Graduate Education and the University of New Hampshire

The University
The home of the University is Durham—one of the oldest towns in northern New England. The town is semirural and still retains traces of its colonial past. Easy accessibility to Boston's cultural opportunities (65 miles to the south); the unsurpassed skiing, hiking, and scenery of the White Mountains (60 miles northwest); and the sandy beaches and rocky coast of New Hampshire and Maine (10 miles east) make it an ideal location.

The 188-acre campus is surrounded by more than 3,000 acres of fields, farms, and woodlands owned by the University. A 15-acre wooded tract, known as the Ravine, graces the center of the campus, allowing members of the University community some natural quiet amidst the 35 classroom, research, and service buildings and 29 residential buildings of the campus.

The University is composed of the College of Liberal Arts, College of Life Sciences and Agriculture, College of Engineering and Physical Sciences, Whittemore School of Business and Economics, School of Health Studies, Thompson School of Applied Science, Division of Continuing Education, and the Graduate School. In addition to these colleges and schools located on the University campus, the University System of New Hampshire also includes Keene State, Plymouth State, and Merrimack Valley colleges and the School for Lifelong Learning.

The University enrolls more than 10,000 students, has a full-time faculty of more than 500, and offers 92 undergraduate and 73 graduate programs. The student body includes 1,000 graduate students.

The University of New Hampshire is a land-grant institution made possible by the Morrill Act of 1862, which aided states in developing institutions to serve all the people. The institution was founded as New Hampshire College of Agriculture and the Mechanic Arts in 1866 to train young men and women for service to the state through agriculture and technology. In 1893, New Hampshire College (as it was called at that time) moved from Hanover to Durham, as the result of a bequest of lands and funds by Benjamin Thompson, and began to develop more rapidly. University status was conferred in 1923. In 1980, UNH and the University of Maine were designated jointly as a Sea Grant College by the National Oceanographic and Atmospheric Administration (NOAA).

Graduate Education
The University awarded its first Ph.D. in 1896, placing it among the first American universities to award that degree. Doctoral programs in their present form began in the 1950s.

Graduate education is supervised by a graduate faculty of more than 400. The Graduate School is led by the dean, who implements the policies of the graduate faculty. The Graduate Council is composed of elected faculty and student representatives and serves in an advisory capacity to the dean.

Quality graduate education requires development of new knowledge and communication of existing knowledge. The faculty, while dedicated to teaching, carry on an active research program, which supports graduate education by developing new knowledge and providing training opportunities for graduate students in residence. As a land-grant and Sea Grant institution, the University is responsible for conducting research and disseminating information to the public in areas affecting the nation's welfare.

The University of New Hampshire is the only university in the state, and is the primary institution within the University System of New Hampshire responsible for providing graduate programs that meet state and regional needs. Doctoral programs are offered exclusively on the University campus although other units of the University System offer some master's programs.

Master's Programs
The University offers master's degree programs in a wide variety of disciplines. The master's degree can serve either as a professional terminal degree or as an intermediate degree for those intending to pursue further graduate study. Master's programs at the University of New Hampshire have been carefully developed and are reviewed by the graduate dean and faculty to ensure their continuing quality. In most programs, students can elect options that will permit them either to study one aspect of a discipline in depth by preparing a thesis or to gain a broader mastery of a discipline by electing to take course work in lieu of a thesis.

Doctoral Programs
The University offers programs leading to the doctor of philosophy in those disciplines where it has both faculty and facilities to support advanced graduate education of high quality. Care has also been taken to ensure
that the programs will make a significant con-
tribution to the opportunities for doctoral ed-
ucation in the New England region. Doctoral
education properly focuses upon preparing
the student to contribute to the growth of
knowledge through research. However, since
a large percentage of doctoral students find
employment in higher education, most doc-
toral programs provide opportunities for stu-
dents to work as teaching assistants and to
participate in seminars on teaching led by ex-
perienced faculty members. This preparation
for the student’s future role as both developer
and communicator of knowledge has enabled
recipients of the doctoral degree from the Uni-
versity of New Hampshire to obtain attractive
teaching and research positions.

Interdisciplinary
Programs
The Graduate School encourages interdisci-
plinary study within its existing programs and
has adopted procedures for faculty to develop
interdisciplinary options within established
doctoral programs. However, independent,
self-designed graduate programs are not avail-
able at the University. Formal interdisciplinary
degrees are offered in the Genetics Program,
which involves geneticists from many depart-
ments in both master’s and doctoral pro-
grams; the Engineering Ph.D. Program and
the Ocean Engineering M.S. Program, which
are cooperative, interdisciplinary efforts of the
electrical and computer engineering, civil en-
gineering, mechanical engineering, and chem-
ical engineering departments; and the Biology
Program, which makes the resources of the
biological science departments available to
students interested in a general master’s pro-
gram. An option within the Biochemistry
Ph.D. Program allows advanced study in nu-
trition, drawing upon the expertise of nutritionists from the departments of biochemistry
and animal and nutritional sciences. Ad-
tional interdisciplinary opportunities are listed
with the individual program descriptions.

The Graduate School
The staff of the Graduate School is available
to assist students in both academic and per-
sonal matters affecting their study at the Uni-
versity. Students are urged to contact the office
with questions about academic policy, finan-
cial assistance and University services avail-
able to graduate students. The offices of the
Graduate School are located in the Horton
Social Science Center.

Graduate Student Life
Graduate students play an active role in the
life of the University community. In most de-
partments, students are consulted concerning
issues affecting their programs and serve as
full voting members on important departmental
committees. Three graduate students are
elected by the graduate student organization
as full voting members of the Graduate Coun-
cil, the body that advises the graduate dean
on all matters concerning Graduate School
policy. Graduate students are also represented
in the Academic Council of the Student Senate
and Academic Senate and serve on such Uni-
versity-wide committees as the Research
Council and the Teaching-Learning Council.

Recreational and Cultural Activities
The University offers students a variety of rec-
reation, social, and cultural opportunities.
With two theaters and two art galleries in the
Paul Creative Arts Center, the University is a
major cultural resource for the entire state.
The Sidore Lecture Series presents provoca-
tive, well-known speakers each year, while the
University’s Celebrity Series brings leading
concert artists and professional talent to the
campus. University students and faculty also
perform in public concerts, recitals, and thea-
ter productions.

Approximately 100 student clubs and or-
izations are recognized on campus and
membership in many of these is open to gradu-
ate students. Since graduate students are not
required to pay the student activities fee, a
nominal charge for admission to some events
may be required.

The Memorial Union Building houses many
of the student organizations and also provides
lounges, eating facilities, and recreation areas
for student use. New Hampshire’s public tele-
vision station, WENH-TV, also housed in the
Memorial Union, broadcasts in-school pro-
grams for 110,000 young people and, during
evening hours, cultural and educational pro-
grams.

Recreational facilities are also available at
the field house for students who purchase rec-
reation passes. The pass entitles the holder to
use the athletic-recreation facilities during
open recreation periods and to participate in
certain club sports, noncredit instructional
programs at reduced rates, and the faculty/staff/graduate student intramural program.

The University competes in 13 men’s and
12 women’s varsity athletic programs.
Graduate Student Residences

Babcock House: The graduate residence hall is designed to provide housing for full-time graduate students and to provide quiet areas for graduate students to meet informally with one another and with members of the faculty. Babcock House is located on McDaniel Drive, within easy walking distance of a major classroom areas as well as the University library, University theaters, and the Memorial Union Building. Parking is available on campus.

The structure, consisting of two six-story towers connected at each floor by a common lounge, accommodates 180 men and women. The house also has a large main lounge with fireplace, two recreation rooms, a food vending room, coin-operated laundry, TV room, luggage storage, individual mailboxes, and optional private room telephones. All rooms are single occupancy. Each room is furnished with a bed, mattress, easy chair, desk chair, and built-in desk-dresser-wardrobe unit with book shelves, mirror, medicine chest, and desk lamp. Residents provide their own bedding.

A full-time residence hall director lives in the apartment on the ground floor and works in conjunction with a graduate student House Council to provide cultural and social programs for the graduate community. The residence hall director and five graduate resident assistants carry out the administrative responsibilities of the house and are knowledgeable about University policies and available personal services.

Following acceptance to the Graduate School, a student will be contacted by the Office of Residential Life, Pettee House, University of New Hampshire, Durham, N.H. 03824.

Forest Park Apartments: The University owns and operates Forest Park, a complex of 154 studio (efficiency) and one- and two-bedroom apartments for students, faculty, and staff with families. The development is composed of two- and three-story buildings located on the edge of campus, convenient to all University facilities and within walking distance of the Durham shopping area and schools. Residency is not limited to graduate student families, and the demand for these apartments is great. To be eligible for the University apartments, a graduate student must have been admitted to the University and be a full-time student as defined in this catalog. Students may apply for Forest Park before fulfilling the above requirements as long as they are met at the time of assignment.

Since the waiting time can approach one year from date a student files an application until assignment, students should apply as early as possible. A brochure with the application blank and information about Forest Park is available from: Forest Park Resident Manager, Building 16, Forest Park, University of New Hampshire, Durham, N.H. 03824.

Summer Housing: Rooms in Babcock House are available to graduate students taking courses during the summer. Students interested in summer accommodations should contact the Summer Housing Office, Pettee House, University of New Hampshire, Durham, N.H. 03824 or complete and return the Summer Housing Application Form in the Summer Session Bulletin.

Off-Campus Housing: The Dean for Student Affairs office operates the Commuter/Transfer Center, which assists students in obtaining off-campus housing. As in most university communities, rents in the Durham area can be high and the supply limited. The office does have listings of off-campus rentals in Durham and the surrounding area that are updated weekly.

Students are encouraged to make every effort to come to campus so that the Commuter/Transfer Center staff will be able to assist in finding accommodations. The office is located in the Memorial Union Building and is open Monday through Friday.

Dining: Graduate students may elect to take their meals on a contractual basis with the University dining halls whether or not they live on campus. There are limited cooking facilities in Babcock House, but none in individual rooms. Information concerning meal plans is available from the Office of Residential Life, Pettee House, University of New Hampshire, Durham, N.H. 03824.

Health Services

This service, located in Hood House, has a well-equipped clinic for diagnosis and treatment of student health problems. Services include: out- and in-patient care, laboratory tests, x-rays, limited mental health care, and routine medications. For serious medical problems, students are generally referred to consultants and/or a local hospital. An emergency ambulance service is available.

During the regular academic year, the Health Service is staffed by full-time physicians, nurses, and part-time consultants. Regular clinic hours are held and appointments
may be made upon request. Nurses are available 24 hours a day and a duty doctor is always on call.

The Health Service operates on a limited basis during holidays, semester breaks, and summer session.

Full-time graduate students must pay the mandatory health fee. Part-time graduate students may be required to pay the health fee or pay a fee for services used. In addition, an optional group accident and sickness insurance policy is available through the Health Service.

Counseling
The Counseling and Testing Center offers students, without charge, professional assistance in meeting a variety of personal, educational, and vocational problems. Services include individual and group counseling, vocational testing, and information on national testing programs such as the Graduate Record Examination and the Miller Analogies Test. Individual clinical testing is available.

The center sponsors a variety of student-oriented activities, e.g., personal skills groups on such topics as communication, values clarification, and life planning.

All information about students’ visits to the Counseling and Testing Center is confidential and cannot be released without the permission of the student.

Career Planning and Placement Service
The Career Planning and Placement Service assists students in planning for professional careers following completion of their degree work. The assistance available to students includes an on-campus interview program, which brings recruiting personnel to the campus between November and May, a library of information on employers and career opportunities, career and life counseling, placement techniques workshops, and aid in finding summer employment.

The service will also update students’ records and provide assistance to alumni.

Handicapped Student Services
The Office for Handicapped Student Services assists disabled students with meeting their educational, cultural, and recreational needs while at UNH. The coordinator invites questions from students who are thinking of coming to UNH. For information, write to: Handicapped Student Services, Room 101, Huddleston Hall, University of New Hampshire, Durham, N.H. 03824.

Campus Minister and Churches
A full-time, on-campus minister is funded by the Ecumenical Ministry to the University of New Hampshire. In addition, several denominations have designated chaplains. Places of worship for many faiths are convenient to the campus area. In Dover are a synagogue, Greek Orthodox Church, and a Friends Meeting; Protestant, Catholic, Episcopal, and Latter-day Saints churches are located in Durham.

The Alumni Association
All recipients of a graduate degree from the University are considered members of the Alumni Association. It organizes alumni activities including educational, cultural, and social programs, both on and off campus. The alumni newsletter publishes news of alumni, the University, students, staff, and faculty.

The New England Center for Continuing Education
The New England Center for Continuing Education is adjacent to campus. This architecturally striking complex was built with a gift from the Kellogg Foundation and is sponsored by the six New England state universities. The center provides residence and conference facilities for a wide variety of adult education programs. A closed-circuit TV system permits conference programs to be reviewed in participants’ rooms. The center’s restaurant, lounge, and hotel are open to the public on a space-available basis.
Research and Support Services

Research is an essential part of graduate education. It sustains a continuing infusion of knowledge, enhances the level of instruction, extends the frontiers of understanding, and makes human progress possible. It provides an opportunity for graduate students to learn by working with instructors on independent projects or as part of research teams. Ultimately, the goal is to share discoveries and applications with others in the state, region, and world.

Research and Service Facilities

The University has many diversified research projects, ranging from highly specialized investigations in the physical and biological sciences to broad interdisciplinary marine studies. Graduate students are involved in research as project assistants working on research leading to master's theses and doctoral dissertations. These projects are conducted in individual departments, in University research centers, and in larger service units on campus. The Marine Program, supported by the National Sea Grant College Program and state funding, has facilities both on campus and at the Jackson Estuarine Laboratory. The Space Science Center includes highly specialized facilities for faculty and graduate students to participate in sophisticated engineering and science research projects. Other specialized groups organized to facilitate interdisciplinary research are the Family Research Laboratory, Marine Systems Engineering Laboratory, and Ocean Processes Analysis Laboratory.

The University Instrumentation Center coordinates the use of many highly specialized instruments and provides service to the many researchers on campus using instruments such as mass spectrometers, spectrophotometers, nuclear magnetic resonance spectrometers, amino acid analyzers, etc. The University Instrumentation Center has established a new electron microscope facility, which houses a transmission electron microscope and electron microprobe and a scanning electron microscope. The Instrumentation Center also provides technical support in the operation and maintenance of highly specialized equipment. A Research Computer Center has been established recently with the acquisition of a PRIME computer system.

The Agricultural Experiment Station, one of the largest research and service units at the University, provides research, information, and testing for the state agricultural industry. The Ritzman Animal Nutrition Laboratory offers specialized research facilities.

Marine Program

Academic

The University's central location on the northern New England coast near a variety of estuarine, coastal, insular, and continental-shelf environments has fostered a broad range of marine educational and research activities for many years. These varied activities, which occur within all of the University's colleges, are coordinated and supported by the Marine Program. The College of Engineering and Physical Sciences offers a program leading to the degree of master of science in ocean engineering. Graduate degrees with marine options are also offered in the departments of botany and plant pathology, chemical engineering, earth sciences, electrical and computer engineering, mechanical engineering, microbiology, and zoology. Other departments involved with the Marine Program are animal and nutritional sciences, biochemistry, computer science, mathematics, physical education, political science, resource economics and sociology and anthropology. The Whittmore School of Business and Economics and the Complex Systems Research Center are also involved with the Marine Program.

The application for graduate study should indicate the program listed above that is most closely related to the applicant's field of interest.

Research

Marine research by faculty and students proceeds on both an intra- and interdisciplinary basis and is supported by University and private funds as well as by organizations such as the National Science Foundation, the Office of Naval Research, the National Institutes of Health, the U.S. Coast Guard, the Woods Hole Oceanographic Institution, and the National Sea Grant Program. UNH and the University of Maine together are a Sea Grant College.

Marine research activities are principally pursued in the neighboring environments of the Great Bay estuarine system, the coastal zone, the near-shore coastal zone, the Isles of Shoals, and the Gulf of Maine, but also in the more remote areas of the world such as the North Sea and the Arctic, Antarctic, and mid-Pacific oceans. Some examples of research studies include those relating to marine food chains; marine biotoxins; oil-spill containment; trace metals; biological and thermal pollution; marine mineral resources; marine geology and geophysics; mariculture; marine resource management; marine law; environmental base-line studies; arctic under-ice systems; diving systems; submersibles; and buoy systems and breakwaters.
Facilities
The Marine Program building houses work spaces for ocean engineering, physical sciences, and other marine activities, as well as the Marine Program Office. The Marine Systems Engineering Laboratory and Ocean Process Analysis Laboratory provides opportunities for applied research in the marine environment. The Jackson Estuarine Laboratory, located on Great Bay about five miles from the campus and fourteen miles from the ocean via the Piscataqua River, supports the research of the marine life sciences and earth sciences departments. Research vessels dock at an adjacent pier. The Diamond Island Ocean Engineering Station, located about 40 miles from Durham on Diamond Island in Lake Winnipesaukee, furnishes an excellent fresh-water testing site for ocean systems. A running-seawater facility at Fort Stark in Newcastle, near Portsmouth, is nearing completion. The Shoals Marine Laboratory, located about seven miles off the New Hampshire coast on Appledore Island of the Isles of Shoals, a joint facility of UNH and Cornell, is principally concerned with marine-life sciences educational and research activities. A near-coast pier facility, situated about ten miles from Durham in Portsmouth, New Hampshire, and two miles from the ocean on the Piscataqua River, serves research vessels up to approximately 50 feet in length and commercial fishing boats of the area. The R/V Jere Chase is a 45-foot research vessel equipped for a wide variety of marine research activities in the estuarine and near-coast waters.

Library
The University library houses more than 830,000 volumes, more than 6,000 periodicals, and substantial microfilm and audio-tape and record collections. Specialized subject collections are housed in four branches: chemistry in Parsons Hall, engineering and mathematics in Kingsbury Hall, biological sciences in Kendall Hall, and physics in DeMeritt Hall. The branches are administered by a physical sciences librarian and a biological sciences librarian. Media Services, a department of the library, offers a large film collection, equipment loans including projectors and portable TV cameras and monitors, photographic and graphic design assistance, and audiovisual project consultation.

Special services offered to graduate students include graduate study areas, with assignable locked book trucks. Graduate students may use the Interlibrary Loan System to supplement material available in the University library. The library is a U.S. government document depository, and a full-time documents librarian is available. On-line, database search services are offered at cost through the reference and branch departments.

The library serves the University and the town of Durham. A graduate student's spouse and children may use the facilities, which include a professionally staffed children's room.

During the regular academic year, the library is open seven days a week. On vacations and during the summer, a more limited schedule is in effect.

Computer Services
The University of New Hampshire has one of the largest and most accessible computer installations of its type in the country. UNH Computer Services operates several large computers (two DEC 10s, two VAX 11/780s, two PRIMES) in support of the combined instructional, research, and administrative data processing needs of the University.

More than 300 terminals are tied into the UNH computers, with four major clusters in classroom buildings and one in a residence hall. Each cluster is staffed by a consultant. Other terminals are located in Dimond Library and dormitories. In addition, the departments of mathematics, computer science, and electrical and computer engineering have their own mini- and micro-computers and computer labs for course and research use. There are more than 100 micro computers in use on campus, including a cluster maintained by Computer Services.

A Research Computing Group channels its collective energies and expertise into the support and promotion of research activities on the Durham campus. In addition to providing high-level consulting to researchers, the group also engages in program investigation and acquisition, and exploration and evaluation of network links; members are familiar with mini- and micro-computer systems as they relate to the needs of researchers on campus.

Short, noncredit courses are regularly offered, at nominal charge, to users of the facilities. Extensive on-line system documentation is supplemented by a physical library with a collection of manuals, technical publications, trade journals, and textbooks.

Publications of Computer Services include a newsletter, ON-LINE, and other specialized instructional materials.
Admissions

General Requirements
Persons holding the baccalaureate degree from a college or university of approved standing and wishing to take graduate level courses at the University as part of a graduate degree program must apply for admission to the Graduate School. Admission to the Graduate School is both limited and competitive and is based solely upon academic qualifications and potential.

Application procedures are outlined below and are included with the application materials available at the Graduate School. Specific program information and requirements are outlined in the program descriptions of this catalog. The completed application for admission to graduate study also serves as the application for new students for assistantships, fellowships, and full-time scholarships supported by the Graduate School.

Applicants to programs leading to the master of science for teachers degree must meet, in addition to the normal requirements, one of the following admission requirements: 1) completion of education courses sufficient for certification, 2) three years of teaching experience, or 3) a current full-time teaching position.

Applicants may apply to only one specific degree program.

Application Procedures
Application materials may be requested from the Graduate School, University of New Hampshire, Horton Social Science Center, Durham, N.H. 03824.

Applicants for admission must:
1. Submit the official application form in duplicate. An application file is not started until the application form is received.
2. Submit a $15 nonrefundable application fee.
3. Request that two official transcripts from each college/university attended be sent directly to the Graduate School.
4. Request that three recommendations using official recommendation forms be sent directly to the Graduate School. Letters of recommendation more than 12 months old are not acceptable. (Placement credentials more than one year old may be accepted as one letter of recommendation.)
5. Request the official test scores (GRE, GMAT), if required, be sent by the Educational Testing Service directly to the Graduate School. Test scores more than five years old may not be acceptable.
6. Submit any additional material required by individual programs.
7. Submit the Statement of Residence Form (New Hampshire residents only).

Applications will not be reviewed until they are complete. It is the applicant's responsibility to make sure that the required application materials have been submitted by the appropriate deadline.

All application material becomes part of the permanent records of the University of New Hampshire and will not be returned. Access to this material is limited under the Family Rights and Privacy Act of 1974. Applicants who are not admitted, or who are admitted and do not register in the Graduate School, do not have access to their application file. Material received as part of the application process will not be duplicated for personal use by the applicant nor forwarded to a third party. Materials received from applicants who do not complete their application, who are not admitted, or who are admitted and do not register are held for one year before being destroyed.

Applicants from Foreign Countries
All applicants from non-English speaking countries must, in addition to all of the above, provide TOEFL (Test of English as a Foreign Language) scores. A minimum TOEFL score of 550 is required. TOEFL test scores are valid for only two years. A financial statement on official University forms is also required.

Applications from residents of foreign countries will be considered only for regular admission.

Application Deadlines
Applications must be completed by December 1, for the spring session; by April 1, for the summer session; and July 1, for the fall session. There is no guarantee that applications completed after these deadlines can be acted upon in time to permit registration in the desired session.

Applicants for financial assistance (assistantships and scholarships) should complete their application prior to February 15, to insure consideration for the following academic year.

Foreign applicants who are not currently residing in the United States will be considered only for admission for the fall session and must have their application completed by April 1. Foreign applicants currently residing in the United States should have their application completed at least four months prior to the session for which they are applying.
Programs that consider applications only for a specific session are noted on the "Instructions for Application for Admission to Graduate Study," included with the application materials.

Incomplete Applications: Applications that remain incomplete after the first day of classes of the semester for which admission was desired will be placed in an inactive status. A written request is required to reactivate an application.

Application Review
Once an application is complete, it is reviewed by faculty members of the appropriate program. All material that is submitted as part of the application receives careful consideration. The review is normally conducted by an admissions committee of graduate faculty members, which makes recommendations to the Graduate School concerning the admission of applicants to the program. Upon receipt of the committee’s recommendation, the Graduate School carefully reviews the applicant’s file. After making the final decision, the Graduate School will inform all applicants of the action taken. While applicants with bachelor’s degrees may apply directly to certain doctoral programs, the Graduate School reserves the right to offer these applicants admission at the master’s degree level.

Admission Categories
Official offers of admission from the Graduate School are made for a specific term and year in one of the following categories:

Regular Admission: Regular admission may be offered to those applicants whose academic records and supporting documents indicate that they are fully qualified to undertake graduate study in their chosen field.

Provisional Admission: Provisional admission may be offered to applicants whose academic records and supporting documents indicate that they are qualified to undertake graduate study, but whose undergraduate preparation was not in the intended field of graduate study. Applicants offered provisional admission must meet the specific criteria, usually undergraduate coursework, stated at the time of their admission before being admitted to regular graduate-student status.

Conditional Admission: Conditional admission may be offered to those applicants whose academic records indicate deficiencies but suggest some promise of success in graduate study. Students offered conditional admission must meet the specific requirements stated at the time of their admission in order to remain in the Graduate School. Conditionally admitted students are not eligible for assistantships and scholarships offered through the Graduate School until the conditional status is removed.

Offers of admission, regular, provisional, or conditional, to applicants who are in the final year of an undergraduate, or, in some cases, a graduate-degree, program are contingent upon the successful completion of that degree program. An official final transcript showing grades and the awarding of the degree must be received by the Graduate School prior to enrolling for the graduate program.

Applicants who cannot enroll in the term for which admission was offered may request to have their admission deferred for up to one year. Such requests must be in writing and will be considered only once. Because enrollments are limited and competition for admission may vary from year to year, such requests may not be granted.
Additional Information

Early Admission—University of New Hampshire Seniors: Qualified senior students at the University of New Hampshire may be admitted to the Graduate School provided they have followed normal application procedures; they must have been admitted for the semester in which they wish to enroll in courses for graduate credit. A 3.2 cumulative grade-point average is normally required to be considered for early admission. Such seniors are normally admitted prior to the start of their last undergraduate semester. Seniors who have been admitted under early admission may register for a maximum of two courses for graduate credit (see also dual credit on page 22).

Admission to the 3/2 Program: Undergraduate UNH students may be admitted to one of the approved five-year combined bachelor’s degree/Master of Business Administration (see the Undergraduate Catalog) programs, which normally commence during the fall semester of their senior year. Application to the Graduate School is made during the second semester of the junior year. Interested students should contact the assistant dean in the Whittemore School for information.

Special Students: Individuals holding baccalaureate degrees may register for graduate courses on campus through the Division of Continuing Education in Verrette House, or for graduate courses off campus through the School for Lifelong Learning. These individuals are designated as “special students,” and are not required to file an application for admission to the Graduate School and are not candidates for a graduate degree. Special students are not normally permitted to register as full-time students (see special-credit rule on page 22).

University of New Hampshire Employees: Members of the University of New Hampshire faculty with the rank of assistant professor or above will not be admitted to the graduate programs. Full-time staff employees of the University who do not hold academic rank will not ordinarily be admitted to doctoral programs in the department in which they are employed. The above regulations pertain even to individuals who resign their positions.

Honorary Fellows: Qualified scholars who may temporarily desire the privilege of using the library and research facilities of the University and who are not candidates for a degree may, upon recommendation of the Dean of the Graduate School and the approval of the president of the University, be appointed honorary fellows without stipend. Honorary fellows shall not be required to pay any charges except the cost of unusually expensive supplies or equipment.

Applicants Not Admitted: Applicants who are denied admission may have their applications reconsidered only if they furnish significant additional material that was not available at the time of the original decision, such as evidence of further academic achievement, or more recent and significantly improved GRE or GMAT scores. Reapplication is not encouraged.

Registration

Academic Year

Students admitted to the Graduate School must have their programs approved by their adviser or the chairperson of their guidance committee. Registration is usually held the first Monday after classes begin each semester for day students and Monday through Thursday of that week for evening students. All tuition and fees are payable at the time of registration. Registration information and the Time and Room Schedule may be obtained from the Registrar’s Office, Thompson Hall. Students who register after the registration period will pay a late registration fee.

Continuous Registration: Students who are in residence and using University facilities are required to register each semester. Master’s students who have completed all course requirements and have previously registered for the maximum number of thesis or project credits and are on campus completing their master’s program must register for Master’s Continuing Enrollment. Doctoral students who are in residence and have completed all course requirements must register for Doctoral Research 999 each semester even if the minimum requirement (two semesters) has been met.

Full-time Students: Graduate students registered for nine or more credits, Master’s Continuing Enrollment, or Doctoral Research 999 are classified as full-time students. Students holding appointments as graduate assistants or project assistants are also considered full-time and must register for a minimum of six credits, Master’s Continuing Enrollment, or doctoral research each semester.

Maximum Load: The maximum graduate load allowed is 16 credits (12 credits for a
student on an assistantship). Only under unusual circumstances will a student be allowed to exceed these limits, and then only with the recommendation of the student's adviser and the approval of the Dean of the Graduate School.

Dropping and Adding Courses: Graduate students may add or drop courses in accordance with the procedures and deadlines published by the Registrar's Office in the Time and Room Schedule. Deadlines are also published in the Graduate School calendar.

Auditing Courses: A graduate student may, with the approval of his or her adviser and the faculty member concerned, audit any course at the University. The deadline for requesting an audit is Friday of the second week of classes. Subsequent requests for change to audit must be petitioned and be approved by the course faculty member, the student's adviser, and the Dean of the Graduate School.

Change of Name or Address: It is the responsibility of the student to complete a change of name or address form in the Registrar's Office whenever a change is made.

Summer Session
Although many graduate level courses are offered during the Summer Session, the University does not guarantee that any particular course will be offered. The availability of individual faculty members to supervise research or to participate in qualifying examinations and final examinations or defenses during the Summer Session varies from year to year.

Course information and registration materials may be obtained from the Division of Continuing Education, Verrette House.

Deadlines for completion of degree requirements for the Summer Session are published in the Graduate School calendar.

Maximum Load: The maximum graduate load allowed is four credits for a four-week summer session and eight credits for an eight-week summer session. Only under unusual circumstances will a student be allowed to exceed these limits, and then only with the recommendation of the student's adviser and the approval of the Dean of the Graduate School.

Nonregistration
Leave of Absence: Students who find it necessary to interrupt their graduate programs may request a leave of absence by writing to the Dean of the Graduate School stating the reasons for, and the anticipated length of, the interruption. Leaves are granted for a specific time, usually not to exceed one calendar year. Students who are on approved leaves of absence must notify the Graduate School at least four weeks prior to the start of classes for the term in which graduate work is to be resumed. Students who do not return from a leave of absence as approved will have their degree status discontinued and will be required to apply for readmission.

Withdrawal: A student may withdraw from the Graduate School during any semester by obtaining a withdrawal form from the registrar or the Graduate School. This form should be signed by the student's adviser, the Dean of the Graduate School, and other appropriate University officials. When completed, the form should be filed with the registrar. Students who formally withdraw are required to apply for readmission if they subsequently desire to resume their academic program.

Degree Status Discontinued: Students who do not formally withdraw and do not register during a twelve-month period or do not return from an approved leave of absence are considered inactive and will have their degree status discontinued. Students are notified by the Graduate School when this administrative action is taken and are required to apply for readmission if they subsequently desire to resume their academic program.

Administrative Withdrawal for Reasons of Health and Procedures for Readmission: The Dean of the Graduate School, in consultation with professional University Health Service officials, may temporarily suspend a graduate student from the University without prejudice for reasons of seriously impaired physical or mental health and/or in consideration of the physical health, safety, and well-being of members of the University community. Such action shall be taken only for bona fide health and safety emergencies and should not be used as a means of excluding qualified handicapped students.

The dean or designee shall provide the student with a written statement of the reasons for the temporary suspension. The student may request a hearing with the dean or designee to dispute the reasons. The student may
be represented at the hearing by a member of the University community. If the student fails to request such a hearing within ten days of beginning the temporary suspension, or if the temporary suspension is upheld at the hearing, the temporary suspension shall be changed to an administrative withdrawal.

Readmission: Students who withdraw or who have their degree status discontinued are required to apply for readmission. Readmission forms are available at the Graduate School and must be processed at least by December 1 for the spring semester, April 1 for Summer Session, and July 1 for the fall semester. Students are not guaranteed readmission.

Change of Degree

An enrolled student who wishes to pursue a degree program other than the one for which admission was granted originally should file an application for a change in degree with the Graduate School. Change of degree requests should be filed by the regular admission deadlines. The Dean of the Graduate School will notify the student of the decision after consulting with the appropriate departments.

Students enrolled in UNH master’s programs who intend to pursue the Ph.D. in the same department in which they were admitted for the master’s degree should submit to the Dean of the Graduate School an application for a change in degree program. This application will be reviewed by the Graduate School, which will notify the student of the decision. If such students do not file a change-in-degree application before receiving the master’s degree, they will be required to submit a new application for admission to study for the Ph.D. degree.
Fees and Financial Assistance

Fees
Tuition and fees vary according to whether or not the student is a legal resident of the state of New Hampshire and/or is enrolled full or part time. All charges are payable at the time of registration.

New Hampshire Residents
Each graduate student is classified as a resident or nonresident for tuition purposes at the time of admission to the University. The decision, made by the Graduate School, is based upon information furnished by the student’s application and any other relevant information.

All applicants living in New Hampshire are required to submit a notarized statement to the effect that they have been legally domiciled in New Hampshire continuously for at least 12 months immediately prior to registering for the term for which in-state status is claimed.

Students admitted from states other than New Hampshire or from foreign countries are considered nonresident throughout their entire attendance at the University unless they shall have acquired bona fide domicile in New Hampshire. Changes in residency will only occur if the student can clearly establish that his or her residence in New Hampshire is for some purpose other than the temporary one of obtaining an education at the University.

The burden of proof in all cases is upon the applicant. In all cases, the University reserves the right to make the final decision as to resident status for tuition purposes. The University Rules Governing Tuition Rates are fully set forth in the application for admission package; all students are bound by them.

New England Regional Program
The University of New Hampshire participates in the New England Regional Student Program administered by the New England Board of Higher Education. Under this program, admitted graduate students from New England may qualify for regional tuition rates (New Hampshire resident tuition, plus 25 percent) if the program to which they are admitted is one which is not available at their home state university. Inquiries and requests for further information may be directed to the Dean of the Graduate School, Horton Social Science Center, UNH, Durham, NH 03824 or to the New England Board of Higher Education, 45 Temple Place, Boston, MA, 02111.

Sub-Degree Exchange Program
The Graduate School of the University of New Hampshire participates in a Sub-Degree Ex-
Schedule of Fees

The following schedule of fees is in effect each semester of the 1983–84 academic year, and is subject to change for 1984–85. Required, nonrefundable fees for all students include a Memorial Union fee, which funds the personnel, programs, and maintenance of this building; a Student Services fee, which partially funds the programs and services available in the Division of Student Affairs, including Handicapped Student Services and the Commuter/Transfer Center; and a health fee, which funds the Health Service. The services and facilities are available to all—the extent to which each student uses them cannot be the factor by which assessment is determined.

*Students on assistantships, fellowships, or full-time tuition scholarships, students registered for doctoral research (999), and students registered for Master’s Continuing Enrollment are considered full-time and are required to pay full mandatory fees.

The University reserves the right to revise its schedule of tuition and fees without notice.

Master’s Continuing Enrollment: Master’s students in residence and registered for Master’s Continuing Enrollment will pay $150 tuition plus full mandatory fees per semester during the academic year and $75 plus fees for the Summer Session.

Doctoral Research: Doctoral students in residence and registered for Doctoral Research 999 will pay $300 plus full mandatory fees per semester during the academic year and $150 plus fees for the Summer Session. Students who register for coursework in addition to doctoral research will pay the appropriate additional tuition charges up to the appropriate maximum tuition rate for full-time students.

Tuition and fees are payable at registration and a student is not considered registered until they have been paid.

The above charges will apply to admitted graduate students enrolling for courses at the University during the academic year. Admitted graduate students planning to enroll for courses through the School for Lifelong Learning or during the Summer Session should consult the relevant catalogs for information regarding tuition and fees.

Other Charges and Fees

More than 16 Credits per Semester: Graduate students are charged full tuition at the appropriate rate plus the appropriate course charge for each credit beyond 16 if registered for more than 16 credits 30 days after the semester has begun. (No refund will be made if a student subsequently drops a course, reducing his or her course load to 16 or fewer credits.)

Zero-Credit Seminars: Seminars for zero credit are assessed as if they were for one credit.

Audit: Charges for auditing a course are the same as those for taking it for credit.

In-Absentia Fees: Students who are not registered at the time they complete their degree requirements (examinations, submission of thesis, dissertation, etc.) will be assessed an in-absentia charge one month prior to the conferral of their degrees. The in-absentia charge is $25 for master’s candidates; $25 for C.A.G.S. candidates; and $100 for doctoral candidates.

Late Fees: A $25 late registration fee is charged to students who register after the second Friday of classes. Late fees are also charged for changes in registration as follows: A $10 fee is charged for each course dropped after the second Friday of classes; a $10 fee is charged for each course added after the third Friday of classes. The late-add fee is charged in addition to the late-registration fee when students register after the third week of classes. A change of section (within the same course) is accomplished by a “drop” of one section and an “add” of another section. The fee will not be assessed for the add portion of a late section change; but the $10 drop fee will still apply for the drop portion of the late section change.

Refunds

Tuition during the academic year is refundable in accordance with the calendar published in the Time and Room Schedule and the Graduate School calendar. The mandatory health fee may be refunded upon petition to the Health Service. (Students must petition for refund no later than two weeks after graduate registration. Forms are available in the Health Service Office at Hood House. Refund re-
quests should be sent directly to the Health Service, Hood House.) The Memorial Union and Student Services fees are nonrefundable.

Financial Assistance

General Information

There are several forms of financial assistance available to graduate students most of which are awarded for an academic year commencing in September. To be eligible for any assistance, the student must first be admitted to the Graduate School. The Graduate School normally administers and awards the fellowship and scholarship programs. Assistantships and associateships are normally awarded by the individual graduate programs. Loans and work-study programs are administered by the Financial Aid Office. The application for admission with supporting documents serves as the application for new graduate students for the scholarship and assistantship programs available to them and should be completed by February 15 for awards for the following academic year. Separate application forms are required for the loan and work-study programs administered by the Financial Aid Office and are available at that office in Thompson Hall. The deadline for receipt of these applications is May 1.

Scholarships and Fellowships

Graduate Scholarships for Merit: A recipient of a graduate assistantship or a project assistantship who is newly admitted to a Ph.D. program and has outstanding qualifications may be awarded a Graduate Scholarship for Merit. The scholarship supplements the academic year stipend by $600. Continuation of a Graduate Scholarship for Merit into succeeding years will be contingent upon the student’s demonstration of superior performance in a doctoral program.

Full Tuition Scholarships: Up to 55 superior students may be granted academic-year tuition scholarships. These awards provide for waiver of tuition and are subject to the maintenance of a high scholastic record in the Graduate School. Application is made to the student’s program.

Part-time Tuition Scholarships: Up to 25 superior students may be granted part-time tuition scholarships. These awards provide a partial waiver of tuition charges and are awarded each semester. Applications are available at the Graduate School Office. University employees or family members who are eligible for staff benefits are not eligible to receive part-time tuition scholarships.

Dissertation Fellowships: Dissertation Fellowships with stipends of up to $4,800 for a maximum tenure of one academic year are available on a competitive basis to doctoral students who have been advanced to candidacy. These awards include a waiver of the doctoral research registration fee for the period of the award. Applications are made to the Dean of the Graduate School.

Summer Fellowships for Teaching Assistants: A limited number of Summer Fellowships are awarded to students who have held graduate assistantships involving teaching during a previous academic year. The stipend for summer study is $1,000. Application is made to the Dean of the Graduate School.

Assistantships

Approximately 380 assistantships are awarded annually to superior students. Appointments are for one academic year. An appointment may be renewed provided that funds are available and that the student’s academic performance, as well as performance in carrying out the responsibilities of the assistantship, is satisfactory. Students normally are involved in assistantship activities for 20 hours a week. All graduate students holding appointments as assistants must be admitted on a regular or provisional basis to the Graduate School and must register for a minimum of six credits (maximum of 12 credits), or Master’s Continuing Enrollment, or doctoral research during each semester in which they hold their appointments. Such students are considered full-time students. A limited number of newly admitted doctoral students who are awarded assistantships may also receive a Graduate Scholarship for Merit as explained above.

The 1983–84 academic year stipend levels for assistantships are $4,400 ($4,700 in chemistry, computer science, engineering, and physics). Doctoral students who have held an assistantship for two years may qualify for an advanced academic year stipend of $4,800.

Inquiries regarding assistantships should be addressed to the chairperson or director of graduate studies of the appropriate department or program.

Appointments are made in the following categories:

Graduate Assistants: Students supported by University funds are appointed as graduate assistants and are normally involved in assisting faculty members in instructional activities.
Graduate assistants receiving the full academic-year stipend are exempt from the payment of tuition during the academic year of their appointment and may be exempt the following summer session. Graduate assistants receiving less than the normal academic-year stipend may be exempt from a prorated portion of their tuition during the period of their appointment and the following summer session.

Graduate Research Assistants: Students in the College of Life Sciences and Agriculture may be appointed as graduate research assistants and are normally involved in the research activities of the Agricultural Experiment Station. Graduate research assistants receiving the full academic-year stipend are exempt from the payment of tuition during the academic year of their appointment. Graduate research assistants receiving less than the normal academic-year stipend may be exempt from the payment of a prorated portion of their tuition during the period of their appointment.

Project Assistants: Students supported by externally funded research projects are appointed as project assistants and are involved in the research activities of the project. Project assistants receiving the full academic-year stipend are exempt from the payment of tuition during the academic year of their appointment. Project assistants receiving less than the normal academic-year stipend may be exempt from the payment of a prorated portion of their tuition during the period of their appointment.

Graduate Associates: A very limited number of highly qualified graduate students may be appointed to teaching or research positions as graduate associates. The academic load for students appointed to these positions will not exceed two full courses or doctoral research registration per semester. Stipends are negotiable to $7,500 per academic year according to the qualifications and duties of the student. Graduate associates receiving a stipend of more than $3,000 per academic year may be exempt from the payment of tuition during the academic year of their appointment. Graduate associates receiving $3,000 or less per academic year may be exempt from the payment of half of their tuition during the academic year of their appointment.

Martin Luther King Assistantships: Martin Luther King Assistantships provide support for qualified members of minority groups in the form of a stipend and tuition waiver. A letter of application should be made to the Dean of the Graduate School.

Summer Assistantships: Full-time and part-time summer appointments may be available. The monthly rate for full-time appointment for assistants ranges from $977 to $1,066. Students are normally appointed for a maximum of two months and are not normally permitted to register for summer session courses.

Loan and Work-Study Programs
National Direct Student Loans: To be eligible for consideration, a student must be an admitted degree candidate carrying at least one-half the full-time academic load as defined by the University, be a U.S. citizen or a permanent resident of the U.S., and establish need for a loan that is to be used for educational purposes only.

UNH Loans: To be eligible for consideration, a student must be a registered degree candidate. Financial need must be clearly established, and if approved, the loan may be used for educational purposes only. The maximum amount granted to a student is $1,000 during his or her undergraduate and/or graduate work.

College Work-Study Program: With the aid of federal funds, the University is able to provide employment opportunities on campus or in various off-campus agencies. To be eligible for consideration, a student must be an admitted degree candidate carrying at least one-half the full-time academic load as defined by the University and demonstrate financial need as determined by the Financial Aid Office. Work during the academic year is usually on campus.

Application material and additional information for the above programs may be obtained from the Financial Aid Office, Thompson Hall. A May 1 priority deadline is in effect.

Guaranteed Student Loan Programs: Students may apply for as much as $5,000 per year from a bank or other financial institution participating in the Guaranteed Student Loan Program. Qualified borrowers pay no interest while attending college. Repayment of principal and interest begins nine months after the student ceases a full-time course of study. Check with your local bank for further details and current interest charges.
Academic Regulations and Degree Requirements

It is the responsibility of the student to become familiar with the academic regulations and degree requirements of the Graduate School as well as the special requirements of his or her own academic program.

Academic Regulations

Graduate credits may be earned in courses numbered from 700 through 898 and in Master’s Thesis 899 and Doctoral Research 999. The faculty of each graduate program prescribes the courses that make up the degree program. In addition, the Graduate School has general requirements for master’s and doctoral degree programs.

800-level courses: are offered for graduate credit only and therefore are open only to admitted or special graduate students.

700-level courses: are advanced-level undergraduate courses and may be taken for graduate credit.

600-level courses: are advanced-level undergraduate courses, which may be taken for graduate credit under limited conditions by degree candidates only, provided the courses are given in a department other than the one in which the degree is earned and are approved by the Dean of the Graduate School. Courses taken off campus at the 600 level will not be approved for graduate credit.

Graduate credits will not be given for any 600- or 700-level courses that are open to or have freshmen or sophomores enrolled.

Grades

The following grades are used at the University: A, A-, B+, B, B-, C+, C, C-, D+, D, D-. F. Graduate credit is normally granted only for coursework completed with a grade of B- or higher. Individual programs may have stricter requirements for major courses. Grade points and averages are not calculated for graduate students.

AF Grades: An “AF” grade, Administrative F, is assigned for failure to either drop or complete the course. An AF is considered a failing grade by the Graduate School.

C, C+ Grades: The Dean of the Graduate School may, under limited conditions, approve up to eight credits of C or C+ grades for graduate credit. When a student’s advisory committee or a student’s adviser, in conjunction with the appropriate departmental com-
mittee, wishes to recommend that credit be given for work completed with a C or C+, the advisory committee shall forward its recommendation, with appropriate justification, to the Dean of the Graduate School within one month after conclusion of the course. Normally these courses will be elective courses outside the student’s major area.

Credit/Fail Grades: A “CR” grade is given for complete, approved theses and dissertations, as well as other approved courses and seminars.

With the permission of the instructor at the time of registration, a graduate student may elect to take independent study courses on a credit/fail basis. Students electing this option should ask the instructor to send written notification to the Graduate School and Registrar’s Office that the graduate student is taking the course credit/fail. The undergraduate pass/fail option is not available to graduate students.

Audit Grades: An “AU” grade is assigned for completion of courses for which audit approval was granted. No credit is earned.

Incomplete Grades: An “IC” grade is assigned with the approval of the instructor only for excused unfinished work. The work must be completed and submitted to the instructor by the last day of classes of the semester immediately following the one in which the incomplete was granted (700- and 800-level courses only; midsemester for 400-, 500-, and 600-level courses). A petition requesting an extension of time, approved by the instructor, may be submitted to the Dean of the Graduate School by the last day of classes. An extension will be granted by the dean only under unusual circumstances. An incomplete grade automatically becomes an F if not removed or if a petition for an extension is not approved within the allowed time period. This policy also applies to students who withdraw from the University or who are not currently registered.

An “IA” grade is assigned for approved continuing courses such as thesis or doctoral research and remains on the record until the course requirements are completed.

W Grades: If a student withdraws from school or drops a course prior to mid-semester, the course(s) will not appear on the student’s permanent record. If a student withdraws from school or, for compelling nonacademic reasons, submits an approved petition to drop a course after mid-semester, a notation of “W”
will be shown on the student’s academic record, together with the grade in the course at the time the course is dropped.

**Academic Standards**

Grades below the B− level, including grades of C or C+ which may have been approved for graduate credit, will, for the purposes of determining academic standing, be considered failing grades. Failing grades (below B−) received in undergraduate courses taken while the student is in the Graduate School are counted in the cumulative total of failing credits.

Graduate students receiving failing grades in nine or more credits will be dismissed from the Graduate School. Students are advised that this requirement is the minimum standard required by the Graduate School unless students are on a conditional status. Such students must meet the conditions as stated in their letter of admission in order to remain in the Graduate School.

In addition, each individual program may set and announce standards for coursework and research achievement that are more rigorous than this minimum standard. Thus, students may be dismissed if they accumulate less than nine credits of failing grades and/or fail to make adequate progress in other aspects of their graduate program.

**Dual Credit**

**UNH Seniors:** University of New Hampshire seniors who have been admitted to the Graduate School under early admission (see page 14) may, upon recommendation of the department and approval of the Graduate School, be allowed, for a maximum of two 800-level courses, to count credits toward both a bachelor’s and master’s degree. Dual credit forms must be completed and approved by the Dean of the Graduate School at the beginning of the semester for which dual credit is sought. Dual credit forms are available at the Graduate School.

**Transfer Credit**

Candidates for the master’s degree and the Certificate of Advanced Graduate Study (C.A.G.S.) may request that up to six semester credit hours of resident courses completed on the campus of an accredited institution authorized to grant graduate degrees be transferred to count toward their graduate program. All courses presented for transfer must have been completed with a grade of B or better and must have been taken for graduate credit; courses cannot be transferred for credit if used in earning another degree; and will normally not be approved if taken more than two years prior to admission to the Graduate School. Transfer of credits must be recommended by the program faculty and approved by the Dean of the Graduate School. Students taking courses at another university for transfer after enrolling at UNH should obtain approval of their adviser and the graduate dean prior to enrolling for the course. Since the doctoral degree does not require a specific number of courses, credits are not normally transferred onto doctoral students’ academic records.

**Special Student Credits**

**Special-Credit Rule:** A maximum of 12 credits earned in University of New Hampshire graduate courses by a special student may, upon recommendation of the program faculty and approval of the Dean of the Graduate School, be applied to a student’s degree program. The 12-credit limitation applies to all courses completed or in process on the date when the official letter of admission is written.

**Off-Campus Courses**

Credits earned off campus will be applied toward a graduate degree only if recommended by the major department and approved by the Graduate School. UNH courses offered off campus that are not listed in the Graduate Catalog or specifically approved by the Dean of the Graduate School will not be approved for graduate credit.

**12-Credit Rule:** A maximum of 12 credits, not including thesis, may be earned in UNH courses taken off the Durham campus. Credits earned off campus by a special graduate student will be counted as part of the 12 credits. Credits transferred from another university will also count as a part of the 12 credits allowed.

**Exceptions to the 12-Credit Rule:** Students who are admitted to external graduate degree programs (currently the Executive MBA program) are exempt from the 12-credit rule.

Students who are admitted to all other graduate degree programs are subject to the 12-credit rule. Exceptions for these students may be granted on a course-by-course basis. Courses taught by regular members of the graduate faculty of UNH may be approved for exception to the 12-credit rule. The Graduate School maintains a list of the approved courses. It is the responsibility of students who have reached the 12-credit maximum to check with their adviser to see if the desired course(s) can be applied toward their degree program,
and with the Graduate School to see if the course has been approved for exception to the 12-credit rule.

Master’s Degree Requirements

General

Credits: A minimum of 30 graduate credits is required for all master’s degrees. Many programs require substantially more than the minimum 30 credits. Individual program requirements are outlined in the program descriptions of this catalog. Graduate credits are normally earned in courses numbered 700-899. Master’s candidates must earn at least eight credits in courses numbered 800-898. (Thesis credits cannot be used to meet this requirement.) Up to four credits earned in courses numbered 600-699 may be taken for graduate credit by master’s degree candidates provided the courses are approved by the Dean of the Graduate School and given in a department other than the one in which the degree is earned.

Residency: A student will normally spend at least one calendar year, or the equivalent, in satisfying the requirements for the degree.

Master’s Continuing Enrollment: Master’s students who have completed all course requirements and have previously registered for the maximum number of thesis or project credits and are on campus completing their master’s program must register for Master’s Continuing Enrollment.

Time Limit: All graduate work for any master’s degree must be completed within six years of the time of registration for the first graduate work applied toward the degree (including special and transfer credits). Progress toward the degree will be carefully monitored by the adviser and the Graduate School to ensure that adequate advancement is made toward the completion of the program and that any deficiencies noted at the time of admission are removed.

Nonthesis Option

Students who are in a nonthesis program may be required to pass a final examination. This examination may be oral, written, or both. A candidate will be permitted only two opportunities to take the final examination for the master’s degree. The time of final examinations will be at the convenience of the department concerned, except that all such examinations must be given at least two weeks before the Commencement date at which the degree is to be conferred. Further regulations governing the final written examination, when required, will be made by the department concerned, subject to the approval of the Dean of the Graduate School.

Examining Committee: Examining committees, when required, are appointed by the Dean of the Graduate School, upon recommendation of the department or program concerned. Normally three members are required. The Dean of the Graduate School is an ex officio member of all examining committees.

Thesis Option

Students who are in a thesis program are required to conduct independent research and prepare a scholarly paper for submission to the Graduate School. Each department will determine the date when the candidate must submit for approval a statement of the subject of the thesis and the date when the thesis must be completed. Students writing a thesis should obtain a copy of the Thesis and Dissertation Manual from the Graduate School. Students who are in a thesis program may also be required to pass a final examination. The regulations concerning this exam are the same as those in the nonthesis option above. The thesis committee will normally also serve as the examining committee.

Thesis Credits: A minimum of 6 and a maximum of 10 thesis credits may be applied toward a master’s degree. The exact number of credits to be applied toward the degree will be determined by the faculty of the individual programs. No thesis credit shall be given until the completed thesis has been approved by the thesis committee. Satisfactory acceptance of the thesis will be recorded as a credit (Cr).

Thesis Committee: A master’s thesis must be approved by a committee composed of the faculty member under whose direction it was written and two other members of the graduate faculty nominated by the department chairperson and appointed by the Dean of the Graduate School.

Submission of Thesis: Two copies of the approved thesis, ready for binding, shall be submitted to the Graduate School Office as soon after approval as possible, but not less than two weeks before Commencement. Binding fees will be paid at the Graduate School. Most programs require an additional one copy of the thesis.
Certificate of Advanced Graduate Study

Requirements

Requirements for completion of the Certificate of Advanced Graduate Study are found under the program descriptions of the education department.

Time Limit: All graduate work for the C.A.G.S. must be completed within six years of the time of registration for the first graduate work applied toward the degree (including special and transfer credits).

Doctoral Degree Requirements

General

The degree of doctor of philosophy is conferred on qualified candidates who have passed an oral or written examination on the subject matter of their field of study, who have completed an original investigation in this field and have embodied the results in an acceptable dissertation, and who have passed an oral examination in defense of the dissertation. The degree of doctor of philosophy is essentially a research degree. It is not given merely for the completion of course credits.

Credits: There is no specific number of courses required for the Ph.D.

Residency: All doctoral students must be registered each semester that they use University facilities. A minimum of three academic years of graduate study is required for the doctorate. Resident graduate work done at other universities may be counted toward the minimum requirement upon approval of the guidance committee and the Dean of the Graduate School, but one full academic year must be in residence at the University of New Hampshire. In individual cases, the major department and the Dean of the Graduate School may grant permission to pursue the research for the dissertation at another institution where access to special facilities would be advantageous.

Doctoral Research: A minimum of two semesters of registration in doctoral research is required. However, doctoral students using University facilities while engaging in dissertation research must register for 999 each semester, even if the minimum requirement has been met.

Guidance Committee: A guidance committee will be appointed by the Dean of the Graduate School upon the recommendation of the program faculty as soon as possible after a student has begun study for the doctoral degree. The committee will have the responsibility of assisting the student in outlining a program and preparing for the qualifying examination, and will administer the examination.

Qualifying Examination: The qualifying examination is required and may be written, oral, or both. This examination will test: 1) the student's general knowledge in the student's major and minor work and 2) the student's fitness for engaging in research, particularly in the subject proposed for the dissertation. The results of the examination will be communicated by the chairperson of the student's program to the Dean of the Graduate School.

Language/Research Tool Requirement: Each doctoral program has its own language and/or research tool requirements. These requirements can be found in the individual program descriptions.

Degree Candidacy: A doctoral student is advanced to candidacy for the degree by the Dean of the Graduate School after the student has passed the qualifying examination, met the language or proficiency requirements as are deemed desirable by the student's program, and declared a topic for dissertation research.

Doctoral Committee: After the student has been advanced to candidacy, a doctoral committee will be appointed to supervise and pass on the dissertation and administer the final examination. This committee will be nominated by the department of major concentration and appointed by the Dean of the Graduate School. It shall consist of a minimum of five members, usually three from the major department and two from related departments. The Dean of the Graduate School is an ex officio member of all doctoral committees.

Time Limit: All graduate work for the doctorate must be completed within eight years of the beginning of doctoral study, unless the student entered with a master's degree in the same field, in which case the doctorate must be completed within seven years. The beginning of doctoral study is defined as the beginning date of the earliest course applied to the doctoral record. The student must be ad-
advanced to candidacy within five years of the beginning of doctoral study, or within four years if the student entered with a master’s degree in the same field.

Dissertation: The dissertation must be a contribution to scholarship in the student’s discipline, embodying the results of significant and original research, and a mature and competent piece of writing. Students writing dissertations should obtain a copy of the Thesis and Dissertation Manual from the Graduate School.

Final Defense: A copy of the completed dissertation must be made available to the members of the examining committee two weeks before the final examination date. The final oral examination is conducted by the doctoral committee and is intended to give the candidate an opportunity to defend the dissertation. A written final examination, on subject matter not covered in the qualifying examination, may also be required. This written examination is conducted by the major department. These final examinations must be completed by the date listed in the Graduate School calendar. After consultation with the major department, the dean may appoint, for participation in the final oral examination, additional members of the faculty under whom the student has worked. The doctoral committee alone shall decide on the merits of the candidate’s performance by a majority vote.

Submission of Dissertation: As soon after the examination as possible, but not less than two weeks prior to Commencement, two copies of the approved dissertation, ready for binding, shall be turned in to the Graduate School Office. Binding, microfilming, and copyright fees will be paid at the Graduate School. Most departments require an additional one copy of the dissertation. Students should consult their advisers concerning dissertation requirements.

Publication of the dissertation by University Microfilms will be required, and the cost will be assumed by the student. Students are urged to protect their research by copyrighting their dissertation at the time of microfilming. If the material presented in the dissertation is further published, it should be designated as having been accepted as a doctoral dissertation by the University of New Hampshire.

Graduation
Students are required to file an “Intent to Graduate Card” with the Registrar’s Office at the beginning of the semester in which they intend to graduate. Specific information concerning graduation is available at the Graduate School or the Registrar’s Office in Thompson Hall.

Students should be aware that all coursework taken prior to the official awarding of the degree will apply only to that degree program.

Deadlines for graduation are listed in the Graduate School calendar and each semester’s Time and Room Schedule.
Departmental Requirements and Course Descriptions

Key
When two course numbers precede a course title and are connected by a hyphen, the first semester of the course, or its equivalent, is a prerequisite to the second semester. If the course numbers are separated by a comma, qualified students may take the second semester without having had the first.

The notation "Lab" indicates that laboratory sessions are a part of the course.

Each prerequisite for a course is separated from the other prerequisites by a semicolon; e.g., Prereq: Educ 807; Psyc 841. If permission (of the instructor, department, adviser, or committee) is a prerequisite for all students, it is listed among the prerequisites; e.g., Prereq: Educ 807; Psyc 841; permission. If, on the other hand, permission may be substituted for one or more of the listed prerequisites, it follows the other prerequisites and is separated from them by a slash mark: e.g., Prereq: Educ 807; Psyc 841; /or permission. If permission may be substituted for only one of the prerequisite courses, it is listed with the course for which it may be substituted: e.g., Prereq: Educ 807 or permission; Psyc 841.

Cr/F following the description indicates that no letter grade is given, but that the course is graded credit/fail.

For up-to-date information about when a course is offered, who teaches the course, the number of recitations, lectures, labs, and such, students are referred to each semester's Time and Room Schedule, which carries a complete schedule of courses for the semester.

GRADUATE PROGRAM COORDINATOR:
William A. Condon

An applicant admitted to graduate study in animal
and nutritional sciences is expected to have had
sufficient undergraduate training in the basic biol-
ogical sciences to qualify for special work in this
field.

Students pursuing the master of science degree
in animal and nutritional sciences may select
courses in genetics, animal and human nutrition,
physiology, management, and diseases and para-
sites. A thesis is required, and a candidate for the
master's degree shall register for six thesis credits
and pass an oral examination covering the graduate
courses and thesis, and present a seminar on the
thesis research. At least two additional animal sci-
cence seminars are also required.

Doctoral-level study in areas related to animal
and nutritional sciences is offered through and in
cooperation with other biological science depart-
ments. Specifically, an interdisciplinary option is
offered with the department of biochemistry lead-
ing to the Ph.D. degree in biochemistry (nutrition);
and the Ph.D. degree is offered in genetics through
an interdepartmental genetics program (see genetics
program in this catalog).

Opportunities are provided for students to ob-
tain teaching as well as research experience during
their graduate studies.

700. CRITICAL ISSUES IN NUTRITION
Critical review and analysis of controversial topics
in nutrition; emphasis on developing analytical
writing skills. Prereq: basic nutrition courses. 3 cr.
(Fall semester only.)

701. PHYSIOLOGY OF REPRODUCTION
Comparative aspects of embryology, anatomy, en-
doctrine, and physiology of reproduction. Lab. 4 cr.

702. EXPERIMENTAL ENDOCRINOLOGY
OF REPRODUCTION
Discussions of current research literature plus ap-
lication of laboratory techniques to the study of
hormone relationships in the reproductive system.
Prereq: ANSc 701 and permission. Lab. 4 cr.

704. PRINCIPLES OF PATHOBIOLOGY
Principles of disease processes; reactivity of the
diseased cell, tissue, and organ. Prereq: animal anat-
omy, health, and disease courses; or permission.
3 cr.

709. BIOCHEMISTRY OF NUTRITION
Intermediary metabolism of nutrients and energy;
metabolism transport mechanisms; biological oxida-
tion; interrelationships of carbohydrate, fat, and
protein metabolism; obesity; control of hunger and
appetite. Prereq: biochemistry. 4 cr.

710. ANIMAL NUTRITION
Feeding and related management of ruminant ani-
mals with special emphasis on dairy cattle; nu-
trients and their use, digestive anatomy and
physiology, energy systems, forage systems and
quality, ration balancing, metabolic disorders, feed-

ing for economical milk production and feeding
young stock. Prereq: prin. of nutr. or permission.
3 cr.

711. COMPARATIVE ANIMAL GENETICS
How heredity affects domestic animals, poultry,
other mammals, and fish; emphasis on the organ-
ism and population. Quantitative inheritance; prin-
ciples of selection; disease resistance; statistical
and experimental techniques. Prereq: 4 cr. of genetics;
or permission. Lab. 4 cr.

712. ANIMAL BREEDING AND
IMPROVEMENT
Principles of genetic evaluation, selection, and
breeding systems as they apply to the genetic im-
provement of farm animals. Prereq: prin. of genet-
ics or permission. Lab. 4 cr. (Not offered every
year.)

714. INTRODUCTION TO ELECTRON
MICROSCOPY
Principles, theory, and methods used in preparing
and examining vertebrate tissues in the transmis-
sion and scanning electron microscopes; interpre-
tation of electron micrographs. Prereq: chemistry;
permission. 3 cr.

715. INTRODUCTION TO ELECTRON
MICROSCOPY LAB
Application of principles and theories presented in
714. Students carry out fixation embedding ultra
microtomy, critical point drying operation of trans-
mission and scanning electron microscopes, and
photographic procedures. Coreq: intro to electron
microscopy. Prereq: permission. 2 cr.

716. AVIAN DISEASES
Diagnosis, treatment, and control of the major bac-
terial, viral, and fungal diseases, parasitic infesta-
tions, and nutritional deficiencies of birds. Diseases
of commercial poultry are emphasized, but those
occurring in pet and wild birds are also included.
Labs will cover avian pathology and immunology.
Prereq: permission. 4 cr.

750. HUMAN NUTRITION
Human nutrient requirements throughout the life
 cycle. Nutrient needs are evaluated in the context
of their physiological and biochemical functions.
Prereq: basic nutrition. Coreq: ANSc 751. 3 cr.
(Fall semester only.)

751. LABORATORY TECHNIQUES IN
NUTRITION
Standard procedures of nutrient analysis. Use of
laboratory instruments and techniques to develop
quantitative skills. Prereq: organic chemistry or
permission. To be taken concurrently with ANSc
750. 2 cr. (Fall semester only.)

774. CLINICAL NUTRITION
Application of principles of normal nutrition and
physiology to clinical problems; altered nutrient
requirements in human disease. Prereq: basic nu-
775. NUTRITIONAL ASSESSMENT LABORATORY
Experimental techniques in anthropometric and biochemical assessment of nutritional status emphasizing principles of normal nutrition and changes induced by disease. Prereq: basic nutrition or permission. To be taken concurrently with ANSc 774. 2 cr. (Spring semester only.)

780. PRACTICAL APPLICATIONS IN CLINICAL NUTRITION
Supervised practical experience in dietetics in one of several cooperating New Hampshire hospitals. Emphasis on patient interviewing, evaluation, counseling, and instruction. To be taken concurrently with ANSc 774 and 775. 5 cr. (Spring semester only.)

795, 796. INVESTIGATIONS IN DAIRY, LIVESTOCK, POULTRY
A) Genetics; B) Nutrition; C) Management; D) Diseases; E) Products; F) Light Horses; G) Physiology; H) Cell Biology. The student may select a special problem in any of the fields listed under the guidance of the instructor. Prereq: permission. May be repeated. 1-4 cr.

801. ADVANCED STUDIES IN ANIMAL BREEDING
Independent study and research on modern breeding methods and newer systems of selection for quantitative traits. Prereq: ANSc 712. 3 cr.

803. ENERGY METABOLISM AND NUTRITION
Incidental lectures, assigned reading, and laboratory practice in methods of research with major emphasis on protein and energy metabolism. 3 cr. (Not offered every year.)

804. PROTEIN METABOLISM AND NUTRITION
Metabolism of dietary amino acids in the mammalian system with emphasis on various aspects of protein nutrition. Prereq: permission. 4 cr. (Not offered every year.)

805-806. AVIAN MICROBIOLOGY
The disease process (acute or chronic) in the intact host at cellular levels when invaded by viruses or virus-like agents, fungi, and protozoans. Physiological and cytopathological changes in tissue culture. 3 cr.

807-808. AVIAN HISTOPATHOLOGY
First semester: general histopathology. Second semester: the special histopathology of common diseases with emphasis on correlation of light and electron microscopy of tumors and tumor formation. Prereq: histology or the equivalent. 3 cr.

810. MINERALS AND VITAMINS IN NUTRITION
Metabolism and function of mineral elements and vitamins in higher animals. Prereq: permission. 4 cr. (Not offered every year.)

812. QUANTITATIVE GENETICS AND SELECTION
Gene frequency, genetic and environmental variation, heritability, fitness, selection, inbreeding, outbreeding, correlated characters. Prereq: one course each in genetics and statistics. 3 cr. (Not offered every year.)

851. CELL CULTURE
Theory; principles fundamental to the culture of cells in vitro. Introduction to techniques of preparation and maintenance of animal, plant, insect, and fish cell cultures. Application of cell culture to contemporary research in biological sciences. Prereq: gen micro; permission. Lab. 4 cr. (Also offered as Micr 851 and Bot 851.)

853. ADVANCED CELL BIOLOGY
A study of the ultrastructure and function of cell organelles followed by an analysis of various specialized animal cells to show how differences in form and location of various organelles lead to differences in function. Prereq: biochemistry; physiology; vertebrate anatomy; /or permission. 4 cr. (Not offered every year.)

895, 896. RESEARCH IN ANIMAL SCIENCES
Advanced investigations in a research project, exclusive of thesis project. Elective only after consultation with the instructor. May be repeated. 1-4 cr.

897, 898. ANIMAL SCIENCE SEMINAR
A survey of recent literature and research in the animal sciences. Staff. (May be repeated.) 1 cr. Cr/F.

899. MASTER'S THESIS
6-10 cr.

Biochemistry (Bchm)
Chairperson: James A. Stewart

PROFESSORS: Donald M. Green; Edward J. Herbst; Miyoshi Ikawa; Samuel C. Smith; James A. Stewart

ASSISTANT PROFESSORS: Clyde L. Denis; James B. Matthew

GRADUATE PROGRAM COORDINATOR: Edward J. Herbst

An applicant who gains admission to graduate study in biochemistry is expected to have completed basic courses in chemistry, biological sciences, mathematics, and physics. Otherwise well-qualified applicants will be permitted to correct deficiencies in undergraduate education by enrollment in the appropriate courses or by independent study. All applicants must submit aptitude scores from the graduate Record Examination.

The department offers opportunities for specialization in developmental biochemistry, biochemistry of natural products, physical biochemistry, biochemical genetics, and structure and metabolism of macromolecules. Opportunities also exist for interdisciplinary research specialization in marine biochemistry, biochemical nutrition, and cell biology in adjacent facilities on campus. In addition to the graduate courses in biochemistry, courses in advanced organic chemistry, radiochemistry, advanced microbiology, and genetics are usually recommended.
Participation of all graduate students will be required in the instructional activities of the department, either in the laboratory, in lectures, or in an individual instruction format. These teaching assignments are an essential part of the graduate academic programs of the department and are designed to give graduate students practical teaching experience. Normally one year of part-time teaching will be required of each student.

**Master of science** Degree candidates will be expected to develop a thesis on a basic research problem or to prepare a report or publication based on an applied project in biochemistry. All candidates for the M.S. degree will be required to pass an oral examination based on the thesis or project report and on the graduate courses completed in the degree program.

**Doctor of philosophy** Degree candidates will be required to complete a dissertation on original research in biochemistry. At the end of the first year of graduate study, a preliminary examination on organic chemistry, physical chemistry, and general biochemistry will be presented to students in the doctoral program. The results of this examination and the student’s academic record will be evaluated at this time to ascertain eligibility to proceed to candidacy in the doctoral program. Upon completion of graduate courses recommended by a guidance committee and demonstration of proficiency in the translation of biochemical literature in either German, French, or Russian, a doctoral student will be required to pass an oral qualifying examination conducted by the guidance committee. The successful completion of these requirements and advancement to candidacy for the Ph.D. degree must occur at least six months prior to the final oral defense of the Ph.D. dissertation administered by the student’s doctoral committee.

**702. COMPARATIVE MARINE BIOCHEMISTRY**
Nutrition, metabolism, and composition of marine organisms and relation to phylogeny; marine natural products. Prereq: general biochem or equivalent. 3 cr. (Not offered every year.)

**721. NEUROCHEMISTRY**
Biochemistry of the nervous system; metabolism and alterations of normal brain chemistry by drugs, chemicals, nutrition, memory, and learning; pathological changes. Prereq: a biochemistry course. 3 cr.

**751–752. PRINCIPLES OF BIOCHEMISTRY**
Fundamental biochemistry: chemistry, metabolism, and biological function of nucleic acids, proteins, carbohydrates, and lipids. Prereq: organic chemistry; or permission. Lab. 3 cr.

**753–754. BIOCHEMISTRY LABORATORY**
Must be taken concurrently with Bchm 751–752. 2 cr.

**760. ENZYME CHEMISTRY**
Structure, properties, and function of enzymes; kinetics and mechanisms of enzyme-catalyzed reactions; purification, characterization, and assay of enzymes. Prereq: general biochem or 751. Lab. 4 cr.

**771. BIOCHEMICAL GENETICS**
Mechanisms of storage, replication, transmission, transcription, recombination, mutation, and expression of genetic information by cells and viruses. Prereq: Bchm 751; or permission. (Also offered as Gen 771.) 3 cr.

**772. INTRODUCTORY LABORATORY IN MOLECULAR GENETIC TECHNIQUES**
Modern biochemical gene manipulation techniques including the genetic, physical and enzymatic characterization of gene vectors, gene cloning, construction of genetic probes, and sequencing of nucleic acids. Prereq: Bchm 751–752 and Bchm 771, Bchm 781, or Micro 804. (Also offered as Gen. 772.) 3 cr.

**781. THE NUCLEIC ACIDS**
Chemistry and metabolism of nucleic acids; molecular structures, purification and separation, biosynthesis, and biological functions. Prereq: organic chemistry; biochemistry. 3 cr.

**789. SPECIAL TOPICS IN BIOCHEMISTRY**
Seminars by guest speakers in selected areas of biochemistry. 2 cr. Cr/F. (Not offered every year.)

**795, 796. INVESTIGATIONS IN BIOCHEMISTRY**
Subject matter and hours to be arranged. Prereq: permission. 2 cr.

**811. BIOCHEMISTRY OF LIPIDS**
Chemistry, metabolism, and function of lipids. Prereq: Bchm 752 or equivalent. 3 cr. (Not offered every year.)

**832. BIOCHEMISTRY OF CARBOHYDRATES**
Chemistry, metabolism, and functions of carbohydrates, Polysaccharides, glycoproteins, and the nature of cell surfaces. Prereq: general biochem or equivalent. 3 cr. (Not offered every year.)

**842. BIOCHEMICAL REGULATORY MECHANISMS**
Nonreplicative functions of DNA: transcription and translational control of protein synthesis; quantitative regulation of proteins; regulation of metabolism by hormones, allosteric regulation and repression; regulatory mechanisms operating during development and differentiation. Prereq: a course in biochemistry. 3 cr.

**850. PHYSICAL BIOCHEMISTRY**
Structure, interactions, and physical properties of biomolecules. Thermodynamic, hydrodynamic, and spectroscopic methods for study of proteins and nucleic acids. Prereq: physical chemistry and biochemistry. 3 cr.

**897, 898. BIOCHEMISTRY SEMINAR**
Prereq: permission. 1 cr.

**899. MASTER’S THESIS**
6–10 cr.

**999. DOCTORAL RESEARCH**

Biology: Intercollege Biological Sciences Organization

Chairperson: Robert A. Croker
Chairperson of Graduate Advising Committee: Frank K. Hoornbeek
The master of science program in biology is administered by the Intercollege Biological Sciences Organization, which is composed of faculty members involved in teaching and research in various biological sciences. Students in the program consult with the Graduate Advising Committee in planning their individual programs. At present, participating faculty are drawn from the following areas: molecular, cellular, and developmental biology; systematics, ecology, and evolution; physiology, anatomy, and nutrition; genetics, pathobiology.

**Master of Science**

This is a general, nonthesis program that is applicable to interests which may not be met in a formal department. Curricula may be individually designed for persons working for agencies that require advanced, broad training in the biological sciences, or for those who wish to prepare for junior or community college teaching. Applicants should have a bachelor's degree in biology, zoology, botany, microbiology, or a strong background in biological and physical sciences including physics, college algebra, and organic chemistry. Requirements for the degree include a four-credit research project and successful completion of a final written comprehensive examination on completed coursework.

Persons interested in the biology program should contact the chairperson, Graduate Advising Committee, for further information.

**Botany and Plant Pathology (Bot)**

**Chairperson:** Subhash C. Minocha

**PROFESSORS:** Arthur C. Mathiesen; Richard W. Schreiber

**ASSOCIATE PROFESSORS:** Alan L. Baker; Robert O. Blanchard; A. Linn Bogle; Garrett E. Crow; Leland S. Jahnke; William E. MacHardy; Subhash C. Minocha

**ASSISTANT PROFESSORS:** Thomas C. Harrington; Thomas D. Lee

**ADJUNCT PROFESSOR:** Alex L. Shigo

**ADJUNCT ASSISTANT PROFESSOR:** Walter C. Shortle

**GRADUATE PROGRAM COORDINATOR:** Garrett E. Crow

Students admitted to graduate study in botany and plant pathology are expected to have adequate preparation in basic botany courses and in the physical sciences. All applicants must submit scores on the aptitude and advanced biology portions of the Graduate Record Examination. The candidate for the master of science degree will meet the Graduate School's requirements for the degree and, in addition, will be required to defend a thesis based on field or laboratory research, after passing a comprehensive examination.

A student who is working toward the doctor of philosophy degree will be advanced to candidacy for the Ph.D. after a successful comprehensive examination and completion of the following language requirement: a reading knowledge of at least one foreign language. The guidance committee may request a reading knowledge of two foreign languages, or a reading knowledge of one foreign language and proficiency in a cognate field such as statistics or computer techniques. The student will be required to defend a dissertation that is to be a substantial contribution to botanical knowledge.

All botany and plant pathology graduate students without professional teaching experience will satisfy the following departmental teaching requirement: each student will assist a faculty member for one semester in teaching one botany course; a Ph.D. candidate will assist in teaching an introductory course and an additional semester in an advanced botany course.

The department's areas for graduate study include: plant physiology, Mr. Jahnke, Mr. Minocha; plant ecology, Mr. Lee; systematic botany, Mr. Crow; phycology, marine-freshwater, Mr. Mathieson, Mr. Baker; plant pathology, Mr. Blanchard, Mr. Harrington, Mr. MacHardy; plant morphology and anatomy, Mr. Bogle; mycology, Mr. Blanchard, Mr. Harrington; cell biology, Mr. Schreiber; developmental botany, Mr. Minocha.

717. **GENERAL LIMNOLOGY**

Special relationships of freshwater organisms to the chemical, physical, and biological aspects of their environment; factors regulating their distribution; and the primary and secondary productivity of lakes. Individual projects. Prereq: general ecology or equivalent. 4 cr.

719. **FIELD LIMNOLOGY**

Principles of freshwater ecology, examined in a variety of habitats; the application of field instruments and computer methods used to study lakes and interpret data. Occasional Saturday field trips. Pre- or coreq: Bot 717; permission. Lab. 4 cr.

721. **THE MICROSCOPIC ALGAE**

Survey of phytoplankton and periphyton in local marine and freshwater habitats. Identification, systematics, and evolution. Class and individual collection trips. Prereq: elem bot or survey of the plant kingdom. Lab. 4 cr.

722. **MARINE PHYCOLOGY**

Identification, classification, ecology, and life histories of the major groups of marine algae, particularly the bentonic marine algae of New England. Periodic field trips. Prereq: elem bot or survey of the plant kingdom. Lab. 4 cr. (Not offered every year.)

723. **MARINE ALGAL ECOLOGY**

Distribution, abundance, and growth of marine plants in relation to their environment. Scheduled field trips and an independent research project are required. Prereq: Bot 722, Zool 715; or permission. Lab. 4 cr. (Not offered every year.)

724. **FRESHWATER ALGAL ECOLOGY**

Survey of freshwater algal habitats; physiological explanation of population models. Individual experimental projects. Prereq: Bot 717 or 721; or permission. 4 cr.

727. **ALGAL PHYSIOLOGY**

Survey of major topics in the physiology and biochemistry of marine and fresh water algae including: nutrition, metabolic pathways, reproductive physiology, storage and extracellular products, cell inclusion, growth and development. Prereq: plant physiology and introductory biochemistry or permission. 2 cr. (Not offered every year.)
729. ALGAL PHYSIOLOGY LABORATORY
Laboratory techniques useful in studying the physiology of freshwater and marine algae. Experiments in nutrition, metabolism, pigment and enzyme analysis. Small research project required. Prereq: concurrent registration in Bot 727 and permission. 2 cr. (Not offered every year.)

732. CELL BIOLOGY
Structure, behavior, and development of cells; the cellular basis of heredity. Prereq: one year of biological science and chemistry. 4 cr.

742. PHYSIOLOGICAL ECOLOGY
Physiological responses of plants to the physical environment; energy exchange, light, and photosynthesis, water relations, and mineral nutrition. Prereq: plant physiology or permission. Lab. 4 cr.

747. AQUATIC HIGHER PLANTS
Flowering plants and fern relatives found in and about bodies of water in the northeastern United States; extensive field and herbarium work, preparation techniques, and collections. Prereq: plant taxonomy. Lab. 4 cr. (Not offered every year.)

752. MYCOLOGY
Classification, identification, culturing, life histories, and ecology of parasitic and saprophytic fungi; their role in the environment and human affairs. Prereq: elementary botany. Lab. 4 cr.

755. PLANT VIROLOGY
Characterization and replication of plant viruses; diagnosis, epidemiology, and control of virus-caused diseases of plants. Prereq: plant pathology or permission. 2 cr. (Not offered every year.)

757. PLANT BACTERIOLOGY
Biology of beneficial and detrimental bacteria associated with higher plants. Prereq: plant pathology, microbiology, or permission. 2 cr. (Not offered every year.)

761. PLANT GEOGRAPHY
Distribution of plants, a consideration of vegetation types and floras, and problems of endemism with emphasis on North America; major influential factors such as climate, topography, and biotic. Major contributions from Humboldt to the present time. Prereq: plant taxonomy or permission. 4 cr. (Not offered every year.)

762. MORPHOLOGY OF THE SEED PLANTS
Comparative form and structure of the major living and extinct groups; evolutionary modifications of the vegetative and reproductive organs, and the basic life history pattern. Prereq: survey of the plant kingdom. Lab. 4 cr. (Not offered every year.)

764. MICROTECHNIQUE
Methods of preserving cell and tissue structure, embedding, sectioning, and staining plant tissues, and an introduction to microscopy. Prereq: permission. Lab. 4 cr. (Not offered every year.)

795, 796. INVESTIGATIONS IN:

803, 804. TOPICS IN DEVELOPMENTAL PLANT PHYSIOLOGY

813. PHOTOSYNTHESIS
The physiology and biochemistry of photosynthesis in higher plants and microorganisms: light reactions, electron transport, membrane structure and function, carbon assimilation pathways, energy conservation, and metabolic regulation. Agronomic and ecological aspects of photosynthesis will also be examined. Prereq: plant physiology or biochemistry. 4 cr. (Not offered every year.)

822. ADVANCED MARINE PHYCOLOGY
Classification, ecology, and life histories of marine algae considered at an advanced level. Seminars, discussion, assigned reading, and laboratory. Prereq: Bot 722 or equivalent. 4 cr.

845. PLANT COMMUNITY ECOLOGY
Methods for analysis of biological communities; ordination and classification of communities; theoretical and empirical investigation of factors controlling community structure; theory and modelling of succession. Occasional Saturday. Prereq: intro. statistics and micro. ecology. Lab. 4 cr. (Not offered every year.)
850. MORPHOGENESIS
Principles of differentiation at molecular, cellular, and organismic level; internal and external factors regulating gene activity and differentiation. Prereq: plant physiology or permission. 4 cr. (Not offered every year.)

851. CELL CULTURE
Theory; principles fundamental to the culture of cells in vitro. Introduction to techniques of preparation and maintenance of animal, plant, insect, and fish cell cultures. Application of cell culture to contemporary research in biological sciences. Prereq: permission. 4 cr. (Also offered as Micr 851 and ANSe 851.)

854. PRINCIPLES OF PLANT DISEASE CONTROL
Epidemiology of plant diseases and relationship to cultural practices, resistant varieties, biological control, and chemical control; crop loss assessment, disease forecasting, and disease management. Lab. Prereq: plant or tree pathology. 4 cr. (Not offered every year.)

858. PLANT ANATOMY
Anatomy of vascular plants; structure and development of basic cell and tissue types and of major organs of woody plants. Term project and final report. Prereq: intro bot or survey of the plant kingdom; permission. 4 cr.

859. ADVANCED MYCOLOGY
Biology, isolation, and identification of fungi treated at an advanced level. Assigned readings and a collection required. Prereq: Bot. 752 or equivalent. Lab. 4 cr. (Not offered every year.)

867. ADVANCED SYSTEMATIC BOTANY
Principles and rules of plant classification and nomenclature; plant families; field and herbarium work. Prereq: plant taxonomy. 4 cr.

885, 886. RECENT ADVANCES
(A) Systematic Botany; (B) Plant Physiology; (C) Plant Pathology; (D) Plant Anatomy; (E) Plant Ecology; (F) Mycology; (G) Cell Biology; (H) Physiology; (I) Botanical Teaching; (J) Morphology; (K) Cell Physiology. Elective only with permission. 2 cr.

895, 896. INVESTIGATIONS IN BOTANY
A) Systematic Botany; B) Plant Physiology; C) Plant Pathology; D) Plant Anatomy; E) Plant Ecology; F) Mycology; G) Cell Biology; H) Physiology; I) Botanical Teaching; J) Morphology; K) Cell Physiology; L) Scientific Writing; M) Microtechnique; N) Optical Microscopy; O) History of Botany. Individual projects under faculty guidance. Elective only with permission. 2-6 cr.

899. MASTER'S THESIS
6-10 cr.

999. DOCTORAL RESEARCH

Business Administration (Admn)

Program Director: Dwayne E. Wrightsman
Director of Executive Programs: Linda G. Sprague

PROFESSORS: Robert F. Barlow; Stephen L. Fink; Russell I. Haley; James O. Hornigan; Manley R. Irwin; Fred R. Kaen; Melvin J. Karson; John J. Korbel; Dwight R. Ladd; Barry Shore; Linda G. Sprague; William E. Wetzel, Jr.; Robin D. Willits; Dwayne E. Wrightsman

ASSOCIATE PROFESSORS: John H. Barnett; John A. Freear; Francine S. Hall; Richard Martin-Diaz; Michael J. Merenda; Richard L. Mills; Melvin Sandler; Starr Schlobohm

ASSISTANT PROFESSORS: Gene Bocialetti; Ahmad Etebari; Allen Kaufman; Duncan G. LaBay; Jeffrey E. Sohl; Rita Weathersby

ADJUNCT ASSOCIATE PROFESSOR: Dale G. Broderick

The Whittier School offers a program leading to the M.B.A. in formats designed for day students and practicing executives. The program is designed to prepare graduates for professional careers in administration in both profit and non-profit organizations in a rapidly changing world. The M.B.A. program is directed toward a broad preparation in general administration through the study of: 1) the increasing body of relevant knowledge drawn from the behavioral sciences, mathematics, and economics; 2) the existing and emerging processes and institutions of the functional fields of administration; and 3) the role of business and other organizations in a complex and turbulent society.

There is a consistent emphasis on developing basic analytical skills rather than on developing extensive technical expertise. Also, the program fosters the ability to utilize conceptual and theoretical material in the analysis and solution of practical problems.

Candidates for admission must possess a bachelor's degree from an accredited college or university. In addition, all candidates are expected to take the Graduate Management Admission Test (GMAT) given by the Educational Testing Service. Details concerning the dates and locations for these examinations may be obtained from Educational Testing Service, Box 955, Princeton, New Jersey 08540.

The Whittier School welcomes applicants with an above-average academic record in any undergraduate specialty other than business or commerce. No previous exposure to business courses is expected. However, previous work in mathematics, economics, the behavioral sciences, and the branches of engineering is particularly useful for graduate study in administration. Because of the increasing use of mathematical concepts, models, and notation in the practice and study of administration, applicants should normally have successfully completed one year of college mathematics, preferably including an introduction to calculus. Students lacking this background may still enroll in the program provided they obtain adequate substitute preparation prior to beginning the program.

In all cases, the applicant's entire educational background, relevant experience, references, and professional aims will be considered in the admis-
sions process. Exceptions may be made to any of the foregoing requirements by the committee on admissions.

Day M.B.A. Program
The Whittomore School curriculum for day students consists of an integrated sequence of 18 courses requiring two years of study, which can be started only in the fall semester. During the first year, 10 required courses in the basic disciplines (quantitative analysis, economics, and behavioral science) and the functional areas of management (accounting, marketing, operations management, and financial management) are integrated into an overall study of the process of administration. Special attention is also given to the study of the modern corporation as an economic, legal, and social organization by requiring all students to complete the course, The Organization and Its Environment.

The second year of the day curriculum continues the emphasis on overall management by requiring all students to complete Business Conditions and Economic Forecasting and Business Policy. The ten required courses in the first year and the two required courses in the second year are open only to full-time matriculated students. In addition, with the help of a faculty adviser, the student will select the equivalent of six four-credit elective courses with some concentration in an area of special interest. Students are encouraged to select appropriate graduate-level courses offered by other colleges of the University as well as by the Whittomore School, and to undertake field studies or internships.

Executive M.B.A. Program
The curriculum for practicing managers contains the same course requirements as the day M.B.A. program, but is tailored to the context and scheduling needs of those working full-time at executive level jobs. The executive program begins each fall and, because of the cumulative nature of the program, participants are expected to stay on schedule with their class. The program is offered in Durham at the New England Center. The two-year program begins in September, with a full week of classes. Thereafter, classes are held twice each month in all-day Friday and Saturday sessions.

702. APPLIED STATISTICS
Time series and cross-sectioned data; regression analysis; computerized statistical packages. Experimental design; surveys; contingency analysis. Prereq: basic statistics; permission. 4 cr.

705. OPERATIONS RESEARCH
Synthesis and analysis of basic principles and methods of operations research applied to managerial decisions. Mathematical programming, networks, inventory, queuing, sequencing, scheduling, and Markovian models. Prereq: permission. 4 cr.

706. ADVANCED OPERATIONS RESEARCH
Analysis and synthesis of complex operations research models. Project is undertaken by all students. Advanced mathematical programming (nonlinear, parametric linear, stochastic, and dynamic), stochastic inventory models, advanced queuing models, and heuristic programs. Prereq: Adm 705 or permission. 4 cr.

708. MODELING AND SIMULATION
Modeling: formulation, data preparation, translation, validation, interpretation, and implementation. Discrete simulation models are developed and applied using a special purpose simulation language. Prereq: basic probability and statistics; permission. 4 cr.

712. ORGANIZATIONAL CHANGE
Process of change in organizations. Change strategies; the change agent's role and relation to the client system. Bases of resistance to change and problems encountered by internal and external change agents. Theoretical reading material, cases, and exercises. Prereq: permission. 4 cr.

713. INTERPERSONAL AND GROUP DYNAMICS
Dynamics of small groups through the use of the class itself as an intensive laboratory study group. Students examine their own behavior and its effects on others through the use of the Laboratory Training Group (T-group) and develop conceptual ability and behavioral skills. Readings in group dynamics, interpersonal relations, and sensitivity training. Prereq: permission. Lab fee. 4 cr.

714. CONFLICT MANAGEMENT
Conflict among individuals, small groups, and organizations. Analysis of cases, readings, simulations, and role-plays (often using video tape) develops useful concepts and skills for dealing with conflict. Students examine their own behavior in coping with conflicts within the class. Field project required. Prereq: permission. 4 cr.

715. THEORY AND PRACTICE OF GROUP LEADERSHIP
Comparison of and practice in leading task- and process-oriented groups. Student teams design presentations on leadership topics, then study their own leadership-membership issues. Each student also participates in and leads a process-oriented group. Prereq: Adm 713 or equivalent; permission. 4 cr.

718. COST AND MANAGEMENT
Effective use of cost accounting, cost analysis, and budgeting in planning and controlling operations. Analysis of cost behavior, direct and absorption costing, cost-price-volume relationships, distribution costs, transfer pricing, and capital budgeting analysis. Prereq: permission. 4 cr.

720. AUDITING
The attest function and the responsibility and professional ethics of the independent auditor in our society. Audit concepts, procedures, objectives, and reports. Operational audits, social audits, and management services. Prereq: financial and managerial accounting, or permission. 4 cr.

722. TOPICS IN ACCOUNTING
Special topics. Prereq: permission. 4 cr.

723. TOPICS IN FINANCE
Prereq: financial management. 4 cr.

724. ADVANCED TOPICS IN OPERATIONS MANAGEMENT
Analysis and development of planning and control systems for the operations within an organization. Prereq: permission. 4 cr.

728. STATISTICAL DECISION MAKING
Probability and statistics applied to decision problems. Bayesian approach to decisions under uncon-
761. SALES MANAGEMENT
Principles and methods of successful salesmanship and management of the sales function. Selling experiences in fields of student interest; case studies, sales presentations; oral and written analyses of sales management issues. Prereq: marketing; permission. 4 cr.

762. MARKETING WORKSHOP
Integrative study of a real marketing situation in a business, nonprofit institution, or government agency. Student teams identify problem, research or collect data, suggest alternate solutions, and submit a recommended course of action. Prereq: one advanced marketing course; permission. 4 cr.

770. PERSONNEL ADMINISTRATION
Role of personnel administration and human resource management in achieving goals in "for-profit" and "not-for-profit" organizations. Functions of management; scope, technique, and current issues of personnel administration; organizational climate; human resources; planning; motivation; and personnel activities and staff. How managers relate to personnel administration and interact with personnel administration staff and services. Prereq: permission. 4 cr.

780. WOMEN IN MANAGEMENT
Issues faced by women managers in complex organizations; problems associated with role expectations of women as they move into managerial positions traditionally filled by men. Prereq: senior or graduate standing. 4 cr.

785. CAREER PLANNING AND MANAGEMENT
Individual career management skills; concepts of career development, issues of career management across different career stages, and familiarity with contemporary issues of careers in organizations, Helpful in human resource management. 4 cr.

795. INTERNSHIP
On-the-job skill development through fieldwork in an organization (business, industry, health, public service, etc.). Normally, supervision provided by a qualified individual in the organization, with frequent consultation by a faculty sponsor. Written report required. Internships may be part- or full-time, with course credits assigned accordingly. 1-16 cr.

800. INTEGRATIVE MANAGEMENT SEMINAR
This course extends throughout the Executive MBA Program. Material and topics not offered in regular courses are offered here, as are distinguished speakers from business and government, field trips, issues of immediate concern, etc. 1 cr. To be repeated up to 4 cr. Cr/F.

801. QUANTITATIVE METHODS
Basic mathematical and statistical concepts applied to managerial decision making. Probability, statistics, decision trees, and mathematical models. 3 cr.

803. HUMAN BEHAVIOR IN ORGANIZATIONS
Understanding of behavioral science concepts and their use in the analysis of individual, group, and leadership relationships in organizations; skills in dealing with others at work. 3 cr.
804. MANAGEMENT ORGANIZATION
Theories of organization and analysis of contemporary forms and structure. Concern is with development of rational management processes in a dynamic society. 3 cr.

806. FINANCIAL MANAGEMENT
Concepts and techniques for determining the need for, the acquisition of, and the management of, financial resources of the business. 3 cr.

808. MARKETING
Identification, development, and retention of markets for the goods and services offered by the firm. Attention is given to the dynamics of demand and to the blending of the marketing mix. 3 cr.

810. OPERATIONS MANAGEMENT
Analysis of operational problems in the product and service sectors, focusing on production system design and development; emphasis on standards, capacity, inventory, scheduling, and control. 3 cr.

811. THE ORGANIZATION AND ITS ENVIRONMENT
Study of the modern corporation as a partly economic, legal, and social organization, including examination of widely held views of business and views of business people about themselves. 3 cr.

815. FINANCIAL ACCOUNTING
Introduction to the accounting methods employed in organizations to determine and communicate their financial positions to interested parties outside the organizations. 3 cr.

816. MANAGERIAL ACCOUNTING
Introduction to various models employed by organizations in the financial planning and control processes. 3 cr.

817. BUSINESS CONDITIONS AND ECONOMIC FORECASTING
Managerial effects of historical and forecasted movements in interest rates, national income, inflation, and unemployment. 4 cr.

818. MANAGERIAL ECONOMICS
An economics approach to the conceptualization, analysis, and management of revenues, costs, and profits. 3 cr.

820. BUSINESS POLICY
A "capstone" course, focused on industries, companies, and other organizations in operation, and studied through case examples, with emphasis on integration of materials covered in prior courses. 4 cr.

830. INVESTMENTS ANALYSIS
Capital market patterns and techniques useful for security analysis. Securities, market institutions, yield series, random walks, intrinsic-value analyses, portfolio management, analysis research projects. Prereq: Admn 806; permission. 4 cr.

837-839. ADVANCED FINANCIAL ACCOUNTING I-II
Theory and practice of income measurement and asset valuation; consolidations, partnerships, leases, pensions, price-level reporting, foreign currencies, and fund accounting. Prereq: Admn 815 and 816. 4 cr.

848. LAW: USE AND APPLICATION IN BUSINESS
Use and understanding of law as it applies to business judgement and policy decision making; basic legal rules and their application. Contracts, corporations, agencies, partnerships, administrative agencies, commissions, and other related business matters. Case-method teaching with outside research. 4 cr.

850. MARKETING MANAGEMENT
Practical application of theories taught in marketing. Planning, organization, and control of marketing activities in large corporations and small businesses; new product development; pricing policies; selection of channels of distribution; interrelationships between marketing, production, and finance. Sound policy formulation and decision making established through analysis of cases and computer simulation. Prereq: a basic marketing course. 4 cr.

851. GOVERNMENT REGULATION OF BUSINESS
Government policy as it affects managerial decision making. Conspiracy, monopoly, mergers, unfair practices, discrimination, and recent social legislation. 4 cr.

852. MARKETING RESEARCH
Identification, collection, and analysis of data for the marketing process. Strengths, limitations, environment, and evaluation of research in the marketing process. Prereq: marketing and statistics; permission. 4 cr.

855. ADVANCED BUSINESS FINANCE
Analytical tools and practical skills for recognizing and solving complex problems of business finance. Working-capital management; capital budgeting; cost of capital; capital structure; dividend policy. Prereq: Admn 806. 4 cr.

860. COMPUTER-BASED CORPORATE PLANNING TECHNIQUES
Computer-based techniques and models for planning: model construction, validation, and evaluation; data collection and analysis; system characteristics; evaluation of alternatives. Student projects required. 4 cr.

861. THE PHILOSOPHY OF MANAGEMENT SCIENCE
Study of management from a systems-analysis point of view. 4 cr.

895. SPECIAL PROJECTS AND INDEPENDENT STUDY
Projects, research, and reading programs in areas required for concentration. Sixty days advance approval of the student's plan of study by adviser and by proposed instructor required. Maximum of 8 credits, except by special permission. Maximum of 4 credits if Admn 896 has been taken for 8 credits. Variable cr. (May be repeated.)

896. CONSULTING PRACTICUM
Field consulting experience as a member of MBA Associates. Development of client relationships, diagnoses and analyses of actual problems, written and oral reports to clients, and administrative participation in MBA Associates. Prereq: permission. 4 cr. (May be repeated.)
898. TOPICS IN ADMINISTRATION
Special topics; may be repeated. Prereq: consent of adviser and instructor. 1-4 cr.

Chemical Engineering (Ch E)

Chairperson: Stephen S. T. Fan

PROFESSORS: Stephen S. T. Fan; Virendra K. Mathur; Gail D. Ulrich
ASSOCIATE PROFESSORS: Ihab H. Farag; Donald C. Supplesberg
ASSISTANT PROFESSOR: Arun V. Someswar

GRADUATE PROGRAM COORDINATOR:
Stephen S. T. Fan

To be admitted to graduate study in chemical engineering, an applicant is expected to have completed a course of study substantially equivalent to that required for the degree of bachelor of science in chemical engineering in this University. However, students with good undergraduate records but with deficiencies in certain areas may be admitted on condition that they complete specified courses without credit to make up for their deficiencies.

To be admitted to the program, a minimum of 30 credits, which must include Ch E 813, 815, 816, 823, and 832, is required for the master of science in chemical engineering degree. The core-courses required can be waived only in special cases with permission from the department faculty. A candidate for the master of science degree must prepare a thesis, for which a minimum of six credits will be allowed, unless the candidate is specifically exempted by the faculty because of previous research experience.

Students interested in graduate studies beyond the master of science degree should refer to the section entitled Engineering Ph.D. Program.

Courses numbered between 600 and 699 may be taken for graduate credit by nonmajors only with the permission of the instructor and consent of the student's adviser. Required courses are required in all chemical engineering courses.

701. INTRODUCTION TO POLYMER ENGINEERING
Principles of polymer chemistry, polymerization kinetics, polymer rheology, and material characteristics. Design and analysis of polymer reactors, extruders, molding machines, and other forming operations. Lab. 4 cr.

705. NATURAL AND SYNTHETIC FOSSIL FUELS

712. INTRODUCTION TO NUCLEAR ENGINEERING
Development of nuclear reactors; binding-energy; radioactivity; elements of nuclear reactor theory; engineering problems of heat transfer, fluid flow, materials selection, and shielding; environmental impacts. 4 cr.

751. PROCESS SIMULATION AND OPTIMIZATION
Techniques for computer-aided analysis of chemical processing systems. Development of mathematical models to describe process behavior. Application of optimization techniques. Prereq: a knowledge of FORTRAN programming. Lab. 4 cr.

752. PROCESS DYNAMICS AND CONTROL
Dynamic behavior of chemical engineering processes described by differential equations; feedback control concepts and techniques; stability and analysis. Lab. 4 cr.

772. PHYSICOCHEMICAL PROCESSES FOR WATER AND AIR QUALITY CONTROL
Origin and characterization of pollutants. Controls, including filtration, sedimentation, coagulation and flocculation, absorption and adsorption. Applied fluid mechanics, mass transfer, and kinetics. Thermal pollution, chemical treatment, oil spills on water, and aeration. Lab 4 cr.

804. RADIATIVE HEAT TRANSFER
Heat transmission in high-temperature operations and interaction of radiative and other transport mechanisms; radiation geometry; application of matrix algebra to radiative transfer in enclosures; zoning methods of temperature measurements. Analytical and empirical approximations of engineering use. Quantitative design of several furnaces and high-temperature systems. 3 cr.

813. ADVANCED FLUID MECHANICS
Basic equations describing behavior of static and dynamic fluid systems. The equations of motions and application to laminar and turbulent flow, momentum and energy equations for advanced problems associated with flow inside conduits. Flow of compressible fluids and boundary layer phenomena. 3 cr.

815. HEAT TRANSFER
Steady-state and transient heat conduction in solids; heat convection; analytic solutions, similarity relations, boundary layer methods; radiation. 3 cr.

816. DIFFUSIVE MASS TRANSFER
Physical aspects of diffusion; theories of diffusion in dilute gases, dense gases, liquids, and solids; surface diffusion; mixing processes. Simultaneous heat and mass transfer. 3 cr.

823. ADVANCED CHEMICAL ENGINEERING THERMODYNAMICS
The multicomponent open system; the volumetric and phase behavior of pure substances and of multi-component systems at physical and chemical equilibrium; fugacity and activity; thermal properties of equilibrium, chemically reacting systems; introduction to statistical thermodynamics. 3 cr.

832. ADVANCED CHEMICAL ENGINEERING KINETICS
Specialized applied kinetics; problems: catalysis, fast reactors and shock tubes; combustion and detonation processes; nonisothermal kinetics; heat and mass transfer in nonequilibrium, chemically reacting systems. 3 cr.

852. ADVANCED PROCESS DYNAMICS
Process dynamics for higher order processes and nonlinear processes. Modelng of a turbulent flow process by differential equations, linearizing nonlinear elements, and adequately controlling the entire system. 3 cr. (Not offered every year.)

890. LITERATURE REPORT
Instruction in the use of the library for chemical engineering research, culminating in the preparation of a literature report on a topic of mutual interest.

37
interest to the student and the chemical engineering faculty. 1 cr.

895, 896. GRADUATE INDEPENDENT STUDY
Directed reading or investigation at the advanced level on topics in chemical engineering. 2-4 cr.

897, 898. GRADUATE SEMINAR
Discussion on topics of interest to graduate students and staff; reports of research progress; invited lectures by outside speakers. 0 cr.

899. MASTER'S THESIS
Original investigations in chemical engineering. Variable credit; 6 credits required.

Chemistry (Chem)

Chairperson: Frank L. Pilar

PROFESSORS: Alexander R. Amell; Kenneth K. Andersen; N. Dennis Chasteen; Clarence L. Grant; Colin D. Hubbard; Paul R. Jones; James D. Morrison; Charles W. Owens; Frank L. Pilar; Albert K. Sawyer; James H. Weber

ASSOCIATE PROFESSORS: W. Rudolf Seitz; Gary R. Weisman; Edward Hou Sen Wong

ASSISTANT PROFESSOR: Christopher F. Bauer

GRADUATE PROGRAM COORDINATOR: W. Rudolf Seitz

The Department of Chemistry offers programs leading to three graduate degrees: doctor of philosophy, master of science, and master of science for teachers. Entering graduate students (except for those desiring the M.S.T. degree) are expected to take proficiency examinations in chemistry to assist in starting each new student's graduate work at the proper level. These examinations will be offered at the beginning of each semester on dates announced in the departmental graduate calendar.

The faculty of the chemistry department feels that the experience of teaching is a valuable part of the training of the graduate student. Therefore, all graduate students who are doctor of philosophy or master of science candidates will obtain some teaching experience during their tenure.

Doctor of Philosophy Degree

Admission to this program is based upon superior work in the usual undergraduate courses in inorganic chemistry, analytical chemistry, organic chemistry, and physical chemistry, as well as the normal supporting courses in mathematics and physics. This degree requires the completion of a research problem presented in the form of a thesis.

Ph.D. candidates will be expected to demonstrate proficiency in reading chemical literature in one or two appropriate foreign languages; the analytical and physical divisions require German or Russian, the inorganic division requires German only, and the organic division requires German plus French or Russian. Candidates will also demonstrate to the doctoral committee that they have a broad basic knowledge of the field of chemistry: 1) by completing certain fundamental graduate courses; and 2) by means of a series of examinations in the major field. The principal emphasis of the last two years will be on the research project that will constitute the dissertation. During this time, doctoral candi-

dates will present and defend an original research proposal before the doctoral committee.

Master of Science Degree

Admission to this program is based upon a superior undergraduate average and requires satisfactory work in the usual undergraduate courses in inorganic chemistry, analytical chemistry, organic chemistry, and physical chemistry, as well as the normal supporting courses in mathematics and physics. This degree requires the completion of a research problem presented in the form of a thesis.

Master of Science for Teachers Degree

This program is offered for candidates who hold secondary-school teacher certification in chemistry. This degree requires 30 semester hours in courses approved by the graduate coordinator. Persons interested in this degree should confer with the department's graduate program coordinator.

Interdisciplinary Programs in Chemistry

Graduate students in chemistry may elect to enter one of the interdisciplinary programs offered jointly with the chemistry department and other departments. In these programs, the graduate student, with the advice of the guidance committee, elects courses in chemistry and in the related disciplines, and writes the dissertation on a research problem appropriate to interdisciplinary treatment. Students interested in these programs should write to the chairperson of the department for further information.

Analytical Chemistry

762. INSTRUMENTAL METHODS OF CHEMICAL ANALYSIS
Theory, instrumentation, and application of methods such as atomic absorption, coulometry, emission spectrography, gas and liquid chromatography, polarography, potentiometry, IR and UV-VIS absorption spectrophotometry, and mass spectrometry to chemical analysis. Prereq: quantitative analysis; physical chemistry II as a pre- or corequisite; or permission. Coreq: Chem 763. 3 cr.

763. INSTRUMENTAL METHODS OF CHEMICAL ANALYSIS LABORATORY
Experimental parameters, error analysis, and applications of the methods covered in Chem 762. Coreq: Chem 762. 2 cr.

830. ADVANCED OPTICAL METHODS
Techniques of chemical identification and analysis utilizing optical instrumentation from the standpoint of theory and application. Topics include UV-visible absorption, luminescence, atomic spectroscopy, IR, NMR, x-ray methods and mass spectrometry. 3 cr. (Not offered every year.)

831. ADVANCED ELECTRICAL METHODS
Introductory electronics for chemists; theory and applications of important electrochemical techniques such as polarography and cyclic voltammetry. 3 cr. (Not offered every year.)
832. STATISTICS AND EXPERIMENTAL DESIGN
Confidence intervals, analysis of variance, regression analysis, sampling statistics, optimization procedures. Examples drawn primarily from the analytical chemistry literature. 2 cr. (Not offered every year.)

833. CHEMICAL SEPARATIONS
The use of various separation techniques prior to analysis; separations as methods of analysis. 3 cr. (Not offered every year.)

834. CHEMICAL EQUILIBRIA
Formulation and solution of chemical equilibrium problems of relevance to analytical chemistry; calculation of equilibrium constants from experimental data. 2 cr. (Not offered every year.)

Inorganic Chemistry

774. INORGANIC CHEMISTRY
Basic theoretical concepts and their applications to inorganic reactions and compounds. Prereq: organic chem; physical chemistry; or permission. 3 cr.

775. INORGANIC CHEMISTRY LABORATORY
Synthesis and characterization of inorganic compounds with an emphasis on techniques not taught in other laboratory courses. 2 cr.

803. ADVANCED INORGANIC CHEMISTRY I
Survey of some concepts of modern inorganic chemistry, serving as general background material for all graduate students and as basic fundamentals for further courses in inorganic chemistry. 4 cr.

804. ADVANCED INORGANIC CHEMISTRY II
Special topics for the advanced student; transition metal reaction mechanisms; organometallic chemistry. Overview of current trends in inorganic research. 3 cr.

847. ADVANCED INORGANIC CHEMISTRY III
Advanced topics in metal complexes and chemistry of organometallic compounds. Prereq: Chem 803 or permission. 3 cr.

Organic Chemistry

755. ADVANCED ORGANIC CHEMISTRY
Methods of synthesis and determination of structure, including stereochemistry of complex organic compounds. 3 cr.

756. ADVANCED ORGANIC CHEMISTRY LABORATORY
Synthesis and structural determination of complex organic compounds, techniques for the separation, determination of purity, and identification of compounds by spectroscopic and chemical means. 2 cr.

801. THEORETICAL ORGANIC CHEMISTRY I
Discussion of theoretical and experimental methods used in study of reaction mechanisms and molecular stereochemistry. 4 cr.

802. THEORETICAL ORGANIC CHEMISTRY II
A continuation of Chem 801. 3 cr.

811. SYNTHETIC ORGANIC CHEMISTRY I
Advanced synthetic methods for preparing organic molecules. Prereq: permission. 3 cr.

812. SYNTHETIC ORGANIC CHEMISTRY II
A continuation of Chem 811. Prereq: permission. 3 cr.

817, 818. SPECIAL TOPICS IN ORGANIC CHEMISTRY
Specialized courses for the advanced student. Topics may include reaction mechanisms, stereochemistry, spectroscopy, molecular biochemistry, steroids, and organic sulfur compounds. 2 or 3 cr.

Physical Chemistry

776. PHYSICAL CHEMISTRY III
Quantum theory; spectroscopy; chemical bonding; statistical thermodynamics. Prereq: physical chemistry. Lab. 4 cr.

778. CHEMISTRY OF LARGE MOLECULES
Basic chemistry of high-molecular-weight compounds, including synthetic polymers and substances occurring in living systems. Elementary aspects of the structures, syntheses, and properties of large molecules, and their roles in modern science, technology, and living systems. Prereq: one semester of organic chemistry. 4 cr.

805. ADVANCED PHYSICAL CHEMISTRY I
An introduction to topics in quantum mechanics and group theory, which form the background of all areas of modern chemistry. 4 cr.

806. ADVANCED PHYSICAL CHEMISTRY II
Wave mechanics and quantum chemistry, spectroscopy, molecular structure; statistical thermodynamics, kinetics, and mechanism. Prereq: one year of physical chemistry. 3 cr.

821. PHYSICAL CHEMISTRY—CHEMICAL KINETICS
The kinetics of homogeneous and heterogeneous reactions in gaseous and liquid systems, including an introduction to very rapid reactions. Prereq: one year of physical chemistry. 3 cr.

822. PHYSICAL CHEMISTRY—CHEMICAL THERMODYNAMICS
The foundations and interrelationships of the laws of thermodynamics. The methods by which the theoretical principles may be applied to practical problems. 3 cr.

826. NUCLEAR AND RADIOCHEMISTRY
Nuclear structure and reactions, particle accelerators, radioactive decay, detection of particles, and the interaction of particles with matter. Application of radiochemistry to chemical systems and research. May be offered as a tutorial. 3 cr. (Not offered every year.)

827, 828. THEORETICAL CHEMISTRY I, II
The modern concepts and mathematical formalism of quantum mechanics and applications to electronic structures of atoms and molecules, spectroscopy, and the solid state. May be offered as a tutorial. 3 cr. (Not offered every year.)
829. THEORETICAL CHEMISTRY III
Statistical mechanics with applications to thermodynamics of nond ideal systems, intermolecular forces, and chemical kinetics. May be offered as a tutorial. Prereq: permission. 3 cr. (Not offered every year.)

General Offerings
Courses in which all areas of specialization participate.

708. RESEARCH TECHNIQUES
Lectures and laboratory to show experimental methods and interpretation of results. Topics include chromatography, data handling, nuclear magnetic resonance, mass spectrometry, elementary electronics, infrared and ultraviolet spectroscopy, experimental design, and x-ray. 1-4 cr.

807. INTRODUCTION TO RESEARCH
A course to introduce the Doctor of Philosophy student to the planning, experimental methods, and interpretation of a research problem. Student presents and defends an original research proposal before a faculty committee. Must be completed satisfactorily by all doctoral students. Cannot be used for credit by Master of Science candidates. 2 cr.

895, 896. COLLOQUIUM IN CHEMISTRY
A) Inorganic Chemistry; B) Organic Chemistry; C) Theoretical Organic Chemistry; D) Physical Chemistry; E) Analytical Chemistry. 1-4 cr. Sections of the course may be taken to a total of 12 cr.

897, 898. SEMINAR
Presentation and discussion of recent investigations in chemistry. 1 cr. Cr/F.

899. THESIS—PROBLEMS IN CHEMISTRY
Conferences, library, and experimental work in some field of chemistry. Variable credit; 6 credits required.

999. DOCTORAL RESEARCH

Civil Engineering (Ci E)

Chairperson: Paul J. Ossenbruggen

PROFESSORS: Paul L. Bishop; Otis J. Sproul; Tung-Ming Wang

ASSOCIATE PROFESSORS: Pedro A. DeAlba; Charles H. Goodspeed; David L. Gress; Louis H. Klotz; Paul J. Ossenbruggen

ASSISTANT PROFESSORS: Thomas P. Ballesteros; Robert M. Henry; Nancy E. Kinne; Windsor Sung

GRADUATE PROGRAM COORDINATOR: Charles H. Goodspeed

The Department of Civil Engineering offers the master's degree in civil engineering with the following areas of specialization: structural, materials, and geotechnical engineering; environmental engineering; and ocean and coastal engineering.

A student admitted to graduate study in civil engineering must have completed a baccalaureate degree in engineering, mathematics, or science at an accredited college or university. If coursework or laboratory experience is deficient, the student will be required to fulfill, without graduate credit, all undergraduate prerequisites for graduate courses. In some cases the student's adviser may require additional undergraduate courses in order to achieve a well-integrated program of study.

Each entering graduate student is assigned an academic adviser who will assist the student in planning a program of study. The adviser will also assist the student in selecting a graduate advisory committee normally composed of at least two civil engineering faculty members and one non—civil engineering faculty member. The graduate advisory committee provides guidance to the student in course selection and thesis or project research, and evaluates the student's overall progress.

A student in the master's program has the option of electing either a thesis (minimum of 25 course credits and 6 thesis credits) or nonthesis (minimum of 31 course credits and a zero-credit research project) option. There are no course requirements for either option; a minimum number of course credits is specified. Candidates electing the thesis option are required to submit a copy of their thesis, prepared in accordance with the Graduate School's Thesis and Dissertation Manual. A formal oral presentation/thesis defense is also required.

Candidates electing the nonthesis option are required to prepare a noncredit project paper and give a final oral presentation/project defense. In addition to the paper, the candidate must pass a departmental comprehensive examination on fundamental engineering concepts prepared and evaluated by the candidate's advisory committee. Project paper preparation guidelines are available in the departmental office.

A B average must be achieved for graduation. All students are required to register for Civil Engineering Seminar (CI E 800) for a minimum of one semester.

An Engineering Ph.D. Program is also available. For details, refer to the section entitled Engineering Ph.D. Program.

Areas of Interest
The faculty of the civil engineering department has research interests in the following areas. Students in the M.S. in civil engineering or the Engineering Ph.D. Program may select courses and research topics in these areas.

Environmental Engineering: Areas of interest include water and wastewater treatment; treatment of industrial wastes, such as those from tanneries, paper mills, metal finishers, and lithographers; treatment of hazardous wastes; dynamic control of the coagulation process in water treatment; marine pollution control; aquatic chemistry of metals; pathogen survival during sludge composting; and groundwater pollution.

Ocean and Coastal Engineering: Areas of research include the design and analysis of offshore structures; soil-foundation interaction of offshore structures; estuarine circulation; sediment transport processes; and dynamic responses of coastal and ocean structures.

Structural, Materials, and Geotechnical Engineering: Topics of interest include fabric identification in sands by acoustic methods; pile behavior under earthquake loading; influence of aggregate gradation on controlling the water-cement ratio of Portland cement, concrete while maintaining work-
ability, and internally sealed concrete; coupled,
twisting-bending vibrations of continuous curved
beams; effects of rotary inertia and shear on mul-
tispan curved frames; vibrations of cable-stayed
structures; computer-aided structural planning and
design of buildings; computer graphics applications
in structural engineering; finite element analysis;
soil-structure interactions; and design investiga-
tions for the reconstruction of small/low-head, hy-
dropower facilities.

721. PAVEMENT DESIGN
Flexible and rigid pavements and bases for high-
ways, airports, and city streets; pavement selection,
construction methods, materials, specifications, and
engineering cost estimates. Prereq: soil me-
chanics. 3 cr.

722. PROPERTIES AND PRODUCTION OF
CONCRETE
Basic properties of hydraulic cements and mineral
aggregates and their interactions in the properties
of plastic and hardened concrete; modifications
through admixtures: production handling and
placement problems; specifications; quality control
and acceptance testing; lightweight, heavyweight,
and other special concretes. Prereq: engineering
materials or permission. 3 cr.

723. BITUMINOUS MATERIALS AND
MIXTURES
Considerations of major types of bituminous ma-
terials, asphalt cements, cutback asphalts, asphalt
emulsions, and tars; influence of chemical compo-
sition on physical properties; desirable aggregate
characteristics for bituminous mixtures; construc-
tion techniques; current practices for determining
optimum asphalt contents. Prereq: engineering
materials or permission. 3 cr.

731. NETWORK PLANNING AND
SCHEDULING
Application of critical path methods (CPM) and
project evaluation review technique (PERT) to the
design and control of engineering projects. Lab.
2 cr.

733. SYSTEMS ANALYSIS I
Quantitative and economic techniques for opti-
umum allocation of resources in planning and design
of engineering systems. Topics include engineering
economics, principles of optimization, and decision
analysis methods. Prereq: permission. 3 cr.

734. SYSTEMS ANALYSIS II
A continuation of Systems Analysis I. More ad-
vanced topics, including linear and nonlinear pro-
gramming, numerical methods, and linear regression
analysis. Application to the optimum design of
structures, treatment plants, and other large-scale facilities. Prereq: Civ E 733. 3 cr.

740. RURAL WASTEWATER ENGINEERING
Methods for collecting and treating wastewater in
small communities and rural areas. Biological and
physicochemical treatment systems for small com-
unities; land application; soil absorption; gray
water treatment; and septage treatment. Prereq:
intro environ pollution control. 3 cr.

741. OPEN CHANNEL FLOW
Energy and momentum principles in open channel
flow; flow resistance; channel controls and transi-
tions; unsteady open channel flows; convective and
dispersive transportation of pollutants; and basic
modeling techniques. Prereq: fluid mechanics. 3 cr.

743. ENVIRONMENTAL SAMPLING AND
ANALYSIS
Laboratory exercises in the techniques of water,
wastewater, and solid-waste sampling and analysis.
Interpretation of results from pollution surveys and
operation of pollution control facilities; statistics
of sampling and statistical evaluation of analytical
data. Prereq: gen chem. Lab. 3 cr.

744. ENVIRONMENTAL LIMNOLOGY
Biological, chemical, and physical processes that
occur in lakes and impoundments are explored and
interpreted with respect to the cultural activities of
humans. Basic concepts of lake origin, morpho-
metric and trophic status, water movement and stratification, nutrient cycling, etc. Current limnol-
ogically related problems are explored from the
environmental engineering standpoint. Term proj-
ects involving laboratory field work and readings
in the current scientific literature are required. Lab.
4 cr.

745. HYDROLOGY AND HYDRAULICS
Occurrence and physical effects of water on the
earth; meteorology, groundwater runoff and
stream-flow routing, open-channel flow, reservoirs,
control works, hydroelectric power, irrigation, drainage, and multipurpose projects. Prereq:
fluid mechanics. 3 cr.

746. WASTEWATER TREATMENT PLANT
DESIGN
Choice of treatment units. Design of the compo-
nents; preparation of a plan for a particular city
that includes a suitable combinational of the units
previously designed. Prereq: water and wastewater
engineering. 3 cr.

747. INTRODUCTION TO MARINE
POLLUTION AND CONTROL
Introduction to the sources, effects, and control of
pollutants in the marine environment. Dynamic
and kinetic modeling; ocean disposal of on-shore
wastes, shipboard wastes, solid wastes, dredge
spoils, and radioactive wastes; and oil spills.
Prereq: water and wastewater engineering or per-
mission. 3 cr.

748. SOLID WASTE MANAGEMENT
Basic methods and theories of solid waste manage-
ment systems, including collection and disposal
methods. Incineration, sanitary landfill design, etc.;
resource recovery techniques; hazardous waste
management. Prereq: intro environ. pollution con-
rol or permission. 3 cr.

749. WATER CHEMISTRY
Application of chemical principles to interpretation
of water quality criteria and parameters; use of
chemistry in water and wastewater treatment. The-
ory, applications, and calculations of ionic equilib-
rium stressed. Acid-base, hydrolysis, complexation,
precipitation/dissolution, and redox equilibria; ap-
PLICABILITY OF RESULTS AND KINETIC PRINCIPLES TO NA-
TURAL WATER CHEMISTRY. Prereq: general chem or
equivalent. 3 cr.

751. TRANSPORTATION PLANNING
Transportation demand forecasting techniques ap-
plied to regional and urban situations. Calibration
and use of mathematical models for forecasting land use, trip generation, trip distribution, modal choice, and trip assignment. Prereq: probability and /or statistics. 3 cr.

757. COASTAL ENGINEERING AND PROCESSES
Introduction to small amplitude and finite amplitude wave theories. Wave forecasting by significant wave and wave spectrum methods. Coastal processes and shoreline protection. Wave forces and wave-structure interaction. Introduction to mathematical and physical modeling. Prereq: fluid mechanics or permission. (Also offered as ME 757.) 3 cr.

763. ADVANCED SOIL MECHANICS I
Current methods of determining soil strength and compressibility. Application to earth pressure, bearing capacity, slope stability and settlement problems. Prereq: soil mech. 3 cr.

765. FOUNDATION ENGINEERING
Subsurface investigation, excavation problems. Selection of foundation type. Design of footings, rafts, pile foundations, bulkhead walls. Prereq: soil mech or permission. 3 cr.

766. GEOLOGICAL ENGINEERING
The influence of geology in the design of foundations, underground excavations, tunnels, dams, and highways. Includes engineering properties of rocks, rock mechanics, and tunneling. Prereq: soil mechanics or permission. 3 cr.

768. SEEPAGE ANALYSIS AND EARTH DAM DESIGN
Groundwater flow, Darcy's law, flow nets, analytical techniques, Dupuit's theory, confined flow, flow through earth and rock structures, seepage toward wells, and earth dam design. Prereq: fluid mechanics and soil mechanics. 3 cr.

782. TIMBER DESIGN
Properties and characteristics of structural woods, method of woods, connection methods, design of timber members, and connections in beams, columns, and trusses, and glued laminates of wood. Prereq: structural design concepts; permission. 3 cr.

784. STRUCTURAL ANALYSIS BY MATRIX AND NUMERICAL METHODS
Unified course of basic structural analysis theories; matrix and numerical methods of analysis, and their application by linear graph concepts using computers. Prereq: indeterminate structures. 3 cr.

785. INTRODUCTION TO STRUCTURAL VIBRATIONS

786. FINITE ELEMENT APPLICATIONS FOR SOLID MECHANICS
Introductory course in the use of finite element methods for solution of various solid mechanics problems. Topics include basic matrix theory, direct stiffness method of structural analysis, development of finite element theory and modeling engineering problems with finite element modules. Prereq: intro to computer programming, indeterminate structures, or permission. 3 cr.

791. PRESTRESSED CONCRETE
Design of prestressed and post-tensioned concrete sections in flexure and shear. Prestressing systems and ultimate strength methods will be introduced. Prereq: Ci E 793 or permission. 3 cr.

793. STRUCTURAL DESIGN IN STEEL
The design of members and connections: tension and compression members, beams, plate girders, riveted, bolted, and welded joints. Introduction to Plastic design of beams and frames. Prereq: structural analysis or permission. 4 cr.

794. REINFORCED CONCRETE DESIGN
The design of reinforced concrete members by Strength Design Theory including beams, columns, beam-columns, and slabs for strength and deformations. Prereq: structural analysis or permission. 4 cr.

795, 796. INDEPENDENT STUDY
A limited number of qualified graduate students will be permitted to pursue independent studies under faculty guidance.

800. CIVIL ENGINEERING SEMINAR
Topics of interest to graduate students and staff; reports of research ideas, progress, and results; invited lectures by outside speakers. Continuing course: instructor may assign "IA" grade at the end of one semester. 1 cr.

822. HIGHWAY AND AIRPORT ENGINEERING
Design of flexible and rigid pavements and bases for highways, airports, and city streets; pavement selection, construction methods, materials, specifications, and engineering cost estimates. Prereq: Ci E 721. 2-4 cr.

849. CHEMISTRY OF NATURAL WATERS
Application of chemical principles to limnology, chemical oceanography, and environmental geochemistry. Standard equilibrium treatment and kinetic constraints and the importance of interfaces; microbial activity and fluid mechanics in the cycling of chemical elements. Prereq: Ci E 749 or equivalent. 4 cr.

855. MICROBIOLOGY OF WASTEWATER TREATMENT
Detailed study of the microbiological aspects of wastewater treatment and the techniques used in the biological testing of water and wastewater. Prereq: water and wastewater engineering; general microbiology; /or permission. Lab. 4 cr.

856. INDUSTRIAL WASTEWATER TREATMENT
Detailed consideration of the origin, characteristics, and treatment of industrial wastewater; the theory and application of unit operations unique to the treatment and disposal of industrial wastes. Prereq: water and wastewater engineering. 4 cr.

857. ADVANCED WASTEWATER TREATMENT
Theory, application, and evaluation of new processes and developing techniques in water and wastewater reclamation and reuse. Prereq: Ci E 746. 4 cr.
858. ADVANCED WASTEWATER SYSTEMS DESIGN
A normal design to solve a practical problem in wastewater treatment; field data will be gathered, a laboratory-scale unit run, and a design submitted based upon the experimental findings. Prereq: CI E 746; CI E 856. Lab. 4 cr.

859. ADVANCED WATER TREATMENT THEORY AND PRACTICE
Current water treatment processes and pertinent articles will be critically assessed and discussed. The state of adsorption equilibria modeling and its application to coagulation, filtration, and column adsorption. Limitations of chemical equilibrium models in treatment. Prereq: CI E 749; permission. 3 cr.

864. THEORETICAL SOIL MECHANICS
Theories and numerical methods for stress analysis, subgrade reaction, and laterally loaded piles. Constitutive laws in linear elasticity, perfect plasticity, and visco-elasticity. Finite element methods in continuum soil mechanics. Limit analysis and plasticity theory in soil mechanics. Prereq: CI E 763, CI E 786 or permission. 3 cr.

865. SOIL STABILIZATION AND SITE IMPROVEMENT
Techniques for improving support characteristics of soils for civil engineering structures, Compaction, admixtures, precompression, landfills. Prereq: CI E 763; CI E 765, or permission. 3 cr.

866. SOIL TESTING FOR ENGINEERING PURPOSES
Modern techniques for site investigation and measurement of soil properties in the field and laboratory; shear strength, permeability, consolidation, undisturbed sampling, classification, and in-situ stresses. Combination of lectures, laboratory and field trips. Prereq: CI E 763 or equivalent. 2-4 cr.

867. SOIL DYNAMICS
Vibrations of elementary systems, wave propagation, elastic waves in layered systems, behavior of dynamically loaded soils, vibrations of foundations, isolation of footings, field measurements and instrumentation, design procedures for dynamically loaded foundations. Prereq: CI E 763; G E 763 or permission. 3 cr.

868. OFFSHORE GEOTECHNICAL PROBLEMS
Techniques for sampling and testing of marine soils; design of offshore foundations. Stability problems under wave and earthquake loading. Prereq: CI E 763; CI E 765 or permission. 3 cr.

881. ADVANCED STRUCTURAL ANALYSIS I
Advanced structural theory and analysis with computer applications, including multistory structures, beam columns, frames with variable moment of inertia, continuous trusses and bents, arches and curved frames. 4 cr.

882. ADVANCED STRUCTURAL ANALYSIS II
Methods of calculating stresses and deformations in plates and shells used in engineering structures. Bending of circular and rectangular plates. Membrane and flexural analysis of shells of revolution with application in the design of domes, pressure vessel tanks, and shell roofs. 4 cr.

883. STRUCTURAL STABILITY
Study of the elastic and inelastic buckling behavior of structures. Topics include: stability of columns, mathematical treatment of buckling problems and buckling criteria, lateral stability of beams, buckling of trusses and framed structures, and stability of rings and curved beams. 4 cr.

884. DYNAMICS OF STRUCTURES
Analysis of structures subjected to dynamic loadings. Free and forced vibrations with one- and multi-degrees of freedom. Vibrations of curved beams, multistory frames, and plate structures. Prereq: CI E 785 or permission. 4 cr.

885. APPLICATION OF SYSTEM THEORY TO STRUCTURAL ANALYSIS
Comprehensive development of the stiffness matrix of structures. Intuitive concepts of topology and linear graphs and their application to structural frameworks. Analysis of structures using linear graphs. 4 cr.

887. APPLICATION OF LINEAR GRAPHS TO CIVIL ENGINEERING
Concepts of topology and linear graphs and their application to civil engineering planning of transportation, water and sewage distribution, and other networks. Network planning and management systems, including Project Evaluation Review Technique (PERT), Critical Path Methods (CPM), and PERT/cost procedures. 4 cr.

890. TOPICS IN STRUCTURES
Studies of topics of special interest and need of the student in structural design, analysis, and optimization. 2-4 cr.

895, 896. CIVIL ENGINEERING PROBLEMS
The study and investigation of problems selected to meet the needs of the students. 2-4 cr.

899. MASTER'S THESIS
6-9 cr.

Communication Disorders (Comm)

Chairperson: F. Harry Tokay

ASSOCIATE PROFESSORS: Frederick C. Lewis; Frederick P. Murray; F. Harry Tokay

ASSISTANT PROFESSOR: Mary A. Records

Program Objectives: Students are prepared to function independently as clinicians within the field of communication disorders and to meet the academic and practicum requirements for the Certificate of Clinical Competence of the American Speech, Language, and Hearing Association in the area of speech pathology.

Admission Procedures: Before considering a graduate application, the Communication Disorders Program must have received: application, transcripts of previous academic work, three letters of recommendation, and the Graduate Record Examination aptitude test or Miller Analogy scores.
Major Curriculum
Applicants are expected to have a baccalaureate degree in communication disorders. The program is designed for part-time students; courses are offered in the evening and, on a concentrated basis, during the summer.

Required Courses: The following courses are required as part of the program: 706, Stuttering; 801, Articulation Disorders; 803, Organic Pathologies in Children; 804, Neuropathologies of Speech and Language; 806, Voice Disorders; 812, Diagnosis and Remediation of Language Disorders; 881, Research Methodology.

Electives: The following courses may be taken to supplement required courses to satisfy minimum credit hours and to accomplish academic requirements for certification by the American Speech, Language, and Hearing Association: 701, American Sign Language II; 702, American Sign Language III; 704, Basic Audiology; 705, Introduction to Auditory Perception and Aural Rehabilitation; 780, Seminar in Diagnosis of Speech and Language Disorders; 810, Clinical Practicum; 816, Advanced Clinical Audiology; 820, Graduate Seminar; 895, Special Topics in Communication Disorders; 899, Thesis.

Clinical Practicum: Up to six credits may be completed in practicum registration. The specific number of credits needed by a student will depend on undergraduate program and experience. Students are scheduled for three hours per week of direct client contact for each credit of practicum registration, and will be helped to gain the practicum requirements for certification by the American Speech, Language, and Hearing Association.

Written Examination: All students must pass a written comprehensive examination designed to assess mastery of the conceptual and theoretical principles of communication disorders in the areas of normative processes, pathologies, and remediation.

Thesis Option: Students may elect the option of writing a thesis. Such students must satisfactorily complete the course in Research Methodology and must present a proposal for acceptance. Upon completion of the research project, students must defend their theses in an oral examination and must gain approval of their theses committees. Six credits will be awarded for satisfactory completion of a thesis.

701. AMERICAN SIGN LANGUAGE II
Advanced phonology, syntax, and semantics of American Sign Language. Emphasis on grammatical processes that modulate meanings of signs in discourse and development of receptive language skills. Prereq: American Sign Language I; permission. 2 cr.

702. AMERICAN SIGN LANGUAGE III
Emphasis on the advanced linguistic principles of American Sign Language, including idioms, slang, and their place in the communication patterns of the deaf. Improvement of speed and accuracy in receptive and expressive skills for communicating with the deaf. Educational and vocational problems associated with deafness. Prereq: Comm 701; permission. 2 cr.

704. BASIC AUDIOLOGY
Normal hearing process and pathologies of the auditory system. Hearing screening, pure-tone testing, and speech audiometry. Prereq: anatomy and physiology of speech and hearing mechanisms or permission. 4 cr.

705. INTRODUCTION TO AUDITORY PERCEPTION AND AURAL REHABILITATION
Research, testing, and clinical procedures of auditory perception, applied to the communicatively impaired. Prereq: Comm 704; permission. 4 cr.

706. STUTTERING
Theoretical and therapeutic considerations of the stuttering syndrome; emphasis upon clinical management. Prereq: speech pathology II or permission. 4 cr.

780. SEMINAR IN DIAGNOSIS OF SPEECH AND LANGUAGE DISORDERS
Principles and practice for diagnosis of speech and language disorders; examination procedures and measurement techniques. Prereq: speech pathology II. 4 cr.

801. ARTICULATION DISORDERS
Phonological theories as they relate to analysis and remediation of articulation disorders. 3 cr.

803. ORGANIC PATHOLOGIES IN CHILDREN
Speech-language disorders associated with neuro-motor and oro-facial pathologies in children; etiologies; methods of evaluation and treatment. 3 cr.

804. NEUROPATHOLOGIES OF SPEECH AND LANGUAGE
Principles concerning etiologies, instruments for evaluation, classification, and methods of clinical management including the team approach to rehabilitation of speech and language neuropathologies. 3 cr.

806. VOICE DISORDERS
Types, causes, and characteristics of functional and organic voice disorders. Specific evaluation of deviant vocal characteristics; treatment techniques for children and adults. 3 cr.

810. CLINICAL PRACTICUM
Practicum provides graduate student opportunity to apply advanced theoretical knowledge in clinical setting with speech, language, and hearing-impaired individuals. Diagnostic and therapy experience is supervised. Prereq: permission. (May be repeated up to 6 credits.) 1-6 cr.

812. DIAGNOSIS AND REMEDIATION OF LANGUAGE DISORDERS
Current diagnostic procedures and remediation techniques to evaluate and treat language disorders. 3 cr.

814. PEDIATRIC AUDIOLOGY
Auditory disorders in children, comprehensive diagnostic evaluations, current state of the art in hearing aids and amplification for children, and theoretical and clinical habilitation/rehabilitation of hearing-impaired children. 3 cr.
816. ADVANCED CLINICAL AUDIOLOGY
Advanced clinical testing for identification of organic and nonorganic hearing disorders; instrumentation and calibration procedures; ISO and ANSI standards. 3 cr.

820. GRADUATE SEMINAR
Current topics, recent investigations, and library research. (May be repeated up to 9 credits barring duplication of subject matter.) 3 cr.

895. SPECIAL TOPICS IN COMMUNICATION DISORDERS
Advanced study in specific areas; will involve an independent project. Prereq: permission. (May be repeated.) 1-3 cr.

899. MASTER'S THESIS
Prereq: permission. 6 cr.

Computer Science (C S)

Chairperson: R. Daniel Bergeron

PROFESSOR: Shan S. Kuo
ASSOCIATE PROFESSORS: R. Daniel Bergeron; Eugene C. Freuder; Robert D. Russell
ASSISTANT PROFESSORS: Helen M. Gigley; James L. Weiner
ADJUNCT ASSISTANT PROFESSOR: Sylvia Weber Russell
GRADUATE PROGRAM COORDINATOR: R. Daniel Bergeron

Master of Science in Computer Science

Admission Requirements: High-level language programming, assembler language programming, data structures, operating system fundamentals and programming language concepts. Further experience in computer science, mathematics, and/or electrical engineering will also be expected. All applicants must submit aptitude scores from the Graduate Record Examination. The advanced GRE in computer science is recommended.

Degree Requirements: The student may choose to follow a depth-oriented program with a thesis or a breadth-oriented program without a thesis. Both options require the completion of CS 801-802 and CS 800 (a one-credit graduate seminar). The thesis option requires six additional courses above the 700 level (three must be above 802), plus six credits of thesis work. The nonthesis option requires eight additional courses above the 700 level (four must be above 802), plus comprehensive examinations covering the two broad areas: systems and theory.

A maximum of three courses numbered 700 to 799 may be applied to the master of science degree in computer science.

710. ADVANCED SYSTEMS PROGRAMMING
Topics in systems programming, including organization and implementation of assemblers, linkage editors, job schedulers, command language decoders. File systems, protection, security, performance evaluation, and measurement. Prereq: operating system fundamentals and assembler-language programming. 4 cr.

712. COMPILER DESIGN
Formal languages and formal techniques for syntax analysis and parsing; organization of the compiler and its data structures; problems represented by error recovery and code generation. Classical top-down and bottom-up techniques currently in widespread use, general discussion of LL (k) and LR (k) parsers; automatic methods of compiler generation and compiler compilers. Students required to define a simple, nontrivial programming language and to design and implement its compiler. Prereq: prog lang concepts and features. 4 cr.

713. COMPUTER GRAPHICS
Input-output and representation of pictures from hardware and software points of view; interactive techniques and their applications; development of an interactive graphics system. Prereq: data structures and processes; operating system fundamentals; or permission. 4 cr.

714. INTRODUCTION TO PROGRAMMING SEMANTICS
Informal, nonmathematical introduction to descriptive techniques of denotational semantics. Provides framework needed to formally describe programming languages such as PASCAL. No previous knowledge of the theory of computation or of any particular programming language is assumed. Prereq: prog lang concepts and features or permission. 4 cr.

715. INTRODUCTION TO ARTIFICIAL INTELLIGENCE
Machine intelligence, representation and control issues, search methods, problem solving, learning computer vision, natural language understanding, knowledge engineering, game playing. Heuristic programming and the LISP language. Prereq: prog lang concepts and features. 4 cr.

716. DATA BASE TECHNIQUES
Data base analysis and design. Hierarchic, network, and relational models. Data normalization, data manipulation tools, data description languages, query functions and facilities, design and translation strategies, file and index organizations, data integrity and reliability, data security techniques, distributed database systems, actual usage of selected DBMS on computers. Prereq: data structures and processes. 4 cr.

753. NUMERICAL METHODS AND COMPUTERS I
Use of scientific subroutine and plotter routine packages, floating point arithmetic, polynomial and cubic spline interpolation, implementation problems for linear and nonlinear equations, random numbers and Monte Carlo method, Romberg's method, optimization techniques. Selected algorithms programmed for computer solution. Prereq: calculus III, intro programming and FORTRAN. (Also offered as Math 753.) 4 cr.

754. NUMERICAL METHODS AND COMPUTERS II
Mathematical software. Computer solutions of differential equations, eigenvalues and eigenvectors. Prereq: diff. equations; intro to comp. programming and scientific program with FORTRAN. (Also offered as Math 754.) 4 cr.
ANALYSIS OF ALGORITHMS
Introduction to use of basic mathematics in design and analysis of computer algorithms. Topics include O notation, divide and conquer, the greedy method, dynamic programming, and NP-completeness. Prereq: mathematical proofs, data structures and processes. 4 cr.

TOPICS IN COMPUTER SCIENCE
Offered on an irregular basis with varying content. 4 cr.

The following are the basic courses for the master of science degree in computer science.

GRADUATE SEMINAR
Regularly scheduled seminars presented by outside speakers, UNH faculty and graduate students. Topics include reports of research ideas, progress and results. 1 cr. Cr/F.

FUNDAMENTALS OF COMPUTER SCIENCE PRACTICE
Fundamental elements of computer science practice, including elements of data structures, algorithms, verification, formal languages, programming languages, automata theory, and some finite mathematics. Emphasis on the interaction between theory and practice. Required of all entering graduate students; must be taken concurrently with CS 802. 3 cr.

FUNDAMENTALS OF COMPUTER SCIENCE THEORY
Fundamental elements of computer science theory, including elements of data structures, algorithms, verification, formal languages, programming languages, automata theory, and some finite mathematics. Required of all entering graduate students; must be taken concurrently with CS 801. 3 cr.

DATA BASE SYSTEMS
Access control techniques; access strategies; data base software; data base related languages; data translation techniques; recovery and restart; restructuring; concurrent access methods; very large data bases; performance and evaluation; protection and security. Prereq: C S 710 or permission. 3 cr.

SOFTWARE ENGINEERING
Design approaches, implementation methodologies, and management techniques required to develop large, reliable software systems including applications-oriented systems. Team programming projects. Prereq: C S 710 or permission. 3 cr.

ARTIFICIAL INTELLIGENCE
Current approaches to machine intelligence and the simulation of human cognitive processes, including an introduction to recursive functions and programming with the LISP language. Heuristic programming, programs for game playing and natural language understanding, elementary theory of computability. Individual computer project required. Prereq: programming experience. (Also offered as E E 833.) 3 cr.

AUTOMATA THEORY
Formal language and theoretical "machines" or automata. Formal grammars; context-dependent, context-free, and regular languages; finite state machines and regular expression recognizers; infinite state machines; Turing machines; unsolvable problems and the halting problem; linear-bounded and push-down automata; cellular and reproducing automata. Prereq: programming experience. (Also offered as E E 854.) 3 cr.

OPERATING SYSTEMS TECHNIQUES
Theoretical aspects of operating systems. Scheduling and resource allocation; deadlock; paging and segmentation; thrashing; synchronization; interprocess communication; cooperating sequential processes; protection and security; in-depth study of a complex system such as MULTICS. Prereq: C S 710 or equivalent. 3 cr.

COMPUTER NETWORKS
Distributed computer systems; techniques for connecting and controlling them. Tightly coupled systems to loosely coupled systems. Design, capabilities, and problems associated with different types of connections. Organizational possibilities for networks. Queuing theory applied to computer networks. Modelling and performance evaluation in distributed systems. Case studies of existing networks such as ARPA-NET. Prereq: E E 712 or equivalent; C S 710. 3 cr.

COMPUTATIONAL LINGUISTICS
Computational approach to the study of language. Problems in understanding and producing natural (or natural-like) language by computer and humans. Theories of parsing, meaning, knowledge representation, and communication, along with their mechanical embodiments will be studied and compared. Prereq: permission. 3 cr.

The following special topics courses are offered on an irregular basis with varying content. Students may repeat these courses with the instructor's permission.

ADVANCED TOPICS IN DATABASE SYSTEMS
3 cr.

ADVANCED TOPICS IN ARTIFICIAL INTELLIGENCE
3 cr.

ADVANCED TOPICS IN COMPUTER SCIENCE THEORY
3 cr.

ADVANCED TOPICS IN OPERATING SYSTEMS
3 cr.

ADVANCED TOPICS IN COMPUTATIONAL LINGUISTICS
3 cr.

ADVANCED TOPICS IN COMPUTER GRAPHICS
3 cr.

ADVANCED TOPICS IN COMPUTER SCIENCE
3 cr.

READING COURSE
1-6 cr.

MASTER'S THESIS
6 cr.
Earth Sciences (ESci)

Chairperson: Herbert Tischler

PROFESSORS: Franz E. Anderson; Wallace A. Bothner; Henri E. Gaudette; Francis R. Hall; Cecil J. Schnee; Herbert Tischler

ASSOCIATE PROFESSORS: Francis S. Birch; Wendell S. Brown; S. Lawrence Dingman; Theodore C. Loder III; Paul A. Mayewski

RESEARCH ASSOCIATE PROFESSOR: James D. Irish

ASSISTANT PROFESSORS: Jo Laird; Wm. Berry Lyons

ADJUNCT PROFESSOR: Robert L. Davis

GRADUATE PROGRAM COORDINATOR: Francis S. Birch

The Department of Earth Sciences offers graduate work leading to the doctor of philosophy and master of science degrees in earth sciences, with options in either geology or oceanography, and a master of science degree in hydrology.

Admission Requirements

1) Students are expected to have completed at least one year of college chemistry, physics, and calculus;

2) Students with an undergraduate equivalent to a major in geology, chemistry, physics, mathematics, engineering, or in the biological sciences will be considered;

3) All applicants must submit scores on the aptitude portion of the Graduate Record Examination. Students lacking some background in a particular area may be admitted provided they are prepared to complete courses, without graduate credit, in which they may be deficient.

The program (geology, hydrology, or oceanography) a student wishes to follow will determine the level of necessary preparation. For instance, a student with an undergraduate major in physics who wishes to change direction to marine geology would have a number of deficiencies in geology to complete besides completing the core curriculum in oceanography. However, if that student wishes to pursue a program stressing physical oceanography, fewer deficiencies would probably have to be completed. The preparation of each student will be determined prior to the beginning of the first semester in residence in order to plan the course of study.

General degree requirements for master of science and doctor of philosophy degrees

Students in both the M.S. and Ph.D. programs are required to complete the core curriculum for their respective areas.

Election of the core curriculum as well as additional courses will depend upon each individual student's specialization and/or preparation when entering the program.

Geology: This option is designed primarily for students with an undergraduate background in geology. Emphasis in this option may be placed upon: petrology-mineralogy; high temperature-isotope geochemistry; glaciology-glacial-geomorphology; geophysics; structural geology-tectonics; sedimentation—low temperature geochemistry; stratigraphy-paleontology.

The core curriculum for the option in geology normally includes: ESci 732, Geologic Mapping and Interpretation, 4 cr.; ESci 734, Applied Geo-
IGNEOUS AND METAMORPHIC PETROLOGY
The origin, formation, and geologic history of igneous and metamorphic rocks as determined from field and laboratory studies of occurrences, mineral assemblages, rock composition, and texture. Interpretation of rock and mineral compositional diagrams; application of experimental investigations. Prereq: mineralogy and petrography. Field trips. Lab. 4 cr.

732. GEOLOGIC MAPPING AND INTERPRETATION
Standard methods of geologic field mapping; interpretation of geologic maps and aerial photographs of selected areas. Course includes several one-day and long-weekend field mapping excursions to selected areas in northeastern United States. Lab fee includes transportation and housing in the field. Prereq: structural geology or permission. Lab. 4 cr.

734. APPLIED GEOPHYSICS
Gravity, magnetic, seismic, electrical, and thermal methods of investigating subsurface geology. Fieldwork and use of computers in data analysis. Prereq: one year of calculus; intro geol; one year of college physics; /or permission. Lab. 4 cr.

741. GEOCHEMISTRY
Thermodynamics applied to geologic processes; geochemical differentiation of the earth; the principles and processes that control the distribution and migration of elements in geological environments; stable and radiogenic isotopes in geologic processes. 4 cr.

752. CHEMICAL OCEANOGRAPHY
Water structure, chemical composition and equilibrium models; gas exchange; biological effects on chemistry; trace metals and analytical methods. Laboratory includes short cruise abroad RV Jere A. Chase. Prereq: permission. Lab (optional). 3 or 4 cr.

754. MODERN SEDIMENTS
Modern sediments from a process-oriented viewpoint. Emphasis on shallow-water modern marine sediments, including shelf, beach, and estuarine deposits. Animal/sediment interactions will be considered. The laboratory investigates applied techniques in modern sediment analysis. Prereq: intro to geology or oceanography or permission. 4 cr.

758. INTRODUCTION TO PHYSICAL OCEANOGRAPHY
Ocean basins; physical properties of seawater; atmosphere-ocean interaction; general ocean circulation; waves and tides; continental shelf and nearshore processes; instrumentation and methods used in ocean research. Simplified physical and mathematical models demonstrate the important concepts. Prereq: one year of calculus and college physics; intro oceanog; /or permission. Variable credit: 3 cr. without lab; 4 cr. with optional lab and field project.

759. GEOLOGICAL OCEANOGRAPHY
Major geological features and processes of the ocean floor; geological and geophysical methods; plate tectonics. Prereq: permission. 4 cr.

762. GLACIAL GEOLOGY
The glacial environment: glacier dynamics and glacial erosion and deposition. Review of world glacial stratigraphy in light of causes of glaciation and climatic change. Field trips. Prereq: intro geol; geomorphology; /or permission. Lab. 4 cr.

771. MINERAL DEPOSITS
Introduction to the processes of formation, geological characteristics, and environments of deposition of metallic mineral deposits, and a brief survey of the unique nature and importance of the mineral industries. Prereq: structural geology, petrography. 4 cr.

795. TOPICS IN EARTH SCIENCES
A) Areal Geology; B) Geochemistry; C) Geomorphology, Advanced; D) Geophysics; E) Glacial Geology, Advanced; F) Groundwater Geology; G) Historical Geology, Advanced; H) Industrial Minerals; J) Micropaleontology; K) Mineral Fuels; L) Mineralogy, Advanced; M) Optical Crystallography; N) Ore Deposits; P) Paleontology, Advanced; Q) Petrology, Advanced; R) Regional Geology; S) Sedimentation; T) Stratigraphy; U) Structural Geology, Advanced; V) Marine Geology; W) Physical Oceanography; X) History of Geology; Y) Earth Science Teaching Methods; Z) Senior Synthesis; 1) Chemical Oceanography; M) Glaciology, Advanced. Special problems by means of conferences, assigned readings, and field or laboratory work, fitted to individual needs from one of the areas listed above. 1-4 cr.

813. X-RAY CRYSTALLOGRAPHY
Theory and practice of diffraction of X rays by crystals; lattices, symmetry, and structure analysis. Prereq: mineralogy or physical chemistry or equivalent. 3 cr. (Not offered every year.)

820. ADVANCED IGNEOUS PETROLOGY
Extensive readings and discussions of original sources and recent literature with reference to classical petrologic provinces. Application of thermodynamics and phase-rule chemistry to igneous petrogenesis. Prereq: permission. 3 cr. (Not offered every year.)

821. ADVANCED METAMORPHIC PETROLOGY
Extensive readings and discussions of original sources and recent literature dealing with the facies concept, equilibrium reactions, reaction kinetics, and other chemical aspects of metamorphic petrogenesis. Prereq: permission. 3 cr. (Not offered every year.)

834. ADVANCED APPLIED GEOPHYSICS
Exploration methods including gravity, magnetics, heat flow and seismics at an advanced level. Modern methods of interpretation as well as basic physics and geological applications. Prereq: ESci 734; elementary computer programming; differential equations recommended. 3 cr. (Not offered every year.)

841. ANALYTICAL GEOCHEMISTRY
Introduction to the theory, instrumentation, and applications of analytical methods in geochemistry. Prereq: permission. 3 cr. (Not offered every year.)

842. SEDIMENTARY GEOCHEMISTRY
Chemistry of recent and ancient estuarine, marine, and lacustrine sediments, emphasizing both kinetic
and thermodynamic principles in the understanding of biogeochemical processes, authigenic mineral formation, and pore water chemistry in these environments. 3 cr. (Offered alternate years.)

843. THERMODYNAMICS IN GEOLOGY
An application of classical thermodynamics to geologic systems, emphasizing the relationships of heat, work, energy, entropy, and free energy. Prereq: one year of calculus, chemistry and physics; adequate background in geology. 3 cr. (Offered alternate years.)

845. ISO T O P E GEOLOGY
Discussion of element abundance and isotope formation; radioactive decay as applied to geologic systems, detailed investigation of K-Ar, Rb-Sr, U-Pb and Sm-Nd systems, and geologic-oceanographic applications of stable isotopes. Laboratory involves mass spectrometric and chemical techniques of isotopic analysis. Course includes the completion of a laboratory project. 4 cr.

852. ADVANCED CHEMICAL OCEANOGRAPHY
Readings on physical, chemical, and biological processes that affect the distribution of chemical components in estuaries and the open ocean. Laboratory includes projects investigating selected processes. Prereq: ESci 752; or permission. 4 cr.

856. ESTUARINE SEDIMENTATION
Sedimentary processes occurring in an estuarine environment; emphasis on fine-grained sediment transport, erosion, and deposition; factors affecting particulate matter transport and animal/sediment relations. Laboratory includes team field projects directed by graduate students. Prereq: ESci 754 or permission. Lab. 4 cr.

858. DYNAMICAL OCEANOGRAPHY
The hydrodynamics of such ocean phenomena as waves, tides, and ocean turbulence; wind-driven circulation on the continental shelf and deep ocean will be treated in detail. Prereq: ESci 758; M E 707; or permission. 4 cr. (Not offered every year.)

859. DATA ANALYSIS METHODS IN OCEAN AND EARTH SCIENCES
Methods of analysis of oceanographic, geophysical, geological, and environmental data. An introductory tutorial on important mathematical concepts precedes the development of the basics for a number of data analysis techniques: digital filtering, regression analysis, cross-spectral analysis, objective analysis, and elementary inverse theory, etc. Students use these techniques on real data. Prereq: differential equations or equivalent. 3 cr.

862. GLACIOLOGY
Physical principles controlling glacier activity and the implications of glacier activity in the context of current scientific problems. Prereq: geomorphology, glacial geology, one year of college calculus, one semester each of college physics and chemistry or permission. Lab and/or field project optional. 3-4 cr. (Offered alternate years.)

895, 896. TOPICS IN EARTH SCIENCES
Advanced work on individual or group basis under members of the graduate staff. Sections of this course are the same as those listed under ESci 795. Prereq: permission of department chairperson and staff concerned. 1-4 cr. (May be taken more than once.)

897, 898. SEMINAR IN EARTH SCIENCES
A review and discussion of recent literature in the earth sciences. Required of graduate students in earth sciences. 1-3 cr.

899. MASTER'S THESIS
6 cr.

999. DOCTORAL RESEARCH

Hydrology (Hydr)

705. PRINCIPLES OF HYDROLOGY
Physical principles important in the hydrologic cycle, including: basic equations, properties of water, movement of water in natural environments, formation of precipitation, relations between precipitation and streamflow, snow-melt, evapotranspiration, interception, infiltration, relations between groundwater and streamflow, and hydrologic aspects of water quality. Problems of measurement and aspects of statistical treatment of hydrologic data. Transportation fee. Prereq: calculus. Lab. 4 cr.

710. GROUNDWATER HYDROLOGY
Principles for fluid flow in porous media with emphasis on occurrence, location, and development of groundwater, but with consideration of groundwater as a transporting medium. Major topics include well hydraulics, regional groundwater flow, exploration techniques, and chemical quality. Laboratory exercises involve use of fluid, electrical, and digital computer models to illustrate key concepts. Prereq: Hydr 705 or permission. Lab. 4 cr.

795, 796. INDEPENDENT WORK IN HYDROLOGY
A) Hydrology; B) Chemistry of Water; C) Water Resource Management. Student may choose topic and faculty consultant. 1-4 cr.

803. ADVANCED HYDROLOGY
Application of quantitative methods to selected hydrologic problems. Critical evaluation of deterministic and stochastic models, with emphasis on conceptualizing the hydrologic problem, developing appropriate models, obtaining solutions, and evaluating models and solutions in terms of basic assumptions, data requirements, and verification of results. Prereq: Hydr 705; computer methods; basic statistics. 3 cr.

804. WATER QUALITY CONCEPTS AND MODELING
Principles of chemical transport in fresh water and experience in modeling selected systems. Combination of literature review and application of existing models. Topics include the movement of: phosphorus in lakes; oxygen and dyes in streams; and selected substances in ground water. Term project to be selected and implemented by each student. Prereq: physical chemistry, geochemistry, or soil chemistry or equivalent; computer methods; hydrology or limnology; or permission. 3 cr.

808. WATER RESOURCE MANAGEMENT
Hydrologic and statistical aspects of water resource management; nature of water resource problems and application of models in their solution; geo-
graphical aspects of water-resource problems in the U.S.; economic, social, institutional, and environmental aspects of water resource problems. Prereq: Hydr 705; basic statistics; or permission. 4 cr.

Economics (Econ)

Program Director: Marc W. Herold

PROFESSORS: Robert F. Barlow; Manley R. Irwin; John J. Korbel; Sam Rosen; Kenneth J. Rothwell; Dwayne E. Wrightsman

ASSOCIATE PROFESSORS: Allan J. Bratt; Richard W. England; Marc W. Herold; Richard W. Hurd; Richard L. Mills; Robert C. Puth; Evangelos O. Simos; Allen K. Thompson

ASSISTANT PROFESSORS: Michael A. Conte; Marilyn B. Power

Whittmore School of Business and Economics

The economics faculty of the Whittmore School, together with the resource economics faculty, offers a program leading to the degree of doctor of philosophy. In addition, the economics faculty offers a plan of study culminating in the degree of master of arts.

Admission to both programs is open to students whose undergraduate work shows evidence of superior ability and motivation and who manifest promise of serious scholarship. Normally, the appropriate undergraduate preparation will include exposure to economic reasoning and methodology, including mathematics and statistics. Those who warrant special consideration, even though their backgrounds are deficient, should be aware that remedial work may be required.

Admission requirements in addition to those established by the Graduate School include the Graduate Record Examinations (aptitude and advanced test in economics).

Doctor of Philosophy Degree

Ph.D. candidacy requires written evidence of proficiency in economic theory, the history of economic thought and methodology, and quantitative methods, as well as successful completion of two advanced courses and two research workshops (4 credits each) and demonstrated knowledge of one foreign language. At present, workshops exist in finance, political economy, labor economics, econometrics, international development, resource economics, and macroeconomics.

Information about fields available for the dissertation as well as other details of the doctoral program can be obtained from the director of economic studies.

Master of Arts Degree

The candidate for a master's degree may take a general course of study or the thesis option. The general requirements of the Graduate School and the following major requirements must be met:

1) 32 semester hours of graduate study, which may include 8 hours of thesis work;
2) Minimum of 24 semester hours in courses numbered 700 and above and at least 12 hours in courses numbered 800 and above apart from Econ 899, Master's Thesis;
3) Minimum of 8 semester hours in approved courses numbered 600 and above taken in related disciplines;
4) Written evidence of proficiency in economic theory;
5) Successful completion of an 800-level course in areas of history of economic thought and quantitative economics.

711. ECONOMIC FLUCTUATIONS

Recurrent movements of prosperity and depression; emphasis on causes and public-policy implications. Prereq: intermed macro or permission. 4 cr.

715. MARXIAN ECONOMIC ANALYSIS

Marx's analysis of capitalism within the classical and radical tradition; methodology; organization of capital; labor theory of value; accumulation of capital; growth and distribution; economic crises. Critical evaluation of Marx's analysis. Prereq: intermed micro and intermed macro; or permission. 4 cr.

720. U.S. ECONOMIC HISTORY

From colonial times to the present. Applied economic theory; economic models and interpretation of data. Influence of technology, industrialization, foreign trade, monetary factors, and government; noneconomic factors. Prereq: intermed micro and macro; or permission. 4 cr.

721. EUROPEAN ECONOMIC HISTORY

Western European and Mediterranean economies from medieval times to the Common Market. Economic models and interpretation of data. Capital accumulation, technology, trade, industrialization, monetary factors, and the role of government; relevant noneconomic factors. Prereq: intermed micro or macro; or permission. 4 cr.

727. ADVANCED ECONOMETRICS

Provides familiarity with standard proofs and propositions of theoretical econometrics and develops competence in the application of relatively advanced econometric techniques. Use of computer required. Prereq: permission. 4 cr.

735. ECONOMICS OF FINANCIAL MARKETS

Economic analysis of financial market systems. Topics include financial market functions, theories of saving and investment, financial intermediation, flow-of-funds analysis, loanable funds theory, interest rate forecasting, portfolio theory, capital-asset pricing models, structure of interest rates (including term-structure theory), and macroeconomic models of the financial sector. Prereq: money and banking or permission. 4 cr.

736. SEMINAR IN MONETARY THEORY AND POLICY

Contemporary developments in monetary theory and the evaluation of policy measures. Prereq: money and banking or permission. 4 cr.

741. SEMINAR IN PUBLIC FINANCE—THEORY AND POLICY

Selected topics in contemporary theoretical and policy problems of public finance. Prereq: public finance or permission. 4 cr.

745. INTERNATIONAL TRADE

Contemporary issues in international economic theory and policy. Analysis of trade theory, dynamics of world trade and exchange, and international
4. INTERNATIONAL FINANCE
International monetary mechanism; balance of payments, international investment, exchange rates, adjustment systems, international liquidity, foreign aid, multinational corporations. Prereq: prin of econ. 4 cr.

4. MULTINATIONAL ENTERPRISES
The internationalization of economies. Growth and implications of the multinational corporation at the level of systems. Theories of imperialism, international unity/invasion; theories of direct investment; the exercise of influence and conflict, technology transfer, bargaining with host country; effects on U.S. economy. Prereq: permission. 4 cr.

4. GOVERNMENT REGULATION OF BUSINESS
Analysis of government policy with reference to such problems as conspiracy, monopoly, mergers, unfair practices, discrimination; legal and economic appraisal of government policy alternatives. Prereq: govt reg of busi or permission. 4 cr.

4. TECHNOLOGY, INFORMATION, AND PUBLIC POLICY
The U.S. as a post-industrial economy. Impact of microelectronics on manufacturing, distribution, employment, and competition; domestic and international policy implications of information transfer. 4 cr.

4. COLLECTIVE BARGAINING
Historical development of the U.S. labor movement and the industrial relations system. Contemporary collective bargaining issues: the role of public policy in industrial relations. 4 cr.

4. LABOR ECONOMICS
Recent developments in labor market analysis and public policies related to contemporary labor issues. Labor supply, the structure and stratification of labor markets, economic discrimination, unemployment and poverty, inflation, and wage-price controls. Prereq: labor econ or permission. 4 cr.

4. ECONOMICS OF WORK
Organization of work under capitalism. Competing management philosophies, response of workers to management practices. Satisfaction of workers with their jobs, trends in worker productivity, alternative work arrangements, and worker participation in management. Prereq: labor unions and the working class; labor econ; or permission. 4 cr.

4. LABOR MARKET MODELING
Labor supply and demand forecasting models. Demographic projections of supply. Industrial, occupational projections of demand. Simulation models for analyzing the impact of manpower and welfare programs. Use of the computer involved in doing assigned exercises, but no prior familiarity with computers is required. Prereq: permission. 4 cr.

4. SEMINAR IN ECONOMIC DEVELOPMENT
An advanced reading seminar. Topics include: Methodologies underlying economic development theory; industrialization and post-import substitu-

ation, state capitalist development, stabilization policies, appropriate technologies, the capital goods sector, agricultural modernization schemes, and attempts at transition to socialism. Prereq: permission. 4 cr.

4. CASE STUDIES IN ECONOMIC DEVELOPMENT
A) Southeast Asia; B) Cost-Benefit and Project Analysis; C) Africa; D) Latin America; E) Middle East. Problems and policies in selected countries; evaluations of national plans, programs, and projects; comparative analysis. Prereq: prin of econ or permission. 4 cr.

4. ECONOMIC PROBLEMS
Special topics; may be repeated. Prereq: permission of adviser and instructor. 2 or 4 cr.

4. MATHEMATICAL ECONOMICS
Principal mathematical techniques and their application in economics. Topics covered: matrix algebra, derivatives, unconstrained and constrained optimization, linear and nonlinear programming, game theory, elements of integral calculus. 4 cr.

4. EMPIRICAL ECONOMIC METHODS
Application of statistical and econometric methods to problems in economics. Topics covered: ordinary least squares, generalized least squares, distributed lag models, omitted variables, simultaneous equation models, two-state least squares. 4 cr.

4-5. HISTORY OF ECONOMIC THOUGHT
Development of economic thought, with emphasis on different methodological approaches and the development of theories of value and income distribution. Focus on major economic thinkers of the 18th through 20th centuries, including Smith, Ricardo, Marx, neo-classical economists, Keynes, Dobb, and Sraffa. 4 cr.

4. MACROECONOMIC THEORY
Advanced analysis of such aggregates as national income, total output, employment, and the general price level. Examination of the major aggregate models. 4 cr.

4. ECONOMIC DYNAMICS
Dynamic analysis of macro- and microeconomic models. Dynamic stability, disequilibrium dynamics, growth theory, and stochastic processes. Prereq: Econ 825, 873, and 877; or equivalent. 4 cr.

4. MICROECONOMIC THEORY
Topics in microeconomics with emphasis on recent developments in such areas as general equilibrium analysis, welfare economics, demand and production theory, and capital theory. 4 cr.

4. ECONOMICS OF CENTRALIZED AND MIXED SYSTEMS
Origins of planning; planning agriculture and industry; growth models; input-output and material balances; optimal planning; value and prices in socialist economies; economic reforms and mixed systems; theories about nature of socialist societies. Mechanisms of centralized planning in their socio-historical context. Prereq: Econ 873, Econ 877, or permission. 4 cr.
INDEPENDENT STUDY
Variable cr.

RESEARCH WORKSHOP
A) Finance; B) Political Economy; C) Labor Economics; D) Econometrics; E) Resource Economics; F) International Development; G) Macroeconomics. 2 cr./F.

MASTER'S THESIS
8 cr.

DOCTORAL RESEARCH

Education (Educ)

Chairperson: Roland B. Kimball
PROFESSORS: Michael D. Andrew; Angelo V. Boy; Donald H. Graves; Roland B. Kimball; Carleton P. Menge
ASSOCIATE PROFESSORS: Richard F. Antonak; Charles H. Ashley; Jason E. Boynton; John J. Carney; John G. Chaltas; Ellen P. Corcoran; Ann L. Diller; David D. Draves; Edward J. Dunnall; David J. Hebert; Sharon N. Otis; M. Daniel Smith; Deborah E. Stone; Dwight Webb
ASSISTANT PROFESSORS: Grant L. Gioffi; Susan D. Franzosa; Jane A. Hansen; Bruce L. Mallory; Karen A. Mazza; Richard L. Schwab; Sharon R. Vaughn; Mary Bowes Winslow
ADJUNCT PROFESSOR: Donald D. Durrell
ADJUNCT ASSOCIATE PROFESSOR: Richard H. Goodman
GRADUATE PROGRAM COORDINATOR: David D. Draves

Admission Requirements
The Department of Education welcomes applications from individuals qualified to undertake graduate study.

In addition to the materials required by the Graduate School, each application must include:
1) transcript for all undergraduate and graduate study;
2) at least three letters of recommendation from persons who can provide first hand assessment of the candidate's performance in college level courses, interpersonal strengths and weaknesses, and, when applicable, experience in positions related to the degree program to which application is made;
3) recent Graduate Record Examination aptitude test scores; and
4) a thoughtful, well-written statement of purpose for undertaking graduate study.

Consultation with a program faculty member is recommended. In all cases, the applicant's relevant experience, references, and professional goals will be considered in the admission process.

Applications to all education department programs are acted on three times per year following Graduate School application deadlines with the following exceptions: applications for full-time study in the Counseling M.Ed. and M.A. programs are acted on only in April.

Concluding Degree Experience
Candidates in a master of education program usually conclude degree work by completing one of five types of concluding experiences: 1) research thesis; 2) written comprehensive examination; 3) development of a written set of professional theses followed by an oral examination; 4) clinical experience; 5) teaching internship-related project. Students must enroll in Education 899, Master's Thesis, when the research thesis is selected. A thesis is required of all candidates for the master of arts in counseling degree.

Candidates in the master of arts in teaching program usually conclude degree work by completing a project closely related to the teaching internship.

Candidates in the Certificate of Advanced Graduate Study program in counseling usually conclude degree work by completing a written comprehensive examination or the development of a written set of professional theses followed by an oral examination. Candidates in the Certificate of Advanced Graduate Study program in educational administration and supervision must complete a significant field project and field internship in an appropriate administrative setting.

Master's Degree Programs
Graduate programs leading to the master's degree are offered in: counseling, developmental disabilities, early childhood education, educational administration and supervision, elementary education, reading, and secondary education.

Most programs are available to part-time admitted graduate students. Since not all courses are offered each semester, students should consult the current Time and Room Schedule for course offerings.

Counseling
Program Information: Angelo Boy, David Hebert, and Dwight Webb

The Counseling Program offers students a choice of either the master of arts degree or the master of education degree. Enrollment in the M.A. program is very limited because of the thesis requirement. The M.A. degree requires completion of seven core courses (28 credits), elective courses (8 credits), and the completion of a research thesis (6 credits), for a total of 42 credits. These 42 credits should be viewed as a minimum number because in many cases it is determined that the student needs additional coursework in statistics and research methodology in order to complete the thesis requirement. The master of education degree requires completion of the seven core courses (28 credits), elective courses (8 credits), and successful completion of a written comprehensive essay examination.

These programs prepare professional counselors to function in a variety of institutions, organizations, and agencies dedicated to the educational, vocational, social, and psychological development of the person, within the context of school and university settings, human service programs, human development centers, and rehabilitation agencies. Graduates of the program are engaged in providing preventive and restorative services to persons who possess normal and developmental concerns. Graduates are typically involved in the team delivery of services and work in collaboration with other human services professionals.

Core Requirements (28 credits): Edu 820, Counseling Theory and Practice; 821, Psychology of Career and Personal Development; 822, Assessment in Counseling; 823, Group Counseling; 824, Psychological Adaptation; 825 and 826, Counseling Internship.
Electives (8 credits): In consultation with the adviser, electives may be selected from graduate-level courses that are related to the behavioral sciences and offered by a department or school in the University.

Developmental Disabilities
Program Information: Richard F. Antonak, Bruce L. Mallory, M. Daniel Smith, Sharon Vaughn (Education); Ann D. Ury, (Occupational Therapy); F. Harry Tokay, (Communication Disorders)

This program prepares graduates to assume responsibility in the service delivery system for developmentally disabled citizens (i.e., mental retardation, cerebral palsy, convulsive disorders, autism, multiple handicaps), including: 1) directing the interaction of various therapies and disciplines providing service to the developmentally disabled, 2) coordinating, supervising, and administering human service programs for developmentally disabled persons, 3) planning and evaluating human service programs, and 4) maintaining and improving such programs through public relations, community awareness, and grant procurement activities.

Candidates are expected to have prior experience in one of several related professions (such as nursing, medicine, occupational therapy, communications disorders, psychology, physical therapy, social work, education) and/or a strong theoretical background in these disciplines. At present, this program is available only to part-time admitted graduate students.

Required Courses (28 credits): Educ 758, Program Development and Administration in Developmental Disabilities; Educ 883, Advanced Psychology of Human Learning; 854, Survey of Developmental Disabilities; 855, Service Delivery Systems in Developmental Disabilities; Occupational Therapy 701, Managing Resources for the Developmentally Disabled; Educ 856-857, Field Practicum and Seminar in Developmental Disabilities; and one course in the area of administration.

Electives (8 credits, minimum): elective courses may be selected, in consultation with the adviser, from the offerings of graduate departments of the University to meet individual needs and professional objectives. A maximum of eight elective credits may be earned by completing a master's research thesis (Educ 899).

Concluding Experience: Each degree candidate must pass a written comprehensive examination.

Early Childhood
Program Information: Donald Graves, Bruce L. Mallory, Deborah Stone.

The Early Childhood program primarily serves experienced child workers who wish to improve their professional competence and broaden their career options. The program prepares participants as early childhood resource specialists, competent to assume roles as master teacher, program supervisor, curriculum consultant, staff development director, parent-home educator, family agency coordinator, or community college instructor. The program emphasizes field-based experience coordinated with extensive coursework in related academic disciplines. Students enroll on either a part-time or full-time basis. During the academic year, students are responsible for staffing early learning centers in local school districts, private nursery and kindergarten programs, day care centers, development centers, and special services facilities. Candidates engage in coursework and seminars concurrent with an internship experience through study on campus two afternoons a week. They also provide workshops for staff and parent groups and carry out independent studies in areas of special interest and significance.

Core Curriculum (28 credits): Educ 841, Child Development for the Early Childhood Professional; 843, Environment for Early Childhood; 800-801, Internship and Seminar in Teaching; 846, Assessment in Early Childhood; 848, Contemporary Influences in Early Childhood; 850, Foundations of Early Childhood Education; 895, Independent Study in Education.

Electives (8 credits): Other graduate-level courses within or outside of the Department of Education are acceptable depending upon the student's background, individual goals, and adviser's approval.

Special Needs Option: Students who wish to specialize in the education and development of handicapped or exceptional children between birth and eight years may apply to the Special Needs Option. Students choosing this option will concentrate on the assessment of children with developmental disabilities or delays, the design of appropriate environments and individual programs, working with parents, and understanding the administrative and legal issues relating to young handicapped children.

Core Curriculum (34 credits): Education 841, 843, 846, 848, 800-801, (see above); and Education 760, Introduction to Young Children with Handicaps; 847, Diagnosis and Educational Planning for Young Handicapped Children; 849, Supporting Parents of Young Handicapped Children.

Electives (8 credits): Other graduate-level courses within the Early Childhood, Developmental Disabilities, and other Department of Education programs, as well as graduate-level courses from outside the department, are acceptable with permission of the student's adviser.

Concluding Experience: Degree candidates must successfully complete one of the following: comprehensive examination, research thesis, or major integrating project.

Educational Administration and Supervision
Program Information: Charles Ashley, Jason Boynton, Roland Kimball, and Mary Wimslow.

The program is designed for the experienced teacher to become qualified in the broad area of supervision and administration, grades K-12. Emphasis is on the elementary and secondary school principalship and general instructional supervision.

Core Requirements (28 credits): Educ 872, Educational Program Evaluation; 865, Educational Supervision; 853, Seminar in Curriculum Study; 861, Public School Administration; 863, Seminar in Educational Administration; 867, Legal Aspects of School Administration; and 869, Practicum in Educational Administration.

Electives (8 credits) are individually planned, with major portion selected from the following: Educ
797, Seminar in Contemporary Educational Problems; 864, Personnel and Communication in Educational Organizations; 868, Collective Bargaining in Public Education; 886, Philosophy of Education; 895, Independent Study in Education; 899, Interpersonal and Group Dynamics; Soc 740, Culture Change; Soc 770, Culture, Personality, and Society; and Soc 888, Sociology of Education: the Cultures of Poverty and Affluence.

**Concluding Experience:** 1) Comprehensive oral examination based on the thesis prepared by the candidate or 2) major research study related to school administration, curricula, or educational supervision.

**Elementary and Secondary Education**

**Program Information:** Teacher Education Committee: Michael Andrew, chairperson; Ellen Corcoran; John Chalas; Michael Maxey; Karen Mazza; Richard Schwab; and Sharon Vaughn.

The elementary and secondary education programs are designed for people who have been granted teaching certificates and who intend to become or to continue to be classroom teachers.

**Core Curriculum** (12 credits): Selections may be made from: Educ 785, Tests and Measurements; 883, Seminar in Curriculum Study; 883, Advanced Psychology of Human Learning; 884, Advanced Human Development; 886, Philosophy of Education; and Soc 838, Sociology of Education: Social Organization of Schools and Community.

**Electives** (18 credits): In consultation with and with the approval of the student's adviser, electives may be taken in specialized areas from within the Department of Education, in the student’s major field, or in some combination of the two. A student using the research thesis option of the concluding experience will normally use elective credits for Educ 881, Methods and Techniques of Educational Research and Educ 899, Master’s Thesis.

**Concluding Experience:** Degree candidates must successfully complete one of the following: theses plus oral examination, or research thesis.

**Reading**

**Program Information:** John Carney, Jane Hansen, Grant Goff. The reading program provides professional training as a teacher of reading, clinician, and consultant for individuals seeking certification as reading specialists. The program is designed to meet standards recommended by the International Reading Association for the professional training of reading personnel and certification requirements of the state of New Hampshire for reading specialists. The program trains students in the areas of elementary and secondary reading foundations, clinical competencies, consultant and supervisory skills, and research capabilities.

**Core Curriculum** (28 credits): Educ 807, Foundations of Reading Instruction; 808-809, Clinical Diagnosis and Remediation of Reading Difficulties and Disabilities; 810, Comprehensive Reading Methods in the Secondary School; 813, Field Practice; 814, Seminar in Reading. Choose one of the following: 734, Children’s Literature; 776, Reading for Children with Special Needs; 806, Approaches to Language Art Instruction; 815, Reading and the Adult Learner.

**Electives** (8 credits): The remainder of courses are selected in consultation with the adviser. They may be from the offerings of the Department of Education or reflect an interdisciplinary approach with other graduate departments at the University. A student using the research thesis option as a concluding experience will use the 8 credits for Educ 899, Master’s Thesis.

**Concluding Experience:** Degree candidates will successfully complete one of the following: written examination, theses plus oral examination, or research thesis.

**Degree Programs for Preservice Teachers:**

**Program Information:** Michael Andrew or Ellen Corcoran.

The Department of Education offers two graduate programs for prospective elementary and secondary teachers, leading to either the master of arts in teaching (M.A.T.) degree or the master of education (M.Ed.) degree. Both programs require a minimum of 30 credits and are designed for two types of students: 1) those in the Five Year, Undergraduate Remediation Program, who entered the teacher preparation program as undergraduates at UNH and have thus satisfied some of the requirements for teacher certification prior to graduate study; 2) those who have completed an undergraduate program, either at UNH or elsewhere, with little or no coursework in education. Specialization may be developed for teaching at the primary, middle, and/or high school levels. Students entering these master’s degree programs normally have completed a bachelor’s degree program with a major outside the field of education.

All professional education requirements for certification must be met either prior to or as a part of the master’s degree programs for preservice teachers. The professional requirements include: Educ 500, Exploring Teaching; 700, Educational Structure and Change; 701, Human Learning and Development; Educational Psychology; 703, Alternative Teaching Models; 705, Alternative Perspectives on the Nature of Education; and 800-801, Internship and Seminar in Teaching. Additional requirements for all prospective elementary teacher candidates include 706, Introduction to Reading Instruction in the Elementary School, and two math courses appropriate to preparation for teaching in elementary school.

All candidates who do not participate in the Live, Learn, and Teach program must complete, or have completed prior to admission, either: 1) Educ 500, Exploring Teaching, or 2) a one-semester teacher aide experience, or its equivalent, with a supportive recommendation from school staff.

The Live, Learn, and Teach program is a 10-credit, seven-week experiential summer program which may be an integral part of the master’s degree program, particularly for those students who have done no previous coursework in education. The summer program consists of Educ 831 or 835 (4 cr.), 703 (4 cr.), and 700 (2 cr.). The program also satisfies the requirement for Educ 500.
Master of Arts in Teaching (Elementary and Secondary)

The M.A.T. program is most appropriate for students who wish to do a portion of their degree coursework outside of the Department of Education, in their major teaching field or associated fields.

Professional Education Requirements (12-40 credits): Either as part of the degree program or prior to admission, these required certification courses or their equivalents must be successfully completed: Educ 300, 700, 701, 703, 705, 800, 801. (In addition, for elementary teacher certification: Educ 706 and two appropriate math courses.)

Courses Related to the Teaching Field (12 credits): These courses are to be selected in consultation with one's adviser, from departments other than the Department of Education. (For those seeking elementary teacher certification, a required mathematics course may be included.)

Electives (0-6 credits): These courses, selected in consultation with one's adviser, may be from those offered by the Department of Education or other departments.

Concluding Experience: Degree candidates must successfully complete one of the following: project, theses plus oral examination, or research thesis.

Master of Education (Elementary and Secondary)
The master of education degree for preservice teachers is designed for those students who wish to concentrate their graduate study in the Department of Education.

Professional Education Requirements (12-40 credits): Either as part of the degree program or prior to admission, these required certification courses or their equivalents must be successfully completed: Educ 300, 700, 701, 703, 705, 800, 801. (In addition, for elementary teacher certification: Educ 706 and two appropriate math courses.)

Courses for an Education Area Concentration (12 credits): In consultation with one's adviser, courses offered by the Department of Education will be selected which concentrate on some aspect of the field of education. (For those seeking elementary teacher certification, Educ 706 may be included.) Other required certification courses may not be included.

Electives (0-6 credits): These courses, selected in consultation with one's adviser, may be from those offered by the Department of Education or other departments.

Concluding Experience: Degree candidates must successfully complete one of the following: project, theses plus oral examination, or research thesis.

Special Education Certification

Program Information: Sharon Vaughn.
Preparation for Certification in General Special Education is available to those who complete M.A.T. or M.Ed. programs in either elementary or secondary education. This certification allows recipients to serve as special education resource teachers. In order to qualify for certification in General Special Education, students must complete 22 (18 of which may be used toward the M.Ed. degree, 6 toward the M.A.T. degree): Educ 750, Introduction to Exceptionality; Educ 751, Teaching Exceptional Learners; Educ 755-756, Prescriptive Teaching Process; Educ 800C, 801C, Internship and Seminar in Teaching (3 credits each for an internship in a special education resource setting).

Certificate of Advanced Graduate Study

A Certificate of Advanced Graduate Study (C.A.G.S.) is available in two programs: Counseling, and Educational Administration and Supervision.

Counseling (C.A.G.S.)

Program Information: Angelo Boy, David Hebert, Dwight Webb.
This program is designed for those who possess a master's degree in counseling or an equivalent master's degree and want to pursue further study toward the Certificate of Advanced Graduate Study. The candidate for this certificate must successfully complete 32 graduate credits beyond the master's degree.

Required Education Courses (20 credits): Educ 827, Administration of Counseling Services; 828, Advanced Counseling Theory and Practice; 829, Advanced Counseling Internship; 830, Research in Counseling; and 884, Advanced Human Development.

Electives (12 credits): In consultation with one's adviser, electives may be selected from graduate-level courses offered by the departments of education, business administration, economics, English, history, mathematics, political science, psychology, and sociology.

Concluding Experience: Degree candidates must successfully complete one of the following: written examination or written set of professional theses followed by an oral examination.

Educational Administration and Supervision (C.A.G.S.)

Program Information: Charles Ashley, Jason Boynton, Roland Kimball, and Mary Winslow.
This program is designed for those who possess a master's degree in school administration or graduate study supplemented by work experience that is equivalent to that outlined in the University of New Hampshire M.Ed. program in Educational Administration and Supervision and who wish advanced preparation for careers as school superintendents, assistant superintendents, business managers, state department of education personnel, vocational education coordinators, curriculum coordinators, or educational personnel in private organizations.

The program requires 40 credits. Courses are required in five areas of competency: institutional analysis, organizational behavior, policy analysis, managerial leadership, and instructional leadership (16-20 credits). Candidates must complete a significant field project and field internship in an appropriate administrative setting (12 credits). Elective courses compose the balance of the program (8-12 credits).
700. EDUCATIONAL STRUCTURE AND CHANGE
A) Educational Structure and Change; B) Education in America: Backgrounds, Structure, and Function; C) Governance of American Schools; D) School and Cultural Change; E) Teacher and Cultural Change; F) Social Perspectives of Conflict in the Schools; G) Nature and Processes of Change in Education; H) What Is an Elementary School? (To revisit shortly: Two- and Four-Age Systems); I) Children with Special Needs: History and Models; K) Curriculum Structure and Change; L) Stress in Educational Organizations. Organization, structure, and function of American schools; historical, political, and social perspectives; nature and processes of change in education. Two- and 4-credit courses offered each semester (listed in department prior to preregistration; refer to Time and Room Schedule). Minimum of 4 credits required for teacher certification. Prereq. for teacher certification: students: Exploring Teaching and permission, which is accomplished by signing the appropriate course roster in the Teacher Education Office. Prereq. for students not seeking teacher certification: permission, as described above. 2 or 4 cr.

701. HUMAN DEVELOPMENT AND LEARNING: EDUCATIONAL PSYCHOLOGY
A) Human Development and Learning: Educational Psychology; B) Human Development: Educational Psychology; C) Human Learning: Educational Psychology; D) Developmental Bases of Learning and Emotional Problems; E) Learning Theory, Modification of Behavior, and Classroom Management; F) Cognitive and Moral Development; G) Evaluating Classroom Learning; H) Deliberate Psychological Education; I) Sex Role, Learning, and School Achievement; J) The Development of Thinking. Child development through adolescence, learning theory, cognitive psychology, research in teaching and teacher effectiveness, and evaluation, all applied to problems of classroom and individual teaching and therapy. Full 4-credit course and 2-credit minicourses offered each semester (listed in department prior to preregistration; refer to Time and Room Schedule). Minicourses, and either one semester or two semesters (first half of second semester) or learning (second half). Candidates for teacher certification are required to have at least 2 credits of development and 2 credits of learning, or the full 4-credit course (701A). Prereq. for teacher certification: students: Exploring Teaching and permission, which is accomplished by signing the appropriate course roster in the Teacher Education Office. Prereq. for students not seeking teacher certification: permission, as described above. 2 or 4 cr.

703. ALTERNATIVE TEACHING MODELS
A) Alternative Teaching Models; B) Curriculum Planning for Teachers; C) Alternative Strategies for Mathematics; D) Curriculum Planning for Social and Goals of Social Studies: K-12; E) Social Studies Instructional Materials: K-12; F) Teaching Elementary and Middle School Science; G) Language Arts for Elementary Teachers; H) Experiential Curriculum; I) Children with Special Needs: Teaching Strategies, Basic teaching models, techniques of implementation, reteaching methods. Two- and 4-credit courses offered each semester (listed in department prior to preregistration; refer to Time and Room Schedule). Minimum of 4 credits required for teacher certification. For secondary teacher candidates, the appropriate methods course, taught in the department of the major, usually satisfies this requirement. Educ 703B is required for candidates for elementary teacher certification who do not complete 703C, D, F, or G. Prereq. for teacher certification students: Exploring Teaching and permission, which is accomplished by signing the appropriate course roster in the Teacher Education Office. Prereq. for students not seeking teacher certification: permission, as described above. 2 or 4 cr.

705. ALTERNATIVE PERSPECTIVES ON THE NATURE OF EDUCATION
A) Contemporary Educational Perspectives; B) Controversial Issues in Education; C) Ethical Issues in Education; D) Concepts of Teaching: Differing Views; E) Curriculum Theory and Development; F) Readings in Educational Perspectives; G) Philosophy of Education; I) Education as a Form of Social Control; K) Schooling and the Rights of Children; L) Education, Inequality, and the Meritocracy; M) Readings in Philosophies of Outdoor Education; N) Alternative Perspectives on the Nature of Education; O) Classrooms: The Social Context; P) Teaching: The Social Context; Q) School and Society. Students formulate, develop, and evaluate their own educational principles, standards, and priorities. Alternative philosophies of education; contemporary educational themes. Two- and 4-credit courses offered each semester (listed in department prior to preregistration; refer to Time and Room Schedule). Minimum of 4 cr. required for teacher certification. Prereq. for teacher certification: students: Exploring Teaching and permission, which is accomplished by signing the appropriate course roster in the Teacher Education Office. Prereq. for students not seeking teacher certification: permission, as described above. 2 or 4 cr.

706. INTRODUCTION TO READING INSTRUCTION IN THE ELEMENTARY SCHOOLS
Reading process; current procedures and materials: diagnostic techniques; practicum experience. Course satisfies reading requirement for prospective elementary teachers. Credit can be taken in the two-year teacher education program and may be included in the 12 required graduate credits in education at the graduate level. Course may also be taken for undergraduate credit before entrance into fifth year; in this case the course satisfies reading requirement but is not applicable toward the 12 required graduate credits. Prereq: exploring teaching. 4 cr.

707. APPROACHES TO TEACHING READING AT THE SECONDARY LEVEL
The Reading Curriculum in The Secondary School: structural components (developmental, corrective, remedial); materials and methods of instruction and appraisal; instruments of measurement and evaluation. Course satisfies reading requirement for prospective secondary teachers. Credit can be taken in the comprehensive secondary reading program. 2 cr. Teaching Reading through the Content Areas: Alternatives and Application; new approaches, concepts, and methodologies of teaching reading through content materials: workshop to develop and produce instructional strategies and materials for an integrated reading-content program. 2 cr. (Two credits of 707 may be used to satisfy 2 credits of Educ 700).
720. INTRODUCTION TO COMPUTER APPLICATIONS FOR EDUCATORS
Major issues related to classroom computer applications: historical development; computer functioning; methods of introduction, problem solving, educational software development and evaluation; conducting technological needs assessments in schools; psychological and sociological affect of the computer on children and learning. Classroom applications of programming languages BASIC and Logo and authoring language PLOT. Design and implementation of computer-assisted educational exercises. Hands-on sessions. 4 cr.

733. INTRODUCTION TO THE TEACHING OF WRITING
Development of writers, child to adult; ways to respond to writing, and the organization of the classroom for the teaching of writing. Persons taking the course will need to have access to students to carry out course requirements. Prereq: permission. 4 cr.

734. CHILDREN'S LITERATURE
Interpretive and critical study of literature for children in the elementary, middle, and junior high schools. Methods of using literature with children. 4 cr.

741. EXPLORING MATHEMATICS WITH YOUNG CHILDREN
Laboratory course for those who teach young children mathematics and who are interested in children's discovery, learning, and creative thinking; offers chance to experience exploratory activities with concrete materials, as well as mathematical investigations, on an adult level, that develop the ability to provide children a mathematically rich environment, to ask problem-posing questions, and to establish a rationale for doing so. 4 cr.

750. INTRODUCTION TO EXCEPTIONALITY
Survey of the social, psychological, and physical characteristics of exceptional individuals including: intellectual (gifted, retarded, learning disabled); sensory (visual, auditory); motor (orthopedic); health; and communication exceptionalities. Implications for educational and human service delivery. 4 cr.

751. EDUCATING EXCEPTIONAL LEARNERS
Issues in special education (labeling, mainstreaming, efficacy); techniques of special teaching (referral, assessment, observation, task analysis, profiling, selecting materials, intervention); and issues in special teaching (behavior modification, ability training). Primary application to mild and moderate exceptionalities. Co- or prereq: Educ 750 or permission. 4 cr.

752. DIAGNOSIS AND REMEDIATION OF LEARNING DISABILITIES
Terminology, etiology, common characteristics, and symptoms; theory and practice in gross-motor, visual, and auditory remediation; testing procedures used in diagnosis and remediation programs. 4 cr.

753. TEACHING CHILDREN WITH BEHAVIOR DISORDERS
Nature and scope of emotional disturbances and social maladjustments in children, including causes, characteristics, treatment implications, and educational problems. 4 cr.

755-756. DIAGNOSTIC-PRESCRIPTIVE TEACHING OF EXCEPTIONAL LEARNERS
A two-semester course to develop teacher competence to analyze learners and learning environments, specify learner characteristics, and prescribe, implement, and evaluate special educational interventions. Applications in the areas of language, mathematics, reading, science, social studies, perceptual—motor, behavioral, adaptive, and social skills. Focus on mildly and moderately handicapped children in regular class and resource room. Prereq: Education 750, and 751 or 700j, 703l, or permission. 4 cr.

758. PROGRAM DEVELOPMENT AND ADMINISTRATION IN DEVELOPMENTAL DISABILITIES
Analysis and application of techniques for program development and administration, including grantsmanship, program planning, staff supervision, program evaluation, fiscal management, and statutory issues. Focus on programs for disabled infants and adults. Prereq: permission. 4 cr.

760. INTRODUCTION TO YOUNG CHILDREN WITH HANDICAPS
The needs of children (birth to eight years) with handicaps; methods for handicaps. Strengths and special needs of handicapped children; causes, identification, and treatment; current legislation; parent and family concerns; program models. 4 cr.

763. INTRODUCTION TO EDUCATIONAL MEDIA
Educational media in the learning process; curricular integration of materials and equipment in the school library media center; design and implementation of learning systems that provide a framework for the development of individual skills. 4 cr.

764. TELEVISION AND THE YOUNG CHILD
The emergence of television as a cultural force and its effect upon the development of the young child—physically, socially, emotionally, and intellectually. Working with parents, teachers, and children to help them become better television consumers and planning alternatives for utilizing the technology of television more positively. Knowledge of some of the many research studies conducted and in process expected. 4 cr.

775. DIAGNOSTIC TEACHING OF READING
Classroom implementation of diagnosis and remediation of reading disabilities; for teachers, counselors, administrators, and other school personnel. 4 cr.

776. READING FOR CHILDREN WITH SPECIAL NEEDS
Techniques and procedures for teaching reading to children with special learning needs: the mentally retarded; learning disabled; gifted, culturally diverse. Emphasis will be placed on the implications of providing reading instruction in the least restrictive alternative. 4 cr.
785. EDUCATIONAL TESTS AND MEASUREMENTS
Theory and practice of educational evaluation; uses of test results in classroom teaching and student counseling; introductory statistical techniques. 4 cr.

797. SEMINAR IN CONTEMPORARY EDUCATIONAL PROBLEMS
Issues and problems of special contemporary significance, usually on a subject of recent special study by faculty member(s). Prereq: permission. May be repeated for different topics. 1-4 cr.

800, 801. INTERNSHIP AND SEMINAR IN TEACHING
A two-semester, full-time, supervised internship consisting of less-than-full teaching responsibility in selected educational settings and programs. Weekly seminars and occasional workshops held concurrently with internship. Admission by application. 2-6 cr.

806. APPROACHES TO LANGUAGE ART INSTRUCTION
Teaching practices in speaking, listening, writing, and reading. Language development and application to school curriculum. 4 cr.

807. FOUNDATIONS OF READING INSTRUCTION
Survey of reading process, theoretical models, and basic approaches to the teaching of reading. Emphasis on current methods, materials, and programs. 4 cr.

808-809. CLINICAL DIAGNOSIS AND REMEDIATION OF READING DIFFICULTIES AND DISABILITIES
Examination of theories and procedures for the diagnosis and remediation of moderate to severe disabilities in reading through case studies, discussions, demonstrations, and practice. Clinical experience each semester. Prereq: Educ 807, 810 or permission. 4 cr.

810. COMPREHENSIVE READING METHODS IN THE SECONDARY SCHOOL
The nature of the reading process, diagnostic and developmental methods and materials, study skills, and reading in the content areas at the secondary level. Designed for secondary school teachers who wish to foster continuous development of students' reading and study skills. 4 cr.

813. FIELD PRACTICUM
Field-based experience focusing on roles of the reading specialist in the school setting. Prereq: permission. 4 cr.

814. SEMINAR IN READING
Investigation of current research findings in reading and the related language arts. Seminars will focus on significant research projects, program designs, and analysis of the field of reading research and ramifications for the reading specialist. Prereq: permission. 4 cr.

815. READING AND THE ADULT LEARNER
Current practices in teaching adults to read; the reading process and adult cognitive development; development of literacy in a technological society. A major portion of the course work will involve a case study in which students will examine an extant program or develop a new course of study that addresses a particular need in adult reading education. Prereq: permission. 4 cr.

820. COUNSELING THEORY AND PRACTICE
Basic approaches to counseling are examined—their theoretical foundations, process components, goals, and outcomes. 4 cr.

821. PSYCHOLOGY OF CAREER AND PERSONAL DEVELOPMENT
Career and personal development and how each influences the other; literature and research examined to clarify application to individual and group career-counseling and to career education. 4 cr.

822. ASSESSMENT IN COUNSELING
Evaluative instruments and methods that have particular use in counseling. Systematic procedures for measuring samples of an individual's behavior and statistical concepts that underlie psychological testing. Assessment is viewed from the perspective of its use in the counseling process as well as its use in accountability. 4 cr.

823. GROUP COUNSELING
Theoretical and applied dimensions of the group counseling process. Class may include laboratory experience to examine one's interactive behavior as a group member and leader. Prereq: Educ 820; permission. 4 cr.

824. PSYCHOLOGICAL STRESS AND ADAPTATION
Problems in stress that are significant for human adaptation. Behavior patterns which pose the most common problems encountered by contemporary counselors are reviewed, with emphasis upon the concepts and processes of adaptation. 4 cr.

825. COUNSELING INTERNSHIP I
Introductory supervised field experience focusing on the integration of counseling theory and practice, including laboratory microcounseling and seminars in contemporary professional issues. Interns select an approved field placement reflecting their professional interests. Prereq: permission. 4 cr.

826. COUNSELING INTERNSHIP II
Supervised counseling at approved field site. Opportunities also provided for involvement in consultative, evaluative, and other organizational procedures. Focus is on critiques of audio/video samplings of intern's counseling. Prereq: permission. 4 cr.

827. ADMINISTRATION OF COUNSELING SERVICES
Organizational patterns and administrative procedures that influence the effectiveness of counseling services. Emphasis upon staff development, accountability, professional issues, and productive supervisory behaviors. Prereq: permission. 4 cr.

828. ADVANCED COUNSELING THEORY AND PRACTICE
Detailed analysis of the counseling relationship: its characteristics, processes, and outcomes. Prereq: permission. 4 cr.
829. **ADVANCED COUNSELING INTERNSHIP**
Supervised application of advanced counseling theory and practice in counseling relationships. Samples of the advanced counseling practices of students will be analyzed and evaluated. Open only to C.A.G.S. candidates in UNH graduate program in counseling. Prereq: Educ 828; permission. 4 cr.

830. **RESEARCH IN COUNSELING**
Research design and methodology in counseling. Students develop research projects that demonstrate knowledge of research procedures in evaluating the processes and outcomes of counseling. Prereq: permission. 4 cr.

831. **SEMINAR AND PRACTICUM IN ELEMENTARY SCHOOL TEACHING**
Supervised Practicum: Exploratory summer practicum in a local summer elementary school to examine teaching as a career and to prepare for the internship in the fall. Summer includes: 1) a pre-practicum workshop focusing on interpersonal skills development; 2) a prepracticum curriculum and instructional laboratory; 3) a six-week practicum in which candidates, with the help of the staff, serve as the teaching staff in a local summer school; 4) seminars in curriculum and instruction. Opportunities for teaching high school students are available for candidates who wish to determine better what level of teaching they prefer. Prereq: admission to the M.A.T. program or M.Ed. program for preservice teachers. 4 cr. (Summer Session only.)

835. **SEMINAR AND PRACTICUM IN SECONDARY SCHOOL TEACHING**
Supervised Practicum: An exploratory summer practicum in a local summer high school to examine teaching as a career and to prepare for the internship in the fall. Summer includes: 1) a prepracticum workshop focusing on interpersonal skills development; 2) a prepracticum curriculum and instructional laboratory; 3) a six-week practicum in which candidates, with the help of the staff, serve as the teaching staff in a local summer school; 4) seminars in curriculum and instruction. Opportunities for teaching on elementary level are available for candidates who wish to determine better what level of teaching they prefer. Prereq: admission to the M.A.T. or M.Ed. programs for preservice teachers. 4 cr. (Summer Session only.)

841. **CHILD DEVELOPMENT FOR THE EARLY CHILDHOOD PROFESSIONAL**
To understand child growth; components of the course involve students in extended contacts with significant adults related to children in an early learning environment. Includes home visits to interview parents and other caregivers and to observe the child in the family setting. Extensive readings, discussions, case study models, film viewings, and continued in-depth child study. Prereq: previous experience with young children. 4 cr.

843. **ENVIRONMENT FOR EARLY CHILDHOOD**
Examination of various environments with attention to use of time, space, and materials. Study of multiple professional roles needed in providing appropriate learning center adjustments to maximize individual child development. 4 cr.

845. **PROGRAMMING FOR SEVERELY/MULTIPLY HANDICAPPED YOUNG CHILDREN**
Information and suggestions for working with the severely and/or multiply handicapped child, ages birth to eight. Emphasis will be on individualized program planning, particularly developmental and multidisciplinary approaches. Prereq: permission. 4 cr.

846. **ASSESSMENT IN EARLY CHILDHOOD**
Study, administer, and design a range of assessment materials. Develop strategies for selection and utilization of clusters of assessment materials. Collect and organize relevant data. Prereq: Educ 841; Educ 843. 4 cr.

847. **DIAGNOSIS AND EDUCATIONAL PLANNING FOR YOUNG HANDICAPPED CHILDREN**
Focus on information and practical experiences relating to assessment and remediation of developmental handicaps in children from birth to eight years old. Formal and informal criterion-referenced assessment, individualized education plans, multidisciplinary approaches, parental roles, report writing. Prereq: Educ 760, 841, or equivalent. 4 cr.

848. **CONTEMPORARY INFLUENCES UPON EARLY CHILDHOOD EDUCATION**
Survey of contemporary models in early childhood education in this country and consideration of current issues having an influence on young children. Application of principles to individual student and specific early learning situations. Prereq: current involvement with a specific group of children. 4 cr.

849. **SUPPORTING PARENTS OF YOUNG HANDICAPPED CHILDREN**
Social, economic, and psychological consequences of raising a child with a handicapping condition. Issues will include diagnosis and prognosis for the child, parent-child attachment, and interactions with other care givers. Counseling and support techniques. 4 cr.

850. **FOUNTAIN OF EARLY CHILDHOOD EDUCATION**
Historical roots of contemporary practices. Perspective of historical precedents in content, methodology, and change. Study and review of child development, assessment, classroom environments. Prereq: Educ 841; 843; 846; and 848. 4 cr.

851. **LAWS AND REGULATIONS AFFECTING THE EDUCATION OF HANDICAPPED CHILDREN**
Analysis of current federal and state policies affecting handicapped children. Focus will be on Public Law 94-142. The role of policy making and constitutional and ethical issues will be discussed. 4 cr.

853. **SEMINAR IN CURRICULUM STUDY**

854. **SURVEY OF DEVELOPMENTAL DISABILITIES**
Mental retardation, cerebral palsy, epilepsy, autism, and related handicapping conditions; causal
861. PUBLIC SCHOOL ADMINISTRATION
Introductory course; major issues in policy making, school management, personnel, public relations, finance, and research in school administration. Prereq: teaching experience. 4 cr.

862. EDUCATIONAL FINANCE AND BUSINESS MANAGEMENT
Principles of financing education, budgetary procedures, accounting, auditing, school indebtedness, financial reporting, and business management. Handling practical school finance problems will be part of the project work. Prereq: Educ 861. 4 cr.

863. SEMINAR IN EDUCATIONAL ADMINISTRATION
Cases and concepts in educational administration. Prereq: Educ 861. 4 cr.

864. PERSONNEL AND COMMUNICATION IN EDUCATIONAL ORGANIZATIONS
Problems arising from the communications process. Implications of group problem-solving processes. Interpersonal relations and group dynamics among students, faculty, staff, administration, and the community. Application of theories. 4 cr.

865. EDUCATIONAL SUPERVISION
Theoretical foundations of supervisory behavior as a means of effecting changes in instructional practices; consideration of instruments and techniques based on those theoretical foundations; some opportunity for field projects utilizing instruments and techniques. Prereq: teaching experience. 4 cr.

866. PRACTICUM IN SUPERVISION AND CURRICULUM
Supervision of teaching and curriculum development projects in the schools. Opportunity to apply skills in supervising and curriculum development techniques. Prereq: Educ 853; Educ 865; permission. 4 cr.

867. LEGAL ASPECTS OF SCHOOL ADMINISTRATION
Relationship of law to public education. Emphasis on federal constitution, New Hampshire statutes, and case law related to public interests served by elementary and secondary education. Special topics: church-state relationship, due process, desegregation, state agencies, supervisory unions, school districts, school boards, teacher employment, negotiations, student rights, tort liability, school finance. Prereq: Educ 861; Educ 863. 4 cr.

868. COLLECTIVE BARGAINING IN PUBLIC EDUCATION
An examination of collective bargaining as practiced by school boards, administrators, and teacher organizations. Consideration will be given to collective bargaining statutes, case law, employee relations boards, unit determinations, exclusive representation, union security provisions, scope of bargaining, good faith, grievance procedures, bargaining strategies, strikes, public interest, mediation, factfinding, arbitration, and the administration of the negotiated contract. Prereq: Educ 863. 4 cr.

869. PRACTICUM IN EDUCATIONAL ADMINISTRATION
Supervised practical experience in dealing with problems in educational administration. Prereq: Educ 863. 4 cr.

870. THE CHANGE PROCESS IN EDUCATION
Role of change agent and the change process in education as related to school personnel; structural characteristics of the school culture; change theory and systems analysis techniques. Students will be required to apply some of the theories in an institutional setting. 4 cr.

871. SCHOOL PLANT PLANNING
A study will be made of the techniques and procedures involved in the long-range planning of school facilities; for example, school populations projections, characteristics of the educational program, space requirements, evaluation of existing facilities, future use of existing buildings, analysis of financial resources available, identification of reasonable alternatives, and an examination of the probable consequences of such alternatives, including educational effectiveness and tax impact. Prereq: Educ 863 or permission. 4 cr.

872. EDUCATIONAL PROGRAM EVALUATION
Selected models for educational program evaluation; rationale underlying these models examined and compared; practical applications developed. Each student will plan a complete evaluation design for an appropriate educational program. Prereq: Educ 853; Educ 861; or permission. 4 cr.

874, 875. ADMINISTRATIVE INTERNSHIP AND FIELD PROJECT
Field-based internship. Administrative experiences in one or several educational and community agencies. Participation in administrative and supervisory work of the agencies. Each intern completes a major field project requiring analysis and action
appropriate for resolution of a significant administrative problem at the internship site. Supervision by University faculty. Prereq: permission of graduate adviser. A grade of credit (CR) will be given upon successful completion of the internship and field project. 6 cr.

880. RESEARCH IN THE TEACHING OF WRITING
Review of the last 30 years of research in writing, focusing on trends in design, research procedures, the contributions of linguistics, cognitive and developmental psychology, with a view to the conduct of research by participants. Prereq: permission. 4 cr.

881. METHODS AND TECHNIQUES OF EDUCATIONAL RESEARCH
Conceptual aspects and practical realities of the research process applied to problems in education and human service disciplines. Develops skills necessary to use as well as conduct research. 4 cr.

883. ADVANCED PSYCHOLOGY OF HUMAN LEARNING
Review and integration of learning theory, teacher effectiveness, motivation theory, and development through adolescence; application of these to teaching generally and to the areas of specialization of the participants. Prereq: Educ 701 or equivalent. 4 cr.

884. ADVANCED HUMAN DEVELOPMENT
Selected principles and skills humankind must consider in the attempt to maximize individual, social, and educational potentials; emphasis on personal implementation. Prereq: Educ 701, intro to psych, or equivalents. 4 cr.

886. PHILOSOPHY OF EDUCATION
Seminar in comparative analysis of contemporary educational objectives and practices and the philosophical foundations upon which they are based. Application of theoretical criteria for assessing educational philosophies and for developing one's own position. 4 cr.

890. DEVELOPMENTAL PERSPECTIVES ON ADULTHOOD
Research and theory about critical life issues; developmental tasks of the life cycle; periods of transition; stages of intellectual, moral, and personality development of the adult; and the design of significant learning experiences for adults within a variety of educational settings and institutions. 4 cr.

895. INDEPENDENT STUDY IN EDUCATION
Opportunity for intensive investigation of a special problem or issue in the field of education. Prereq: permission. 1-4 cr. May be repeated to a maximum of 8 cr.

899. THESIS
Prereq: permission of the department. 6-10 cr.

Electrical and Computer Engineering (EE)

Chairperson: Ronald R. Clark

PROFESSORS: Fletcher A. Blanchard, Jr.; Ronald R. Clark; Albert D. Frost; Joseph B. Murdoch; John L. Pokoski; Konguangta Suvarapada
ASSOCIATE PROFESSORS: Glen C. Gerhard; Filson H. Glanzl; Gordon Krafft; Donald W. Melvin; Walter T. Miller III; Paul J. Nahin
ASSISTANT PROFESSOR: John R. LaCourse
GRADUATE PROGRAM COORDINATOR: Paul J. Nahin

A student admitted to graduate study in electrical engineering should have completed a baccalaureate degree in electrical engineering or have comparable training, which included courses in mathematics and physical science, network theory, fields and waves, electronics, solid-state circuits, semiconductor device theory, with appropriate laboratory experiences.

A minimum of 24 credits of coursework plus 6 credits of thesis or project are required for the master's degree. No specific course requirements are mandated; each candidate will meet with the departmental graduate committee to set up a program of study. Students are further required to demonstrate the ability to do independent and creative work by taking either EE 899 or 891-892.

With the consent of the Graduate Committee, a student who has satisfied this requirement through industrial experience may substitute approved coursework.

EE 899 and 891-892 both involve equivalent independent theoretical and/or applied work under the guidance of a faculty member. The sequence 891-892 is to be completed in two consecutive semesters, with a letter grade given at the end of each semester. An interim report is submitted at the end of 891, and a final (oral and written) report at the end of 892. E. E. 899 requires the submission of a formal thesis suitable for binding. However, no two-semester time limit is imposed, and no interim or final letter grade is given.

Those who intend to undertake graduate work in electrical engineering must consult with the department graduate adviser in order to plan the program of study, since all courses are not given each year. Normally, a minimum of 12 credits of 800-level courses is required, not including 891-892 or 899.

The Electrical and Computer Engineering Department considers the development of professional communication skills, through a teaching assignment, a basic component of a graduate education. Every master's candidate is required to satisfactorily complete one year of EE 800 seminars; participation includes presentations as needed to satisfy the teaching requirements.

An Engineering Ph.D. Program is also available. Refer to the section entitled Engineering Ph.D. Program for details.

Since many graduate courses are given by demand, actual course offerings vary from semester to semester.

Areas of Specialization
The faculty of the Electrical and Computer Engineering department has research interests in the following areas. Students in the M.S. Electrical Eng-
Biomedical Engineering
Topics of study in these areas include biomedical instrumentation, computer applications to medical problems, patient safety, and applications of signal processing and instrumentation techniques to medical areas. Additional details are available upon request.

Communications Systems and Information Theory
Areas of interest and activity include electromagnetic and acoustic wave technologies, and the identification of signals in the presence of noise through the use of coding, correlation, or optimal filtering. Related facilities for experiments extending from VLF to microwaves are available at a roof-top communications system for space, terrestrial, and ocean applications.

Computer Engineering and Digital Systems
Theoretical aspects of switching theory; systems that recognize patterns, learn, and exhibit intelligence; application of switching logic, design and interfacing of minicomputer peripherals; application of minicomputers to process control and bioelectronics. The Digital Systems Laboratory includes four minicomputers with magnetic tape units, television terminals, high-speed paper tape units, A/D and D/A converters, graphics output, and interconnect capability with a TR-48 analog computer.

Control and Systems Engineering
Digital, hybrid, and analog computer control of industrial processes and systems. Discontinuous and fluidic control theory for industrial, marine, and oceanographic applications. Linear and stochastic analysis, synthesis techniques in the frequency domain, optimal control, and systems optimization.

Geophysical Sensing and Propagation
Ground-based electromagnetic techniques for probing of upper atmosphere and the ionosphere; electromagnetic pulse techniques for probing of ice, snow, and other material media. Wave propagation studies in weakly turbulent media such as the sea, the atmosphere, and plasmas. Acoustic probing of bottom and subbottom sediment in water.

Illumination Engineering
Design techniques for evaluating contrast rendition factor and equivalent sphere illumination; inverse-square-law approximations for nonpoint light sources; design of daylighting systems; hand calculator programs for interior and exterior lighting design; lighting energy budgets.

Ocean Engineering and Instrumentation
Instrument systems (digital and analog) for measuring and recording physical, chemical, and biological parameters primarily associated with ocean behavior, e.g., temperature, pressure, and salinity measurements at midocean depths; wave height and direction determination; buoy performance as affected by waves and currents; remote sensing of the ocean surface; and underwater acoustics.

Permission of instructor is required for enrollment in all electrical and computer engineering courses taken for graduate credit. Seven-hundred-level courses are offered subject to adequate student demand.

704. ELECTROMAGNETIC FIELDS AND WAVES II
Loop antennas; aperture and cylindrical antennas; self and mutual impedance; receiving antennas and antenna arrays; bounded plane waves; rectangular and cylindrical waveguides; waveguide discontinuities and impedance matching; solid state microwave sources. Prereq: electromag fields and waves I. 4 cr.

705. SEMICONDUCTOR DEVICES
Physical theory of semiconductors: models of solids, electronic properties, energy bands, and transport processes. PN junction theory; bipolar and field effect transistors; charge-transfer, optoelectronic, and integrated devices; and device fabrication technology. Prereq: gen. physics; adv. electronics, electromag fields and waves; or equivalent. 4 cr.

711. DIGITAL SYSTEMS
Advanced switching theory techniques; digital design tools; design of microprocessor-based systems; general design procedures, including top-down design techniques, documentation, noise reduction, etc. Prereq: logical design of digital computers; permission. Lab. 4 cr.

714. MINICOMPUTER APPLICATIONS ENGINEERING
Organization and operation of minicomputer-based systems. Interfacing of special purpose peripherals, digital filters, system simulation, program and data organization, priority interrupt processing of tasks, real-time monitor systems. Applications to communication, automated-measurement, and process-control systems. Prereq: elements of digital systems or intro to digital systems; programming experience; permission. Lab. 4 cr.

727. POWER SYSTEMS
Modeling and planning of electric power transmission systems. Prereq: electromech devices; electrical networks; permission. 4 cr.

741. FLUID CONTROL SYSTEMS
Mathematical modeling of hydraulic, pneumatic, and fluidic control elements and control systems. Methods for 1) analysis of systems of using gases or liquids as the working fluid; 2) synthesis of the parameters of the control elements used in automatic control systems; 3) design of these systems. (Also offered as M E 741.) 4 cr.

745. FUNDAMENTALS OF ACOUSTICS
Acoustic wave equation for air; laws of reflection, refraction, and absorption; characteristics and measurement of acoustical sources; human perception of sound, loudness, intensity; microphones; acoustical materials; problems in environmental sound control, ultrasonics, architectural acoustics. Prereq: general physics II; differential equations; permission. Lab. 4 cr.

757. FUNDAMENTALS OF COMMUNICATION SYSTEMS
Discussions of deterministic signals, Fourier spectra, random signals and noise, baseband communication, analog and digital modulation schemes, and system signal to noise ratio. Prereq: probability and discreet systems; permission. Lab. 4 cr.
758. COMMUNICATION SYSTEMS
Design of high-frequency communication systems. RF transmitters, sensitive receivers, modulators for AM and FM systems, receiving techniques, antennas, free-space propagation, propagation characteristics of the ionosphere. Prereq: electromagnetic fields and waves I; E E 757 or equivalent. Lab. 4 cr.

762. ILLUMINATION
Radiation; color and spectra; physics of light production; sources of ultraviolet, visible, and infrared energy; lamp circuitry; control of light; lighting design, applications of light in business, industry, school, home, and outdoors. Open to juniors and seniors in engineering and physics. Lab. 4 cr.

775. APPLICATIONS OF INTEGRATED CIRCUITS
Design and construction of linear and nonlinear electronic circuits using existing integrated circuits. Limitations and use of operational amplifiers. Laboratory course in practical applications of nondigital integrated circuit devices. Prereq: advanced electronics. 4 cr.

781. PHYSICAL INSTRUMENTATION
Analysis and design of instrumentation systems. Sensors, circuits, and devices for measurement and control. Elements of probability and statistics as applied to instrument design and data analysis. Transmission, display, storage, and processing of information. The design, implementation, testing, and evaluation of an ocean-related instrument system is an integral part of the course. Prereq: permission. 4 cr.

782. CONTROL SYSTEMS
Fundamental principles involved in the design and analysis of feedback control systems. Topics include stability criterion, time-domain analysis, frequency-domain analysis, and introduction to nonlinear systems. Lab. (Also offered as M E 782.) 4 cr.

783. BIOMEDICAL ENGINEERING
Engineering applied to cardiovascular, renal, gastrointestinal, sensory, reproductive, and other organ systems. Design and utilization of diagnostic, monitoring, and prosthetic techniques and devices. Lab. 4 cr.

784. BIOMEDICAL INSTRUMENTATION
Principles of physiological and biological instrumentation design including transducers, signal conditioning, recording equipment, and patient safety. Laboratory includes the design and use of instrumentation for monitoring of electrocardiogram, electromyogram, electroencephalogram, pulse, and temperature. Current research topics, such as biotelemeters, ultrasonic diagnosis, and computer applications. Lab. 4 cr.

785. UNDERWATER ACOUSTICS
Vibrations, propagation, reflection, scattering, reverberation, attenuation, sound equations, ray and mode theory, radiation of sound, transducers, and small- and large-signal considerations. 4 cr.

786. INTRODUCTION TO RADIO ASTRONOMY
Electromagnetic radiation, propagation. Positional astronomy and the radio sky, discrete radio sources, source-structure distribution, the sun as a radio source, flare and burst activity, planetary emissions, quasars, pulsars, techniques of observation and data reduction, radiometry, polarimeters, correlation interferometers, aperture synthesis. 4 cr.

787. HUMAN PHYSIOLOGICAL CONTROL SYSTEMS
Analysis of human physiological control systems and regulators through mathematical models. Identification and linearization of systems component. Membrane biophysics; system interactions, stability, noise, and the relationship of system malfunction to disease. 4 cr.

796. SPECIAL TOPICS IN ELECTRICAL ENGINEERING
New or specialized courses and/or independent study. 2 or 4 cr.

800. GRADUATE SEMINAR
This course includes periodically scheduled seminars presented by outside speakers, UNH faculty, and graduate students. Topics will be in general areas of interest to electrical and electronics engineers. Participants will prepare and give presentations to satisfy teaching practice requirements. 0 cr. Cr/F.

801. ELECTROMAGNETIC FIELD THEORY
Maxwell's equations; plane wave propagation; reflection and refraction; guided wave propagation; wave guides; simple resonators; elements of microwave circuits, linear and aperture antennas, arrays of dipoles; receiving antennas. Prereq: electromagnetic fields and waves I or equivalent. 3 cr.

802. ELECTROMAGNETIC WAVE THEORY
Selected advanced topics in electromagnetic wave theory taken from such areas as: antennas; propagation in various media; diffraction and scattering; microwave generation and waveguide propagation. Prereq: E E 801. 3 cr.

811. FUNDAMENTALS OF SIGNAL PROCESSING
Matrices and determinants, introductory graph theory. Laplace transforms and pole-zero concepts, complex variable theory, convolution, concept of state, formulation and solution of state equations. 3 cr.

812. FILTER DESIGN AND SYNTHESIS
Network theoretical techniques basic to the design of electrical filters of various sorts. Approximation theory; driving point and transfer synthesis techniques; passive, active, and digital filters. Prereq: E E 811. 3 cr.

815. ADVANCED ACTIVE CIRCUITS
Investigation of devices and techniques used in advanced circuit design using discrete solid-state devices and integrated circuits. Oscillators, phase-locked systems, low noise techniques, etc. 3 cr.

820. ILLUMINATION DESIGN
Advanced illumination design: task visibility levels, bidirectional reflectance factors, contrast rendition factor, equivalent-sphere illumination, visual performance criteria, visual comfort probability, daylighting systems, inverse-square-law approximating techniques, luminaire effectiveness, and lighting energy budgets. Students write computer programs
and lighting design projects. Prereq: E E 762 or equivalent experience. 3 cr.

833-834. PRACTICUM IN CLINICAL ENGINEERING
Seminars in medical equipment management; evaluation, testing, and standards; working experience in laboratory and in community hospitals in conjunction with the Clinical Engineering Center. Prereq: permission of instructor and director of CEC. A year-long, continuous course; 3 credits each semester. "A" grade (continuous course) will be given at the end of the first semester. 3 cr.

836. BIOMEDICAL ENGINEERING II
Applications of engineering in such areas as surgery, critical-care units, neurophysiology, biotelemetry, modeling, and interaction of waves with biological tissues. Prereq: E E 783 or equivalent. 3 cr.

839. STATISTICAL THEORY OF COMMUNICATIONS
An introduction to probability theory and random waveforms leading to a discussion of optimum receiver principles. Topics include random variables, random processes, correlation, power spectral density, sampling theory, and optimum decision rules. 3 cr.

840. INFORMATION THEORY
A continuation of E E 839. Introduction of information-theory concepts. Topics include: message sources, entropy, channel capacity, fundamentals of encoding, Shannon's theorems. Prereq: E E 839. 3 cr.

841. DIGITAL SIGNAL PROCESSING
Theory and practice of digital signal processing; elements of nonrecursive and recursive digital filters, random number generators and simulation of time series, the fast Fourier transform, spectral estimation, envelopes and phases, modeling of time series. Samples of data from various physical experiments will be analyzed as student projects. Some exposure to programming is desirable. 3 cr.

842. DISCONTINUOUS CONTROL
Analysis and synthesis of feedback control systems operating on quantized information; compensation and performance improvement methods that use the quantized nature of the information are also developed. Design methods for pulse-width modulation, optimum quantizers and limit cycle behavior of quantized systems are developed. (Also offered as M E 842.) 4 cr.

844. NONLINEAR CONTROL SYSTEMS
Analysis and design of nonlinear control systems from the classical and modern viewpoints are discussed. Liapunov's stability theory; phase space methods; linearization techniques, simulation; frequency response methods; generalized describing functions; transient analysis utilizing functional analysis; and decoupling of multivariable systems. Prereq: E E 851. (Also offered as M E 844.) 4 cr.

851. ADVANCED CONTROL SYSTEMS I
State-space representation of multivariable systems; analysis using state transition matrix. Controllability and observability; pole placement using state and output feedback; Luenberger observers. Introduction to computer controlled systems (sampling, discrete state representation, hybrid systems), nonlinear analysis (Liapunov, Popov, describing function). Prereq: E E/M E 782. (Also offered as M E 851.) 3 cr.

852. ADVANCED CONTROL SYSTEMS II
Special topics in control theory: continuous and discrete systems; optimal control systems, including calculus of variations, maximum principle, dynamic programming, Weiner and Kalman filtering techniques, stochastic systems, adaptive control systems. Prereq: E E/M E 851. (Also offered as M E 852.) 3 cr.

853. ARTIFICIAL INTELLIGENCE
Current approaches to machine intelligence and the simulation of human cognitive processes, including an introduction to recursive functions and programming with the LISP language. Heuristic programming, programs for game playing and natural language understanding, elementary theory of computability. Individual computer project required. Prereq: programming experience. (Also offered as C S 853.) 3 cr.

854. AUTOMATA THEORY
Formal languages and theoretical "machines" or automata. Formal grammars; context-dependent, context-free, and regular languages; finite state machines and regular expression recognizers; infinite state machines; Turing machines; unsolvable problems and the halting problem; linear-bounded and push-down automata; cellular and reproducing automata. Prereq: programming experience. (Also offered as C S 854.) 3 cr.

855. ESTIMATION AND FILTERING
Stochastic systems course with application to control and communications. Topics include random variables, noise in linear systems, Bayes and minimum variance estimation theory, optimal state estimators, Weiner and Kalman filters, combined estimation and control, prediction, parameter identification, and nonlinear filtering. Prereq: M E/E E 851, Math 735 or equivalent. (Also offered as M E 855.) 3 cr.

856. SWITCHING THEORY
Combinational circuits—including functional decomposition, nonbinary logic, and cellular networks. Sequential networks—including analysis, transient behavior, state reduction methods, state assignment, and synthesis. Prereq: E E 711. 3 cr.

860. COMPUTER ARCHITECTURE
Advanced topics in computer organization. Parallel and pipeline processing; associative and stack computers; microprogramming; virtual memory; current topics. Prereq: logical design of digital computers. 3 cr.

865. INTRODUCTION TO PATTERN RECOGNITION
Mathematical representation of data, feature space, clustering, linear separability, fictitious play algorithm, Braverman's hyperplane training and learning algorithm, learning and game playing computer programs that recognize patterns. Prereq: knowledge of computer terminal operation; BASIC language; probability and statistics or equivalents. 3 cr.

891-892. RESEARCH
3 cr.
Engineering Ph.D. Program (Engr)

Coordinator: Donald W. Melvin

The College of Engineering and Physical Sciences offers a program of study leading to the degree of doctor of philosophy in engineering. The program has five areas of specialization: chemical engineering, civil engineering, electrical engineering, mechanical engineering, and systems design. The systems design area is an interdepartmental program that addresses contemporary engineering and scientific problems that can be solved only through the cooperation of a variety of disciplines. Problems addressed in the other four areas of specialization follow the four classical departmental boundaries.

Areas of Specialization

Chemical Engineering: Stephen S. T. Fan, area coordinator

This area deals with the design and analysis of processes regarding the transfer and transformation of material and energy. It includes fields such as fluid mechanics, heat transfer, mass transfer, reaction kinetics, polymer processing, biochemical engineering, process dynamics, pollution control, and energy. Current research activities include solar energy, new energy sources, pollution control, combustion, particle formation, polymer kinetics, coal liquefaction, coal gasification, fluidization, radiative heat transfer, and energy conservation.

Civil Engineering: Charles H. Goodspeed, area coordinator

This area involves both analytical and experimental topics, including solid mechanics, structural mechanics, classical and continuum mechanics, soil mechanics, systems analysis, environmental engineering, and materials science. Current research activities include water and wastewater treatment, treatment of hazardous wastes, pathogen survival during sludge composting, fabric identification in sands by acoustic methods, instability of offshore slopes, influence of pore size and pore-size distribution on frost heaving of granular materials, influence of aggregate gradation on controlling the water-cement ratio of Portland cement, of concrete while maintaining workability, and of internally sealed concrete, coupled, twisting-bending vibrations of continuous curved beams, effects of rotary inertia and shear on multispans, curved frames, computer-aided structural planning and design of buildings, computer-graphics applications in structural engineering, finite-element analysis, soil-structure interactions, and design investigations for the reconstruction of small/low-head hydropower facilities.

Electrical Engineering: Paul J. Nahin, area coordinator

This area involves any topic, whether analytic or experimental, which is normally a branch of studies in the Department of Electrical and Computer Engineering. Current research areas include: acoustics, biomedical systems and instrumentation, computer and digital systems, digital signal processing, electromagnetic control systems, geophysical sensing, lighting design, signal propagation, robotics, and systems modeling. The development of professional communication skills, through a teaching assignment, is considered a basic component of a graduate education. Every doctoral candidate in electrical engineering is required to satisfactorily complete the year of EE 800. Participation includes presentations as needed to satisfy the teaching requirements.

Mechanical Engineering: Wayne M. Beasley, area coordinator

Programs of study are offered from the viewpoint of the engineering sciences and of engineering design with emphasis in the theoretical and applied mechanics and the thermal sciences. These programs include those aspects of engineering, physics, and applied mathematics that are relevant to a fundamental understanding in each area of the theoretical foundations and their consequent applications.

Current research topics include mechanical properties of materials such as viscoelastic, plastic, creep, and fretting wear; classical and continuum mechanics applied to wood fibers; elastic-wave propagation; structural dynamics including nonlinear dynamics of ocean structures, vehicles, and electromechanical systems; fluid and thermal sciences applied to problems such as control-signal propagation in long fluid lines, laminar/turbulent instabilities; and ocean engineering topics such as ocean sediment acoustics, untethered submersible design, and estuary hydrodynamics and pollution.

Systems Design: Charles K. Taft, area coordinator

Students entering this area of the Engineering Ph.D. Program can elect either one of two professional directions. The first develops professionals with the technical expertise of a Ph.D. and with the ability to work with and direct groups of people working on large-scale technical projects. The second direction develops engineers with capabilities in the theory and analysis of large-scale complex systems. Concentration in an area of specific individual interest is combined with participation in a larger interdisciplinary project.

Current projects related to the area include coastal engineering, marine soil mechanics, submersibles and underwater habitats, oceanic instrumentation, marine structures and buoy systems, arctic engineering, discontinuous control systems, vehicle and transportation systems, nonlinear dynamic systems modeling, fluid-power systems, electromechanical systems, nonlinear decoupling control, computer systems, vehicle dynamics, illuminating engineering systems, facility systems, social and business systems, biomedical systems and instrumentation, and environmental engineering.

Requirements

Qualified students with bachelor's or master's degrees in engineering, mathematics, or the physical
sciences are eligible for admission to the program. To be admitted, students must present evidence that they have sufficient background in the area in which they propose to specialize.

Following entrance into the program, a guidance committee will be appointed for the student by the Dean of the Graduate School upon recommendation of the student's area coordinator. This committee assists students in outlining their program and may specify individual coursework requirements in addition to those required by the area of specialization. The committee will also conduct an annual in-depth review of each student's progress and, following substantial completion of a student's coursework, will administer the qualifying examination. This committee is also responsible for administering the language examination and/or research-tool proficiency requirements. Coursework and language requirements should normally be completed by the end of the second year of full-time graduate study, and must be completed before the student can be advanced to candidacy.

Upon the successful completion of the qualifying examination and other proficiency requirements, the student will be advanced to candidacy and, upon the recommendation of the student's area coordinator, a doctoral committee will be appointed by the Dean of the Graduate School. The doctoral committee shall conduct an annual review of the student's progress, supervise and approve the doctoral dissertation, and administer the final dissertation defense.

To obtain a Ph.D. degree in engineering, a student must meet all of the general requirements as stated under academic regulations and degree requirements of the Graduate School. Students will normally be expected to take coursework equivalent to two full-time academic years beyond the baccalaureate and complete a dissertation on original research that will require at least one additional year of full-time study. A student should consult specific course offerings and descriptions of each department and should consult the area coordinator for additional information.

English (Engl)

Chairperson: Carl Dawson

PROFESSORS: Thomas A. Carnicelli; Carl Dawson; Michael V. DePorte; Karl C. Diller; Robert Hapgood; Jean E. Kennard; Gary H. Lindberg; Terence P. Logan; Edmund G. Miller; Donald M. Murray; Philip L. Nicoloff; John C. Richardson; Charles D. Simec; Mark R. Smith; Thomas A. Williams, Jr.; John A. Yount

ASSOCIATE PROFESSORS: Lester A. Fisher; Elizabeth Hageman; Andrew H. Merton; Thomas R. Newkirk; Hugh M. Potter III; Susan Schibanoff

ASSISTANT PROFESSORS: Janet Aikins; Mary Morris Clark; Melody Graulich; Rochelle Lieder; Michel McBride; Patrocinio Schweikart; David V. Siddall; David H. Watters

GRADUATE PROGRAM COORDINATOR: Michael V. DePorte

The Department of English offers three advanced degrees, master of arts, master of science for teachers, and doctor of philosophy. All applicants are required to submit Graduate Record Examination scores for the aptitude test. Applicants for the master of arts in literature, the master of science for teachers, and the doctor of philosophy degree programs must also submit scores for the Advanced Test of Literature in English. All applicants must submit writing samples. Applicants for the Ph.D. are normally expected to have a reading knowledge of at least one foreign language. Specific requirements for each degree program can be obtained from the department.

Master of Arts Programs

Master of Arts in Literature

The master of arts may be undertaken as a terminal degree or as preparation for a doctoral program.

The program encourages students to pursue their individual interests and to correct deficiencies in their undergraduate training.

An M.A. candidate must pass eight 4-credit courses. Seven courses, including at least two seminars and Engl 895, must be at the 800 level. At least four courses must be in English or American literature. The remaining courses in critical analysis, linguistics, writing, teaching methods, or other literatures. Each M.A. candidate must pass the master's seminar in the study of literature (Engl 819) and one course in the English language or in the teaching of composition. As a general rule, all courses counting toward the M.A. degree should be in the student's major area of study. In special circumstances, however, a student may be allowed to apply toward the degree up to two graduate courses offered by other departments. For students planning a teaching career, the department requires at least one semester of teaching experience (subject to availability of funds).

An M.A. candidate must pass a reading examination in a foreign language. Foreign students whose native language is not English may be exempt from this requirement. Each candidate for the M.A. degree must register for four credits of Engl 895 or 896 and produce a substantial scholarly paper.

Master of Arts in Writing

The master of arts in Writing is designed for students who intend to become professional writers. Eight working writers supervise the program. Students may elect to specialize in fiction, nonfiction, or poetry. Each member of the writing faculty is accomplished in at least one of these fields.

The writers at UNH emphasize conference teaching. Each student meets frequently with writers specializing in the student's area of study. In addition, each student works closely with a writer-adviser throughout the program.

Workshop courses provide forums for prompt, detailed criticism of each student's writing by instructors and fellow students. Each student takes at least one additional workshop in his or her specialty and may elect to take an additional workshop in another area as well. Form-and-theory courses and literature courses complete the program. The program consists of eight courses, of which seven must be at the 800 level.

Upon completion of the required courses, the student submits a portfolio of writing to the staff. The portfolio might consist of short stories, a novel, nonfiction articles, nonfiction book, or a collection of poetry. The degree is awarded upon approval of the portfolio by a committee of writers. There is no foreign language requirement.
Master of Arts in English Language and Linguistics

Students who wish to specialize in any of the various areas of English language and linguistics may design an M.A. program to meet their interests. Specialties include Applied Linguistics and the Teaching of English as a Second Language as well as the traditional subfields of linguistics. Psycho-linguistics courses are offered through the psychology department.

To earn the M.A. degree, students must complete at least seven 4-credit courses, including two seminars, plus at least four credits of Enlg 895 and produce a substantial scholarly paper. At least six of these courses must be at the 800 level. Unless the student already has a strong background in linguistic theory, the program of study must include one course in phonetics and phonology (Engl 893) and one in syntax and semantics (Engl 894). Reading knowledge of one foreign language is required. The student’s course of study must be approved by the program adviser.

Master of Science for Teachers

The Master of Science for Teachers is designed for high school teachers. No foreign language is required. The student must pass eight 4-credit courses in English, numbered 700 and above, normally including at least one course in the teaching of writing and in the study of language, which will not be a repetition of undergraduate work. Applicants should consult the General Regulations of the Graduate School for the special admissions requirements for this program.

Doctor of Philosophy

A student admitted to the Ph.D. program must hold an M.A. degree or be in the final stage of completing requirements for the degree.

The Ph.D. program offers professional training in the teaching of literature and language. The program combines the essential guidance and discipline of coursework with the equally essential freedom of independent study and research. Accordingly, in the first year the student is encouraged to follow a program suited to individual interests and needs.

Ph.D. candidates will normally complete ten English courses beyond the M.A. degree. Four of these courses must be graduate seminars in this department. The other courses should be at the 800 level and must include: Introduction to the Teaching of Writing (Engl 810); a course on criticism; a half-course (2-credit) ungraded module on the teaching of literature (Engl 839); and a half-course (2-credit) ungraded module on bibliography and professional methods (Engl 800). In special circumstances, a course at the 700 level or a course from another department may be included among the ten courses with approval of the graduate committee.

In addition to meeting course requirements, each student must pass: 1) reading examinations in two foreign languages; 2) after preliminary work for the Ph.D. degree, a general examination; and 3) a later qualifying examination in three areas related to a proposed dissertation and projected teaching specialization. A student must also write a dissertation and defend it at a final oral examination.

M.A. and Ph.D. students holding assistantships teach under supervision; such teaching is considered a vital part of the student’s professional training. At least a year of intern teaching or its equivalent is required of all doctoral candidates.

Graduate students should note that not all seminars are offered every year. A detailed guide to the department’s programs is available from the secretary for graduate programs, Department of English.

See English department brochure for detailed descriptions of current course offerings.

701, 702/801, 802. ADVANCED WRITING OF FICTION

Workshop discussion of advanced writing problems and readings of students’ fiction. Individual conferences with instructor. Prereq: writing fiction or equivalent. Written permission of instructor required for registration. May be repeated for credit with the approval of the department chairperson. 4 cr.

703, 704/803, 804. ADVANCED NONFICTION WRITING

A workshop course for students intending to write publishable magazine articles or nonfiction books. Equal stress on research and writing techniques. Prereq: writing poetry or equivalent. Written permission of instructor required. May be repeated for credit with the approval of the department chairperson. 4 cr.

705, 706/805, 806. ADVANCED WRITING OF POETRY

Workshop discussion of advanced writing problems and submitted poems. Individual conferences with instructor. Prereq: writing poetry or equivalent. Written permission of instructor required for registration. May be repeated for credit with the approval of the department chairperson. 4 cr.

707/807. FORM AND THEORY OF FICTION

A writer’s view of the forms, techniques, and theories of fiction. The novels, short stories, and works of criticism studied will vary, depending on the instructor. 4 cr.

708/808. FORM AND THEORY OF NONFICTION

A writer’s view of contemporary nonfiction, emphasizing the choices the writer faces in the process of research and writing. 4 cr. (Not offered every year.)

709/809. FORM AND THEORY OF POETRY

A writer’s view of the problems, traditions, and structures of poetry. 4 cr.

710/810. TEACHING WRITING

An introduction to various methods of teaching writing. Combines a review of theorems, methods, and texts with direct observation of teaching practice. 2 or 4 cr. (Degree candidates must enroll for 4 cr.)

712. CRITICAL ANALYSIS OF EXPOSITION

For the English teaching major; students analyze essays and write nonfiction prose. Variety of critical approaches; several methods of teaching composition. 4 cr. (Not offered every year.)

713, 714/813, 814. LITERARY CRITICISM

Major critics from Plato to the present; the chief critical approaches to literature. 4 cr. (Not offered every year.)
715/815. APPLIED LINGUISTICS
Methods of teaching and learning foreign languages; background work on theories of language acquisition; the methodology of teaching English as a second language. Students interested in teaching other languages may do their projects on those languages. 4 cr.

716/816. PROBLEMS IN APPLIED LINGUISTICS
Variable topics course; problems such as language acquisition in children and adults, bilingualism, and linguistic field methods. 4 cr. (Not offered every year.)

718/818. ENGLISH LINGUISTICS
Introduction to the study of language; dialects and social and psychological problems of language; intensive work on the techniques of modern grammar (syntax, phonology, semantics). 4 cr. (Not offered every year.)

719. ENGLISH GRAMMAR
Traditional and contemporary approaches to the study of the structure of the English language: its history; phonology; morphology, syntax, including consideration of parts of speech, phrases, clauses, sentences, etymology, punctuation. Some emphasis on the teaching of English grammar. 4 cr.

720. NEWSPAPER INTERNSHIP
Students intending to pursue careers in journalism spend a semester working full- or part-time for a daily newspaper under close supervision of editors. Reporting is stressed, but students may do some editing as well. The number of internships is very limited. Prereq: newswriting or equivalent; and permission. 4-16 cr.

741/841. LITERATURE OF EARLY AMERICA
Prose and poetry of the periods of exploration, colonization, early nationalism, Puritanism, Enlightenment. Individual works and historical-cultural background. 4 cr. (Not offered every year.)

742/842. AMERICAN LITERATURE, 1815-1865
Fiction, nonfiction, and poetry in the period of romanticism, transcendentalism, nationalism. Individual works and cultural background. 4 cr. (Not offered every year.)

743/843. AMERICAN LITERATURE, 1865-1915
Fiction, nonfiction, and poetry in the period of realism, naturalism, industrialism, big money. Individual works and cultural background. 4 cr.

744/844. AMERICAN LITERATURE, 1915-1945
Fiction, poetry, and drama in the period of avant-garde and leftism, jazz age, and depression. Individual works and cultural background. 4 cr.

745/845. CONTEMPORARY AMERICAN LITERATURE
A gathering of forms, figures, and movements since 1945. Individual works and cultural background. 4 cr.

746/846. STUDIES IN AMERICAN DRAMA
Topics vary from year to year. Examples: 20th-century American drama; contemporary playwrights; theatricality in American life. 4 cr. (Not offered every year.)

747/847. STUDIES IN AMERICAN POETRY
Topics vary from year to year. Examples: poets of the open road; Pound and his followers; major American poets; contemporary American poetry. 4 cr. (Not offered every year.)

748/848. STUDIES IN AMERICAN FICTION
Topics vary from year to year. Examples: the romance in America; the short story; realism and naturalism; the city novel; fiction of the thirties. 4 cr.

749/849. MAJOR AMERICAN AUTHORS
Intensive study of two or three writers. Examples: Melville and Faulkner; Fuller, Emerson, and Thoreau; James and Wharton; Dickinson and Frost. 4 cr.

750/850. SPECIAL STUDIES IN AMERICAN LITERATURE
Topics vary from year to year. Examples: the Puritan heritage; ethnic literatures in America; landscapes in American literature; five American lives; pragmatism; American humor; transcendentalism; women regionalists. 4 cr.

751/851. MEDIEVAL EPIC AND ROMANCE
The two major types of medieval narrative; comparative study of works from England, France, Germany, and Iceland, including Beowulf, Song of Roland, Niebelungenlied, Gottfried's Tristan, Njal's Saga, and Malory's Morte d'Arthur. All works read in modern English translations. 4 cr. (Not offered every year.)

752/852. HISTORY OF THE ENGLISH LANGUAGE
Evolution of English from the Anglo-Saxon period to the present day. Relations between linguistic change and literary style. 4 cr. (Not offered every year.)

753/853. OLD ENGLISH
Introduction to Old English language and literature through the readings of selected poetry and prose. 4 cr.

754/854. BEOWULF
A reading of the poem and an introduction to the scholarship. Prereq: Eng 753. 4 cr.

755, 756/855, 856. CHAUCER
755/855: Troilus and Criseyde, in the context of medieval continental literature by Boccaccio and other influences. 756/856: Chaucer—A study of The Canterbury Tales in its original language. 4 cr.

758/858. SHAKESPEARE
A few plays studied intensively. Live and filmed performances included as available. 4 cr.

759/859. MILTON
Milton and his age. Generous selection of Milton's prose and poetry, with secondary readings of his sources and the scholarship. 4 cr. (Not offered every year.)

763/863. CONTINENTAL BACKGROUNDS OF THE ENGLISH RENAISSANCE
Major philosophers, artists, and writers of the continental Renaissance (in translation): Petrarch, Fi-
clino, Pico, Vives, Valla, Castiglione, Machiavelli, Luther, Calvin, Rabelais, Montaigne, Cervantes, Erasmus, and Thomas More, as representative of the early English Renaissance. 4 cr. (Not offered every year.)

764/864. PROSE AND POETRY OF THE ELIZABETHANS
Shakespeare and his contemporaries. Major works, including Spenser's Faerie Queene, Sidney's Astrophi and Stella, Shakespeare's Sonnets, Marlowe's Dr. Faustus; their literary and intellectual backgrounds. 4 cr. (Not offered every year.)

765/865. ENGLISH LITERATURE IN THE 17TH CENTURY
Major writers of the 17th century, including Donne, Jonson, Herbert, Bacon, and Hobbes. 4 cr. (Not offered every year.)

767, 768/867, 868. LITERATURE OF THE RESTORATION AND 18TH CENTURY
Representative works; texts studied closely; the ways they reflect the central intellectual problems of their age. 767/867: Dryden, Rochester, Restoration Plays, Bunyan, Defoe, Montesquieu, and Swift. 768/868: Pope, Fielding, Johnson, Boswell, Voltaire, Sterne, Rousseau, Beckford, Diderot, and Blake. 4 cr.

769, 770/869, 870. THE ENGLISH ROMANTIC PERIOD
Major literary trends and authors, 1798 to 1832. Focus on poetry but attention also to prose works and critical theories. 769/869: Wordsworth, Coleridge, Lamb, Hazlitt, DeQuincey. 770/870: Byron, Shelley, Keats. 4 cr. (Not offered every year.)

771, 772/871, 872. VICTORIAN PROSE AND POETRY
Major writers; social and cultural history. Typically included in 771/871, Carlyle, Ruskin, Newman, Tennyson, Browning, and others; in 772/872, Arnold, the pre-Raphaelites, Swinburne, Hopkins, and others. 4 cr. (Not offered every year.)

773, 774/873, 874. BRITISH LITERATURE OF THE 20TH CENTURY
Poets and novelists; the concept of modernity in literature. Offerings vary by year and by instructor, but normally include such figures as Joyce, Lawrence, Yeats, Woolf, Forster, and more contemporary writers such as Burgess, Fowles, Murdoch, and Golding. 4 cr.

775/875. IRISH LITERATURE
Survey from the beginnings to the present; works in Irish (read in translation) such as The Cattle Raid of Cooley, medieval lyrics, and Mad Sweeney; and works in English from Swift to the present. Twentieth-century authors: Joyce, Yeats, Synge, O'Casey, Beckett, and Flann O'Brien. 4 cr. (Not offered every year.)

778/878. BRAIN AND LANGUAGE
An introduction to neurolinguistics, a study of how language is related to the structure of the brain. The biological foundations of linguistic universals and language acquisition. Examination of evidence from aphasia and from normal language use. 4 cr.

779/879. LINGUISTIC FIELD METHODS
Devoted to the study, with use of an informant, of some non-Indo-European language that is unfa-
of arguments for or against particular analyses. Prereq: a basic linguistic course or permission. 4 cr.

795. INDEPENDENT STUDY
To be elected only with permission of the department chairperson and of the supervising faculty member or members. Barring duplication of subject, may be repeated for credit up to a maximum of 16 credits. 1-16 cr.

797/897. SPECIAL STUDIES IN LITERATURE
A) Old English Literature; B) Medieval Literature; C) 16th Century; D) 17th Century; E) 18th Century; F) English Romantic Period; G) Victorian Period; H) 20th Century; I) Drama; J) Novel; K) Poetry; L) Nonfiction; M) American Literature; N) A Literary Problem; O) Literature of the Renaissance. The precise topics and methods of each section will vary. Barring duplication of subject, may be repeated for credit. For details, see the course descriptions available in the English department. 4 cr.

800. BIBLIOGRAPHY AND METHODS
Introduction to enumerative and physical bibliog-
raphy and major research and reference works of the field, to prepare the student for original re-
search in the graduate program and later. Required of all Ph.D. students. 2 cr. Cr/F.

817. SEMINAR IN TEACHING WRITING
Review of the current professional literature on composition; research projects in areas selected in consultation with instructor. Prereq: Engl 810 or permission. 4 cr.

819. THE GRADUATE STUDY OF LITERATURE
Techniques, resources, and purposes of literary study: close reading; practical criticism; critical theories and their values; pertinence of intellectual and historical backgrounds. Approaches applied to a specific area of literary study, which varies from year to year. 4 cr.

820. SEMINAR IN LINGUISTICS
4 cr.

821. SEMINAR—STUDIES IN OLD ENGLISH
4 cr.

824. SEMINAR—STUDIES IN MEDIEVAL LITERATURE
4 cr.

825. SEMINAR—STUDIES IN 16TH-CENTURY LITERATURE
4 cr.

827. SEMINAR—STUDIES IN SHAKESPEARE
4 cr.

828. SEMINAR—STUDIES IN MILTON
4 cr.

829. SEMINAR—STUDIES IN EARLY 17TH-CENTURY LITERATURE
4 cr.

830. SEMINAR—STUDIES IN 18TH-CENTURY LITERATURE
4 cr.

832. SEMINAR—STUDIES IN THE ROMANTIC PERIOD
4 cr.

833. SEMINAR—STUDIES IN THE VICTORIAN PERIOD
4 cr.

834. SEMINAR—STUDIES IN 20TH-CENTURY BRITISH LITERATURE
4 cr.

836. LITERATURE OF EARLY AMERICA
Seminar on the major writers, forms, and themes of early American literature and culture. 4 cr. (Not offered every year.)

837. SEMINAR—STUDIES IN 19TH-CENTURY AMERICAN LITERATURE
4 cr.

838. SEMINAR—STUDIES IN 20TH-CENTURY AMERICAN LITERATURE
4 cr.

839. PROBLEMS IN TEACHING ENGLISH
Special topics in teaching within the discipline of English. Inquire at the department to see what topics in the teaching of literature, language, or writing may be scheduled. Open only to graduate students with a professional interest in teaching or to practicing teachers. 1-6 credits depending on the specific course.

840. SEMINAR—STUDIES IN ENGLISH DRAMA
4 cr.

895. READING AND RESEARCH
2, 4, or 8 cr. IA, Cr/F.

999. DOCTORAL RESEARCH

Entomology (Ento)

Chairperson: G. Thomas Fisher

ASSOCIATE PROFESSORS: James S. Bowman; John P. Burger; G. Thomas Fisher; Paul C. Johnson; R. Marcel Reeves

ASSISTANT PROFESSOR: Donald S. Chandler

ADJUNCT ASSISTANT PROFESSOR: Siegfried E. Thewke

An applicant for admission to graduate study in entomology is expected to have at least the basic (Ento 402) course in entomology as well as ade-
quate preparation in the allied sciences of chemis-
try, botany, and zoology. During the first semester of residency, degree candidates' backgrounds in en-
tomology will be reviewed in conference with at least three faculty members. Students lacking the necessary background courses may be required to complete certain of these courses, which do not carry credit, before they are admitted to full can-
didacy for a degree.

The program of graduate study is designed to meet the needs of those students planning to take further work leading to a career in professional entomology. Areas of specialization include tax-
onomy, ecology, ethology, biological control, pest management, chemical control, problems in medi-
entomology, forest entomology, and agricultural entomology. A thesis is required of all candidates for the master's degree. An oral examination on the thesis is required. Students are given the opportunity to assist the professional staff in field research and as laboratory assistants, and they are also encouraged to attend professional meetings in their appropriate fields.

No language requirements are made for the M.S. degree. Applicants are required to submit aptitude and advanced biology scores from the Graduate Record Examination.

704. MEDICAL ENTOMOLOGY
Survey of past and present trends in arthropod-borne diseases transmitted to human populations, emphasizing dynamics of arthropod-host-pathogen-parasite relationships, natural nidality of disease, and role of arthropods and other animals as reservoirs or vectors of disease and maintenance of zooneses. Laboratory emphasizes survey of arthropod groups important as disease vectors or in envenomizing humans. Lab. 4 cr.

705. SYSTEMATICS AND TAXONOMY OF INSECTS
The kinds and diversity of insects and their relationships, emphasizing methods of species and population analysis, concepts of classification and nomenclature, and application to identification. Prereq: intro entomology or permission. Lab. 4 cr.

706. SOIL ARTHROPODS
Biology and systematics of terrestrial arthropods, with emphasis on the springtails, sowbugs, myriapods, mites, spiders, and other arachnids. Prereq: permission. Lab. 4 cr. (Not offered every year.)

707. IMMATURE INSECTS
Identification of immature stages of insects, especially of holometabolus orders. Aquatic forms not included. Prereq: intro entomology, intro ento, or permission. 4 cr. (Not offered every year.)

709. AQUATIC INSECTS
Biology, ecology, and taxonomy of aquatic insects, including their role in succession and food webs of aquatic ecosystems, origin and evolution of adaptations to aquatic environments and relationship between habitat type and taxal diversity. Laboratory emphasizes qualitative and semi-quantitative sampling techniques, collection and identification of principal aquatic groups. Prereq: intro ento, or permission. 4 cr. (Not offered every year.)

710. INSECT MORPHOLOGY
External and internal anatomy of insects, with the integration of body structure and function. Prereq: permission. Lab. 4 cr. (Not offered every year.)

720. AGRICULTURAL ENTOMOLOGY
For advanced students interested in agribusiness. Economic effect of insect pests on forage, fruit, and vegetable crops. Life cycles; damage and current methods of control. Prereq: permission. Lab. 4 cr.

721. PRINCIPLES OF BIOLOGICAL CONTROL
Natural and applied aspects of biological control of insect and plant pests. Prereq: permission. 4 cr. (Not offered every year.)

722. CHEMICAL CONTROL OF INSECTS
For advanced students in applied entomology. Review of the chemical compounds for insect control. Modes of pesticide entry; toxicology. Basic understanding of chemistry is desired. Prereq: permission. Lab. 4 cr.

723. REGULATORY PEST CONTROL
For students preparing for careers dealing directly with or associated with the movement of agricultural commodities in internal and foreign trade. Legal documents; federal and state statutes. Prereq: basic entomology and plant pathology; courses; permission. 2 or 4 cr. (Not offered every year.)

724. STRUCTURAL PEST CONTROL
For students wishing to study household and industrial entomology. Prereq: permission. Lab. 4 cr.

801, 802. GRADUATE ENTOMOLOGY
Concentrated studies in insect biology, systematics, and biological control or chemical control of insects. Subject matter, hours, and credits to be arranged.

825. INSECT ECOLOGY
Role of insects in; coevolution of plant-herbivores and predator/parasite-prey systems, ecosystem energetics, population dynamics, niche theory, competition, coexistence, diversity, and stability. Prereq: permission. 4 cr. (Not offered every year.)

826. INTEGRATED PEST MANAGEMENT
Integration of pest management techniques involving biological, culture, and chemical control with principles of insect ecology into management approach for insect pests. Prereq: permission. 4 cr. (Not offered every year.)

897, 898. ENTOMOLOGY SEMINAR
Selected topics and current developments. Required of all graduate entomology students. May be repeated. 1 cr.

899. MASTER'S THESIS
Hours and credits to be arranged. 6-10 cr.

Family and Consumer Studies (FCS)
Chairperson: Michael F. Kalinowski

ASSOCIATE PROFESSORS: Larry J. Hansen; Victor R. Messier; Elizabeth A. Snell
ASSISTANT PROFESSORS: Jennifer W. Bryce; Elizabeth M. Dolan; Michael F. Kalinowski; Joel Rudd; Anthony R. Tagliatello
GRADUATE PROGRAM COORDINATOR: Joel Rudd

The Department of Family and Consumer Studies offers a program of study and research leading to the master of science degree. The goal of the program is to train students who will have a familiarity with theory and methods in child, family, and consumer studies and develop a specialization in one of these areas. Central to this goal is the development of general competence in research methods and design appropriate to the study of human social behavior.

All students are expected to become involved in the teaching and research activities of the depart-
ment, particularly in their area of specialization. A core theory and methods curriculum will permit entering students to move through the first year of the program as a group, provide students with an understanding of the specialty areas, and enable students to develop their thesis research proposals. Upon admission to the program, each student will be assigned a temporary faculty adviser who will 1) provide the student with necessary information about the expectations of the program, 2) ensure that each student fulfills the requirements regarding the core curriculum, and 3) work with the student in identifying a thesis adviser. During the second year of study, students will work closely with their thesis adviser to carry out their research and write the thesis.

Program requirements for the master of science degree include: 1) full-time study or the equivalent for a minimum of one year; 2) completion of the 16-credit core curriculum during the first year of study, which includes Theoretical Approaches to Family and Consumer Studies (FCS 893), Research Seminar (FCS 894), Sociological Methods I: Intermediate Social Statistics (Soc 801), and Sociological Methods II: Research Design (Soc 802); 3) completion of 20 additional semester hours of course work, of which up to six hours may consist of thesis work and six of independent study, and 4) successful completion and defense of a thesis in accordance with the guidelines available in the Graduate Student Handbook.

Admission to the program is limited to those students who desire the M.S. degree and whose undergraduate record demonstrates good academic standing. Students with an undergraduate degree in any related field are encouraged to apply. If the student's undergraduate program did not include an introductory statistics course or the equivalent, successful completion of such a course will be required before beginning graduate work. Application for admission must be made on the appropriate forms obtainable from the Graduate School. Students seeking admission must submit recent scores from the Graduate Record Examination.

707. PRACTICUM
Supervised in-depth experience with observation and participation to increase the student's understanding in a specific area of child, family, or consumer studies. A) Child; B) Family; C) Consumer Studies. Prereq: FCS major: permission. 1-6 cr. Cr/F.

733. SUPERVISING PROGRAMS FOR YOUNG CHILDREN
Philosophical bases and theoretical rationales of various programs for young children; program alternatives and resources; issues in administration including supervision, finances, and regulations. Prereq: permission. 4 cr. (Fall semester only.)

734. CURRICULUM FOR YOUNG CHILDREN
Designing and implementing developmentally appropriate activities for young children; assessing the effectiveness of activities; evaluating materials and equipment. Prereq: FCS 733; permission. 4 cr. (Spring semester only.)

743. PARENTS, CHILDREN, AND PROFESSIONALS
Various professional roles relating to families; educational and therapeutic models of helping professionals; focus on the relative roles of parents and professionals in enhancing child development. Prereq: permission. 4 cr. (Fall semester only.)

744. APPLIED FAMILY SYSTEMS
Family systems theory; the dynamics of family systems and system change; educational strategies for working with families. Prereq: permission. 4 cr. (Spring semester only.)

753. FAMILY ECONOMICS
The effect of economic change on families and family income and resource allocation. Prereq: one course in economics or permission. 4 cr.

754. CONSUMERS IN SOCIETY
Problems and issues facing selected groups of consumers, e.g., the elderly, the poor, children and adolescents, women, etc. Prereq: permission. 4 cr.

763. CONSUMER DECISION MAKING
Examination of individual and group consumer decision-making strategies and styles, including information acquisition, information processing, negotiation, and power. Prereq: permission. 4 cr.

791. METHODS OF TEACHING
Curriculum materials, methods, and resources in teaching. 4 cr.

797. SPECIAL TOPICS
Highly focused examination of a particular theoretical, methodological, or policy issue. Prereq: permission. 4 cr.

843. AMERICAN FAMILIES IN POVERTY
Problems of economically deprived rural and urban families. Objective, intellectual, and human involvement in dealing with poor families. Understanding the strengths and weaknesses typical of American families in poverty. 4 cr. (Not offered every year.)

844. CHILDREN IN THE FAMILY
Advanced seminar focusing on the family environment as a context for child development; relationships between parents and children, current theories and research. 4 cr.

846. CRITICAL PROBLEMS IN FAMILY LIFE
Evaluation of the needs and resources of families with critical problems; maturational and situational sources of stress influencing the contemporary American family; students will demonstrate mastery of theoretical concepts by developing self-help strategies to be used by families experiencing stress. 4 cr.

893. THEORETICAL APPROACHES TO FAMILY AND CONSUMER STUDIES
Scientific knowledge and the scientific method as it applies to family and consumer studies; the relationship between theory and research; why and how theories change; major theories in historical context. Coreq: concurrent registration in Soc 801. Prereq: permission. 4 cr.

894. RESEARCH SEMINAR
Critical assessment of research reports and other professional papers in family and consumer studies; development and oral presentation of thesis research proposals. Coreq: Soc 802. Prereq: FCS 893, Soc 801, and permission. 4 cr.
**895. SEMINAR AND SPECIAL PROBLEMS**
A) Consumer Research; B) Family Relations; C) Education; D) Family Resource Management; and E) Human Development. The student will contribute to a selective review and critical evaluation of the research and current literature and an examination of issues and trends. Independent projects may be a part of the experience. These seminars are open to graduate students with sufficient background and will not be scheduled every semester. One or more semesters, maximum of 4 credits in one area. 2–4 cr.

**897. ADVANCED RESEARCH SEMINAR**
Interdisciplinary approach to research in child, family, and consumer studies. Emphasis on the multidimensionality of family problems, appropriate research strategies, and critical analysis of current literature. 4 cr.

**899. MASTER'S THESIS**
6 cr.

---

**Forest Resources (FoRs)**

**Chairperson:** Harold W. Hocker, Jr.

**PROFESSORS:** James P. Barrett; Gordon L. Byers; Nicolas Engalichev; Robert D. Harter; John L. Hill; Harold W. Hocker, Jr.; William Mautz; David P. Olson

**ASSOCIATE PROFESSORS:** Nobel K. Peterson; R. Marcel Reeves; Richard R. Weyrick

**ASSISTANT PROFESSORS:** Robert T. Eckert; Theodore E. Howard; Donald R. Miller; Richard G. Parker

**ADJUNCT PROFESSOR:** Robert S. Pierce

**ADJUNCT ASSOCIATE PROFESSORS:** C. Anthony Federer; James W. Hornbeck; William B. Leak; Sidney A.L. Pilgrim; Lawrence O. Safford

**ADJUNCT ASSISTANT PROFESSORS:** Maurice E. Dementir, Jr.; Peter W. Garrett

**GRADUATE PROGRAM COORDINATOR:**

David P. Olson

The Department of Forest Resources offers master of science degrees in three areas.

**Forest Resources:** forest-resource management, forest recreation, forest marketing, wood-industry management, forest mensuration, forest-tree improvement, and wood science and technology.

**Soil science:** soil chemistry, soil classification and genesis, soil microbiology, and forest soils.

**Wildlife:** habitat evaluation and management, wildlife nutrition and physiology, and land-use planning for wildlife.

**Entrance Requirements**

Students admitted to these programs are expected to have completed either an undergraduate degree in the field in which they plan to specialize or show adequate preparation in the basic support courses of the field. Students with good undergraduate records who lack a background in a particular field may be admitted to a program, provided they are prepared to correct the deficiencies. All entering students must have taken at least one statistics course or do so at the graduate level. The Graduate Record Examination (aptitude) is required of all applicants.

Students entering the forestry program may elect to develop concentrations within forest management or forest/wood science. Students with a forest management emphasis are usually expected to have completed a bachelor's degree in forestry equivalent to that obtained at a school accredited by the Society of American Foresters. Students with a forest science or wood science interest should have an appropriate background for study in the specific interest area. Entering students in soil science are required to have adequate preparation in the physical sciences as well as biological or earth sciences. Students interested in wildlife are expected to have adequate preparation in biological sciences, chemistry, and mathematics.

**Academic Requirements**

An M.S. degree is conferred upon successful completion of the following: 1) A program amounting to not less than 30 credits, including the following course requirements or equivalent: FoRs 893-894, Seminar, 2 cr; FoRs 803, Approach to Research, 2 cr; a quantitative methods course; 2) FoRs 898, Directed Research, 4-6 cr. or FoRs 899, Thesis, 6-10 cr.; and 3) a final oral and/or written examination.

**Intercollege Cooperative Programs**

The Department of Forest Resources participates in three doctoral degree programs with other departments in the University. A Ph.D. program in chemistry is available to students in soil science through the chemistry department. A Ph.D. program in genetics is available to students in forest resources through the genetics program. Through informal cooperative arrangements with the electrical and mechanical engineering departments, opportunities are available for doctoral study in wood science and technology in the College of Engineering and Physical Sciences, leading to the Ph.D. degree in engineering (theoretical and applied mechanics or signal processing).

**Forest Resources (FoRs)**

**711. STATISTICAL METHODS II**

Intermediate course; basic concepts of sampling, linear models and analyses for one-way and multiway classification, factorial arrangement of treatments, multiple regression, and covariance. Computer programs used in analyzing data. Examples from environmental sciences. (Also offered as PSc 711.) Prereq: applied statistics or equivalent. 4 cr.

**712. SAMPLING TECHNIQUES**

Techniques of sampling finite populations in environmental sciences; choice of sampling unit and frame, estimation of sample size, confidence limits, and comparisons of sample designs. Prereq: applied statistics or equivalent. 2–4 cr.

**713. QUANTITATIVE ECOLOGY**

Applied quantitative techniques: basic concepts in probability and statistics applied to ecological systems; population dynamics; spatial patterns; species abundance and diversity; classical community ordination; production; and energy and nutrient flow. Additional credit for in-depth mathematical analysis of a particular topic. Prereq: introductory courses in calculus, statistics, and ecology. 3 or 4 cr.
720. FOREST GENETICS
Genetics of forest tree improvement; variation in natural populations, breeding methods, physiological characteristics, quantitative data analysis. Prereq: Prin of genetics; silviculture; statistics; or permission. Transportation fee, Lab. 3 cr. (Not offered every year.)

722. ADVANCED SILVICULTURE
Intensive silviculture of forest stands. Regeneration (e.g., alternative regeneration methods and site preparation); stand management (e.g., thinning schedules and fertilization). Prereq: Silviculture; permission. Transportation fee. 3 cr. (Not offered every year.)

734. FOREST PROTECTION SEMINAR
Discussion and special problems based on principles and techniques of forest protection. Prereq: permission. 3 cr.

745. FOREST MANAGEMENT
Forest land ownership; management objectives; forest inventory regulation and economic analysis; forest administration; professional responsibilities and opportunities. Transportation fee. Lab. 4 cr.

753. QUANTITATIVE METHODS FOR FOREST RESOURCE MANAGEMENT
Quantitative tools for decision making in forest resource management activities; capital investment analysis, break-even and marginal analysis, linear and dynamic programming, simulation, decision analysis. Prereq: calculus; forest economics; statistics; mensuration. Lab. 4 cr.

754. WOOD PRODUCTS MANUFACTURE AND MARKETING
Wood products from harvesting and procurement of raw material to finished product processes; management decisions, marketing, and promotion problems. All-day field trips to manufacturing plants and, occasionally, associated harvesting operations, weather permitting. Transportation fee. Prereq: wood sci. and tech. or permission. Lab. 4 cr.

755. REGIONAL SILVICULTURE AND FOREST MANAGEMENT
Extended field trip to another forest region. Prereq: FoRs 745; or permission. Staff. (Limited enrollment.) 2 cr. Cr/F.

757. BASICS OF REMOTE SENSING
Fundamentals for application of photographic and nonphotographic sensors to information gathering in natural resource fields; emphasis is on the interpretation of aerial photographs. Applications to forestry, wildlife, land-use planning, earth sciences, soils, hydrology, and engineering. Lab. 2 cr.

758. APPLICATIONS OF REMOTE SENSING
Applications of remote sensing to the student's disciplinary interest. Student projects developed using available conventional aerial photography or other imagery. Prereq: FoRs 757 or equivalent. Transportation fee. Lab. 2 cr.

764/864. FOREST INDUSTRY ECONOMICS
Business methods and economics in the forest industry; planning, minimum cost operations, and profitable use of capital in a forest enterprise. Individual projects. Prereq: permission. 4 cr. (Not offered every year.)

797. FOREST RECREATION SEMINAR
Recreational use of nonurban lands; economics of public and private developments; planning for state and private recreational use, social aspects. Class project. Prereq: permission. 4 cr.

798. FOREST RESOURCES MANAGEMENT SEMINAR
The integration of demands from human population changes and needs on forest productivity through planning. The recognition of environmental quality and ecological concepts as planning criteria. Class discussions and group planning are a critical component. Prereq: FoRs 745. Lab. 4 cr.

801. FOREST MANAGEMENT SEMINAR
Seminar discussions of current literature, plans, principles, and new developments in the general field of forest management. Transportation fee. Prereq: permission. 2 cr.

803. APPROACH TO RESEARCH
The meaning of science and the application of logic in the scientific method. Principles and techniques of scientific research. Survey of experimental design procedures. Organization of investigative work, problem analyses, working plans, and scientific writing. (Also offered as REco 803.) Prereq: permission. 2 cr.

805. UTILIZATION SEMINAR
Conferences, discussions, and reports on assigned topics. Consideration of current literature and developments in the general field of wood utilization. Prereq: permission. 2 cr.

806. FORESTRY ECONOMICS SEMINAR
Discussions and reports on current economic and policy issues affecting forest resources and their management. Prereq: permission. 1-4 cr. (Not offered every year.)

816. QUANTITATIVE FOREST ECOLOGY SEMINAR
Preparation, presentation, and discussion of recent topics in quantitative ecology such as remote sensing, population growth, competition between species, modeling of a population, and energy flow. Seminar is 2 credits; an additional 2 credits available for an in-depth study of a particular topic. 2-4 cr.

893, 894. NATURAL AND ENVIRONMENTAL RESOURCES SEMINAR
Presentation and discussion of recent research, literature, and policy problems in the natural and social sciences influencing resource use. (Also offered as REco 893, 894.) 1 cr. Cr/F.

895, 896. INVESTIGATIONS IN:

898. DIRECTED RESEARCH
Hours and credits to be arranged. Prereq: permission. Prereq: permission. 2-6 cr. Cr/F.
Soil Science (Soil)

702. CHEMISTRY OF SOILS
Chemical composition of soil; colloidal phenomena and the exchange and fixation of elements, cation exchange capacity and source of negative charge; inorganic reactions in soil and their effect on soil properties. Prereq: one year of college chemistry or permission. 3 cr.

704. SOIL CLASSIFICATION AND MAPPING
Soil genesis, morphology, classification, and mapping; major classification systems used in the U.S. and throughout the world as they relate to human uses of the soil. Prereq: soils and the environment; intro geology; or permission. Transportation fee. 4 cr.

709. SOILS AND COMMUNITY PLANNING
Using a town plan and soils map, students develop reports for multiple urban and rural land-use—housing, sewage, recreation, transportation, runoff, etc. USDA soil classification system; Soil Conservation Service rating criteria; New Hampshire soils. Guest lecturers. Prereq: permission. 2 cr.

795, 796. INDEPENDENT WORK IN SOIL SCIENCE
A) Soil-Plant Relationships; B) Physics of Soils; C) Chemistry of Soils; D) Soil Classification; E) Forest Soils. Prereq: permission. 1-4 cr.

802. SPECIAL TOPICS IN SOIL SCIENCE
Topics may include soil mineralogy, advanced soil chemistry, soil physical chemistry, or others as the need arises. Seminar or lecture format as appropriate to the topic. Prereq: permission. 1-3 cr. Cr/F. (Offered only with sufficient demand.)

895, 896. INDEPENDENT WORK IN SOIL SCIENCE
A) Soil-Plant Relationships; B) Physics of Soils; C) Chemistry of Soils; D) Soil Classification; E) Forest Soils. Elective only after consultation with the instructor in charge. 1-4 cr.

Wildlife (Wild)

737. GAME MANAGEMENT I
Biological characteristics, habitat requirements, research and management practices of upland game birds and big game animals. Several all-day field trips required (possibly on weekends) to New England wildlife areas. Transportation fee. Prereq: permission. Lab. 4 cr.

738. GAME MANAGEMENT II
Biological characteristics, habitat requirements, research and management practices of small game animals, furbearers, and predators. Several all-day field trips required (possibly on weekends) to New England wildlife areas. Transportation fee. Prereq: wildlife management major or permission. Lab. 4 cr.

809, 810. WILDLIFE MANAGEMENT SEMINAR
Discussions and assigned reports on current investigations and developments in wildlife management. Prereq: undergraduate courses in wildlife management; permission. 1-4 cr.

Genetics Program (Gen)

Chairperson: J. Brent Loy

PROFESSORS: James P. Barrett; Thomas P. Fairchild; Donald M. Green; Harold W. Hocker, Jr.; Frank K. Hoornbeek; Yun-Tzu Kiang; J. Brent Loy; Lincoln C. Perce; Owen M. Rekers

ASSOCIATE PROFESSORS: Subhash C. Minocha; Willard E. Urban, Jr.; Robert M. Zsigray

ASSISTANT PROFESSORS: Clyde L. Denis; Robert T. Eckert; Florence E. Farber

ADJUNCT ASSISTANT PROFESSORS: Maurice E. Demeritt, Jr.; Peter W. Garrett

GRADUATE PROGRAM COORDINATOR: J. Brent Loy

The interdepartmental Genetics Program offers graduate work leading to the degrees of master of science and doctor of philosophy.

Qualified students are admitted to the program with the approval of the genetics faculty and the chairperson of the department in which they have a major interest. Undergraduate preparation should include mathematics through calculus, chemistry through organic, physics, animal or plant biology courses and laboratories, and genetics with laboratory. Preparation in statistics and computer science is desirable. All students will be examined shortly after they arrive in order to diagnose their preparation in basic genetics. Students lacking the appropriate preparation may be admitted but will be required to complete certain courses without graduate credit. The aptitude and advanced (biology) sections of the Graduate Record Examination are required.

The program is conducted by faculty members from animal sciences, biochemistry, botany, forest resources, microbiology, plant science, and zoology, as well as faculty from the Agricultural Experiment Station and the U.S. Forest Service, Northeastern Forest Experiment Station.

The core curriculum in genetics requires students in the Ph.D. program to take a minimum of one course from each of the following groups of courses: 1) Population Genetics—Gen 705; 2) Molecular Genetics—Biochemical Genetics, Gen 771 or 772; Microbial Genetics, Micr 804; Regulation of Gene Activity, PlSc 803j; 3) Classical Genetics—Plant Genetics, PlSc 851; Cytogenetics, PlSc 853; Quantitative Genetics and Selection, AnSc 812; Human Genetics, Zool 707. All students are required to participate in a one-year directed teaching experience and are required to attend genetics seminars.

The requirements for the M.S. candidates will be a minimum of one course from each of any two of the above three groups of courses.

Master of Science Degree

The program for the master of science degree is formulated by the student with the approval of the guidance committee. Candidates for the degree will be required to complete a thesis, pass an oral examination covering graduate courses and thesis, and complete courses designated in the core curriculum.

Doctor of Philosophy Degree

The chairperson of the Genetics Program, with the concurrence of the chairperson of the department
of major interest, will nominate the student's guidance and doctoral committees, which will administer the qualifying and final examinations. Specific course requirements will be developed by the student and the guidance committee, and will include the courses in the core curriculum. Students must complete a dissertation on original research in genetics.

The guidance committee for each graduate student will determine whether a foreign language will be required.

705. POPULATION GENETICS
Population growth and regulation; genetic variation; factors affecting gene frequency; ecological genetics. (Also offered as PlSc 705.) Prereq: prin of genetics or permission. 4 cr. (Not offered every year.)

706. GENETICS LABORATORY
Experiments and demonstrations in animal, plant, and microbial genetics and cytogenetics, including research techniques applicable to biochemical, population, and transmission genetics. Prereq: prin of genetics or equivalent. 3 cr.

740. EVOLUTIONARY BIOLOGY
Origin of source of genetic variation, population structure, mechanisms of evolution; molecular evolution; ecological adaptation in animals, plants, and man; community structure and evolution. (Also offered as PlSc 740.) Prereq: prin of genetics or permission. 4 cr. (Not offered every year.)

771. BIOCHEMICAL GENETICS
Mechanisms of storage, replication, transmission, transcription, recombination, mutation, and expression of genetic information by cells and viruses. (Also offered as Bchm 771.) Prereq: Bchm 751 or permission. 3 cr.

772. INTRODUCTORY LABORATORY IN MOLECULAR GENETIC TECHNIQUES
Modern biochemical gene manipulation techniques, including the genetic, physical, and enzymatic characterization of gene vectors, gene cloning, construction of genetic probes, and sequencing of nucleic acids. (Also offered as Bchm 772.) Prereq: Bchm 751-752; either Bchm 771, Bchm 781, or Micr 804. 2 cr.

802. DESIGN OF EXPERIMENTS
Practical application of common experimental designs to research problems: the use of design to compensate for interfering factors, treatment selection (particularly when several factors are suspected of having an influence on response), and computer aided analysis of results. (Also offered as PlSc 802.) Prereq: statistics. 4 cr. (Not offered every year.)

812. ADVANCED STATISTICAL METHODS
Methods and techniques for handling typical problems that arise in the analysis of data. Topics include the multiple comparison of means, analysis of unweighted means, proportional subclass numbers, weighted squares of means, orthogonal polynomials, and least squares. Prereq: FoRs 711; digital computer systems; or permission. 3 cr. (Not offered every year.)

895, 896. SPECIAL TOPICS IN GENETICS
Intended for study in specialty areas not ordinarily included in other courses. May involve formal classes, discussions, or independent investigations. Prereq: permission. 2-4 cr.

898. GENETICS SEMINAR
Presentation and discussion of selected genetic topics. 1 cr. (May be repeated.)

899. MASTER'S THESIS
6-10 cr.

999. DOCTORAL RESEARCH

Courses Available in Related Areas
These courses are fully described below and under the course of the appropriate department for the convenience of the student.

Animal Sciences

711. COMPARATIVE ANIMAL GENETICS
How heredity affects domestic animals, poultry, other mammals, and fish; emphasis on the organism and population. Quantitative inheritance; principles of selection; disease resistance; statistical and experimental techniques. Prereq: 4 cr. of genetics; or permission. Lab. 4 cr.

712. ANIMAL BREEDING AND IMPROVEMENT
Principles of selection and breeding systems as they apply to the genetic improvement of dairy cattle, livestock, and horses. Prereq: AnSc 711 or permission. Lab. 4 cr. (Not offered every year.)

812. QUANTITATIVE GENETICS AND SELECTION
Gene frequency, genetic and environmental variation, heritability, fitness, selection, inbreeding, outbreeding, correlated characters. Prereq: one course each in genetics and statistics. 3 cr. (Not offered every year.)

Forest Resources

711. STATISTICAL METHODS II
Intermediate course; basic concepts of sampling, linear models and analyses for one-way and multi-way classification, factorial arrangement of treatments, multiple regression, and covariance. Computer programs used in analyzing data. Examples from environmental sciences. Prereq: applied statistics I or equivalent. 4 cr.

720. FOREST GENETICS
Genetics of forest tree improvement; variation in natural populations, breeding methods, physiological characters, quantitative data analysis. Prereq: principles of genetics; silviculture; or permission. Transportation fee. Lab. 3 cr. (Not offered every year.)

Microbiology

804. MICROBIAL GENETICS
Expression, regulation, recombination, and transmission of genetic information in prokaryotic and eukaryotic microorganisms. Consideration of chromosomal inheritance. Prereq: gen micr; permission. Lab. 4 cr. (Not offered every year.)
Plant Science

773. METHODS AND THEORY OF PLANT BREEDING
Plant breeding systems for qualitative and quantitative plant improvement. Prereq: introductory genetics; introductory statistics; /or permission. 3 cr. (Not offered every year.)

851. PLANT GENETICS
Euploidy, aneuploidy, cytoplasmic inheritance, somatic cell genetics, and genetics of disease resistance in plants. Prereq: intro genetics. 3 cr. (Not offered every year.)

853. CYTOGENETICS
Chromosome aberrations and their behavior. Effect of radiation on chromosomes. Mapping and laboratory techniques in cytogenetic analysis. Prereq: genetics; cytology. 3 cr. (Not offered every year.)

Zoology

707. HUMAN GENETICS
Inheritance patterns, gene and chromosome mutation rates and effects, linkage, and gene frequency. Prereq: prin of genetics or permission. 4 cr. (Not offered every year.)

History (Hist)

Chairperson: Donald J. Wilcox

PROFESSORS: Charles E. Clark; Robert C. Gilmore; Hans Hellbrunner; Charles A. Jellison, Jr.; William R. Jones; David F. Long; Francis D. McCann, Jr.; Robert M. Mennel; Darrett B. Rutman; Cecil J. Schner; Harvard Sickoff; John O. Voll; Douglas L. Wheeler; Donald J. Wilcox

ASSOCIATE PROFESSORS: Jeffrey M. Detendorf; Marion E. James; Allen B. Linden; Marc L. Schwarz

ASSISTANT PROFESSOR: Janet L. Polasky

GRADUATE PROGRAM COORDINATOR: Robert M. Mennel

Admission

The department usually requires completion on the undergraduate level of eight semester courses in history together with some preparation in other areas of the humanities and social sciences.

Applicants for admission to any graduate program in history should have a minimum of B+ average in history and allied humanities and social sciences. In addition, applicants must submit Aptitude (verbal and quantitative) and Advanced History scores on the Graduate Record Examinations. The department assesses the student's entire application, including letters of recommendation, in making its decision on admission. Deficiencies in an undergraduate program may be rectified by course work as a special student, but such course work cannot be used to satisfy requirements for an advanced degree. The department also recommends that a beginning graduate student have some training in a foreign language. Students in seminar or reading courses in other than American history are often required to have a reading knowledge of at least one foreign language appropriate to the particular course. Applicants intending the Ph.D. degree should include with their applications a personal statement indicating their reason for undertaking graduate study at the University of New Hampshire.

All graduate students are reviewed annually by the faculty of the department. A student accumulating two course failures is automatically barred from continuing in any degree program in history, but the department reserves the right to exclude others whose overall performance does not give reasonable assurance of a successful program completion. Students are allowed no more than three attempts to meet any language requirements.

Degree Programs

The department offers the master of arts and doctor of philosophy degrees. The general degree requirements are outlined below, but specific programs are tailored to the goals of the student. The graduate program coordinator of the department serves as the initial adviser to entering graduate students, the adviser-of-record to all students throughout their years of graduate study, and, with the Graduate Committee of the department, has general supervision of all student programs. By the beginning of a student's second semester in residence, the student intending a degree will ordinarily have selected a single member of the faculty as the program chairperson and, with that faculty member as principal adviser, will have worked out a specific program of studies leading toward a degree.

The graduate program coordinator must approve the registration of special students and students from other departments in graduate history courses. The department welcomes the opportunity to work with students from other departments.

Master of Arts

The student intending the M.A. degree has the choice of designing a specific program to meet either of two sets of requirements; the first allows substantial training and research in a single subfield of history, the second, within a foundation of broader coursework; the second allows substantial breadth over at least two subfields. The subfields in history are as follows: the Ancient World; Medieval Europe; Early Modern Europe; Modern Europe; European Intellectual History; Medieval England; Early Modern England; Modern England; Iberian History; Russia; Early American History; Modern American History; Colonial Latin America; Modern Latin America; the Far East; the Near East; Sub-Saharan Africa; and the History of Science.

Completion of the degree under either set of requirements normally requires between three and four semesters of full-time study (three to four courses per semester). Either plan may prepare a student for entrance to the Ph.D. program. Plan B is particularly recommended for practicing teachers.

Plan A: The student shall complete successfully at least eight courses in history numbered above 700, of which a minimum of four shall be numbered between 807 and 896. In addition, the student shall prepare within the context of any single subfield a thesis meriting the unanimous approval of a thesis committee consisting of the student's program chairperson, under whose direction the thesis shall be prepared, and two other members of the graduate faculty (at least one of them in history). The preparation of the thesis is considered to be the equivalent of two additional semester courses each.
bearing the designation History 899 for the purpose of meeting the general regulations of the Graduate School.

Plan B: The student shall complete successfully at least ten courses in history numbered above 700 of which a minimum of four shall be numbered between 889 and 896. Following completion of coursework or during the final semester of coursework, the student shall demonstrate a broad competence in two subfields of history ordinarily in oral examination before a committee of three consisting of the student's program chairperson and two other members of the faculty in history. Students proceeding under Plan B shall have stood examination no less than three weeks prior to the Commencement at which the degree is to be granted.

Students should note that Plan A thesis readings and Plan B examinations during the summer are available only with the consent of all faculty involved.

Doctor of Philosophy

The department offers work leading toward the degree of doctor of philosophy with a concentration in either of the two subfields of American history. This degree requires formal coursework; it is awarded in recognition of high attainment and ability in history as shown by performance in qualifying examinations and by preparation and defense of a dissertation. Normally an entering student intending to be a candidate for the doctorate will complete an M.A. program as a prerequisite. Students with the M.A. from another institution cannot begin the doctoral program immediately, and a student in residence can, with the consent of the department, omit the M.A. and proceed directly toward the Ph.D.

The doctoral student's primary intellectual relationship is with that member of the faculty under whom he or she will write the dissertation and who serves as the student's program chairperson. This relationship should be established early and a broad program supportive of the intended area of dissertation research worked out in consultation with the program chairperson. The program, which must be approved by the Graduate Committee of the department, shall involve each of the following:

1) Two required research seminars in American history, one in early America and one in modern America.

The history department offers these required research seminars in the first semester of each year, alternating between the two fields. Each entering student, with or without the M.A., should take one in each of the first two years in the program. Other seminars and reading courses at the 800 level will also form part of the program drawn up in consultation with the student's program chairperson.

2) Required courses in historiography and historical methods. The history department will offer one of these courses in the second semester of each year, on an alternate-year basis. Each entering student, with or without the M.A., should take one in each of the first two years in the program.

Note: No student will be considered to be intending to pursue a Ph.D. program who is not in the process of satisfying these requirements. Only students who are intending to pursue the Ph.D. are considered for graduate assistantships.

3) Two languages or one language and a special research technique, whichever is deemed most relevant to the area of research.

4) The entirety of American history, with accent upon either of the subfields of early or modern America, and two subfields outside of American history.

5) A cognate field outside of history entirely or a subfield of non-Western history.

Students' preparations for the qualifying examination will be guided by representatives of each subfield or cognate field in their programs. These representatives will make up a student's guidance and, subsequently, examining and dissertation committees. Students will normally not take the qualifying examination until they have completed sixteen semester courses or more (including work undertaken in a master's program). This requires three years of study beyond the bachelor's degree, the greater portion of which is ordinarily accomplished in full residence. Qualifying examinations will test a mastery of broad subfields of historical knowledge rather than of particular courses. Students are, therefore, expected to read widely and independently in order to expand their knowledge beyond formal coursework and to become acquainted with aspects of the subfields not covered in that coursework.

Normally there will be eight steps in attaining the degree. Students are expected to be registered in the Ph.D. program for all regular academic semesters during their progress.

1) Satisfaction of historiography, historical methods, and research seminars requirement.

2) Correction of any deficiencies in the student's previous program, for example, lack of a first language.

3) The demonstration of proficiency in a second language or a special research technique. (Departmental regulations regarding the latter are available from the director of graduate studies.)

4) Successful performance in a two-part qualifying examination: the first part, a four-hour written examination covering breadth of knowledge in the subfield of specialization (early or modern American history); the second part, an oral examination covering all subfields and (if any) the cognate field specified in the program.

5) Within the same semester as step three, admission to candidacy and the approval by the candidate's dissertation committee of the specified topic and research plan for the dissertation.

6) Submission of an acceptable dissertation no more than three years after advancement to candidacy.

7) Successful public defense of the dissertation before the dissertation committee.

8) Formal submission of the dissertation to the department and Graduate School at least two weeks prior to the commencement at which the degree is to be conferred.

Apprenticeship

The department considers that graduate work in history, and particularly doctoral work, is professional training. All entering graduate students intending a Ph.D. are, consequently, required (and all others are urged) to participate on a continuing basis in History 801, Proseminar: History as a Profession. Moreover, the department recognizes the dual concerns of the historian's life—teaching and research; when feasible, therefore, all doctoral students are expected to undertake teaching in the department during a part of their residence. Participation in pro-seminar and in teaching constitutes an apprenticeship in conjunction with formal study.
774. HISTORIOGRAPHY
Analysis of ancient and modern historians. Required of all entering Ph.D. candidates; open to undergraduates with permission. 4 cr. (Not offered every year.)

775. HISTORICAL METHODS
Introduction to contemporary historical methods. Required of all entering Ph.D. candidates; open to undergraduates with permission. 4 cr. (Not offered every year.)

789. SEMINAR IN THE HISTORY OF SCIENCE
Selected topics conducted through special lectures, individual study, oral and written reports. Subject varies. Cannot be used for credit in history without permission of the department. Prereq: permission of adviser and instructor. 4 cr.

790. QUANTIFICATION AND COMPUTERS FOR THE HISTORIAN
The historian's use of computers and statistics; practical applications of both interactive terminal operations and batch processing. Data generation and processing, computer languages (BASIC, FORTRAN), programming and library programs, elementary statistics; students will undertake operations of their own on material supplied and will consider particular quantitative studies in history in terms of techniques used. No previous knowledge of computers or college mathematics required. Prereq: admission as an undergraduate major or graduate student in history or permission. 4 cr.

797. COLLOQUIA IN HISTORY
Selected topics in American, European, and non-Western history. Students must select section in department office at the time of registration. Intended primarily for undergraduate history majors. 4 cr.

Graduate Seminars and Tutorials

801. PROSEMINAR: HISTORY AS A PROFESSION
Entering graduate students intending the doctorate and all advanced graduate students serving as research, program, or teaching assistants in the department meet periodically to discuss the obligations and mechanics of the historian's profession, including teaching, scholarship, university and college structures, and the role of the faculty therein. 0 cr.

803. EARLY AMERICAN HISTORY
Advanced study in early American history. The development of an Anglo-American society and culture along the eastern seaboard of North America, 1600-1750. 4 cr.

805, 806. AMERICA IN THE 18TH CENTURY AND THE REVOLUTION
Advanced study in American Colonial and revolutionary history from 1740 through the adoption of the Constitution and the establishment of Washington's first administration. 4 cr.

810. AMERICAN STUDIES: NEW ENGLAND CULTURE AND CHANGING TIMES
Advanced study in New England culture. A team of three instructors from history, literature, and art investigate major contributions New England has made to American life. Focus on the Puritan era, 1620-90; the Transcendental period, 1830-60; and the period of emerging industrialism in the late 19th century. 4 cr.

811, 812. 19TH-CENTURY AMERICA
Advanced study of 19th-century America. Domestic and international factors in the development of the American republic, its institutions and people, from the inception of the new nation in 1789 to the emergence of the United States as a world power in 1900. 4 cr.

815, 816. 20TH-CENTURY AMERICA
Advanced study of the U.S. after 1900: cultural, political, and social factors causing major changes in American life. Semester I: progressivism through the New Deal. Semester II: World War II to the present. 4 cr.

819, 820. THE FOREIGN RELATIONS OF THE UNITED STATES
Advanced study in the foreign relations of the U.S. Primarily the history of American diplomacy, with attention given to the nondiplomatic aspects. Semester I: American Revolution to 1890. Semester II: 1890 to date. 4 cr.

821, 822. HISTORY OF AMERICAN THOUGHT
Advanced study in the history of American thought. Significant American thinkers considered in their social context. Semester I: 1600-1860. Semester II: 1860 to present. 4 cr.

824. AMERICAN URBAN HISTORY
Advanced study in the urbanization process from the colonial period to the present. 4 cr.

831. LATIN-AMERICAN HISTORY: REGIONAL OR COUNTRY STUDIES
Advanced study of Latin America; readings and discussions of literature relative to region or country being studied. 4 cr.

832. LATIN-AMERICAN HISTORY: TOPICAL STUDIES
Advanced study of Latin America; reading and discussion of literature relative to selected topics. 4 cr.

839, 840. THREE MEDIEVAL CIVILIZATIONS
Advanced study in medieval civilizations. Demise of classical antiquity in the lands bordering the Mediterranean, and the genesis and fruition of three new cultural traditions: Latin Christian, Islamic, and Byzantine. Religious, literary, and scholarly survivals and innovations from 400 A.D. to 1400 A.D. 4 cr.

841. AGE OF THE RENAISSANCE
Advanced study in the Renaissance. Its birth, economic, social, and political roots, and the flowering of Renaissance culture. Covers period from 1300-1600, with stress on Italy. 4 cr.

842. AGE OF REFORMATION
Advanced study in the reformation of church, society, and human values that shook Europe in the 16th century, and its roots in the 14th and 15th centuries. 4 cr.
847. FRANCE FROM LOUIS XIV THROUGH THE FRENCH REVOLUTION
Advanced study of France from Louis XIV through the French Revolution. Pressures and influences that led to the French Revolution. 4 cr.

848. MODERN FRANCE
Advanced study of French society from Napoleon to Mitterand, including the Revolution of 1848 and the Paris Commune; World Wars and the Vichy regime; Existentialism, DeGaulle, and the Revolt of May-June 1968. 4 cr.

851, 852. EUROPEAN INTELLECTUAL HISTORY
Advanced study in the European intellectual tradition from the Greek philosophers to the end of World War II. How basic ideas have developed out of previous modes of thought in response to new challenges. 4 cr.

856. 20TH-CENTURY EUROPE
Advanced study of 20th-century Europe. World War I, European totalitarianisms, World War II, the loss of European primacy, and the search for a new Europe. 4 cr.

859. HISTORY OF SPAIN AND PORTUGAL
Advanced study of Iberian states and their peoples from the coming of liberalism to the present. Failure of Iberian and liberal government, Political and social change, imperial and intellectual movements, influence of Western European thought and activity. 4 cr.

861, 862. ENGLAND IN THE TUDOR AND STUART PERIODS
Advanced study of England during the Tudor and Stuart periods. Political, religious, socio-economic, and intellectual forces for change at work in England from the accession of Henry VII to the revolution of 1688-89. 4 cr.

863. RUSSIA: ORIGINS TO MODERNIZATION
Advanced study of Russia from its foundation to emancipation and reform. Political developments, foreign relations, intellectual and ideological currents. 4 cr.

864. RUSSIA: FROM TSARIST TO SOVIET EMPIRE
Advanced study of modern Russia. The cost of modernization; Leninist and Stalinist revolutions; Soviet consolidation. 4 cr.

867. EARLY MODERN GERMANY: REFORMATION TO THE REVOLUTION OF 1848
Advanced study of early modern Germany. Conflict between Holy Roman Empire and petty states; rise of Prussian; religious conflict and Enlightenment. 4 cr.

868. MODERN GERMANY SINCE 1848
Advanced study of early modern Germany. Bismarck and Imperial Germany; Weimar and the rise of Hitler; post-World War II-divided Germany. 4 cr.

877. THE HELLENISTIC-ROMAN WORLD
Advanced study of the Mediterranean and Near East from the time of Alexander to the reign of Constantine: the main political and social developments; artistic, scientific, philosophical, and religious trends, with particular emphasis on the rise of Christianity, Zoroastrianism, and the general religious climate that prepared the way for Islam. 4 cr.

881. HISTORY OF MODERN CHINA, 1839 TO THE PRESENT
Advanced study in the modernization of China. Political, social, and cultural changes that have occurred in China from its early contacts with the West. 4 cr.

883. RELIGION IN WORLD HISTORY
Advanced study in the religious experience of man from the perspective of world history. The major modes of religion; development of the major religious traditions and institutions. 4 cr.

884. HISTORY OF SOUTHERN AFRICA SINCE 1820
Advanced study of southern Africa. Struggle for political and economic control in the only region of Africa where European groups remain in power. Effect of European imperialism, European-settler nationalism, racial conflict, economic competition and industrialization, apartheid, and assimilation with special attention to development of European hegemony. Official American policy. 4 cr.

885. THE MODERN MIDDLE EAST
Advanced study of the Middle East from 18th century to the present. Problems created by modernization and reform of the traditional society; conservative reaction to reform, impact of nationalism, and appearance of new ideologies. 4 cr.

889, 890. SEMINAR IN AMERICAN HISTORY
1) Early-American Society; 2) Early-American Culture; 3) Revolutionary Period; 4) 19th Century; 5) 20th Century. 3 cr.

891, 892. SEMINAR IN EUROPEAN HISTORY
1) Medieval; 2) Early Modern; 3) Modern. 3 cr.

893, 894. SEMINAR IN AFRICAN, ASIAN, LATIN-AMERICAN HISTORY
1) African; 2) Asian; 3) Latin American; 4) Middle East. 3 cr.

895, 896. TUTORIAL READING AND RESEARCH IN HISTORY
A) Early American History; B) American National History; C) Canada; D) Latin America; E) Medieval History; F) Early Modern Europe; G) Modern European History; H) Ancient History; I) Far East and India; J) Near East and Africa; K) European Historiography; L) American Historiography; M) Russia; N) World History; O) English History; P) New Hampshire History; Q) Historical Methodology; R) Irish History. Prereq: permission. 1-6 cr.

899. MASTER'S THESIS

999. DOCTORAL RESEARCH
Intercollege Course (Inco)

890. COLLEGE TEACHING
Acquisition of theoretical and practical knowledge of the basics of college teaching; the role of the college teacher in facilitating learning. Course participants will work to improve three aspects of their work: teaching methods with large and small groups, planning teaching sessions, and assessment of student learning. Participants will be encouraged to develop a teaching style that is effective and compatible with their philosophy, attitudes, and aptitudes. 2 cr. (Not offered every year.)

Master’s Continuing Enrollment (MCE)

890. MASTER’S CONTINUING ENROLLMENT
Master’s students who have completed all course requirements and have previously registered for the maximum number of thesis or project credits and are on campus completing their master’s program must register for Master’s Continuing Enrollment. MCE 890 is an enrollment designation that appears on the academic record. Students registered for MCE 890 are considered full-time; no credit hours are accumulated nor a grade given.

Mathematics (Math)

Chairperson: Richard H. Balomenos

PROFESSORS: Richard H. Balomenos; Homer F. Bechtell, Jr.; David M. Burton; Arthur H. Copeland, Jr.; A. Robb Jacoby; Loren D. Meeker; Eric A. Nordgren; James Radlow; Shepley L. Ross; Albert O. Shat; Robert J. Silverman; Donovan H. Van Osdol

ASSOCIATE PROFESSORS: Albert B. Bennett, Jr.; William E. Bonnice; Marie A. Gaudard; William E. Geeslin; Donald W. Hadwin; Samuel D. Shore

ASSISTANT PROFESSORS: Kenneth B. Constantine; Joan F. Mundy

GRADUATE PROGRAM COORDINATOR: Samuel D. Shore

Master of Science for Teachers

Admission requirements: Completion of all requirements for secondary school teacher certification in mathematics.

Degree requirements: 1) Ten semester courses approved by the department. These will normally be taken from the courses numbered 801–829 and will usually include the six courses numbered 803-808. 2) A comprehensive examination based primarily on material in courses 803-808. It is not possible to study full time during the academic year toward the master of science for teachers degree. The courses in this program are offered during summer sessions.

Master of Science in Mathematics

Admission requirements: Undergraduate courses in mathematics, preferably in analysis, algebra, or topology.

Degree requirements: Ten semester courses approved by the department and chosen from courses numbered 701-799 or 830-849; at least six of the ten courses must be from the 830-849 group. An oral comprehensive examination is required.

Doctor of Philosophy
The department offers programs leading to a Ph.D. in mathematics or mathematics education. A detailed description of the Ph.D. program is available from the department.

Admission requirements: same as for the master of science in mathematics.

Basic degree requirements: 1) all of the courses numbered 833-839; 2) experience in teaching equivalent to at least half-time for one year; and 3) written comprehensive examination in algebra, analysis, and topology.

Additional degree requirements for the Ph.D. in mathematics: 4) proficiency in reading mathematical literature in two of three languages: French, German, and Russian; 5) advanced work in a major field of the thesis and a minor (usually another major field of mathematics), with an oral examination in these two fields; and 6) a thesis that includes original results in mathematics. Thesis work is available in algebra, applied mathematics, statistics, analysis, and topology.

Additional degree requirements for the Ph.D. in mathematics education: 4) language requirement as in Ph.D. in mathematics except that mastery of an approved research tool may be substituted for one language; 5) advanced work in a major field of mathematics and a minor (usually education) with an oral examination in these two fields; and 6) a thesis that includes original results in mathematics education.

A maximum of four of the following courses may be applied to the degree of master of science in mathematics.

735. PROBABILITY
Sample spaces (discrete and continuous); random variables; conditional probability; moments; binomial, Poisson, and normal distributions; limit theorems for sums of random variables. Prereq: multidim calculus. 4 cr.

736. STATISTICS
Sampling theory, parameter estimation, hypothesis testing, regression, analysis of variance, nonparametric methods. Prereq: Math 735. 4 cr.

737. DECISION THEORY AND BAYESIAN METHODS
Utility, decision problems, prior and posterior distributions, sufficiency, estimation and hypothesis testing, linear models, and sequential sampling. Emphasis on applications to business and economics. (Also offered as Econ 737.) Prereq: Math 735. 4 cr. (Not offered every year.)

738. MULTIVARIATE STATISTICAL ANALYSIS
Multivariate distributions, estimation and hypothesis testing, principal components, canonical correlations, factor analysis, discriminant analysis.
739. LINEAR STATISTICAL MODELS
Estimation, testing, and diagnostic methods for linear regression, analysis of variance, and analysis of covariance. Some experience in the use of packaged statistical computer programs. Prereq: Math 736 and 762. 4 cr. (Not offered every year.)

740. NONPARAMETRIC STATISTICAL METHODS
Methods of nonparametric statistical inference for one-sample and two-sample problems, one-way and two-way layouts, correlation, and regression. Prereq: Math 736. 4 cr. (Not offered every year).

745-746. FOUNDATIONS OF APPLIED MATHEMATICS
Basic concepts and techniques of applied mathematics intended for graduate students of mathematics, engineering, and the sciences. Fourier series and transforms, Laplace transforms, optimization, linear spaces, eigenvalues, Sturm-Liouville systems, numerical methods, conformal mapping, residue theory. 4 cr.

753. NUMERICAL METHODS AND COMPUTERS I
Use of scientific subroutine and plotter-routine packages, floating point arithmetic, polynomial and cubic spline interpolation, implementation problems for linear and nonlinear equations, random numbers and Monte Carlo method, Romberg's method, optimization techniques. Selected algorithms will be programmed for computer solution. (Also offered as C'S 753.) Prereq: calculus II; intro programming and FORTRAN. 4 cr.

754. NUMERICAL METHODS AND COMPUTERS II
Mathematical software. Computer solutions of differential equations, eigenvalues and eigenvectors. (Also offered as C'S 754.) Prereq: diff equations with linear alg.; intro programming and FORTRAN. 4 cr.

761. ABSTRACT ALGEBRA
Basic properties of groups, rings, fields and their homomorphisms. 4 cr.

762. LINEAR ALGEBRA

764. ADVANCED ALGEBRA
Topics to be selected from among rings, modules, algebraic fields, and group theory. Prereq: Math 761. 4 cr. (Not offered every year.)

767. ONE-DIMENSIONAL REAL ANALYSIS
Theory of limits, continuity, differentiability, integrability. 4 cr.

768. ADVANCED ANALYSIS
Metric spaces; sequences and series of real functions; uniform convergence; Fourier series; differentiability of mappings from n-space to m-space. Prereq: Math 767. 4 cr. (Not offered every year.)

776. LOGIC
Induction and recursion; sentential logic; first-order logic; completeness, consistency, and decidability; recursive function. 4 cr. (Not offered every year.)

783. SET THEORY
Axiomatic set theory, including its history, Zermelo-Fraenkel axioms, ordinal and cardinal numbers, consistency, independence, and undecidability. 4 cr. (Not offered every year.)

784. TOPOLOGY
Open sets, closure, base, and continuous functions. Connectedness, compactness, separation axioms, and metrizability. 4 cr.

788. COMPLEX ANALYSIS
Complex functions, sequences, limits, differentiability and Cauchy-Riemann equations, elementary functions, Cauchy's theorem and formula, Taylor's and Laurent's series, residues, conformal mapping. Prereq: Math 767. 4 cr.

791. MATHEMATICS EDUCATION
Methods of teaching mathematics in junior and senior high school; acquaintance with professional organizations and publications; and review of major curriculum projects. Prereq: exploring teaching. 4 cr.

The following courses may be applied to the degree of master of science for teachers in mathematics and to no other degree in mathematics.

801-802. MATHEMATICS AND COMPUTING FOR TEACHERS
An introductory course designed to familiarize the students with the capabilities of a computer and to enable them to use it confidently. Applications to algebra, analysis, logic, and game theory are examined. 3 cr.

803-804. HIGHER ALGEBRA FOR TEACHERS
The integers, integral domains, and topics from number theory; equivalence relations and congruences; real numbers, complex numbers, fields, and polynomials; group theory; matrix theory; vectors and vector spaces; rings; Boolean algebra. 3 cr.

805-806. HIGHER GEOMETRY FOR TEACHERS
Systems of postulates of various geometries; geometric invariants; synthetic and analytic projective geometry; an introduction to non-Euclidean geometry and topology. 3 cr.

807-808. HIGHER ANALYSIS FOR TEACHERS
The real number system; functions and limits; elements of set theory; numerical sequences and series; continuity; the derivative and the Riemann integral; maxima and minima. 3 cr.

809. PROBABILITY AND STATISTICS FOR TEACHERS
Permutations and combinations; finite sample spaces; random variables; binomial distributions; statistical applications. 3 cr.

810. MATHEMATICS EDUCATION
Current developments and issues in mathematics education; content, curricula, methods, and psychology of teaching mathematics. 1-4 cr.
811. COMPUTERS AND THEIR USES
3 cr.

814. TOPOLOGY FOR TEACHERS
Fundamental concepts of elementary topology; network and map problems; sets, spaces, and transformations. 3 cr.

816. THEORY OF NUMBERS FOR TEACHERS
Divisibility and primes; congruences; quadratic reciprocity; number theoretic functions; Diophantine equations; perfect and amicable numbers. 3 cr.

817. THEORY OF SETS AND ELEMENTARY LOGIC
An introduction. 3 cr.

819. THE REAL NUMBER SYSTEM
A postulational approach. Algebraic structure; sequences, limits, and continuity. 3 cr.

820. HISTORY OF MATHEMATICS
A problem-study approach to mathematical problems from the period of Greek mathematics until the modern era. 3 cr.

821. A MODERN APPROACH TO GEOMETRY
The foundations and development of Euclidean geometry, with emphasis on the recent recommendations in the field of high school geometry. 3 cr.

826. SELECTED TOPICS IN ALGEBRA
Topics selected to supplement the teacher's previous training in algebra, chosen from among the following: linear algebra, vector spaces, groups, rings and ideals, and fields. 3 cr.

827. SELECTED TOPICS IN GEOMETRY
Topics selected to supplement the teacher's previous training in geometry, chosen from among the following: analytic projective geometry, non-Euclidean geometry, transformation theory, elementary metric differential geometry, topology. 3 cr.

828. SELECTED TOPICS IN ANALYSIS
Topics selected to supplement the teacher's previous training in analysis, chosen from among the following: sequences and series of real functions, Riemann integration, partial differentiation, complex functions, differential equations. 3 cr.

829. DIRECTED READING
A directed reading project on a selected topic in mathematics. 3 cr.

The following are the basic courses for both the master of science and doctor of philosophy degrees in mathematics.

833. ALGEBRA I
Fundamental results in group and ring theory. Prereq: algebra. 3 cr.

834. ALGEBRA II
Fundamental results in module and field theory. Prereq: Math 833. 3 cr.

835. MEASURE AND INTEGRATION
Measurable spaces and functions, measures, Lebesque integrals, convergence theorems. Prereq: real analysis. 3 cr.

836. FUNCTIONAL ANALYSIS
Banach and Hilbert spaces, Hahn-Banach theorem, open mapping and closed graph theorems, dual spaces, topological vector spaces. Prereq: Math 835. 3 cr.

837. COMPLEX ANALYSIS
Cauchy theory and local properties of analytic functions, Riemann mapping theorem, representation theorems, harmonic functions. Prereq: real and complex analysis. 3 cr.

838. ALGEBRAIC TOPOLOGY
Chain complexes; homology of simplicial complexes, singular homology and cohomology; axiomatic homology; cup and cap products. Prereq: Math 761 and 784. 3 cr.

839. GENERAL TOPOLOGY
Subspace, product, and quotient topologies; embedding; separation and countability axioms; connectedness; compactness and compactifications; paracompactness, metrization, and metric completions. Prereq: Math 784. 3 cr.

The following more specialized courses are offered on an irregular schedule whenever mutual faculty and student interest justifies it. Content will vary from year to year and will normally be chosen from among the topics listed. With the permission of the instructor, each of these courses may be taken more than once for credit.

841. TOPICS IN LOGIC AND FOUNDATIONS
Recursive functions; independence proofs; models; forcing techniques. 3 cr.

842. TOPICS IN ALGEBRA
Homological algebra; algebraic number theory; local algebra; category theory; group theory; ring theory; field theory. 3 cr.

843. TOPICS IN TOPOLOGY
Topological groups; algebraic topology; general topology. 3 cr.

844. TOPICS IN ANALYSIS
Calculus of variations; harmonic analysis; integral equations; operator theory; linear topological spaces; partially ordered spaces; topological algebras; complex variables. 3 cr.

845. TOPICS IN DIFFERENTIAL EQUATIONS
Linear systems; general autonomous systems; two-dimensional systems; boundary value problems; qualitative theory; stability theory; partial differential equations; functional analytic methods. 3 cr.

846. TOPICS IN APPLIED MATHEMATICS
Distribution theory; potential theory; mechanics; control theory; mathematical biology; model theory; operations research. 3 cr.

847. TOPICS IN MATHEMATICS EDUCATION
The psychology of teaching and learning mathematics; supervision in mathematics teaching; curriculum theory; new curriculum projects; curriculum evaluation. 3 cr.
848. **TOPICS IN GEOMETRY**
Analysis on manifolds; differential geometry; Riemannian geometry; algebraic geometry; convexity. 3 cr.

849. **TOPICS IN PROBABILITY AND STATISTICS**
Time series analysis; analysis of variance; stochastic processes; probability; design of experiment; hypothesis testing; estimation theory; nonparametric statistics. 3 cr.

The following courses are introductions to research opportunities for doctor of philosophy candidates. With the permission of the instructor, each of these courses may be taken more than once for credit.

861, 862. **ADVANCED TOPICS IN ALGEBRA**
3 cr.

865, 866. **ADVANCED TOPICS IN GENERAL TOPOLOGY**
3 cr.

867, 868. **ADVANCED TOPICS IN ALGEBRAIC GEOMETRY**
3 cr.

869, 870. **ADVANCED TOPICS IN FUNCTIONAL ANALYSIS**
3 cr.

871, 872. **ADVANCED TOPICS IN ALGEBRAIC TOPOLOGY**
3 cr.

873, 874. **ADVANCED TOPICS IN APPLIED MATHEMATICS**
3 cr.

879, 880. **ADVANCED TOPICS IN MATHEMATICS EDUCATION**
3 cr.

898. **READING COURSES**
A) Algebra; B) Analysis; C) Topology; D) Geometry; E) Functional Analysis; F) Differential Equations; G) Applied Mathematics; H) Probability and Statistics; I) Mathematics Education. 1-6 cr.

999. **DOCTORAL RESEARCH**

**Mechanical Engineering (M E)**

**Chairperson:** Russell L. Valentine

**PROFESSORS:** Robert W. Corell; David E. Limbert; Godfrey H. Savage; Charles K. Taft; Russell L. Valentine; Asmi Yildiz

**ASSOCIATE PROFESSORS:** Wayne M. Beasley; Sedat Biringen; Barbaros Celikkol; Frederick G. Hochgraf; Harvey Lyons; William Mosberg; M. Robinson Swift; John A. Wilson

**ASSISTANT PROFESSOR:** Kenneth C. Baldwin

**RESEARCH ASSISTANT PROFESSOR:** Raymond G. Gauthier

**GRADUATE PROGRAM COORDINATOR:** Wayne M. Beasley

The mechanical engineering department offers programs of study from the viewpoint both of the engineering sciences and of engineering design, in the areas of mechanics, materials science, automatic control, and the thermal sciences, leading to the degree of master of science in mechanical engineering. The programs provide the background required for careers in research, engineering design, or teaching, or for further graduate study.

Students admitted to graduate study in mechanical engineering should have completed work equivalent to that required by the University of New Hampshire for a Bachelor of Science degree in the field.

A candidate for the degree of master of science shall satisfy the requirements of either a thesis plan or a project plan. The thesis plan requires 24 semester hours of coursework in addition to 8 semester hours of ME 899, Master's Thesis; the project plan requires 28 semester hours of coursework in addition to 4 semester hours of ME 892, Master's Project. Individuals who can demonstrate accomplishments from professional engineering experience comparable to that expected from a master's project may petition the department to substitute an additional 800-level course for the project requirement.

At least eight credits must be earned in 800-level courses other than ME 899, Master's Thesis, ME 892, Master's Project, or the 800-level course substituted for the master's project course. No more than two graduate courses taken prior to admission to the Graduate School may be applied to the master's degree. An oral examination covering the candidate's graduate work will be given for both the thesis and project plans.

Students interested in graduate study beyond the master's degree should refer to the section entitled Engineering Ph.D. Program.

Permission of the instructor and consent of the adviser are required for enrollment in all mechanical engineering graduate courses. Some courses listed may not be offered every year.

701. **MACROSCOPIC THERMODYNAMICS**
Thermodynamic principles using an analytic, postulational approach and Legendre transformations to obtain thermodynamic potentials. 4 cr.

702. **STATISTICAL THERMODYNAMICS**
Macroscopic thermodynamic principles developed by means of microscopic analysis. Prereq: thermodynamics. 4 cr.

703. **HEAT TRANSFER**
Analysis of phenomena; steady-state and transient conduction, radiation, and convection; engineering applications. Co- or prereq: fluid dynamics. 3 cr.

707. **ANALYTICAL FLUID DYNAMICS**
Development of the Navier-Stokes equations; vorticity theorems; turbulence and boundary-layer theory. Prereq: fluid dynamics. 4 cr.

708. **GAS DYNAMICS**
Basic equations of motion of one-dimensional, subsonic and supersonic flows of compressible, ideal fluids. Wave phenomena. Rankine-Hugoniot relations. Linear approach to two-dimensional flow problems. Prereq: fluid dynamics. 4 cr.
710. SOLAR HEATING SYSTEMS
Analysis and computer modeling of solar radiation as an energy source for heating. Phenomena, availability, collection, performance, and economy of solar energy for heating systems. Prereq: M E 703. 3 cr.

717. CRYOGENICS
Phenomena and processes at very low temperatures. Basic engineering sciences applied to problems of low temperature refrigeration, liquefaction, separation, and storage; transport of cryogenic fluids; measurement systems; vacuum technology. Prereq: thermodynamics, 4 cr.

723. ADVANCED DYNAMICS
Classical dynamics oriented to contemporary engineering applications. Review of particle dynamics. Hamilton’s principle and the Lagrange equations. Kinematics and dynamics of rigid bodies, gyroscopic effects in machinery and space structures. 4 cr.

724. VIBRATION THEORY AND APPLICATIONS
Discrete vibrating systems. Linear system concepts; single-degree-of-freedom systems with general excitation. Matrix theory and eigenvalue problems. Many degrees of freedom, normal mode theory for free and forced vibration. Numerical methods; introduction to continuous systems; applications to structural and mechanical systems. Prereq: intro vibrations. 4 cr.

726. EXPERIMENTAL MECHANICS
Experimental methods and theoretical bases applied to measurement of stress, strain, and motion. Transmitted and scattered-light photoelasticity; strain gauge applications; brittle coating and grid techniques; dynamic measurements, and associated instrumentation. 4 cr.

727. ADVANCED MECHANICS OF SOLIDS
Beams on elastic foundation, curved bars, inelastic behavior, instability, introduction to thin plates and shells, introduction to elasticity, energy methods, and numerical methods. 4 cr.

730. MECHANICAL BEHAVIOR OF MATERIALS
Elastic and inelastic behavior of materials in terms of micro- and macromechanics. Stress, strain, and constitutive relations related to recent developments in dislocation theory and other phenomena on the atomic scale and to the continuum mechanics on the macroscopic scale. Elasticity, plasticity, viscoelasticity, creep, fracture, and damping. Anisotropic and heterogeneous materials. 4 cr.

737. OCEAN MECHANICS I
Ocean as a continuous medium, its mechanical and thermodynamic properties. Shallow- and deep-ocean modeling for the investigation of gravity and sound waves. Ocean subbottom and its soil mechanical and sound propagation properties. Instrumentation, rudimentary data collecting and processing procedures, and computer usage. Prereq: fluid dynamics; mechanics; diff eqns; multidim calculus. 4 cr.

738. OCEAN MECHANICS II
Ocean dynamical laws generalized to include temperature and salinity variations in the water column. Conservation laws with generalized equation of state. Air-sea interaction, energy transport phenomena, reflection from different coastal geometry, harbor resonances, internal currents. Sound reflection from subbottom, sound probing techniques to determine subbottom properties by ray theory and generalization of subbottom soil from an elastic to a viscoelastic medium. Prereq: M E 737; M E 781 desirable but not required. 4 cr.

741. FLUID CONTROL SYSTEMS
Mathematical modeling of hydraulic, pneumatic, and fluidic control elements and control systems. Methods for: 1) using fluids or liquids as the working fluid; 2) synthesis of the parameters of the control elements used in fluid control systems; 3) design of these systems. (Also offered as E E 741.) 4 cr.

751. NAVAL ARCHITECTURE IN OCEAN ENGINEERING
Selected topics in the fundamentals of naval architecture pertinent to ocean engineering, including hydrostatic characteristics, basics of resistance and propulsion and rules and regulations for surface, semisubmersible, and submersible marine vehicles. Computer applications. Prereq: fluid dynamics; mechanics; for permission. 4 cr.

752. SUBMERSIBLE VEHICLE SYSTEMS DESIGN
Conceptual and preliminary design of submersible vehicle systems; submersibles, environmental factors, hydromechanical and structural principles, materials, intra/extravehicle systems, operating considerations, and design. Design projects selected and completed by student teams. Prereq: permission. 4 cr.

757. COASTAL ENGINEERING AND PROCESSES
Introduction to small amplitude and finite amplitude wave theories. Wave forecasting by significant wave method and wave spectrum method. Coastal processes and shoreline protection. Wave forces and wave structure interaction. Introduction to mathematical and physical modeling. (Also offered as GIE 757.) Prereq: fluid dynamics or permission. 3 cr.

760. PHYSICAL METALLURGY I
Introduction to the electron theory of metals, intermetallic compounds, ferromagnetism, dislocations, and slip phenomena. 4 cr.

761. X-RAY DIFFRACTION
Physics of x-ray diffraction, the reciprocal lattice, lattice parameter determinations, space group identification, phase identification, characterization of preferred orientation. Lab. 4 cr.

763. MICROSTRUCTURE OF SOLIDS
Basic concepts and measurements; statistically exact expressions for points, lines, surfaces, and volumes; random, partially oriented and oriented structures; particle and grain characteristics and distributions; projected images and shape specification; practical applications. 4 cr.

766. PHYSICAL CERAMICS
Characteristics of crystalline and noncrystalline ceramic solids; defect structures; diffusion in ceramic materials; nucleation and crystal growth, spinodal
decomposition, and solid-state reactions; kinetics of grain growth; sintering, and vitrification. Prereq: permission. 4 cr.

771. DYNAMIC SYSTEMS MODELING
Lumped parameter models for mechanical, electrical, fluid, thermal, and mixed systems. Time-domain solutions, frequency-response plots, matrix representations, eigenvectors, and eigenvalues are used to explore system response. Introduction to nonlinear analysis, simulation, computer applications. Prereq: intro. measurement and experimental methods or permission. 3 cr.

781. MATHEMATICAL METHODS IN ENGINEERING SCIENCE I
Solution of discrete and continuous systems. Review of calculus, linear algebra, complex numbers, Fourier series, differential and partial differential equations with examples from acoustics, vibration theory, hydrodynamics, elasticity, solid mechanics, transport theory, and particle mechanics. 4 cr.

782. CONTROL SYSTEMS
Fundamental principles involved in the design and analysis of feedback control systems. Topics include stability criterion, time-domain analysis, frequency-domain analysis, and introduction to nonlinear systems. Lab. Prereq: permission. 4 cr. (Also offered as E E 782.)

795. SPECIAL TOPICS IN MECHANICAL ENGINEERING
New or specialized courses and/or independent study. May be repeated for credit. 2-4 cr.

801. IRREVERSIBLE THERMODYNAMICS
Nonequilibrium thermodynamics from the viewpoint of fluctuation theory. The Onsager reciprocal relations. Prereq: M E 701. 4 cr.

803. CONDUCTION HEAT TRANSFER
Heat conduction equation temperature fields and heat flux vector; analytical solution of the conduction equation in several variables; initial and boundary value problems; numerical methods of solution. 4 cr.

804. RADIATION HEAT TRANSFER
The fundamentals of radiant heat transfer. Development and solution of the wave equation for electromagnetic radiation. Analysis of Planck's law of radiation and earlier theories. Methods of solution of radiant interchange in real systems with and without absorbing media. 4 cr.

806. CONVECTION HEAT TRANSFER
An analytical study of heat transfer to laminar and turbulent boundary layers of compressible and incompressible fluids. Basic differential equations governing the heat transfer are derived and analytical solutions are obtained where possible and checked with experimental results. 4 cr.

807. COMPRESSIBLE FLUID FLOW
General equations of motion for real and ideal compressible fluid flow including normal and oblique shocks, Prandtl-Meyer flow, and methods of solutions. Applications to jet propulsion and turbo machinery. Prereq: M E 707 or 708. 4 cr.

808. THEORETICAL AERO/HYDROMECHANICS
The mathematical development of the equations of frictionless fluid flow, using both tensor notation and various coordinate systems. Conformal mapping; Blasius theorem; Joukowski hypothesis, flow around airfoils; Schwarz Christoffel theorem and vortex motion. 4 cr.

822. CONTINUUM MECHANICS
Conservation laws for gases, liquids, and solids in a continuum are developed starting from Liouville and Boltzmann equations. Passage from a discrete system to a continuum is discussed. Constitutive equations for viscoelastic and thermoelastic fields; and nonlinear gas, liquid, and elastic fields. General discussion of rheological behavior. Causality conditions for continuum fields. Examples for solids, liquids, and gases, and biomechanics. Introduction to phenomenological Lagrangian theories. 4 cr.

824. VIBRATIONS OF CONTINUOUS MEDIA
Classical and numerical methods are employed to study the vibration of continuous elements and structures. Topics considered are axial and torsional vibration of rods, transverse vibration of beams and thin plates, wave propagation, and vibration of simple structures. 4 cr.

826. THEORY OF ELASTICITY
The analysis of stress and deformation in elastic solids; conservation laws for elastic media; stress and strain relations by continuous functions; Airy stress functions; elastodynamic fields; inhomogeneous, anisotropic, wave equations; wave propagation and stress concentration problems; generalizations to thermoelasticity and viscoelastic fields. Complex variable techniques will be used. 4 cr.

827. THEORY OF PLASTICITY
Analysis of stress and deformation in inelastic solids; general development of stress invariants, variational principles, constitutive relations, and yield and loading functions. Special emphasis on ideal plasticity, strain-hardening, creep, limit analysis, and limit design. 4 cr.

829. THEORY OF PLATES AND SHELLS
Theory of elasticity developed for plates and shells; conservation laws for elastic media; stress and strain relations by continuous functions; Airy stress functions; stress and strain relations in curvilinear coordinates; thin and thick plate and shell theories; vibration of spherical, cylindrical, and conical shells and plates. 4 cr.

838. THEORETICAL ACOUSTICS
Fundamentals are presented with emphasis on theory and applications in underwater acoustics and in the acoustic determination of dynamic material properties. Topics include: a review of vibration theory; derivation of nonlinear acoustic field equations; linearization; Green's function techniques and solution of boundary value problems; scattering, reflection theories of boundary roughness; development of ray theory (geometric optics) from field equations; and Eikonal approximations. 4 cr.

842. DISCONTINUOUS CONTROL
Analysis and synthesis of feedback control systems operating on quantized information; compensation.
and performance improvement methods that use the quantized nature of the information are also developed. Digital methods for pulse-width modulation, optimum quantizers and limit cycle behavior of quantized systems are developed. (Also offered as E 842.) 4 cr.

844. NONLINEAR CONTROL SYSTEMS
Analysis and design of nonlinear control systems developed by classical and modern viewpoints are discussed. Liapunov's stability theory; phase space methods; linearization techniques; simulation; frequency response methods; generalized describing functions; transient analysis utilizing functional analysis; and decoupling of multivariable systems. (Also offered as E 844.) Prereq: M E 851. 4 cr.

851. ADVANCED CONTROL SYSTEMS I
State-space representation of multivariable systems; analysis using state transition matrix. Controllability and observability; pole placement using state and output feedback; Luenberger observers. Introduction to computer controlled systems (sampling, discrete state representation, hybrid systems); nonlinear analysis (Liapunov, Popov, describing function). (Also offered as E 851.) Prereq: E E/M E 782. 3 cr.

852. ADVANCED CONTROL SYSTEMS II
Special topics in control theory: continuous and discrete systems; optimal control systems, including calculus of variations, maximum principle, dynamic programming, Weiner and Kalman filtering techniques, stochastic systems, adaptive control systems. (Also offered as E 852) Prereq: E E/M E 851. 3 cr.

855. ESTIMATION AND FILTERING
Stochastic systems course with application to control and communications. Topics include random variables, noise in linear systems, Bayesian and minimum variance estimation theory, optimal state estimators, Weiner and Kalman filters, combined estimation and control, prediction, parameter identification, and nonlinear filtering. (Also offered as E 855) Prereq: M E E 851, Math 733 or equivalent. 3 cr.

861. PHYSICAL METALLURGY II
Thermodynamics of solid solutions and mixtures, kinetics of selected solid state reactions including precipitation and re-crystallization, martensite transformations. 4 cr.

865. CONDUCTION PROPERTIES IN SOLIDS
Topics in metal and semiconductor physics. Quantum theory, electron energy states, scattering processes, band theory, electron and hole conduction, and the P-N junction. 4 cr.

882. MATHEMATICAL METHODS IN ENGINEERING SCIENCE II

883. TENSOR ANALYSIS AND DIFFERENTIAL GEOMETRY

892. MECHANICAL ENGINEERING MASTER'S PROJECT
The student works with a faculty member during one or two semesters on a well-defined research and/or original design problem. A written report and seminar are presented. 4 cr.

895. GRADUATE SPECIAL TOPICS
Investigation of graduate-level problems or topics in mechanical engineering. 2-4 cr.

899. MASTER'S THESIS
8 cr.

Microbiology (Micr)
Chairperson: Thomas G. Pistole

PROFESSORS: William R. Chesbro; Galen E. Jones; Thomas G. Pistole
ASSOCIATE PROFESSORS: Richard P. Blakemore; Robert M. Zsagray
ASSISTANT PROFESSOR: Florence E. Farber

GRADUATE PROGRAM COORDINATOR: Richard P. Blakemore

Students admitted to graduate study in microbiology are expected to have had adequate preparation in the biological and physical sciences and in the basic courses in microbiology. The candidate for the master of science degree will be required to complete a thesis. Candidates for the doctor of philosophy degree must teach at least one semester, or have had equivalent experience; must demonstrate to the doctoral committee a broad, basic knowledge of the field of microbiology; and must complete a dissertation embodying the results of original research in microbiology. Departmental research activities emphasize bacterial-host-parasite interactions, immunology, analysis of microbial structures, bacterial and bacteriophage genetics, virology, cell culture phenomena, public health aspects of microbiology and virology, bacterial physiology, and marine and soil microbiology.

701. TAXONOMY AND ECOLOGY
Isolation, identification, and classification of prokaryotic microorganisms by classical and newer techniques; analysis of the interplay between organisms and environment based on energy metabolism and use of this to deduce a natural classification; uses of taxonomic and ecological information. Prereq: gen micr; gen bchm. Lab. 4 cr.

702. PATHOGENIC MICROBIOLOGY
Morphological, cultural, biochemical, serological, and pathogenic characteristics of microorganisms causing human and animal diseases. Prereq: gen micr. Lab. 4 cr.
705. IMMUNOLOGY AND SEROLOGY
Examination of the immune response in vertebrates. Characterization of the major components of the immune system; study of host-defense mechanisms and immunopathology; use of serological techniques for identification and diagnosis. Prereq: Micr 702; permission. Lab. 4 cr.

706. VIROLOGY

707. MARINE MICROBIOLOGY
Characterization of microorganisms in the sea including taxonomy, physiology, and ecology; sampling, enumeration, distribution; and effects of marine environment upon microbial populations. Prereq: gen micr; organic chemistry. Lab. 4 cr.

708. MICROBIAL BIOGEOCHEMISTRY
Geochemical processes influenced by biochemical processes catalyzed by marine and terrestrial microorganisms; transformations of carbon, nitrogen, and other elements. Petroleum microbiology, natural gas production, sulfur formation, ferromanganese nodules, corrosion, and fossil microorganisms. Prereq: gen micr; organic chemistry. Lab. 4 cr.

710. MICROBIAL CYTOLOGY AND ULTRASTRUCTURE
Ultrastructure and function in prokaryotic cells; discussion of flagella, pili, walls, membranes, cytoplasmic inclusions, cell division, sporulation, and germination. Cytological features of structurally unique bacteria. Prereq: gen micr. 3 cr.

711. TRANSMISSION ELECTRON MICROSCOPY
Electron microscopic techniques for the study of microbial cytology: theory and use of the transmission electron microscope; sample preparation methods, photomicrography, and photographic darkroom techniques; interpretation of electron micrographs. Prereq: gen micr; Micr 710; permission. Lab. 4 cr.

712. SOIL MICROBIOLOGY
Microbial ecology of the soil environment; characteristics of major microbial groups in soil; factors affecting activity of soil microorganisms; their effects on the environment; and biological interactions which involve them. Prereq: gen micr. Lab. 4 cr.

793. PROBLEMS IN MICROBIAL CYTOLOGY
A) Research with Electron Microscopy; B) Teaching Practices in Electron Microscopy. Students may select sections for advanced study. May include reading, laboratory work, organized seminars, and conferences. Other sections may be offered in some semesters; consult with department office for future semester offerings. Prereq: permission. 1-4 cr.

795, 796. PROBLEMS IN MICROBIOLOGY
Prereq: permission. 1-8 cr.

802. MICROBIAL PHYSIOLOGY
Means by which microorganisms survive: nutritional, chemical, physical factors; metabolism and its regulation; generation of cell ultrastructure; ecological interactions. Prereq: gen micr; gen bchm. Lab. (Not offered every year.) 2 or 4 cr.

804. MICROBIAL GENETICS
Expression, regulation, recombination and transmission of genetic information in prokaryotic and eukaryotic microorganisms. Consideration of chromosomal and extrachromosomal inheritance. Prereq: gen micr; permission. Lab. 4 cr. (Not offered every year.)

806. ADVANCED IMMUNOLOGY
Basic concepts in immunology including immunoreognition, effector systems, immunogenetics, immunopathology, and comparative immunology. Prereq: gen immunol; gen bchm; permission. Lab. 4 cr. (Not offered every year.)

851. CELL CULTURE
Theory, principles fundamental to culture of cells in vitro. Introduction to techniques of preparation and maintenance of animal, plant, insect, fish cell cultures. Application of cell culture to contemporary research in biological sciences. (Also offered as AnSc 851.) Prereq: gen micr; permission. Lab. 4 cr.

893. ADVANCED PROBLEMS AND TECHNIQUES IN MICROBIAL CYTOLOGY
A) Research with Electron Microscopy; B) Seminar in Microbial Cytology; C) Recent Developments in Electron Microscopy; D) Scanning Electron Microscopy; E) Freeze-Etching; F) Energy-dispersive X-ray Analysis; G) Photographic Techniques for Cytology; H) Electron Microscope Maintenance. Course sections for advanced work, individual or group seminar. May include reading, laboratory work, organized seminars, and conferences. Most sections not offered every year; consult with department office for future semester listings. Prereq: gen micr; electron microscopy; permission. 1-8 cr.

897, 898. MICROBIOLOGY SEMINAR
Reports, discussion, microbiological literature, and current developments in microbiology. Prereq: permission. 1 cr.

899. MASTER'S THESIS
6-10 cr.

999. DOCTORAL RESEARCH

Music (Mus)

Chairperson: Cleveland L. Howard

PROFESSORS: Keith Polk; John D. Wicks

ASSOCIATE PROFESSORS: Ruth S. Edwards; Stanley D. Hettinger; Cleveland L. Howard; Mary H. Rasmussen; John E. Rogers; David E. Seiler; W. Niel Sris; Paul F. Verrette; Henry J. Wing, Jr.

ASSISTANT PROFESSORS: Audrey Adams; Hava; Leslie J. Hunt; Christopher Kies; G. Roy Mann, Jr.; Robert Stibler; Peggy A. Vagts; Larry J. Veal

GRADUATE PROGRAM COORDINATOR: John D. Wicks
The Department of Music offers programs leading to the degrees of master of arts in music and master of science in music education. In both programs, at least one-half of the required credits are in courses intended for graduate students only.

Master of Arts in Music

The degree of master of arts in music, while designed basically for students interested in broadening their knowledge of the history of music, has proven consistently valuable to students who wish to augment strong backgrounds in performance and/or education with more specialized studies in theory, literature, and performance-practice. The following courses (or their approved equivalents) are required: Musi 855, 856, 857, 858, 891, and 893 or 894. Courses at the 700 and 800 level in other departments, may be elected, with the approval of the student's adviser, to a minimum total of 30 credits. Completion of the program requires a written essay of substantive nature on a topic of the candidate's special interest and a comprehensive oral exam. The latter includes analysis and historical discussion of scores from all periods of music. It is recommended that more than two semesters be allowed for completion of the degree. The cultural advantages of the city of Boston, 90 minutes away, are a valuable adjunct to the program.

A B.A. degree in music or its equivalent from an accredited institution is required for admission to this program. A performance audition and a placement examination in theory, music history, and aural identification are normally required of all applicants and are taken in the semester preceding entrance into the graduate program. Students not meeting standards in the placement examinations will not be officially admitted to the Graduate School until such examinations are passed to the satisfaction of the department. A reading knowledge of both German and French is strongly recommended before entering the program; a German reading examination will be administered by the department. On recommendation of the graduate adviser, this requirement may be waived for students who do not plan further study beyond the M.A. degree.

Master of Science in Music Education

The goal of the master of science in music education degree is to develop a broad knowledge at the graduate level in the fields of music education, performance, history, theory, and independent study. The following courses are required: MusEd 790, and 883 or 884; Musi 855, and 893 or 894. Also required are two courses in the Department of Education from courses such as the following: Educ 820, 827, 841, 853, 858, 861, 865, 883, 884, 886, and in special cases, 700, 701 and 705. Vocal or instrumental study at the 800 level is required to a minimum of 4 credits. A maximum of 9 credits is allowed if the graduate recital option is elected. Sufficient electives must be taken to total 30 credits. A comprehensive exam concerning the application of philosophical, sociological, psychological and technical aspects of music education complete the program.

Admission to this program requires a bachelor's degree in music education or its equivalent from an accredited institution. A performance audition and a placement examination in theory, music history, and aural identification are normally required of all applicants and are taken in the semester preceding entrance into the graduate program. Students not meeting standards in the placement examinations will not be officially admitted to the Graduate School until such examinations are passed to the department's satisfaction.

History and Literature

701. MUSIC OF THE MEDIEVAL PERIOD
Nature of the beginnings of polyphony. The preeminent influence of the church in the 13th century and the rising secular movement in the 14th. Music as a dominant force in the political and social life of the Middle Ages. 4 cr.

703. MUSIC OF THE RENAISSANCE
Works of the 15th- and 16th-century composers from Dunstable to Palestrina. 4 cr.

705. MUSIC OF THE BAROQUE
Music of Europe from de Rore to Bach. 4 cr.

707. MUSIC OF THE CLASSICAL PERIOD
Growth of musical styles and forms from early classicism through the high classicism of Haydn, Mozart, and the young Beethoven. 4 cr.

709. MUSIC OF THE ROMANTIC PERIOD
A survey of Romanticism in music from Beethoven's late period to the end of the 19th century. The works of Schubert, Berlioz, Schumann, Mendelssohn, Chopin, Wagner, Verdi, Brahms, Austrian symphonists, French pre-impressionists, and national styles in European music. 4 cr.

711. MUSIC OF THE 20TH CENTURY
Styles and techniques of composers from Debussy to the present. Special emphasis on tonal music before World War I; neoclassical trends; the emergence of atonality and serial techniques; antirationalist music; electronic music. 4 cr.

721. THE LIFE AND WORKS OF BEETHOVEN
Detailed study of Beethoven, his times, and his art as exemplified by his symphonies, piano music, chamber music, sacred music, and works for the stage. 4 cr.

732. THE ART SONG
History and literature of the solo song with piano accompaniment. Survey of national styles of the 19th and 20th centuries and deeper study of the central core of the art song—the German Lied. 4 cr.

733. SURVEY OF OPERA
History of the genre from Monteverdi to the present. Representative masterpieces by Handel, Mozart, Beethoven, Weber, Wagner, Verdi, Mussorgsky, Debussy, Berg, and others. 4 cr.

735. SURVEY OF PIANO LITERATURE
Keyboard literature from the baroque to the present. Analysis, discussion, and illustration of works by Bach, Haydn, Mozart, Beethoven, the romantic composers, and contemporary writers. 4 cr.

795. SPECIAL STUDIES IN MUSIC
A) J. S. Bach; B) Franz Schubert; C) Debussy and Ravel; D) The World of Jazz; E) The Iconography of Western-European Musical Instruments; F) 19th-Century French Music; G) Advanced Analysis;
777. ADVANCED COMPOSITION
Continuation of Musi 776. Individual compositional projects. Prereq: Musi 776 and permission. May be repeated for credit. 3 cr.

779. ORCHESTRATION
Characteristics of band and orchestral instruments both individually and in small (homogeneous) and large (mixed) groupings. Students study scores, write arrangements, and have arrangements performed if at all possible. Some aspects of vocal writing. Prereq: music theory II or permission. 4 cr.

781. FORM AND ANALYSIS
Formal and textural elements; concepts and examples. Thorough analysis of smaller and larger masterworks from the standpoint of harmony, counterpoint, structural line, and formal articulation. Prereq: music theory II or permission. 4 cr.

785. ELECTRONIC SOUND SYNTHESIS
Part I: "traditional" or "analog" electronic sound synthesis; work with the Buchia Synthesizer in the electronic music studio. Part II: 1) elementary programming in FORTRAN; 2) the logic of computer sound syntheses; and 3) programming in MUSIC 4BF. Students will have the opportunity to run programs on a DEC KL10 computer equipped with 4-channel digital-to-analog and analog-to-digital converters. Part III: completion of a major independent study project in electronic music. Prereq: permission. 4 cr.

795. SPECIAL STUDIES IN MUSIC
Refer to History and Literature section.

893. THEORY SEMINAR
Through reading, analysis, and composition, the student is acquainted with music theory from the Middle Ages to Monteverdi. Prereq: permission. 3 cr.

894. THEORY SEMINAR
Theory and practice from the Baroque to contemporary music. Performance practice in the Baroque and later periods. Score analysis. Prereq: permission. 3 cr.

895. INDEPENDENT STUDY IN THE HISTORY AND THEORY OF MUSIC
Refer to History and Literature section.

Performance

895. SPECIAL STUDIES IN MUSIC
Refer to History and Literature section.
Music Education (MuEd)

741-742. TECHNIQUES AND METHODS IN CHORAL MUSIC
Problems in the organization and performance of high school, college, and community choirs. Techniques of choral conducting and rehearsal, repertory, and materials. 2 cr.

743. MATERIALS AND METHODS IN PIANO MUSIC
Gives potential piano teachers a coherent but flexible approach to the instruction of students of different ages and levels of talent through evaluation of methods and materials and discussion of the role of the private teacher. 2 cr.

745-746. TECHNIQUES AND METHODS IN STRING INSTRUMENTS
Class and individual instruction. Four-hour practice per week required. Intensive training on the violin, viola, cello, and double bass enables participants to perform in string ensembles. Classroom procedures, establishment of string programs, and evaluation of available methods materials. 2 cr.

747-748. TECHNIQUES AND METHODS IN WOODWIND INSTRUMENTS
Basic fundamentals of performance, class instruction, associated acoustical problems, and study of woodwind literature. First semester: clarinet, flute, and saxophone. Second semester: double-reed instruments. 2 cr.

749. TECHNIQUES AND METHODS IN BRASS INSTRUMENTS
Basic course in embouchure formation, tone, tonguing, fingering, flexibility, accuracy, and range development as applied to the trumpet or baritone horn, French horn, and trombone; methods, student. solos, and ensembles most likely to be useful with grade school, junior high school, and high school players of brass instruments. 2 cr.

751. TECHNIQUES AND METHODS IN PERCUSSION INSTRUMENTS
Basic performance skills on snare drum, timpani, mallet instruments, and other percussion instruments used in bands and orchestras. Materials and methods of instruction. 2 cr.

785. MUSIC FOR THE ELEMENTARY CLASSROOM TEACHER
Designed for the nonspecialist. Correlation and integration of music in the school curriculum, and basic skills and techniques necessary. 4 cr.

787-788. THE TEACHING OF ELEMENTARY AND MIDDLE SCHOOL MUSIC
Aims, scope, and organization of materials and activities in elementary and middle schools. Modern trends in educational philosophy; development of the child’s voice; demonstration of materials and methods for the various grades. Observation and teaching in schools. 2 cr.

791-792. THE TEACHING OF SECONDARY SCHOOL MUSIC
Educational principles applied to music teaching and learning; curriculum organization for junior and senior high school. Adolescent voice, voice classification, selection of vocal and instrumental materials, and building unified concert programs. Problems of administration; management; relationship of the teacher to school and community. Observation of secondary school music programs. 2 cr.

795. SPECIAL STUDIES IN MUSIC EDUCATION
Allows upper-level students to explore individually or in groups areas related to their specific professional interests. Prereq: permission. 1-4 cr.

796. FOUNDATIONS AND PERSPECTIVES OF MUSIC EDUCATION
Philosophical, sociological, and psychological foundations and principles of music education and the relationship of these principles to music learning and teaching. 4 cr.

883. INSTRUMENTAL LITERATURE AND ITS PERFORMANCE
Exploration of representative solo and ensemble music for string, wind, and percussion instruments. Typical literature from each period of music is studied. As much as is possible, live performance is included; recordings are used as required. Detailed attention given to interpretation. Project required. 3 cr.

884. CHORAL LITERATURE AND ITS PERFORMANCE
Analysis, discussion, and conducting of excerpts from choral masterpieces from all major periods and styles. Students will have the opportunity to act as assistant conductors for some of the choral organizations on campus. Evaluation of current high school and college repertoires. 3 cr.
895. SPECIAL PROJECTS IN MUSIC EDUCATION
Independent study, investigation, or research in music education. Creative projects may be included. Prereq: permission. 1-4 cr.

Occupational Education
( OcEd)

Chairperson: William H. Annis
PROFESSORS: William H. Annis; Maynard C. Heckel
ASSOCIATE PROFESSORS: Gregory D. Gill; Lewis Roberts, Jr.
ASSISTANT PROFESSOR: David L. Howell

The master of occupational education degree is designed for teachers and administrators of occupational education, career Cooperative Extension Service personnel, and others in adult education. Applicants must submit scores achieved on either the Graduate Record Examination, aptitude section, or the Miller Analogies Test. All students are required to complete Occupational Education 801 and 802. The remainder of the 30-plus credits required to complete the degree program will be selected in consultation with the student and advisers according to the student's career plans, needs, and goals. Candidates completing a thesis will be required to complete an oral defense of the thesis. Students following the nonthesis option will be required to complete written and oral examinations plus a professional paper. Students may obtain initial certification in vocational agriculture and trade and industrial education through this program.

700. WORKSHOPS IN OCCUPATIONAL EDUCATION
Modularized instruction for in-service education of teachers of vocational education and others in occupational education. May be repeated up to 8 credits. 1-2 cr.

750.ショップ ORGANIZATION AND CONTROL METHODS
Purposes: 1) to examine all facilities of vocational programs in New Hampshire to insure safety, quality instruction, and adequate usage of space; 2) to examine the role of the vocational instruction relating to liability, maintenance of equipment, planning for improvements in facilities, and planning for new facilities. 4 cr.

783. CONDUCTING AND SUPERVISING ADULT EDUCATION PROGRAMS
Analysis of formal and informal adult education programs; development of strategies of program planning, instruction, evaluation, and supervision. 4 cr.

784. THE COMMUNITY-JUNIOR AND VOCATIONAL-TECHNICAL COLLEGES
Rise and development of community-junior colleges and two-year vocational-technical colleges in American education; their history, potential, philosophy, and functions. 4 cr.

791. PLANNING FOR TEACHING
Organization of materials of instruction to meet group and individual needs. Techniques of instruction, planning for teaching, function of consulting committees, working with youth groups, program evaluation. Course scheduled concurrently with Educ 694. Prereq: microteaching. 4 cr.

796. INVESTIGATIONS IN OCCUPATIONAL EDUCATION
A) Career Education; B) Secondary Education; C) Post-Secondary Education; D) Adult Education; E) Extension Education; F) Exemplary Programs; G) Cooperative Education Programs; H) Disadvantaged and Handicapped Education Programs. Student-selected problems in one of the areas listed. Elective after consultation with the instructor. Hours to be arranged. May be repeated. 2-4 cr.

798. OCCUPATIONAL EDUCATION SEMINAR
Discussion of current issues, problems, and research and development in OcEd. Students, faculty, and other personnel serve as discussion leaders. Required of OcEd majors, and graduate students. 0-2 cr. (Fall semester only.)

801. ADVANCED METHODS AND MATERIALS OF INSTRUCTION
Organization and delivery of performance-based instruction. Provides opportunities for exploration in instructional planning, execution, evaluation, management, and guidance. Open to teachers of vocational-technical education and others by permission. Required of master's degree candidates. 4 cr.

802. CONCEPTS OF OCCUPATIONAL EDUCATION

803. ADMINISTRATION AND SUPERVISION OF VOCATIONAL EDUCATION
Students identify and develop competencies required of vocational administrators, using a vocational administrator task analysis, which includes fair hiring and firing practices, staff development, long-range planning, federal administration for vocational programs, and evaluation of program effectiveness. Philosophy of, and federal regulations governing, vocational education. 4 cr.

804. PROGRAM PLANNING IN OCCUPATIONAL EDUCATION
A systematic approach to the development of course materials for occupational education. Topics included are: occupational analysis, establishing performance objectives, selection of content, development of supplemental materials, and evaluation. Prereq: a course in teaching methods or permission. 4 cr.

805. THE DEVELOPMENT OF COOPERATIVE EDUCATION PROGRAMS IN OCCUPATIONAL EDUCATION
Organization and development of cooperative training programs. Designed for teachers, cooperative-education coordinators, work-study coordinators, school administrators, industrialists, and others in charge of external training programs. Focus on planning, implementation, and evaluation
DEVELOPING to Ocean 6-credit the public a INTRODUCTION MATERIALS OCEAN teaching wood, II COMMUNITY INFORMATION. INDEPENDENT INDEPENDENT OCEANOGRAPHIC the MASTER’S UNDERWATER metals; and the project 811. The PUBLIC methods means vision, individuals. 807. The Coordinator: Donald W. Melvin

PROFESSORS: Paul L. Bishop; Fletcher A. Blanchard, Jr.; Robert W. Corell; Stephen S.T. Fan; Albert D. Frost; Godfrey H. Savage; Kondagunta Sivaraprasad

ASSOCIATE PROFESSORS: Wendell S. Brown; Barbaros Celikkol; Pedro De Alba; David L. Gress; Donald W. Melvin; M. Robinson Swift

ASSISTANT PROFESSOR: Kenneth C. Baldwin

OCEAN ENGINEERING:

The interdisciplinary Ocean Engineering Program offers graduate work leading to the degree of master of science in ocean engineering. The general purpose of this program is to prepare engineering students for professional careers in ocean-related fields. Students admitted to the program should have completed a baccalaureate degree in either chemical, civil, electrical, or mechanical engineering or have an equivalent background.

Each student in the program will be required to take ESci 758 (Physical Oceanography) and OE 890, 891 (Ocean Engineering Seminar I, II). In addition, each student must select three of the following six courses: OE 761 (Materials in the Ocean), OE 762 (Oceanographic Instrumentation), OE 751 (Ocean Hydrodynamics), OE 752 (Ocean Waves), OE 785 (Underwater Acoustics) and ESci 859 (Data Analysis Methods in Ocean and Earth Sciences). Students will also be required to take a minimum of 12 credits of additional course work and a 6-credit thesis/project. Normally the additional courses would be in the student’s field of engineering.

OCEAN HYDRODYNAMICS Fundamental concepts of fluid mechanics as applied to the ocean; continuity; Euler and Navier-Stokes equations; Bernoulli equation; stream function, potential function; momentum theorem; turbulence and boundary layers are developed with ocean applications Prereq: permission. 3 cr.

OCEAN WAVES Introduction to water waves; linear small-amplitude wave theories; finite-amplitude wave theories; long-wave theory; wave motion as a random process; interaction of waves with structures; similarity and scale-model technology. Prereq: permission 3 cr.

OCEANOGRAPHIC INSTRUMENTATION Design of instrumentation systems for use in the marine environment; sensors and devices for measurement and control; transmission display; storage and processing of information. Prereq: permission. 3 cr.

OCEAN WAVE PROPERTIES Introduction to mechanical properties of materials; ferrous metals; non-ferrous metals; concrete, plastic, wood, etc.; corrosion of metals; corrosion control; durability of cementitious materials; degradation of plastics, wood, etc. in marine environment; proper materials selection for a marine environment. Prereq: permission. 3 cr.

OCEANOGRAPHIC INSTRUMENTATION Design of instrumentation systems for use in the marine environment; sensors and devices for measurement and control; transmission display; storage and processing of information. Prereq: permission. 3 cr.

UNDERWATER ACOUSTICS Vibrations; propagation; reflection; scattering; reverberation; attenuation; sonar systems; ray and mode theory; transducers and arrays; signal analysis. Prereq: permission. 3 cr.

INDIVIDUAL STUDY IN OCEANOGRAPHIC INSTRUMENTATION Design of instrumentation systems for use in the marine environment; sensors and devices for measurement and control; transmission display; storage and processing of information. Prereq: permission. 3 cr.

OCEAN SEMINARS I, II Various topics, including marine systems design, marine vehicle operation, data collecting and processing, and marine law. 2 cr.

CEMENTED MATERIALS IN OCEANOGRAPHIC INSTRUMENTATION Design of instrumentation systems for use in the marine environment; sensors and devices for measurement and control; transmission display; storage and processing of information. Prereq: permission. 3 cr.

INDIVIDUAL STUDY Independent theoretical and/or experimental investigation of an ocean engineering problem under the guidance of a faculty member. 1-4 cr.
Physical Education (PhEd)

Chairperson: D. Allan Waterfield

ASSOCIATE PROFESSORS: Katherine Amsden; Gavan H. Carter; Phyllis A. Hoff; Robert Kertzner; D. Michael McKeough; D. Allan Waterfield; Robert E. Wear; Walter E. Weiland

GRADUATE PROGRAM COORDINATOR: Katherine Amsden

The Department of Physical Education offers a graduate program leading to the master of science degree in physical education, with the following areas of concentration: exercise specialist, motor behavior, and teaching/coaching. Admission is based on undergraduate preparation, academic record, Graduate Record Examination aptitude test scores, and letters of recommendation. Applicants must be above-average students and show adequate preparation in the basic support courses of the emphasized area of intended study. Applicants who have not met specific course prerequisites should expect to take additional undergraduate work without receiving graduate credit.

Students may satisfy program requirements through the thesis or nonthesis program plans. All students must be required to take PhEd 701, PhEd 801, and two courses from the selected area of concentration. Concentration courses: exercise specialist (PhEd 720, 722, 731, 732, 895); motor behavior (PhEd 740, 775, 780, 850, 895); teaching/coaching (PhEd 730, 731, 750, 780, 895). All remaining course work may be taken within the Department of Physical Education; however, approval may be granted to take relevant courses outside the department.

Thesis plan: A minimum of 30 approved graduate credits including a thesis (24 graduate course credits plus 6 thesis credits) is required in the thesis plan, plus an oral defense of the thesis.

Nonthesis plan: A minimum of 32 approved graduate credits is required in the nonthesis plan. Four credits of PhEd 895 (Advanced Studies) are required. A student may take PhEd 895 only after completing at least three approved graduate courses, including PhEd 801. The program is sufficiently flexible to meet professional interests and special abilities. With the help of the graduate adviser in physical education, the student's program will be individually planned.

701. APPLIED STATISTICS

Statistical procedures and associated elements of basic research design with direct, practical application to areas within physical education and other health disciplines. Prereq: measurement procedures or equivalent. 4 cr.

702. ADVANCED ATHLETIC TRAINING

Assessment, rehabilitative treatment, preventive strapping, and protective equipment used in athletic training. Administration of a training room facility. Prereq: basic athl train. Lab. 4 cr.

703. LABORATORY PRACTICE IN ATHLETIC TRAINING

150 hours of experience in UNH athletic training room under N.A.T.A. certified trainer. Prereq: basic athl train. (Only two credits may be applied toward master's degree requirement.) 2 cr.

710. UNDERWATER RESEARCH METHODS

Lecture, open water, and pool instruction in underwater research techniques and hyperbaric physiology lab. Prereq: basic certification and permission. Fee. 4 cr.

720. INTERPRETATION AND ASSESSMENT OF PHYSICAL FITNESS

Planning and implementation of programs of conditioning and fitness in the general program of education in the school. Personal fitness; components of physical fitness and conditioning; current tests; rehabilitation of individuals of all ages, particularly in college and adult programs. Prereq: physical of exercise or equivalent. 4 cr.

722. GRADED EXERCISE TESTING AND EXERCISE PRESCRIPTION

Graded exercise testing and its application to the prescription of exercise. Special emphasis on the patient with cardiovascular disease. Prereq: physiology of exercise. 4 cr.

730. CURRICULUM PLANNING IN PHYSICAL EDUCATION

Criteria and factors involved in planning and construction of school programs. 4 cr.

731. CONDITIONING FOR MAXIMUM PERFORMANCE

Anatomical and physiological factors related to maximum physical performance. Evaluation of programs of training. Prereq: physiology of exercise or equivalent. 4 cr.

732. ELECTROCARDIOGRAPHY

Introduction to electrocardiographic interpretation. Prereq: physiology of exercise or equivalent. 4 cr.

740. PERCEPTUAL MOTOR DYSFUNCTION

Theoretical rationale and clinical perceptual-motor training programs of Ayres, Kephart, Cratty, Bartsch, and Getman, as they relate to sensory-motor integration and the remediation of learning disabilities. Prereq: PhEd 775, or permission. 4 cr.

750. ANALYZING TEACHING IN PHYSICAL EDUCATION

Examination of teaching practices, theories, and research implications. Varied approaches to the study and improvement of teaching, including analysis of films and tapes. Prereq: theory of teach phys ed in sec school, theory of teach phys ed in elem school, or permission. 4 cr.

775. PERCEPTUAL MOTOR LEARNING

Variables affecting the learning and performance of skilled activity; ability and motivational characteristics of the learner; processes for skill acquisition. Prereq: intro to psych. Lab. 4 cr.

780. PSYCHOLOGICAL FACTORS IN SPORT

Factors of outstanding athletic achievement; psychological variables in competition; the actions and interactions of sport, spectator, and athlete. Prereq: intro to psych; /or PhEd 775. 4 cr.

791. HISTORY OF PHYSICAL EDUCATION

From ancient Egypt to modern times. Influences of Greece, Rome, the Renaissance and Reformation periods, and modern European nationalism. Analysis of events and the beliefs of leaders in the development of systems of physical education. 4 cr.
Physics (Phys)

Chairperson: Roger L. Arnol'dy

PROFESSORS: Roger L. Arnol'dy; L. Christian
Balling; Edward L. Chupp; John F. Dawson;
Lennard A. Fisk; Jochen Heisenberg; Robert E.
Houston, Jr.; Richard L. Kaufmann; Robert H.
Lambert; John A. Lockwood; Lyman Mower;
John E. Mulhern, Jr.; Harvey K. Shepard;
William R. Webber; John J. Wright

RESEARCH PROFESSOR: Joseph V. Hollweg
ASSOCIATE PROFESSOR: Robert E. Simpson

RESEARCH ASSOCIATE PROFESSOR: John R.
Calarco

GRADUATE PROGRAM COORDINATOR:
Richard L. Kaufmann

The physics department offers courses leading to
the master of science for teachers, and the master
of science and doctor of philosophy degrees in
physics. Graduate students entering the master of
science and doctor of philosophy programs are ex-
pected to demonstrate a proficiency in undergrad-
uate work equivalent to that in the senior year at
the University of New Hampshire.

Master of Science for Teachers

The degree of master of science for teachers is
offered for candidates who satisfy the general ad-
mision requirements (see page 12) or who hold
secondary school teacher certification in physics or
in general physical science. The courses leading to
this degree will normally be chosen so as to im-
prove candidates' ability to teach physics or general
physical science at the secondary school level.
These courses should total at least 30 semester
hours and should be chosen in consultation with
the graduate adviser in physics.

M.S.T. students are not required to take the qual-
ifying examination. Teaching experience is required
for this degree. Persons interested in this degree
should confer with the graduate adviser.

Master of Science Degree

For admission to graduate study leading to a master
of science degree, students should have completed
24 to 30 semester hours in physics, or physics and
closely allied fields. The courses required for the
master of science in physics include Phys 831, 833,
839, 841, and 843. Candidates may select one of the
following plans:

1) Complete 30 semester hours of courses chosen
in consultation with the graduate adviser.

2) Complete 24 semester hours of courses chosen
in consultation with the graduate adviser, complete
a thesis representing the equivalent of six semester
hours' work, and pass an oral examination on the
thesis.

Doctor of Philosophy Degree

For admission to graduate study leading to a doctor
of philosophy degree, students should satisfy the
same general requirements as for a master of sci-
ence degree. Admission to candidacy for the degree
is primarily based upon demonstrated ability in
formal coursework; experience in teaching, equiv-
lent to at least half-time for one year; and passing
a written qualifying examination. This examination
is normally taken during the second year. Exces-
tions to the timing are possible only by petition.
Students are allowed a total of two attempts to
achieve candidacy. Finally, upon completion of a
thesis, doctoral candidates will take an oral ex-
amination based upon the area of their research.

The courses required for a doctor of philosophy
degree in physics are: 1) 831-832, 833, 835, 839,
841-842, 843-844; and 2) any additional five full
courses at the 800 level, excluding 869, 889, 897,
899, and 999. (For students doing Ph.D. research
in astrophysics or space physics, one of these five
courses must be 850 or 852.)

Interdisciplinary Research

The department encourages research in areas re-
lated to physics or applied physics. Should students
desire to do research in a field related to physics,
special provisions may be made. A cooperative pro-
gram with the Department of Electrical and Com-
puter Engineering is available to master's students
in physics. Contact the department chairperson or
graduate adviser for details.

701-702. INTRODUCTION TO QUANTUM
MECHANICS I AND II

Modern physics, nonrelativistic Schroedinger equa-
tion, the hydrogen atom, applications to atomic
and molecular structure. Prereq: diff eqns; multi-
dim calculus; /or permission. Intro mathematical
physics course desirable. 4 cr.

703-704. ELECTRICITY AND MAGNETISM I
AND II

Foundation of electromagnetic theory; electrosta-
tics, dielectric theory, electromagnetism, magnetic
properties of matter, alternating currents, Max-
well's field theory. Prereq: diff eqns; multi-
dim calculus; /or permission. Intro mathematical
physics course desirable. 4 cr.

710. INTRODUCTION TO ASTROPHYSICS

Review of the sun, stars, Milky Way, external gal-
axies, and expansion of the universe. Recent dis-
covers of radio galaxies, quasi-stellar objects,
cosmic black-body radiation, X-rays, and gamma
rays precede a discussion of Newtonian and general
relativistic cosmological models, steady-state/big-
718. **INTRODUCTION TO SOLID STATE PHYSICS**

Theory underlying the behavior of solids. Transport theory and the interaction of radiation and matter. Operation of semiconducting and superconducting devices and lasers. Prereq: physical mechanics, intro quantum mechanics; diff eqns, multivar calculus. 4 cr. (Offered with sufficient demand.)

791. **SPECIAL TOPICS**

Selected topics not covered sufficiently in general courses. May be repeated to 8 credits. 4 cr.

795. **INDEPENDENT STUDY**

Individual project under direction of a faculty adviser. Prereq: department permission. 1-8 cr.

831-832. **MATHEMATICAL PHYSICS**

Complex variables, differential equations, asymptotic methods, integral transform, special functions, linear vector spaces and matrices, Green’s functions, and additional topics selected from integral equations, variational methods, numerical methods, tensor analysis and group theory. 3 cr.

833. **EXPERIMENTAL PHYSICS**

Modern research techniques, including discussion and laboratory exercises in electromagnetism, nuclear, and atomic phenomena. Prereq: passing an electronics proficiency test or basic experimental physics. May be repeated to 6 credits. 3 cr.

835-836. **STATISTICAL PHYSICS I AND II**

Review of thermodynamics and kinetic theory, followed by an introduction to classical and quantum statistical mechanics. Microcanonical, canonical, and grand canonical ensembles; ideal Fermi and Bose gases and applications of statistical mechanics to selected physical problems. Prereq: for Phys 835: Phys 831; Phys 843; /or permission; for Phys 836: Phys 844. 3 cr. (Phys 836 offered on request.)

839. **THEORETICAL MECHANICS**

Newtonian, Lagrangian, and Hamiltonian formulation of the classical mechanics of particles and rigid bodies, with particular attention to those topics that serve as background for the study of modern physical theories. 3 cr.

841-842. **ELECTROMAGNETIC THEORY**

The formulation and detailed application of electromagnetic theory to physical problems. Prereq: permission. 3 cr.

843-844. **QUANTUM MECHANICS**

Wave mechanical and Dirac formulations of nonrelativistic quantum mechanics. Prereq: permission. 3 cr.

850, 852. **PLASMA PHYSICS I AND II**

Topics to be discussed will be selected from the following: magnetohydrodynamics and plasma flow, waves, shocks and discontinuities, instabilities, and adiabatic motion of charged nonlinear plasma phenomena. Prereq: Phys 835; /or permission. 3 cr. (Offered on request.)

853. **SOLAR MAGNETOHYDRODYNAMICS**

Introduction to solar physics, with emphasis on gas dynamics and magnetic fields. Interior structure, the theory of convection, wave motions in the presence of magnetism and gravity, coronal heating theories, steady and nonsteady flows, dynamo theory, and the theory of solar flares and other transient phenomena. Salient observational data will be reviewed. Prereq: permission. 3 cr. (Not offered every year.)

861-862. **ADVANCED QUANTUM MECHANICS**

Relativistic wave equations, propagator theory and Feynman diagrams, quantum theory of radiation, second quantization, introduction to quantum field theory and related topics. Prereq: Phys 839; Phys 844. 3 cr. (Not offered every year.)

863-864. **NUCLEAR PHYSICS**

Introduction to nuclear processes including nuclear forces, nuclear structure and models, static properties, beta and gamma emission, and nuclear reactions. Selected topics in experimental methods. Prereq: Phys 844. 3 cr. (Not offered every year.)

865-866. **SOLID STATE PHYSICS**

Development of quantum mechanical theory of solids, transport phenomena, etc. Prereq: Phys 843; Phys 836. 3 cr. (Not offered every year.)

869. **NUCLEAR PHYSICS SEMINAR**

Lectures and discussion of current topics in nuclear and particle physics. 1-3 cr.

887, 888. **INTRODUCTION TO SPACE SCIENCE I AND II**

Topics will be selected from the following: ionospheric physics; magnetospheric physics; interplanetary physics; solar physics; cosmic-ray physics; radio, x-ray, and gamma-ray astronomy; motion, transport, energy loss, origin, and acceleration of charged particles in the magnetosphere; interplanetary medium and galaxy; cosmological problems. 3 cr. (Not offered every year.)

889. **SPACE PHYSICS SEMINAR**

Lectures and discussions of current research in the physics of fields and particles in space. May be repeated to 6 credits. 1-3 cr.

891. **PROBLEMS IN THEORETICAL PHYSICS**

May be repeated to six credits. 1-3 cr. (Offered on request.)

893. **PROBLEMS IN EXPERIMENTAL PHYSICS**

May be repeated to six credits. 1-3 cr. (Offered on request.)

895. **SPECIAL TOPICS**

Any special fields of study not covered by the above courses may be included. Topic chosen in previous years: astrophysics; elementary particles; lasers/masers; many-body theory; general relativity and cosmology; group theory; atomic physics; quantum theory of light. May be taken more than once. 1-3 cr.

897. **COLLOQUIUM**

Required of all graduate students. Topics to be selected. 0 cr.
Plants Science (PLSc)

Chairperson: Owen M. Rogers

PROFESSORS: George O. Estes; Yun-Tzu Kiang; J. Brent Lory; Lincoln C. Peirce; Owen M. Rogers; Douglas G. Routley

ASSOCIATE PROFESSORS: David W. Koch; James R. Mitchell; James E. Pollard; Otho S. Wells

ASSISTANT PROFESSOR: John M. Roberts

GRADUATE PROGRAM COORDINATOR: George O. Estes

The graduate research program in plant science is concerned with solving basic and applied problems associated with growth of crop plants and their response to the environment. Facilities include laboratories, greenhouses, growth chambers, and two experimental farms. The program emphasizes two principal disciplines: 1) breeding and genetics; and 2) physiology and biochemistry. Research and teaching in plant genetics, cytogenetics, and plant breeding are major strengths complemented by University programs in genetics and statistics. A strong research and teaching program is also available in plant physiology, including advanced courses in plant nutrition, metabolism, and growth and development.

Undergraduates should obtain adequate background in the biological and physical sciences, including botany and chemistry. Students lacking these requirements may be admitted on condition that certain courses be completed without graduate credit. The aptitude section of the Graduate Record Examination is required for application.

Candidates for the master of science degree will be required to prepare a thesis and pass an oral examination. Candidates for the Ph.D. degree must take a written and/or oral qualifying examination and a final oral examination on the dissertation, in which the student must demonstrate ability to do original research in the area of specialization. Supervised teaching or its equivalent is required for each master's and doctoral student.

Advanced Plant Physiology

708. PLANT NUTRITION
Nutritional aspects of higher plants; uptake and assimilation, metabolic roles and growth response. Fertilizers: sources, manufacture, application, and energy dependence. Prereq: chemistry. Lab. 4 cr. (Not offered every year.)

762. PLANT METABOLISM
Function, occurrence, synthesis and degradation of plant constituents; respiration and photosynthesis; metabolism of nitrogenous and aromatic compounds; biochemical mechanisms in seed dormancy, fruit ripening, and disease resistance. Prereq: general biochemistry or BCHm 751. 2 cr. (Not offered every year.)

803, 804. TOPICS IN DEVELOPMENTAL PLANT PHYSIOLOGY

Advanced Genetics (See Genetics Program)

705. POPULATION GENETICS
Population growth and regulation; genetic variation; factors affecting gene frequency; ecological genetics. (Also offered as Gen 705.) Prereq: prin of genetics or permission. 4 cr. (Not offered every year.)

740. EVOLUTIONARY BIOLOGY
Origin of life; sources of genetic variation; population structure, mechanisms of evolution; molecular evolution; ecological adaptation in animals, plants, and man; community structure and evolution. (Also offered as Gen 740.) Prereq: prin of gen or permission. 4 cr. (Not offered every year.)

773. METHODS AND THEORY OF PLANT BREEDING
Plant breeding systems for qualitative and quantitative plant improvement. Prereq: prin of genetics; appl statistics; or permission. 3 cr. (Not offered every year.)

851. PLANT GENETICS
Euploidy, aneuploidy, cytoplasmic inheritance, somatic cell genetics, and genetics of disease resistance. Prereq: intro genetics. 3 cr. (Not offered every year.)
853. CYTOGENETICS
Chromosome aberrations and their behavior. Effect of radiation on chromosomes. Mapping and laboratory techniques in cytogenetic analysis. Prereq: genetics; cytology. 3 cr. (Not offered every year.)

General Offerings and Independent Studies

711. STATISTICAL METHODS II
Intermediate course; basic concepts of sampling, linear models and analyses for one-way and multiway classification, factorial arrangement of treatments, multiple regression, and covariance. Computer programs used in analyzing data. Examples from environmental sciences. (Also offered as FoRs 711.) Prereq: applied statistics I or equivalent. 4 cr.

720. LABORATORY TECHNIQUES IN PLANT SCIENCES
Use of laboratory instruments and techniques including extraction procedures, spectrometry, fluorometry, electrophoresis, chromatography, atomic absorption spectrometer, measurement of respiration and photosynthesis, photography, use of microscopes, and use of instruments for monitoring the environment. Prereq: chemistry (three semesters) or permission. 3 cr. Cr/F.

750. TOPICS IN AGRICULTURAL APPLICATIONS OF STATISTICS AND COMPUTING
Two-credit, seven-week modules offered in the middle of the spring semester. A) Current Application of Computers in Agriculture; B) Development of Computer Applications in Agriculture; C) Simulation of Crop Development; D) Agricultural Systems; E) Techniques for Field Experiments. Consult department for current offering. Prereq: permission. 2-10 cr.

776. RADIOISOTOPE TECHNIQUES FOR LIFE SCIENCES
Application of radioisotopes to biological systems; characteristics, detection, measurement, and tissue distribution of radioisotopes. Prereq: chemistry. Lab. 4 cr.

795, 796. ADVANCED TOPICS IN PLANT SCIENCE
A) Physiology; B) Genetics; C) Plant Utilization; D) Microscopy. Independent research, study, or group discussion. Prereq: permission. 2 or 4 cr.

801. THE RESEARCH PROCESS
For first-year M.S. and Ph.D. program students in biological sciences. Philosophy, logic, ethics in science; techniques of organization and design of research and of data presentation. 2 cr. Cr/F.

802. DESIGN OF EXPERIMENTS
Practical application of common experimental designs to research problems: the use of design to compensate for interfering factors, treatment selection, (particularly when several factors are suspected of having an influence on response), and computer aided analysis of results. (Also offered as Gen 802.) Prereq: statistics. 4 cr. (Not offered every year.)

877. SUPERVISED TEACHING FOR GRADUATE STUDENTS
Planning and presenting classroom and laboratory material. Biweekly seminars discuss teaching technique and problems. One credit or its equivalent required of each plant science master's and Ph.D. candidate. Plant science graduate students only. Prereq: permission. 1 cr. Cr/F.

895, 896. RESEARCH IN PLANT SCIENCE
Advanced investigations in a research subject, exclusive of thesis. 1-4 cr.

897, 898. GRADUATE SEMINAR
Library research and discussion of current topics of plant science. Required of all graduate students majoring in plant science. 1 cr.

899. MASTER'S THESIS
6-10 cr.

999. DOCTORAL RESEARCH

Political Science (Poli)

Chairperson: David L. Larson

PROFESSORS: Robert B. Dishman; Bernard K. Gordon; George K. Romoser
ASSOCIATE PROFESSORS: Warren R. Brown; Robert E. Craig; John R. Kayser; David L. Larson; David W. Moore; Lawrence W. O'Connell; B. Thomas Trout; Susan O. White
ASSISTANT PROFESSOR: Clifford J. Wirth
GRADUATE PROGRAM COORDINATOR: David L. Larson

Candidates for admission to graduate study in the Department of Political Science normally are expected to have majored either in political science or a field closely related, and to have achieved an undergraduate academic record of some distinction. In unusual and exceptional cases and where undergraduate preparation has been insufficient, candidates may be admitted provided that they follow without credit a program of study approved by the chairperson. In all cases the Graduate Record Examination is required of candidates who seek to be considered for admission. The department determines the master of arts in political science and the master of public administration.

Master of Arts (M.A.) in Political Science

The program leading to the master of arts in political science is normally to be completed in a single calendar year (an academic year plus the following summer) and is based on three elements: the development of advanced knowledge in at least three fields of the discipline in which the department offers its courses and seminars; the ability to conduct and complete an individual program of research at a high level; and familiarization with modern methodology in the discipline. Accordingly, every candidate will complete a suitably arranged program consisting of seven courses and seminars (28 credits) and a master's thesis (which carries 8 credits), for a total of 36 credits. The first four credits of Polt 899 are normally taken in the second semester of the candidate's residence. The remaining four credits of Polt 899 are taken during the semester in which the student expects to graduate. Theses topics must be approved by a committee nominated by the chairperson and appointed by the dean of the Graduate School.

An essential requirement is that candidates must arrange their programs so that they include at least
one seminar or advanced course in each of the four fields of the discipline emphasized by the department (political thought, American politics, comparative politics, and international politics). The remaining courses may be chosen according to the candidate's interests and needs, and two may be taken in a related field outside the department. Where candidates lack proficiency in tools of quantitative analysis or a foreign language essential to the program of study and research, they will be required to attain and demonstrate to their thesis advisers proficiency in the needed skill.

Master of Public Administration (M.P.A.)

The master of public administration is an interdisciplinary degree designed principally for individuals intending to pursue careers in local, state, or national government service in the U.S. or other countries. Candidates will be expected to complete eight full courses (32 credits) and a four-credit internship program (Polt 870: Administrative Internship) for a total of 36 credits. Candidates who have had appropriate responsibility in public administration may be exempted from the internship upon petition for such exemption. Such candidates will be required to undertake independent research on an approved topic related to public administration (Polt 895 or 896, four credits). A recreation and parks concentration, which draws upon the resources of that department, is offered as an interdisciplinary program for the degree. Students pursuing this concentration are held to the general degree requirements and usually take courses in recreation and parks to fulfill the requirements for work outside the political science department. The internship is served with an appropriate recreation and parks agency.

Of the eight courses, at least three shall be chosen from the courses and seminars in public administration offered by the department (Polt 805: Methods of Policy Analysis; Polt 806: Theories and Processes of Public Administration; and Polt 807: Cases in Public Management), and two from other political science courses offered by the department according to the needs and interests of the candidate. The remaining three courses may be chosen from outside the department in such related fields as economics, administration, resource economics, sociology, and recreation and parks.

The program is offered for full- and part-time students. The full-time program can be completed during one academic year (four courses each semester) plus one summer (internship). The part-time program, designed for working professionals, can be completed during late afternoon or evenings over a two-year period (four semesters, two summers).

American Politics and Public Administration

701/801. COURTS AND PUBLIC POLICY
Impact of judicial decisions on public policy at federal, state, local, and regional levels. 4 cr.

702/802. PUBLIC PLANNING AND BUDGETING
Analysis, goal setting, and strategic planning in a governmental setting, with particular emphasis on budgetary processes as a means for controlling policy effectiveness. 4 cr.

703/803. URBAN AND METROPOLITAN POLITICS
Planning and management of the urban community, intergovernmental relations, administrative functions, and general urban problems. 4 cr.

704/804. POLICY AND PROGRAM EVALUATION
Policy and program evaluation of federal, state and local governmental enterprise; focuses on the politics, practices, and methods of evaluative investigation. Evaluation as a technique for providing rational information for budgetary and policymaking decisions. 4 cr.

797, 798/897, 898. SECTION B: SEMINAR IN AMERICAN POLITICS
Advanced analysis and individual research. 4 cr.

797, 798/897, 898. SECTION F: SEMINAR IN PUBLIC ADMINISTRATION
Advanced analysis and individual research, including opportunities for direct observation of governmental administration. 4 cr.

805. METHODS OF POLICY ANALYSIS
Research design, survey methods, experimental techniques, and aggregate data analysis applied to public policy settings. 4 cr.

806. THEORIES AND PROCESSES OF PUBLIC ADMINISTRATION
Theories of organization and bureaucracy, the implications of bureaucratization, and the major processes of public administration including budgeting, personnel, policy making, as well as attention to contemporary policy issues including collective bargaining, affirmative action, citizen participation. 4 cr.

807. CASES IN PUBLIC MANAGEMENT
Policy case studies emphasizing politics, organizational structure, and interorganizational behavior; management case studies emphasizing behavior, human relations, personality, and intraorganizational dynamics; and simulation and role-playing exercises. 4 cr.

Political Thought

720/820. PERSPECTIVES ON POLITICAL SCIENCE
Different views on the study and meaning of politics. Perspectives of political scientists, political philosophers, and political activists. 4 cr.

721/821. POLITICS AND ECONOMICS: POLITICAL ECONOMY AND THE MODERN STATE
The modern state and issues of political economy; treatments of Adam Smith, David Ricardo, Karl Marx, Max Weber, John Maynard Keynes, and Joseph Schumpeter. Issues of "supply-side" economics, private and public planning priorities, and current criticism of the welfare state. 4 cr.

797, 798/897, 898. SECTION E: SEMINAR IN POLITICAL THOUGHT
Advanced treatment and individual research. 4 cr.
Comparative Politics

741/841. POLITICS OF INDUSTRIALIZED STATES
Impact of modern industrialism and its organization upon political life and the conduct of government. 4 cr.

742/842. COMPARATIVE COMMUNIST SYSTEMS
Interests, demands, and decision making in communist governments. Ideological issues, political behavior within communist international organizations, intraparty relations, distinctions between ruling and nonruling communist parties. 4 cr.

797. 798/897, 898. SECTION C: SEMINAR IN COMPARATIVE POLITICS
Advanced analysis and individual research on foreign nations or regions, focusing on governmental institutions, foreign policy, political parties, or bureaucracy. 4 cr.

International Politics

760/860. THEORIES OF INTERNATIONAL POLITICS AND INTEGRATION
General explanations of the behavior of nations; theory and practice of supra-national integration; theories of peace and security and community building at the international level; concepts and experience in arms limitations and conflict resolution. 4 cr.

761/861. INTERNATIONAL LAW
Formalized processes for regularizing state behavior; development of norms based on custom, precedent, and formal institutions, as in treaties and cases. Arms reduction and limitation arrangements; inspection, and other formal procedures designed to preserve peace. 4 cr.

778/878. INTERNATIONAL ORGANIZATION
Collective security and other forms of cooperation among nations through international organizations such as the United Nations and its predecessors, and through regional bodies. 4 cr.

797, 798/897, 898. SECTION E: SEMINAR IN INTERNATIONAL POLITICS
Advanced analysis and individual research; emphasis on developments in theory. 4 cr.

Psychology

Psychology (Psyc)
Chairperson: Earl C. Hagstrom

PROFESSORS: Raymond L. Erickson; Gordon A. Haaland; John A. Nevin
ASSOCIATE PROFESSORS: William M. Baum; Victor A. Benassi; James R. Davis; Peter S. Fernald; Earl C. Hagstrom; David E. Leary; John E. Limber; Daniel C. Williams; William R. Woodward
ASSISTANT PROFESSORS: Ellen S. Cohn; Kenneth Fuld; Carolyn J. Mebert; Anne W. Sandol; Rebecca M. Warner
GRADUATE PROGRAM COORDINATOR: Kenneth Fuld

Doctor of Philosophy
The Department of Psychology offers a four-year program of study leading to the doctor of philosophy degree. The basic goal of the program is the development of behavioral scientists who can both carry out sound research in an area of specialization and teach effectively. Integral to the program is the development of specific skills required by the research psychologist who intends to become a college or university teacher. In order to develop these skills, each year the program required of all students includes a variety of research and instructional activities in addition to the usual academic work. In the first two years, students register for at least 12 credits each semester. In the third year, each student teaches small sections of introductory psychology under close staff supervision while concurrently enrolled in a teaching seminar that has among its objectives an increased appreciation of the goals and problems of teaching.

Areas in which the student may specialize are: history, learning, perception-cognition, developmental, physiological, and social psychology. The student's adviser will help the student to plan an effective graduate program. Core courses taken by all students include methodology, statistics, and the seminar and practicum in the teaching of psychology. Work outside the department also is included in each student's program. Depth in a particular area is obtained through participation in several of the advanced seminars listed below and by independent study and research conducted under the supervision of a staff member.

Prior to the doctoral dissertation, the student will carry out original research that culminates either per semester in each of two semesters. Maximum 8 cr. Cr/F.

Related Courses in Recreation and Parks
For information, contact Associate Professor Gus Zazo, Department of Recreation and Parks.

885. COMPREHENSIVE PLANNING
Leisure and tourist planning—local, county, and regional. Recreation programming and resource development. Legislative aspects, court decisions, administrative organization, zoning, land use, and other master planning considerations. Prereq: permission. 4 cr.

890. SPECIAL TOPICS AND PROJECTS
Advanced study in specific areas; may involve formal classes, seminars, or independent projects. Prereq: permission. 4 cr.

General Courses

870. ADMINISTRATIVE INTERNSHIP
Practical administrative experience in an area of professional interest. Prereq: M.P.A. candidate. 4 cr.

895, 896. READING AND RESEARCH IN POLITICAL SCIENCE
A) American Politics; B) Comparative Politics; C) International Politics; D) Political Thought; E) Public Administration; F) Public Policy. The graduate student will engage in independent study under the direction of one of the members of the department. Requires approval of the graduate committee. 1-4 cr.

899. MASTER'S THESIS
Each student will carry out original research that culminates in a master's thesis. Must be taken 4 cr.
in a master's thesis or a paper of publishable quality. A degree of variance may be awarded upon the successful completion of a program approved by the department and dean of the Graduate School including original research at the master's level. Detailed information concerning the qualifying examination for advancement to candidacy for the Ph.D. degree and other requirements can be obtained from the department.

A student admitted to graduate study must meet the requirements for admission to the Graduate School. In applying for admission to the department's program, candidates must submit Graduate Record Examination scores on the verbal, quantitative, and analytical sections of the aptitude test and the score on the advanced test in psychology.

To be accepted into the program, the applicant must desire to pursue the doctoral degree and be deemed qualified to do so on the basis of initial selection procedures. The applicant need not necessarily have been an undergraduate major in psychology. However, before beginning a graduate career proper, the applicant must have completed a minimum of 15 undergraduate credits in psychology, including courses in elementary statistics and experimental psychology.

The courses and seminars listed below provide the general framework within which the student will develop, with the counsel of the adviser, a program of research and study leading to the doctoral degree. The range and sequence of courses varies to some extent with the student, though there will be common features to all programs. All advanced seminars may be repeated for credit.

Graduate courses are offered whenever possible in a two-year cycle. Consult the department for exact schedule. Approval of the instructor is required before registering for any graduate course.

801-802. GRADUATE PROSEMINAR
Students and graduate faculty in psychology meet every two weeks for a mutual exchange on current issues in psychology. 0 cr. Gr/F.

805-806. RESEARCH METHODOLOGY AND STATISTICS I-II
A consideration of research techniques and problems of methodology in psychology. The first semester stresses the principles of statistical inference, correlational approaches, and their interrelatedness in design. Topics considered include probability theory, linear regression, function-free prediction, the theory underlying statistical inference, parametric and nonparametric tests of significance, and principles of analysis of variance. The second semester extends the correlational approach to the techniques and methodology of multiple regression and considers the appropriate use and theoretical bases of complex designs. Prereq: undergraduate statistics and experimental psychology. 4 cr.

807. RESEARCH METHODS AND STATISTICS III
The application of multivariate methods of data analysis in psychological research: multiple regression, analysis of covariance, Hotelling's T², multivariate analysis of variance, path analysis, discriminant functions, canonical correlation, factor analysis. 4 cr.

808. ADVANCED SEMINAR IN QUANTITATIVE AND ANALYTIC METHODS
Advanced treatment of methodological topics of current interest. Content varies: representative topics include field research, surveys, time series, causal analyses, log-linear models, formal and mathematical models, and computer simulation. 4 cr.

810. PSYCHOLOGY OF VISUAL PERCEPTION
Anatomy, physiology, psychophysics, and perceptual processes of vision. Topics include physics of light, psychophysics, color, space and form, depth, motion, eye movements, visual learning and development, constancy, and illusions. 4 cr.

811. SENSATION AND PERCEPTION
Anatomy, physiology, psychophysics, and perceptual processes of the visual, auditory, gustatory, olfactory, and cutaneous senses. Topics include stimulus definition, psychophysics, sensory transduction, sensory and perceptual adaptation, and neural coding of space, time, magnitude, and quality. 4 cr.

812. PSYCHOLOGY OF LANGUAGE
Theories of language structure; functions of human language; meaning; relationship of language to other mental processes; language acquisition; indices of language development; speech perception; reading. 4 cr.

813. COGNITION
Complex mental activities; consciousness and attention; concept formation; reasoning; problem solving; creative thinking; relationship between cognition and affective behavior. 4 cr.

814. ADVANCED SEMINAR IN COGNITION
An in-depth examination of one or more specific topics in cognition; including, for example, issues in memory, attention, the use and development of language, and cognitive science. 4 cr.

817. ADVANCED SEMINAR IN SENSORY AND PERCEPTUAL PROCESSES
A comprehensive examination of a specific topic in sensory and perceptual processes. 4 cr.

821. THE EXPERIMENTAL ANALYSIS OF BEHAVIOR
Environmental and biological determiners of behavior. Theory, research methods, and applications. Major concepts and recent research. 4 cr.

831. BRAIN AND BEHAVIOR
Relationships between the nervous system and behavior. Psychological, neural, and biochemical mechanisms underlying instinct, memory, learning, emotion, and consciousness in humans; evolution of these functions in lower animals. 4 cr.

832. COMPARATIVE PSYCHOLOGY
Comparisons of the basic processes of sensation, motivation, learning, and social behavior in different species. Contemporary theories of behavior formulated by ethologists and ecologists contrasted and compared with current theories in psychology. 4 cr.
833. ADVANCED SEMINAR IN PHYSIOLOGICAL PSYCHOLOGY
In-depth examination of a specific topic in the neurosciences. Topics vary depending upon interests of instructor and students. Prereq: Psyc 831 or permission. 4 cr.

845. ADVANCED SEMINAR IN LEARNING AND BEHAVIOR ANALYSIS
Current empirical and theoretical issues in learning and the analysis of behavior. 4 cr.

852. ADVANCED SOCIAL PSYCHOLOGY
Survey of current research and major theories; in-depth critical analysis of topics such as attribution theory, social cognition, and theories of aggression. 4 cr.

854. ADVANCED SEMINAR IN SOCIAL PSYCHOLOGY
Intensive coverage of the experimental and theoretical literature in a selected area of basic or applied social psychology. Students will participate directly in the conduct of the seminar by means of individual topical discussions, development and/or execution of research designs, and critical assessment of the current state of the topic area under discussion. Illustrative topics: political behavior, paralinguistics and nonverbal communication, ethnic and racial prejudice, and environmental psychology. May be repeated for credit. Prereq: Psyc 852. 4 cr.

861. ABNORMAL BEHAVIOR
Disturbing behaviors; historical developments; viewpoints of etiology; identifying and understanding disruptive behavior; diagnostic implications for treatment as a function of varying theoretical viewpoints. 4 cr.

862. ADVANCED SEMINAR IN ABNORMAL PSYCHOLOGY I
An in-depth examination of topics in abnormal, clinical, and counseling psychology. 4 cr.

870. HISTORY OF PSYCHOLOGY
History of psychology up to the 20th century. Major figures, theories, and developments. Relationship to developments in cultural history, philosophy, and the natural sciences. Beginnings of modern scientific psychology. 4 cr.

871. SURVEY OF 20TH CENTURY PSYCHOLOGY
Reasses, extends, and integrates knowledge of 20th century psychology within historical perspective. Major figures, schools, systems, theories. Review of major fields of psychology. 4 cr.

873. METHODS AND THEORIES IN HISTORICAL RESEARCH ON THE BEHAVIORAL SCIENCES
Major methods and theories used in historical research applied to the study of the behavioral sciences. Prereq: Psyc 870, 871, or permission. 4 cr.

874. PROBLEM AREAS IN THE HISTORY OF PSYCHOLOGY
In-depth studies of particular individuals, movements, and/or subfields. Each student pursues own research project. May be repeated for credit. Prereq: Psyc 870, 871, or permission. 4 cr.

875. ADVANCED TOPICS IN THE HISTORY OF PSYCHOLOGY
Topic to be determined when course is offered. May be repeated for credit. Prereq: Psyc 870, 871 or permission. 4 cr.

881. DEVELOPMENTAL PSYCHOLOGY
Current research and major theories; cognitive, personality, learning, and emotional development. 4 cr.

882. ADVANCED SEMINAR IN DEVELOPMENTAL PSYCHOLOGY
In-depth analysis of one or several specific topics or issues in developmental psychology. 4 cr.

891-892. PRACTICUM AND SEMINAR IN THE TEACHING OF PSYCHOLOGY
Practicum offers the student an opportunity to teach introductory psychology under close supervision from the staff. The seminar is coordinated with this experience and focuses on both practical and theoretical issues of significance in the teaching/learning process at the college level. Required of all doctoral students, during the third year. 5 cr.

894. ADVANCED RESEARCH IN PSYCHOLOGY
Student designs and conducts original research that culminates in a paper of publishable quality. Completion of either this course or Psyc 899 will satisfy the department's research requirement for the master's degree. May be taken for 4 cr. per semester in each of two semesters or 8 cr. in one semester. Maximum 8 cr. Cr/F.

895. READING AND RESEARCH IN PSYCHOLOGY
A) Physiological; B) Perception; C) History and Theory; D) Learning; E) Social; F) Cognition; G) Statistics and Methodology; I) Developmental; J) Psychopathology. As part of the development as an independent scholar, the student is encouraged to plan: 1) broad reading in an area; 2) intensive investigation of a special problem; or 3) experimental testing of a particular question. Requires approval of both adviser and staff member directing project. May be repeated. 1-4 cr.

898. PROBLEMS AND ISSUES IN PSYCHOLOGY
Seminar on a problem that has been the subject of specialized research and study by a member of the staff. Topic and instructor vary. May be repeated for credit. 4 cr. (Not offered every year.)

899. MASTER'S THESIS
4 cr. per semester in each of two semesters or 8 cr. in one semester. Maximum 8 cr. Cr/F.

999. DOCTORAL RESEARCH
Graduate Course Offered Primarily for Students Enrolled in Other Graduate Programs

823. INDIVIDUAL TESTING
Training in administration, scoring, and behavioral observation necessary for interpretation of individual tests of intelligence with discussion and demonstration of certain other instruments for cognitive measurement. The focus will be on children rather than adults, and on technique rather than interpretation. Each student will be required to
Resource Economics (REco)

Chairperson: Edmund F. Jansen, Jr.

PROFESSORS: Richard A. Andrews; William H. Drew; Owen B. Durbin; Edmund F. Jansen, Jr. ASSOCIATE PROFESSORS: John E. Carroll; Bruce E. LindsaY; Albert E. Luloff ADJUNCT ASSOCIATE PROFESSORS: Betty H. Roberts; Charles F. Tucker

GRADUATE PROGRAM COORDINATOR: Edmund F. Jansen, Jr.

The Department of Resource Economics and Community Development offers two master's degrees.

Resource economics: Agricultural economics; community development; regional economics; land and water economics; and rural manpower.

Resource administration and management: Management of publicly and privately owned natural resources; administration of natural resource laws and policies.

Entrance Requirements
Students admitted to these programs are expected to have completed either an undergraduate degree in the field in which they plan to specialize or show adequate preparation in the basic support courses of the field. Students with good undergraduate records who lack a background in a particular field may be admitted to a program, provided they are prepared to correct the deficiencies. The Graduate Record Examination is required of all applicants.

Resource economics: Students planning for the resource economics degree will need satisfactory undergraduate training that would usually be expected to include four or more courses in economics or resource economics.

Resource administration and management: Students interested in the resource administration and management degree are expected to have had a minimum of three courses in the areas of ecology or natural resources and resource economics, or be expected to make up this deficiency. Persons having professional experience in resource administration, management or related areas will receive priority for admittance to the program. An applicant is required to submit an essay of up to 3,000 words describing his or her background and goals.

Academic Requirements
The master of science degrees in resource economics and resource administration and management are conferred upon successful completion of the following:

1) A program amounting to not less than 30 credits (34 credits for resource administration and management), including the following course requirements or equivalent: REco 893-894, Seminar, 2 cr.; REco 803, Approach to Research, 2 cr.; quantitative methods or analytical techniques, 3-4 cr.; either REco 706, Economics of Resource Development or REco 708, Environmental Economics, and REco 898, Directed Research, 4-6 cr., or REco 899, Thesis, 6-10 cr. In addition, the resource administration and management student must take REco 812, Administration of Resource Laws and Policies.

2) A final oral and/or written examination.

701. STATISTICAL METHODS I
Analysis of variance and general linear models; measured numbers, nature of statistical evidence, sampling distributions, and principles of statistical inference; application of specific linear models to given sets of data. Prereq: upper-division undergraduate or graduate standing. 4 cr. (Not offered every semester.)

702. NATURAL RESOURCES POLICY
Contemporary issues in the management and allocation of natural resources; effect of humans on agricultural and forest lands, water, wildlife, fisheries, and minerals; historical perspective of current resource policies. Prereq: permission. 4 cr.

705. PLANNED CHANGE IN NONMETROPOLITAN COMMUNITIES
Discussion and application of community development theory and principles using appropriate research methodologies. Areas of study chosen from: population growth, community planning and development, provision and distribution of services, rural-urban difference, and systems management. Emphasis on empirical research studies. Students may participate in community-development activities. May include placement in field agency. Prereq: applied community development; statistics; permission. 4 cr. (Not offered every year.)

706. ECONOMICS OF RESOURCE DEVELOPMENT
Resource scarcity and theories of economic development; non-resource development problems of land and natural resources, urban-rural conflicting demands, and conservation and water supply; capital needs, externalities, and market failure. Prereq: intermediate economic theory. 4 cr. (Offered every third semester.)

708. ENVIRONMENTAL ECONOMICS
Environmental pollution, the market economy, and optimal resource allocation; alternative control procedures; levels of environmental protection and public policy; property right issues. Prereq: intermediate microeconomic theory; permission. 4 cr. (Offered every third semester.)

710. RESOURCE ECONOMICS SEMINAR
A) Agricultural Economics and Food Policy; B) Rural Development; C) Marine Economics; D) Location of Economic Activity; E) Land and Water Economics; F) Quantitative Methods; G) Environmental Economics. In-depth treatment of area, including classic works. Seminars arranged to students' needs and offered as demand warrants. May be repeated. 2-4 cr.

717. LAW OF COMMUNITY PLANNING
Common law and the Constitution with respect to property law, including eminent domain, land-use planning, urban renewal, and zoning. Makes the nonlawyer aware of the influence and operation of the legal system in community development. 4 cr.
718. LAW OF NATURAL RESOURCES AND ENVIRONMENT
For resource managers: the legal system pertaining to resource management, protection of the environment, and possibilities for future action. Prereq: contemp conserv issues, or land economics and use, or permission. 3 cr.

756. REGIONAL ECONOMIC ANALYSIS
Concepts and methods of delineating regional economies, methods of measuring activity, regional development, and public policies. Emphasis on empirical research studies. Prereq: intermediate economic theory; or permission. 4 cr. (Offered every third semester.)

795. INVESTIGATIONS IN RESOURCE ECONOMICS
A) Agricultural Marketing; B) Agricultural Production and Farm Management; C) Community Development; D) Economics of Human Resources; E) Economics of Population and Food; F) Land Economics; G) Marine Economics; H) Rural Economic Development; I) Regional Economics; J) Water Economics. Special assignments in readings, investigations, or field problems. May be repeated. Prereq: permission. 2-4 cr.

803. APPROACH TO RESEARCH
The meaning of science and the application of logic in the scientific method. Principles and techniques of scientific research; Survey of experimental design procedures. Organization of investigative work, problem analyses, working plans, and scientific writing. (Also offered as FoRs 803.) Prereq: permission. 2 cr.

804. APPLIED ECONOMICS OF RESOURCE USE
The theory of resource allocation used in solving public and private economic problems. Resource-providing relationships, nature of cost, returns to scale, factor valuation and pricing, and uncertainty are analyzed with appropriate methodology. Primary emphasis will be placed on empirical research studies and their implications. Prereq: applied statistics; intermediate microeconomic analysis. 4 cr. (Not offered every year.)

809. AGRICULTURAL ECONOMICS
Analysis of supply, demand, and price relationships. Appraisal of the economic theory relevant to decision making in food production, marketing, and consumption; the competitive structure of the food industry. 4 cr. (Not offered every year.)

811. NATURAL AND ENVIRONMENTAL RESOURCE MANAGEMENT
Fundamental scientific, aesthetic, and ethical principles involved in the management of renewable natural resources and ways to apply these principles in the formulation and evaluation of resource-management policies including the identification of unifying concepts in the management of specific renewable resources, soils, water, forests, and wildlife. Prereq: permission. 4 cr.

812. ADMINISTRATION OF RESOURCE LAWS AND POLICIES
Legalistic, policy, and political science aspects of natural and community resource administration; concepts of private property, home rule, social value, tradecrafts, and bureaucracy as elements in administration. Transportation fee. Prereq: permission. 4 cr.

815. LINEAR PROGRAMMING METHODS
Setting up and solving problems by the simplex and distribution methods; variation in linear programming methods with applications; nonlinear programming, discrete programming; and solving input-output and game-theory problems. Prereq: elem matrix alg or permission. 2 cr.

838. INTRODUCTION TO THE LOCATION OF ECONOMIC ACTIVITY
Economic theories explaining the behavior of individual firms and consumers in selecting sites for carrying on economic activities. The relationship of these theories to patterns of industrial location, systems of cities, and land-use competition in general. Problems of locational change and adjustment and the effects of public policy on spatial economic activities. Prereq: elem calculus; linear algebra; regression; micro- and macroeconomics; or permission. 4 cr. (Not offered every year.)

893, 894. NATURAL AND ENVIRONMENTAL RESOURCES SEMINAR
Presentation and discussion of recent research, literature, and policy problems in the natural and social sciences influencing resource use. (Also offered as FoRs 893, 894.) 1 cr. Cr/F.

895. INVESTIGATIONS IN RESOURCE ECONOMICS
A) Agricultural Marketing; B) Agricultural Production and Farm Management; C) Community Development; D) Economics of Human Resources; E) Economics of Population and Food; F) Land Economics; G) Marine Economics; H) Rural Economic Development; I) Regional Economics; J) Water Economics. Special assignments in readings, investigations, or field problems. May be repeated. Prereq: permission. 2-4 cr.

896. INVESTIGATIONS IN RESOURCE MANAGEMENT AND ADMINISTRATION
A) Resource Administration; B) Resource Management; C) Resource Policy; D) Public Laws and Resources. May be repeated. Prereq: permission. 2-4 cr.

898. DIRECTED RESEARCH
Hours and credits to be arranged. Not available if credit obtained for RECo 899. A year-long course; an "IA" grade (continuous course) given at the end of the first semester. Prereq: permission. 2-6 cr. Cr/F.

899. MASTER'S THESIS
6-10 cr.

Sociology (Soc)

Chairperson: Arnold S. Linsky

PROFESSORS: Melvin T. Bobick; Walter F. Buckley; Bud B. Khleif; Arnold S. Linsky; Stuart H. Palmer; Solomon Poll; Fred Samuels; Murray A. Straus

ASSOCIATE PROFESSORS: Charles Bolian; Peter Dodge; Richard E. Downs; Barbara K. Larson; Melville Nielson; Stephen P. Reyna; Howard M. Shapiro
ASSISTANT PROFESSORS: Lawrence C. Hamilton; Sally K. Ward; Deborah Winslow

GRADUATE PROGRAM COORDINATOR: Peter Dodge

The Department of Sociology and Anthropology offers M.A. and Ph.D. degrees in sociology. The master's degree program emphasizes theory and methodology. Students in the doctoral program are expected to select from the areas of departmental specialization. This may include courses in an area of expertise found among the faculty, one minor area—for intensive study and examination. There are four major substantive areas for possible specialization: deviance, conflict, and control; social psychology; comparative institutional analysis; and family. Students may pursue specialties within or across the major areas of specialization, or propose to the Graduate Committee other major areas of specialization which fall within the faculty's competence.

Students' proficiency in theory, statistics, and methods, and in the major and minor areas of study, is determined by written examinations. Details about the examinations can be found in the Graduate Handbook, and is sent to all students requesting information about the program. Within the context of a curriculum organized largely in the form of seminars and research, students may design, with the approval of advisers and the Graduate Committee, curricula suitable to their experience and intellectual goals. In line with this freedom, students are encouraged to take electives outside of sociology, including courses in anthropology and up to three courses from outside the department. Selection of thesis and dissertation topics is limited only by the areas of expertise available among departmental faculty members.

Upon establishing residence, students will be responsible for remaining informed about any modifications in the requirements of the degree program in which they are enrolled.

To be awarded the master of arts degree the candidate must fulfill the following requirements: 1) Complete satisfactorily at least one full year (24 credit hours) of graduate-level course work in sociology including Sociological Methods I (801), and either 802, 803, or 804; and Sociological Theory I (811). 2) Register for one credit of thesis work during the second semester of residence and submit a draft of a proposal to the thesis committee by the end of the semester. The proposal or abstract must be circulated to all department faculty. 3) Submit for approval a report of a research endeavor to the thesis committee. This report may be in the form of either a) a thesis or b) a publishable paper in the form outlined in the publication format of any major sociological journal.

Students interested in nonacademic employment after completing a degree in sociology should take as one of their electives a field experience or internship course involving experience in a nonacademic setting. This can be done under Sociology 895, by arrangement among the student, a faculty member, and the organization in which the field experience/internship will be located. Experience of this type is extremely important for placement in nonacademic positions. The expectation is that an academic paper will be required in conjunction with the field experience.

To be awarded the doctor of philosophy degree, the candidate must fulfill the residence requirement of three years' work after the bachelor's degree including: 1) a minimum of 12 courses in sociology (at least 8 as seminars), other than thesis or dissertation research, including Sociological Theory I and II (811 and 812), Sociological Methods I and II (801 and 802), and the other courses in methodology or statistics (803 or 804), three courses in a major area, and two in a minor area of sociology; 2) a second minor consisting of three related courses whether or not sociological in content—no preliminary examination is required; 3) passing written examinations in the major and minor areas of sociological knowledge and understanding, and methodology; 4) demonstrating reading level proficiency in a foreign language or a research tool appropriate to the overall program of the student (the research tool option must not be part of the other degree requirement for graduate students in sociology); examples of appropriate research tools include computer programming, symbolic logic, historical orientation of their authors, and mathematical statistics. At the time they are admitted to the Ph.D. program, students must submit, for approval by the Graduate Committee, a statement indicating how they intend to meet the language/research tool requirement; 5) fulfilling the research and/or teaching requirement described below; 6) writing and defending an acceptable doctoral dissertation.

In planning the program of study, the student will be advised at first by an assigned faculty member and, subsequently, in the case of doctoral students, by a guidance committee. Specially appointed committees will be organized for the direction and supervision of the student's research, and dissertation. Under such supervision, students are expected to go considerably beyond the minimum common requirements of the graduate program to establish a knowledgeability and competency peculiarly their own, and they will be permitted to take courses outside the department or below the 700 level within the department only with the express permission of their advisers.

Students are permitted to register for Reading and Research in Sociology and Anthropology (895, 896) to pursue their individual interests. Upon completion, work done under this rubric will be reported, in writing, to the Graduate Committee and the student's adviser by the faculty member who assumes the responsibility for supervising such activities.

In all cases, students having knowledge equivalent to any of the required courses may substitute an examination to be given by the faculty member responsible for the course. Full credit for the fulfillment of requirements may be given to equivalent courses taken elsewhere.

An important part of the graduate program is the opportunity to learn from participation in the teaching and research activities of the department faculty. All candidates for doctoral degrees are therefore expected to assist a member of the department in teaching and/or research. Assignments to work with a specific member will be made by the Graduate Committee on the basis of students' experience, the needed areas of training, and the interests and preferences expressed by the students and faculty members.

To be accepted as a graduate student in sociology, applicants must present, in addition to meeting the general Graduate School requirements, Graduate Records, and the general content requirements, as well as quantitative, and analytical tests, and the advanced sociology test. Undergraduate majors in other fields may be admitted, in which case advanced tests in
their majors may be required. However, if the student's undergraduate work has not included an introductory course in sociological theory, research methods, statistics, and two other sociology courses, these five courses must be taken—or equivalent knowledge demonstrated through examination—in addition to the requirements outlined above.

All students entering the program must complete the M.A. before admission to the Ph.D. program. The department welcomes both applicants who plan to continue for the Ph.D. as well as students planning for the M.A. only.

715. SOCIOLOGY OF CRIME AND JUSTICE
Seminar devoted to analyses of the relationships between violent, property, and "victimless" crime on the one hand and the police, judicial, and correctional components of criminal justice systems on the other. Prereq: intro criminology or permission. 4 cr.

720. CURRENT DEVELOPMENTS IN SOCIOLOGY OF THE FAMILY
A current topic will be selected each semester, such as stratification and the family, intrafamily communication, power structure of the family, kinship in non-West societies. Critical review of the literature; class or individual research project usually will be carried out. Prereq: 8 credits of sociology; a family course recommended. 4 cr.

721. FAMILY INTERACTION
Analysis of family interaction from a sociological perspective. Consideration of individual family members, relationships, and the family as a unit, using a social systems approach. Prereq: intro soc or permission. 4 cr.

735. COMPLEX ORGANIZATIONS
Comparative study of the structure and dynamics of complex, formal organizations (business, military, political, and governmental, educational, medical), Power and social control in formal systems; organizational processes, performances, and effectiveness; effect of complex, formal organizations on persons and societies. Prereq: permission. 4 cr.

740. CULTURE CHANGE
Various types of society; development of theory. Descriptive studies of institutional as well as theoretical materials selected from the writings of Comte, Marx, Spencer, Durkheim, Spengler, Sorokin, Redfield, and others. 4 cr.

741. SOCIAL CHANGE AND SOCIETAL DEVELOPMENT
Comparative, interdisciplinary approach. Interrelationships among economic, political, and social factors in determining the structure, dynamics, character, and level of development of societies. Prereq: permission. Soc 740 recommended. 4 cr.

745. SOCIAL STRATIFICATION
Pattern of distribution of economic, honorific, and political variables within the populations of complex societies; allocation of personnel to the roles in question, notably through occupational mobility; and the impact of such processes upon behavior, both individual and social. Prereq: intro soc or social institutions. 4 cr.

750. THE MIDDLE EAST: ISSUES OF ETHNICITY, WORK, AND IDENTITY
Community studies approach to such topics as: ethnicity and identity in the interrelationship of language, religion, and corporate membership in a community; ethnic division of labor; work, pluralism, and family networks; mobility and immobility; estates vs. classes. 4 cr.

757. SOCIAL INSTITUTIONS OF LATIN AMERICA AND THE CARIBBEAN
Selective analysis of distinctive institutions and social systems, with particular attention to social aspects of the process of modernization. Prereq: permission. 4 cr.

761. POPULATION DYNAMICS
Major population trends including changes in birth and death rates, population characteristics, mobility, migration, world population growth, population problems, and policies of countries at different stages of economic development. Interrelationship of population and society. 4 cr.

770. CULTURE, PERSONALITY, AND SOCIETY
A cross-cultural view of the development of personality as emergent from genetic, biological, and socio-cultural determinants; analysis of the dynamic interplay of socio-cultural and psychological behavior systems. Prereq: prior courses in sociology, anthropology, or psychology. 4 cr.

780. SOCIAL CONFLICT
Nature of social conflict, especially war. Setting and interaction of conflict, its dynamics, and factors affecting its course and outcomes. Prereq: permission. 4 cr.

785. THE STUDY OF WORK
Understanding society through the structure of work. Case studies, in an ethnographic manner, of high-status and low-status occupations to provide understanding of social processes and interrelationships in the social structure. 4 cr.

790. APPLIED SOCIOLOGY
1) Current level of use of sociological knowledge; 2) the advocate, consultant, and researcher roles in applied settings; 3) techniques of applied research; 4) implications of applied sociology, including ethical problems. Each student will focus on a social problem and write a paper covering the above issues. Applied projects where possible. Prereq: meth of soc res. 4 cr.

794. EVALUATION OF SOCIAL PROGRAMS
Evaluation research defined: purposes of evaluation; design of evaluation studies; setting of programs; utilization of evaluation results. Examination of case studies of evaluations of social programs. Students are responsible for designing an evaluation study in their chosen substantive area. Prereq: meth of soc res. 4 cr.

795, 796. READING AND RESEARCH IN SOCIOLOGY
A) Communications; B) Criminology; C) Culture Change; D) Culture and Personality; E) Deviant Behavior; F) Family; G) Population; H) Rural-Urban; I) Social Control; J) Social Differentiation; K) Social Movements; L) Social Psychology; M) Social Research; N) Social Theory. Prereq: 12 credits of sociology or permission. 2-8 cr.
801. SOCIOLOGICAL METHODS I: INTERMEDIATE SOCIAL STATISTICS
Appraisal of statistical methods to the analysis of social data, with particular emphasis on multiple regression and related topics. 4 cr.

802. SOCIOLOGICAL METHODS II: RESEARCH DESIGN
Systematic investigation of each step in the design and implementation of sociological research. Selected techniques of data collection and analyses will be pursued. Prereq: meth of soc res; soc stat; or their equivalents; or permission. 4 cr.

803. SOCIOLOGICAL METHODS III: SPECIAL PROBLEMS IN METHODS AND STATISTICS
Course alternates among special problems, such as measurement, and advanced statistics. 4 cr.

804. SOCIOLOGICAL METHODS IV: FIELD WORK
Training for participant observation in the manner of an anthropologist or Chicago-school sociologist. Students will work and discuss field notes and become familiar with case studies, content analysis, and relevant issues. Field notes, basis for a term paper. 4 cr.

811. SOCIOLOGICAL THEORY I
The content, presuppositions, and implications of the body of sociological theory, exemplifying the full range of sociological inquiry. Prereq: hist of soc theory; contemp soc theory; or their equivalents. 4 cr.

812. SOCIOLOGICAL THEORY II
The content, presuppositions, and implications of contemporaneous sociological theory. Students will engage in theory construction and analysis, and in this endeavor will be encouraged to develop their particular interests in substantive areas. Prereq: Soc 811. 4 cr.

813. SOCIOLOGICAL THEORY III
A seminar of intensive study of topics in sociological theory. Sample topics include: exchange theory, functionalism, systems theory, theory construction, pioneering theorists. Prereq: hist of soc theory; contemp soc theory; or their equivalents. 4 cr.

821. DEVIANT BEHAVIOR
Relationships among cultural, subcultural, and personality variables and deviant behavior; forms of deviant behavior: invention, crime, alcoholism, and emotional illness. Prereq: permission. 4 cr.

830. THE SMALL GROUP
Sociological and social psychological perspectives on interaction within small groups. Prereq: courses in sociology and social psychology, or permission. 4 cr. (Not offered every year.)

832. FAMILY INTERVENTION
Application of sociological and social psychological theory and technique to clinical intervention in families; principles of problem formulation and resolution in family intervention; therapy for differing family units: individuals, relationships, subgroups, and whole families; consideration of types of change that occur in family therapy, both planned and spontaneous; strategies of intervention; and practical issues involved in family intervention. Selected attention to specific problems such as separation and loss, drug abuse and violence. Prereq: permission. 4 cr.

838. SOCIOLOGY OF EDUCATION: SOCIAL ORGANIZATION OF SCHOOLS AND COMMUNITY
Schools in their sociocultural contexts and as part of the institutional network of society. Relation to stratification and social control. Teaching as a religious occupation and as an emergent profession. 4 cr.

840. SOCIOLOGY AND THE POLICY-MAKING PROCESS
Social policy and public policy defined; description of the policy-making process. The political sociology of the political process; who makes policy and who influences policy, under what conditions, and with what effect. Definition of social policy research and the various roles social scientists can adopt for policy-relevant work. Students are responsible for critiquing the readings and for preparing a substantial research paper. 4 cr.

850. METHODS OF SOCIAL PSYCHOLOGICAL ANALYSIS
The logic, inferential strength, and potential bias of the various methodologies for studying social behavior. Experimental and nonexperimental designs, the social-psychological aspects of laboratory and field research, the nature of artifacts, etc. Emphasis is on research design rather than statistical analysis, but graduate-level sophistication in statistics is assumed. (Also offered as Psyc 850.) 4 cr.

851. SEMINAR IN SOCIAL PSYCHOLOGY
Some of the major themes in social-psychological theory, including social structure and personality, socialization, small-group processes, and interaction analysis. Students will be expected to read and evaluate selected empirical research. 4 cr.

852. SOCIALIZATION AND ABNORMAL BEHAVIOR
Orientations that relate socialization to abnormal behavior; synthesizes the major concepts into current sociological and social psychological frame of reference. Prereq: at least one course in social psychology or permission. 4 cr.

854. SOCIOLOGY OF RELIGION
The reciprocal relationship of religion and culture; the function of religion in society; the contributions of sociological research; the relationship between religion and other social institutions; religion and social change; and the problem of church and state. 4 cr.
861. DEMOGRAPHY
Current problem areas in demography including population theory, formal demography, social epidemiology, social indicators, use of demographic sources and techniques in sociological investigation. Prereq: Soc 761 or permission. 4 cr.

870. COMPARATIVE INSTITUTIONAL ANALYSIS
Theory and methods of cross-national approaches, including: history, variations in objectives and methods, problems of translation and conceptual equivalence of behaviors and indexes, and field techniques. Prereq: permission. 4 cr.

875. SOCIOLOGY OF THE FAMILY
Major approaches in the sociological study of families. Individuals in families, family relationships, and families as groups and the interrelationships among these levels. Interactional and systemic properties of marriage, parent-child relations, and extended family relations. 4 cr.

880. SOCIAL DIFFERENTIATION
Seminar allowing intensive examination of selected topics in differentiation and personnel allocation, with sections rotated among faculty members, in 1) social mobility and social mobility and social conflict, 2) race and ethnic relations, and 3) age and sex. Prereq: social stratification and either race and ethnic relations or female, male, and society. 4 cr.

885. OCCUPATIONS AND PROFESSIONS
Professionalization as adult socialization, an acquisition of a new identity. Professions as ideologies, markets, and extended families. Research perspective of the Chicago School of Sociology. 4 cr.

888. SOCIOLOGY OF EDUCATION: THE CULTURES OF POVERTY AND AFFLUENCE
The schooling of "culturally deprived" and "culturally advantaged" pupils. Problems of social and geographic mobility and immobility. Rise of the counseling and healing trades. 4 cr.

889. SOCIOLOGY OF EDUCATION: RACE AND ETHNIC RELATIONS IN SCHOOLS AND SOCIETY
Ethnic stratification inside and outside the school. The schooling of whites and nonwhites. Issues of bilingualism, culture, and identity. 4 cr.

895, 896. READING AND RESEARCH IN SOCIOLOGY AND ANTHROPOLOGY
A) Communications; B) Criminology; C) Cultural/Social Anthropology; D) Culture Change; E) Culture and Personality; F) Deviant Behavior; G) Prehistoric Archaeology; H) Family; I) Populations; J) Rural-Urban; K) Social Control; L) Social Differentiation; M) Social Movements; N) Social Psychology; O) Social Research; P) Social Theory; Q) Anthropological Linguistics; R) Social Welfare. A student prepared by training and experience to do independent work under the guidance of an instructor may register for one or more of these sections. Prereq: 16 graduate hours of sociology and permission. Hours and credit to be arranged.

897. SPECIAL TOPICS IN SOCIOLOGY
A) Criminal Justice Field Work; B) Sociology of Crime and Justice; C) Sociology of Mental Health and Illness; D) Illness and Society; E) The Holo-

cast; F) Socio-Linguistics; G) Social Class and Family Patterns; H) Measurement in Sociology; I) Violence in the Family; J) Post-Industrial Society; K) Political Sociology; L) Bio-Sociology; M) Social Evolution; N) Social Differentiation; O) Modernization; P) Blacks in the Americas; Q) Religious Movements; R) American States and Regions. New or specialized courses presenting material not normally covered in regular course offerings. May be repeated, but not in duplicate areas. Course descriptions and prerequisites on file in department office during registration. 4 cr.

899. MASTER’S THESIS
Usually 6 cr. but up to 10 cr. when the problem warrants.

999. DOCTORAL RESEARCH

Spanish (Span)

Chairperson: Warren H. Held, Jr.

PROFESSORS: Richard J. Callan; R. Alberto Casás; Charles H. Leighton
ASSOCIATE PROFESSORS: F. William Forbes; Bernadette Komonenak
ASSISTANT PROFESSORS: Philip D. Racso; Barbara H. Wing

GRADUATE PROGRAM COORDINATOR: R. Alberto Casás

Master of Arts
To be admitted to graduate study for the master of arts degree in Spanish, a student must have completed 30 credits in Spanish language and literature beyond first year Spanish, including a survey of Spanish literature and two other literature courses. To obtain the degree, the student must fulfill the course requirements, pass a comprehensive examination based on a master’s degree reading list, and submit an acceptable thesis if such an option is chosen.

To satisfy the course requirements, the student must: a) successfully complete 10 graduate courses (of which eight should be from the Spanish offerings); or, b) successfully complete at least eight courses in Spanish and submit a thesis (6 credits, thus completing the minimum of 30 credits required by the Graduate School). All advanced literature courses are conducted in Spanish.

In addition, M.A. students are required to take 801. Teaching assistants must also take 803. No student may register for a graduate course if he or she has already taken the corresponding undergraduate course here or its equivalent elsewhere.

A comprehensive examination based on a master’s degree reading list will be given four times a year—January, May, August, and September. The candidate will be permitted to take the examination only twice. Students failing their first attempt must wait at least three months before taking it again. The thesis option must embody the results of independent investigation and be written in a form acceptable to the Spanish section. It must be submitted to the thesis director six weeks before the expected time of degree conferral.

801. BIBLIOGRAPHY AND METHODS OF RESEARCH
Required of all graduate students in their first year of study. An introduction to standard bibliograph-

108
ical techniques and to form and style in the preparation and writing of research findings. Preparation of a research paper. 1 cr.

803. APPLIED LINGUISTICS
Required of all graduate assistants teaching in the departmental program, but open to all graduate students in Spanish. Discussion of current methodology and linguistic approaches to the teaching of Spanish. Instruction in the use of audio-visual aids including language laboratories. Readings, discussion, class observation. May be repeated for a total of 3 cr. 1 cr.

811. MEDIEVAL SPANISH LITERATURE
Spanish literature including social and historical backgrounds, 1100-1500: Poema de mio Cid, Berceo, Mester de claricia, Libro de buen amor, Cancionero poets, and La Celestina. 3 cr. (Not offered every year.)

831. RIVER PLATE LITERATURE
Sarmiento, José Hernández, Rodó, Florencio Sánchez, Mallea. Focus on the question of Argentinidad. 3 cr. (Not offered every year.)

852. DRAMA AND POETRY OF THE SIGLO DE ORO
Social and historical background of Baroque period. Representative plays of Lope de Vega, Tirso de Molina, Calderón; lyric poetry of Lope, Góngora, and Quevedo; prose developments. 3 cr. (Not offered every year.)

854. CERVANTES
Cervantes literary art. Selections from the major works. The Quijote, its originality and significance; its antecedents; its religious, philosophical, and sociological aspects; and its artistic structure. 3 cr. (Not offered every year.)

855. LITERATURE OF THE 19TH CENTURY
Larra, Espronceda, Bécquer, Pérez Galdós, and Blasco Ibáñez. Romanticism, realism, and naturalism. 3 cr. (Not offered every year.)

857. THEATER AND POETRY OF THE 20TH CENTURY
The Generation of 1898 and Modernismo: Lorca, Caso, Bueno Vallejo, Sastre, Salinas, Guillén, and Miguel Hernández. 3 cr. (Not offered every year.)

858. SPANISH PROSE OF THE 20TH CENTURY
Novels, short stories, and essays. Unamuno, Baroja, Menéndez Pidal, Ortega y Gasset, Julián Marías, Aranguren, Pérez de Ayala, Girónella, and Cela; survey of contemporary prose. 3 cr. (Not offered every year.)

860. UNAMUNO AND ORTEGA Y GASSET
Philosophical ideology and literary content of major contributions of Miguel de Unamuno and José Ortega y Gasset. 3 cr. (Not offered every year.)

871. LATIN AMERICAN DRAMA
From pre-Hispanic origins to the present; modern playwrights of Mexico and Puerto Rico. 3 cr. (Not offered every year.)

872. LATIN AMERICAN NOVEL
Development from Romanticism to the present; contemporary trends and techniques. 3 cr. (Not offered every year.)

873. LATIN AMERICAN SHORT STORY
Representative authors; stress on 20th century. Principles of interpretation. 3 cr. (Not offered every year.)

874. MAJOR LATIN AMERICAN AUTHORS
3 cr. (Not offered every year.)

890. ADVANCED SPANISH GRAMMAR
Review of Spanish grammar and syntax. Prereq: advanced composition and conversation. 3 cr.

891. METHODS OF FOREIGN LANGUAGE TEACHING—SPANISH
Interdepartmental course. Objectives, methods, and techniques in teaching Spanish, French, German, and Latin from elementary grades through college. Discussion, demonstration, preparation of instructional materials, microteaching of the language skills. Prereq: permission. 3 cr.

895. SPECIAL STUDIES IN SPANISH LANGUAGE AND LITERATURE
A) The History of the Spanish Language; B) Medieval Spanish Literature; C) Spanish Literature of the Renaissance; D) Spanish Literature of the Golden Age; E) Spanish Literature of the 18th and 19th Centuries; F) Spanish Literature of the 20th Century; 1898-1936; G) Contemporary Spanish Literature; H) Latin American Literature of the 16th and 17th Centuries; I) Latin American Literature of the 18th and 19th Centuries; J) Latin American Literature of the 20th Century; K) Contemporary Latin American Literature; L) Structural and Applied Linguistics; M) Spanish Literary Criticism; N) Latin American Essay; O) Latin America; P) Catalan; Q) Spanish Poetry; R) Latin American Poetry; S) Galdós; T) Archetype Latin American Literature; U) Special Teaching Problems; V) Spanish Civilization and Culture; X) Borges; Y) Spanish Theater; Z) Spanish for Graduates. Guided study with training in bibliography and organization of material. Topics selected by instructor and student in conference. Prereq: permission of major supervisor. 1 or 3 cr.

896. SPECIAL STUDIES IN SPANISH LANGUAGE AND LITERATURE
A) Hispanic Minorities of the United States; B) Portuguese; C) Introduction to Hispanic Linguistics; D) Hispanic Dialectology; Guided study with training in bibliography and organization of material. Topics selected by instructor and student in conference. Prereq: permission of major supervisor. 1-3 cr.

899. MASTER'S THESIS
6 cr.

Zoology (Zool)

Chairperson: John E. Foret

PROFESSORS: Arthur C. Borror; Wilbur L. Bullock; Robert A. Cróker; Frank K. Hoornbeek; John J. Sasner, Jr.; Edward K. Tillinghast
ASSOCIATE PROFESSORS: John E. Foret; Edward N. Francq; James F. Haney; Larry G. Harris; Marcel E. Lavoie; James T. Taylor; Charles W. Walker

ASSISTANT PROFESSORS: W. Hunting Howell II; Stacia A. Sower; Winsor H. Watson III

ADJUNCT ASSISTANT PROFESSOR: John B. Heiser

GRADUATE PROGRAM COORDINATOR: John J. Sasner, Jr.

The graduate program in zoology is intended for students who aspire to a professional career within or outside the area of college teaching and research. Degrees can be earned with emphasis in behavior, development, ecology (freshwater and marine), endocrinology, fisheries, genetics, invertebrates, zoology, mammalogy, neurobiology, parasitology, and physiology.

To be admitted to graduate study in zoology, students ordinarily must have completed an undergraduate major in biology or zoology. A basic array of courses including general biology, development, general ecology, genetics, morphology, and physiology is normally required. Additionally, a background in chemistry through organic chemistry and a semester each of calculus and physics is necessary. Students who are deficient in any of these requirements may be admitted to graduate status but may be required to remedy their deficiencies by taking courses which do not give graduate credit. Applicants are requested to submit aptitude and advanced biology scores for the Graduate Record Examination.

Each newly accepted graduate student will be interviewed during the second week of classes of the first semester. This interview will be conducted at a specified time by a committee composed of the student’s temporary academic adviser plus two additional faculty members. The purpose of this committee is to advise the student in constructing a program of study and to correct such academic deficiencies as may exist. The committee will have available transcripts, letters of recommendation, and the results of the diagnostic exam described below. The committee will then enter its evaluation and recommendations in the student’s permanent record.

All incoming graduate students will take a diagnostic exam before classes begin. This will include questions from the areas of behavior, biochemistry and physiology, development, ecology, evolution and systematics, genetics, morphology, parasitology, and general biology. No student is expected to do uniformly well in all areas, but a high level of competence is expected in those areas relevant to the student’s particular program. Should the interview committee, on the basis of this exam, consider that a deficiency exists, this may be remedied either by a formal course or by an oral examination upon recommendation of the committee. Such oral examinations will be given during the week immediately following the spring vacation.

Students who hold a teaching assistantship will be given ample opportunity for practice teaching under the supervision of the instructor. All other graduate students are also required to obtain some appropriate teaching experience. A candidate for the Master of Science degree in zoology, in addition to the requirements mentioned above, will ordinarily complete a special problem (Zool 895 or 896) of no more than 6 credits or a thesis of no more than 10 credits that is acceptable to the guidance committee. Prior to the receipt of the master’s degree, all candidates must pass a comprehensive examination, which will include questions covering general knowledge in zoology in addition to specific questions relevant to the candidate’s University of New Hampshire experience.

All doctoral students must pass a written examination to certify their proficiency in one foreign language. Some fields of pursuit may require more languages and this need will be determined by the student’s guidance committee.

After the successful completion of the language requirements and of all required coursework, students who wish to be admitted to doctoral candidacy must demonstrate a broad basic knowledge of their major and minor fields in a qualifying examination, administered by the guidance committee. In addition, students must convince their proposed major professor and doctoral committee, in whatever way the committee finds acceptable, of their superior capacity to carry out basic research in biology. Normally, the student may accomplish this by presenting to the committee a research proposal in which the soundness, originality, and feasibility of the investigative ideas are clearly revealed, and which—when approved—should serve as the basis of the doctoral dissertation.

704. COMPARATIVE ENDOCRINOLOGY
Endocrine organs; relationship to control of the internal environment, growth, development, and adaptation to external environment. Prereq: vertebrate anatomy; physiology; organic chemistry. 4 cr.

707. HUMAN GENETICS
Inheritance patterns; gene and chromosome mutation rates and effects; linkage and gene frequency. Prereq: prin of genetics or equivalent; /or permission. 4 cr. (Not offered every year.)

711. NATURAL HISTORY OF COLD-BLOODED VERTEBRATES
Classes of poikilothermic vertebrates; their habits, habitats, and life histories in eastern North America. Prereq: general zoology; vert morph. Lab. 4 cr.

712. MAMMALOLOGY

713. ANIMAL BEHAVIOR
Individual and social behavior. The role of anatomy, physiology, ecology, and prior experience. Techniques and practical application. Prereq: one year of zoology. Lab. 4 cr.

715. NATURAL HISTORY OF MARINE INVERTEBRATES
Field and laboratory course; inshore marine invertebrate metazoan animals of northern New England. Identification, classification, habitat preferences, and behavior. Work (collection and observation) constitutes a major part of the course. Some travel expense. Prereq: general zoology. 6 cr. (Summer only; not offered every year.)

717. GENERAL LIMNOLOGY
Special relationships of freshwater organisms to the chemical, physical, and biological aspects of the aquatic environment. Factors regulating the distribu-
719. FIELD LIMNIOLOGY
Freshwater ecology examined through laboratory exercises with freshwater habitats. Methods to study freshwater lakes; interpretation of data. Seminars and field trips. Prereq: enrolment in Bot 717, Zool 717, or equivalent; permission. 4 cr.

720. FIELD MARINE SCIENCE FOR TEACHERS
Primarily for teachers grades 6 through 12, but open to others. Overview of living marine organisms (algae, invertebrates, fishes, marine mammals, and shore birds) in their natural environments. Also such topics as coastal zone problems, marine fisheries, economics of marine organisms, and the educational resources of the marine environment. Field work. Offered at the Shoals Marine Laboratory (Isles of Shoals) in cooperation with Cornell University. Three lectures and two labs or field trips per day. Prereq: college-level intro biol. 1 cr. (Summers only.)

721. PARASITOLOGY
Introduction to the more important parasites causing disease in humans and animals. Living materials will be used as much as possible. Prereq: one year of zoology. Lab. 4 cr. (Not offered every year.)

723. CELL PHYSIOLOGY
Principles of chemistry and physics applied to understanding cell structure and function. Metabolic reactions and their control in relation to cell organization; genetics and function of specialized cells. Prereq: organic chemistry. Lab. 4 cr.

728. DEVELOPMENTAL BIOLOGY OF THE VERTEBRATES
Principles of animal development including a modern discussion of the cellular processing of developmental information and a panoramic view of reproduction and development in the invertebrates. Prereq: prin of zool or intro to invert zool. Lab. 4 cr.

730. VERTEBRATE HISTOLOGY
Microscopic anatomy of vertebrate tissues and organs at the light microscope level; emphasis—mammalian histology; some comparative study of lower vertebrates. Prereq: hum anat and phys, vert morph, or equivalent. Lab. 4 cr.

732. SOIL ZOOLOGY
Faunal communities of terrestrial soils, their ecology and natural history. Effects of animal activities on soil processes and composition. Collection, extraction, and study methods. Independent projects. Prereq: gen ecol or equivalent; permission. 4 cr. (Not offered every year.)

751. ADAPTATIONS OF MARINE ORGANISMS
Ecological physiology of selected algae and invertebrates from the Gulf of Maine. Offered at the Shoals Marine Lab (Isles of Shoals) in cooperation with Cornell University. Prereq: field marine science, plant or animal physiology, physiological ecology; understanding of chemical quantitative methods and analysis. 4 cr. (Summer Session only.)

753. MARINE VERTEBRATES
Lectures, laboratories, and field work on the systematics, ecology, and physiology of fishes, marine reptiles, marine birds, and marine mammals of the Gulf of Maine. Offered at the Shoals Marine Lab (Isles of Shoals) in cooperation with Cornell University. Prereq: field marine science or vertebrate biology. 4 cr. (Summer Session only.)

772. FISHERIES BIOLOGY
Information and techniques used by fisheries biologists. Emphasis on fish life history, ecology, and economics as related to management techniques. Prereq: Zool 711 or equivalent; permission. Lab. 4 cr.

775. INVERTEBRATE EMBRYOLOGY
Comparative study of reproduction and early development in selected invertebrates, providing a classical approach to morphology of gonads, fertilization, cleavage, gastrulation, and formation of larvae. Prereq: field marine sci (UNH), Biol Sci. 364 (Cornell), or invertebrate zoology. Offered at the Shoals Marine Lab (Isles of Shoals) in cooperation with Cornell University. 4 cr. (Summer Session only; not offered every year.)

777. INTRODUCTION TO NEUROBIOLOGY
Survey of fundamental concepts and recent discoveries in neurobiology. Topics include: structure and function of neurons, development, cellular basis of behavior (sensory and motor systems), neuropharmacology, and neural plasticity (learning). Prereq: prin zool or permission. 4 cr.

795, 796. SPECIAL PROBLEMS IN ZOOLOGY
A) Animal Behavior; B) Developmental Biology; C) Ecology; D) Electron Microscopy; E) Endocrinology; F) Evolution; G) Genetics; H) Histology; I) History of Biology; J) Invertebrate Biology; K) Parasitology; L) Physiology; M) Protozoology; N) Teaching Practices; O) Underwater Research; P) Vertebrate Biology; Q) Biological Techniques. Students may elect one or more sections for advanced study, Reading, laboratory work, organized seminars, and/or conferences. Prereq: permission. 1-4 cr.

803. MARINE ECOLOGY
Marine environment and its biota, emphasizing intertidal and estuarine habitats. Includes field, laboratory, and independent research project. Prereq: gen ecol; permission. Marine invert zool, oceanog, and statistics are desirable. 4 cr. (Not offered every year.)

808. STREAM ECOLOGY
Ecological relationships of organisms in flowing water. Lectures on physical and chemical features of streams, floral and faunal communities, and factors controlling populations of benthic invertebrates. Streams as ecosystems. Laboratory exercises employ both field and laboratory experimental techniques. Occasional Saturday field trips. Weekly seminars on original research papers. 4 cr. (Not offered every year.)

811. FRESHWATER ZOOPLANKTON ECOLOGY
Methods of sampling populations; factors regulating temporal and spatial distribution; trophic in-
teractions of communities, role in nutrient cycle of lakes. Experimental techniques employed in field trips to freshwater habitats. Seminars examine current research. Prereq: gen ecol and limnology, Zool 717, or equivalent; permission. 4 cr. (Not offered every year.)

815. POPULATION ECOLOGY
Dynamics of population growth; effects of age, structure, predation, and competition; measures of community interaction. Prereq: permission. Lab. 4 cr. (Not offered every year.)

820, 821. ADVANCED INVERTEBRATE ZOOLOGY
Morphology, phylogeny, and natural history of the major invertebrate phyla. Prereq: intro to invert zool or equivalent. 4 cr. (Not offered every year.)

822. PROTOZOOLOGY
General biology of protozoa; morphology, physiology, natural history, and economic importance. Prereq: Zool 721, 820, or permission. 4 cr. (Not offered every year.)

824. CONCEPTS AND TECHNIQUES IN REPRODUCTIVE BIOLOGY
Investigations of the reproductive biology of invertebrate and vertebrate organisms, including gonad and gamete structure and function; generation, maintenance, and modulation of gametogenesis by environmental and hormonal factors; larval settlement and metamorphosis; and evolutionary significance and functional consequences of reproductive cycles in animals. Prereq: permission. 4 cr.

826. COMPARATIVE PHYSIOLOGY
Nutrition, metabolism, neural function, reproduction and homeostatic mechanisms of animals, especially invertebrates. Prereq: Zool 723; permission. 4 cr. (Not offered every year.)

830. MORPHOGENESIS
Principles of differentiation at molecular, cellular, and organismic level; internal and external factors regulating gene activity and differentiation. (Also offered as Bot 850.) Prereq: Permission. 4 cr. (Not offered every year.)

878. COMPARATIVE NEUROPHYSIOLOGY
Designed for students of the behavioral and physiological sciences who wish to understand the basic electrophysiological properties of neurons and how they interact. Both invertebrate and vertebrate systems will be called upon to illustrate principles of synaptic transmission, integration, sensory information processing, and the control of movement. Prereq: intro to neurobiology or permission. Lab. 4 cr.

895, 896. ADVANCED STUDIES IN ZOOLOGY
Course sections for advanced work, individual or group seminar. May include reading, laboratory work, organized seminars, and conferences. Prereq: permission of department chairperson and staff concerned. (Sections are the same as those listed under Zool 795, 796.) 1-4 cr.

897, 898. ZOOLOGY SEMINAR
Reports on recent zoological literature. Subject fields are those listed under Zool 795, 796; not all areas available every semester. Required of graduate students in zoology. 0 cr. Cr/F.
Trustees and Principal Officers of the University

University System of New Hampshire

Trustees

Officers of the Board
Richard A. Morse, J.D.
Chairman of the Board

Elisabeth McJane-Bradley, B.A.
Secretary of the Board
Hanover, N.H. (1979-1984)

Wilfred E. Sanders, Jr., B.A., J.D.
Vice Chairman of the Board and
Legal Adviser to the Board

Members of the Board
His Excellency John H. Sununu, Ph.D.
Governor of New Hampshire
Salem, N.H. (ex officio)

Lillian K. Bailey, Ed.M.

Madic W. Barrett, Ph.D.
Interim President, Plymouth State College
Plymouth, N.H. (ex officio)

Marion C. Beckwith, M.Ed.

Robert L. Brunelle, Ed.D.
Commissioner of Education
Concord, N.H. (ex officio)

Jere A. Chase, M.Ed., LL.D.

Cotton M. Cleveland, B.S.

Stacey W. Cole

John U. Davis
Student Member
Keene State College

Gordon A. Haaland, Ph.D.
Interim President, University of New Hampshire
Durham, N.H. (ex officio)

Mary Louise Hancock, B.A.

Paul J. Holloway, B.S.

Richard J. Horan, B.S.

Kasper C. Marking, Ed.D.
Chancellor, University System of New Hampshire
Durham, N.H. (ex officio)

Eddy G. Nicholson, B.B.A., LL.D.

Stanley C. Olsen, B.B.A.

Newell J. Paire, M.Ed., L.H.D.

Barbara J. Seelye, Ph.D.
President, Keene State College
Keene, N.H. (ex officio)

Stuart N. Shaines, B.S., M.B.A.

Gretchen Taylor, A.B.

Stephen H. Taylor
Commissioner of Agriculture
Meriden, N.H. (ex officio)

James P. Weldon, B.S.

Principal Officers of Administration

Gordon A. Haaland, Ph.D.
Interim President;
Vice President for Academic Affairs

Lennard A. Fisk, Ph.D.
Interim Vice President for Financial Affairs and Administration;
Director of Research

Raymond L. Erickson, Ph.D.
Interim Vice President for Academic Affairs; Dean of the Graduate School; Associate Vice President for Academic Affairs

Thomas P. Fairchild, Ph.D.
Interim Dean of the College of Life Sciences and Agriculture; Director of the Agricultural Experiment Station

Stuart H. Palmer, Ph.D.
Dean of the College of Liberal Arts

Otis J. Sproul, Sc.D.
Dean of the College of Engineering and Physical Sciences

Dwight R. Ladd, Ph.D.
Dean of the Whittemore School of Business and Economics

Basil J. F. Mott, Ph.D.
Dean of the School of Health Studies

William H. Drew, Ph.D.
Interim Dean of the Graduate School; Associate Dean of the Graduate School

James D. Morrison, Ph.D.
Interim Director of Research; Director of the Consulting Center

J. Gregg Sanborn, M.Ed.
Dean for Student Affairs

Stanwood C. Fish, M.A.
Director of Admissions

Edward J. Durnall, Ed.D.
Director of the Division of Continuing Education

Donald E. Vincent, Ph.D.
University Librarian

Stephanie M. Thomas, M.A.
Registrar
Faculty of the Graduate School

Aikins, Janet (1979); Assistant Professor of English; Ph.D., University of Chicago, 1980.

Amell, Alexander R. (1955); Professor of Chemistry; Ph.D., University of Wisconsin, 1950.

Amsden, Katherine (1967); Associate Professor of Physical Education; Ph.D., University of Southern California, 1967.

Andersen, Kenneth K. (1960); Professor of Chemistry; Ph.D., University of Minnesota, 1959.

Anderson, Franz E. (1967); Professor of Geology; Ph.D., University of Washington, 1967.

Andrew, Michael D. (1966); Professor of Education; Ed.D., Harvard University, 1969.

Andrews, Richard A. (1959); Professor of Resource Economics; Ph.D., University of Minnesota, 1959.

Annis, William H. (1962); Professor of Occupational Education; Ed.D., Cornell University, 1961.

Antonak, Richard F. (1975); Associate Professor of Education; Ed.D., Temple University, 1975.

Arnoldy, Roger L. (1967); Professor of Physics; Ph.D., University of Minnesota, 1962.

Ashley, Charles H. (1969); Associate Professor of Education; Ed.D., Boston University, 1969.

Baker, Alan L. (1972); Associate Professor of Botany; Ph.D., University of Minnesota, 1973.

Baldwin, Kenneth C. (1982); Assistant Professor of Mechanical Engineering; Ph.D., University of Rhode Island, 1982.

Ballestero, Thomas P. (1983); Assistant Professor of Civil Engineering; Ph.D., Colorado State University, 1981.

Balling, L. Christian (1967); Professor of Physics; Ph.D., Harvard University, 1965.

Balomenos, Richard H. (1961); Professor of Mathematics Education; Ed.D., Harvard University, 1961.

Barlow, Robert F. (1962); Professor of Economics and Administration; Ph.D., Fletcher School of Law and Diplomacy, Tufts University, 1960.

Barnett, John H. (1983); Associate Professor of Business Administration; D.B.A., University of Colorado, 1978.

Barrett, James P. (1962); Professor of Forest Biometrics and Genetics; Ph.D., Duke University, 1962.

Bauer, Christopher F. (1981); Assistant Professor of Chemistry; Ph.D., Colorado State University, 1979.

Baum, William M. (1977); Associate Professor of Psychology; Ph.D., Harvard University, 1966.

Beasley, Wayne M. (1957); Associate Professor of Materials Science; S.M., Massachusetts Institute of Technology, 1963.

Bechtell, Homer F., Jr. (1966); Professor of Mathematics; Ph.D., University of Wisconsin, 1963.

Benassi, Victor A. (1982); Associate Professor of Psychology; Ph.D., City University of New York, 1974.

Bennett, Albert B., Jr. (1967); Associate Professor of Mathematics; Ed.D., University of Michigan, 1966.

Bergeron, R. Daniel (1974); Associate Professor of Computer Science; Ph.D., Brown University, 1973.

Berndtson, William F. (1979); Assistant Professor of Animal Science; Ph.D., Cornell University, 1971.

Birch, Francis S. (1972); Associate Professor of Earth Sciences; Ph.D., Princeton University, 1969.

Birigen, Sedat (1983); Associate Professor of Mechanical Engineering; D.Sc., University of Brussels, 1975.

Bishop, Paul L. (1972); Professor of Civil Engineering; Ph.D., Purdue University, 1972.

Blakemore, Richard P. (1977); Associate Professor of Microbiology; Ph.D., University of Massachusetts, 1975.

Blanchard, Fletcher, A., Jr. (1950); Professor of Electrical Engineering; M.S., Lehigh University, 1950.

Blanchard, Robert O. (1972); Associate Professor of Plant Pathology; Ph.D., University of Georgia, 1971.

Bobick, Melvin T. (1958); Professor of Sociology; Ph.D., University of Illinois, 1958.

Bocialetti, Gene (1983); Assistant Professor of Organizational Behavior; Ph.D., Case Western Reserve University, 1982.

Bogle, A. Linn (1970); Associate Professor of Botany; Ph.D., University of Minnesota, 1968.

Bohan, Charles (1971); Associate Professor of Anthropology; Ph.D., University of Illinois, 1975.

Bonnie, William E. (1962); Associate Professor of Mathematics; Ph.D., University of Washington, 1962.

Borror, Arthur C. (1961); Professor of Zoology; Ph.D., Florida State University, 1961.

Boithner, Wallace A. (1967); Professor of Geology; Ph.D., University of Wyoming, 1967.

Bowman, James S. (1971); Associate Professor of Entomology and Extension Entomologist; Ph.D., University of Wisconsin, 1958.

Boy, Angelo V. (1965); Professor of Education; Ed.D., Boston University, 1960.

Boynton, Jason E. (1966); Associate Professor of Education; M.Ed., University of New Hampshire, 1952.

Brall, Allan J. (1965); Associate Professor of Economics; Ph.D., University of Wisconsin, 1959.
Adjunct Associate Professor of Business Administration; Ph.D., Columbia University, 1973.

Brown, Warren R. (1972)
Associate Professor of Political Science; Ph.D., Claremont Graduate School, 1976.

Associate Professor of Earth Sciences; Ph.D., Massachusetts Institute of Technology, 1971.

Assistant Professor of Family and Consumer Studies; Ed.D., Columbia University, 1980.

Buckley, Walter F. (1971)
Professor of Sociology; Ph.D., University of Wisconsin, 1958.

Bullock, Wilbur L. (1948)
Professor of Zoology; Ph.D., University of Illinois, 1948.

Burger, John F. (1977)
Associate Professor of Entomology; Ph.D., University of Arizona, 1971.

Burton, David M. (1959)
Professor of Mathematics; Ph.D., University of Rochester, 1961.

Byers, Gordon L. (1956)
Professor of Soil and Water Science; M.S.A., Ontario Agricultural College, 1950.

Assistant Professor of Animal Science; Ph.D., Cornell University, 1980.

Calcaro, John R. (1981)
Research Associate Professor of Physics; Ph.D., University of Illinois, 1969.

Callan, Richard J. (1969)
Professor of Spanish; Ph.D., St. Louis University, 1965.

Carney, John J. (1973)
Associate Professor of Education; Ph.D., Syracuse University, 1973.

Carnicelli, Thomas A. (1967)
Professor of English; Ph.D., Harvard University, 1966.

Carroll, John E. (1974)
Associate Professor of Environmental Conservation; Ph.D., Michigan State University, 1974.

Carter, Gavin H. (1965)
Associate Professor of Physical Education; Ph.D., University of Oregon, 1958.

Casás, R. Alberto (1952)
Professor of Spanish; Ph.D., Columbia University, 1954.

Celikkol, Barbaros (1969)
Associate Professor of Mechanical Engineering; Ph.D., University of New Hampshire, 1972.

Chaltas, John G. (1967)
Associate Professor of Education; Ed.D., Columbia University, 1957.

Chandler, Donald S. (1981)
Assistant Professor of Entomology and Curator; Ph.D., Ohio State University, 1976.

Chasten, N. Dennis (1972)
Professor of Chemistry; Ph.D., University of Illinois, 1969.

Chesbro, William R. (1959)
Professor of Microbiology; Ph.D., Illinois Institute of Technology, 1959.

Chupp, Edward L. (1962)
Professor of Physics; Ph.D., University of California at Berkeley, 1954.

Cioffi, Grant L. (1980)
Assistant Professor of Education; Ph.D., University of Minnesota, 1980.

Clark, Charles E. (1967)
Professor of History; Ph.D., Brown University, 1966.

Clark, Mary Morris (1978)
Assistant Professor of English; Ph.D., University of Massachusetts, 1978.

Clark, Ronald R. (1957)
Professor of Electrical Engineering; Ph.D., Syracuse University, 1963.

Cohn, Ellen S. (1978)
Assistant Professor of Psychology; Ph.D., Temple University, 1978.

Associate Professor of Animal Science and Reproductive Physiologist; Ph.D., University of Massachusetts, 1975.

Constantine, Kenneth B. (1981)
Assistant Professor of Mathematics; Ph.D., Purdue University, 1981.

Conte, Michael A. (1978)
Assistant Professor of Economics; Ph.D., University of Michigan, 1979.

Copeland, Arthur H., Jr. (1968)
Professor of Mathematics; Ph.D., Massachusetts Institute of Technology, 1954.

Corcoran, Ellen P. (1972)
Associate Professor of Education; Ph.D., New York University, 1972.

Corell, Robert W. (1957–60, 1964)
Director of UNH Marine Program, Director of Sea Grant Program, and Professor of Mechanical Engineering; Ph.D., Case Institute of Technology, 1964.

Craig, Robert E. (1966)
Associate Professor of Political Science; Ph.D., University of North Carolina, 1971.

Croker, Robert A. (1966)
Professor of Zoology; Ph.D., Emory University, 1966.

Crow, Garret E. (1975)
Associate Professor of Botany; Ph.D., Michigan State University, 1974.

Darr, Ginny W. (1978)
Assistant Professor of Animal Science; Ph.D., University of Colorado, 1975.

Davis, James R. (1970)
Associate Professor of Psychology; Ph.D., University of Wisconsin, 1969.

Davis, Robert L. (1975)
Adjunct Professor of Geology; Ph.D., University of Michigan, 1954.

Dawson, Carl (1970)
Professor of English; Ph.D., Columbia University, 1966.

Dawson, John F. (1968)
Professor of Physics; Ph.D., Stanford University, 1963.

De Alba, Pedro A. (1977)
Associate Professor of Civil Engineering; Ph.D., University of California at Berkeley, 1975.

Demeritt, Maurice E., Jr. (1981)
Adjunct Assistant Professor of Forest Genetics; Ph.D., Pennsylvania State University, 1977.

Denis, Clyde L. (1982)
Assistant Professor of Biochemistry; Ph.D., University of Washington, 1982.

DePorte, Michael V. (1972)
Professor of English; Ph.D., Stanford University, 1966.
Diefendorf, Jeffry M. (1976)  
Associate Professor of History; Ph.D., University of California at Berkeley, 1975.

Diller, Ann L. (1973)  
Associate Professor of Education; Ed.D., Harvard University, 1971.

Diller, Karl C. (1972)  
Professor of English; Ph.D., Harvard University, 1967.

Dingman, Lawrence S. (1975)  
Associate Professor of Water Resources; Ph.D., Harvard University, 1970.

Dishman, Robert B. (1951)  
Professor of Political Science; Ph.D., Princeton University, 1948.

Dodge, Peter (1964)  
Associate Professor of Sociology; Ph.D., Harvard University, 1961.

Assistant Professor of Family and Consumer Studies; Ph.D., Virginia Polytechnic Institute and State University, 1980.

Downs, Richard E. (1962)  
Associate Professor of Anthropology; Ph.D., University of Leiden, 1956.

Associate Professor of Electrical Engineering; Ph.D., Tufts University, 1978.

Draves, David D. (1964)  
Associate Professor of Education; Ph.D., University of Wisconsin, 1957.

Drew, William H. (1956)  
Associate Dean of the Graduate School and Professor of Resource Economics; Ph.D., Vanderbilt University, 1961.

Durgin, Owen B. (1951)  
Professor of Resource Economics; M.A., University of New Hampshire, 1951.

Durnall, Edward J. (1966)  
Director of the Division of Continuing Education and Associate Professor of Education; Ed.D., Oregon State University, 1953.

Durrell, Donald D. (1973)  
Adjunct Professor of Education; Ed.D., Harvard University, 1930.

Eckert, Robert T. (1978)  
Assistant Professor of Forest Genetics; Ph.D., Ohio State University, 1978.

Edwards, Ruth S. (1966)  
Associate Professor of Music; M.M., Northwestern University, 1950.

Engalichev, Nicolas (1963)  
Professor of Resource Economics and Extension Economist; M.S., State University of New York College of Forestry at Syracuse, 1960.

Associate Professor of Economics; Ph.D., University of Michigan, 1974.

Erickson, Raymond L. (1963)  
Dean of the Graduate School, Associate Vice President for Academic Affairs, and Professor of Psychology; Ph.D., University of California at Los Angeles, 1962.

Estes, George O. (1969)  
Professor of Plant Science; Ph.D., Oregon State University, 1969.

Etebari, Ahmad (1980)  
Assistant Professor of Business Administration; Ph.D., North Texas State University, 1979.

Fairchild, Thomas P. (1969)  
Professor of Animal Science and Genetics and Extension Dairyman; Ph.D., University of Wisconsin, 1964.

Fan, Stephen S. T. (1962)  
Professor of Chemical Engineering; Ph.D., Stanford University, 1962.

Farag, Ihab H. (1976)  
Associate Professor of Chemical Engineering; Sc.D., Massachusetts Institute of Technology, 1976.

Farber, Florence E. (1981)  
Assistant Professor of Microbiology and Genetics; Ph.D., Columbia University, 1966.

Federer, C. Anthony (1970)  
Adjunct Associate Professor of Micrometeorology; Ph.D., University of Wisconsin, 1964.

Fenvald, Peter S. (1966)  
Associate Professor of Psychology; Ph.D., Purdue University, 1963.

Fink, Stephen L. (1969)  
Professor of Organizational Behavior; Ph.D., Case Western Reserve University, 1959.

Fisher, G. Thomas (1969)  
Associate Professor of Entomology and Extension Entomologist; Ph.D., Rutgers University, 1954.

Fisher, Lester A. (1968)  
Associate Professor of English; Ph.D., Brown University, 1976.

Fisk, Lennard A. (1977)  
Director of Research and Professor of Physics; Ph.D., University of California at San Diego, 1969.

Assistant Professor of Animal Sciences; V.M.D., University of Pennsylvania, 1976.

Associate Professor of Spanish; Ph.D., University of Arizona, 1971.

Fort, John E. (1967)  
Associate Professor of Zoology; Ph.D., Princeton University, 1966.

Francy, Edward N. (1965)  
Associate Professor of Zoology; Ph.D., Pennsylvania State University, 1967.

Franzos, Susan D. (1979)  
Assistant Professor of Education; Ph.D., State University of New York at Buffalo, 1979.

Freear, John A. (1983)  
Associate Professor of Business Administration; M.A., University of Cambridge, 1963; F.C.A.

Freder, Eugene C. (1977)  
Associate Professor of Computer Science; Ph.D., Massachusetts Institute of Technology, 1975.

Frost, Albert D. (1957)  
Professor of Electrical Engineering; Sc.D., Massachusetts Institute of Technology, 1952.

Fuld, Kenneth (1979)  
Assistant Professor of Psychology; Ph.D., Dartmouth College, 1976.

Adjunct Assistant Professor of Forest Genetics; Ph.D., University of Michigan, 1969.

Gaudard, Marie A. (1977)  
Associate Professor of Mathematics; Ph.D., University of Massachusetts, 1977.

Gaudette, Henri E. (1965)  
Professor of Geology; Ph.D., University of Illinois, 1963.
Hageman, Raymond G. (1983)  
Research Assistant Professor of Mechanical Engineering; Ph.D., University of New Hampshire, 1979.

Geels, William E. (1972)  
Associate Professor of Mathematics; Ph.D., Stanford University, 1973.

Gerhard, Glen C. (1967)  
Associate Professor of Electrical Engineering; Ph.D., Ohio State University, 1963.

Gigley, Helen M. (1972)  
Assistant Professor of Computer Science; Ph.D., University of Massachusetts at Amherst, 1982.

Gill, Gregory D. (1977)  
Associate Professor of Occupational Education; Ph.D., Colorado State University, 1977.

Gilmore, Robert C. (1952)  
Professor of History; Ph.D., Yale University, 1954.

Glanz, Filson H. (1965)  
Associate Professor of Electrical Engineering; Ph.D., Stanford University, 1965.

Adjunct Associate Professor of Education; Ed.D., Harvard University, 1961.

Goodspeed, Charles H. (1978)  
Associate Professor of Civil Engineering; Ph.D., University of Cincinnati, 1972.

Gordon, Bernard K. (1971)  
Professor of Political Science; Ph.D., University of Chicago, 1959.

Grant, Clarence L. (1961)  
Professor of Chemistry; Ph.D., Rutgers University, 1960.

Graulich, Melody (1978)  
Assistant Professor of English; Ph.D., University of Virginia, 1979.

Graves, Donald H. (1973)  
Professor of Education; Ed.D., State University of New York at Buffalo, 1973.

Green, Donald M. (1967)  
Professor of Biochemistry and Genetics; Ph.D., University of Rochester, 1958.

Associate Professor of Civil Engineering; Ph.D., Purdue University, 1976.

Vice President for Academic Affairs and Professor of Psychology; Ph.D., State University of New York at Buffalo, 1966.

Hadwin, Donald W. (1977)  
Associate Professor of Mathematics; Ph.D., Indiana University, 1975.

Hageman, Elizabeth (1971)  
Associate Professor of English; Ph.D., University of North Carolina, 1971.

Hagstrom, Earl C. (1965)  
Associate Professor of Psychology; Ph.D., Brown University, 1957.

Haley, Russell (1975)  
Professor of Administration; Ph.D., Union Graduate School, 1974.

Hall, Francine S. (1980)  
Associate Professor of Business Administration; Ph.D., University of Toronto, 1975.

Hall, Francis R. (1964)  
Professor of Hydrology; Ph.D., Stanford University, 1961.

Hamilton, Lawrence C. (1977)  
Assistant Professor of Sociology; Ph.D., University of Colorado, 1978.

Haney, James F. (1972)  
Associate Professor of Zoology; Ph.D., University of Toronto, 1970.

Hansen, Jane A. (1979)  
Assistant Professor of Education; Ph.D., University of Minnesota, 1979.

Hansen, Larry J. (1973)  
Associate Professor of Family and Consumer Studies; Ph.D., Florida State University, 1973.

Hapgood, Robert (1965)  
Professor of English; Ph.D., University of California at Berkeley, 1955.

Harrington, Thomas C. (1983)  
Assistant Professor of Botany; Ph.D., University of California at Berkeley, 1982.

Harris, Larry G. (1969)  
Associate Professor of Zoology; Ph.D., University of California at Berkeley, 1970.

Harter, Robert D. (1969)  
Professor of Soil Chemistry; Ph.D., Purdue University, 1966.

Havsky, Audrey Adams (1979)  
Assistant Professor of Music; M.S.M., Union Theological Seminary, 1951.

Hebert, David J. (1967)  
Associate Professor of Education; Ph.D., Kent State University, 1967.

Heckel, Maynard C. (1971)  
Associate Dean of the College of Life Sciences and Agriculture, Director of Cooperative Extension, and Professor of Adult Education; Ed.D., Cornell University, 1961.

Heilbroner, Hans (1954)  
Professor of History; Ph.D., University of Michigan, 1954.

Heisenberg, Jochen (1978)  
Professor of Physics; Doctor, University of Hamburg, 1966.

Heiser, John B. (1980)  
Director of Shoals Marine Laboratory and Adjunct Assistant Professor of Zoology; Ph.D., Cornell University, 1979.

Held, Warren H., Jr. (1967)  
Professor of Classics; Ph.D., Yale University, 1955.

Assistant Professor of Civil Engineering; Ph.D., University of Pennsylvania, 1980.

Herbst, Edward J. (1962)  
Professor of Biochemistry; Ph.D., University of Wisconsin, 1949.

Herold, Marc W. (1975)  
Associate Professor of Economics; Ph.D., University of California at Berkeley, 1977.

Hettiger, Stanley D. (1965)  
Associate Professor of Music and Band Director; M.M.E., Vander-Cook College, 1966.

Hill, John L. (1964)  
Professor of Wood Science and Technology; D.F., Yale University, 1954.

Hochgraf, Frederick G. (1958)  
Associate Professor of Materials Science; M.S., Cornell University, 1958.
Hocker, Harold W., Jr. (1935)
Professor of Forest Resources and Genetics; D.F., Duke University, 1955.

Hoff, Phyllis A. (1967)
Associate Professor of Physical Education; Ph.D., University of Southern California, 1967.

Hollweg, Joseph V. (1980)
Research Professor of Physics; Ph.D., Massachusetts Institute of Technology, 1968.

Holter, James B. (1963)
Professor of Animal Science; Ph.D., Pennsylvania State University, 1962.

Hoonbeek, Frank K. (1964)
Professor of Zoology and Genetics; Ph.D., Oregon State University, 1964.

Hornbeck, James W. (1979)
Adjunct Associate Professor of Forest Hydrology; Ph.D., State University of New York College of Environmental Science and Forestry at Syracuse, 1973.

Horrigan, James O. (1966)
Forbes Professor of Business Administration; Ph.D., University of Chicago, 1967.

Houston, Robert E., Jr. (1957)
Professor of Physics; Ph.D., Pennsylvania State University, 1957.

Howard, Cleveland L. (1969)
Associate Professor of Music; D.M.A., Boston University, 1969.

Assistant Professor of Forest Economics; Ph.D., Oregon State University, 1981.

Assistant Professor of Occupational Education; Ph.D., Ohio State University, 1973.

Howell, W. Hunting, II (1980)
Assistant Professor of Zoology; Ph.D., University of Rhode Island, 1980.

Hubbard, Colin D. (1967)
Professor of Chemistry; Ph.D., University of Sheffield, 1964.

Hunt, Leslie J. (1981)
Assistant Professor of Music; Ph.D., Indiana University, 1982.

Hurd, Richard W. (1973)
Associate Professor of Economics; Ph.D., Vanderbilt University, 1972.

Hylton, Walter E. (1976)
Associate Professor of Animal Science; V.M.D., University of Pennsylvania, 1970.

Ikawa, Miyoshi (1963)
Professor of Biochemistry; Ph.D., University of Wisconsin, 1948.

Irish, James D. (1979)
Research Associate Professor of Earth Sciences; Ph.D., University of California at San Diego, 1971.

Irwin, Manley R. (1963)
Professor of Economics; Ph.D., Michigan State University, 1963.

Jacoby, A. Robb (1961)
Professor of Mathematics; Ph.D., University of Chicago, 1946.

Jahnke, Leland S. (1977)
Associate Professor of Botany; Ph.D., University of Minnesota, 1973.

James, Marion E. (1955)
Associate Professor of History; Ph.D., Harvard University, 1955.

Jansen, Edmund F., Jr. (1969)
Professor of Resource Economics; Ph.D., North Carolina State University, 1966.

Janson, Colette H. (1981)
Assistant Professor of Animal and Nutritional Sciences; Ph.D., University of New Hampshire, 1980.

Jellison, Charles A., Jr. (1956)
Professor of History; Ph.D., University of Virginia, 1956.

Johnson, Paul C. (1979)
Associate Professor of Entomology; Ph.D., Cornell University, 1974.

Jones, Galen E. (1966)
Director of the Jackson Estuarine Laboratory and Professor of Microbiology; Ph.D., Rutgers University, 1956.

Jones, Paul R. (1956)
Professor of Chemistry; Ph.D., University of Illinois, 1956.

Jones, William R. (1962)
Professor of History; Ph.D., Harvard University, 1958.

Kael, Fred R. (1973)
Professor of Finance; Ph.D., University of Michigan, 1972.

Kalnowski, Michael F. (1980)
Assistant Professor of Family and Consumer Studies; Ed.D., University of Massachusetts, 1976.

Karon, Marrin J. (1983)
Professor of Business Statistics; Ph.D., North Carolina State University, 1967.

Kaufman, Allen (1983)
Assistant Professor of Business Administration; Ph.D., Rutgers University, 1980.

Kaufmann, Richard L. (1963)
Professor of Physics; Ph.D., Yale University, 1960.

Kayser, John R. (1969)
Associate Professor of Political Science; Ph.D., Claremont Graduate School and University Center, 1969.

Kennard, Jean E. (1975)
Professor of English; Ph.D., University of California at Berkeley, 1968.

Kertzer, Robert (1965)
Associate Professor of Physical Education; Ph.D., Michigan State University, 1965.

Kheif, Bud B. (1967)
Professor of Sociology; Ph.D., Johns Hopkins University, 1957.

Kiang, Yun-Tzu (1970)
Professor of Plant Science and Genetics; Ph.D., University of California at Berkeley, 1970.

Kies, Christopher (1979)
Assistant Professor of Music; M.F.A., Brandeis University, 1977.

Kimball, Roland B. (1963)
Professor of Education; Ed.D., Harvard University, 1958.

Kinnert, Nancy E. (1983)
Assistant Professor of Civil Engineering; Ph.D., University of New Hampshire, 1983.

Klotz, Louis H. (1965)
Associate Professor of Civil Engineering; Ph.D., Rutgers University, 1967.

Koch, David W. (1971)
Associate Professor of Plant Science; Ph.D., Colorado State University, 1971.
Mebert, Carolyn J. (1979)  
Assistant Professor of Psychology; Ph.D., Boston University, 1978.

Meeker, Loren D. (1970)  
Professor of Mathematics; Ph.D., Stanford University, 1965.

Melvin, Donald W. (1957)  
Associate Dean of the College of Engineering and Physical Sciences and Associate Professor of Electrical Engineering; Ph.D., Syracuse University, 1971.

Menge, Carleton P. (1948)  
Professor of Education; Ph.D., University of Chicago, 1948.

Mennel, Robert M. (1969)  
Professor of History; Ph.D., Ohio State University, 1969.

Merenda, Michael J. (1977)  
Associate Professor of Administration; Ph.D., University of Massachusetts, 1978.

Merton, Andrew H. (1972)  
Associate Professor of English; B.A., University of New Hampshire, 1967.

Associate Professor of Family and Consumer Studies; Ph.D., Pennsylvania State University, 1973.

Miller, Donald R. (1977)  
Assistant Professor of Wildlife Ecology; Ph.D., University of Idaho, 1976.

Miller, Edmund G. (1951)  
Professor of English; Ph.D., Columbia University, 1955.

Miller, Walter T., III (1979)  
Associate Professor of Electrical Engineering; Ph.D., Pennsylvania State University, 1977.

Milis, Richard L. (1967)  
Associate Professor of Economics and Business Administration; Ph.D., Indiana University, 1967.

Associate Professor of Botany and Genetics; Ph.D., University of Washington, 1974.

Mitchell, James R. (1963)  
Associate Professor of Plant Science and Extension Agronomist, Forage Crops; Ph.D., Pennsylvania State University, 1969.

Moore, David W. (1972)  
Associate Professor of Political Science; Ph.D., Ohio State University, 1970.

Morrison, James D. (1965)  
Professor of Chemistry; Ph.D., Northwestern University, 1963.

Mosberg, William (1958)  
Associate Professor of Mechanical Engineering; M.Eng., Yale University, 1960.

Mott, Basil J. F. (1973)  
Dean of the School of Health Studies and Professor of Health Administration and Planning; Ph.D., Harvard University, 1967.

Mower, Lyman (1957)  
Professor of Physics; Ph.D., Massachusetts Institute of Technology, 1953.

Mulhern, John E., Jr. (1954)  
Professor of Physics; Ph.D., Boston University, 1954.

Mundy, Joan F. (1983)  
Assistant Professor of Mathematics; Ph.D., University of New Hampshire, 1980.

Murdoch, Joseph B. (1952)  
Professor of Electrical Engineering; Ph.D., Case Institute of Technology, 1962.

Murray, Donald M. (1963)  
Professor of English; B.A., University of New Hampshire, 1948.

Murray, Frederick P. (1966)  
Associate Professor of Communication Disorders; Ph.D., University of Denver, 1966.

Nahin, Paul J. (1975)  
Associate Professor of Electrical Engineering; Ph.D., University of California at Irvine, 1972.

Nevin, John A. (1972)  
Professor of Psychology; Ph.D., Columbia University, 1963.

Newkirk, Thomas R. (1977)  
Associate Professor of English; Ph.D., University of Texas, 1977.

Nicoloff, Philip L. (1954)  
Professor of English; Ph.D., Columbia University, 1959.

Nielsen, Melville (1950)  
Associate Dean of the College of Liberal Arts and Associate Professor of Sociology; Ph.D., Ohio State University, 1955.

Nordgren, Eric A. (1964)  
Professor of Mathematics; Ph.D., University of Michigan, 1964.

O'Connell, Lawrence W. (1966)  
Associate Professor of Political Science; Ph.D., Syracuse University, 1968.

Oja, Sharon N. (1977)  
Associate Professor of Education; Ph.D., University of Minnesota, 1978.

Olson, David P. (1968)  
Professor of Wildlife Management; Ph.D., University of Minnesota, 1964.

Ossenbruggen, Paul J. (1975)  
Associate Professor of Civil Engineering; Ph.D., Carnegie-Mellon University, 1970.

Owens, Charles W. (1963)  
Professor of Chemistry; Ph.D., University of Kansas, 1963.

Palmer, Stuart H. (1955)  
Dean of the College of Liberal Arts and Professor of Sociology; Ph.D., Yale University, 1955.

Assistant Professor of Forest Resources; Ph.D., University of Michigan, 1982.

Parsons, Alan H. (1979)  
Assistant Professor of Animal Science; Ph.D., Cornell University, 1981.

Peirce, Lincoln C. (1964)  
Professor of Plant Science and Genetics; Ph.D., University of Minnesota, 1958.

Peterson, Nobel K. (1957)  
Associate Professor of Soil and Water Science; Ph.D., Rutgers University, 1957.

Pierce, Robert S. (1967)  
Adjunct Professor of Forestry and Soil and Water Science; Ph.D., University of Wisconsin, 1957.

Pila, Frank L. (1957)  
Professor of Chemistry; Ph.D., University of Cincinnati, 1957.

Pilgrim, Sidney A. L. (1979)  
Adjunct Associate Professor of Soil Sciences; B.S., University of New Hampshire, 1955.

Pistole, Thomas G. (1971)  
Professor of Microbiology; Ph.D., University of Utah, 1969.
Pokoski, John L. (1967)
Professor of Electrical Engineering; Ph.D., Montana State University, 1967.

Polasky, Janet L. (1981)
Assistant Professor of History; Ph.D., Stanford University, 1978.

Polk, Keith (1964)
Professor of Music; Ph.D., University of California at Berkeley, 1968.

Poll, Solomon (1964)
Professor of Sociology; Ph.D., University of Pennsylvania, 1960.

Pollard, James E. (1970)
Associate Professor of Plant Science; Ph.D., University of Florida, 1969.

Potter, Hugh M., III (1962)
Associate Professor of English; Ph.D., University of Minnesota, 1965.

Power, Marilyn B. (1979)
Assistant Professor of Economics; Ph.D., University of California at Berkeley, 1977.

Puth, Robert C. (1967)
Associate Professor of Economics; Ph.D., Northwestern University, 1967.

Radlow, James (1965)
Professor of Applied Mathematics; Ph.D., New York University, 1957.

Assistant Professor of Spanish; Ph.D., Indiana University, 1981.

Rasmussen, Mary H. (1968)
Associate Professor of Music; M.M., University of Illinois, 1953.

Records, Mary A. (1982)
Assistant Professor of Communication Disorders; Ph.D., University of Minnesota, 1982.

Reeves, R. Marcel (1964)
Associate Professor of Entomology and Forest Resources; Ph.D., State University of New York College of Environmental Science and Forestry at Syracuse, 1964.

Reyna, Stephen P. (1973)
Associate Professor of Anthropology; Ph.D., Columbia University, 1972.

Richardson, John C. (1946)
Professor of English; Ph.D., Boston University, 1959.

Adjunct Associate Professor of Resource Economics; Ph.D., Brandeis University, 1975.

Roberts, John M. (1979)
Assistant Professor of Plant Science and Extension Horticulturist, Turf; Ph.D., Purdue University, 1977.

Roberts, Lewis, Jr. (1972)
Director of Thompson School of Applied Science and Associate Professor of Occupational Education; Ed.D., Auburn University, 1972.

Rogers, John E. (1967)
Associate Professor of Music; M.F.A., Princeton University, 1966.

Rogers, Owen M. (1959)
Professor of Plant Science and Genetics; Ph.D., Pennsylvania State University, 1959.

Professor of Political Science; Ph.D., University of Chicago, 1958.

Rosen, Sam (1957)
Nashua Corporation Professor of Economics; Ph.D., Harvard University, 1952.

Ross, Shepley L. (1955)
Professor of Mathematics; Ph.D., Boston University, 1953.

Rothwell, Kenneth J. (1961)
Professor of Economics; Ph.D., Harvard University, 1960.

Routley, Douglas G. (1957)
Professor of Plant Science; Ph.D., Pennsylvania State University, 1957.

Rudd, Joel (1980)
Assistant Professor of Family and Consumer Studies; Ph.D., University of Iowa, 1979.

Russell, Robert D. (1975)
Associate Professor of Computer Science; Ph.D., Stanford University, 1972.

Adjunct Assistant Professor of Computer Science; Ph.D., Stanford University, 1975.

Rutman, Darren B. (1968)
Professor of History; Ph.D., University of Virginia, 1959.

Safford, Lawrence O. (1981)
Adjunct Associate Professor of Forestry; Ph.D., University of Maine, 1968.

Samuels, Fred (1966)
Professor of Sociology; Ph.D., University of Massachusetts, 1966.

Sandler, Melvin (1970)
Associate Professor of Hotel Administration; M.A., Northwestern University, 1947; C.P.A.

Sandoval, Anne W. (1982)
Assistant Professor of Psychology; Ph.D., Brandeis University, 1982.

Sasner, John, Jr. (1965)
Professor of Zoology; Ph.D., University of California at Los Angeles, 1965.

Savage, Godfrey H. (1965)
Professor of Mechanical Engineering and Director of the Engineering Design and Analysis Laboratory; Ph.D., Stanford University, 1970.

Sawyer, Albert K. (1949)
Professor of Chemistry; M.S., University of Maine, 1947.

Schibanoiff, Susan (1971)
Associate Professor of English; Ph.D., University of California at Los Angeles, 1971.

Schloborn, Starr P. (1975)
Associate Professor of Business Administration; Ph.D., New York University, 1980.

Schneer, Cecil J. (1950, 1954)
Professor of Geology and the History of Science; Ph.D., Cornell University, 1954.

Schreiber, Richard W. (1957)
Professor of Botany; Ph.D., University of Wisconsin, 1955.

Schwab, Charles (1975)
Associate Professor of Animal Science; Ph.D., University of Wisconsin, 1974.

Assistant Professor of Education; Ph.D., University of Connecticut, 1980.

Schwarz, Marc L. (1967)
Associate Professor of History; Ph.D., University of California at Los Angeles, 1965.
Schweikart, Patrocino (1979)  
Assistant Professor of English; Ph.D., Ohio State University, 1980.

Selcer, David E. (1972)  
Associate Professor of Music; M.M., University of Wisconsin, 1965.

Seitz, W. Rudolf (1976)  
Associate Professor of Chemistry; Ph.D., Massachusetts Institute of Technology, 1970.

Shapira, Howard M. (1969)  
Associate Professor of Sociology; Ph.D., University of Minnesota, 1969.

Shar, Albert O. (1971)  
Executive Director of Computer Services and Professor of Mathematics; Ph.D., University of Pennsylvania, 1970.

Shepard, Harvey K. (1969)  
Professor of Physics; Ph.D., California Institute of Technology, 1966.

Shigo, Alex L. (1966)  
Adjunct Professor of Plant Pathology; Ph.D., West Virginia University, 1959.

Shore, Barry (1974)  
Professor of Administration; Ph.D., University of Wisconsin, 1968.

Shore, Samuel D. (1965)  
Associate Professor of Mathematics; Ph.D., Pennsylvania State University, 1964.

Shorle, Walter C. (1976)  
Adjunct Assistant Professor of Botany; Ph.D., North Carolina State University, 1974.

Siddall, David V. (1965)  
Assistant Professor of English; Ph.D., Indiana University, 1970.

Silverman, Robert J. (1962)  
Professor of Mathematics; Ph.D., University of Illinois, 1952.

Simco, Charles D. (1973)  
Professor of English; B.A., New York University, 1967.

Simos, Evangelos O. (1977)  
Associate Professor of Economics; Ph.D., Northern Illinois University, 1977.

Simpson, Robert E. (1963)  
Associate Professor of Physics; Ph.D., Harvard University, 1960.

Sir, W. Niel (1970)  
Associate Professor of Music; M.A., University of California at Berkeley, 1962.

Sitkoff, Harvard (1976)  
Professor of History; Ph.D., Columbia University, 1975.

Sivaprasad, Kondagunta (1969)  
Professor of Electrical Engineering; Ph.D., Harvard University, 1963.

Smith, James A. (1972)  
Associate Dean of the College of Liberal Arts and Adjunct Associate Professor of Economics; Ph.D., Washington State University, 1967.

Smith, M. Daniel (1967)  
Associate Professor of Education; Ed.D., Harvard University, 1961.

Smith, Mark R. (1966)  
Professor of English; B.A., Northwestern University, 1960.

Smith, Samuel C. (1961)  
Professor of Animal Science and Biochemistry; Ph.D., Pennsylvania State University, 1962.

Snell, Elizabeth A. (1971)  
Associate Professor of Family and Consumer Studies; Ph.D., Cornell University, 1971.

Sohl, Jeffrey E. (1983)  
Assistant Professor of Business Administration; M.B.A., University of Maryland, 1974.

Someshwar, Arun V. (1982)  
Assistant Professor of Chemical Engineering; Ph.D., Michigan State University, 1982.

Sowell,斯塔西A (1982)  
Assistant Professor of Zoology; Ph.D., Oregon State University, 1980.

Sprague, Linda G. (1969)  
Professor of Business Administration; D. B. A., Harvard University, 1973.

Sproul, Otis J. (1982)  
Dean of the College of Engineering and Physical Sciences and Professor of Civil Engineering; Sc.D., Washington University, 1961.

Stewart, James A. (1968)  
Professor of Biochemistry; Ph.D., University of Connecticut, 1967.

Stibler, Robert (1978)  
Assistant Professor of Music; D.M.A., Catholic University of America, 1979.

Stone, Deborah E. (1962)  
Associate Professor of Education; Ed.D., Boston University, 1971.

Straus, Murray A. (1968)  
Professor of Sociology; Ph.D., University of Wisconsin, 1956.

Strout, Richard G. (1954)  
Professor of Animal Science; Ph.D., University of New Hampshire, 1961.

Sundberg, Donald C. (1978)  
Associate Professor of Chemical Engineering; Ph.D., University of Delaware, 1970.

Sung, Windsor (1980)  
Assistant Professor of Civil Engineering; Ph.D., California Institute of Technology, 1981.

Swift, M. Robinson (1976)  
Associate Professor of Mechanical Engineering; Ph.D., University of New Hampshire, 1974.

Taft, Charles K. (1967)  
Professor of Mechanical Engineering; Ph.D., Case Institute of Technology, 1960.

Tagliaferro, Anthony R. (1978)  
Associate Professor of Animal and Nutritional Sciences; Ph.D., Cornell University, 1978.

Taylor, James T. (1977)  
Associate Professor of Zoology; Ph.D., Oregon State University, 1976.

Theuwke, Siegfried E. (1979)  
Adjunct Assistant Professor of Entomology and State Entomologist; Ph.D., University of Missouri, 1977.

Associate Professor of Economics; Ph.D., University of Texas at Austin, 1973.

Thompson, Henry J. (1979)  
Associate Professor of Animal and Nutritional Sciences; Ph.D., Rutgers University, 1975.

Tillinghast, Edward K. (1967)  
Professor of Zoology; Ph.D., Duke University, 1966.

Tischler, Herbert (1965)  
Professor of Geology; Ph.D., University of Michigan, 1961.
Tokay, F. Harry (1973)  
Associate Professor of Communication Disorders; Ph.D., Michigan State University; 1967.

Trout, B. Thomas (1969)  
Associate Professor of Political Science; Ph.D., Indiana University, 1972.

Tucker, Charles F. (1979)  
Adjunct Associate Professor of Law; J.D., Yale Law School, 1966.

Professor of Chemical Engineering; Sc.D., Massachusetts Institute of Technology, 1964.

Urban, Willard E., Jr. (1963)  
Associate Professor of Biometrics and Genetics; Associate Director, Agricultural Experiment Station; Ph.D., Iowa State University, 1963.

Vagts, Peggy A. (1978)  
Assistant Professor of Music; M.M., University of Wisconsin at Madison, 1978.

Valentine, Russell L. (1953)  
Professor of Mechanical Engineering; M.S.N.E., Purdue University, 1954.

Van Osdol, Donovan H. (1970)  
Professor of Mathematics; Ph.D., University of Illinois, 1969.

Assistant Professor of Education; Ph.D., University of Arizona, 1976.

Veal, Larry J. (1982)  
Assistant Professor of Music; M.M., University of Illinois, 1976.

Verrette, Paul E. (1962)  
Associate Professor of Music; M.A., Boston University, 1971.

Vincent, Donald E. (1962)  
Professor and University Librarian; Ph.D., University of Michigan, 1974.

Voll, John O. (1965)  
Professor of History; Ph.D., Harvard University, 1969.

Associate Professor of Zoology; Ph.D., Cornell University, 1976.

Wang, Tung-Ming (1961)  
Professor of Civil Engineering; Ph.D., Northwestern University, 1960.

Ward, Sally K. (1980)  
Assistant Professor of Sociology; Ph.D., Brown University, 1977.

Warner, Rebecca M. (1981)  
Assistant Professor of Psychology; Ph.D., Harvard University, 1978.

Waterfield, D. Allan (1970)  
Associate Professor of Physical Education; Ph.D., Ohio State University, 1976.

Watson, Winsor H., III (1978)  
Assistant Professor of Zoology; Ph.D., University of Massachusetts, 1978.

Watters, David H. (1978)  
Assistant Professor of English; Ph.D., Brown University, 1978.

Wear, Robert E. (1964)  
Associate Professor of Physical Education; Ph.D., University of Michigan, 1955.

Weathersby, Rita (1978)  
Assistant Professor of Administration; Ed. D., Harvard University, 1977.

Webb, Dwight (1967)  
Associate Professor of Education; Ph.D., Stanford University, 1967.

Webber, William R. (1969)  
Professor of Physics; Ph.D., University of Iowa, 1957.

Weber, James H. (1963)  
Professor of Chemistry; Ph.D., Ohio State University, 1963.

Weiland, Walter E. (1964)  
Associate Professor of Physical Education; Ph.D., Pennsylvania State University, 1964.

Weiner, James L. (1979)  
Assistant Professor of Computer Science; Ph.D., University of California at Los Angeles, 1979.

Weisman, Gary R. (1977)  
Associate Professor of Chemistry; Ph.D., University of Wisconsin, 1976.

Wells, Otto S. (1966)  
Associate Professor of Plant Science and Extension Horticulturist; Vegetables; Ph.D., Rutgers University, 1966.

Wells, Roger E. (1981)  
Assistant Professor of Animal Science; D.V.M., Ohio State University, 1972.

Wertz, William E., Jr. (1967)  
Professor of Business Administration; M.B.A., University of Chicago, 1967.

Associate Professor of Forest Resources; Ph.D., University of Minnesota, 1968.

Wheeler, Douglas L. (1965)  
Professor of History; Ph.D., Boston University, 1963.

White, Susan O. (1969)  
Associate Professor of Political Science; Ph.D., University of Minnesota, 1970.

Wicks, John D. (1956)  
Professor of Music; Ph.D., Harvard University, 1959.

Wilcox, Donald J. (1970)  
Professor of History; Ph.D., Harvard University, 1967.

Williams, Daniel C. (1970)  
Associate Professor of Psychology; Ph.D., University of California at Santa Barbara, 1970.

Williams, Thomas A., Jr. (1958)  
Professor of English; M.A., University of New Hampshire, 1958.

Willits, Robin D. (1965)  
Professor of Administration and Organization; Ph.D., Massachusetts Institute of Technology, 1963.

Wilson, John A. (1960)  
Associate Professor of Mechanical Engineering; Ph.D., Northeastern University, 1970.

Wing, Barbara H. (1970)  
Assistant Professor of Spanish; Ph.D., Ohio State University, 1980.

Wing, Henry J., Jr. (1970)  
Associate Professor of Music; Ph.D., Boston University, 1966.

Winslow, Deborah (1979)  
Assistant Professor of Anthropology; Ph.D., Stanford University, 1982.

Winslow, Mary Bowes (1978)  
Assistant Professor of Education; Ed.D., Harvard University, 1974.

Wirth, Clifford J. (1981)  
Assistant Professor of Political Science; Ph.D., Southern Illinois University at Carbondale, 1976.
Wong, Edward Hou Sen (1978)
Associate Professor of Chemistry; Ph.D., Harvard University, 1975.

Associate Professor of Psychology; Ph.D., Yale University, 1975.

Wright, John J. (1970)
Professor of Physics; Ph.D., University of New Hampshire, 1969.

Wrightsman, Dwayne E. (1964)
Professor of Business and Economics; Ph.D., Michigan State University, 1964.

Yildiz, Asim (1967)
Professor of Mechanics; D. Eng., Yale University, 1959.

Professor of English; M.F.A., University of Iowa, 1962.

Zsigray, Robert M. (1970)
Associate Professor of Microbiology and Genetics; Ph.D., Georgetown University, 1969.
Committees of the Graduate School

Committees of the Graduate School

Graduate Council
Raymond L. Erickson, Ph.D.
Dean of the Graduate School, Chairperson
William H. Drew, Ph.D.
Associate Dean of the Graduate School
Harry J. Richards, Ph.D.
Assistant Dean of the Graduate School, Secretary
John J. Carney, Ph.D.
Associate Professor of Education
Karl C. Diller, Ph.D.
Professor of English
Richard W. England, Ph.D.
Associate Professor of Economics
Albert D. Frost, Sc.D.
Professor of Electrical Engineering
Francis R. Hall, Ph.D.
Professor of Hydrology
Lyman Mower, Ph.D.
Professor of Physics
Thomas G. Pistole, Ph.D.
Professor of Microbiology
John E. Rogers, M.F.A.
Associate Professor of Music
Rebecca M. Warner, Ph.D.
Assistant Professor of Psychology
James H. Weber, Ph.D.
Professor of Chemistry
Three graduate students will be appointed to this council.

Research Council
Lennard A. Fisk, Ph.D.
Director of Research
Raymond L. Erickson, Ph.D.
Dean of the Graduate School
Janet E. Atkins, Ph.D.
Assistant Professor of English
Ginny W. Darr, Ph.D.
Assistant Professor of Animal Sciences
George O. Estes, Ph.D.
Professor of Plant Science
Henri E. Gaudette, Ph.D.
Professor of Geology
Robert Kertzer, Ph.D.
Associate Professor of Physical Education
B. B. (Bud) Khleif, Ph.D.
Professor of Sociology
Sharon N. Oja, Ph.D.
Associate Professor of Education
Daniel W. Reagan
Ph. D. Student, English
Kenneth J. Rothwell, Ph.D.
Professor of Economics
John J. Sasner, Ph.D.
Professor of Zoology
Charles K. Taft, Ph.D.
Professor of Mechanical Engineering

Student Fellowship Selection Committee
William H. Drew, Ph.D.
Associate Dean of the Graduate School
Richard P. Blakemore, Ph.D.
Associate Professor of Microbiology
Wallace A. Bothner, Ph.D.
Professor of Geology
Richard W. England, Ph.D.
Associate Professor of Economics
Edmund F. Jansen, Jr., Ph.D.
Professor of Resource Economics
Robert M. Mennel, Ph.D.
Professor of History

Faculty Fellowship Selection Committee
William H. Drew, Ph.D.
Associate Dean of the Graduate School
Paul L. Bishop, Ph.D.
Professor of Civil Engineering
Richard W. Hurd, Ph.D.
Associate Professor of Economics
Robert Kertzer, Ph.D.
Associate Professor of Physical Education
John E. Limber, Ph.D.
Associate Professor of Psychology
Lincoln C. Pierce, Ph.D.
Professor of Plant Science and Genetics

Tuition Scholarship Selection Committee
Harry J. Richards, Ph.D.
Assistant Dean of the Graduate School
Robert C. Gilmore, Ph.D.
Professor of History
Richard Martin-Diaz, Ph.D.
Associate Professor of Administration
Donald R. Miller, Ph.D.
Assistant Professor of Wildlife Ecology
Samuel D. Shore, Ph.D.
Associate Professor of Mathematics
Walter E. Weiland, Ph.D.
Associate Professor of Physical Education

Graduate School Calendar 1983–84

Semester I

August 30, Tuesday  8 a.m. Classes begin; hold Monday schedule

September 5, Monday  Labor Day—no classes

September 6, Tuesday  Graduate student registration for day students.

September 6–8, Tues–Thurs  Graduate student registration for evening students, 5–7 p.m.

September 9, Friday  Last day to drop courses without $10 late-drop fee
                   Last day to request audit without dean’s approval

September 12, Monday  Graduate student registration for evening students, 5–7 p.m.
                   Last day to register without $25 late registration fee

September 13, Tuesday  Last day for graduate students to withdraw or drop courses
                    and qualify for $1/4 tuition refund

September 16, Friday  Last day to add courses without dean’s approval and $10
                    late-add fee

September 23, Friday  Last day to file Intent-to-Graduate for December graduation

September 28, Wednesday  Last day for graduate students to withdraw or drop courses
                      and qualify for $1/2 tuition refund

October 21, Friday  Midsemester—Last day to drop courses or withdraw without
                    academic liability; last day to carry more than 16 credits
                    without surcharge

November 1, Tuesday  Application forms for Part-time Tuition Scholarships for
                    Semester II are available at the Graduate School

November 11, Friday  Veterans’ Day holiday—no classes

November 18, Friday  Last day for Ph.D. dissertation defense (December graduation)

November 23, Wednesday  Classes hold Friday schedule

November 24–25, Thurs–Fri  Thanksgiving holiday—no classes

November 28, Monday  8 a.m. Classes resume

December 1, Thursday  Last day for completing application for admission to
                    graduate study, request for change in degree program, or
                    application for readmission for Spring Semester 1984
                    Last day for completing application for Part-time Tuition
                    Scholarships for Spring Semester 1984

December 2, Friday  Last day for presenting final copies of doctoral dissertation
                   or master’s thesis to the Graduate School for binding
                   (December graduation)
                   Last day to take final comprehensive examination for the
                   master’s degree

December 9, Friday  Last day for resolving incompletes from Semester II, 1982–83
                   and/or Summer 1983

December 12, Monday  Reading Day

Hampshire is a public antidiscrimination commitment to equal
accordance with Title VI of f 1964, Title IX of the Edu-
of 1972, and Section 504 of t of 1973, as amended, the
hampshire does not discrimi-
nance, color, religion, sex, age, n's status, or handicap in its
or treatment or employment
activities receiving federal fi-
turies regarding sex discrimi-
ate to Ms. Nancy Deane,
Affirmative Action, Thomp-
844, or the Director, Office
ainment of Education, Wash-
quiries regarding handicap
be made to the Univer-
tor, Ms. Sharon Kraft-Land,
n 101, 862-2607.

Hampshire has adopted a
'provide for the resolution
sis policy. A copy of the griev-
be obtained at the Dean for
' Huddleston Hall.

in compliance with federal guar-
nt regulations and will supply
formation about the employment of its graduates
who have majored in specialized degree programs
that normally lead to specific employment fields.
This information may be obtained upon request
from the University’s Career Planning and Place-
ment Service, which is available to all students. The
University does not guarantee employment to its
graduates.

The University provides full information pertaining
to the Family Educational Rights and Privacy Act
of 1974 (the “Buckley Amendment”) in the annual
student guide. Information also is available from
the offices of the dean for student affairs and the
vice-president for academic affairs.

This catalog is published biannually, and course
descriptions and program descriptions may vary
from the actual content or requirements because of
advancements in the discipline or the active nature
of academic planning and decision making. Ac-
cordingly, the University reserves the right to make
whatever changes are deemed necessary in sched-
ues, course content, requirements, academic pro-
gams (including their termination), calendar,
tuition and fees, services, or any other aspect of the
University’s operations, giving whatever notice
thereof is reasonable under the circumstances.
Therefore, the provisions of this catalog are not an
irrevocable contract between the students and the
University. The University is also not responsible
for failure to provide or for delay in providing
expected services and/or facilities when such failure
arises from causes beyond the reasonable control
of the University.
