## PREVENTION IS EVERYBODY'S BUSINESS

The year 1959 was fortunate from a forest fire standpoint. New Hampshire had the best record in the nation. Fewer acres were burned, suppression costs were substantially reduced and damage to woodlands held to a minimum. The record resulted from a combination of favorable weather conditions, an alert warden service and a cooperating public.

Yet, despite all this, there still persists a disturbing note  
58%, or 6 out of every 10 fires in 1959 were caused by careless smokers and debris burners.

10%, or 1 out of every nine fires was caused by children.

Careless, indifferent, thoughtless and independent minded individuals and failure of parents to properly supervise children and keep matches out of their reach, annually cause these unnecessary fires which cost large sums to extinguish and cause extensive damage. The elimination of these three causes of fires would radically change this picture. The rules are simple—

1. Before burning, secure a permit from your local forest fire warden — the law requires it.
2. Be sure to properly supervise your burning.
3. Make certain your fire is DEAD OUT before leaving it.
4. Don't throw lighted matches, cigars and cigarettes from moving vehicles—use your ash tray.
5. Don't burn at home—Use your town dump and save yourself much possible difficulty, both personal and financial.

Number of local fires, 1

Number of acres burned,  $\frac{3}{4}$

Number of permits issued, 115

## ADMINISTRATION

### Superintendent

I herewith present my 21st annual report, consisting of this discussion together with other reports printed herewith:

### Schools are Big Business

The following table indicates what size this Supervisory Union has become. One needs only to add this to the other Supervisory Unions in this State and then to the other States to understand the magnitude of Schools as a Business in this Country. Since this unit and New Hampshire is so small as compared with hundreds of others, it is no wonder many people do not realize what goes on here or in the Nation with respect to education.

1958 - 59				
District	No. of Pupils	No. of Teachers	No. of Schools	Total Expenditures
Amherst	* 368	12	2	\$136,032.16
Brookline	* 123	4	2	57,125.20
Hollis	375	17	2	131,526.97
Milford	1143	46	3	339,779.36
Mont Vernon	* 79	3	1	35,295.04
	2088	82	10	\$699,758.73

\*Does not include Tuition Pupils to other Districts

Adding the pupils Brookline sends to Nashua to the 2088 listed above and dividing, we find an over-all pupil cost of approximately \$325. Readers may think this is high. If so, we must compare this with reported costs in New Hampshire of \$388.72. Since our costs are part of this latter figure and are lower, then there must be many school units with a higher pupil cost in order to arrive at the \$388.72 figure.

## Salaries

Item 6 of the Budget refers to Teacher's Salaries and Constitutes the largest amount in the total. For some time now, we have tried to consider salaries on a percentage basis, using a beginner's starting-salary as 100% and advancing each year by 4% for varying numbers of years. At the present, this starting-salary is \$3700. Teachers of experience receive more by some 4% to 32%. We have three classes of preparation: 1. Those without a degree—whose salaries may range from 92% — 116% of the base. 2. Those with a Bachelor's degree—100% to 112%. 3. Those with a Master's degree—108% to 132%. Not all the districts have all of these features, all have some of them.

Now I feel the base must be changed and have recommended in my budgets to School Boards, \$3900 as the 100% base. Our study of salaries prompts these rewards to justify this base.

A. Beginners next September will demand and get much more than the present \$3700.

B. The average salaries of classroom teachers this year are:—

National average	\$5025.
Mass. average	\$5100
N. H. average	\$4356
S. U. #40 median	\$4144.

Our median is thus \$212 lower than N. H.'s average, \$956 lower than Mass. (our greatest competitor) and \$881 lower than the National average.

C. Mass. will be on a \$4000. minimum for 1960-61—this by law. (a nearby district in N. H. is already on this minimum.)

D. The average starting pay of women college graduates of 1957 (three years ago—when our base salary was \$3200):—

Chemists	\$4847.
Nurse	\$3875.
Mathematicians	\$4675.
Teachers	\$3799.
All occupations	\$3739.

E. Therefore, to compete for and to maintain the adequate teaching staff this Union expects, I recommend an increase in the base of \$200. This would bring us up to challenging distance of present scales and maintain a status quo; an increase of \$300. would allow this Union to compete for teaching services with the expected increase in states and districts surrounding us.

## The Staff

The same staff of teachers remains on duty as at the last report. Their total years of experience should be of significance to you.

## The Future

Someone has said that we must look to the future because that is where we will spend the rest of our lives. Therefore, we make a budget for the future, we look into the years to come and examine our needs.

The present budget has allowed for matching of Federal funds to purchase much needed science equipment. The proposed budget contains an item to continue this matching next year with both Science and Mathematics in mind. This is a good opportunity to improve our equipment and thus contribute to better teaching in these fields, in which there is so much interest at these times.

I am deeply grateful to the School Board, Teachers, and citizens for their continued good efforts and interest in the school.

Respectfully,

HAROLD C. BOWLEY

Superintendent of Schools

## OUR HELPING TEACHER

### Individual differences among children in supervisory union #40

In spite of what we would like to believe, all children are not created equal. There is nothing we can do to alter that fact. But all children are entitled to an equal opportunity to be educated, regardless of the inequalities of their creation. The educational program in this union is continually improving in ways and means of doing this. However, we must continue to find better ways.

A study of the results of our recent testing program shows very clearly many of these inequalities. It will also give some indication of the many problems encountered by our teachers in attempting to give an equal education to all their children.

Consider the following table as a means of classifying individuals according to their ability:

- Below I. Q. 75—Retarded, needing special education
- I. Q. 75 - 85—Slow learner, requiring extra time and extra help.
- I. Q. 86 - 119—Range of slow to average to rapid learners
- I. Q. 120 - 140—Rapid learners, including gifted, needing enrichment or possible acceleration
- I. Q. 141 & over—Gifted to genius, needing special education

Of a total of 861 children in this union in grades two, three, four, and five tested this year,

- 19 scored I. Q. 74 or less
- 40 scored between I. Q. 75 and 85
- 562 scored between I. Q. 86 and 119
- 223 scored between I. Q. 120 and 140
- 17 scored between I. Q. 141 and 162

We realize that no test is infallible and that for some children it is but a rough estimate of their ability. In any case this survey has many implications for us.

1. A program designed to meet the needs of the average group cares for most of the children.
2. To be most effective an educational program must meet the requirements of all children.
3. Those children at either extreme should have a special program.
4. The grouping of children according to their needs is a way of providing for their differences.

While the program for caring for the gifted within our present classroom structure is increasingly productive there seems to be no good solution to the problems of the retarded. It seems hardly fair to anyone concerned that these children are not given the special type of education which is impossible to find in a regular classroom. It requires a specially trained teacher, special materials and consideration to give these children the equal educational opportunity they deserve. There are enough of them to warrant a special, but not segregated, classroom somewhere within this union. It is a real challenge. What can we do about it?

I would like to take this opportunity to thank the School Boards, Superintendent, Parents and associates for their help and cooperation.

Respectfully,

MABEL I. CONNOLLY  
Helping Teacher

PORT MAKING THIS SUPPLEMENT NECESSARY.

## REPORT OF POLICE DEPARTMENT

The year of 1959 was a very busy and successful year for the Brookline Police Department.

In the months of January through April members of the police department attended F.B.I. police schools in Goffstown and in Brookline covering all phases of police work. Each school consisting of some 50 hours of instruction.

In May through the efforts of the police department and efforts of the P-TA two members of the Brookline School Safety Patrol were able to attend the A.A.A. School Safety Patrol Jamborie in Washington, D.C.

In the spring and summer months the police station in the town hall was cleaned up, repaired, painted and made useable, all work being done voluntarily by members of the police department.

As to the enforcement side of the activity, 507 vehicles were stopped by the Brookline Police for one type of violation or another ranging from defective equipment, check ups to summons to court if the violation warranted such.

Of the 11 cases of breaking and entering and attempted breaks all were solved with the exception of two attempted breaks and most of them were cleaned up in a matter of 48 hours.

As you will notice by the police activity report, all activity has increased greatly over last year, which is true, not only in our community but throughout the country, and is sure to be on the increase for years to come.

To cope with this situation a well organized, trained and efficient police department is very essential, through F.B.I. Schools, regional police schools and local training we are attempting and will continue to try and give our community the well trained and efficient police department that is needed.

I wish to thank all that have co-operated and contributed to make this a successful year for our department, especially Mrs. Anita Taylor who has spent many hours at the police radio at no cost to the town.

With our radio set up in my home, we can receive and transmit direct to the State Police in Concord reaching any point in N.H. in a matter of seconds and our own set up with which we can contact any of the surrounding towns direct, giving us complete radio coverage, to give aid, receive aid and to cope with any emergency efficiently.

Alvin W. Taylor

Brookline, N.H.
