VOLUNTEER FIRE DEPARTMENT REPORT

As far as monthly meetings are concerned we have worsened our record!

In 1965 we had eight members present at one meeting; last year our highest attendance was four - not counting the June meeting which was ably assisted by three members of the Junior Ladies Auxiliary, together with your correspondents!

Fires were fortunately better attended, and all members as well as those of the Canaan and Danbury Departments, are due for special citation on August 11, when a major conflagration destroyed the barn on the estate of the late L.M. Hazen.

Caused by lightning striking a transformer about 6 p.m., the flames quickly raged out of control and despite the efforts of the three Departments, the structure was a total loss by the following morning. Hundreds of smouldering bales of hay which had recently been stored in the barn required several "return engagements" for over a week until the fire could definitely be called all out.

Several other fires during the year were of a comparatively minor nature, although three chimney fires which were potentially dangerous were extinguished before too much damage could be caused.

Respectfully submitted,

C. LAWRENCE GOVE, Chief
J. F. KUSTER, Secretary

GRAFTON FIRE RECORD

Fire records are made by people--- those who cause fires and those who control them. Your forest fire warden, deputy wardens, fire chief and firemen have, in spite of a prolonged drought, made one of the best fire control records in recent years. Despite a very dry spring, we in New Hampshire working together, have substantially reduced our fire incidence (885 in 1965 to 595 in 1966.)

This enviable record is largely due to two factors:

1. A closely coordinated and integrated state-town organization jointly carrying out programs of forest fire prevention, training and suppression with dedicated personnel.
2. Your appreciation of our forest fire control program and your individual effort in practicing fire prevention.

Statistics show, however, there is room for improvement. Major problems are still with us; (1) the careless disposal of cigarettes; (2) the householder's carelessness in burning rubbish; (3) the failure of woodlot owners and contractors to completely extinguish their brush burning fires; (4) failure to extinguish camp fires; (5) unsupervised children playing with matches.

New Hampshire has 4,339,000 acres of woodland to be protected. In 1966 we experienced 595 forest fires on this area and restricted acreage burned to 395 acres --- a fine testimonial to the efficiency and dedication of the men who make up our forest fire control organization.

1. If you must burn you will need a permit. Permits are not issued between 9:00 a.m. and 5:00 p.m. except on rainy days. Permits are not needed when the ground is covered with snow. To minimize risk the best way to dispose of rubbish is at your authorized town or municipi-

pal dumping area.

2. Be sure all discarded smoking material is out
3. Don't leave a live camp or cooking fire.
4. Most important - Instruct your children that matches are not play things.
5. There was one fire caused by lightening on Smith Mt.

TRULY - ONLY YOU CAN PREVENT FOREST FIRES

46 permits were issued.

Forest Fire Warden
