## PREVENT FOREST FIRES, IT PAYS!

---

An average of 7,300 acres of woodland are burned over by forest fires in New Hampshire each year destroying many thousands dollars worth of property of all description. It costs many additional thousands of dollars and requires valuable man hours, taken from other essential work, to extinguish them. These losses affect the personal fortunes of the owners, and town and state economies. Everyone loses because of them.

Analysis of fire causes reveals the fact that more than 98 percent of all forest fires are, consistently, the result of human carelessness and are preventable.

We have been extremely fortunate during the past few years. Favorable fire weather and war time restrictions on travel which kept people off the highways and out of the woods have aided materially in reducing fire risk, keeping fires fewer and fire losses low.

We now face changing conditions. People can travel freely. Their love for travel and the freedom of the woods will bring them out in ever increasing numbers. This will step up fire risks materially. The accelerated cutting of the war years has resulted in additional thousands of slash acres. These factors, combined with a possible dry season and human carelessness could easily produce a catastrophe. Everyone must, consequently, be on his guard. He should—

1. Be careful with fire or when smoking in or near woodlands.
2. Cooperate with the local forest fire warden and his deputies by—
  - a. Abiding cheerfully with whatever restrictions it may be necessary to impose. They are intended only to be helpful.
  - b. Securing permits to burn debris when the ground is not covered with snow.
  - c. Seeing that others comply with the requirements.
  - d. Promptly coming to the warden's assistance when needed.

If these few fundamental practices are followed it will be possible to PREVENT a large proportion of Forest Fires from starting.—That PAYS!

THOMAS NEWTON

Forest Fire Warden.
