DURHAM, NH – Heading into the 2016 presidential election, New Hampshire residents are less confident about business conditions in the state and in the country than they were earlier this year. A majority of Granite Staters say their household financial condition is better or about the same since last year and most don't expect it to change over the next year.

These findings are based on the latest **Business and Industry Association (BIA) Report on Consumer Confidence**,* conducted by the University of New Hampshire Survey Center. Five hundred and seventy-seven (577) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between October 3 and October 9, 2016. The margin of sampling error for the survey is +/- 4.1 percent.

N.H. Business Conditions

When asked how New Hampshire businesses will do over the upcoming year, nearly half of Granite Staters (49%) think state businesses will enjoy good times financially, only 20% think they will experience bad times, and 30% anticipate mixed conditions. The percentage predicting good times has decreased significantly since this summer. A majority of Democrats (63%) are optimistic about business conditions in the state compared to just 48% of Independents and 38% of Republicans. In August, majorities of Democrats (70%), Independents (52%) and Republicans (59%) all were optimistic about business conditions.

“With confidence in state and national business conditions ebbing somewhat, it will be important for those we elect in November to focus on creating an environment where employers are growing, successful, and adding jobs.” said BIA President Jim Roche.

* We ask that this copyrighted information be referred to as *the BIA Report on Consumer Confidence*, sponsored by the New Hampshire Business and Industry Association, and conducted by the University of New Hampshire Survey Center.

U.S. Business Conditions

Turning to expectations about the U.S. economy as a whole – 41% of New Hampshire adults think that businesses across the country will experience good times over the next 12 months, 33% think businesses will have bad times, and 26% think conditions will be mixed. Optimism about U.S. business conditions has decreased somewhat since August. A majority of Democrats (57%) are optimistic about business conditions in the country, compared to just 39% of Independents and 27% of Republicans.

New Hampshire residents remain divided about the long-term prospects for the U.S. economy. Currently 31% of New Hampshire residents believe that the U.S. economy will enjoy continuous good times over the next 5 years, 33% expect periods of widespread unemployment and depression, and 36% see a mix of good and bad conditions. The percentage of residents expecting continuous good times has decreased eight percentage points since August.

U.S. 5 Year Economic Outlook

Personal Financial Conditions

When asked about their household finances, most New Hampshire adults think they are financially better off or about the same as they were a year ago -- 39% say they are better off now than they were a year ago, 25% say they are worse off, and 36% say things are about the same.

Household Financial Condition – Compared to 1 Year Ago

Looking forward, three in five Granite Staters think their households will be in about the same financial condition next year as they are today. Currently, 30% think their family will be better off financially a year from now, only 9% think they will be worse off, and 61% think their families will be about the same.

Household Financial Condition – 12 Months from Now

New Hampshire adults continue to think it is a good time to buy major items for their home. Two in three New Hampshire residents (67%) think now is a good time to buy major household items, 20% think it is a bad time, and 13% think it depends on a person's finances. This measure has stayed steady since April.

Good Time to Buy Major Household Item?

Subgroup Analysis

There are a few demographic differences in the economic expectations of New Hampshire residents. Democrats and younger residents are consistently more optimistic about the state and national economy than Republicans and Independents. Younger residents are also more likely to be optimistic about their household's financial condition over the past year and over the next year.

Business and Industry Association Report on Consumer Confidence Methodology

These findings are based on the latest Business and Industry Association (BIA) Report on Consumer Confidence, conducted by the University of New Hampshire Survey Center. Five hundred and seventy-seven (577) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between October 3 and October 9, 2016. The margin of sampling error for the survey is +/- 4.1 percent. These MSE's have not been adjusted for design effect. The design effect for the survey is 1.1%.

The random sample used in the BIA Report on Consumer Confidence was purchased from Marketing Systems Group (MSG), Horsham, PA. MSG screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers.

The data have been weighted to adjust for the numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the BIA Report on Consumer Confidence, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.

Good Time to Buy Major Household Item

“Now thinking about the big things people buy for their home – such as furniture, a refrigerator, a stove, television and things like that. Generally speaking, do you think now is a good time or a bad time for people to buy major household items?”
