THE WMUR GRANITE STATE POLL

August 30, 2016

TWO WEEKS FROM PRIMARY AND NH VOTERS ARE STILL UNFAMILIAR WITH GUBERNATORIAL CANDIDATES

www.unh.edu/survey-center

DURHAM, NH – In one of the most wide open races for governor in recent history, most Granite State voters are unfamiliar with candidates of both parties heading into the September 13th primaries.

These findings are based on the latest **WMUR Granite State Poll**,* conducted by the University of New Hampshire Survey Center. Five hundred and fifty-nine (559) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between August 20 and August 28, 2016. The margin of sampling error for the survey is +/- 4.1 percent. Included were four hundred and thirty-three (433) likely 2016 general election voters (MSE = +/- 4.7%) and three hundred and thirty-seven (337) likely 2016 primary election voters (MSE = +/- 5.3%).

Favorability Ratings – Democratic NH Gubernatorial Candidates

Two-term Governor Maggie Hassan is stepping down from the corner office to run against Kelly Ayotte for U.S. Senator from New Hampshire, leaving no obvious successor. The Democratic candidates seeking to replace Governor Hassan are unknown to the large majority of New Hampshire voters with only two weeks remaining until the September 13th primary.

Currently 15% of likely general election voters have a favorable opinion of Executive Councilor Colin Van Ostern (D-Concord), 8% have an unfavorable opinion, 6% are neutral, and 70% don't know enough about them to say. Van Ostern's net favorability (the percentage having a favorable opinion minus the percentage having an unfavorable opinion) is +7%.

Only 14% of likely November voters have a favorable opinion of former Portsmouth Mayor Steve Marchand, 5% have an unfavorable opinion, 8% are neutral, and 73% don't know enough about him to say. Marchand's net favorability rating is +9%.

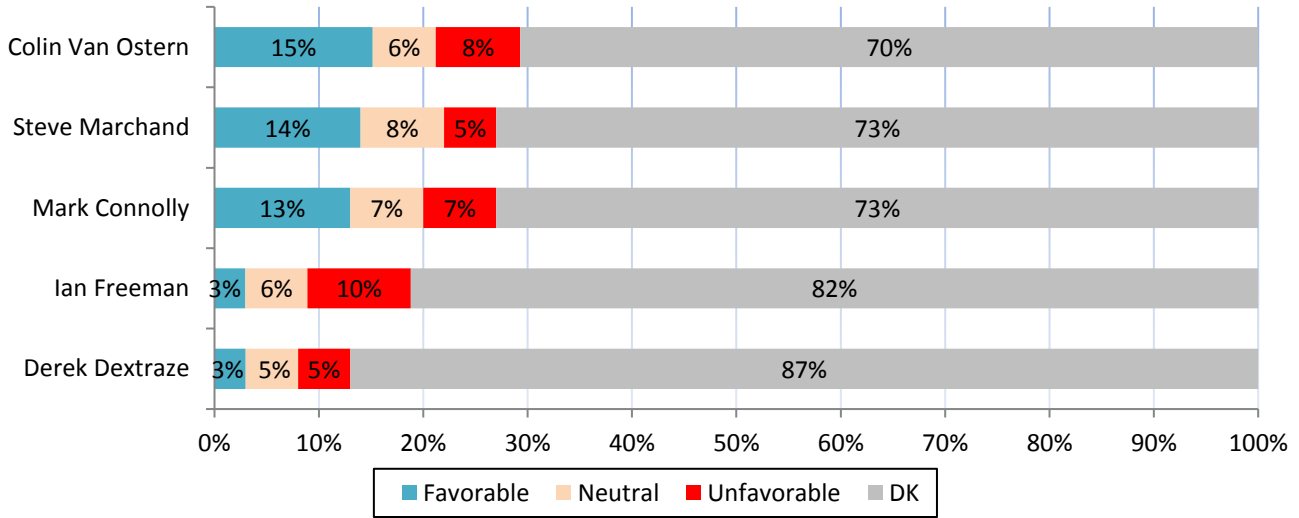

And only 13% have a favorable opinion of Former NH Bureau of Securities Director Mark Connolly (D-New Castle), 7% have an unfavorable opinion, 7% are neutral, and 73% don't know enough about them to say. Connolly's net favorability is +6%.

Ian Freeman of Keene is even less well-known -- only 3% of likely November voters have a favorable opinion of him, 10% have an unfavorable opinion, 6% are neutral, and 82% don't know enough about him to say. Freeman's net favorability is -7%.

Only 3% of likely general election voters have a favorable opinion of Derek Dextraze (D-Dover), 5% have an unfavorable opinion, 5% are neutral, and 87% don't know enough about him to say. Dextraze's net favorability is -2%.

* We ask that this copyrighted information be referred to as *the Granite State Poll*, sponsored by WMUR-TV, and conducted by the University of New Hampshire Survey Center.

Favorability Ratings - DEM NH Gubernatorial Candidates - August 2016 - Likely Voters

Favorability Ratings – Republican NH Gubernatorial Candidates

Republican Executive Councilor Chris Sununu of Newfields and Manchester Mayor Ted Gatsas are better known than any of their Democratic counterparts. Currently 34% of New Hampshire likely November voters have a favorable opinion of Sununu, 24% have an unfavorable opinion, 11% are neutral, and 32% don't know enough about him to have an opinion. Sununu's net favorability is +10%.

Gatsas is known to just over half of general election likely voters -- 27% of have a favorable opinion of him, 22% have an unfavorable opinion, 8% are neutral, and 43% don't know enough about him to say. Gatsas' net favorability rating is +5%.

Currently, 16% of New Hampshire likely November voters have a favorable opinion of State Senator Jeanie Forrester (R-Meredith), 9% have an unfavorable opinion, 7% are neutral, and 69% don't know enough about her to say. Forrester's net favorability rating is +7%.

Only 7% of likely November voters have a favorable opinion of State Representative Frank Edelblut (R-Wilton), 7% have an unfavorable opinion, 7% are neutral, and 79% don't know enough about him to say. Edelblut's net favorability rating is +0%.

Jonathan Lavoie of Hollis is largely unknown to New Hampshire likely November voters – only 6% have a favorable opinion of Lavoie, 5% have an unfavorable opinion, 6% are neutral, and 83% don't know enough about him to say. Lavoie's net favorability rating is +1%.

Favorability Ratings - GOP NH Gubernatorial Candidates - August 2016 - Likely Voters

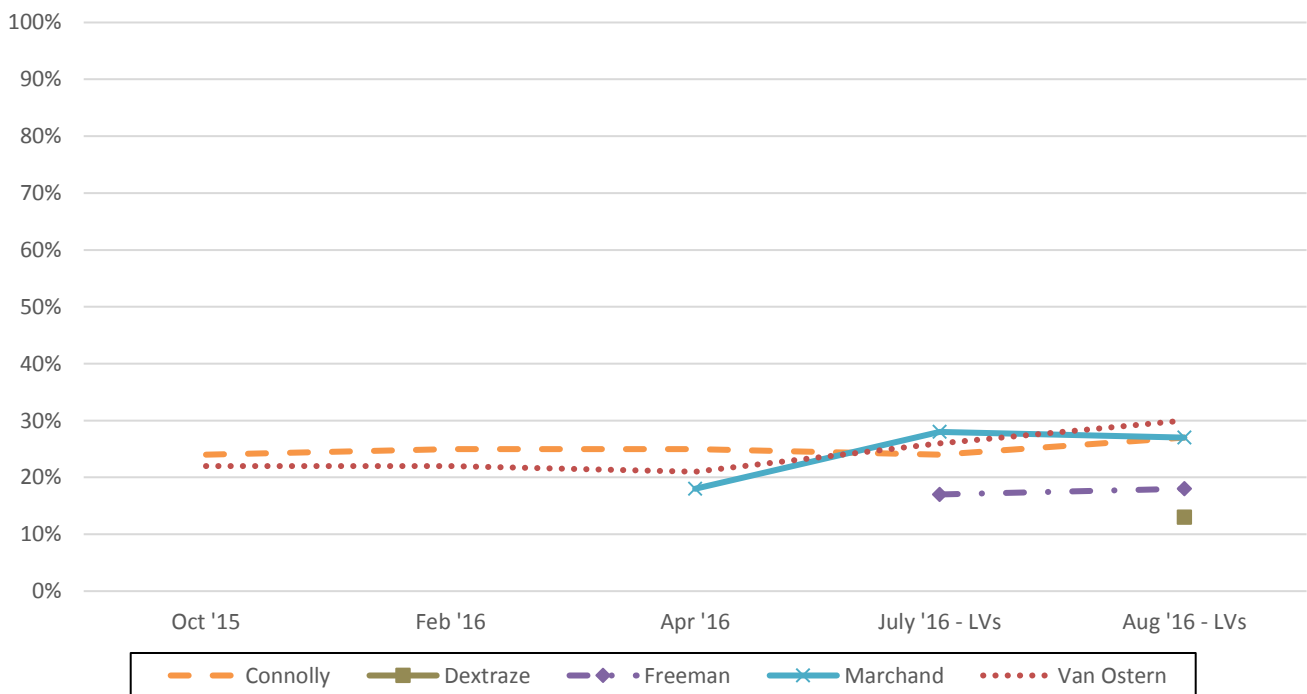

Name Recognition of NH Gubernatorial Candidates

A major difficulty facing candidates for state office in New Hampshire is the state's September primary. Candidates must campaign over the summer, but most voters pay little attention to politics during the summer months, making it difficult for them to gain name recognition. While Sununu and Gatsas have remained the best-known gubernatorial candidates over the past year, name recognition for all gubernatorial candidates has not increased significantly over the summer.

Name Recognition of Republican NH Gubernatorial Candidates (% with an opinion of candidate)

Name Recognition of Democratic NH Gubernatorial Candidates (% with an opinion of candidate)

NH Gubernatorial Candidates Most Likely To Vote For – Likely September Primary Voters

Among respondents to the August 2016 Granite State Poll, 337 said they planned to vote in the September 13th state primary. Likely primary voters were asked which of the gubernatorial candidates from both parties they would be most likely to vote for. One in five (23%) chose Chris Sununu, 14% chose Ted Gatsas, 10% chose Colin Van Ostern, 5% chose Steve Marchand, 5% chose Jeanie Forrester, 4% chose Frank Edelblut, 2% chose Mark Connolly, and 36% were unsure. When asked if they had a second choice, 11% chose Sununu, 6% chose Gatsas, 4% chose Connolly, 3% chose Marchand, 3% chose Forrester, 2% chose Van Ostern, 1% chose Edelblut, and 68% were undecided or didn't have a second choice.

Granite State Poll Methodology

These findings are based on the latest WMUR Granite State Poll, conducted by the University of New Hampshire Survey Center and funded by WMUR-TV, Manchester, NH. Five hundred and fifty-nine (559) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between August 20 and August 28, 2016. If a household included more than one adult, the adult who had the most recent birthday was selected to be interviewed.

The margin of sampling error is +/- 4.1 percent for the entire sample. Included were four hundred thirty-three (433) likely 2016 general election voters (MSE +/- 4.7%) and three hundred and thirty-seven (337) likely 2016 primary election voters (MSE = +/- 5.3%). These MSE's have not been adjusted for design effect. The design effect for the survey is 1.1%.

The random sample used in the WMUR Granite State Poll was purchased from Marketing Systems Group (MSG), Horsham, PA. MSG screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the Granite State Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
