BUILDING INSPECTORS REPORT

As I am sure you are aware, 1983 was a busy year with the coming of the Fox Run Mall. A considerable number of other structures were either added or changed over to other uses. The total value of permits issued was in excess of $6,000,000, which brought in fees to the Town's General Fund of over $12,000.

All these buildings open to the public were built, to the best of my ability, in accordance with the new Code requirements which the townspeople approved at the last Town Meeting. I am asking this year's meeting to add two more Code requirements to the Building Regulations. Since virtually all of this year's construction was in the General Business District, the public safety of these customers is at stake.

I could not have handled all the required inspections without the help of the Fire Chief Larry Wahl and Chief Sewer Plant Operator Martin Laferte. Their technical expertise, and considerable amounts of their time, went into the successful openings of various businesses.

I would anticipate the volume of construction in 1984 to be lower than 1983, but this will give us time to hopefully upgrade some of the existing operations in town.

John R. Mazeau, Building Inspector

AUDITOR’S REPORT

I have examined the combined financial statements of the Town of Newington, New Hampshire and its combining and individual fund financial statements as of and for the year ended December 31, 1982. As a part of my examination I made a study and evaluation of the Town’s system of internal accounting control to the extent I considered necessary to evaluate the system as required by generally accepted auditing standards. Under these standards the purpose of such evaluation is to establish a basis or reliance on the system of internal accounting control in determining the nature, timing and extent of other auditing procedures that are necessary for expressing an opinion on the financial statements.

My study and evaluation of the system of internal accounting control was made for the purpose set forth in the paragraph above and accordingly would not necessarily disclose all weaknesses in the system because it was based upon selective tests of the accounting records and related data. As a result of this study and evaluation I have noted no particular areas where improvements can be made to strengthen the system of internal accounting control. However, there are several areas I wish to bring to your attention. These are discussed on the following page.

At this time I wish to thank the Town Officials, especially Mr. Norman Myers and Mrs. Pat Main for the co-operation and courtesy shown my staff during the course of the engagement.

Irenee R. Lebel, CPA

Portsmouth, New Hampshire

BOARD OF ADJUSTMENT

Board of Adjustment met only once in 1983 - to consider a request from Ruth Baker to convert her single family home to two family. Request was granted after approval was received from Selectmen and Planning Board.

Stillman Packard, Chairman
Board of Adjustment

NEWINGTON CEMETERY COMMITTEE

The Cemetery Committee held its annual meeting at the Town Hall on Saturday 21, 1984.

The ‘filling-in’ project was discussed in detail because of the several reports received that the project was in disfavor. The primary purpose of the filling-in was to improve the overall appearance and to help reduce the maintenance costs of keeping the Cemetery at acceptable levels.

The consensus of opinion of the Cemetery Committee was that the project will be continued at the present rate. As previously approved, the filling-in will be confined to the Western Division. No further filling-in will be done in the Eastern Division which is the oldest section.

There has been a number of overgrown bushes removed from the Cemetery during the past year. These were the trashy variety and for the most part distracted from the orderly appearance. Also several of the bushes were overgrown to the extent that they were blocking the alleys and some were actually rooting into the foundation stones and markers. The problems with vandalism have been reduced considerably. This is greatly appreciated by all.

Robert A. Olson, Sr.
Cemetery Superintendent

Report of the Trust Funds of the City or Town of Newington on December 31, 1983.
ACTION TAKEN ON WARRANT ARTICLE
TOWN MEETING 1983

Article 1. Election of Officers.
Article 2 & 3 Voted in favor of proposed Zoning Amendments.
Article 4. Voted to leave care and maintenance of Sewer Plant to the Sewer Commission.
Article 5. Voted the authority to expend interest earned from sewer investments as offset against the sewer budget.
Article 6. Voted to leave the care and maintenance of Town Buildings to the Selectmen.
Article 7. Voted to authorize the Selectmen to dispose of any real estate acquired through tax collectors deeds.
Article 8. Voted to allow Selectmen to borrow in anticipation of taxes.
Article 9. Adopted an ordinance on the use of Town Recreational land.
Article 10. Adopted an ordinance on control of Space Heaters.
Article 11. Voted to set up a capital reserve fund for a fire truck with funds from Revenue Sharing account.
Article 12. Voted to adopt a budget for 1983 of $1,858,096.
SELECTMEN'S LETTER

Dear Residents of Newington:

1983 has been a relatively quiet year with few upsetting or controversial moments for which we are all grateful.

This year has seen completion of a feasibility study for a small boat launching and docking facility at Fox Point. We are disappointed however, as the report brought with it a price tag that this board feels could not be justified. Therefore, we are not asking for any additional funds this year, but we do intend to make further, less lofty, studies this year.

Last year in our Selectmen's letter we mentioned our intentions to pursue the possibility of a small housing complex for the elderly. We have had some discussion on this subject, and have been informed that federal monies are not available. Since this would be a costly undertaking the board feels that federal funds are probably a must. The Selectmen have no intention of letting this idea wither on the vine, we will continue to monitor the various methods of funding and would welcome any suggestions from the townspeople.

Again this past year, and for the year 1984 you will notice a sizable figure for legal expenses. Aside from enforcing town ordinances, we find that we must have professional help in defending our property revaluation. At the present time Public Service Co., Fuel Storage Company and Dorchester, Sea-3, Inc., are protesting to the State, their tax assessments. It seems strange that we as Selectmen were against reassessment, were forced into it, and now must defend it.

This year, after many requests from the postal department and many stops and starts, the entire town has had numbers assigned to the homes and businesses. Because this promised to be a very time consuming project we asked Clifford Spinney if he would undertake it for us. He did and did an excellent job.

The Fox Run Mall has been in operation for one year on February 20th and we now have some idea of just what impact the malls will have on the Town.

For instance:
The Police Department is under increased pressure because this town as a happy, sleepy hollow of 700 people in the evening becomes the equivalent of a good size city of many thousands during the day when all the shoppers and employees of business and industry arrive in town. Numbers of people inevitably create problems that must be dealt with.
The police department is fast outgrowing its present facility and money has been included in the budget for a feasibility study of available space. The Fire Department is under pretty much the same pressure. Increased number of people translate into the possibility of more ambulance runs, gas wash downs, auto fires and all the other related fire calls. The Fire Engineers feel that they need a new truck(s) to meet the potentials of both industry and the malls and the Selectmen will meet them in the near future to discuss if the need is there and if it is, how to answer the need.

Trash! As you know, Newington is one of the cooperating towns in the Lamprey Solid Waste. Our tonnage has increased from 2,327 tons in 1982 to 3,200 tons in 1983. At the present rate of increase and the advent of a fourth anchor store at the Fox Run Mall, we will have reduced the debt the Lamprey owes the town to zero within 5 years. After that we will certainly have a sizable figure in our budget each year over which we have no control.

We must and will find a way to manage these changes and their challenges without the town being a casualty.

Obviously this town, like all others, has its' own unique problems but fortunately we also have a cadre of civic minded people on all of our boards and commissions. Taking all of this into consideration, the town is in an excellent position to deal with any problem both now and in the future.

Board of Selectmen
The Newington Conservation Commission is pleased to report that a petition, instigated by Lydia Frink and signed by 37 people, was sent to the State Historical Commission in April for historic markers at the entrance to Nimble Hill Road, commemorating several sites of historical importance as follows:

- Trickey's Ferry
- Joseph Adams' Homestead
- Town Meeting House
- Oldest Town Forest in US
- Old Parsonage

The Newington Conservation Commission plans to erect more detailed markers at each of these sites and add to the list in the future.

The results of our project undertaken in 1981 to plant 2,000 trees in the Garrison Hill area (various pine species) are beginning to show. A high percentage of the trees are flourishing, and some are even as tall as four feet. Although some replacements can be made, the overall survival rate of the planting is so high, this may not be necessary.

Our special project this year was an in-depth survey of all Town-owned land, prepared for conservation purposes for the Town of Newington by William A. Lawrence and Tim Hollingsworth from the University of New Hampshire. This fully documented study supported by maps and aerial photos, entitled “Land Management Plan for Newington, N.H.” is available to the public at the Newington Library for all interested in its recommendations. One item reads: “There is a potentially excellent spot for a small 1-1/3 acre Christmas tree plantation on the northwest corner of the field in the southern part of Fox Point. 134 trees could be planted each year for 12 years and provide a continuous yield of trees for the town”. The Conservation Commission had originally planned this project for the Flynn Pit (Garrison Hill) but the trees available at that time were unsuitable. If replacements are made later, this could become a second location.

Dispute over the boundary line at Caters Rocks is a continuing issue.

Dorothy Watson, Chairman
HISTORICAL SOCIETY

Originally organized around 1912 as the Newington Ladies Historical and Village Improvement Society and reorganized in 1948 with dedication toward the preservation of the heritage and antiquities of the Town the Society has languished in the doldrums for the past few years.

In June of the past year a meeting was held to see if renewed interest could be engendered to achieve some goals that seemed worth while.

A few of the subjects discussed and voted on were the following:

1) A publication of the Town History; something that has never been completed, although several starts have been made over the last 40 years. Although ours is one of the oldest Towns in the nation, it remains as one of the few without a published history. You will be asked to approve an initial sum of $10,000 to cover transcribing the wealth of material that is already available, supplies, photostat copying and perhaps the initial contract with a publisher. If you approve the first step, a similar sum will be requested next year for final publication of a thousand hard cover books. Most or perhaps all of these funds will be recovered over a period of time through sales of the book. This is a project that is long overdue and the Society hopes that it will meet with your approval. Preliminary discussion with the prospective publisher who specializes in town histories, shows promise of a well designed book.

2) Restoration of some head stones in the old part of the Town Cemetery; preliminary probes by Ernest Kaddy indicate the presence of many stones just under the sod. We hope they can be uncovered by volunteer effort this spring. An amount of $500 has been added to the Cemetery Superintendents budget to cover the cost of new foundations. This will not only preserve our ancient heritage but will also give the church yard the historic appearance that it deserves.

The Society would welcome new members. You can sign up on Town Meeting Day and hopefully on the same day next year (1985) we'll have the Town History book for sale.

Respectfully,
John Rowe, President
AMBULANCE REPORT

During the year of 1983, the Newington Fire Department Ambulance responded to 164 calls, a break down is listed below.

<table>
<thead>
<tr>
<th>Category</th>
<th>Calls</th>
</tr>

</table>

A break down of the 164 calls as to the day of the week is as follows:

- 33 calls on Tuesdays
- 28 calls on Fridays
- 24 calls on Sundays
- 21 calls on Thursdays
- 20 calls on Wednesdays
- 19 calls on both Mondays and Saturdays

The above runs constituted 891 response hours. In addition, the ambulance personnel attended 12 in house training sessions, and 9 State/Seacoast training sessions for 243 hours. As you can see, the ambulance personnel put in 1,134 hours serving the town. Approximately 350 hours were spent in going to other training sessions, which the personnel attended on their own, constantly improving and upgrading of their skills.

I would like to take this opportunity to thank all our ambulance personnel for their continuing contributions to the Ambulance Service.

If any resident is in need of our service, please call.

Respectfully Submitted,

Mary J. Wahl, Ambulance Director
FIRE DEPARTMENT STATISTICS

The Newington Fire Department responded to 213 calls during the year of 1983. The following is a break down of the calls.

- 65 fire calls
- 7 mutual aid calls
- 30 calls to assist the ambulance
- 6 calls for the fire boats
- 8 public assist
- 5 calls to check on possible oil spills
- 60 calls for alarm activations
- 32 false alarms or alarm equipment failure

A break down of the 213 calls as to the day of the week is as follows:

- 39 calls on Wednesdays
- 36 calls on Thursdays
- 32 calls on Tuesdays
- 28 calls on both Mondays and Saturdays
- 26 calls on Sundays
- 24 calls on Fridays

During the year the personnel of the Fire Department logged over 3,741 hours.

Since the installation of the Municipal Fire Alarm System in 1977, with 22 boxes on the system, 16 more boxes have been installed by the end of year 1983 for a total of 38 boxes.

I wish to thank each and every Firefighter for their time and efforts in improving their skills that are necessary in protecting the Town of Newington.

As a final note, I wish to remind the Town citizens, that the Fire Department is available for public assistance calls as well as for emergencies. We are here to serve you.

Respectfully,

Larry Wahl, Fire Chief
Once again, our cooperative town and state forest fire prevention and control program leads the nation in acres burned per forest fire. Less than one-half acre per fire state-wide average.

At the town level, your Forest Fire Warden is responsible for the prevention and control of all grass and woods fires when the ground is not snow covered.

Forest fire prevention is achieved at the town level by issuing a written permit for every fire that is to be kindled on the ground out of doors when the ground is not covered with snow. Each person wishing to have an outside fire must obtain this written permit from the town Fire Warden before kindling the fire. Any person that does not obtain a fire permit, when one is required, is violating our forest fire permit law and is subject to a court appearance and could be fined up to $1,000 and receive a jail sentence of up to one year.

No fire permit will be issued between 9:00 a.m. and 5:00 p.m. unless it is raining. The reason for this is two fold: the fire danger increases steadily between 9:00 a.m. and 2:00 p.m., then subsides to a safe level between 2:00 p.m. and 5:00 p.m. This happens because the sun dries out the fine fuels that are easily ignited and dries the air which permits rapid fire spread. Also during this part of the day fire fighters are not readily available in most communities so an escaped fire could burn longer and cause greater damage before being suppressed.

Your cooperation in burning only when conditions are safe is greatly appreciated. Even when a permit is not needed, a call to the Fire Warden or one of the Deputy Wardens is still needed, in case a passerby sees smoke and calls the Fire Department, both the Wardens and Dispatch will know of a fire at that location, and this could prevent a response from the Fire Department.

As Smokey says, "Remember, Only You Can Prevent Forest Fires!"

Alfred Grimes, District Chief
Larry Wahl, Town Fire Warden
Richard Rines, Deputy Warden
Richard Spinney, Deputy Warden
Activity of the Board during the past year has centered around the usual subdivision and site plan revenue requests. Subdivisions were approved for three lots on Beane’s Lane, two on the Mosher property and three on the Beane’s Hill property. A 13 lot subdivision of the McFarland property on Little Bay Road is presently before the Board.

Site plans were reviewed for the Hauch Storage complex on Beane’s Hill and Country Curtains on the same property as part of a rezoning request and on the Newington Mall for Toys-R-Us. Considerable time was devoted to further additional tanks at Fuel Storage Corp. Request for change of use were granted to Muirs Kitchen for the addition of a muffler service store, to C.H. Sprague for a change of content to some of their storage tanks and owners of the former Great Bay Arena for Pizza Time Theater and A.D.T. Systems. The Board is beginning to feel the need for outside consulting services as we face more complex problems relative to fire protection in the Industrial Zone, soil bearing qualities and water table and percolation testing. In most cases these costs are borne by the applicant. Good news for the residents of Patterson Lane is the decision at long last by the Army Corps of Engineers to dump future dredged material from the River downstream on the flats adjacent to the Port Authority Terminal.

The coming year will see the Board, with the cooperation of the various town departments and Boards, bringing the Master Plan up to date. The Plan will attempt to envision the Town’s future to the end of the century, a period when most of our present open space will disappear and give way to the endless quest for house lots.

Respectfully,
John F. Rowe, Chairman
NEWINGTON POLICE DEPARTMENT

During 1983, the Police Department recorded 113,649 miles and received 6,296 complaints or calls for assistance. Investigations by the department's officers included 356 criminal offenses, 8 missing persons, and 18 animal complaints. There were 138 criminal arrests made during 1983.

In the area of highway safety, efforts of our officers resulted in 13 motor vehicle arrests, 538 summonses, 1,807 motor vehicle warnings, and 23 defective equipment tags. Officers assisted 1,449 motorists while on routine patrol and rendered assistance to other law enforcement agencies on 635 occasions. During 1983, there were no fatal accidents; however, 186 property damage accidents and 24 personal injury accidents were reported.

Police activities resulted in 652 cases being prepared for the Portsmouth District Court or Rockingham County Superior Court.

The department's prevention and service program resulted in 206 doors and windows being found unsecured. The department made 2,528 residence checks, conducted 330 escorts, investigated 415 burglar alarms, responded to 99 fire alarms and assisted in 85 ambulance calls.

During 1983, 24 motor vehicles were reported stolen from Newington and 16 were recovered. Additional property valued at $89,445 was reported stolen from Newington, while recovered property totaled $23,428.

As anticipated, the level of required police services rose in 1983. Although the Newington Mall drastically reduced the level of required services by more than 32%, the addition of the Fox Run Mall resulted in a total increase of more than 35% in criminal offenses, motor vehicle accidents and burglar alarms in 1983, even though it was operating at less than full capacity. The addition of two officers during 1983 with financial assistance provided by the Fox Run Mall helped to alleviate some of the burden. However, the criminal case load has increased in number and, more importantly in complexity, to the point where it has become necessary to assign a second officer to handle investigations on a full time basis as of March 1984. To offset the loss of a patrol officer, we have added auxiliary police officers who work part time to cover patrol shifts along with a regular officer. The addition of these auxiliaries also provide us with a source of well-trained officers to rely upon in covering requests for special assignments and in other unusual circumstances.
A final concern which is shared by all of us is the inadequacy of our present facility from the standpoint of both utility and security. We have been exploring alternative sites and will continue to work closely with other town departments to arrive at the best overall solution to this pressing problem.

Once again, our aim is to provide the best possible service and protection for Newington. We take our responsibilities very seriously and your continued support is greatly appreciated.

Respectfully submitted,

John K. Stimson, Chief
RECREATION COMMITTEE REPORT 1983

The 1983 Recreation Committee agreed that time should be spent in establishing rules and regulations for operation and adopted a set of rules at an April meeting. Policies in effect concerning recreational and swimming lessons, ticket reservations, and unsupervised children on day trips were also reviewed and amended. Continuing to work hard to reach all age levels, the Committee planned a wide variety of activities including sports trips, Dancercise, theater trips, classes in gymnastics, crafts, and swimming, a very successful summer children’s program, special events such as the Annual New Year’s Day Party, the monthly Afternoon Get Together, and the weekly van shopping trips.

The Great Bay and Seacoast New Hampshire area offer unique recreational opportunities for us all. The Recreation Committee attempts to help you make the most of your leisure time and invites participation by all residents in its monthly meetings.

Annie Gasowski, Recreation Director

MOSQUITO CONTROL

Adult mosquito populations were reduced to “sub-annoyance” levels this season. The basis of the control program was the control of immature mosquitos breeding in snowmelt, salt marsh, roadside and pasture pools. Truck sprayer applications on local roads to reduce adult or flying mosquitos continued throughout the warmer months. New breeding areas were identified and controled when required. Mosquito collections and microscopic analysis revealed the major pest species.

A new biological insecticide was introduced, through our efforts to use the safest insecticides possible. B. T.I. IS A BACTERIAL DISEASE SPECIFIC TO mosquitos, black flies, and a few other lesser organisms. No adverse effects have ever been documented in non-target organisms, such as maj. It is a technological breakthrough and the beginning of a new generation of safe, specific, effective insecticides.

Michael Morrison, Supervisor
Leonard N. Eames, Chairman
Mosquito Control Commission
Hours of operation: Thursday, Friday and Saturday - 1 - 6 p.m. 
Wednesday - 9 a.m. - 12 noon 
Thursday - 6 p.m. - 9 p.m. 
Summer schedule: Library does not open Wednesday mornings and closes each day at 5 p.m. except on Thursdays which remain the same both winter and summer.

Telephone - 436-5154

The Library is within eight years of celebrating its 100th anniversary and nothing could be more useful to its operation than a printed Town History - a goal often sought and never realized. The present history committee sounds like they mean business this time and every success is wished for them.

Over the years, many starts have been made and much information has been gathered by individuals working toward a comprehensive overview of Newington from the Bloody Point days to the present. Some of this material is stored in the Library. Every bit of help and every resource of the Library that the Librarian can offer is hereby made available; not only to the committee members but to all persons in or out of Town interested in seeing the Newington History published before the Library reaches its 100th anniversary and some of us turn up dead.

In the meantime 1983 was a good year. The regular services supported by both the Town and Library Trust Funds, provided very well for our needs. For reference work we have stored periodicals together with indexes, almanacs, encyclopedias, latest RSA's (State Statutes), and more.

Checklist information is accepted during regular library hours and also any information to go into the Newington Neighbor which is serving as a good reference on the Town since its debut in 1972.

You are welcome in the library where coffee and conversation is always on tap.

Marjorie Pickering, Librarian
Adeline Johnson, Trustee
Christine Beals, Trustee

SEWER COMMISSION REPORT

Thanks to the authority the townspeople voted to the Sewer Commission at the 1983 Town Meeting, we were able to finalize a 3 year operating contract for our sewer plant with Whitman & Howard by our April 27 meeting. Sounds easy, but simply finalizing the contract proposals occupies 22 pages of our March 21 meeting. We got detailed proposals from three different firms. For good reasons, we accepted the mid-cost proposal, which also assured us of keeping our present staff at the plant. We continue to be pleased with Whitman & Howard's operation of our system and their expertise on this and other needs we have had.

We did have an encounter in February 1983, with an attempt to have the Mosher subdivision connected to our sewer. At first we voted 2 to 1 to allow this, but commissioner Mott's reasoning and your Chairman's research led us to consider and vote this down 3 to 0. Your Commissioners are satisfied that no connections should be made outside the commercial/industrial zones, and with the Selectmen's backing, this is our policy from now on.

We also were successful in concluding a one-year contract with Durham for disposing of our sludge at a fee of $26 per cubic yard. After having to store about 30 cubic yards of this sewer plant residue behind the town garage last winter, it was a great relief to not have to bury or otherwise dispose of this sludge in Newington, with open waters so close. We hope we can continue these arrangements.

The Sewer Commission is proceeding into 1984 with an approved budget of $758,380, which includes $167,690 for administration and operating our sewer plant and $590,690 for debt service, substantially all of which sums we expect to raise by user fees and betterment taxes assessed in the commercial/industrial zones.

Respectfully,

Richard E. Dill, Chairman
Newington Sewer Commission

NEWINGTON TOWN WARRANT
STATE OF NEW HAMPSHIRE

TO THE INHABITANTS OF THE TOWN OF NEWINGTON IN THE COUNTY OF ROCKINGHAM AND SAID STATE QUALIFIED TO VOTE IN TOWN AFFAIRS:

You are hereby notified to meet at the Newington Town Hall on Tuesday, March 13, 1984, at 10:00 A.M. to act on Articles 1 and 2.

The polls will open at 10:00 A.M. and Close at 6:00 P.M. The Business portion of the Meeting to act on Articles 3 through 14 will resume at 1:30 P.M. Saturday March 17, 1984.

ARTICLE 1. To choose in a manner provided by law —
One Selectman for a term of 3 years; One Town Clerk for a term of 1 year; One Treasurer for a term of 1 year; One Highway Agent for a term of 1 year; One Trustee of Trust Funds for a term of 3 years; One Moderator for a term of 2 years; One Supervisor of Checklists for a term of 6 years; One Member of the Fire Engineers for a term of 3 years; One Library Trustee for a term of 3 years; One Superintendent of Cemetery for a term of 1 year; One Sewer Commissioner for a term of 3 years; Three Budget Committee Members for a term of 3 years; One Pound Keeper for a term of 1 year; Two Planning Board Members for terms of 3 years; One Cemetery Committee Member for a term of 3 years.

ARTICLE 2. Are you in favor of Amending the Newington Building Codes by adding to paragraph 5, the following:
Amendment 1. (Q) All structures shall conform to the Fire Prevention Code, 1981 edition as amended. (Recommended by the Planning Board)
Amendment 2. (R) All Industrial, Public and Commercial Structures and Installations shall conform to the applicable National Fire Protection Association Codes and Standards, 1981 edition as amended, (Applies only to the specific uses and occupancies as listed). (Recommended by the Planning Board)

ARTICLE 3. To see if the Town will vote to adopt the following Ordinance: “Owners of any Storage Tank(s) with a capacity in excess of 2,500 gallons, which are to be used for the storage of any material other than water are required to notify the Newington Fire Chief, in writing, of the location and content of said tank(s) and further to notify the Newington Fire Chief, in writing, 30 days prior to any change of substance stored in said tank(s)”.

W2
ARTICLE 4. To see if the Town will vote to abandon that portion of Old Dover Road that fronts the residence of Ronald & Karen Moody consisting of approximately 6,720 square feet. This portion of the roadway was discontinued by construction of the new bridge and turn-around and leads only to the Moody property. If approved the area abonded will be deeded to the abutting owners (Ronald and Karen Moody).

ARTICLE 5. To see if the Town will vote authority to expend any accumulated interest from investment of sewer funds to be applied as an offset for the Sewer Budget of 1984.

ARTICLE 6. (By Petition of 11 voters) To see if the Town will vote not to remove the bard at Fox Point.
(This Article is not recommended by the Selectmen)

ARTICLE 7. To see if the Town will vote to adopt the following Ordinance:

1. Pursuant to RSA 31:41-c, the following prohibitions shall apply to electioneering activities within the Town of Newington:

   (A) No person shall in any manner interfere with any persons approaching or entering the polling place.
   (B) No person shall park any vehicle upon public property except in a designated parking area, nor shall any vehicle be parked in violation of any posted notice of parking restrictions at any polling place.
   (C) No person shall stand upon public property outside any polling place except upon edges of a paved sidewalk or upon the side of a paved roadway. No person so standing shall interfere with any pedestrians or vehicular traffic.
   (D) No person shall place or attach any printed or written matter upon any public property or public building; nor shall any printed or written matter be placed on or attached to any vehicle without the owners permission.
   (E) No electioneering activities shall be conducted outside any polling place within twelve (12) feet of the outermost door, nor upon any alcove leading to such door.
   (F) No candidate shall have, at any one time, more than six persons engaged in electioneering activities outside the polling places.

2. Each person engaged in electioneering activity outside any polling place shall be responsible for any of his electioneering matter which may be discarded upon public property outside any polling place.

3. The Board of Selectmen or the Town Moderator may designate not more than twelve (12) parking spaces out-
side any polling area for restricted parking and to limit parking in those spaces to not more than thirty (30) minutes for the convenience of voters entering the polling places. Such designation shall be done by written or printed notice.

4. Any vehicle found in violation of this ordinance may be removed at the direction of the Newington Police Department and the costs of such removal shall be paid by the owner or person in charge of said vehicle.

5. Any person found to have violated any provisions of this ordinance shall be guilty of a violation and shall be fined not more than One Hundred Dollars ($100).

**ARTICLE 8.** To see if the Town will vote to pay a sum not to exceed Twelve Thousand Dollars ($12,000) for costs incurred by 13 individuals who were defendants in a case brought by Walter H. Pickering, Jr. Said case has been terminated in a manner favorable to the defendants in December 1983. (Rockingham Superior Court #82-238).

**ARTICLE 9.** To see if the Town will vote to leave the care and maintenance of the Town Land & Buildings to the Selectmen.

**ARTICLE 10.** To see if the Town will vote to authorize the Selectmen to dispose of any real estate acquired by the Town through Tax Collectors deeds.

**ARTICLE 11.** To see if the Town will vote to authorize the Selectmen to hire money on credit of the Town in anticipation of taxes, at a rate not to exceed the current bank rate.

**ARTICLE 12.** To see if the Town will vote to raise and appropriate the sum of Seventeen Thousand Dollars ($17,000) for the Fire Truck Capital Reserve Fund and authorize withdrawal of this amount from the Revenue Sharing Fund.

**ARTICLE 13.** To hear a report from the Budget Committee and see what sum of money the Town will vote to raise and appropriate for all town expenditures for the ensuing year.

**ARTICLE 14.** To hear the report of the Moderator on the election of Town Officers.

Given under our hands and seal this 17th day of February, 1984.

Leonard N. Eames  
Paul Kent  
Paul L. deRochemont

NEWINGTON SCHOOL DISTRICT WARRANT

1984

THE STATE OF NEW HAMPSHIRE

To the Inhabitants of the School District of the Town of Newington in the County of Rockingham, State of New Hampshire, qualified to vote upon District Affairs:

YOU ARE HEREBY NOTIFIED TO MEET AT THE NEWINGTON TOWN HALL IN SAID DISTRICT ON SATURDAY THE 17TH DAY OF MARCH, 1984 AT 1:00 P.M. TO ACT ON THE FOLLOWING ARTICLES:

NOTICE: School District Officers are to be elected at the Town Meeting, March, 13, 1984 in accordance with the Statutory Election Procedure adopted by the District at its February 24, 1962 annual meeting.

ARTICLE 1. To see what action the District will take in relation to reports of Agents, Auditors, Committees or Officers chosen.

ARTICLE 2. To see if the District will authorize the School Board to make application for, to receive and spend in the name of the District, such advances, grants in aid, or other funds for educational purposes as may now or hereafter be forthcoming from Federal, State, local or private agencies.

ARTICLE 3. To see if the Newington School District will appropriate the sum of Three Thousand Dollars ($3,000) as a contingency fund as provided under RSA 198:4-a.

ARTICLE 4. To see what sum of money the District will raise and appropriate for the support of schools, for the salaries of School District Officials and agents, and for the payments of statutory obligations of the District.

ARTICLE 5. To hear the report of the Moderator on the election of school officers.

BUDGET COMMITTEE
REPORT FROM THE SUPERINTENDENT

DANIEL C. DURGIN

Nineteen eighty-three could be called the year of the educational report. Numerous national reports were written by commissions and committees all pointing out where the perceived deficiencies are in education and recommending various steps to bring about improvement.

I trust that many of you have read one or more of these reports. The best known of these is A Nation At Risk drafted by the National Commission on Excellence in Education, a committee formed by Secretary of Education Terrell Bell, with the encouragement of President Reagan. Other significant reports currently in circulation are High School: A report on Secondary Education in America by the Carnegie Foundation, Making the Grade by the Twentieth Century Fund Task Force on Federal Elementary and Secondary Education Policy, and Action for Excellence: A Comprehensive Plan to Improve our Nation’s Schools by the Education Commission of the States. Obviously, the common thread running through all these reports is the betterment of America’s public schools.

Widely referred to and often quoted, A Nation At Risk concludes with several strong and far reaching recommendations. Briefly, these recommendations are that: 1) high school graduation requirements be strengthened, 2) schools, colleges and universities adopt more rigorous and measurable standards and higher expectations for academic performance and student conduct and requirements for admission be raised, 3) more time be devoted to learning the basics, 4) the teaching profession be more financial rewarding and respected and, 5) citizens hold educators responsible for providing the leadership necessary to achieve these reforms and citizens provide the fiscal support and stability required.

In response, a committee from the New Hampshire School Administrators Association recently completed a report entitled Blueprint: Educational Excellence in New Hampshire which is seen as a guide for New Hampshire’s continued quest for educational excellence.

Summarizing, the committee saw the following as critical areas that must be addressed before their excellence can be claimed for our schools:

1. Schools must reaffirm their primary mission and strengthen their position as the center for intellectual and academic activity.
2. The critically important role of elementary schools must be recognized since the elementary school is the base upon which further educational improvements will occur.
3. Existing school time must be more efficiently used and every effort must be made to improve instructional practices where appropriate.
4. High school standards should require that each student complete as a minimum four years of English, three years of history and other social sciences, two years of mathematics, two years of science, and the equivalent of one unit of health and physical education, as well as demonstrating a basic knowledge of computers.
5. Teachers' salaries, especially those at the entry level, must be improved.
6. Standards for entering the teaching profession must be strengthened.
7. The interest and active support of various groups and the general public is essential to improve New Hampshire's public schools.
8. The New Hampshire Department of Education must be provided with the resources necessary to enable that department to furnish program leadership and a broad range of services and technical assistance to New Hampshire schools.
9. Better means for financial support for New Hampshire schools, especially for schools in communities with limited resources, must be found.

Recognizing the need to maintain and improve upon our educational record and high standards in School Administrative Unit No. 50 (SAU #50), the school boards and staff are continually seeking ways to enhance student learning.

Our accountability effort is well in place and through the careful monitoring of group test results we are able to make changes in our curriculum which will strengthen our program and, in turn, better educate our students. A report of our accountability effort is contained elsewhere in this book.

SAU #50 has well written and clearly defined curriculum guides in mathematics, language arts, science and social studies. These guides are flexible and can be modified as determined by test results and needs as perceived by the teaching staff or as dictated by changes in society. A formal program guide also exists for special education and a draft has recently been completed for music. We hope to follow this soon with a written guide for our art and physical education.
programs plus a written program of studies for computer education. Standing committees are in place in all subject areas. These committees meet to review the curriculum in their respective areas and make recommendations for changes.

This past fall, the Superintendent appointed a committee to review our tests and testing process in SAU #50. Particular attention was paid to our standardized achievement tests. In addition to preparing a very useful inventory of our test instruments, the committee recommended that we expand our testing program by joining with a number of our neighboring districts in using a locally developed and fully verified accountability test which will include a writing sample. Included among other recommendations was one which calls for SAU #50 remaining with the California Achievement Test (CAT) as its basic group test instrument.

The school boards, administration, and staff of our four districts are well aware of the need to develop in our students the ability to think critically, reason effectively, and problem solve. The improvement of these skills is viewed as one of our highest priorities and one to which we are totally committed.

Although public education has taken its verbal lumps during the past year, I take pride in our staff and program in SAU #50. As we strive to enrich our curriculum and make the daily experiences of our students more challenging and fruitful we ask you, the parents and citizens of our communities, to give us your support and assistance. For if we are to fully succeed in this most important mission, we must do so as a committed partnership of school and community.
TO THE CITIZENS OF NEWINGTON:

Nineteen eighty-three proved to be a banner year for the proliferation of educational reports. Seemingly, not a single stone escaped the close scrutiny of the experts as they probed every aspect of the educational process running the gamut from early childhood to post secondary education. The “how’s”, “what’s”, and “why’s” as compared to other industrial nations was their thrust and in the end they have made some rather interesting and challenging recommendations to us all — parents, teachers, and community. Bringing home to you some of their analysis of education today with its strengths and weaknesses and how we are living up to their perceptions is the focus of this year’s report.

As you might expect, the first concern centered around the quality of those teaching your children, especially, the preparational fitness to do so. As a community you can take extreme pride in the people who work with your children. Each educator comes to her position with a wealth of teaching background and experience. Their actual face to face contact with children in classrooms spans just about every grade level making it quite easy to develop flexible scheduling as we have here. Resting on their laurels is not a characteristic of these people, they are constantly reviewing what they do and how to make it better for the children. This attitude to improve personally and professionally is best measured through the variety of self-improvement programs your staff participates in each year.

Equally important to the whole environment of learning is the functioning of the support people. Their superb performance in their areas of expertise contributes much to the harmony and effectiveness of your school’s operation. As a total staff, I am sincere when I state that you employ people who exude a positive commitment and excitement about their jobs and more importantly, about the young people they serve.

The curriculum, the very essence of education, remains constant in the fundamental concepts of the basic “R’s”. According to the various commissions, too many systems have diluted their programs to the lowest common denominator. Not so here! Changes in content, processes, and affective learning come only after careful consideration and weighing their ultimate benefit to the children. In making decisions relative to change, we engage the thoughts of those affected, search out the soundness of theory, and use the assessment
tools available to us. For instance, the first computer purchase was such a modification. Funds for the project have been a joint venture between you and the Federal Government. So far, most of the children have had an opportunity to gain rudimentary experience in its operation. We hope to expand the computer literacy program through the addition of two more purchases. Last year, we took the first step in bolstering the science portion of the curricula by adjusting the schedule. Since then, the staff has selected a continuous program that touches upon each vital aspect of science from level to level while simultaneously spiraling the concepts to suit the maturity. Focusing upon writing for the past couple of years has paid dividends in the children’s expression. Their work exhibits clearness of thought, substantial content, and much more style. We hope to make the same impact by formally reintroducing another of the lost arts, “listening.” Other modifications to the curriculum were more subtle in nature, and designed to address specific course needs.

Measuring our achievement through standardized testing each year has been such a common practice that one tends to think it the norm rather than the exception. This year’s indicators reveal schoolwide gains were made in vocabulary, spelling, language mechanics and expression. Although the students scored well on reading for information, substantial work needs to be done in critical and interpretive reading. We continue to see improvement in the computational skills of mathematics and are especially jubilant with the significant gains in problem-solving. Judging from the pupil attainments some additional mastery is needed in the conceptual presentations.

Because no textbook in any subject can be geared to the needs of all students, we have been employing the multi-systems approach for quite sometime. Manipulatives, prints, and visuals are among the arsenal one observes as he/she travels throughout the rooms. Behind the system is the knowledge and experience of the teachers as well as curriculum guides that have had our initial input while serving on the SAU #50 committees. Continued attendance and participation in such gatherings serves as an educational forum for us where ideas are shared and common problems resolved. As a new venture, the first of two scheduled released days was held in the fall for the teachers throughout the School Administrative Unit.

Management of time to insure a more effective school day was yet another recommendation from the experts. On sev-
eral occasions, we have mentioned the consolidation of our instructional day into specific blocks thus providing maximum freedom from extraneous intrusions. The unified instructional frames also provide the students with tremendous latitude allowing easy access to advanced academic processes when warranted. Several students have enjoyed the shift. Expanding the Kindergartners day has proven educationally advantageous. Altering the grades in the primary unit due to larger numbers in the kindergarten and first grade was another move to get the most from the school day. Projected figures for next year may cause still another modification in the teaching assignments.

Mindful of costs, the resources actually spent in the last few years on instructional needs and plant operation have increased much less than the inflation rate. We have done much to rechannel the funds into priority needs which means materials for “kids”. This does not mean that the maintenance on the plant has been left to deteriorate. On the contrary, your support has allowed us to systematically replace and repair equipment before major problems developed. Considering the age of the main building we have been indeed fortunate. However, the time is approaching when expenditures may be necessary for the roof and tiling in the halls and classrooms.

While the release of these reports and others like them help elevate education to the front burner, the bottom line is that whether instruction is with books/paints, or computers, your staff is still guiding, delighting, questioning, responding, stirring, and prodding the young people to high expectations of self and my friends that's the real “stuff” of education—yesterday, today, and tomorrow!

Respectfully,

Richard Michaels
As has been the custom for several years, the students in grades 2, 4, 6, and 8 throughout the SAU were administered the California Achievement Test (CAT) in the spring of the year. Test results seem to indicate that our global approach to remediation of the targeted skills was not all that efficient either in the short term or long term view. Another problem detected from a review of the previous year’s performance as a Unit was the absence of a quantifiable amount which would be stated as the obtainable objective. Also needed is a bank of data which will permit the monitoring of actual achievement from one testing period to another. As our accountability process continues this data will be available.

As far as curriculum needs, the data continues to show discrepancies from the agreed upon mastery level of 80% in the instructional areas of advanced reading comprehension, spelling, and mathematics. Further examination of these broad domains indicates that the students are experiencing difficulty in critical and interpretive reading, along with a breakdown in certain aspects of operation principles in conceptual and computational application.

Once again the spelling portion indicates that fundamental changes should occur regarding the testing instrument or instructional efforts should more closely relate to what is actually presented in the test.

MAJOR OBJECTIVES

I. After receiving the spring data of student achievement on the California Test of Basic Abilities, the Accountability Committee will weigh the evidence and determine whether a different type strategy is needed in order to accomplish certain learning objectives.

II. Given concentrated instruction in interpretive and critical reading skills, the students in grades 2, 4, 6, and 8 throughout the SAU will increase their right response summary scores by a minimum of 5 percentage points over last year’s scores.

III. Operational and conceptual application of mathematical skills will be increased in the fundamental processes as pertaining to specific learning levels by the minimum of 5 percentage points in the right response summaries as measured in the spring of the academic year of 1984.
IV. Given the actual words appearing on the California Spelling Section of the Achievement Test, along with the routine words found in their spelling program, the students will reduce the present mastery deficiency by an increase of at least 10 percent on the right response summaries in the spring testing cycle.

NOTE: The “right response summary” referred to relates to one of several statistical reports we receive from the California Achievement Tests. This particular report shows the number of correct answers given for each question.

DESCRIPTION OF ACTION PLAN
CHANGES TO CURRICULUM
INSTRUCTION AND SUPERVISION

A. Reading Comprehension:
1. Teachers will provide more instructional time in the critical and interpretive skills of reading by judging what is actually being done at present as compared to what must be done to achieve greater results.
2. Administrators and teachers, along with the Language Arts Curriculum Committee, will assess current programs to see how and if proper emphasis is being given to these advanced skills.
3. The Language Arts Committee will survey the staff relative to individual consensus regarding topics for professional growth in this area of the reading program.
4. Working in unison the Staff Development and Language Arts Committees will plan workshops in the questioning techniques and critical thinking.

B. Spelling:
5. Teachers will incorporate into their word lists spelling words appearing on the California Achievement Test appropriate for their given levels if these items are not included within their existing programs.
6. Teachers will examine their present strategies in teaching word recognition to see if more correlation can result among the language arts skills.

C. Mathematics:
7. Teachers in all grades will concentrate upon computation problems written in horizontal form.
8. Problems involving the mathematical symbols (<>)}
will have additional emphasis throughout the grades.

9. Continued practice with number sentences with missing information must be periodically scheduled at all levels.

10. Lessons on how to take tests with multiple choice type answers will be incorporated into the teaching of mathematics.

11. With the assistance of the administration, the Staff Development Committee will provide the staff with workshops on problem solving techniques.

12. Teachers will emphasize both the American and Metric systems of measurement.

13. Teachers in the first four grades should spend more time stressing the basic Properties of Mathematics.

14. Teachers will emphasize estimation and predicting reasonable results.

15. Teachers in the intermediate grades and above will continue to present daily computational skills practice to maintain operational skills on whole numbers.

16. Teachers will spend more time teaching the processes of subtraction and multiplication in grades 1-4.

17. Teachers should increase emphasis on adding, subtracting, multiplying and dividing fractions and decimals.

In summary, our accountability program is ongoing and is an effective tool in determining strengths and weaknesses in our curriculum. In addition to establishing a mastery level of 80% the Accountability Committee identified the following areas for immediate concentration: reading comprehension (both literal and inferred), spelling, mathematics computation and mathematics concepts and applications specifically relating to numeration, number theory, number theory/sentences, common scales, geometry, measurement, and geometry/measurement. Students were found to be consistently deficient in these areas based on the California Achievement Test. Space does not permit printing of all of the results, but this information is available in the Superintendent of Schools Office.

Substitutes for the 1982-83 School Year $11,000
TO THE MEMBERS OF THE SCHOOL BOARD
NEWINGTON SCHOOL DISTRICT
NEWINGTON, NEW HAMPSHIRE 03801

I have examined the combined financial statements and the individual fund financial statements of the Newington School District as of and for the fiscal year ended June 30, 1983, as listed in the foregoing table of contents. My examination was made in accordance with generally accepted auditing standards and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

As described in Note 1 B, the combined financial statements referred to above, do not include financial statements of the General Fixed Asset group of accounts, which should be included to conform with generally accepted accounting principles.

In my opinion, except that omission of the General Fixed Asset Group of accounts results in an incomplete presentation as explained in the above paragraph, the combined financial statements and the individual fund financial statements referred to above present fairly the financial position of the Newington School District at June 30, 1983 and the results of its operations for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

My examination was made for the purpose of forming an opinion of the combined financial statements taken as a whole and on the individual fund and account group financial statements. The accompanying financial information listed as supplemental schedules in the table of contents is presented for purposes of additional analysis and is not a required part of the combined financial statements of the Newington School District. The information has been subjected to the auditing procedures applied in the examination of the combined, individual fund and account group financial statements, and in my opinion, is fairly stated in all material respects in relation to the combined financial statements taken as a whole.

PREFACE

The Cooperative School District Planning Committee was charged with the responsibility of determining the feasibility of forming a cooperative school district between the towns of Greenland and Newington. The committee first met on June 7, 1982, and held many meetings through the fall of 1983.

The committee researched every aspect of a cooperative district including such important areas as curriculum and services, physical plant, transportation, and present and future enrollments. The committee compared elementary grade program offerings between the two districts, and between the junior high students in Greenland and Portsmouth. Achievement test results for students in the two districts were also compared. The committee discussed staff salaries and fringe benefit schedules in the two districts and also discussed aspects of their respective teacher contracts, comparing the details of each. Several of the twenty-seven cooperative school agreements that exist in New Hampshire were obtained and studied.

Because of the thoroughness and depth of the study, the committee determined that issuing a conclusive report in March 1982 was not feasible and instead submitted an interim report to the citizens of both towns at that time.

The committee now issues this final report. The report is broken into separate sections and the succeeding text is organized in that fashion. Discussed are educational consideration enrollment considerations, physical plant considerations, transportation considerations and financial considerations. The committee thoroughly researched and discussed the complex area of financing the cooperative. As expected, this was the most challenging and difficult aspect of the study.

INTRODUCTION

The towns of Newington and Greenland are currently experiencing decreasing enrollments in their respective school systems. Student population projections done in Newington indicated that the trend toward smaller classes would continue for at least the near future. For this reason, the Newington School Board began looking at creative ways of
dealing with the shrinking enrollment. Forming a cooperative school district with Greenland was felt to be worthy of exploration.

Early in 1982, members from the Newington School Board approached members of the Greenland School Board asking if they would be interested in conducting a joint study addressing the issue of a possible school cooperative between the two towns. The Greenland School Board expressed interest in participating in such a study.

The formation of such a study committee requires a favorable vote of each school district. Accordingly, the following article was submitted by the respective school boards for the district warrant: To see if the District will vote to form a Cooperative School District Planning Committee in accordance with New Hampshire RSA 195 SECTION 18; and to authorize the Moderator to appoint three (3) qualified voters, at least one of whom shall be a member of the School Board, as members of the committee; and to charge this committee with the responsibility of filing a written report of its progress at the March 1983 Annual District Meeting. The article was voted in the affirmative at the respective School District Meetings.

In accordance with the vote, Newington Moderator, Clifford E. Spinney, appointed the following to the committee: Barbara D. Hill (School Board Representative), Jeanne K. Haskins and Norman Myers. Robert Steuk, Greenland Moderator, appointed the following: Sue Lyndes, John Stocker, and Herbert Wilson (School Board Representative). The six member Cooperative School District Planning Committee was charged with the responsibility of filing a written report on its progress at the March 1983 annual district meeting.

The Superintendent of Schools attended all meetings of the committee. On two occasions consultants from the New Hampshire Department of Education were asked to meet with the committee to discuss various aspects of cooperative formation. In each case Donald Day and Paul Kilmister proved to be most helpful. Also used were many written documents ranging from local town reports and computerized census projections, to studies done by other districts entering into a cooperative. Specific sections of this report will address the various issues researched.
EDUCATIONAL CONSIDERATIONS

One of the most important considerations in investigating a cooperative school district is a comparison of curriculum. The Greenland Central School houses grades 1 through 8 while the Newington Elementary School includes kindergarten through grade 6 with the junior high students attending Portsmouth Junior High School on a tuition basis. In addition to curriculum offered to students of Greenland and Newington, a study of services offered at the respective schools and extracurricular activities were also considered. The information gathered came from the principals' offices of the Greenland Central School, Newington Elementary School, and the Portsmouth Junior High School, with the assistance of the SAU #50 office and the Guidance Office at Portsmouth Junior High School.

On the elementary level, the curricula at the Greenland and Newington schools are basically the same. However, Newington offers kindergarten on a full day basis while Greenland has no kindergarten program. Students at each school receive language arts, mathematics, science and social studies on a daily basis. In addition to these core studies, students at both school also have music, art, and physical education classes once a week. Services offered by each school include speech, special education, Chapter I (a federally funded remedial program), and health services. In both Greenland and Newington occupational therapist services are contracted as needed. The Greenland School also has a full-time library aide who maintains the library during school hours while the Newington School utilizes the town library which students visit formally every other week. In Greenland, services of a half-time guidance counselor are available.

In the area of extracurricular activities, the Newington Elementary School offers no program due to the small enrollment, however, programs are offered by the town recreation committee. These programs in the past have included gymnastics, after school sports, baseball, and trips to the UNH Children's Theatre productions. The Greenland Central School offers individual/group music lessons, band and chorus for grades 5 and 6, art club, story time for grades 1 through 3, and enrichment group for grades 4 through 6 (all on a once-a-week basis). A sports program for grade 6 students includes girls field hockey and softball, as well as boys soccer and baseball. Basketball for boys and girls is offered for students in grades 5 and 6.
On the junior high level, the curriculum at Greenland Central School and Portsmouth Junior High School (PJHS) is basically similar, although PJHS has a somewhat more expanded program. Students at both schools have English, mathematics, social studies and science on a daily basis, and physical education once a week. Reading is covered through the English Department at each school and PJHS also has a Reading Department where students can receive extra help if needed. Except for band and chorus once a week, there are no regular music classes for grades 7 and 8 at Greenland, while PJHS students have one semester of music each year with a variety of music related courses to choose from in grade 8. Also band and chorus classes are held each day. At Greenland there is no art program for grades 7 and 8. At PJHS students receive one semester of art in grades 7 and 8, again with a variety of art related courses to elect in grade 8. Greenland does not offer industrial arts or elect in grade 8. Greenland offers mini courses each year with the subject varying according to the skills of the teachers available. These courses are rotating and all students receive each of the courses at some time during the school year. At PJHS a low ability mathematics program is available as well as French for accelerated students, and advanced mathematics and English courses.

Services at both Greenland and Portsmouth include: Chapter I, speech, guidance, library, occupational therapy, and health services. Extracurricular activities at Greenland are: chorus and band once a week, individual/group music lessons, art club, sports including girls field hockey and boys soccer in the fall, cheerleading, girls and boys basketball in the winter, girls softball and boys baseball in the spring. At PJHS activities offered are intramural sports for both boys and girls, drama and the same seasonal sports as are offered at Greenland.

ENROLLMENT CONSIDERATIONS

A study of the past enrollments and the projected ones for the next five years indicates that both Greenland and Newington are faced with declining enrollments. This seems to hold true despite the fact that Greenland has experienced a slight residential increase whereas Newington has not.

In addition to the pupils enrolled in public schools, a number of children in both towns are being sent to nonpublic schools. In Newington the largest number is concentrated at the junior high school level. In Greenland the highest numbers are in kindergarten, because there is no facility for that age level. No projection has been made for the nonpublic enrollment, but the figures for the past five years have remained constant.

The projections cited in the following table were made using the survival method, the most widely used approach to forecasting school enrollments. Simply stated, the survival method uses the past to forecast the future. Therefore, the system is reasonably accurate provided there are no major occurrences such as a substantial business locating in the area, or an unexpected change in the town's zoning. Obviously, such events can cause dramatic shifts in population.

The projections suggest a continual gradual decline in student enrollment at least for the next four years. Statisticians are claiming that school enrollments nationally will start an upswing during the latter half of this decade. Of that, time will be the judge.

PHYSICAL PLANT CONSIDERATIONS

Space considerations for the Cooperative School District were based upon establishing two classrooms for each grade. After thoroughly discussing the matter, the committee recommended kindergarten through grade 2 and grade 3 through grade 8 split between the two districts. In addition, due to the absence of a kindergarten program in Greenland, it was necessary to allow for the possible establishment of this grade. Depending upon numbers, morning and afternoon sessions might have required the use of one classroom.

Dividing the grades at the second grade would allow the Newington School to have grades kindergarten through grade 2 with two classrooms for grades 1 and 2.

Planning for use of the Greenland School facility included: Two classrooms per grade, grade 3 through 8, expanding the library into an existing classroom to allow room for the needed audio-visual space, freeing two classrooms on the ground level to allow for establishment of industrial arts and home economics for the junior high level, and allowing separate rooms for music and art.

In the appendix of this report are floor plans of each building showing the layout and suggesting distribution of classes and services. The suggestions illustrated in the appendix were made to show the adequacy of existing space.

TRANSPORTATION CONSIDERATIONS

Assuming grades kindergarten through 2 would be housed in Newington and grades 3 through 8 in Greenland it was estimated that both towns would need a total of six buses plus a van or small bus. Currently a total of five buses are used in the two towns. Tentative schedules were considered with bus routes and times proposed with cost effectiveness in
mind. Some double runs would be established to reduce the total number of buses needed.

A conceptual look at a transportation system designed for the Greenland/Newington Cooperative School District indicated that five or six buses would have been sufficient to assure an efficient operation.

Based on today’s costs, it was estimated that the expenses of such a system would closely parallel the combined sums being spent in the two towns currently. It appeared fairly certain that the cost of the transportation system would not be less than the current combined cost of the two towns.

It was determined, however, that the length of time that Greenland’s primary age children would be riding the morning bus would be excessive. This, along with other scheduling issues, could, unless significant additional funds were committed, make the transportation schedule less than desirable.

**FINANCIAL CONSIDERATIONS**

Clearly, the most difficult aspect of the study centered around the issue of financing the cooperative. Costs of any cooperative are shared but the percent of the total that each district will bear is a matter for negotiation. State law (RSA 195:7) prescribes that each preexisting district shall pay its share of all capital outlay costs and operational costs in accordance with either one of the following formulas:

I. All such costs shall be apportioned on the basis of the ratio that the equalized valuation of each preexisting district bears to that of the cooperative district; or

II. One-half of all such costs shall be apportioned on the basis of the ratio that the equalized valuation of each preexisting district bears to that of the cooperative district and $\frac{1}{2}$ shall be apportioned on the average daily membership for the preceding year.

III. Some other formula offered by the cooperative school board, adopted by the cooperative school district and approved by the board.

Statewide, option III has been chosen by the majority of cooperative school districts.

The task of arriving at a suitable formula for allocating costs proves to be insurmountable. Contributing heavily to the difficulty are the tremendous differences in student population and property valuation between the two towns. This wide dissimilarity was the number one impediment in arriving at a mutually acceptable formula. Greenland has approxi-
mately 83% of the students while Newington has 84% of the equalized property valuation.

Allocating operating costs between Greenland and Newington was made more difficult by the existence of approximately $872,000 in excess value of the Greenland school facility over the Newington facility. This sum of money would have to be paid to Greenland by Newington over a period not to exceed 20 years.

After experimenting with many formulas over a lengthy period of time and researching a number of cooperative agreements around the state, it was reluctantly conceded that no workable solution was possible.

**SUMMARY**

Representatives from each town correctly felt that in order for cooperative formation to obtain a favorable vote at their respective district meetings, they must be able to show their constituents some financial and/or educational improvements.

Department of Eduction Officials indicated that forming a cooperative would be extremely difficult. They pointed out that in nearly all cases where cooperatives have been formed in New Hampshire, a compelling educational reason has existed for such formation. In the case of Greenland and Newington, no such reason existed.

Improvement in the educational program would result through cooperative formation assuming adherence to the committee’s recommendations. Essentially, a kindergarten program would be offered to Greenland students along with home economics and industrial arts at the junior high level. Newington students would interact with a larger population.

Although the foregoing was attractive to the committee, it did not appear to be of enough significance to outweigh the financial issues.

Financially, it was the desire of both communities to maintain or reduce present total schools costs by forming a cooperative. It soon became apparent that one town’s gain was the other’s loss. Since the total cost of operating the cooperative would approximate the combined cost of operating the districts singularly, no significant savings would be realized. This occurs since the addition of industrial arts, home economics, and kindergarten programs cancels out the savings which would be realized through staff reduction created by combining like grades being operated by the two districts.
CONCLUSIONS

Having spent 18 months studying the issue, the committee is confident that it has completely and thoroughly researched all aspects and makes this report along with the recommendation contained herein without reservation. In the absence of significant cost savings or clear, desired enhancement of the educational program, the committee members can not propose a cooperative school district encompassing Greenland and Newington. In summary, the essential reasons are:

1. No compelling educational reason currently exists for the formation of a cooperative. Should a cooperative school district be formed, the perceived enhancement of the educational program would be outweighed by other considerations.
2. No significant reduction in total educational costs would result, thus no financial incentive exists.
3. The problem associated with the transportation of Greenland's kindergarten, grade 1, and grade 2 students are an impediment to a good educational program.

APPENDIX

This appendix contains the floor plans of the Newington Elementary School and the Greenland Central School. The numbers and room names circled indicate suggested distribution of classes and services. Circled numbers represent grade levels.
