecting sites for carrying on economic activities. The relationship of these theories to patterns of industrial location, systems of cities, and land-use competition in general. Problems of locational change and adjustment and the effects of public policy on spatial economic activities. Prereq: elem calculus; linear algebra; regression; micro- and macroeconomics; /or permission. 4 cr. (Not offered every year.)

895, 896. INVESTIGATIONS IN:

A) Agricultural Marketing; B) Agricultural Production and Farm Management; C) Community Development; D) Economics of Human Resources; E) Economics of Population and Food; F) Land Economics; G) Marine Economics; H) Rural Economic Development; I) Regional Economics; J) Water Economics. Special assignments in readings, investigations, or field problems. May be repeated. Prereq: permission. Staff. 2-4 cr.

Soil Science (Soil)

701. PHYSICS OF SOILS

Soil as a physical system; textural and structural analysis of soils, water flow and retention, and heat and gas transfer; physical properties of soil and plant growth; methods of soil physical analysis. Prereq: soils and the environ or permission. Staff. Lab. 4 cr.

702. CHEMISTRY OF SOILS

Chemical composition of soil; colloidal phenomena and the exchange and fixation of elements, cation exchange capacity and source of negative charge; inorganic reactions in soil and their effect on soil properties. Prereq: one year of college chemistry or permission. Mr. Harter. 3 cr.

704. SOIL CLASSIFICATION AND MAPPING

Soil genesis, morphology, classification, and mapping; major classification systems used in the U.S. and throughout the world as they relate to human uses of the soil. Prereq: soils and the environ; intro geology; /or permission. Transportation fee. Mr. Peterson. 4 cr.

795, 796. INDEPENDENT WORK IN SOIL SCIENCE

A) Soil-Plant Relationships; B) Physics of Soils; C) Chemistry of Soils; D) Soil Classification. Prereq: permission. 1-4 cr.

802. CHEMISTRY OF SOIL COLLOIDS

Physical chemistry of soil colloids and colloidal phenomena. Electric double-layer theory, solid-solution interfacial reactions, surface acidity, theories of swelling, ionic diffusion. Prereq: permission. Mr. Harter. 3 cr.

Intercollege Course

895-896. INVESTIGATIONS IN:

A) Soil Plant Relationships; B) Physics of Soils; C) Chemistry of Soils; D) Soil Classification. Elective only after consultation with the instructor in charge. 1-4 cr.

Intercollege Course (Inco)

890. COLLEGE TEACHING

Acquisition of theoretical and practical knowledge of the basics of college teaching; the role of the college teacher in facilitating learning. Course participants will work to improve three aspects of their work: teaching methods with large and small groups, planning teaching sessions, and assessment of student learning. Participants will be encouraged to develop a teaching style that is effective and compatible with their philosophy, attitudes, and aptitudes. 2 cr.

Mathematics and Computer Science

Chairperson: M. Evans Munroe

PROFESSORS: Richard H. Balomenos, Edward H. Batho, Homer F. Bechtell, David M. Burton, Arthur H. Copeland, A. Robb Jacoby, Shan S. Kuo, M. Evans Munroe, Eric A. Nordgren, James A. Radlow, Shepley L. Ross, Robert J. Silverman

ASSOCIATE PROFESSORS: Albert B. Bennett, Jr., William E. Bonnice, William Geeslin, Loren Meeker, Berrien Moore III, Albert O. Shar, Samuel D. Shore, Donovan Van Osdol

ASSISTANT PROFESSORS: R. Daniel Bergeron, Eugene Freuder, Marie Gaudard, Robert Russell

The department offers courses leading to three graduate degrees: Master of Science for Teachers, Master of Science, and Doctor of Philosophy.

Master of Science for Teachers

Admission Requirements: Completion of all requirements for secondary school teacher certification in mathematics.

Degree Requirements: 1) Ten semester courses approved by the department. These will normally be taken from the courses numbered 801-829 and will usually include the six courses numbered 803-808. 2) A comprehensive examination based primarily on material in courses 803-808. It is not possible to study full time during the academic year toward the Master of Science for Teachers degree. The courses in this program are offered primarily in summer institutes.

Master of Science in Mathematics

Admission Requirements: A year of abstract and linear algebra or a year of real analysis. Preference will be given to applicants who have completed both these sequences.

Degree Requirements: Ten semester courses approved by the department. These must be chosen from courses numbered 701-799 or 830-849. At least six of the ten must be from the 830-849 group. An oral comprehensive examination is based primarily on the courses taken.

Master of Science in Computer Science

Admission Requirements: High-level language programming, assembler language programming, data structures. Further experience in computer science, mathematics, and/or electrical engineering will also be expected.

Degree Requirements: Ten semester courses approved by the department. All must be numbered over 700 and six of the ten must be chosen from the following group: CS 850-859, CS 898, CS 899 (may be used for two courses), E E 860, 865. A master's thesis or project is required.

Doctor of Philosophy

The department offers the Ph.D. under two labels: mathematics and mathematics-education. (A detailed description of the Ph.D. program is available from the department.) These programs have a common core as follows:

Admission Requirements: same as for the Master of Science in Mathematics.

Basic Degree Requirements: 1) all of the courses numbered 833-839; 2) experience in teaching equivalent to at least half-time for one year; and 3) written comprehensive examination; this involves algebra, analysis (real and complex), and general topology, and should be taken after three semesters in residence.

Additional Degree Requirements for the Ph.D. in Mathematics: 4) proficiency in reading mathematical literature in two of three languages: French, German, and Russian; 5) advanced work in a major (the field of the thesis) and a minor (usually another field of mathematics or mathematics-education) with an oral examination in these two fields; and 6) thesis—new and original mathematical results will be required. Thesis work is available in algebra, applied mathematics, analysis, and topology.

Additional Degree Requirements for the Ph.D. in Mathematics-Education: 4) language requirement as in Ph.D. in mathematics except that mastery of an approved research tool may be substituted for one language; 5) advanced work in a major (mathematics-education) and a minor (usually education) with an oral examination in these two fields; 6) thesis—new and original results involving pedagogical problems in mathematics will be required.

Mathematics (Math)

Courses numbered between 600 and 699 may be taken for graduate credit by nonmajors only.

636. PROBABILITY AND STATISTICS

Sample spaces (discrete only), events, combinations, conditional probability, independence, distributions, expectation, statistical description, random variables, sampling, estimation, tests, and applications. Credit toward a mathematics major only in mathematics education and option programs. 4 cr.

644. APPLIED PROBABILITY AND STATISTICS

Introductory course for students in engineering, the physical sciences, interdisciplinary mathematics programs, and computer science. Prereq: calculus. Not for credit if credit received for Math 636. 4 cr.

645. APPLIED LINEAR ALGEBRA

Applied matrix theory; eigenvalue problems and their applications in mathematics, physics, and engineering; systems of linear, ordinary, differential equations. Computer methods will be used. Prereq: intro comp prog; diff eqns; multidim calculus. 4 cr.

646. ANALYSIS FOR APPLICATIONS

Initial-boundary-value problems of mathematical physics; Sturm-Liouville problems; series expansions by orthogonal functions; Green's functions; numerical methods. Prereq: intro comp prog; diff eqns; multidim calculus. 4 cr.

647. COMPLEX ANALYSIS FOR APPLICATIONS

Complex numbers; complex integration; infinite series; contour integration; conformal mapping; Fourier and Laplace transforms; Wiener-Hopf techniques. Prereq: multidim calculus. 4 cr.

656. INTRODUCTION TO NUMBER THEORY

Unique factorization, linear and quadratic congruences, quadratic reciprocity law, arithmetic functions, quadratic forms, introduction to algebraic numbers. Prereq: intro abstract math. 4 cr.

657. GEOMETRY I

Advanced approach to fundamental properties of Euclidean geometry. Prereq: intro abstract math. 4 cr.

658. GEOMETRY II

Systems of postulates of various geometries, geometric invariants, synthetic and analytic projective geometry, introduction to non-Euclidean geometry. Prereq: intro abstract math. 4 cr. (Not offered every year.)

682. NONLINEAR DIFFERENTIAL EQUATIONS

Phase plane analysis of autonomous systems; critical points; limit cycles; periodic solutions; approximate methods for second-order nonlinear equations; stability and asymptotic behavior of solutions. Prereq: diff eqns. 4 cr. (Not offered every year.)

A maximum of four of the following courses may be applied to the degree of Master of Science in mathematics or computer science.

735. PROBABILITY

Sample spaces (discrete and continuous); random variables; conditional probability; moments; binomial, Poisson, and normal distributions; limit theorems for sums of random variables. Prereq: multidim calculus. 4 cr.

736. STATISTICS

Sampling theory, estimation of parameters, testing of hypotheses, nonparametric methods. Prereq: Math 735. 4 cr.

737. DECISION THEORY AND BAYESIAN METHODS

Utility, decision problems, prior and posterior distributions, sufficiency, estimation and hypothesis testing, linear models, and sequential sampling. Emphasis on applications to business and economics. Prereq: Math 735. (Also offered as Econ 737.) 4 cr. (Not offered every year.)

738. MULTIVARIATE ANALYSIS

Multivariate distributions, convergence theorems, estimation and hypothesis testing, multivariate ANOVA, principal components, canonical correlations, discriminant analysis. Prereq: Math 735; either Math 645 or Math 762. 4 cr. (Not offered every year.)

745-746. FOUNDATIONS OF APPLIED MATHEMATICS I AND II

Fourier analysis, optimization methods, residue calculus, conformal mapping, linear operations, eigenvalue problems, Sturm-Liouville systems, analytical and numerical solution of ordinary and partial differential equations. Prereq: diff eqns; multidim calculus; /or equiv. 4 cr.

753. NUMERICAL METHODS AND COMPUTERS I

Numerical analysis on computers; high-level languages, compilers; linear and nonlinear equations; interpolation, quadrature, curve fitting, system simulations, optimization techniques, finite elements, computer graphics. Selected algorithms programmed for computer solution. Prereq: calculus; intro to comp prog. 4 cr.

Mathematics and Computer Science

754. NUMERICAL METHODS AND COMPUTERS II

Computer solutions of ordinary and partial differential equations, finite differences vs. finite elements, eigenvalues and eigenvectors, algorithms for hidden-line graphics. Mathematical software. Prereq: diff eqns; intro to comp prog. 4 cr.

761. ABSTRACT ALGEBRA

Basic properties of groups, rings, fields and their homomorphisms. Prereq: intro abstract math. 4 cr.

762. LINEAR ALGEBRA

Vector spaces, linear transformations, matrices, determinants, dual spaces, eigenvalues, spectral and canonical decomposition theorems. Not for credit if credit received for Math 645. Prereq: Math 761. 4 cr.

764. ADVANCED ALGEBRA

Vector spaces, modules over principal and ideal domains, structure of finitely generated modules, finite abelian groups, elementary theory of fields. Prereq: Math 761. 4 cr. (Not offered every year.)

767. ONE-DIMENSIONAL REAL ANALYSIS

Theory of limits, continuity, differentiability, integrability, series, uniform convergence. Prereq: multidim calculus; intro to abstract math. 4 cr.

768. ABSTRACT ANALYSIS

Metric spaces, function spaces, theory of uniform limits. Prereq: Math 767. 4 cr. (Not offered every year.)

769. MULTIDIMENSIONAL REAL ANALYSIS

Partial derivatives, multiple integrals, line and surface integrals, Fourier series. Prereq: Math 767. 4 cr. (Not offered every year.)

776. LOGIC

Formal mathematics and formal systems. Consistency, completeness, decidability. Prereq: intro abstract math. 4 cr. (Not offered every year.)

784. TOPOLOGY

Connectedness, compactness, metrizability; with special emphasis on real line and plane. Prereq: intro abstract math. 4 cr.

785. ALGEBRAIC METHODS IN TOPOLOGY

Topology of manifolds, topological groups, homology, knot theory. Prereq: Math 784. 4 cr. (Not offered every year.)

788. COMPLEX ANALYSIS

Complex functions, sequences, limits, differentiability and Cauchy-Riemann equations, elementary functions, Cauchy's theorem and formula, Taylor's and Laurent's series, residues, conformal mapping. Not for credit if credit received for Math 647. Prereq: Math 767. 4 cr.

The following courses may be applied to the degree of Master of Science for Teachers in mathematics and to no other degree in mathematics.

801-802. MATHEMATICS AND COMPUTING FOR TEACHERS

Linear equations, linear inequalities, computer arithmetic and programming, never-ending algorithms, algorithms for areas, computer-oriented numerical methods. Introduction to methods of computation using a computer in the context of a mathematics course. BASIC and FORTRAN programming languages will be taught. 6 cr.

803-804. HIGHER ALGEBRA FOR TEACHERS

The integers, integral domains, and topics from number theory; equivalent relations and congruences; real numbers, complex numbers, and fields, polynomials; group theory; elements of matrix theory; vectors and vector spaces; rings; Boolean algebra. 3 cr.

805-806. HIGHER GEOMETRY FOR TEACHERS

Systems of postulates of various geometries; geometric invariants; synthetic and analytic projective geometry; an introduction to non-Euclidean geometry; and topology. 3 cr.

807-808. HIGHER ANALYSIS FOR TEACHERS

The real number system; variables, functions and limits; elements of set theory; numerical sequences and series; continuity; the derivative and the Riemann integral maxima and minima. 3 cr.

809. PROBABILITY AND STATISTICS FOR TEACHERS.

Permutations and combinations; finite sample spaces; random variables; binomial distributions; statistical applications. 3 cr.

810. MATHEMATICS EDUCATION

Current developments and issues in mathematics education. A seminar focused on content, curricula, methods, and psychology of teaching mathematics. 1-4 cr.

811. COMPUTERS AND THEIR USES

3 cr.

814. TOPOLOGY FOR TEACHERS

Fundamental concepts of elementary topology; network and map problems; sets, spaces, and transformations. 3 cr.

816. THEORY OF NUMBERS FOR TEACHERS

Divisibility and primes; congruences; quadratic reciprocity; number theoretic functions; Diophantine equations; Farey fractions; algebraic numbers. 3 cr.

817. THEORY OF SETS AND ELEMENTARY LOGIC

An introduction. 3 cr.

819. THE REAL NUMBER SYSTEM

A postulational approach. Brief discussion of algebraic structures. Introduction to the sequences, limits, and continuity. 3 cr.

820. HISTORY OF MATHEMATICS

A problem-study approach to mathematical problems and solutions from the period of Greek mathematics until the 1950s will be used to present the history of mathematics. 3 cr.

821. A MODERN APPROACH TO GEOMETRY

The foundations and development of Euclidean geometry, with emphasis on the recent School Mathematics Study Group's recommendations in the field of high school geometry. 3 cr.

826. SELECTED TOPICS IN ALGEBRA

Topics selected to supplement the teacher's previous training in algebra, chosen from among the following: linear algebra, vector spaces, groups, rings and ideals, and fields. 3 cr.

827. SELECTED TOPICS IN GEOMETRY

Topics selected to supplement the teacher's previous training in geometry, chosen from among the following: analytic projective geometry, non-Euclidean geometry, transformation theory, elementary metric differential geometry, topology. 3 cr.

828. SELECTED TOPICS IN ANALYSIS

Topics selected to supplement the teacher's previous training in analysis, chosen from among the following: sequences and series of real functions, Riemann integration, partial differentiation, complex functions, differential equations. 3 cr.

829. DIRECTED READING

A directed reading project on a selected topic in mathematics chosen to supplement the teacher's previous institute courses. A written examination will be required. 3 cr.

The following are the basic courses for both the Master of Science and Doctor of Philosophy degrees in mathematics.

833-834. ALGEBRA

Groups; rings, modules; fields; linear algebra. Prereq: undergrad abstract algebra. 3 cr.

835. MEASURE AND INTEGRATION

Outer measures and measures; Lebesgue integrals; convergence theorems. Prereq: undergraduate real analysis. 3 cr.

836. FUNCTIONAL ANALYSIS

Banach spaces; representation of linear functionals; weak and weak* topologies. Prereq: Math 835. 3 cr.

837. COMPLEX ANALYSIS

Open mapping theorem; maximum modulus theorem; normal families and Riemann mapping theorem; harmonic functions; representation theorems; analytic continuation. Prereq: undergrad complex analysis. 3 cr.

838. ALGEBRAIC TOPOLOGY

Chain complexes; homology of simplicial complexes, singular homology and cohomology; axiomatic homology; cup and cap products. Prereq: undergrad abstract algebra and topology. 3 cr.

839. GENERAL TOPOLOGY

Subspace, product, and quotient topologies; embedding; separation and countability axioms; connectedness; compactness and compactifications; paracompactness, metrization, and metric completions. Prereq: undergrad general topology. 3 cr.

The following more specialized courses are offered on an irregular schedule whenever mutual faculty and student interest justifies it. Content will vary from year to year and will normally be chosen from among the topics listed. With the permission of the instructor, each of these courses may be taken more than once for credit.

841. TOPICS IN LOGIC AND FOUNDATIONS

Recursive functions; independence proofs; models; forcing techniques. 3 cr.

842. TOPICS IN ALGEBRA

Homological algebra; algebraic number theory; local algebra; category theory; group theory; ring theory; field theory. 3 cr.

843. TOPICS IN TOPOLOGY

Topological groups; algebraic topology; general topology. 3 cr.

Mathematics and Computer Science

844. TOPICS IN ANALYSIS

Calculus of variations; harmonic analysis; integral equations; operator theory; linear topological spaces; partially ordered spaces; topological algebras; complex variables. 3 cr.

845. TOPICS IN DIFFERENTIAL EQUATIONS

Linear systems; general autonomous systems; two-dimensional systems; boundary value problems; qualitative theory; stability theory; partial differential equations; functional analytic methods. 3 cr.

846. TOPICS IN APPLIED MATHEMATICS

Distribution theory; potential theory; mechanics; control theory; mathematical biology; model theory; operations research. 3 cr.

847. TOPICS IN MATHEMATICS EDUCATION

The psychology of teaching and learning mathematics; supervision in mathematics teaching; curriculum theory; new curriculum projects; curriculum evaluation. 3 cr.

848. TOPICS IN GEOMETRY

Analysis on manifolds; differential geometry; Riemannian geometry; algebraic geometry; convexity. 3 cr.

849. TOPICS IN PROBABILITY AND STATISTICS

Time series analysis; analysis of variance; stochastic processes; probability; design of experiment; hypothesis testing; estimation theory; nonparametric statistics. 3 cr.

The following courses are introductions to research opportunities for Doctor of Philosophy candidates. With the permission of the instructor, each of these courses may be taken more than once for credit.

861, 862. ADVANCED TOPICS IN ALGEBRA

3 cr.

865, 866. ADVANCED TOPICS IN GENERAL TOPOLOGY

3 cr.

867, 868. ADVANCED TOPICS IN ALGEBRAIC GEOMETRY

3 cr.

869, 870. ADVANCED TOPICS IN FUNCTIONAL ANALYSIS

3 cr.

871, 872. ADVANCED TOPICS IN ALGEBRAIC TOPOLOGY

3 cr.

873, 874. ADVANCED TOPICS IN APPLIED MATHEMATICS

3 cr.

879, 880. ADVANCED TOPICS IN MATHEMATICS EDUCATION

3 cr.

898. READING COURSES

A) Algebra; B) Analysis; C) Topology; D) Geometry; E) Functional Analysis; F) Differential Equations; G) Applied Mathematics; H) Probability and Statistics; I) Mathematics Education. 1-6 cr.

999. DOCTORAL RESEARCH

Computer Science (C S)

Courses numbered between 600 and 699 may be taken for graduate credit by nonmajors only.

611. ASSEMBLER-LANGUAGE PROGRAMMING

Assembler-language coding and programming techniques. Data representation, system organization, program segmentation, linkage of control section, manipulation of bits or bytes, micro- and macroprogramming. Input/output using System macros. Interrupts. Prereq: intro prog. 4 cr.

612. DATA STRUCTURES AND PROCESSES

Data structure programming techniques and program structure using a higher-level language. Linear lists, strings, arrays, trees, and graphs. Symbol tables, sorting and searching techniques. Data organization, record-oriented and stream-oriented data transmission, conversion techniques, and storage allocation. Prereq: intro prog. 4 cr.

A maximum of four courses numbered 700 to 799 may be applied to the Master of Science degree in Mathematics or Computer Science.

710. ADVANCED PROGRAMMING SYSTEMS

Review of batch-process systems programs. Software organization; multiprogramming systems; techniques for parallel processing; multiaccessing and multiprocessing. Core management, file system design and management, and system accounting. Design of system modules and interfaces. Prereq: C S 611. 4 cr.

711. PROGRAMMING LANGUAGES AND COMPILER CONSTRUCTION

Formal definition of programming languages; specification of syntax and semantics. Global properties of algorithmic languages such as PL/I and ALGOL. Review of special purpose languages for list processing, symbol manipulation, data description and simulation; run-time representation of program and data structures; how these properties affect compilation. Prereq: C S 612. 4 cr.

713. COMPUTER GRAPHICS

Input-output and representation of pictures from hardware and software points of view; interactive techniques and their applications; development of an interactive graphics system. Prereq: permission. 4 cr.

The following are the basic courses for the Master of Science degree in computer science.

850. OPTIMIZATION METHODS AND COMPUTERS

Optimization methods applied to problems in engineering, science, and management. Classical optimization methods; dynamic programming; integer programming; separable programming; search methods; geometric programming; combinatorial optimization. Prereq: Math 753 or permission. 3 cr.

851. DATA BASE SYSTEMS

Access control techniques; access strategies; data base software; data base related languages; data translation techniques; recovery and restart; restructuring; concurrent access methods; very large data bases; performance and evaluation; protection and security. Prereq: C S 710 or permission. 3 cr.

852. SOFTWARE ENGINEERING

Design approaches, implementation methodologies, and management techniques required to develop large, reliable software systems including applications-oriented systems. Team programming projects. Prereq: C S 710 or permission. 3 cr.

853. ARTIFICIAL INTELLIGENCE

Current approaches to machine intelligence and the simulation of human cognitive processes, including an introduction to recursive functions and programming with the LISP language. Heuristic programming, programs for game playing and natural language understanding, elementary theory of computability. Individual computer project required. Prereq: programming experience. (Also offered as E E 853.) 3 cr.

854. AUTOMATA THEORY

Formal language and theoretical "machines" or automata. Formal grammars; context-dependent, context-free, and regular languages; finite state machines and regular expression recognizers; infinite state machines; Turing machines; unsolvable problems and the halting problem; linear-bounded and push-down automata; cellular and reproducing automata. Prereq: programming experience. (Also offered as E E 854.) 3 cr.

855. OPERATING SYSTEMS TECHNIQUES

Theoretical aspects of operating systems. Scheduling and resource allocation; deadlock; paging and segmentation; thrashing; synchronization; interprocess communication; cooperating sequential processes; protection and security; in-depth study of a complex system such as MULTICS. Prereq: C S 710 or equivalent. 3 cr.

856. COMPUTER NETWORKS

Distributed computer systems; techniques for connecting and controlling them. Tightly coupled systems to loosely coupled systems. Design, capabilities, and problems associated with different types of connections. Organizational possibilities for networks. Queuing theory applied to computer networks. Modeling and performance evaluation in distributed systems. Nets such as ARPA. Prereq: E E 712 or equivalent; C S 855. 3 cr.

898. READING COURSE

1-6 cr.

899. THESIS/PROJECT

3-6 cr.

Mechanical Engineering (M E)

Chairperson: William Mosberg

PROFESSORS: Robert W. Corell, Godfrey H. Savage, Charles K. Taft, Asim Yildiz

ASSOCIATE PROFESSORS: E. Eugene Allmendinger, Wayne M. Beasley, Barbaros Celikkol, Frederick G. Hochgraf, David E. Limbert, William Mosberg, Russell L. Valentine, John A. Wilson

ASSISTANT PROFESSOR: M. Robinson Swift

The mechanical engineering department offers programs of study, from the viewpoint both of the engineering sciences and of engineering design, in mechanics, materials science, automatic control, and the thermal sciences, leading to the degree of Master of Science in Mechanical Engineering. The programs provide the background required for careers in research, engineering design, or teaching, or for further graduate study.

Mechanical Engineering

To be admitted to graduate study in mechanical engineering, students should have completed work equivalent to that required by the University of New Hampshire for a Bachelor of Science degree in the field.

A candidate for the degree of Master of Science shall satisfy the requirements of either a thesis plan or a project plan. The thesis plan requires 24 semester hours of coursework in addition to M E 899, Master's Thesis; the project plan requires 30 semester hours of coursework in addition to M E 892, Master's Project. Individuals with special qualifications may petition the department to be excused from the project requirement. An oral examination covering the candidate's graduate work will be given whether or not a thesis is presented.

Students interested in graduate study beyond the master's degree should refer to the interdepartmental Engineering Ph.D. program which includes the following areas of specialization: engineering system design, signal processing, theoretical and applied mechanics, and transport phenomena. For details refer to the section entitled Engineering Ph.D. Program.

No more than two graduate courses taken prior to admission to the Graduate School may be applied to the master's degree. Courses numbered between 600 and 699 may be taken for graduate credit by nonmajors only.

Permission of the instructor and consent of the adviser are required for enrollment in all mechanical engineering graduate courses.

701. MACROSCOPIC THERMODYNAMICS

Thermodynamic principles using an analytic, postulational approach and Legendre transformations to obtain thermodynamic potentials. 4 cr.

702. STATISTICAL THERMODYNAMICS

Macroscopic thermodynamic principles developed by means of microscopic analysis. Prereq: thermodynamics. 4 cr.

703. HEAT TRANSFER

Analysis of phenomena; steady-state and transient conduction, radiation, and convection; engineering applications. Co- or prereq: fluid dynamics. 3 cr.

707. ANALYTICAL FLUID DYNAMICS

Development of the Navier-Stokes equations; vorticity theorems; turbulence and boundary-layer theory. Prereq: fluid dynamics. 4 cr.

708. GAS DYNAMICS

Basic equations of motion of one-dimensional, subsonic and supersonic flows of compressible, ideal fluids. Wave phenomena. Rankine-Hugoniot relations. Linear approach to two-dimensional flow problems. Prereq: fluid dynamics. 4 cr.

710. SOLAR HEATING SYSTEMS

Analysis and computer modeling of solar radiation as an energy source for heating. Phenomena, availability, collection, performance, and economy of solar energy for heating systems. Prereq: M E 703. 3 cr.

717. CRYOGENICS

Phenomena and processes at very low temperatures. Basic engineering sciences applied to problems of low temperature refrigeration, liquefaction, separation, and storage; transport of cryogenic fluids; measurement systems; vacuum technology. Prereq: thermodynamics. 4 cr.

723. ADVANCED DYNAMICS

Classical dynamics oriented to contemporary engineering applications. Review of particle dynamics. Hamilton's principle and the Lagrange equations. Kinematics and dynamics of rigid bodies, gyroscopic effects in machinery and space structures. 4 cr.

724. VIBRATION THEORY AND APPLICATIONS

Discrete vibrating systems. Linear system concepts; single-degree-of-freedom systems with general excitation. Matrix theory and eigenvalue problems. Many degrees of freedom, normal mode theory for free and forced vibration. Numerical methods; introduction to continuous systems; applications to structural and mechanical systems. Prereq: intro vibrations. 4 cr.

726. EXPERIMENTAL MECHANICS

Experimental methods and theoretical bases applied to measurement of stress, strain, and motion. Transmitted and scattered-light photoelasticity; strain gauge applications; brittle coating and grid techniques; dynamic measurements, and associated instrumentation. 4 cr.

727. ADVANCED MECHANICS OF SOLIDS

Beams on elastic foundation, curved bars, inelastic behavior, instability, introduction to thin plates and shells, introduction to elasticity, energy methods, and numerical methods. 4 cr.

730. MECHANICAL BEHAVIOR OF MATERIALS

Elastic and inelastic behavior of materials in terms of micro- and macromechanics. Stress, strain, and constitutive relations related to recent developments in dislocation theory and other phenomena on the atomic scale and to the continuum mechanics on the macroscopic scale. Elasticity, plasticity, viscoelasticity, creep, fracture, and damping. Anisotropic and heterogeneous materials. 4 cr.

737. OCEAN MECHANICS I

Ocean as a continuous medium, its mechanical and thermodynamic properties. Shallow- and deep-ocean modeling for the investigation of gravity and sound waves. Ocean subbottom and its soil mechanical and sound propagation properties. Instrumentation, rudimentary data collecting and processing procedures, and computer usage. Prereq: fluid dynamics; mechanics; diff eqns; multidim calculus. 4 cr.

738. OCEAN MECHANICS II

Ocean dynamical laws generalized to include temperature and salinity variations in the water column. Conservation laws with generalized equation of state. Air-sea interaction, energy transport phenomena, reflection from different coastal geometry, harbor resonances, internal currents. Sound reflection from subbottom, sound probing techniques to determine subbottom properties by ray theory and generalization of subbottom soil from an elastic to a viscoelastic medium. Prereq: M E 737; M E 781 desirable but not required. 4 cr.

741. FLUID CONTROL SYSTEMS

Mathematical modeling of hydraulic, pneumatic, and fluidic control elements and control systems. Methods for: 1) analysis of systems using gases or liquids as the working fluid; 2) synthesis of the parameters of the control elements used in automatic control systems; 3) design of these systems. (Also offered as E E 741.) 4 cr.

751. NAVAL ARCHITECTURE IN OCEAN ENGINEERING

Selected topics in the fundamentals of naval architecture pertinent to ocean engineering, including hydrostatic characteristics, basics of resistance and propulsion and rules and regulations for surface, semisubmersible, and submersible marine vehicles. Computer applications. Prereq: fluid dynamics; mechanics; /or permission. 4 cr.

752. SUBMERSIBLE VEHICLE SYSTEMS DESIGN

Conceptual and preliminary design of submersible vehicle systems; submersibles, environmental factors, hydromechanic and structural principles, materials, intra/extravehicle systems, operating considerations, predesign and design procedures. Design projects selected and completed by student teams. Prereq: permission. 4 cr.

757. COASTAL ENGINEERING AND PROCESSES

Introduction to small amplitude and finite amplitude wave theories. Wave forecasting by significant wave method and wave spectrum method. Coastal processes and shoreline protection. Wave forces and wave structure interaction. Introduction to mathematical and physical modeling. Prereq: fluid dynamics or permission. 3 cr.

760. PHYSICAL METALLURGY I

Introduction to the electron theory of metals, intermetallic compounds, ferromagnetism, dislocations, and slip phenomena. 4 cr.

761. X-RAY DIFFRACTION

Physics of x-ray diffraction, the reciprocal lattice, lattice parameter determinations, space group identification, phase identification, characterization of preferred orientation. Lab. 4 cr.

763. MICROSTRUCTURE OF SOLIDS

Basic concepts and measurements; statistically exact expressions for points, lines, surfaces, and volumes; random, partially oriented and oriented structures; particle and grain characteristics and distributions; projected images and shape specification; practical applications. 4 cr.

766. PHYSICAL CERAMICS

Characteristics of crystalline and noncrystalline ceramic solids; defect structures; diffusion in ceramic materials; nucleation, crystal growth, and solid-state reactions; kinetics of grain growth; sintering, and vitrification. 4 cr.

771. DYNAMIC SYSTEMS MODELING

Lumped parameter models for mechanical, electrical, fluid, thermal, and mixed systems. Time-domain solutions, frequency-response plots, matrix representations, eigen vectors, and eigenvalues are used to explore system response. Introduction to nonlinear analysis, simulation, computer applications. 3 cr.

781. MATHEMATICAL METHODS IN ENGINEERING SCIENCE I

Solution of discrete and continuous systems. Review of calculus, linear algebra, complex numbers, Fourier series, differential and partial differential equations with examples from acoustics, vibration theory, hydrodynamics, elasticity, solid mechanics, transport theory, and particle mechanics. 4 cr.

782. CONTROL SYSTEMS

Fundamental principles involved in the design and analysis of feedback control systems. Topics include stability criterion, time-domain analysis, frequency-domain analysis and introduction to nonlinear systems. Lab. (Also offered as E E 782.) 4 cr.

793 A-D-794 A-D. SPECIAL TOPICS IN ENGINEERING

Course numbers refer to topics in A) Thermodynamics; B) Mechanics; C) Engineering Design; and D) Materials, respectively. Content of these courses may vary from year to year. 2-4 cr.

795 A-D-796 A-D. INDEPENDENT STUDY

Course numbers refer to topics in A) Thermal Science; B) Solid Mechanics; C) Engineering Design; and D) Materials, respectively. 2-4 cr.

Mechanical Engineering

801. IRREVERSIBLE THERMODYNAMICS

Nonequilibrium thermodynamics from the viewpoint of fluctuation theory. The Onsager reciprocal relations. Prereq: M E 701. 4 cr.

803. CONDUCTION HEAT TRANSFER

Heat conduction equation temperature fields and heat flux vector; analytical solution of the conduction equation in several variables; initial and boundary value problems; numerical methods of solution. 4 cr.

804. RADIATION HEAT TRANSFER

The fundamentals of radiant heat transfer. Development and solution of the wave equation for electromagnetic radiation. Analysis of Planck's law of radiation and earlier theories. Methods of solution of radiant interchange in real systems with and without absorbing media. 4 cr.

806. CONVECTION HEAT TRANSFER

An analytical study of heat transfer to laminar and turbulent boundary layers of compressible and incompressible fluids. Basic differential equations governing the heat transfer are derived and analytical solutions are obtained where possible and checked with experimental results. 4 cr.

807. COMPRESSIBLE FLUID FLOW

General equations of motion for real and ideal compressible fluid flow including normal and oblique shocks, Prandtl Meyer flow, and methods of solutions. Applications to jet propulsion and turbo machinery. Prereq: M E 707 or 708. 4 cr.

808. THEORETICAL AERO/HYDRO-MECHANICS

The mathematical development of the equations of frictionless fluid flow, using both tensor notation and various coordinate systems. Conformal mapping; Blasius theorem; Joukowski hypothesis; flow around airfoils. Schwarz Christoffel theorem and vortex motion. 4 cr.

822. CONTINUUM MECHANICS

Conservation laws for gases, liquids, and solids in a continuum are developed starting from Liouville and Boltzmann equations. Passage from a discrete system to a continuum is discussed. Constitutive equations for viscoelastic and thermoelastic fields; and nonlinear gas, liquid, and elastic fields. General discussion of rheological behavior. Causality conditions for continuum fields. Examples for solids, liquids, and gases, and biomechanics. Introduction to phenomenological Lagrangian theories. 4 cr.

824. VIBRATIONS OF CONTINUOUS MEDIA

Classical and numerical methods are employed to study the vibration of continuous elements and structures. Topics considered are axial and torsional vibration of rods, transverse vibration of beams and thin plates, wave propagation, and vibration of simple structures. 4 cr.

826. THEORY OF ELASTICITY

The analysis of stress and deformation in elastic solids; conservation laws for elastic media; stress and strain relations by continuous functions; Airy stress functions; elastodynamic fields, inhomogeneous, anisotropic, wave equations; wave propagation, and stress concentration problems; generalizations to thermoelasticity and viscoelastic fields. Complex variable techniques will be used. 4 cr.

827. THEORY OF PLASTICITY

Analysis of stress and deformation in inelastic solids; general development of stress invariants, variational principles, constitutive relations, and yield and loading functions. Special emphasis on ideal plasticity, strain-hardening, creep, limit analysis, and limit design. 4 cr.

829. THEORY OF PLATES AND SHELLS

Theory of elasticity developed for plates and shells; conservation laws for elastic media; stress and strain relations by continuous functions; Airy stress functions; stress and strain relations in curvilinear coordinates; thin and thick plate and shell theories; vibration of spherical, cylindrical, and conical shells and plates. 4 cr.

838. THEORETICAL ACOUSTICS

Fundamentals are presented with emphasis on theory and applications in underwater acoustics and in the acoustic determination of dynamic material properties. Topics include: a review of vibration theory; derivation of nonlinear acoustic field equations; linearization; Green's function techniques and solution of boundary value problems; scattering, reflection theories of boundary roughness; development of ray theory (geometric optics) from field equations; and Eikonal approximations. 4 cr.

842. DISCONTINUOUS CONTROL

Analysis and synthesis of feedback control systems operating on quantized information; compensation and performance improvement methods which use the quantized nature of the information are also developed. (Also offered as E E 842.) 4 cr.

844. NONLINEAR CONTROL SYSTEMS

Analysis and design of nonlinear control systems from the classical and modern viewpoints are discussed. Liapunov's stability theory; phase space methods; linearization techniques; simulation; frequency response methods; generalized describing functions; transient analysis utilizing functional analysis; and decoupling of multivariable systems. Prereq: M E 851. (Also offered as E E 844.) 4 cr.

851. ADVANCED CONTROL SYSTEMS I

State-space representation of multivariable systems; analysis using state transition matrix. Controllability and observability; pole placement using state and output feedback; Luenberger observers. Introduction to computer controlled systems (sampling, discrete state representation, hybrid systems); nonlinear analysis (Liapunov, Popov, describing function). Prereq: E E/M E 782. (Also offered as E E 851.) 3 cr.

852. ADVANCED CONTROL SYSTEMS II

Special topics in control theory: continuous and discrete systems; optimal control systems, including calculus of variations, maximum principle, dynamic programming, Wiener and Kalman filtering techniques, stochastic systems, adaptive control systems. Prereq: E E/M E 851. (Also offered as E E 852.) 3 cr.

861. PHYSICAL METALLURGY II

Thermodynamics of solid solutions and mixtures, kinetics of selected solid state reactions including precipitation and recrystallization, martensite transformations. 4 cr.

865. CONDUCTION PROPERTIES IN SOLIDS

Topics in metal and semiconductor physics. Quantum theory, electron energy states, scattering processes, band theory, electron and hole conduction, and the P-N junction. 4 cr.

882. MATHEMATICAL METHODS IN ENGINEERING SCIENCE II

This course is a continuation of M E 781. Topics treated include complex variable techniques, integral transform techniques for the solution of differential and partial differential equations, Green's functions. Weiner-Hopf techniques, variational techniques. Stochastic problems with application to random vibration, statistical control theory, turbulence, heat conduction and fluctuation phenomena in solids, transport theory, gases, and liquids. Topics may vary from year to year. Prereq: M E 781. 4 cr.

883. TENSOR ANALYSIS AND DIFFERENTIAL GEOMETRY

Mathematical groundwork for applied group theory, transformation groups, affine groups and affine geometry. Coordinate transformations and point transformations. Affinors, tensors, and their algebraic properties. Invariant differential operators. Lie derivative, holonomic and anholonomic coordinate systems. Curvature tensor, Bianchi identity, tensor densities. Green's theorem, Green's functions, potential functions, Pfaff's problem. 4 cr.

890 A-D, 891 A-D. SPECIAL TOPICS IN ENGINEERING

Course numbers refer to topics in A) Thermodynamics; B) Mechanics; C) Engineering Design; and D) Materials. Content of these courses may vary from year to year. 2-4 cr.

892. MECHANICAL ENGINEERING MASTER'S PROJECT

The student works with a faculty member during one or two semesters on a well-defined research and/or original design problem. A written report and seminar are presented. 1-4 cr.

895 A-D, 896 A-D. GRADUATE INDEPENDENT STUDY

Investigation of graduate-level problems or areas germane to mechanical engineering. 1-4 cr.

899. MASTER'S THESIS

6-10 cr.

Students may also enroll in Technology 601.

601. STATISTICAL METHODS IN ENGINEERING AND PHYSICAL SCIENCE

Methods of organizing data and statistical techniques for data analysis, as applied to problems in engineering and physical science. Elementary probability theory, probability distribution; tests of significance, correlation, and regression analysis. Design of experiments; completely randomized blocks; factorials, fractional factorials; process optimization. Introduction to quality control; construction and analysis of control charts for variables and attributes; statistical aspects of tolerance. 4 cr.

Microbiology (Micr)

Chairperson: Galen E. Jones

PROFESSORS: William R. Chesbro, Galen E. Jones, Theodore G. Metcalf

ASSOCIATE PROFESSORS: Thomas G. Pistole, Robert M. Zsigray

ASSISTANT PROFESSORS: David L. Balkwill, Richard P. Blakemore

Students admitted to graduate study in microbiology are expected to have had adequate preparation in the biological and physical sciences and in the basic courses in microbiology.

The candidate for the Master of Science degree will be required to complete a thesis. Candidates for the Doctor of Philosophy degree must teach at least one semester, or have had equivalent experience; must demonstrate to the doctoral committee a broad, basic knowledge of the field of microbiology; and must complete a dissertation embodying the results of original research in microbiology.

Departmental research activities emphasize bacterial host-parasite interactions, immunology, analysis of microbial structures, bacterial and bacteriophage genetics, environmental virology, cell culture phenomena, public health aspects of microbiology and virology, bacterial physiology, and marine and soil microbiology.

701. TAXONOMY AND ECOLOGY

Isolation, identification, and classification of prokaryotic microorganisms by classical and newer techniques; analysis of the interplay between organisms and environment based on energy metabolism and use of this to deduce a natural classification; uses of taxonomic and ecological information. Prereq: gen micr; gen bchm. Lab. 4 cr.

702. PATHOGENIC MICROBIOLOGY

Morphological, cultural, biochemical, serological, and pathogenic characteristics of microorganisms causing human and animal diseases. Prereq: gen micr. Lab. 4 cr.

705. IMMUNOLOGY AND SEROLOGY

Defensive elements possessed by humans and animals protected against infectious microorganisms. Principles of serological techniques for recognition and identification of biological materials including microorganisms. Preparation of vaccines and production of antisera in animals. Prereq: Micr 702, permission. Lab. 4 cr.

706. VIROLOGY

Viruses, including animal and bacterial, and rickettsiae; interaction of viruses and host cells; techniques for propagation and recognition including immunologic methods; applications to infectious disease, the environment, and cancer. Prereq: Micr 702; permission. Lab. 4 cr.

707. MARINE MICROBIOLOGY

Characterization of microorganisms in the sea including taxonomy, physiology, and ecology; sampling, enumeration, distribution; and effects of marine environment upon microbial populations. Prereq: gen micr; organic chemistry. Lab. 4 cr.

708. MICROBIAL BIOGEOCHEMISTRY

Geochemical processes influenced by biochemical processes catalyzed by marine and terrestrial microorganisms; transformations of carbon, nitrogen, and other elements. Petroleum microbiology, natural gas production, sulfur formation, ferromanganese nodules, corrosion, and fossil microorganisms. Prereq: gen micr; organic chemistry. Lab. 4 cr.

709. MICROBIAL CYTOLOGY TECHNIQUES

Light and electron microscopic techniques for the study of microbial cytology; theory and use of the electron microscope, sample preparation methods, photomicrography and photographic dark-room techniques, interpretation of electron micrographs. Prereq: gen micr or permission. 4 cr.

710. MICROBIAL CYTOLOGY AND ULTRASTRUCTURE

Ultrastructure of prokaryotic and eukaryotic microorganisms. Structure and function of bacterial flagella, pili, walls, membranes, mesosomes, and cytoplasmic inclusions. Cytological features of structurally unique groups of bacteria, yeasts, fungi, and protozoa. Prereq: gen micr. 3 cr.

712. SOIL MICROBIOLOGY

Microbial ecology of the soil environment; characteristics of major microbial groups in soil; factors affecting activity of soil microorganisms; their effects on the environment; and biological interactions which involve them. Prereq: gen micr. Lab. 4 cr.

795, 796. PROBLEMS IN MICROBIOLOGY

Prereq: permission. 1-8 cr.

800. SYSTEMATIC MICROBIOLOGY

Procedures, methods for classification of microorganisms; review of systems of classification. Prereq: one year of microbiology. Lab. 4 cr. (Not offered every year.)

802. MICROBIAL PHYSIOLOGY

Means by which microorganisms survive: nutritional, chemical, physical factors; metabolism and its regulation; generation of cell ultrastructure; ecological interactions. Prereq: gen micr; gen bchm. Lab. 2 or 4 cr. (Not offered every year.)

804. MICROBIAL GENETICS

Expression, regulation, recombination of transmission of genetic information in prokaryotic and eukaryotic microorganisms. Consideration of chromosomal and extrachromosomal inheritance. Prereq: gen micr or permission. Lab. 4 cr. (Not offered every year.)

806. ADVANCED IMMUNOLOGY

Basic concepts in immunology including immuno-recognition, effector systems, immunogenetics, immunopathology, and comparative immunology. Prereq: gen immunol; gen biochem; permission. Lab. 4 cr. (Not offered every year.)

808. ADVANCED MICROBIAL CYTOLOGY

Examination and discussion of selected topics; independent research using electron microscopy and/or other cytological methods. Prereq: gen micr; electron microscopy; permission. Lab. 4 cr.

851. CELL CULTURE

Theory, principles fundamental to culture of cells in vitro. Introduction to techniques of preparation and maintenance of animal, plant, insect, fish cell cultures. Application of cell culture to contemporary research in biological sciences. Prereq: gen micr or permission. Lab. (Also offered as Bot 851 and AnSc 851.) 4 cr.

897, 898. MICROBIOLOGY SEMINAR

Reports, discussions, microbiological literature, and current developments in microbiology. Prereq: permission. 1 cr.

899. MASTER'S THESIS

6-10 cr.

999. DOCTORAL RESEARCH

Music (Musi)

Chairperson: Paul Verrette

PROFESSORS: Donald Steele, John Wicks

ASSOCIATE PROFESSORS: Mark DeVoto, Alan Grishman, Stanley Hettinger, Cleveland Howard, Keith Polk, Mary Rasmussen, John Rogers, Niel Sir, Paul Verrette, John Whitlock, Henry Wing, Jr.

The Department of Music offers programs leading to the degrees of Master of Arts in music and Master of Science in music education.

Master of Arts in Music

The degree of Master of Arts in music, while designed basically for students interested in broadening their knowledge of the history of music in all of its dimensions, has proven consistently valuable to students who wish to augment strong backgrounds in performance and/or education with more specialized studies in theory, literature, and performance-practice. The following courses (or their approved equivalents) are required: Musi 855, 856, 857, 858, 891, and 893 or 894. Courses at the 700 level in music, or the 600, 700, and 800 level in other departments, may be elected with the approval of the student's adviser. It is recommended that more than two semesters be allowed for completion of the degree. The cultural advantages of the city of Boston, 90 minutes away, are a valuable adjunct to the program.

A B.A. degree in music or its equivalent from an accredited institution is required for admission to this program. A performance audition and a placement examination in theory, music history, and aural identification, are normally required of all applicants and are taken in the semester or summer preceding entrance into the graduate program. Students not meeting standards in the placement examinations will not be officially admitted to the Graduate School until such examinations are passed to the satisfaction of the department. A reading knowledge of both German and French is strongly recommended before entering the program; a German reading examination will be administered by the department. On recommendation of the graduate adviser, this requirement may be waived for students who do not plan further study beyond the M.A. degree. Completion of the program requires an oral exam and a written essay of substantive nature on a topic of the candidate's special interest.

Master of Science in Music Education

The goal of the Master of Science in music education degree is to develop a broad knowledge at the graduate level in the fields of music education, performance, history, theory, and independent study. Each candidate will be required to complete one of the following: a professional paper; a field study in music education; a satisfactory recital

appearance; a major composition, orchestration, or band arrangement; or the preparation and conducting of a major work in public performance for band, orchestra, or chorus. The following courses are required: Musi 855, 893 or 894; MuEd 796; 883 or 884. Also required are two courses in the Department of Education from courses such as the following: Educ 820, 827, 841, 853, 858, 861, 865, 883, 884, 886, and in special cases, 700, 701, and 705. Vocal or instrumental study at the 800 level is required to a minimum of 4 credits. A maximum of 9 credits is allowed if the graduate recital option is elected. Sufficient electives must be taken to total 30 credits.

Admission to this program depends upon a bachelor's degree in music education or its equivalent from an accredited institution. A performance audition and a placement examination in theory, music history, and aural identification, are normally required of all applicants and are taken in the semester or summer preceding entrance into the graduate program. Students not meeting standards in the placement examinations will not be officially admitted to the Graduate School until such examinations are passed to the department's satisfaction.

701. MUSIC OF THE MEDIEVAL PERIOD

Nature of the beginnings of polyphony. The preeminent influence of the church in the 13th century and the rising secular movement in the 14th. Music as a dominant force in the political and social life of the Middle Ages. 4 cr.

703. MUSIC OF THE RENAISSANCE

Works of the 15th- and 16th-century composers from Dunstable to Palestrina. 4 cr.

705. MUSIC OF THE BAROQUE

Music of Europe from de Rore to Bach. 4 cr.

707. MUSIC OF THE CLASSICAL PERIOD

Growth of musical styles and forms from early classical, baroque-influenced composers through the high classicism of Haydn and Mozart, to the budding romanticism of the young Beethoven. Representative symphonies, concerti, and operas will be heard. 4 cr.

709. MUSIC OF THE ROMANTIC PERIOD

Symphonies, concerti, chamber music, and keyboard works of Beethoven, Berlioz, Schubert, Mendelssohn, Schumann, Brahms, Franck, Chopin, and Liszt. Romantic elements contained in the development of harmony, orchestration, sonority, expressive content. Rise of the short piano piece, the German art song, the symphonic poem, nationalism in music. 4 cr.

711. MUSIC OF THE 20TH CENTURY

Contemporary music, including its literature, its trends, and an analysis of techniques, styles, forms, and expression. 4 cr.

721. THE LIFE AND WORKS OF BEETHOVEN

Piano sonatas, concerti, symphonies, and string quartets; a logical course after Musi 401 or Musi 501-502. 4 cr.

732. THE ART SONG

History and literature of the solo song with piano accompaniment. Survey of national styles of the 19th and 20th centuries and deeper study of the central core of the art song—the German Lied. 4 cr.

733. SURVEY OF OPERA

Representative masterpieces of this art form through listening, reading, and discussion. 4 cr.

735. SURVEY OF PIANOFORTE LITERATURE

Keyboard literature from Bach to the present. Discussions and performance (by the instructor) of works of Bach; sonatas and concerti of Haydn, Mozart, Beethoven, Schubert, the romantic composers, and of contemporary writers; a logical course after Musi 401 or Musi 501-502. 4 cr.

795. SPECIAL STUDIES IN MUSIC

A) J. S. Bach; B) Franz Schubert; C) Debussy and Ravel; D) The World of Jazz; E) The Iconography of Western-European Musical Instruments; F) 19th-Century French Music; G) Advanced Analysis; H) Advanced Study in Electronic Music; I) Composition through Computer-generated Sound; J) Woodwind Literature; K) Brass Literature; L) String Literature; M) Medieval Performance Practice; N) Renaissance Performance Practice; O) Baroque Performance Practice; P) Classical Performance Practice; Q) 19th-Century Performance Practice; R) 20th-Century Performance Practice; S) Woodwind Repair; T) String Repair; U) Advanced Jazz Improvisation; V) Advanced Piano Pedagogy; W) Advanced Accompanying; X) Advanced Conducting; Y) Independent Study. Prereq: permission. May be repeated for credit with permission. 1-4 cr.

841–850. APPLIED MUSIC FOR GRADUATE CREDIT

The following courses offer further development of technique, music interpretation, and repertory on the various instruments. Emphasis may also be directed toward the functional use of the instrument in the school room. Prereq: student must exhibit sufficient proficiency to warrant graduate study and must have permission of the department chairperson and the student's graduate adviser. Audition required. A student may register for credit in the same courses in successive semesters with the approval of the major adviser. Music staff. 1-2 cr.

841. **GRADUATE VOICE**
 842. **GRADUATE PIANO**
 843. **GRADUATE HARPSICHORD**
 844. **GRADUATE ORGAN**
 845. **GRADUATE VIOLIN, VIOLA**
 846. **GRADUATE VIOLONCELLO, STRING BASS**
 847. **GRADUATE WOODWIND**
 848. **GRADUATE BRASS**
 849. **GRADUATE PERCUSSION**
 850. **GRADUATE HARP**
855. **INTRODUCTION TO BIBLIOGRAPHY**
 An intensive survey of basic reference works, music periodicals, collected editions, series, treatises, books on musical instruments and performance practice, and the important monographs on major composers from Machaut to Schoenberg. A reading knowledge of German and French is very useful. 3 cr.
856. **READINGS IN MUSIC HISTORY: ANTIQUITY TO 1600**
 An opportunity to read and study in detail a restricted number of monographs and editions. 3 cr.
857. **READINGS IN MUSIC HISTORY 1600-1820**
 An opportunity to read and study in detail a restricted number of monographs and editions. 3 cr.
858. **READINGS IN MUSIC HISTORY: 1820 TO THE PRESENT**
 An opportunity to read and study in detail a restricted number of monographs and editions. 3 cr.
- 891, 892. **RESEARCH SEMINAR**
 Guidance in individual research projects. Prereq: permission. Variable cr.
893. **THEORY SEMINAR**
 Through reading, analysis, and composition, the student is acquainted with music theory from the Middle Ages to Monteverdi. Prereq: permission. 3 cr.
894. **THEORY SEMINAR**
 Theory and practice from the Baroque to contemporary music. Performance practice in the Baroque and later periods. Score analysis. Prereq: permission. 3 cr.
895. **INDEPENDENT STUDY IN THE HISTORY AND THEORY OF MUSIC**
 Opportunity for especially qualified students to investigate, with guidance, specific areas of their scholarly concern. Prereq: permission. 1-4 cr.

Music Education (MuEd)

- 741-742. **TECHNIQUES AND METHODS IN CHORAL MUSIC**
 Problems in the organization and performance of high school, college, and community choruses. Techniques of choral conducting and rehearsal, repertory, and materials. 2 cr.
743. **MATERIALS AND METHODS IN PIANO MUSIC**
 Gives potential piano teachers a coherent but flexible approach to the instruction of students of different ages and levels of talent through evaluation of methods and materials and discussion of the role of the private teacher. 2 cr.
- 745-746. **TECHNIQUES AND METHODS IN STRING INSTRUMENTS**
 Class and individual instruction. Four hour practice per week required. Intensive training on the violin, viola, cello, and double bass, enables participants to perform in string ensembles. Classroom procedures, establishment of string programs, and evaluation of available methods materials. 2 cr.
- 747-748. **TECHNIQUES AND METHODS IN WOODWIND INSTRUMENTS**
 Basic fundamentals of performance, class instruction, associated acoustical problems, and study of woodwind literature. First semester: clarinet, flute, and saxophone. Second semester: double-reed instruments. 2 cr.
749. **TECHNIQUES AND METHODS IN BRASS INSTRUMENTS**
 Basic course in embouchure formation, tone, tonguing, fingering, flexibility, accuracy, and range development as applied to the trumpet or baritone horn, French horn, and trombone; methods, studies, solos, and ensembles most likely to be useful with grade school, junior high school, and high school players of brass instruments. 2 cr.
751. **TECHNIQUES AND METHODS IN PERCUSSION INSTRUMENTS**
 Basic performance skills on snare drum, timpani, mallet instruments, and other percussion instruments used in bands and orchestras. Materials and methods of instruction. 2 cr.
785. **MUSIC FOR THE ELEMENTARY CLASSROOM TEACHER**
 Designed for the nonspecialist. Correlation and integration of music in the school curriculum, and basic skills and techniques necessary. 4 cr.

Occupational Education

787-788. THE TEACHING OF ELEMENTARY AND MIDDLE SCHOOL MUSIC

Aims, scope, and organization of materials and activities in elementary and middle schools. Modern trends in educational philosophy; development of the child's voice; demonstration of materials and methods for the various grades. Observation and teaching in schools. 2 cr.

791-792. THE TEACHING OF SECONDARY SCHOOL MUSIC

Educational principles applied to music teaching and learning; curriculum organization for junior and senior high school. Adolescent voice, voice classification, selection of vocal and instrumental materials, and building unified concert programs. Problems of administration; management; relationship of the teacher to school and community. Observation of secondary school music programs. 2 cr.

795. SPECIAL STUDIES IN MUSIC EDUCATION

Allows upper-level students to explore individually or in groups areas related to their specific professional interests. Prereq: permission. 1-4 cr.

796. ORGANIZATION AND ADMINISTRATION OF SCHOOL MUSIC GROUPS

Problems of organizing and administering school orchestras, bands, glee clubs, choruses, and small ensembles; objectives, motivation, schedule, discipline, equipment, programs, finances, rehearsal techniques, contests and festivals, materials, personnel selection, and grades. 4 cr.

883. INSTRUMENTAL LITERATURE AND ITS PERFORMANCE

Exploration of representative solo and ensemble music for string, wind, and percussion instruments. Typical literature from each period of music is studied. As much as is possible, live performance is included; recordings are used as required. Detailed attention given to interpretation. Project required. 3 cr.

884. CHORAL LITERATURE AND ITS PERFORMANCE

Analysis, discussion, and conducting of excerpts from choral masterpieces from all major periods and styles. Students will have the opportunity to act as assistant conductors for some of the choral organizations on campus. Evaluation of current high school and college repertoires. 3 cr.

895. SPECIAL PROJECTS IN MUSIC EDUCATION

Independent study, investigation, or research in music education. Creative projects may be included. Prereq: permission. 1-4 cr.

Occupational Education (OcEd)

Chairperson: Nicholas L. Paul

PROFESSORS: William H. Annis, Maynard C. Heckel
ASSOCIATE PROFESSORS: Richard L. Barker, Nicholas L. Paul, Lewis Roberts, Jr.
ASSISTANT PROFESSOR: Gregory D. Gill

The Master of Occupational Education degree is designed for teachers and administrators of occupational education, county Cooperative Extension Service personnel, and others in adult education. Applicants must submit scores achieved on either the Graduate Record Examination, Aptitude Section, or the Miller Analogies Test. All students are required to complete Occupational Education 785 and 786. The remainder of the 30+ credits required to complete the degree program will be selected in consultation with the student and advisers according to the student's career plans, needs, and goals. Students may elect the thesis plan. Candidates completing a thesis will be required to complete an oral examination. Students following the nonthesis plan will be required to complete both written and oral examinations. For further information contact Chairperson Nicholas L. Paul.

700. WORKSHOPS IN OCCUPATIONAL EDUCATION

Modularized instruction for in-service education of teachers of vocational education and others in occupational education. May be repeated up to 8 credits. 1-2 cr.

750. SHOP ORGANIZATION AND CONTROL METHODS

Purposes: 1) to examine all facilities of vocational programs in New Hampshire to insure safety, quality instruction, and adequate usage of space; 2) to examine the role of the vocational instruction relating to liability, maintenance of equipment, planning for improvements in facilities, and planning for new facilities. 4 cr.

783. PREPARATION FOR CONDUCTING AND SUPERVISING ADULT-EDUCATION PROGRAMS

Techniques of needs identification, program planning, teaching methods, supervision, and evaluation. Prereq: prin of OcEd or permission. 4 cr.

784. THE COMMUNITY-JUNIOR AND VOCATIONAL-TECHNICAL COLLEGES

Rise and development of community-junior colleges and two-year vocational-technical colleges in American education; their history, potential, philosophy, and functions. 4 cr.

785. ADVANCED METHODS AND MATERIALS OF INSTRUCTION

Organization of competency-based instruction to meet student needs. Development and use of resource files, instructional materials, and student evaluation. Open to teachers of vocational-technical education and others by permission. Required of master's degree candidates. 4 cr.

786. CONCEPTS OF OCCUPATIONAL EDUCATION

Development of vocational-technical education in the U.S.; socio-economic influences responsible for its establishment. Federal and state requirements for secondary and post-secondary schools. Coordination of programs with general education and other vocational fields. Required of master's degree candidates. 4 cr.

787. ADMINISTRATION AND SUPERVISION OF VOCATIONAL EDUCATION

Special competencies required and operating philosophies examined for supervision and administration of the several areas of vocational education. 4 cr.

791. PLANNING FOR TEACHING

Organization of materials of instruction to meet group and individual needs. Techniques of instruction, planning for teaching, function of consulting committees, working with youth groups, program evaluation. Course scheduled concurrently with Educ 694. Prereq: microteaching. 4 cr.

796. INVESTIGATIONS IN OCCUPATIONAL EDUCATION

A) Career Education; B) Secondary Education; C) Post-Secondary Education; D) Adult Education; E) Extension Education; F) Exemplary Programs; G) Cooperative Education Programs; H) Disadvantaged and Handicapped Education Programs. Student-selected problems in one of the areas listed. Elective after consultation with the instructor. Hours to be arranged. May be repeated. 2-4 cr.

798. OCCUPATIONAL EDUCATION SEMINAR

Discussion of current issues, problems, and research and development in OcEd. Students, faculty, and other personnel serve as discussion leaders. Required of OcEd majors, minors, and graduate students. 0 cr.

802. METHODS OF TEACHING POWER AND MACHINERY IN OCCUPATIONAL EDUCATION

The servicing and maintenance of the agricultural power and machine complex as it relates to the production and nonproduction phases of vocational agriculture. The development of teaching plans, techniques of instruction, and the development of multimedia teaching units. 3 cr.

804. PROGRAM PLANNING IN OCCUPATIONAL EDUCATION

A systematic approach to the development of course materials for occupational education. Topics included are: occupational analysis, establishing performance objectives, selection of content, development of supplemental material, and evaluation. Prereq: a course in teaching methods or permission. 4 cr.

805. THE DEVELOPMENT OF COOPERATIVE EDUCATION PROGRAMS IN OCCUPATIONAL EDUCATION

Topics included are: relationship with community; student selection and development of individual programs; the supervision and evaluation of these programs. 4 cr.

807. ORGANIZATION AND SUPERVISION OF YOUTH ORGANIZATIONS

The purposes and organization of youth organizations, establishing the local organization, planning and developing a program of work, ways and means of improving the local organization, and methods of evaluation. 4 cr.

809. COMMUNITY ORGANIZATION AND PUBLIC RELATIONS

The composition, purposes, and objectives of the various social and economic organizations operating in local communities. The importance of their membership to the general welfare of the area and the development of a public relations program. 4 cr.

811. INTERNSHIP IN OCCUPATIONAL EDUCATION

Internship in a field of occupational education either in methodology of teaching or technical subject matter. Students may elect internship only after completing the qualifying examinations for the master's degree, with permission of their major adviser. May be repeated up to 8 cr. 0-8 cr.

812. INTRODUCTION TO RESEARCH

The course is designed to develop a knowledge and understanding that will contribute to the effective use of research in teaching and administering occupational education. The research process will be examined in terms of selection and formulation of research problems, design, techniques of data collection, analysis, and interrelation of data and reporting. 4 cr.

895. INDEPENDENT STUDY IN OCCUPATIONAL EDUCATION

Individual study problems in various phases of occupational education. Prereq: permission. May be repeated. 2-6 cr.

899. MASTER OF OCCUPATIONAL EDUCATION THESIS

6-10 cr.

Physical Education (PhEd)

Chairperson: Phyllis A. Hoff

ASSOCIATE PROFESSORS: Katherine Amsden, Gavin H. Carter, Phyllis A. Hoff, Robert Kertzer, D. Allan Waterfield, Robert E. Wear, Walter E. Weiland

ASSISTANT PROFESSOR: D. Michael McKeough

DIRECTOR OF GRADUATE PROGRAM: Walter E. Weiland

The Department of Physical Education offers a graduate program leading to the Master of Science degree. Admission is based on undergraduate preparation, academic record, Graduate Record Examination, aptitude test scores, and letters of recommendation. Applicants must be above-average students and have had a minimum of 24 credits of undergraduate theory-work in physical education. Applicants who have not majored in physical education as undergraduates or who have not met specific course prerequisites should expect to take additional undergraduate work without receiving graduate credit.

Students may satisfy program requirements through the thesis or nonthesis program plans. PhEd 730, 750, and 801 are required of all degree candidates. All remaining coursework may be taken within the Department of Physical Education; however, approval may be granted to take relevant courses outside the department.

Thesis Plan: A minimum of 30 approved graduate credits including a thesis (24 graduate course credits plus 6 thesis credits) is required in the thesis plan, plus an oral defense of the thesis.

Nonthesis Plan: A minimum of 32 approved graduate credits is required in the nonthesis plan. Four credits of PhEd 895 (Advanced Studies) are required. A student may take Advanced Studies only after completing at least three approved graduate courses, including PhEd 801.

The core of three required courses (PhEd 730, 750, 801) focuses on the major functions of teaching in physical education: 1) curriculum planning, 2) instruction, and 3) evaluation. Several courses are offered in each of the following areas: physiological (exercise physiology) and psychological (motor learning and psychological factors in sport) aspects of human movement and sport. In addition, other courses are available in the historical and cultural foundations of movement and sport.

The program is sufficiently flexible to meet professional interests and special abilities. With the help of the graduate adviser in physical education, the student's program will be individually planned.

702. ADVANCED ATHLETIC TRAINING

Assessment, rehabilitative treatment, preventive strapping and protective equipment used in athletic training. Administration of a training room facility. Prereq: basic athl train. Lab. 4 cr.

703. LABORATORY PRACTICE IN ATHLETIC TRAINING

150 hours of experience in UNH athletic training room under N.A.T.A. certified trainer. Prereq: basic athl train. May be repeated up to 8 cr. 2 cr.

720. INTERPRETATION AND ASSESSMENT OF PHYSICAL FITNESS

Planning and implementation of programs of conditioning and fitness in the general program of education in the school. Personal fitness; components of physical fitness and conditioning; current tests; rehabilitation of individuals of all ages, particularly in college and adult programs. Prereq: physiol of exercise or equivalent. 4 cr.

730. CURRICULUM PLANNING IN PHYSICAL EDUCATION

Criteria and factors involved in planning and construction of school programs. 4 cr.

740. PERCEPTUAL MOTOR DYSFUNCTION

Theoretical rationale and clinical perceptual-motor training programs of Ayres, Kephart, Cratty, Barsch, and Getman, as they relate to sensory-motor integration and the remediation of learning disabilities. Prereq: PhEd 775, or permission. 4 cr.

750. ANALYZING TEACHING IN PHYSICAL EDUCATION

Examination of teaching practices, theories, and research implications. Varied approaches to the study and improvement of teaching, including analysis of films and tapes. Prereq: theory of teach phys ed in sec school, theory of teach phys ed in elem school, or permission. 4 cr.

775. PERCEPTUAL MOTOR LEARNING

Variables affecting the learning and performance of skilled activity; ability and motivational characteristics of the learner; processes for skill acquisition. Prereq: intro to psych. Lab. 4 cr.

780. PSYCHOLOGICAL FACTORS IN SPORT

Factors of outstanding athletic achievement; psychological variables in competition; the actions and interactions of sport, spectator, and athlete. Prereq: intro to psych or PhEd 775. 4 cr.

791. HISTORY OF PHYSICAL EDUCATION

From ancient Egypt to modern times. Influences of Greece, Rome, the Renaissance and Reformation periods, and modern European nationalism. Analysis of events and the beliefs of leaders in the development of systems of physical education. 4 cr.

795. SPECIAL TOPICS

New or specialized courses not normally covered in regular course offerings. Prereq: permission. May be repeated up to 8 cr. 2-4 cr.

801. ANALYSIS OF PROFESSIONAL LITERATURE

Critical interpretation of professional literature. 4 cr.

831. CONDITIONING FOR MAXIMUM PERFORMANCE

Anatomical and physiological factors related to maximum physical performance. Evaluation of present programs of training. Prereq: physiol of exercise or equivalent. 4 cr.

841. SOCIAL DIMENSIONS OF SPORT

Sport viewed from a social-cultural, action-system frame of reference and studied on the level of cultural values and their related social structures. Prereq: intro soc or equivalent. 4 cr.

850. SEMINAR IN MOTOR LEARNING

Theoretical models of skill acquisition, motor skill taxonomies, and current issues in motor learning research. Prereq: PhEd 775 or equivalent. 4 cr.

895. ADVANCED STUDIES

Independent study problems. Prereq: permission of graduate adviser. May be repeated up to 8 cr. 2-4 cr.

899. MASTER'S THESIS

6 cr.

Physics (Phys)

Chairperson: Robert E. Houston, Jr.

PROFESSORS: Roger L. Arnoldy, L. Christian Balling, Edward L. Chupp, Robert E. Houston, Jr., Richard L. Kaufmann, Robert H. Lambert, John A. Lockwood, Lyman Mower, John E. Mulhern, Jr., William R. Webber

ASSOCIATE PROFESSORS: John F. Dawson, Lennard A. Fisk, Jochen Heisenberg, Harvey K. Shepard, Robert E. Simpson, John J. Wright

ASSISTANT PROFESSOR: Barry J. Harrington

GRADUATE ADVISER: Lennard A. Fisk

The physics department offers courses leading to three graduate degrees: Master of Science for Teachers; Master of Science, and Doctor of Philosophy in physics. Graduate students entering the Master of Science and Doctor of Philosophy programs are expected to demonstrate a proficiency in undergraduate work equivalent to that in the senior year at the University of New Hampshire.

Ph.D. students may demonstrate their preparedness for candidacy for the degree by one of two methods. The first of these methods is to prepare, at the beginning of the fall semester of the second year, a defense of an appropriate research topic. Exceptions to the timing are

possible by petition. This topic must be defended in an oral presentation in which the physics involved is clearly demonstrated. Students must also be prepared to answer questions on basic physics in areas related to the main research topic. Each student will work in close cooperation with a committee of three, at least two of whom shall be from the physics department, in the selection, preparation, and defense of the selected topic.

The second method is to take a written qualifying examination. This examination will be given at the beginning of the fall semester of the second year. Exceptions to the timing are possible by petition.

Students are allowed a total of two attempts to achieve candidacy.

Master of Science for Teachers

The degree of Master of Science for Teachers is offered for candidates who satisfy the general admission requirements (see page 16) or who hold secondary school teacher certification in physics or in general physical science. The courses leading to this degree will normally be chosen so as to improve candidates' ability to teach physics or general physical science at the secondary school level. These courses should total at least 30 semester hours and should be chosen in consultation with the graduate adviser in physics.

M.S.T. students are not required to take the qualifying examination. Teaching experience is required for this degree. Persons interested in this degree should confer with the graduate adviser.

Master of Science Degree

For admission to graduate study leading to a Master of Science degree, students should have completed 24 to 30 semester hours in physics, or physics and closely allied fields. The courses required for the Master of Science in physics degree include Phys 833, 839, 841, and 843. Candidates may select one of the following plans:

- 1) Complete 30 semester hours of courses chosen in consultation with the graduate adviser.
- 2) Complete 24 semester hours of courses chosen in consultation with the graduate adviser, complete a thesis representing the equivalent of 6 semester hours' work, and pass an oral examination on the thesis.

Doctor of Philosophy Degree

For admission to graduate study leading to a Doctor of Philosophy degree, students should satisfy the same general requirements as for a Master of Science degree. Admission to candidacy for the degree is primarily based upon demonstrated ability in formal coursework; experience in teaching, equivalent to at least half-time for one year; and the passing of a written examination or oral research topic defense as specified above. Finally, upon completion of a thesis, doctoral candidates will take an oral examination based upon the area of research.

Physics

The courses required for a Doctor of Philosophy degree in physics consist of: 1) 831-832, 833, 835, 839, 841-842, 843-844; and 2) any additional five full courses at the 800 level, excluding 889-890, 897-898, 899, and 999. (For students doing Ph.D. research in astrophysics or space physics, one of these five courses must be 850 or 852.)

Interdisciplinary Research

The department encourages research in areas related to physics or applied physics. Should students desire to do research in a field related to physics, special provisions may be made. Contact the department chairperson or graduate adviser for details.

607. PHYSICAL OPTICS

Electromagnetic theory of light, interference, diffraction, polarization, related phenomena and nonlinear optics. Prereq: multidim calculus. Lab. 4 cr. (Offered if sufficient demand.)

701-702. INTRODUCTION TO QUANTUM MECHANICS I AND II

Nonrelativistic Schrodinger equation, the hydrogen atom, applications to atomic and molecular structure; nuclear reactions and scattering; models of the nucleus; cosmic rays. Prereq: diff eqns; multidim calculus; /or permission. 4 cr.

703-704. ELECTRICITY AND MAGNETISM I AND II

Foundation of electromagnetic theory; electrostatics, dielectric theory, electromagnetism, magnetic properties of matter, alternating currents, Maxwell's field theory, and an introduction to electrodynamics. Prereq: diff eqns; multidim calculus; /or permission. 4 cr.

710. INTRODUCTION TO MODERN COSMOLOGY

Review of the sun, stars, Milky Way, external galaxies, and expansion of the universe. Recent discoveries of radio galaxies, quasistellar objects, cosmic black-body radiation, x-rays, and gamma rays precede a discussion of Newtonian and general relativistic cosmological models, steady-state/big-bang theories, and matter-antimatter models. Prereq: intro to mod astr; phys mechanics; diff eqns; /or permission. 4 cr.

831-832. MATHEMATICAL PHYSICS

Complex variables, differential equations, asymptotic methods, integral transform, special functions, linear vector spaces and matrices, Green's functions, integral equations, variational methods, numerical methods, and tensor analysis. 3 cr.

833. EXPERIMENTAL PHYSICS I

Modern research techniques, including discussion and laboratory exercises in fundamental measurements in optics. Electromagnetism nuclear and atomic phenomenon. Prereq: passing an electronics proficiency test or basic experimental physics I. 3 cr.

834. EXPERIMENTAL PHYSICS II

Modern research techniques. Prereq: Phys 833. 1-3 cr.

835. STATISTICAL PHYSICS I

A review of thermodynamics and kinetic theory, followed by an introduction to classical and quantum statistical mechanics. Microcanonical, canonical and grand canonical ensembles, ideal Fermi and Bose gases. Prereq: Phys 831; 843; /or permission. 3 cr.

836. STATISTICAL PHYSICS II

Basic formulation and application of statistical mechanics to selected physical problems. Prereq: Phys 844. (Offered on request.) 3 cr.

839. THEORETICAL MECHANICS

Newtonian, Lagrangian, and Hamiltonian formulation of the classical mechanics of particles and rigid bodies, with particular attention to those topics that serve as background for the study of modern physical theories. 3 cr.

841-842. ELECTROMAGNETIC THEORY

The formulation and detailed application of electromagnetic theory to physical problems. Prereq: permission. 3 cr.

843-844. QUANTUM MECHANICS

Wave mechanical and Dirac formulations of nonrelativistic quantum mechanics. Prereq: permission. 3 cr.

850. PLASMA PHYSICS I

Topics to be discussed will be selected from the following: magnetohydrodynamics and plasma flow, waves, shocks and discontinuities, instabilities, and adiabatic motion of charged particles. 3 cr. (Not offered every year.)

852. PLASMA PHYSICS II

Topics to be discussed will be selected from the following: kinetic theory of plasmas, plasma waves, instabilities, and nonlinear plasma phenomena. Offered on request. Prereq: Phys 835; /or permission. 3 cr.

861-862. ADVANCED QUANTUM MECHANICS

Relativistic wave equations, propagator theory and Feynman diagrams, quantum theory of radiation, second quantization, introduction to quantum field theory and related topics. Prereq: Phys 839; 844. 3 cr. (Not offered every year.)

863-864. NUCLEAR PHYSICS

Introduction to nuclear processes including nuclear forces, nuclear structure and models, static properties, beta and gamma emission, and nuclear reactions. Selected topics in experimental methods. Prereq: Phys 844. 3 cr. (Not offered every year.)

865-866. SOLID STATE PHYSICS

Development of quantum mechanical theory of solids, transport phenomena, etc. Prereq: Phys 843; 835. 3 cr. (Not offered every year.)

887. COSMIC PHYSICS I

Topics will be selected from the following: ionospheric physics; magnetospheric physics; interplanetary physics; solar physics; cosmic ray physics; radio, x-ray, and gamma-ray astronomy; motion, transport, energy loss, origin, and acceleration of charged particles in the magnetosphere, interplanetary medium, and galaxy; cosmological problems. 3 cr. (Not offered every year.)

888. COSMIC PHYSICS II

Extended investigation of one or more of the topics introduced in Cosmic Physics I. Offered on request. 3 cr.

889-890. SPACE PHYSICS SEMINAR

Lectures and discussions of current research in the physics of fields and particles in space. 1-3 cr.

891, 892. PROBLEMS IN THEORETICAL PHYSICS

May be taken more than once. Offered on request. 1-3 cr.

893, 894. PROBLEMS IN EXPERIMENTAL PHYSICS

May be taken more than once. Offered on request. 1-3 cr.

895, 896. SPECIAL TOPICS

Any special fields of study not covered by the above courses may be included. Topic choices in previous years: astrophysics; elementary particles; lasers/masers; many-body theory; relativity; group theory; atomic physics; quantum theory of light. May be taken more than once. 1-3 cr.

897-898. COLLOQUIUM

Required of all graduate students. Topics to be selected. 0 cr.

899. MASTER'S THESIS

6 cr.

999. DOCTORAL RESEARCH**Plant Science (PISc)**

Chairperson: Lincoln C. Peirce

PROFESSORS: Gerald M. Dunn, Lincoln C. Peirce, Owen M. Rogers, Douglas G. Routley

ASSOCIATE PROFESSORS: George O. Estes, Yun-Tzu Kiang, David W. Koch, J. Brent Loy, J. R. Mitchell, James E. Pollard, Jerry Warren, Otho S. Wells

ADJUNCT ASSISTANT PROFESSOR: Merrill B. Hoyle

The graduate research program in plant science is concerned with solving basic and applied problems associated with growth of crop plants and their response to the environment. Facilities include laboratories, greenhouses, growth chambers, and two experimental farms.

The program emphasizes two principal disciplines: 1) breeding and genetics; and 2) physiology and biochemistry. Research and teaching in plant genetics, cytogenetics, and plant breeding are major strengths complemented by University programs in genetics and statistics. A strong research and teaching program is also available in plant physiology, including advanced courses in plant nutrition, metabolism, and growth and development. An increasing number of research projects in the department involve both geneticists and physiologists.

Undergraduates should obtain adequate background in the biological and physical sciences, including botany and chemistry. Students lacking these requirements may be admitted on condition that certain courses be completed without graduate credit. The Aptitude section of the Graduate Record Examination is required for application.

Candidates for the Master of Science degree will be required to prepare a thesis and to pass an oral examination. Candidates for the Ph.D. degree must take a written and/or oral qualifying examination and a final oral examination on the dissertation, in which the student must demonstrate ability to do original research in the area of specialization. Supervised teaching or its equivalent is required for each master's and doctoral student.

Advanced Plant Physiology**708. PLANT NUTRITION**

Nutritional aspects of higher plants; uptake, translocation, and metabolic role. Prereq: plant physiology; soils. Lab. 4 cr. (Offered spring 1980.)

Plant Science

762. PLANT METABOLISM

Function, occurrence, synthesis and degradation of plant constituents; respiration and photosynthesis; metabolism of nitrogenous and aromatic compounds; biochemical mechanisms in seed dormancy, fruit ripening, and disease resistance. Prereq: Bchm 601 or 751. 2 or 4 cr. (Offered fall 1980.)

803, 804. TOPICS IN DEVELOPMENTAL PLANT PHYSIOLOGY

A) Fungal Physiology; B) Photosynthesis I; C) Photosynthesis II; D) Nitrogen Fixation; E) Morphogenesis; F) Reproductive Physiology of Plants; G) Photomorphogenesis; H) Plant Hormones; I) Water and Solute Translocation; J) Stress Physiology; K) Genetic Control of Plant Development; L) Regulation of Gene Expression; M) Metabolic Control Mechanisms in Plants. A series of 7-week, 2-credit, in-depth modules; 2 modules per semester (may vary); consult Time and Room Schedule. Consult PISc or Bot departments for future semester offerings. Prereq: permission. PISc and Bot staff. 2-26 cr.

Advanced Genetics (See Genetics Program)

705. POPULATION GENETICS

Population growth and regulation; distribution of genes; factors affecting gene frequency; genetic variation and genetic load; cost of natural selection; ecological genetics. Prereq: prin of genetics; appl statistics; /or permission. 4 cr. (Offered spring 1980.)

740. EVOLUTIONARY BIOLOGY

Synthetic theory of evolutionary processes in origin of life, species, and higher groups; sources of genetic variability; population structure, causes of evolution; ecological adaptations in animals, plants, and man; evolution of communities; molecular evolution and rates of evolution. Prereq: prin of genetics; /or permission. PISc or Gen 705 suggested. 4 cr. (Offered spring 1980.)

773. METHODS AND THEORY OF PLANT BREEDING

Plant breeding systems for qualitative and quantitative plant improvement. Prereq: prin of genetics; appl statistics; /or permission. 3 cr. (Offered fall 1981.)

851. PLANT GENETICS

Euploidy, aneuploidy, cytoplasmic inheritance, somatic cell genetics, and genetics of disease resistance. Prereq: intro genetics. 3 cr. (Offered fall 1979.)

853. CYTOGENETICS

Chromosome aberrations and their behavior. Effect of radiation on chromosomes. Mapping and laboratory techniques in cytogenetic analysis. Prereq: genetics; cytology. 3 cr. (Offered fall 1980.)

General Offerings and Independent Studies

720. LABORATORY TECHNIQUES IN PLANT SCIENCES

Use of laboratory instruments and techniques including extraction procedures, spectrophotometry, fluorometry, electrophoresis, chromatography, atomic absorption spectrophotometer, measurement of respiration and photosynthesis, photography, use of microscopes, and use of instruments for monitoring the environment. Prereq: chemistry (three semesters) or permission. 2 cr.

776. RADIOISOTOPE TECHNIQUES FOR LIFE SCIENCES

Application of radioisotopes to biological systems; detection and measurement, liquid scintillation spectrometry and autoradiography, gamma-ray spectrometry, radiochromatogram scanning, and tissue distribution of radioisotopes. Prereq: inorganic chemistry; physics. Lab. 4 cr.

795, 796. ADVANCED TOPICS IN PLANT SCIENCE

A) Physiology; B) Genetics; C) Plant Utilization. Independent research, study, or group discussion. Prereq: permission. Staff. 2 or 4 cr.

877. SUPERVISED TEACHING FOR GRADUATE STUDENTS

Planning and presenting classroom and laboratory material. Biweekly seminars discuss teaching technique and problems. One credit or its equivalent required of each plant science master's and Ph.D. candidate. Plant science graduate students only. Prereq: permission. 1 cr. Cr/F.

895-896. RESEARCH IN PLANT SCIENCE

Advanced investigations in a research subject, exclusive of thesis. 1-4 cr.

897-898. GRADUATE SEMINAR

Library research and discussion of current topics of plant science. Required of all graduate students majoring in plant science. 1 cr.

899. MASTER'S THESIS

A thesis requiring study in depth of a phase in plant science. Required of all master's candidates in plant science. 6-10 cr.

999. DOCTOR OF PHILOSOPHY THESIS

Dissertation reflecting independent research in a phase of plant science is required. Credit received upon completion.

Political Science (Polt)

Chairperson: Lawrence W. O'Connell

PROFESSORS: Robert B. Dishman, Bernard K. Gordon, George K. Romoser, Allan A. Spitz

ASSOCIATE PROFESSORS: John R. Kayser, David L. Larson, David W. Moore, Lawrence W. O'Connell, B. Thomas Trout, Susan O. White

ASSISTANT PROFESSORS: Warren Brown, Robert E. Craig, George K. Lagassa

Candidates for admission to graduate study in the Department of Political Science normally are expected to have majored either in political science or a field closely related, and to have achieved an undergraduate academic record of some distinction. In unusual and exceptional cases and where undergraduate preparation has been insufficient, candidates may be admitted provided that they follow without credit a program of study approved by the chairperson. In all cases the Graduate Record Examination is required of candidates who seek to be considered for admission. The department offers the Master of Arts in political science and the Master of Public Administration.

Master of Arts (M.A.) in Political Science

The program leading to the Master of Arts in political science is normally to be completed in a single calendar year (an academic year plus the following summer) and is based on three elements: the development of advanced knowledge in at least three fields of the discipline in which the department offers its courses and seminars; the ability to conduct and complete an individual program of research at a high level; and familiarization with modern methodology in the discipline. Accordingly, every candidate will complete a suitably arranged program consisting of eight courses and seminars (32 credits) and a master's thesis (which carries 4 credits), for a total of 36 credits. Of the eight courses, one must be Polt 899, Sec. 1, Directed Research and Study, normally to be taken in the second semester of the candidate's residence. The master's thesis is expected to be within the field in which the candidate has undertaken Directed Study and Research, and generally is expected to derive from the same topic. Topics must be approved by a committee selected by the chairperson.

An essential requirement is that each candidate must arrange his/her program so that it includes at least one seminar (Political Science 897, 898) in each of three fields of the discipline emphasized by the department (political thought, American politics, comparative politics, and international politics). The remaining courses may be chosen according to the candidate's interests and needs, and two may be taken in a related field outside the department. Where a candidate lacks proficiency in tools of quantitative analysis or a foreign language es-

sential to the program of study and research, s/he will be required to attain and demonstrate to the thesis adviser proficiency in the needed skill.

Master of Public Administration (M.P.A.)

The Master of Public Administration is an interdisciplinary degree designed principally for individuals intending to pursue careers in local, state, or national government service in the U.S. or other governments. Candidates will be expected to complete eight full courses (32 credits) and a six-week internship program, normally during the summer after the completion of formal course work. Candidates who have had prior appropriate responsibility in public administration may apply for a waiver of the internship requirement. A recreation and parks option which draws upon the resources of that department is offered as an interdisciplinary program for the degree. Students pursuing this option are held to the general degree requirements and usually take courses in recreation and parks to fulfill the requirements for work outside the political science department. The internship is served with an appropriate recreation and parks agency.

Of the eight courses, at least three shall be chosen from the courses and seminars in public administration offered by the department, and two from other political science courses offered by the department according to the needs and interests of the candidate. The remaining three courses may be chosen from outside the department in such related fields as economics, administration, resource economics, sociology, and recreation and parks.

Each candidate will be required to take Polt 806: Theories and Processes of Public Administration; Polt 807: Cases in Public Management; and Polt 805: Methods of Policy Analysis. Candidates for the advanced degrees are expected to take courses at the 800 level in political science and to maintain a passing grade (B-) in all courses.

American Politics and Public Administration

701/801. THE COURTS AND PUBLIC POLICY

Impact of judicial decisions on public policy at federal, state, local, and regional levels. 4 cr.

702/802. PUBLIC PLANNING AND BUDGETING

Analysis, goal setting, and strategic planning in a governmental setting, with particular emphasis on budgetary processes as a means for controlling policy effectiveness. 4 cr.

703/803. URBAN AND METROPOLITAN POLITICS

Planning and management of the urban community, intergovernmental relations, administrative functions, and general urban problems. 4 cr.

Political Science

797, 798/897, 898. SECTION B: SEMINAR IN AMERICAN POLITICS
Advanced analysis and individual research. Prereq: senior or graduate standing. 4 cr.

797, 798/897, 898. SECTION F: SEMINAR IN PUBLIC ADMINISTRATION
Advanced analysis and individual research, including opportunities for direct observation of governmental administration. Prereq: senior or graduate standing. 4 cr.

805. METHODS OF POLICY ANALYSIS
Research design, survey methods, experimental techniques, and aggregate data analysis applied to public policy settings. 4 cr.

806. THEORIES AND PROCESSES OF PUBLIC ADMINISTRATION
Theories of organization and bureaucracy, the implications of bureaucratization, and the major processes of public administration including budgeting, personnel, policy making, as well as attention to contemporary policy issues including collective bargaining, affirmative action, citizen participation. 4 cr.

807. CASES IN PUBLIC MANAGEMENT
Policy case studies emphasizing politics, organizational structure, and interorganizational behavior; management case studies emphasizing behavior, human relations, personality, and intraorganizational dynamics; and simulation and role-playing exercises. 4 cr.

Political Thought

720/820. PERSPECTIVES ON POLITICAL SCIENCE
Different views on the study and meaning of politics. Perspectives of political scientists, political philosophers, and political activists. 4 cr.

721/821. ECONOMIC THOUGHT AND POLITICS
Economic theories from the perspective of political thought. Economic activity and resource distribution in relation to historical and contemporary issues such as freedom, equality, authority, community, democracy, and quality of life. 4 cr.

797, 798/897, 898. SECTION I: SEMINAR IN POLITICAL THOUGHT
Advanced treatment and individual research. Prereq: senior or graduate standing. 4 cr.

Comparative Politics

741/841. POLITICS OF INDUSTRIALIZED STATES
Impact of modern industrialism and its organization upon political life and the conduct of government. 4 cr.

742/842. COMPARATIVE COMMUNIST SYSTEMS
Interests, demands, and decision making in communist governments. Ideological issues, political behavior within communist international organizations, intraparty relations, distinctions between ruling and nonruling communist parties. 4 cr.

797, 798/897, 898. SECTION D: SEMINAR IN COMPARATIVE POLITICS
Includes advanced analysis and individual research. Administration, foreign policy, political parties, and government institutions. Prereq: senior or graduate standing. 4 cr. (Not offered every year.)

International Politics

760/860. THEORIES OF INTERNATIONAL POLITICS AND INTEGRATION
General explanations of the behavior of nations; theory and practice of super-national integration; theories of peace and security and community building at the international level; concepts and experience in arms limitations and conflict resolution. 4 cr.

761/861. INTERNATIONAL LAW
Formalized processes for regularizing state behavior; development of norms based on custom, precedent, and formal institutions, as in treaties and cases. Arms reduction and limitation arrangements; inspection, and other formal procedures designed to preserve peace. 4 cr.

778/878. INTERNATIONAL ORGANIZATION
Collective security and other forms of cooperation among nations through international organizations such as the United Nations and its predecessors, and through regional bodies. 4 cr.

797, 798/897, 898. SECTION E: SEMINAR IN INTERNATIONAL POLITICS
Advanced analysis and individual research; emphasis on developments in theory. Prereq: senior or graduate standing. 4 cr.

899. SECTION A: DIRECTED RESEARCH AND STUDY

899. SECTION B: MASTER'S THESIS**Related Courses in Recreation and Parks**

For information, contact Associate Professor Gus Zaso, Department of Recreation and Parks.

870. ADMINISTRATIVE INTERNSHIP

Practical administrative experience in an area of professional interest. Prereq: M.P.A. candidate—specialization in recreation and parks and permission. 4 cr. Cr/F.

885. COMPREHENSIVE PLANNING

Leisure and tourist planning—local, county, and regional. Recreation programming and resource development. Legislative aspects, court decisions, administrative organization, zoning, land use, and other master planning considerations. Prereq: permission. 4 cr.

890. SPECIAL TOPICS AND PROJECTS

Advanced study in specific areas; may involve formal classes, seminars, or independent projects. Prereq: permission. 4 cr.

Psychology (Psyc)

Chairperson: Ronald E. Shor

PROFESSORS: Raymond L. Erickson, Gordon A. Haaland, John A. Nevin, Ronald E. Shor.

ASSOCIATE PROFESSORS: Lance K. Can'on, Robert G. Congdon, James R. Davis, Peter S. Fernald, Earl C. Hagstrom, John E. Limber, Daniel C. Williams

ASSISTANT PROFESSORS: William M. Baum, Ellen S. Cohn, R. Michael Latta, David E. Leary, David I. Schickedanz, William R. Woodward

Doctor of Philosophy

The Department of Psychology offers a four-year program of study leading to the Doctor of Philosophy degree. The basic goal of the program is the development of behavioral scientists who can both carry out sound research in an area of specialization and teach effectively. Integral to the program is the development of specific skills required by the research psychologist who intends to become a college or university teacher. In order to develop these skills, each year the program required of all students includes a variety of research and instructional activities in addition to the usual academic work. In the third year, each student teaches small sections of introductory psy-

chology under close staff supervision while concurrently enrolled in a teaching seminar that has among its objectives an increased appreciation of the goals and problems of teaching.

Areas in which the student may specialize are: history and theory, learning, physiological psychology, perception-cognition, and social psychology. The student's adviser will help the student to plan an effective graduate program. Core courses taken by all students include methodology, statistics, and the seminar and practicum in the teaching of psychology. Work outside the department also is included in each student's program. Depth in a particular area is obtained through participation in the graduate courses listed below and by independent study and research conducted under the supervision of a staff member. Psyc 895, 896, Reading and Research in Psychology, is specifically designed to serve this purpose.

Prior to the doctoral dissertation, the student will carry out original research that culminates either in a master's thesis or a paper of publishable quality. A master's degree may be awarded upon the successful completion of a program approved by the department and dean of the Graduate School including original research at the master's level. Detailed information concerning the qualifying examination for advancement to candidacy for the Ph.D. degree and other requirements can be obtained from the department.

A student admitted to graduate study must meet the requirements for admission to the Graduate School. In applying for admission to the department's program, candidates must submit Graduate Record Examination scores on the verbal and quantitative sections of the aptitude test and the score on the advanced test in psychology.

To be accepted into the program, the applicant must desire to pursue the doctoral degree and be deemed qualified to do so on the basis of initial selection procedures. The applicant need not necessarily have been an undergraduate major in psychology. However, before beginning a graduate career proper, the applicant must have completed a minimum of 15 undergraduate credits in psychology, including courses in elementary statistics and experimental psychology.

The courses and seminars listed below provide the general framework within which the student will develop, with the counsel of the adviser, a program of research and study leading to the doctoral degree. The range and sequence of seminars varies to some extent with the student, though there will be common features to all programs.

The 700-series psychology courses are not normally taken for graduate credit, though a student may be advised to enroll in one of these courses as a way of improving background in the field.

The core graduate courses are offered whenever possible in a two-year cycle. Consult the department for exact schedule.

801-802. GRADUATE PROSEMINAR

Students and graduate faculty in psychology meet every two weeks for a mutual exchange on current issues in psychology. 0 cr.

805-806. RESEARCH METHODOLOGY AND STATISTICS I, II

A consideration of research techniques and problems of methodology in psychology. The first semester stresses the principles of statistical inference, correlational approaches, and their interrelatedness in design. Topics considered include probability theory, linear regression, function-free prediction, the theory underlying statistical inference, parametric and nonparametric tests of significance, and principles of analysis of variance. The second semester extends the correlational approach to the techniques and methodology of multiple regression and considers the appropriate use and theoretical bases of complex designs. Prereq: undergraduate statistics and experimental psychology. 3 cr.

807. RESEARCH METHODS AND STATISTICS III

The application of multivariate methods of data analysis in psychological research: multiple regression, analysis of covariance, Hotelling's T_2 multivariate analysis of variance, path analysis, canonical correlation, factor analysis. 3 cr.

812. PSYCHOLINGUISTICS

The use and development of human language: the nature of explanation, contemporary linguistic theory, semantics, functions of language, speech perception and production, learning. 3 cr.

814. COGNITIVE PROCESSES

The complex mental processes which characterize man: concept formation, reasoning, problem-solving, symbol use, creative thinking, imagination, fantasy behavior, pathology of thought consciousness and its alternatives, and the relationship between cognition and effective behavior. 3 cr.

817. SENSORY AND PERCEPTUAL PROCESSES

Sensory psychology of visual and auditory perception; major problems of current interest. Students learn basic skills necessary to begin sensory-perceptual research. 1) physics of visual and auditory stimuli; 2) sensory physiology of visual and auditory systems; 3) basic visual auditory psychophysics; and 4) study of complex perceptual processes, including pattern vision, color vision and color theory, depth perception, and auditory localization. 3 cr.

831. PHYSIOLOGICAL PSYCHOLOGY I

Comprehensive survey of current concepts in the neurosciences. 3 cr.

833. ADVANCED PHYSIOLOGICAL PSYCHOLOGY

In-depth examination of a specific topic in the neurosciences. Topics vary depending upon interests of instructor and students. Prereq: Psyc 831. 3 cr.

841. PSYCHOLOGY OF LEARNING

Topics include conditioning and other forms of learning, with emphasis on current experimental and theoretical literature. Undergraduate preparation in the area is not required. 3 cr.

845. ADVANCED RESEARCH TOPICS IN LEARNING

Current empirical and theoretical issues in learning. Prereq: Psyc 841 or equivalent. 3 cr.

850. METHODS OF SOCIAL PSYCHOLOGICAL ANALYSIS

Procedures, logic, inferential strength, and potential bias of the various methodologies for studying social behavior. Experimental, quasi-experimental, and nonexperimental designs, the laboratory-field continuum, social psychological aspects of interviews and experiments, the nature of artifacts, and other current methodological issues. Emphasis on design of social psychological research rather than statistical analysis, though statistical matters regularly arise. Prereq: Psyc 805, Soc 801, or equivalent. 3 cr.

851. SOCIAL PSYCHOLOGY

A seminar covering current topics in experimental social psychology including attitude change, power and influence, interpersonal perception and attraction, conformity, and social learning. 3 cr.

852. ATTITUDE AND ATTRIBUTION IN SOCIAL PSYCHOLOGY

Various approaches to attitudinal and attributional processes; emphasis on current theoretical issues. Prereq: Psyc 851. 3 cr.

853. GROUP PROCESS AND SOCIAL INFLUENCE

Problems of the individual in the group and the group as a system; aspects of social influence. Prereq: Psyc 851 or permission. 3 cr. (Not offered every year.)

854. SEMINAR IN SOCIAL PSYCHOLOGY

Intensive coverage of the experimental and theoretical literature in a selected area of basic or applied social psychology. Students will participate directly in the conduct of the seminar by means of individual topical discussions, development and/or execution of research designs, and critical assessment of the current state of the topic area under discussion. Illustrative topics: political behavior, paralinguistics and nonverbal communication, ethnic and racial prejudice, and environmental psychology. May be repeated for credit. Prereq: Psyc 851. 3 cr.

856. PSYCHOLOGY OF PERSONALITY

Major theories and research methods in personality from psychoanalytic approaches, through balance theories, phenomenological or humanistic theories, to mini-theories such as the theory of achievement motivation. 3 cr.

871. SURVEY OF THE HISTORY OF PSYCHOLOGY I

Overview of the history of psychology up to the mid-nineteenth century. 3 cr.

872. SURVEY OF THE HISTORY OF PSYCHOLOGY II

Overview of the history of psychology from the mid-nineteenth century to the mid-twentieth century. 3 cr.

873. METHODS AND THEORIES IN HISTORICAL RESEARCH ON THE BEHAVIORAL SCIENCES

Main methods and theories used in historical research applied to the study of the behavioral sciences. Prereq: Psyc 871, 872, or permission. 3 cr.

874. PROBLEM AREAS IN THE HISTORY OF PSYCHOLOGY

In-depth studies of particular individuals, movements, and/or subfields. Each student pursues own research project. (May be repeated for credit.) Prereq: Psyc 871, 872, or permission. 3 cr.

875. SPECIAL TOPICS IN THE HISTORY OF PSYCHOLOGY

Topic to be determined when course is offered. May be repeated for credit. Prereq: Psyc 871, 872, or permission. 3 cr.

881. CHILD PSYCHOLOGY

Devoted to topics of current interest in child psychology. Core material will be followed by in-depth study in an area of student's interest. 3 cr.

891-892. PRACTICUM AND SEMINAR IN THE TEACHING OF PSYCHOLOGY

Practicum offers the student an opportunity to teach introductory psychology under close supervision from the staff. The seminar is coordinated with this experience and focuses on both practical and theoretical issues of significance in the teaching/learning process at the college level. Required of all doctoral students during the third year. 5 cr.

894. ADVANCED RESEARCH IN PSYCHOLOGY

Student designs and conducts original research that culminates in a paper of publishable quality. Completion of either this course or Psyc 899 will satisfy the department's research requirement for the master's degree. May be taken for 3 cr. per semester in each of two semesters or 6 cr. in one semester. Maximum 6 cr. Cr/F.

895-896. READING AND RESEARCH IN PSYCHOLOGY

A) Physiological, B) Perception, C) History and Theory, D) Learning, E) Social, F) Cognition, G) Statistics and Methodology, J) Psychopathology, I) Developmental. As part of the development as an independent scholar, the student is encouraged to plan: 1) broad reading in an area; 2) intensive investigation of a special problem; or 3) experimental testing of a particular question. Requires approval of both adviser and staff member directing project. May be repeated. 3-6 cr.

897-898. PROBLEMS AND ISSUES IN PSYCHOLOGY

Seminar on a problem which has been the subject of specialized research and study by a member of the staff. Topic and instructor vary. May be repeated for credit. 3 cr. (Not offered every year.)

899. MASTER'S THESIS

Each student will carry out original research that culminates in a master's thesis. May be taken 3 cr. per semester in each of two semesters or 6 cr. in one semester. Maximum 6 cr. Cr/F.

999. DOCTORAL RESEARCH

Graduate Courses Offered Primarily for Students Enrolled in Other Graduate Programs

823. INDIVIDUAL TESTING

Training in administration, scoring, and behavioral observation necessary for interpretation of individual tests of intelligence with discussion and demonstration of certain other instruments for cognitive measurement. The focus will be on children rather than adults, and on technique rather than interpretation. Each student will be required to purchase one set of materials. (Student's background in statistics, measurement, exceptional child, and personality theory will be evaluated by the instructor.) Credit to be granted only after the student has passed Psyc 825. Prereq: permission. Lab. 4 cr.

824. PRACTICUM IN INDIVIDUAL INTELLIGENCE TESTING

Supervised experience in use of individual intelligence tests in elementary and junior high school settings. Credit to be granted only after the student has passed Psyc 825 (may be taken concurrently or subsequently). Prereq: Psyc 823 or equivalent; permission. 2 cr.

Sociology

825. USE OF INDIVIDUAL INTELLIGENCE TESTS

Interpretation and use of individual intelligence test results in relation to the cognitive functioning of the child within the school setting. Taking into account background factors such as culture, emotional status, meaning of the test to the child, and ethical and administrative problems connected with interpreting test results to parents and school personnel. Students will have an opportunity to discuss case material from the actual daily work. Pre- or coreq: Psyc 823; Psyc 824; permission. 4 cr.

Sociology (Soc)

Chairperson: Richard E. Downs

PROFESSORS: Melvin T. Bobick, Walter Buckley, Bud B. Khleif, Arnold S. Linsky, Stuart Palmer, Solomon Poll, Murray Straus
ASSOCIATE PROFESSORS: Charles Bolian, Peter Dodge, Richard E. Downs, Stephen P. Reyna, Fred Samuels, Howard M. Shapiro
ASSISTANT PROFESSORS: Gary Hume, Barbara Larson
DIRECTOR OF GRADUATE STUDIES: Bud B. Khleif

The Department of Sociology and Anthropology offers M.A. and Ph.D. degrees in sociology. The master's program emphasizes theory and methodology. Doctoral students are expected to select from areas of departmental specialization one major area—and, from areas of expertise found among the faculty, one minor area—for intensive study and examination. Four major substantive areas for possible specialization are: deviance, conflict, and control; social psychology; comparative institutional analysis; family. In addition, a student may propose to the graduate committee another major area of specialization which falls within the faculty's competence.

Proficiency in theory, statistics, and methods and in the major and minor areas of study is determined by examination. Details about the examination can be found in the Graduate Student Handbook which is sent to all students requesting information about the program. Within the context of a curriculum organized largely in the form of seminars and research, the student is expected to select from departmental specializations one major area for intensive study and, also, with the approval of the student's adviser and the graduate committee, to design a minor area suited to his/her specific interests from the balance of the curriculum offered by the department—including anthropology courses. In addition, evidence of satisfactory performance is required in an extradepartmental field that has been approved as appropriate to his/her professional development. The design of a program most suitable to the individual will take into consideration both the student's past experience and intellectual goals; and, given the guidelines

sketched above, flexibility will be emphasized. Selection of thesis and dissertation topics is thus limited only by the areas of expertise available among departmental faculty members.

Students are responsible for remaining informed about any modifications in the requirements of the degree program in which they are enrolled.

Master of Arts candidates must: 1) Complete satisfactorily at least one full year (24 credit hours) of graduate-level coursework in sociology including Sociological Methods I and II (801 and 802) and Sociological Theory I or II (811 or 812). 2) Register for one credit of thesis work during the second semester of residence and submit a draft of a proposal to the thesis committee by the end of the semester; the proposal or an abstract must be circulated to all department faculty. 3) Submit for approval a report of an original research endeavor to the thesis committee. This report may be in the form of either a) a thesis, or b) a paper in the form outlined in the publication format of any major sociological journal.

To be awarded the Doctor of Philosophy degree the candidate must fulfill the residence requirement of three years' work after the bachelor's degree including: 1) A minimum of 12 courses in sociology, other than thesis or dissertation research, including Sociological Theory I and II (811 and 812), Sociological Methods I and II (801 and 802), and one other course in methods or statistics (803 or 804); three courses in a major area, and two in a minor area of sociology. 2) A minor in a field other than sociology, consisting of three related courses. 3) Pass written examination in the major and minor areas of sociological specialization and in advanced theory and methodology. 4) Make an oral presentation of the dissertation proposal or other scholarly work to the department. 5) Demonstrate reading-level proficiency in a foreign language or a research tool appropriate to the student's program. Examples of research tools include computer programming, symbolic logic, historiography, econometric techniques, and mathematical statistics. At the time they are admitted to the Ph.D. program, students must submit for approval by the graduate committee a statement indicating how they intend to meet the language/research tool requirement. 6) Fulfill the research and/or teaching requirement described below. 7) Write and defend an acceptable doctoral dissertation.

In planning the program of study the student will be advised at first by an assigned faculty member and, subsequently, in the case of doctoral students, by a guidance committee. Specially appointed committees will be organized for the direction and assessment of the thesis and dissertation. Under such supervision the student is expected to go considerably beyond the minimal common requirements of the graduate program to establish a knowledgeability and competency peculiarly his/her own, but the student will be permitted to take courses outside the department or below the 700-level within the department only with the express permission of the student's adviser.

In all cases, a student having knowledge equivalent to any of the required courses may substitute an examination to be given by the faculty member responsible for the course.

An important part of the graduate program is the opportunity to learn from participation in the teaching and research activities of the department faculty. All candidates for doctoral degrees are therefore expected to assist a member of the department in teaching and/or research. Assignments to work with a specific member will be made by the graduate committee on the basis of the student's experience, the needed areas of training, and the interests and preferences expressed by the students and faculty members.

Applicants for graduate study in sociology must meet all general Graduate School requirements and must present Graduate Record Examination scores on the aptitude tests and on the advanced test in sociology. Applicants for the Ph.D. should make available a copy of their master's thesis to be reviewed by the Graduate Committee. Undergraduate majors in other fields may be admitted. However, if the student's undergraduate work has not included an introductory course in sociological theory, research methods, statistics, and two other sociology courses, these five courses must be taken—or equivalent knowledge demonstrated through examination—in addition to the requirements outlined above.

All students entering the program must first complete the M.A. before admission to the Ph.D. program. The department welcomes both applicants who plan to continue for the Ph.D. and students planning for the M.A. only.

720. CURRENT DEVELOPMENTS IN SOCIOLOGY OF THE FAMILY

A current topic will be selected each semester, such as stratification and the family, intrafamily communication, power structure of the family, kinship in modern societies. Critical review of the literature; class or individual research project usually will be carried out. Prereq: 8 credits of sociology; "Family" recommended. 4 cr.

721. FAMILY INTERACTION

Analysis of family interaction from a sociological perspective. Consideration of individual family members, relationships, and the family as a unit using a social systems approach. Prereq: intro soc or permission. 4 cr.

735. COMPLEX ORGANIZATIONS

Comparative study of the structure and dynamics of complex, formal organizations (business, military, political and governmental, educational, medical). Power and social control in formal systems; organizational processes, performances, and effectiveness; impact of complex, formal organizations on persons and societies. Prereq: permission. 4 cr.

740. CULTURE CHANGE

Various types of society; development of theory. Descriptive studies of institutional as well as theoretical materials selected from the writings of Comte, Marx, Spencer, Durkheim, Spengler, Sorokin, Redfield, and others. 4 cr.

741. SOCIAL CHANGE AND SOCIETAL DEVELOPMENT

Comparative, interdisciplinary approach. Interrelationships among economic, political, and social factors in determining the structure, dynamics, character, and level of development of societies. Prereq: permission. Soc 740 recommended. 4 cr.

745. SOCIAL STRATIFICATION

Pattern of distribution of economic, honorific, and political variables within the populations of complex societies; allocation of personnel to the roles in question, notably through occupational mobility; and the impact of such processes upon behavior, both individual and social. Prereq: intro soc or social institutions. 4 cr.

757. SOCIAL INSTITUTIONS OF LATIN AMERICA AND THE CARIBBEAN

Selective analysis of distinctive institutions and social systems, with particular attention to social aspects of the process of modernization. Prereq: permission. 4 cr.

761. POPULATION DYNAMICS

Major population trends including changes in birth and death rates, population characteristics, mobility, migration, world population growth, population problems, and policies of countries at different stages of economic development. Interrelationship of population and society. 4 cr.

770. CULTURE, PERSONALITY, AND SOCIETY

A cross-cultural view of the development of personality as emergent from genetic, situational, and socio-cultural determinants; analysis of the dynamic interplay of socio-cultural and psychological behavior systems. Prereq: prior courses in sociology, anthropology, or psychology. 4 cr.

780. SOCIAL CONFLICT

Nature of social conflict, especially war. Setting and initiation of conflict, its dynamics, and factors affecting its course and outcomes. Prereq: permission. 4 cr.

785. THE STUDY OF WORK

Understanding society through the structure of work. Case studies, in an ethnographic manner, of high-status and low-status occupations to provide understanding of social processes and interrelationships in the social structure. 4 cr.

790. APPLIED SOCIOLOGY

1) Current level of use of sociological knowledge; 2) the advocate, consultant, and researcher roles in applied settings; 3) techniques of applied research; 4) implications of applied sociology, including ethical problems. Each student will focus on a social problem and write a paper covering the above issues. Applied projects where possible. Prereq: meth of soc res. 4 cr.

795, 796. READING AND RESEARCH IN SOCIOLOGY

A) Communications; B) Criminology; C) Culture Change; D) Culture and Personality; E) Deviant Behavior; F) Family; G) Population; H) Rural-Urban; I) Social Control; J) Social Differentiation; K) Social Movements; L) Social Psychology; M) Social Research; N) Social Theory. Prereq: 12 credits of sociology or permission. Variable (normally 2-8) cr.

797. SPECIAL TOPICS IN SOCIOLOGY

A) Criminal Justice Field Work; B) Sociology of Crime and Justice; C) Sociology of Mental Health and Illness; D) Illness and Society; E) The Holocaust; F) Socio-Linguistics; G) Social Class and Family Patterns; H) Measurement in Sociology; I) Violence in the Family; J) Post-Industrial Society; K) Political Sociology; L) Bio-Sociology; M) Social Evolution; N) Social Differentiation; O) Modernization; P) Blacks in the Americas. New or specialized courses presenting material not normally covered in regular course offerings. May be repeated, but not in duplicate areas. Course descriptions and prerequisites on file in department office during registration. 4 cr.

801. SOCIOLOGICAL METHODS I: INTERMEDIATE SOCIAL STATISTICS

Application of descriptive and inferential statistical methods to the analysis of sociological data, including sampling distributions, statistical decision making, analysis of variance, correlation and regression, and nonparametric measures. Prereq: statistics or permission 4 cr.

802. SOCIOLOGICAL METHODS II: RESEARCH DESIGN

Systematic investigation of each step in the design and implementation of sociological research. Selected techniques of data collection and analyses will be pursued. Prereq: meth of soc res; soc stat; or equivalents; /or permission. 4 cr.

803. SOCIOLOGICAL METHODS III: SPECIAL PROBLEMS IN METHODS AND STATISTICS

Course alternates between special problems such as measurement or multivariate analysis. Prereq: Soc 802. 4 cr.

804. SOCIOLOGICAL METHODS IV: FIELD WORK

Training for participant observation in the manner of an anthropologist or Chicago-school sociologist. Students write and discuss field notes and become familiar with case studies, content analysis, and relevant issues. Field notes, basis for a term paper. 4 cr.

811. SOCIOLOGICAL THEORY I

The content presuppositions, and implications of the body of sociological theory, exemplifying the full range of sociological inquiry. Prereq: hist of soc theory; contemp soc theory; or equivalents. 4 cr.

812. SOCIOLOGICAL THEORY II

The content, presuppositions, and implications of contemporary sociological theory. Students will engage in theory construction and analysis, and in this endeavor will be encouraged to develop their particular interests in substantive areas. Prereq: Soc 811. 4 cr.

813. SOCIOLOGICAL THEORY III

A seminar of intensive study of topics in sociological theory. Sample topics include: exchange theory, functionalism, systems theory, theory construction, pioneering theorists. Prereq: hist of soc theory; contemp soc theory; or equivalents. 4 cr.

821. DEVIANT BEHAVIOR

Relationships among cultural, subcultural, and personality variables and deviant behavior; forms of deviant behavior: invention, crime, alcoholism, and emotional illness. Prereq: permission. 4 cr.

830. THE SMALL GROUP

Sociological and social psychological perspectives on interaction within small groups. Prereq: courses in sociology and social psychology, or permission. 4 cr. (Not offered every year.)

838. SOCIOLOGY OF EDUCATION: SOCIAL ORGANIZATION OF SCHOOLS AND COMMUNITY

Schools in their sociocultural contexts and as part of the institutional network of society. Relation to stratification and social control. Teaching as a religious occupation and as an emergent profession. (Also offered as Educ 838.) 4 cr.

850. METHODS OF SOCIAL PSYCHOLOGICAL ANALYSIS

The logic, inferential strength, and potential bias of the various methodologies for studying social behavior. Experimental and nonexperimental designs, the social-psychological aspects of laboratory and field research, the nature of artifacts, etc. Emphasis is on research design rather than statistical analysis, but graduate-level sophistication in statistics is assumed. (Also offered as Psyc 850.) 4 cr.

851. SEMINAR IN SOCIAL PSYCHOLOGY

Some of the major themes in social-psychological theory, including social structure and personality, socialization, small-group processes, and interaction analysis. Students will be expected to read and evaluate selected empirical research. 4 cr.

852. SOCIALIZATION AND ABNORMAL BEHAVIOR

Orientations that relate socialization to abnormal behavior; synthesizes the major concepts into current sociological and social psychological frame of reference. Prereq: at least one course in social psychology or permission. 4 cr.

854. SOCIOLOGY OF RELIGION

The reciprocal relationship of religion and culture; the function of religion in society; the contributions of sociological research; the relationship between religion and other social institutions; religion and social change; and the problem of church and state. 4 cr.

861. DEMOGRAPHY

Current problem areas in demography including population theory, formal demography, social epidemiology, social indicators, use of demographic sources and techniques in sociological investigation. Prereq: Soc 761 or permission. 4 cr.

870. COMPARATIVE INSTITUTIONAL ANALYSIS

Theory and methods of cross-national approaches, including: history, variations in objectives and methods, problems of translation and conceptual equivalence of behaviors and indexes, and field techniques. Prereq: permission. 4 cr.

875. SOCIOLOGY OF THE FAMILY

Major approaches in the sociological study of families. Individuals in families, family relationships, and families as groups and the interrelationships among these levels. Interactional and systemic properties of marriage, parent-child relations, and extended family relations. 4 cr.

885. OCCUPATIONS AND PROFESSIONS

Professionalization as adult socialization, an acquisition of a new identity. Professions as ideologies, markets, and extended families. Research perspective of the Chicago School of Sociology. 4 cr.

888. SOCIOLOGY OF EDUCATION: THE CULTURES OF POVERTY AND AFFLUENCE

The schooling of "culturally deprived" and "culturally endowed" pupils. Problems of social and geographic mobility and immobility. Rise of the counseling and healing trades. (Also offered as Educ 888.) 4 cr.

889. SOCIOLOGY OF EDUCATION: RACE AND ETHNIC RELATIONS IN SCHOOLS AND SOCIETY

Ethnic stratification inside and outside the school. The schooling of whites and nonwhites. Issues of bilingualism, culture, and identity. (Also offered as Educ 889.) 4 cr.

895, 896. READING AND RESEARCH IN SOCIOLOGY AND ANTHROPOLOGY

A) Communications; B) Criminology; C) Cultural/Social Anthropology; D) Culture Change; E) Culture and Personality; F) Deviant Behavior; G) Prehistoric Archaeology; H) Family; I) Population; J) Rural-Urban; K) Social Control; L) Social Differentiation; M) Social Movements; N) Social Psychology; O) Social Research; P) Social Theory; Q) Anthropological Linguistics; R) Social Welfare. A student prepared by training and experience to do independent work under the guidance of an instructor may register for one or more of these sections. Prereq: 16 graduate hours of sociology and permission. Hours and credit to be arranged.

897. SPECIAL TOPICS IN SOCIOLOGY

A) Criminal Justice Field Work; B) Sociology of Crime and Justice; C) Sociology of Mental Health and Illness; D) Illness and Society; E) The Holocaust; F) Socio-Linguistics; G) Social Class and Family Patterns; H) Measurement in Sociology; I) Violence in the Family; J) Post-Industrial Society; K) Political Sociology; L) Bio-Sociology; M) Social Evolution; N) Social Differentiation; O) Modernization; P) Blacks in the Americas. New or specialized courses presenting material not normally covered in regular course offerings. May be repeated, but not in duplicate areas. Course descriptions and prerequisites on file in department office during registration. 4 cr.

899. MASTER'S THESIS

Usually 6 cr. but up to 10 cr. when the problem warrants.

999. DOCTORAL RESEARCH

Zoology (Zool)

Chairperson: John E. Foret

PROFESSORS: Arthur C. Borrer, Wilbur L. Bullock, Frank K. Hoornbeek, John J. Sasner, Philip J. Sawyer, Paul A. Wright
ASSOCIATE PROFESSORS: Robert A. Croker, John E. Foret, James F. Haney, Larry G. Harris, Marcel E. Lavoie, Edward K. Tillinghast
ASSISTANT PROFESSORS: Edward N. Francq, Roderick M. Smith, James T. Taylor, Charles W. Walker, Winsor H. Watson III

The graduate program in zoology is intended for students who aspire to a professional career within or outside the area of college teaching and research. Degrees can be earned with emphasis in behavior, development, ecology (freshwater and marine), endocrinology, fisheries, genetics, invertebrate zoology, mammalogy, neurobiology, parasitology, and physiology.

To be admitted to graduate study in zoology, students ordinarily must have completed an undergraduate major in biology or zoology. A basic array of courses including general biology, development, general ecology, genetics, morphology, and physiology is normally required. Additionally, a background in chemistry through organic chemistry and a semester each of calculus and physics is necessary. Students who are deficient in any of these requirements may sometimes be admitted to graduate status but may be required to remedy their deficiencies by taking courses which do not give graduate credit. Applicants are requested to submit aptitude and advanced biology scores for the Graduate Record Examination.

Each newly accepted graduate student will be interviewed during the second week of classes of the first semester. This interview will be conducted at a specified time by a committee composed of the student's temporary academic adviser plus two additional faculty members. The purpose of this committee is to advise the student in constructing a program of study and to correct such academic deficiencies as may exist. The committee will have available transcripts, letters of recommendation, and the results of the diagnostic exam described below. The committee will then enter its evaluation and recommendations in the student's permanent record.

All incoming graduate students will take a diagnostic exam before classes begin. This will include questions from the areas of behavior, biochemistry and physiology, development, ecology, evolution and systematics, genetics, morphology, parasitology, and general biology. No student is expected to do uniformly well in all areas, but a high level of competence is expected in those areas relevant to the student's particular program. Should the interview committee, on the basis of this exam, consider that a deficiency exists, this may be remedied

either by a formal course or by an oral examination upon recommendation of the committee. Such oral examinations will be given during the week immediately following the spring vacation.

A candidate for the Master of Science degree in zoology, in addition to the requirements mentioned above, will ordinarily complete a special problem (Zool 895 or 896) or a thesis that is acceptable to the guidance committee.

All doctoral students must pass a written examination to certify their proficiency in one foreign language. Some fields of pursuit may require more languages and this need will be determined by the student's guidance committee.

After the successful completion of the language requirements and of all required courses, the student who wishes to be admitted to doctoral candidacy must demonstrate a broad basic knowledge of his/her major and minor fields in an oral qualifying examination, administered by the guidance committee. In addition, the student must convince his/her proposed major professor and doctoral committee, in whatever way the committee finds acceptable, of his/her superior capacity to carry out basic research in biology. Normally, the student may accomplish this by presenting to the committee a research proposal in which the soundness, originality, and feasibility of the investigative ideas are clearly revealed, and which—when approved—should serve as the basis of the doctoral dissertation.

704. COMPARATIVE ENDOCRINOLOGY

Endocrine organs; relationship to control of the internal environment, growth, development, and adaptation to external environment. Prereq: vertebrate anatomy; physiology; organic chemistry. 4 cr.

707. HUMAN GENETICS

Inheritance patterns; gene and chromosome mutation rates and effects; linkage and gene frequency. Prereq: prin of genetics or equivalent; /or permission. 4 cr. (Not offered every year.)

711. NATURAL HISTORY OF COLD-BLOODED VERTEBRATES

Classes of poikilothermic vertebrates; their habits, habitats, and life histories in eastern North America. Prereq: gen zool; vert morph. Lab. 4 cr.

712. MAMMALOGY

Origins, diversification, reproduction, ecology, behavior of mammals. Identification of local forms. Prereq: prin of zool; vert morph. Lab. 4 cr.

713. ANIMAL BEHAVIOR

Individual and social behavior. The role of anatomy, physiology, ecology, and prior experience. Techniques and practical application. Prereq: one year of zoology. Lab. 4 cr.

715. NATURAL HISTORY OF MARINE INVERTEBRATES

Field and laboratory course; inshore marine invertebrate metazoan animals of northern New England. Identification, classification, habitat preferences, and behavior. Work (collection and observation) constitutes a major part of the course. Some travel expense. Prereq: general zoology. 6 cr. (Summer only.)

717. GENERAL LIMNOLOGY

Special relationships of freshwater organisms to the chemical, physical, and biological aspects of the aquatic environment. Factors regulating the distribution of organisms and primary and secondary productivity of lake habitats. Prereq: gen ecol or equivalent. 4 cr.

719. FIELD LIMNOLOGY

Freshwater ecology examined through laboratory exercises with freshwater habitats. Methods to study freshwater lakes; interpretation of data. Seminars and occasional Saturday field trips. Prereq: present or prior enrollment in Bot 717, Zool 717, or equivalent; permission. 4 cr.

720. FIELD MARINE SCIENCE FOR TEACHERS

Primarily for teachers grades 6 through 12, but open to others. Overview of living marine organisms (algae, invertebrates, fishes, marine mammals, and shore birds) in their natural environment. Also such topics as coastal zone problems, marine fisheries, economics of marine organisms, and the educational resources of the marine environment. Field work. Offered at the Isles of Shoals (Shoals Marine Laboratory) in cooperation with Cornell University. Three lectures and two labs or field trips per day. Prereq: college-level intro biol. 1 cr. Cr/F. (Summers only)

721. PARASITOLOGY

Introduction to the more important parasites causing disease in humans and animals. Living materials will be used as much as possible. Prereq: one year of zoology. Lab. 4 cr. (Not offered every year.)

723. CELL PHYSIOLOGY

Principles of chemistry and physics applied to understanding cell structure and function. Metabolic reactions and their control in relation to cell organization; genesis and function of specialized cells. Prereq: organic chemistry. Lab. 4 cr.

724. MARINE PARASITOLOGY

Diseases and parasites of marine fishes and shellfish; emphasis on the local estuarine environment. Prereq: one year of zoology. Lab. 4 cr. (Not offered every year.)

730. VERTEBRATE HISTOLOGY

Microscopic anatomy of vertebrate tissues and organs at the light microscope level; emphasis—mammalian histology; some comparative study of lower vertebrates. Prereq: hum anat and phys, vert morph, or equivalent. Lab. 4 cr.

732. SOIL ZOOLOGY

Faunal communities of terrestrial soils, their ecology and natural history. Effects of animal activities on soil processes and composition. Collection, extraction, and study methods. Independent projects. Prereq: gen ecol. 4 cr. (Not offered every year.)

740. BIOLOGY OF ANIMAL REGENERATION

Principles of regeneration in various animal phyla. Discussion of experimental studies supplemented by laboratory work with living animals. Prereq: prin zool. Lab. 4 cr. (Not offered every year.)

772. FISHERIES BIOLOGY

Information and techniques used by fisheries biologists. Emphasis on fish life history, ecology, and economics as related to management techniques. Prereq: Zool 711 or equivalent; permission. Lab. 4 cr.

775. INVERTEBRATE EMBRYOLOGY

Comparative study of reproduction and early development in selected invertebrates, providing a classical approach to morphology of gonads, fertilization, cleavage, gastrulation, and formation of larvae. Prereq: intro marine sci (UNH), Biol Sci. 364 (Cornell), or invertebrate zoology. Offered at the Isles of Shoals in cooperation with Cornell University. 3 cr. Cr/F. (Summer Session only.) (Not offered every year.)

777. INTRODUCTION TO NEUROBIOLOGY

The nervous system, with emphasis on vertebrate and invertebrate preparations which most clearly demonstrate the basic concepts of neurobiology. Topics include: structure and function of neurons, development, cellular basis of behavior (sensory and motor systems), neuropharmacology, and neural plasticity (learning). Prereq: prin zool or permission. 4 cr.

778. COMPARATIVE NEUROPHYSIOLOGY

Designed for students of the behavioral and physiological sciences who wish to understand the basic electrophysiological properties of neurons and how they interact. Both invertebrate and vertebrate systems will be called upon to illustrate principles of synaptic transmission, integration, sensory information processing, and the control of movement. Prereq: intro to neurobiology or permission. Lab. 4 cr.

Zoology

795, 796. SPECIAL PROBLEMS IN ZOOLOGY

A) Biological Oceanography; B) Ecology; C) Endocrinology; D) Evolution; E) Developmental Biology; F) Genetics; G) Histology; H) History of Zoology; I) Invertebrate Zoology; J) Physiology; K) Vertebrate Zoology; L) Zoogeography; M) Zoological Techniques; N) Parasitology; O) Histochemistry; P) Protozoology; Q) Systematics; R) Animal Behavior; S) Teaching Practices. Students may elect one or more sections for advanced study. Reading, laboratory work, organized seminars, and/or conferences. Prereq: permission. (Limit of 12 credits from the sections of this course.) 1-4 cr.

803. MARINE ECOLOGY

Marine environment and its biota, emphasizing intertidal and estuarine habitats. Includes field, laboratory, and independent research project. Prereq: gen ecol; permission; marine invert zool, oceanog, and statistics are desirable. 4 cr. (Not offered every year.)

808. STREAM ECOLOGY

Ecological relationships of organisms in flowing water. Lectures on physical and chemical features of streams, floral and faunal communities, and factors controlling populations of benthic invertebrates. Streams as ecosystems. Laboratory exercises employ both field and laboratory experimental techniques. Occasional Saturday field trips. Weekly seminars on original research papers. 4 cr. (Not offered every year.)

811. FRESHWATER ZOOPLANKTON ECOLOGY

Methods of sampling populations; factors regulating temporal and spacial distribution; trophic interactions of communities, role in nutrient cycle of lakes. Experimental techniques employed in field trips to freshwater habitats. Seminars examine current research. Prereq: gen ecol and limnology, Zool 717, or equivalent; permission. 4 cr. (Not offered every year.)

815. POPULATION ECOLOGY

Evolution, genetic theory, differentiation, and functioning of animal populations. Prereq: permission. 4 cr. (Not offered every year.)

820, 821. ADVANCED INVERTEBRATE ZOOLOGY

Morphology, phylogeny, and natural history of the major invertebrate phyla. Prereq: intro to invert zool or equivalent. 4 cr. (Not offered every year.)

822. PROTOZOOLOGY

General biology of protozoa; morphology, physiology, natural history, and economic importance. Prereq: Zool 721, 820, or permission. 4 cr. (Not offered every year.)

826. COMPARATIVE PHYSIOLOGY

Nutrition, metabolism, neural function, reproduction and homeostatic mechanisms of animals, especially invertebrates. Prereq: Zool 723; permission. 4 cr. (Not offered every year.)

895, 896. ADVANCED STUDIES IN ZOOLOGY

Course sections for advanced work, individual or group seminar. May include reading, laboratory work, organized seminars, and conferences. Prereq: permission of department chairperson and staff concerned. (Sections are the same as those listed under Zool 795, 796.) Variable to 12 cr. (Limit of 12 cr. from sections of this course.)

897, 898. ZOOLOGY SEMINAR

Reports on recent zoological literature. Subject fields are those listed under Zool 795, 796; not all areas available every semester. Required of graduate students in zoology. Staff. 0 cr. Cr/F.

899. MASTER'S THESIS

Prereq: permission of department chairperson and prospective supervisor. 6 cr.

999. DOCTORAL RESEARCH

Open to students who have declared their intention of proceeding to candidacy for the Doctor of Philosophy degree.

Chancellor, University System
Lee, N.H. (ex officio)

Gretchen Schnare Taylor, A.B.
Meriden, N.H. (1979-1981)

Gordon O. Thayer, Ed.D.
Mirror Lake, N.H. (1976-1980)

Howard C. Townsend
Commissioner of Agriculture
Lebanon, N.H. (ex officio)

James P. Weldon, B.S.
North Hampton, N.H. (1975-1979)

William E. Whybrew, Ph.D.
Interim President
Keene State College
Keene, N.H. (ex officio)

Ian G. Wilson
Student member
Hanover, N.H. (1979-80)

Principal Officers of Administration

Jere A. Chase, M.Ed., LL.D.
Interim President

Gordon A. Haaland, Ph.D.
Vice President for Academic Affairs

Allan B. Prince, Ph.D.
Vice President for Budget and Administration

Richard F. Stevens, M.Ed.
Vice President for Student Affairs/Acting
Dean of Students

Richard S. Davis, Ph.D.
Dean of the College of Engineering and
Physical Sciences

Allan Spitz, Ph.D.
Dean of the College of Liberal Arts

Basil J. F. Mott, Ph.D.
Dean of the School of Health Studies

Raymond L. Erickson, Ph.D.
Dean of the Graduate School and Director
of Research

Charles B. Warden, Jr., Ph.D.
Dean of the Whittemore School of Business
and Economics

Eugene A. Savage, M.Ed.
Dean of Admissions

Kurt C. Feltner, Ph.D.
Dean of the College of Life
Sciences and Agriculture;
Director of the Agricultural
Experiment Station

Maynard C. Heckel, Ed.D.
Director of the Cooperative Extension
Service

William Kidder, M.A.
Associate Dean of Students

Edward J. Durnall, Ed.D.
Director of the Division of Continuing
Education

Donald E. Vincent, Ph.D.
University Librarian

Peter H. Hollister, B.A.
Director of University Relations

Gail A. Bigglestone, M.S.
Director of the Department of Intercollegiate
Athletics for Women

Andrew T. Mooradian, M.S.
Director of the Department of Intercollegiate
Athletics for Men

Stephanie M. Thomas, M.A.
Registrar

Heidemarie C. Sherman, Ph.D.
Ombudsman

Committees of the Graduate School

Graduate Council

Raymond L. Erickson, Ph.D.

Dean of the Graduate School, Chairperson

William H. Drew, Ph.D.

Associate Dean of the Graduate School

Wallace A. Bothner, Ph.D.

Associate Professor of Geology

John F. Dawson, Ph.D.

Associate Professor of Physics

Stephen L. Fink, Ph.D.

Professor of Organizational Behavior

William R. Jones, Ph.D.

Professor of History

Roland B. Kimball, Ed.D.

Professor of Education

Charles H. Leighton, Ph.D.

Professor of Spanish

David E. Limbert, Ph.D.

Associate Professor of
Mechanical Engineering

J. Brent Loy, Ph.D.

Associate Professor of Plant Science
and Genetics

Thomas G. Pistole, Ph.D.

Associate Professor of Microbiology

Ronald E. Shor, Ph.D.

Professor of Psychology

Sharon T. Friedman, M.S.

Graduate Student, Genetics

Dina L. Anselmi, B.A.

Graduate Student, Psychology

Research Council

Raymond L. Erickson, Ph.D.

Director of Research

John A. Lockwood, Ph.D.

Associate Director of Research

Wendell S. Brown, Ph.D.

Assistant Professor of Earth Sciences

Wilbur L. Bullock, Ph.D.

Professor of Zoology

John M. Burt, Jr., Ph.D.

Associate Professor of Administration

Gavin H. Carter, Ph.D.

Associate Professor of Physical Education

Donald H. Graves, Ph.D.

Associate Professor of Education

Peter H. Greenwood, Ph.D.

Assistant Professor of Resource Economics

Susan Schibanoff, Ph.D.

Associate Professor of English

Judith A. Silver, Ph.D.

Assistant Professor of History

Kondagunta Sivaprasad, Ph.D.

Associate Professor of Electrical and Computer
Engineering

Samuel C. Smith, Ph.D.

Professor of Animal Science and Biochemistry

Faculty Fellowship Selection Committee

William H. Drew, Ph.D.

Associate Dean of the Graduate School

Miyoshi Ikawa, Ph.D.

Professor of Biochemistry

Marc L. Schwarz, Ph.D.

Associate Professor of History

F. Harry Tokay, Ph.D.

Associate Professor of
Communication Disorders

Donovan H. Van Osdol, Ph.D.

Associate Professor of Mathematics

Rita Weathersby, Ed.D.

Assistant Professor of Administration

Student Fellowship Selection Committee

William H. Drew, Ph.D.

Associate Dean of the Graduate School

Robert O. Blanchard, Ph.D.

Associate Professor of Plant Pathology

Gary H. Lindberg, Ph.D.

Associate Professor of English

Thomas G. Pistole, Ph.D.

Associate Professor of Microbiology

Barry Shore, Ph.D.

Associate Professor of Administration

Kondagunta Sivaprasad, Ph.D.

Associate Professor of Electrical
and Computer Engineering

Faculty of the Graduate School

- Allmendinger, E. Eugene** (1958)
Associate Professor of Naval Architecture and Associate Director of Marine Program; M.S., University of New Hampshire, 1950.
- Amell, Alexander R.** (1955)
Professor of Chemistry; Ph.D., University of Wisconsin, 1950.
- Amsden, Katherine** (1967)
Associate Professor of Physical Education; Ph.D., University of Southern California, 1967.
- Andersen, Kenneth K.** (1960)
Professor of Chemistry; Ph.D., University of Minnesota, 1959.
- Anderson, Franz E.** (1967)
Associate Professor of Geology; Ph.D., University of Washington, 1967.
- Andrew, Michael D.** (1966)
Associate Professor of Education; Ed.D., Harvard University, 1969.
- Andrews, Richard A.** (1959)
Professor of Resource Economics; Ph.D., University of Minnesota, 1959.
- Annis, William H.** (1962)
Professor of Occupational Education; Ed.D., Cornell University, 1961.
- Antonak, Richard F.** (1975)
Assistant Professor of Education; Ed.D., Temple University, 1975.
- Arnoldy, Roger L.** (1967)
Professor of Physics; Ph.D., University of Minnesota, 1962.
- Arredondo-Dowd, Patricia M.** (1978)
Assistant Professor of Education; Ed.D., Boston University, 1978.
- Ashley, Charles H.** (1969)
Associate Professor of Education; Ed.D., Boston University, 1969.
- Babcock, Robert B.** (1977)
Assistant Professor of Education; Ph.D., University of Georgia, 1977.
- Baker, Alan L.** (1972)
Associate Professor of Botany; Ph.D., University of Minnesota, 1973.
- Balkwill, David L.** (1977)
Assistant Professor of Microbiology; Ph.D., Pennsylvania State University, 1977.
- Ballig, L.C.** (1967)
Professor of Physics; Ph.D., Harvard University, 1965.
- Balomenos, Richard H.** (1961)
Professor of Mathematics Education; Ed.D., Harvard University, 1961.
- Barker, Richard L.** (1975)
Program Leader, 4-H Youth Development, and Associate Professor of Occupational Education; Ph.D., Ohio State University, 1967.
- Barlow, Robert F.** (1962)
Professor of Economics and Administration; Ph.D., Fletcher School of Law and Diplomacy, Tufts University, 1960.
- Barrett, James P.** (1962)
Professor of Forest Biometrics and Genetics; Ph.D., Duke University, 1962.
- Batho, Edward H.** (1960)
Professor of Mathematics; Ph.D., University of Wisconsin, 1955.
- Baum, William M.** (1977)
Assistant Professor of Psychology; Ph.D., Harvard University, 1966.
- Beasley, Wayne M.** (1957)
Associate Professor of Materials Science; S.M., Massachusetts Institute of Technology; 1965.
- Bechtell, Homer F., Jr.** (1966)
Professor of Mathematics; Ph.D., University of Wisconsin, 1963.
- Beckett, John A.** (1962)
Forbes Professor of Management; M.B.A., Harvard University, 1946; C.P.A.
- Bennett, Albert B.** (1967)
Associate Professor of Mathematics; Ed.D., University of Michigan, 1966.
- Bergeron, R. Daniel** (1974)
Assistant Professor of Computer Science; Ph.D., Brown University, 1973.
- Birch, Francis S.** (1972)
Associate Professor of Earth Sciences; Ph.D., Princeton University, 1969.
- Bishop, Paul L.** (1972)
Associate Professor of Civil Engineering; Ph.D., Purdue University, 1972.
- Blakemore, Richard P.** (1977)
Assistant Professor of Microbiology; Ph.D., University of Massachusetts, 1975.
- Blanchard, Fletcher, A., Jr.** (1950)
Professor of Electrical Engineering; M.S., Lehigh University, 1950.
- Blanchard, Robert O.** (1972)
Associate Professor of Plant Pathology; Ph.D., University of Georgia, 1971.
- Bobick, Melvin T.** (1958)
Professor of Sociology; Ph.D., University of Illinois, 1958.
- Bogle, A. Linn** (1970)
Associate Professor of Botany; Ph.D., University of Minnesota, 1968.
- Bolian, Charles E.** (1971)
Associate Professor of Anthropology; Ph.D., University of Illinois, 1975.
- Bonnice, William E.** (1962)
Associate Professor of Mathematics; Ph.D., University of Washington, 1962.
- Borrer, Arthur C.** (1961)
Professor of Zoology; Ph.D., Florida State University, 1961.
- Bothner, Wallace A.** (1967)
Associate Professor of Geology; Ph.D., University of Wyoming, 1967.
- Bowman, James S.** (1971)
Associate Professor of Entomology; Ph.D., University of Wisconsin, 1958.
- Boy, Angelo V.** (1965)
Professor of Education; Ed.D., Boston University, 1960.
- Boynton, Jason E.** (1966)
Associate Professor of Education; M.Ed., University of New Hampshire, 1952.
- Braff, Allan J.** (1965)
Associate Professor of Economics and Business Administration; Ph.D., University of Wisconsin, 1959.
- Broderick, Dale G.** (1974)
Associate Professor of Business Administration; Ph.D., Columbia University, 1973.
- Brown, Roger S.** (1974)
Assistant Professor of German; Ph.D., University of Kansas, 1971.
- Brown, Warren R.** (1972)
Assistant Professor of Political Science; Ph.D., Claremont Graduate School, 1976.

- Brown, Wendell S.** (1974)
Assistant Professor of Earth Sciences; Ph.D., Massachusetts Institute of Technology, 1971.
- Bruns, Paul E.** (1958)
Professor of Forest Resources; Ph.D., University of Washington, 1956.
- Buckley, Walter F.** (1971)
Professor of Sociology; Ph.D., University of Wisconsin, 1958.
- Bullock, Wilbur L.** (1948)
Professor of Zoology; Ph.D., University of Illinois, 1948.
- Burger, John F.** (1977)
Assistant Professor of Entomology; Ph.D., University of Arizona, 1971.
- Burt, John M., Jr.** (1974)
Associate Professor of Administration; Ph.D., Carnegie-Mellon University, 1969.
- Burton, David M.** (1959)
Professor of Mathematics; Ph.D., University of Rochester, 1961.
- Byers, Gordon L.** (1956)
Professor of Soil and Water Science; M.S.A., Ontario Agricultural College, 1950.
- Callan, Richard J.** (1969)
Associate Professor of Spanish; Ph.D., St. Louis University, 1965.
- Canon, Lance K.** (1973)
Associate Professor of Psychology; Ph.D., Stanford University, 1965.
- Carney, John J.** (1973)
Assistant Professor of Education; Ph.D., Syracuse University, 1973.
- Carnicelli, Thomas A.** (1967)
Professor of English; Ph.D., Harvard University, 1966.
- Carroll, John E.** (1974)
Associate Professor of Environmental Conservation; Ph.D., Michigan State University, 1974.
- Carter, Gavin H.** (1965)
Associate Professor of Physical Education; Ph.D., University of Oregon, 1958.
- Casàs, R. Alberto** (1952)
Professor of Spanish; Ph.D., Columbia University, 1954.
- Celikkol, Barbaros** (1969)
Associate Professor of Mechanical Engineering; Ph.D., University of New Hampshire, 1972.
- Chaitas, John G.** (1967)
Associate Professor of Education; Ed.D., Columbia University, 1957.
- Chasteen, N. Dennis** (1972)
Associate Professor of Chemistry; Ph.D., University of Illinois, 1969.
- Chesbro, William R.** (1959)
Professor of Microbiology; Ph.D., Illinois Institute of Technology, 1959.
- Chu, Yen-hsi** (1977)
Assistant Professor of Civil Engineering; Sc.D., Massachusetts Institute of Technology, 1972.
- Chupp, Edward L.** (1962)
Professor of Physics; Ph.D., University of California at Berkeley, 1954.
- Clark, Charles E.** (1967)
Professor of History; Ph.D., Brown University, 1966.
- Clark, Mary** (1978)
Assistant Professor of English; Ph.D., University of Massachusetts at Amherst, 1978.
- Clark, Ronald R.** (1957)
Professor of Electrical Engineering; Ph.D., Syracuse University, 1963.
- Clee, Jan E.** (1967)
Professor of Organizational Development; Ph.D., Case Western Reserve 1967.
- Cline, Barbara J.** (1978)
Assistant Professor of Education; Ph.D., Michigan State University, 1977.
- Cohen, Allan R.** (1967)
Professor of Organizational Behavior; D.B.A., Harvard Graduate School of Business Administration, 1967.
- Cohn, Ellen S.** (1978)
Assistant Professor of Psychology; Ph.D., Temple University, 1978.
- Collins, Walter M.** (1951)
Professor of Animal Science and Genetics; Ph.D., Iowa State University, 1960.
- Condon, William C.** (1976)
Assistant Professor of Animal Science; Ph.D., University of Massachusetts, 1975.
- Congdon, Robert G.** (1952)
Adjunct Associate Professor of Psychology; Ed.D., Harvard University, 1961.
- Conte, Michael A.** (1978)
Assistant Professor of Economics; Ph.D., University of Michigan, 1979.
- Copeland, Arthur H., Jr.** (1968)
Professor of Mathematics; Ph.D., Massachusetts Institute of Technology, 1954.
- Corcoran, Ellen P.** (1972)
Associate Professor of Education; Ph.D., New York University, 1972.
- Corell, Robert W.** (1957-60, 1964)
Director of UNH Marine Program, Sea Grant Program, and Professor of Mechanical Engineering; Ph.D., Case Institute of Technology, 1964.
- Craig, Robert E.** (1966)
Assistant Professor of Political Science; Ph.D., University of North Carolina, 1971.
- Croker, Robert A.** (1966)
Associate Professor of Zoology; Ph.D., Emory University, 1966.
- Crow, Garrett E.** (1975)
Assistant Professor of Botany; Ph.D., Michigan State University, 1974.
- Darr, Ginny W.** (1978)
Assistant Professor of Animal Sciences; Ph.D., University of Colorado, 1975.
- Davis, James R.** (1970)
Associate Professor of Psychology; Ph.D., University of Wisconsin, 1969.
- Davis, Richard S.** (1968)
Dean of the College of Engineering and Physical Sciences and Professor of Materials Science; Ph.D., University of Toronto, 1954.
- Dawson, Carl** (1970)
Professor of English; Ph.D., Columbia University, 1966.
- Dawson, John F.** (1968)
Associate Professor of Physics; Ph.D., Stanford University, 1962.
- De Alba, Pedro A.** (1977)
Assistant Professor of Civil Engineering; Ph.D., University of California, Berkeley, 1975.

- DePorte, Michael V.** (1972)
Associate Professor of English; Ph.D., Stanford University, 1966.
- DeVoto, Mark B.** (1968)
Associate Professor of Music; Ph.D., Princeton University, 1967.
- Diamonti, Michael C.** (1973)
Assistant Professor of Education; Ph.D., University of Wisconsin, 1974.
- Diefendorf, Jeffrey M.** (1976)
Assistant Professor of History; Ph.D., University of California at Berkeley, 1975.
- Diller, Ann L.** (1973)
Assistant Professor of Education; Ed.D., Harvard University, 1971.
- Diller, Karl C.** (1972)
Associate Professor of English; Ph.D., Harvard University, 1967.
- Dingman, S. Lawrence** (1975)
Associate Professor of Water Management; Ph.D., Harvard University, 1970.
- Dishman, Robert B.** (1951)
Professor of Political Science; Ph.D., Princeton University, 1948.
- Dodge, Peter** (1964)
Associate Professor of Sociology; Ph.D., Harvard University, 1961.
- Downs, Richard E.** (1962)
Associate Professor of Anthropology; Ph.D., University of Leiden, 1956.
- Draves, David D.** (1964)
Associate Professor of Education; Ph.D., University of Wisconsin, 1957.
- Drew, William H.** (1956)
Associate Dean of the Graduate School and Professor of Resource Economics; Ph.D., Vanderbilt University, 1961.
- Dunlop, William R.** (1950)
Professor of Animal Science; D.V.M., V.S., Ontario Veterinary College, 1938.
- Dunn, Gerald M.** (1951)
Professor of Plant Science and Genetics; Ph.D., Purdue University, 1951.
- Durgin, Owen B.** (1951)
Professor of Resource Economics; M.A., University of New Hampshire, 1951.
- Durnall, Edward J.** (1966)
Director of the Division of Continuing Education and Adjunct Associate Professor of Education; Ed.D., Oregon State University, 1953.
- Eckert, Robert T.** (1978)
Assistant Professor of Forest Genetics; Ph.D., Ohio State University, 1978.
- Edwards, Ruth S.** (1966)
Associate Professor of Music; M.M., Northwestern University, 1950.
- England, Richard W.** (1976)
Assistant Professor of Economics; Ph.D., University of Michigan, 1974.
- Erickson, Raymond L.** (1963)
Dean of the Graduate School, Director of Research, and Professor of Psychology; Ph.D., University of California at Los Angeles, 1962.
- Estes, George O.** (1969)
Associate Professor of Plant Science; Ph.D., Oregon State University, 1969.
- Fairchild, Thomas P.** (1969)
Associate Professor of Animal Science and Genetics; Ph.D., University of Wisconsin, 1964.
- Fan, Stephen S.T.** (1962)
Professor of Chemical Engineering; Ph.D., Stanford University, 1962.
- Farag, Ihab H.** (1976)
Assistant Professor of Chemical Engineering; Sc.D., Massachusetts Institute of Technology, 1976.
- Kurt C. Feltner** (1979)
Dean of the College of Life Sciences and Agriculture, Director of the Agricultural Experiment Station, and Professor of Plant and Soil Science; Ph.D., University of Arizona, 1963.
- Fernald, Peter S.** (1966)
Associate Professor of Psychology; Ph.D., Purdue University, 1963.
- Fink, Stephen L.** (1969)
Professor of Organizational Behavior; Ph.D., Case Western Reserve University, 1959.
- Fisher, G. Thomas** (1969)
Associate Professor of Entomology; Ph.D., Rutgers University, 1954.
- Fisher, Lester A.** (1968)
Assistant Professor of English; Ph.D., Brown University, 1976.
- Fisk, Lennard A.** (1977)
Associate Professor of Physics; Ph.D., University of California at San Diego, 1969.
- Forbes, F. William** (1970)
Associate Professor of Spanish; Ph.D., University of Arizona, 1971.
- Foret, John E.** (1967)
Associate Professor of Zoology; Ph.D., Princeton University, 1966.
- Fort, Marron C.** (1969)
Associate Professor of German; Ph.D., University of Pennsylvania, 1965.
- Foster, Bennett B.** (1969)
Professor of Forest Resources; Ph.D., Duke University, 1966.
- Franco, Edward N.** (1965)
Assistant Professor of Zoology; Ph.D., Pennsylvania State University, 1967.
- Freuder, Eugene C.** (1977)
Assistant Professor of Computer Science; Ph.D., Massachusetts Institute of Technology, 1975.
- Frost, Albert D.** (1957)
Professor of Electrical Engineering; Sc.D., Massachusetts Institute of Technology, 1952.
- Gadon, Herman** (1964)
Professor of Administration; Ph.D., Massachusetts Institute of Technology, 1953.
- Gaudard, Marie A.** (1977)
Assistant Professor of Mathematics; Ph.D., University of Massachusetts, 1977.
- Gaudette, Henri E.** (1965)
Professor of Geology; Ph.D., University of Illinois, 1963.
- Geeslin, William E.** (1972)
Associate Professor of Mathematics; Ph.D., Stanford University, 1973.
- Geoffrion, Leo D.** (1975)
Assistant Professor of Education; Ph.D., Johns Hopkins University, 1975.
- Gerhard, Glen C.** (1967)
Associate Professor of Electrical Engineering; Ph.D., Ohio State University, 1963.
- Gill, Gregory D.** (1977)
Assistant Professor of Occupational Education; Ph.D., Colorado State University, 1977.

- Gilmore, Robert C.** (1952)
Associate Professor of History; Ph.D., Yale University, 1954.
- Glanz, Filson H.** (1965)
Associate Professor of Electrical Engineering; Ph.D., Stanford University, 1965.
- Goodspeed, Charles H.** (1978)
Associate Professor of Civil Engineering; Ph.D., University of Cincinnati, 1972.
- Gordon, Bernard K.** (1971)
Professor of Political Science; Ph.D., University of Chicago, 1959.
- Grant, Clarence L.** (1952-58, 1961)
Professor of Chemistry; Ph.D., Rutgers University, 1960.
- Graulich, Melody** (1979)
Assistant Professor of English; Ph.D., University of Virginia, 1979.
- Graves, Donald H.** (1973)
Associate Professor of Education; Ed.D., State University of Buffalo, 1973.
- Green, D. MacDonald** (1967)
Professor of Biochemistry and Genetics; Ph.D., University of Rochester, 1958.
- Greenwood, Peter H.** (1977)
Assistant Professor of Resource Economics; Ph.D., Brown University, 1974.
- Gress, David L.** (1974)
Assistant Professor of Civil Engineering; Ph.D., Purdue University, 1976.
- Grishman, Alan** (1967)
Associate Professor of Music; M.A., New York University, 1967.
- Haaland, Gordon A.** (1965-74, 1979)
Vice President for Academic Affairs and Professor of Psychology; Ph.D., State University of New York at Buffalo, 1966.
- Hadwin, Donald W.** (1977)
Assistant Professor of Mathematics; Ph.D., Indiana University, 1975.
- Hageman, Elizabeth H.** (1971)
Associate Professor of English; Ph.D., University of North Carolina, 1971.
- Hagstrom, Earl C.** (1965)
Associate Professor of Psychology; Ph.D., Brown University, 1957.
- Haley, Russell** (1975)
Professor of Administration; Ph.D., Union Graduate School, 1974.
- Hall, Francis R.** (1964)
Professor of Hydrology; Ph.D., Stanford University, 1961.
- Haney, James F.** (1972)
Associate Professor of Zoology; Ph.D., University of Toronto, 1970.
- Hansen, Larry J.** (1973)
Assistant Professor of Home Economics; Ph.D., Florida State University, 1973.
- Hapgood, Robert** (1965)
Professor of English; Ph.D., University of California, 1955.
- Harrington, Barry J.** (1975)
Assistant Professor of Physics; Ph.D., Harvard University, 1975.
- Harris, Larry G.** (1969)
Associate Professor of Zoology; Ph.D., University of California, 1970.
- Harter, Robert D.** (1969)
Associate Professor of Soil Chemistry; Ph.D., Purdue University, 1966.
- Hebert, David J.** (1967)
Associate Professor of Education; Ph.D., Kent State University, 1967.
- Heckel, Maynard C.** (1971)
Associate Dean of the College of Life Sciences and Agriculture, Director of Cooperative Extension, and Professor of Adult Education; Ed.D., Cornell University, 1961.
- Heilbronner, Hans** (1954)
Professor of History; Ph.D., University of Michigan, 1954.
- Heisenberg, Jochen** (1978)
Associate Professor of Physics; Doctor, University of Hamburg, 1966.
- Henry, William F.** (1952)
Professor of Resource Economics; M.S., University of Connecticut, 1942.
- Herbst, Edward J.** (1962)
Professor of Biochemistry; Ph.D., University of Wisconsin, 1949.
- Herold, Marc W.** (1975)
Assistant Professor of Economics; Ph.D., University of California, 1977.
- Hettinger, Stanley D.** (1965)
Associate Professor of Music, M.M.E., Vander-Cook College, 1966.
- Hill, John L.** (1964)
Professor of Wood Science and Technology; D.F., Yale University, 1954.
- Hochgraf, Frederick G.** (1958)
Associate Professor of Materials Science; M.S., Cornell University, 1958.
- Hocker, Harold W., Jr.** (1955)
Professor of Forest Resources and Genetics; D.F., Duke University, 1955.
- Hoff, Phyllis** (1967)
Associate Professor of Physical Education; Ph.D., University of Southern California, 1967.
- Holder, Mary E.** (1967)
Associate Professor of Home Economics; M.S., Michigan State University, 1949.
- Holter, James B.** (1963)
Professor of Animal Science; Ph.D., Pennsylvania State University, 1962.
- Homer, Cynthia L.** (1977)
Assistant Professor of Education; Ed.D., Northern Illinois University, 1977.
- Hoornbeek, Frank K.** (1964)
Professor of Zoology and Genetics; Ph.D., Oregon State University, 1964.
- Horrigan, James O.** (1966)
Professor of Business Administration; Ph.D., University of Chicago, 1967.
- Houston, Robert E., Jr.** (1957)
Professor of Physics; Ph.D., Pennsylvania State University, 1957.
- Howard, Cleveland L.** (1969)
Associate Professor of Music; D.M.A., Boston University, 1969.
- Hubbard, Colin D.** (1967)
Associate Professor of Chemistry; Ph.D., University of Sheffield, 1964.
- Hume, Gary** (1976)
Assistant Professor of Anthropology and Archaeologist; Ph.D., University of Minnesota, 1972.

- Hurd, Richard W.** (1973)
Associate Professor of Economics; Ph.D., Vanderbilt University, 1972.
- Hylton, Walter E.** (1976)
Assistant Professor of Animal Science; V.M.D., University of Pennsylvania, 1970.
- Ikawa, Miyoshi** (1963)
Professor of Biochemistry; Ph.D., University of Wisconsin, 1948.
- Irwin, Manley R.** (1963)
Professor of Economics; Ph.D., Michigan State University, 1963.
- Jacoby, A. Robb** (1961)
Professor of Mathematics; Ph.D., University of Chicago, 1946.
- Jahnke, Leland S.** (1977)
Assistant Professor of Botany; Ph.D., University of Minnesota, 1973.
- James, Marion E.** (1955)
Associate Professor of History; Ph.D., Harvard University, 1955.
- Jansen, Edmund F., Jr.** (1969)
Associate Professor of Resource Economics; Ph.D., North Carolina State University, 1966.
- Jellison, Charles A., Jr.** (1956)
Professor of History; Ph.D., University of Virginia, 1956.
- Jones, Galen E.** (1966)
Professor of Microbiology; Ph.D., Rutgers University, 1956.
- Jones, Michael E.** (1978)
Assistant Professor of Administration; J.D., School of Law, University of Miami, 1978.
- Jones, Paul R.** (1956)
Professor of Chemistry; Ph.D., University of Illinois, 1956.
- Jones, William R.** (1962)
Professor of History; Ph.D., Harvard University, 1958.
- Kaen, Fred R.** (1973)
Associate Professor of Finance; Ph.D., University of Michigan, 1972.
- Kaufmann, Richard L.** (1963)
Professor of Physics; Ph.D., Yale University, 1960.
- Kayser, John R.** (1969)
Associate Professor of Political Science; Ph.D., Claremont Graduate School and University Center, 1969.
- Kennard, Jean E.** (1975)
Professor of English; Ph.D., University of California at Berkeley, 1968.
- Kertzer, Robert** (1965)
Associate Professor of Physical Education; Ph.D., Michigan State University, 1965.
- Khleif, Bud B.** (1967)
Professor of Sociology and Education; Ph.D., Johns Hopkins University, 1957.
- Kiang, Yun Tzu** (1970)
Associate Professor of Plant Science and Genetics; Ph.D., University of California, 1970.
- Kimball, Roland B.** (1963)
Professor of Education; Ed.D., Harvard University, 1958.
- Kinerson, Russell S., Jr.** (1973)
Assistant Professor of Botany; Ph.D., University of Washington, 1971.
- Klippenstein, Gerald L.** (1967)
Professor of Biochemistry; Ph.D., Northwestern University, 1967.
- Klotz, Louis H.** (1965)
Associate Professor of Civil Engineering; Ph.D., Rutgers University, 1967.
- Koch, David W.** (1971)
Associate Professor of Plant Science; Ph.D., Colorado State University, 1971.
- Kole, Michael** (1977)
Assistant Professor of Administration; Ph.D., University of Massachusetts, 1978.
- Komonchak, Bernadette** (1976)
Assistant Professor of Spanish; Ph.D., University of Arizona, 1974.
- Korbel, John J.** (1966)
Professor of Economics and Business Administration; Ph.D., Harvard University, 1959.
- Kraft, L. Gordon** (1978)
Assistant Professor of Electrical Engineering; Ph.D., University of Connecticut, 1977.
- Kuo, Shan S.** (1964)
Professor of Computer Science; D. Eng., Yale University, 1958.
- Ladd, Dwight R.** (1964)
Associate Dean of the Whittemore School of Business and Economics and Professor of Business Administration; D.B.A., Harvard University, 1956.
- Lagassa, George** (1974)
Assistant Professor of Political Science; Ph.D., State University of New York at Buffalo, 1976.
- Lambert, Robert H.** (1955-56, 1961)
Professor of Physics; Ph.D., Harvard University, 1963.
- Larson, Barbara K.** (1976)
Assistant Professor of Anthropology; Ph.D., Columbia University, 1975.
- Larson, David L.** (1965)
Associate Professor of Political Science; Ph.D., Fletcher School, Tufts University, 1963.
- Latta, R. Michael** (1978)
Assistant Professor of Psychology; Ph.D., Iowa State University, 1976.
- Lavoie, Marcel E.** (1950-52, 1955)
Associate Professor of Zoology; Ph.D., Syracuse University, 1956.
- Leary, David E.** (1976)
Assistant Professor of Psychology; Ph.D., University of Chicago, 1977.
- Leighton, Charles H.** (1956)
Associate Professor of Spanish; Ph.D., Harvard University, 1961.
- Lewis, Frederick C.** (1976)
Assistant Professor of Communication Disorders; Ph.D., Ohio University, 1970.
- Limber, John E.** (1971)
Associate Professor of Psychology; Ph.D., University of Illinois, Urbana, 1969.
- Limbirt, David E.** (1969)
Associate Professor of Mechanical Engineering; Ph.D., Case Western Reserve University, 1969.
- Lindberg, Gary H.** (1974)
Associate Professor of English; Ph.D., Stanford University, 1967.
- Linden, Allen B.** (1963)
Associate Professor of History; Ph.D., Columbia University, 1969.
- Lindsay, Bruce E.** (1976)
Assistant Professor of Resource Economics; Ph.D., University of Massachusetts, 1976.

- Linsky, Arnold S.** (1966)
Professor of Sociology; Ph.D., University of Washington, 1966.
- Lockwood, John A.** (1948)
Associate Director of Research and Professor of Physics; Ph.D., Yale University, 1948.
- Loder, Theodore C., III** (1972)
Assistant Professor of Earth Sciences; Ph.D., University of Alaska, 1971.
- Logan, Terence P.** (1968)
Associate Professor of English; Ph.D., Harvard University, 1966.
- Long, David F.** (1948)
Professor of History; Ph.D., Columbia University, 1950.
- Loy, J. Brent** (1967)
Associate Professor of Plant Science and Genetics; Ph.D., Colorado State University, 1967.
- Luloff, Albert E.** (1977)
Assistant Professor of Community Development; Ph.D., Pennsylvania State University, 1977.
- MacHardy, William E.** (1972)
Associate Professor of Plant Pathology; Ph.D., University of Rhode Island, 1970.
- Manasse, Fred K.** (1976)
Professor of Electrical Engineering; Ph.D., Princeton University, 1962.
- Marshall, Grover E.** (1965)
Assistant Professor of French and Italian; Ph.D., Princeton University, 1971.
- Martin, Charles W.** (1978)
Assistant Professor of Communication Disorders; Ph.D., Southern Illinois University, 1975.
- Mathieson, Arthur C.** (1965)
Professor of Botany; Ph.D., University of British Columbia, 1965.
- Mathur, Virendra K.** (1974)
Associate Professor of Chemical Engineering; Ph.D., University of Missouri at Rolla, 1970.
- Mautz, William W.** (1969)
Associate Professor of Wildlife Ecology; Ph.D., Michigan State University, 1969.
- Mayewski, Paul A.** (1974)
Assistant Professor of Earth Sciences; Ph.D., Ohio State University, 1973.
- McCann, Francis D., Jr.** (1971)
Associate Professor of History; Ph.D., Indiana University, 1967.
- McKeough, D. Michael** (1977)
Assistant Professor of Physical Education; Ed.D., Teachers College, Columbia University, 1977.
- Meeker, Loren D.** (1970)
Associate Professor of Mathematics; Ph.D., Stanford University, 1965.
- Melvin, Donald W.** (1957)
Associate Dean of the College of Engineering and Physical Sciences and Associate Professor of Electrical Engineering; Ph.D., Syracuse University, 1971.
- Menge, Carleton P.** (1948)
Professor of Education; Ph.D., University of Chicago, 1948.
- Mennel, Robert M.** (1969)
Professor of History; Ph.D., Ohio State University, 1969.
- Merenda, Michael J.** (1977)
Assistant Professor of Administration; Ph.D., University of Massachusetts, 1978.
- Merton, Andrew H.** (1972)
Associate Professor of English; B.A., University of New Hampshire, 1967.
- Messier, Victor** (1970)
Associate Professor of Home Economics; Ph.D., Pennsylvania State University, 1973.
- Metcalf, Theodore G.** (1956)
Professor of Microbiology; Ph.D., University of Kansas, 1950.
- Miller, Donald R.** (1977)
Assistant Professor of Wildlife Ecology; Ph.D., University of Idaho, 1976.
- Miller, Edmund G.** (1951)
Professor of English; Ph.D., Columbia University, 1955.
- Mills, Richard L.** (1967)
Associate Professor of Economics and Business Administration; Ph.D., Indiana University, 1967.
- Minocha, Subhash** (1974)
Assistant Professor of Botany; Ph.D., University of Washington, 1974.
- Mitchell, James R.** (1963)
Associate Professor of Plant Science; Ph.D., Pennsylvania State University, 1969.
- Moore, Berrien, III** (1969)
Associate Professor of Mathematics; Ph.D., University of Virginia, 1969.
- Moore, David W.** (1972)
Associate Professor of Political Science; Ph.D., Ohio State University, 1970.
- Morrison, James D.** (1965)
Professor of Chemistry; Ph.D., Northwestern University, 1963.
- Mosberg, William** (1958)
Associate Professor of Mechanical Engineering; M.Eng., Yale University, 1960.
- Mott, Basil J.F.** (1973)
Dean, School of Health Studies, and Professor of Health Administration and Planning; Ph.D., Harvard University, 1967.
- Mower, Lyman** (1957)
Professor of Physics; Ph.D., Massachusetts Institute of Technology, 1953.
- Mulhern, John E., Jr.** (1954)
Professor of Physics; Ph.D., Boston University, 1954.
- Munroe, M. Evans** (1959)
Professor of Mathematics; Ph.D., Brown University, 1945.
- Murdoch, Joseph B.** (1952)
Professor of Electrical Engineering; Ph.D., Case Institute of Technology, 1962.
- Murray, Donald M.** (1963)
Professor of English; B.A., University of New Hampshire, 1948.
- Murray, Frederick P.** (1966)
Associate Professor of Communication Disorders; Ph.D., University of Denver, 1966.
- Nahin, Paul J.** (1975)
Assistant Professor of Electrical Engineering; Ph.D., University of California, 1972.
- Nevin, John A.** (1972)
Professor of Psychology; Ph.D., Columbia University, 1963.
- Newkirk, Thomas R.** (1977)
Assistant Professor of English; Ph.D., University of Texas, 1977.

- Nicoloff, Philip L.** (1954)
Professor of English; Ph.D., Columbia University, 1959.
- Nielson, Melville** (1950)
Associate Dean of the College of Liberal Arts and Associate Professor of Sociology; Ph.D., Ohio State University, 1955.
- Nordgren, Eric A.** (1964)
Professor of Mathematics; Ph.D., University of Michigan, 1964.
- Obert, Steven** (1978)
Assistant Professor of Administration; Ph.D., Case Western Reserve University, 1979.
- O'Brien, Dennis J.** (1974)
Assistant Professor of Civil Engineering; Ph.D., University of Maryland, 1974.
- O'Connell, Lawrence W.** (1966)
Associate Professor of Political Science; Ph.D., Syracuse University, 1968.
- Oja, Sharon N.** (1977)
Assistant Professor of Education; Ph.D., University of Minnesota, 1978.
- Olofsson, John A., Jr.** (1977)
Assistant Professor of Civil Engineering; Ph.D., University of Maine, 1977.
- Olson, David P.** (1968)
Professor of Wildlife Ecology; Ph.D., University of Minnesota, 1964.
- Orkin, Eric B.** (1972)
Associate Professor of Hotel Administration; M.B.A., University of Pennsylvania, 1970.
- Ossenbruggen, Paul J.** (1975)
Associate Professor of Civil Engineering; Ph.D., Carnegie-Mellon University, 1970.
- Owens, Charles W.** (1963)
Professor of Chemistry; Ph.D., University of Kansas, 1963.
- Palmer, Stuart H.** (1955)
Professor of Sociology; Ph.D., Yale University, 1955.
- Paul, Nicholas L.** (1973)
Associate Professor of Occupational Education; Ed.D., North Carolina State University, 1973.
- Peirce, Lincoln C.** (1964)
Professor of Plant Science and Genetics; Ph.D., University of Minnesota, 1958.
- Peterson, Nobel K.** (1957)
Associate Professor of Soil and Water Science; Ph.D., Rutgers University, 1957.
- Pfanner, Helmut F.** (1969)
Associate Professor of German; Ph.D., Stanford University, 1965.
- Pilar, Frank L.** (1957)
Professor of Chemistry; Ph.D., University of Cincinnati, 1957.
- Pine, Gerald J.** (1966)
Professor of Education; Ed.D., Boston University, 1963.
- Pistole, Thomas G.** (1971)
Associate Professor of Microbiology; Ph.D., University of Utah, 1969.
- Pokoski, John L.** (1967)
Associate Professor of Electrical Engineering; Ph.D., Montana State University, 1967.
- Polk, Keith** (1964)
Associate Professor of Music; Ph.D., University of California at Berkeley, 1968.
- Poll, Solomon** (1964)
Professor of Sociology; Ph.D., University of Pennsylvania, 1960.
- Pollard, James E.** (1970)
Associate Professor of Plant Science; Ph.D., University of Florida, 1969.
- Potter, Hugh M., III** (1962)
Assistant Professor of English; Ph.D., University of Minnesota, 1965.
- Prince, Allan B.** (1954)
Vice President for Budget and Administration and Professor of Soil and Water Science; Ph.D., Rutgers University, 1950.
- Puth, Robert C.** (1967)
Associate Professor of Economics; Ph.D., Northwestern University, 1967.
- Radlow, James** (1965)
Professor of Applied Mathematics; Ph.D., New York University, 1957.
- Rasmussen, Mary H.** (1968)
Associate Professor of Music; M.M., University of Illinois, 1953; M.L.S., University of Illinois, 1956.
- Reeves, R. Marcel** (1964)
Associate Professor of Entomology and Forest Resources; Ph.D., State University of New York College of Forestry, Syracuse University, 1964.
- Repka, Frank J.** (1972)
Assistant Professor of Animal Science; Ph.D., Cornell University, 1972.
- Reyna, Stephen P.** (1973)
Associate Professor of Anthropology; Ph.D., Columbia University, 1972.
- Rich, Avery E.** (1941-43, 1951)
Associate Dean of College of Life Sciences and Agriculture and Professor of Plant Pathology; Ph.D., State University of Washington, 1950.
- Richardson, John C.** (1946)
Professor of English; Ph.D., Boston University, 1959.
- Roberts, Lewis, Jr.** (1972)
Director of Thompson School of Applied Science and Associate Professor of Occupational Education; Ed.D., Auburn University, 1972.
- Rogers, Dana B.** (1978)
Assistant Professor of Electrical Engineering; Ph.D., University of Dayton, 1978.
- Rogers, John E.** (1967)
Associate Professor of Music; M.F.A., Princeton University, 1966.
- Rogers, Owen M.** (1959)
Professor of Plant Science and Genetics; Ph.D., Pennsylvania State University, 1959.
- Romoser, George K.** (1961-62, 1967)
Professor of Political Science; Ph.D., University of Chicago, 1958.
- Rosen, Sam** (1957)
Nashua Corporation Professor of Economics; Ph.D., Harvard University, 1952.
- Ross, Shepley L.** (1955)
Professor of Mathematics; Ph.D., Boston University, 1953.
- Rothwell, Kenneth J.** (1963)
Professor of Economics; Ph.D., Harvard University, 1960.
- Routley, Douglas G.** (1957)
Professor of Plant Science; Ph.D., Pennsylvania State University, 1957.
- Russell, Robert D.** (1975)
Assistant Professor of Computer Science; Ph.D., Stanford University, 1972.
- Rutman, Darrett B.** (1968)
Professor of History; Ph.D., University of Virginia, 1959.

-
- Samuels, Fred** (1966)
Associate Professor of Sociology; Ph.D., University of Massachusetts, 1966.
- Sandler, Melvin** (1970)
Associate Professor of Hotel Administration; M.A., Northwestern University, 1947; C.P.A.
- Sasner, John J., Jr.** (1965)
Professor of Zoology; Ph.D., University of California at Los Angeles, 1965.
- Savage, Godfrey H.** (1965)
Professor of Mechanical Engineering; Ph.D., Stanford University, 1970.
- Sawyer, Albert K.** (1949)
Professor of Chemistry; M.S., University of Maine, 1947.
- Sawyer, Philip J.** (1952)
Professor of Zoology; Ph.D., University of Michigan, 1956.
- Schibanoff, Susan** (1971)
Associate Professor of English; Ph.D., University of California at Los Angeles, 1971.
- Schickedanz, David I.** (1973)
Assistant Professor of Psychology; Ph.D., University of Illinois, 1973.
- Schneer, Cecil J.** (1950, 1954)
Professor of Geology and the History of Science; Ph.D., Cornell University, 1954.
- Schreiber, Richard W.** (1957)
Professor of Botany; Ph.D., University of Wisconsin, 1955.
- Schwab, Charles** (1975)
Assistant Professor of Animal Sciences; Ph.D., University of Wisconsin, 1974.
- Schwarz, Marc L.** (1967)
Associate Professor of History; Ph.D., University of California at Los Angeles, 1965.
- Seitz, W. Rudolf** (1976)
Assistant Professor of Chemistry; Ph.D., Massachusetts Institute of Technology, 1970.
- Shapiro, Howard M.** (1969)
Associate Professor of Sociology; Ph.D., University of Minnesota, 1969.
- Shar, Albert O.** (1971)
Associate Professor of Mathematics; Ph.D., University of Pennsylvania, 1970.
- Shepard, Harvey K.** (1969)
Associate Professor of Physics; Ph.D., California Institute of Technology, 1966.
- Sherman, James L.** (1967)
Assistant Professor of German; Ph.D., University of Michigan, 1969.
- Shor, Ronald E.** (1967)
Professor of Psychology; Ph.D., Brandeis University, 1960.
- Shore, Barry** (1974)
Associate Professor of Administration; Ph.D., University of Wisconsin, 1968.
- Shore, Samuel D.** (1965)
Associate Professor of Mathematics; Ph.D., Pennsylvania State University, 1964.
- Siddall, David V.** (1965)
Assistant Professor of English; Ph.D., Indiana University, 1970.
- Silver, Judith A.** (1973)
Assistant Professor of History; Ph.D., University of Michigan, 1973.
- Silverman, Robert J.** (1962)
Professor of Mathematics; Ph.D., University of Illinois, 1952.
- Simic, Charles D.** (1973)
Associate Professor of English; B.A., New York University, 1967.
- Simos, Evangelos O.** (1977)
Assistant Professor of Economics; Ph.D., Northern Illinois University, 1977.
- Simpson, Robert E.** (1963)
Associate Professor of Physics; Ph.D., Harvard University, 1960.
- Sir, W. Niel** (1970)
Associate Professor of Music; M.A., University of California, 1962.
- Sitkoff, Harvard** (1976)
Associate Professor of History; Ph.D., Columbia University, 1975.
- Sivaprasad, Kondagunta** (1969)
Associate Professor of Electrical Engineering; Ph.D., Harvard University, 1963.
- Skoglund, Winthrop C.** (1950)
Professor of Animal Science; Ph.D., Pennsylvania State University, 1958.
- Smith, Gerald L.** (1948)
Associate Professor of Animal Science; M.S., Pennsylvania State University, 1951.
- Smith, Gordon D.** (1976)
Assistant Professor of Quantitative Methods and Operations Management; Ph.D., Pennsylvania State University, 1976.
- Smith, James A.** (1972)
Associate Dean of the College of Liberal Arts, Director of Institutional Research, and Adjunct Associate Professor of Economics; Ph.D., Washington State University, 1967.
- Smith, James W.** (1976)
Assistant Professor of Animal Science; Ph.D., University of Maryland, 1971.
- Smith, M. Daniel** (1967)
Associate Professor of Education; Ed.D., Harvard University, 1961.
- Smith, Mark R.** (1966)
Professor of English; B.A., Northwestern University, 1960.
- Smith, Roderick M.** (1974)
Assistant Professor of Zoology; Ph.D., University of Massachusetts, 1969.
- Smith, Samuel C.** (1961)
Professor of Animal Science and Biochemistry; Ph.D., Pennsylvania State University, 1962.
- Snell, Elizabeth A.** (1971)
Associate Professor of Home Economics; Ph.D., Cornell University, 1971.
- Spitz, Allan** (1971)
Dean of the College of Liberal Arts and Professor of Political Science; Ph.D., Michigan State University, 1964.
- Sprague, Linda G.** (1969)
Associate Professor of Business Administration; D.B.A., Harvard University, 1973.
- Stackhouse, Larry L.** (1970)
Associate Professor of Animal Science; Ph.D., Colorado State University, 1970.

-
- Stewart, James A.** (1968)
Associate Professor of Biochemistry; Ph.D., University of Connecticut, 1967.
- Stone, Deborah E.** (1962)
Associate Professor of Education; Ed.D., Boston University, 1971.
- Stotz, Kerwin C.** (1964)
Associate Professor of Electrical Engineering; Ph.D., Rensselaer Polytechnic Institute, 1963.
- Straus, Murray A.** (1968)
Professor of Sociology; Ph.D., University of Wisconsin, 1956.
- Strout, Richard G.** (1954)
Professor of Animal Science; Ph.D., University of New Hampshire, 1961.
- Sundberg, Donald C.** (1978)
Assistant Professor of Chemical Engineering; Ph.D., University of Delaware, 1970.
- Swift, M. Robinson** (1976)
Assistant Professor of Mechanical Engineering; Ph.D., University of New Hampshire, 1974.
- Taft, Charles K.** (1967)
Professor of Mechanical Engineering; Ph.D., Case Institute of Technology, 1960.
- Tagliaferro, Anthony R.** (1978)
Assistant Professor of Home Economics; Ph.D., Cornell University, 1978.
- Taylor, James T.** (1977)
Assistant Professor of Zoology; Ph.D., Oregon State University, 1976.
- Teeri, Arthur E.** (1938-40, 1943)
Professor of Biochemistry; Ph.D., Rutgers University, 1943.
- Thompson, Allen R.** (1974)
Associate Professor of Economics; Ph.D., University of Texas, Austin, 1973.
- Tillinghast, Edward K.** (1967)
Associate Professor of Zoology; Ph.D., Duke University, 1966.
- Tischler, Herbert** (1965)
Professor of Geology; Ph.D., University of Michigan, 1961.
- Tokay, F. Harry** (1973)
Associate Professor of Communication Disorders; Ph.D., Michigan State University, 1967.
- Trout, B. Thomas** (1969)
Associate Professor of Political Science; Ph.D., Indiana University, 1972.
- Uebel, J. John** (1964)
Professor of Chemistry; Ph.D., University of Illinois, 1964.
- Ulrich, Gail D.** (1970)
Associate Professor of Chemical Engineering; Sc.D., Massachusetts Institute of Technology, 1964.
- Urban, Willard E., Jr.** (1963)
Associate Professor of Biometrics and Genetics; Ph.D., Iowa State University, 1963.
- Valentine, Russell L.** (1953)
Associate Professor of Mechanical Engineering; M.S.M.E., Purdue University, 1954.
- Van Osdol, Donovan H.** (1970)
Associate Professor of Mathematics; Ph.D., University of Illinois, 1969.
- Verrette, Paul F.** (1962)
Associate Professor of Music; M.A., Boston University, 1971.
- Vincent, Donald E.** (1962)
Professor and University Librarian; Ph.D., University of Michigan, 1974.
- Voll, John O.** (1965)
Associate Professor of History; Ph.D., Harvard University, 1969.
- Walker, Charles W.** (1976)
Assistant Professor of Zoology; Ph.D., Cornell University, 1976.
- Wallace, Oliver P., Sr.** (1958)
Associate Professor of Forest Resources; Ph.D., University of Michigan, 1954.
- Wang, Tung-Ming** (1961)
Professor of Civil Engineering; Ph.D., Northwestern University, 1960.
- Warden, Charles B., Jr.** (1977)
Dean of the Whittemore School of Business and Economics and Professor of Economics and Management; Ph.D., Harvard University, 1964.
- Warren, Jerry A.** (1971)
Associate Professor of Plant Science; Ph.D., Cornell University, 1960.
- Waterfield, D. Allan** (1970)
Associate Professor of Physical Education; Ph.D., Ohio State University, 1976.
- Watson, Winsor H., III** (1978)
Assistant Professor of Zoology; Ph.D., University of Massachusetts, 1978.
- Watters, David H.** (1978)
Assistant Professor of English; Ph.D., Brown University, 1979.
- Wear, Robert E.** (1964)
Associate Professor of Physical Education; Ph.D., University of Michigan, 1955.
- Weathersby, Rita** (1978)
Assistant Professor of Administration; Ed.D., Harvard, 1977.
- Webb, Dwight** (1967)
Associate Professor of Education; Ph.D., Stanford University, 1967.
- Webber, William R.** (1969)
Professor of Physics; Ph.D., University of Iowa, 1957.
- Weber, James H.** (1963)
Professor of Chemistry; Ph.D., Ohio State University, 1963.
- Weiland, Walter E.** (1964)
Associate Professor of Physical Education; Ph.D., Pennsylvania State University, 1964.
- Weisman, Gary R.** (1977)
Assistant Professor of Chemistry; Ph.D., University of Wisconsin, 1976.
- Wells, Otho S.** (1966)
Associate Professor of Plant Science; Ph.D., Rutgers University, 1966.
- Wetzel, William E., Jr.** (1967)
Associate Professor of Business Administration; M.B.A., Temple University, 1965; M.B.A., University of Chicago, 1967.
- Weyrick, Richard R.** (1970)
Associate Professor of Forest Resources; Ph.D., University of Minnesota, 1968.
- Wheeler, Charles M., Jr.** (1950)
Professor of Chemistry; Ph.D., West Virginia University, 1951.
- Wheeler, Douglas L.** (1965)
Professor of History; Ph.D., Boston University, 1963.
- White, Susan O.** (1969)
Associate Professor of Political Science; Ph.D., University of Minnesota, 1970.
- Whitlock, John B.** (1958)
Associate Professor of Music; Ph.D., State University of Iowa, 1958.

-
- Wicks, John D.** (1956)
Professor of Music; Ph.D., Harvard University, 1959.
- Wilcox, Donald J.** (1970)
Professor of History; Ph.D., Harvard University, 1967.
- Williams, Daniel C.** (1970)
Associate Professor of Psychology; Ph.D., University of California at Santa Barbara, 1970.
- Williams, Thomas A., Jr.** (1958)
Professor of English; M.A., University of New Hampshire, 1958.
- Willits, Robin D.** (1965)
Professor of Business Administration and Organization; Ph.D., Massachusetts Institute of Technology, 1965.
- Wilson, John A.** (1960)
Associate Professor of Mechanical Engineering; Ph.D., Northeastern University, 1970.
- Wing, Henry J., Jr.** (1970)
Associate Professor of Music; Ph.D., Boston University, 1966.
- Winn, Alden L.** (1948)
Professor of Electrical Engineering; S.M., Massachusetts Institute of Technology, 1948.
- Winslow, Mary B.** (1978)
Assistant Professor of Education; Ed.D., Harvard University, 1974.
- Winslow, Ronald A., Jr.** (1978)
Assistant Professor of English; B.A., University of New Hampshire, 1971.
- Wong, Edward Hou Sen** (1978)
Assistant Professor of Chemistry; Ph.D., Harvard University, 1975.
- Woodward, William R.** (1975)
Assistant Professor of Psychology; Ph.D., Yale University, 1975.
- Wright, John J.** (1970)
Associate Professor of Physics; Ph.D., University of New Hampshire, 1969.
- Wright, Paul A.** (1958)
Professor of Zoology; Ph.D., Harvard University, 1944.
- Wrightsmann, Dwayne E.** (1964)
Professor of Finance; Ph.D., Michigan State University, 1964.
- Yildiz, Asim** (1967)
Professor of Mechanics; D.Eng., Yale University, 1959.
- Young, Sharon** (1975)
Assistant Professor of Home Economics; Ph.D., Ohio State University, 1975.
- Yount, John A.** (1962-64, 1965)
Professor of English; M.F.A., State University of Iowa, 1962.
- Zsigray, Robert M.** (1970)
Associate Professor of Microbiology and Genetics; Ph.D., Georgetown University, 1969.

The University of New Hampshire is a public institution with a long-standing commitment to equal opportunity for all. The University does not discriminate on the basis of race, color, religion, sex, age, national origin, or handicap in its recruitment and admission of students or awarding of financial aid, in the recruitment and employment of faculty and staff; or in the operation of any of its programs and activities, in accordance with all relevant federal and state laws and regulations. Inquiries concerning the application of or compliance with such laws and regulations should be addressed to the University Director of Affirmative Action.

The University is in compliance with federal guaranteed student loan regulations and will supply information about the employment of its graduates who have majored in specialized degree programs that normally lead to specific employment fields. This information may be obtained upon request from the University's Career Planning and Placement Service, which is available to all students. The University does not guarantee employment to its graduates, but their chances for employment are enhanced if they have begun career planning early in their undergraduate days.

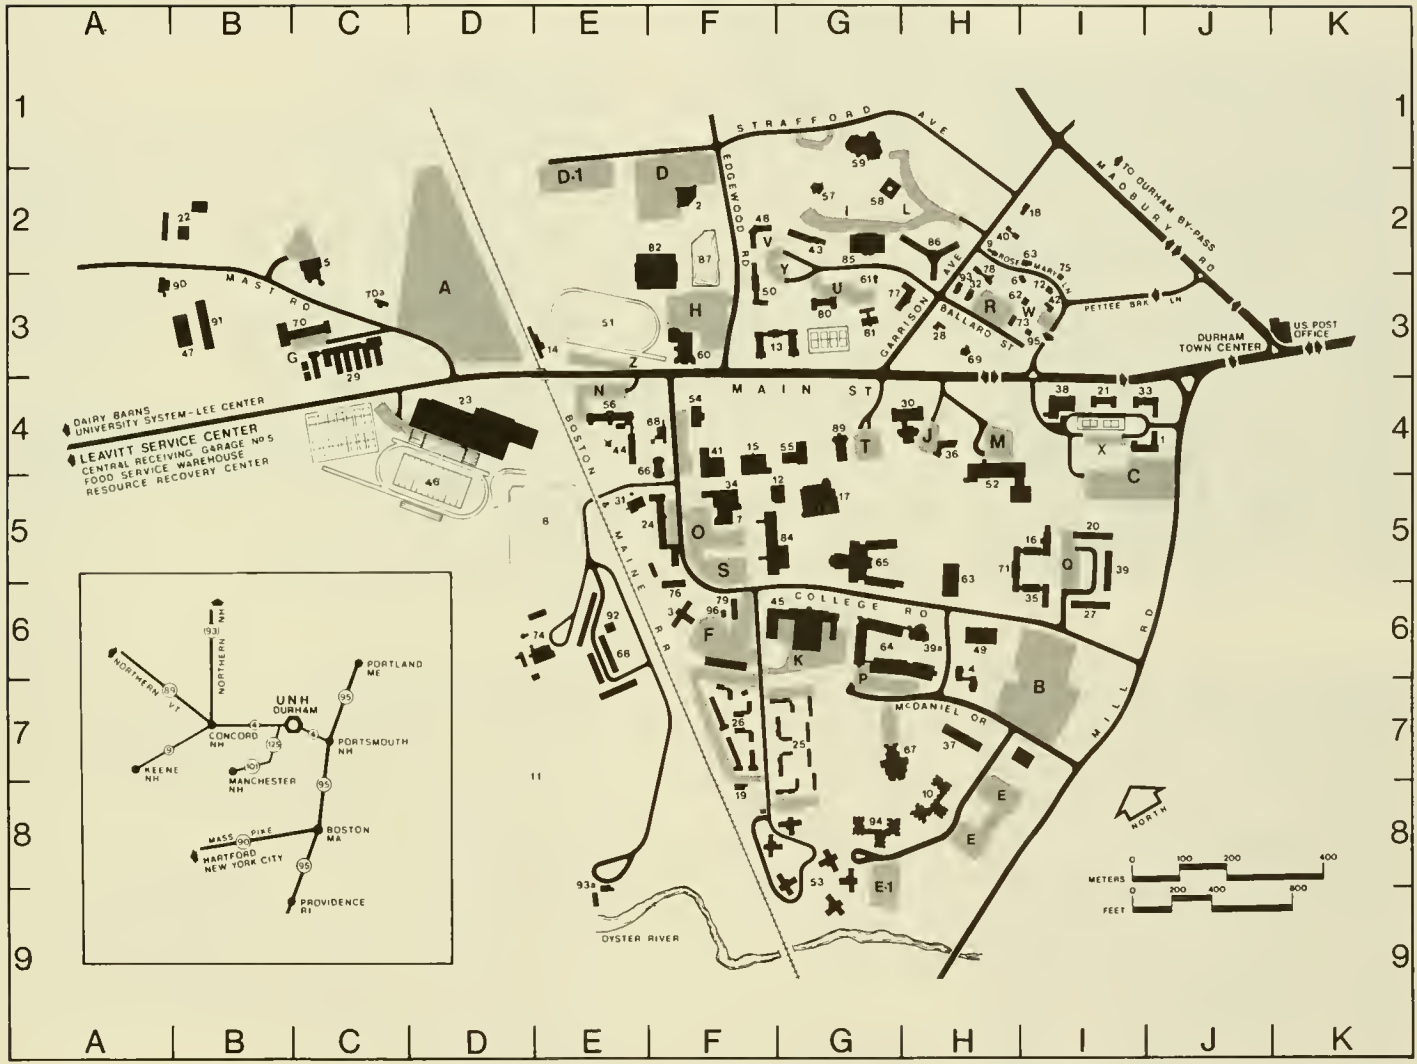

The University provides full information pertaining to the Family Educational Rights and Privacy Act of 1974 (the "Buckley Amendment") in the annual student guide. Information also is available from the offices of the vice-president for student affairs and the vice president for academic affairs.

The University assumes no liability for failure to provide or for delay in providing expected services and/or facilities when such failure arises from causes beyond the reasonable control of the University.

Graduate School Calendar 1979-80

Semester I

September 2, Sunday
September 5, Wednesday
September 10, Monday
September 14, Friday
September 21, Friday

October 4, Thursday

October 26, Friday

November 12, Monday
November 16, Friday
November 21, Wednesday
November 22-23, Thursday-Friday
November 26, Monday
November 30, Friday

December 15-16, Saturday-Sunday
December 16, Sunday
December 17, Monday
December 21, Friday

9 a.m. Residence halls open
8 a.m. Classes begin
Graduate student registration
Last day to drop courses without \$10 late drop fee
Last day to add courses without dean's approval and \$10 late add fee
Last day to carry over 16 credits without surcharge, or for partial tuition refund on withdrawal
Midsemester—Last day to drop courses or withdraw without academic liability
Veterans Day holiday—no classes
Last day for final Ph.D. oral examination (December graduation)
Classes follow Monday schedule
Thanksgiving holiday—no classes
8 a.m. Classes resume
Last day for presenting final copies of dissertation or thesis to the Graduate School for binding (December graduation)
Last day to take final examination for the master's degree
Reading days
Commencement
8 a.m. Semester I final exams begin
Final exams end

Semester II

January 16, Wednesday
January 21, Monday
January 25, Friday
February 1, Friday

February 14, Thursday

March 10-14, Monday-Friday
March 17, Monday
March 21, Friday

April 18, Friday
May 2, Friday

May 7-8, Wednesday-Thursday
May 9, Friday
May 16, Friday
May 18, Sunday

8 a.m. Classes begin
Graduate student registration
Last day to drop courses without \$10 late drop fee
Last day to add courses without dean's approval and \$10 late add fee
Last day to carry over 16 credits without surcharge, or for partial tuition refund on withdrawal
Spring recess
8 a.m. Classes resume
Midsemester—Last day to drop courses or withdraw without academic liability
Last day for final Ph.D. oral examination (May graduation)
Last day for presenting final copies of dissertation or thesis to the Graduate School for binding (May graduation)
Last day to take final examination for the master's degree
Reading days
8 a.m. Semester II final exams begin
Final exams end
Commencement
