HOUSE BILL No. 203

Introduced by Mr. Cole of Northumberland
(Referred to the Committee on Judiciary)

STATE OF NEW HAMPSHIRE

In the year of our Lord one thousand nine hundred and thirty-three

AN ACT

Authorizing the Town of Northumberland to Issue Refunding Bonds.

Be it enacted by the Senate and House of Representatives in General Court convened:

1. REFUNDING. The town of Northumberland is hereby authorized and empowered to issue its bonds to the amount of thirty-three thousand (\$33,000) dollars for the purpose of refunding an equal amount of floating debt incurred for the purpose of enlarging its water works.

2. MANNER OF ISSUING BONDS. Said issue of bonds shall be payable serially, at the rate of thirty-five hundred (\$3,500) dollars per year for the first six years and at the rate of three thousand (\$3000) dollars per year for the next four years, the first payment to be payable on February 1, 1936, with interest on the whole payable semi-annually.

3. APPLICATION OF GENERAL LAW. Except as otherwise provided in this act, the provisions of the Municipal Bonds Act shall apply to the bonds herein authorized.

4. EXERCISE OF POWER. Said town may exercise the power and authority herein conferred by a majority of those present and voting at the regular or any special meeting of the legal voters of the town during the year 1933, the warrant for which meeting shall contain an article calling for the consideration of such approval.

5. TAKES EFFECT. This act shall take effect upon its passage.

Can the cost of running our schools be reduced? This is the question which seems to be foremost in the minds of many people this year.

Your School Board has, during the last three years, figured costs very carefully and has cut down expenses just as fast as it has seemed possible to cut them without lowering the standard of our schools. We hope that the voters appreciate the fact that, during the last eight years, your Committee has been able to present a definite budget of expenses to the voters each March and, in every case, has been able to live within the income, after the appropriation has been made.

Last spring our appropriation was \$40,000, or \$5,700 less than it had been during the two previous years. Your Committee adjusted its expenses to fit the smaller income and expects to finish the school year (June 30th, 1933) with a balance of cash on hand as has been done in previous years.

There has been some criticism during the last few months, because teachers' salaries were not reduced last summer. We feel sure that some voters do not fully understand the condition which has existed during the past year.

A part of our money for elementary schools comes from the state. The state law works as follows:—If we raise five dollars for each one thousand dollars of the equalized valuation of the District, and that is not enough to run our elementary schools in accordance with the state standards, the state will give us the extra money needed to bring our schools up to the state standard.

At the present time the five dollar tax in Northumberland furnishes enough money to pay each teacher about \$800. The state standard allows teachers with normal training and four or more years of experience to be paid \$1000. The State Board of Education, therefore, notify us that we may engage trained teachers and agree to pay them up to \$1000 per year. We are to pay them the \$800 which we have raised and the State is to furnish the other \$200.

Now it can be readily seen that, if we reduce salaries from \$1000 to \$900, we will save money for the state but will not save one cent for the District of Northumberland. We would still have to pay our \$800 but the state would have to pay only \$100. If we reduce salaries to \$800, the state would save \$200 on each teacher but we would save nothing. If we should reduce salaries below \$800, we would not be meeting the state's requirements in raising and expending the five dollar tax and would, therefore, lose all our state aid, not only on teachers but on janitors' salaries, fuel, text books, supplies, etc.

Some have been of the opinion that, since a cut in our teachers' salaries would benefit the state, this would reduce our state tax. This is not true. The State Board of Education is given a definite amount of money for aiding Districts which can meet the requirements. If Northumberland refuses to accept all that is due her, that amount will go to some other district. Our state tax would not be affected in the least since we must pay our proportionate part of the lump sum no matter where it is used.

After considering the situation carefully, last spring, your Committee did not think that it would be good business to reduce the salaries of our elementary teachers, thereby giving them less money to spend in town, while the town could not profit one cent by their loss.

We do not receive state aid for high school teachers. Any cut in wages there would save money for the District. But when we come to examine the situation we find that all but three of our high school teachers have been hired since the depression began and hired at a very material reduction from what we paid a few years ago. We are now paying college graduates without experience, \$200 less than we paid three years ago. In other words, seven of our ten teachers at the high school building, have already had a reduction in salary.

Now we are confronted with the question of what is to be done during the coming year. Your Committee is just as anxious as any taxpayers to reduce costs, provided it can be done without injuring our schools.

It is very possible that our equalized valuation will be reduced this year so that the conditions which we have mentioned regarding state aid will be changed. If a change is made, so that a reduction in the salaries of elementary teachers will save money for the town, salaries will be reduced next year. All salaries not affected by the state aid law, will be reduced, provided it seems profitable and advisable.

The costs of supplies have been reduced somewhat during the last year and we expect to save a little on these items. Text books have not been reduced at all. The cost of lights has not been reduced. We are buying our coal at as low a rate as any town between Woodsville and the Canadian line.

One of our fairly large expenditures in past years has been the repairs on school buildings. If we were sure that conditions will be much better in 1934 than they are now, we could lower our appropriation this year by postponing some of our regular repair work. The

high school building needs to be painted on the outside but that could probably be put off for a year or two.

For several years we have made a practice of exchanging our typewriters for new machines as soon as they are three years old. The exchange cost, at the end of three years, is \$30 per machine. This price, of course, increases as the machine grows older. It is possible to save a little for the present by using these machines for more than three years before exchanging them. The difficulty with this idea of postponing payments is that there is sure to come a time when we shall have to make up all that we save this year.

The rest of our items, such as insurance, debt and interest, etc. cannot be changed.

Your committee has gone over every item very carefully and believe that, by cutting wages wherever profitable and by postponing some expenditures which we would make in normal times, we can run the schools next year on an appropriation of \$37,000. This is \$8,700 less than was raised two years ago.
