# REPORT

—OF THE—

## SCHOOL BOARD.

---

One year under the "New School Law" has passed. There has been no change in the number of schools; five have been taught twenty-four weeks each. Some are smaller than desirable, but their location is such that it is impracticable to consolidate them.

We have made some exchange of scholars with Sanbornton, while a more equal division has been effected between the two schools at East Tilton. All the schools have been reasonably successful, some excellent; on the whole, quite up to the usual standard in town.

A serious drawback to best results, in our schools, is the irregular attendance of scholars; absent marks appear altogether too frequently upon most registers, for which parents and guardians are largely responsible.

With the Union District outside the operation of the present law, embracing a large part of the village and extending nearly across the town, widely separating portions of the town district, but little change or improvement can be made in our educational facilities by the consolidation of districts, in establishing graded schools or in securing a very near equalization of school money, supposed to be especial objects sought by this enactment.

We are very much inclined to the opinion that the law, if such law is to be, should be impartial and compel *all* to adopt its provisions. It seems a strange omission that it contains no provision whatever for the conveyance of school property.

We append the usual Table of Statistics and Roll of Honor.

H. B. SAVAGE,  
W. H. H. ROLLINS, } SCHOOL  
HORACE SANBORN, } BOARD.

# ANNUAL REPORT

— OF THE —

## BOARD OF EDUCATION

FOR UNION DISTRICT, TILTON AND NORTHFIELD.

In making the report for the past year we are glad to say several improvements have been made in and around the school buildings, and yet others are needed. The rooms and halls should be whitened and painted. The floor in the primary room should be re-laid. Cracks that are half an inch in width may pass, as a means of ventilation, but we hardly think they are conducive to the comfort and health of the children.

One of the most urgent needs of the school, is books of reference. Two large dictionaries are needed, also physiological charts. The present board have added a copy of Webster's unabridged dictionary, with a few other books.

The school for the entire year has been under the immediate charge of George M. Clough, as principal, assisted by Mrs. G. M. Clough, Marion E. Lyford, and Annie O. Drake.

The general condition of the school has greatly improved the past year. The supervision of each room has been under Mr. Clough, and to the earnestness and zeal with which he entered into the work, and to his tact and executive ability is due the success that has been attained.

The discipline and methods of instruction have been of the highest order. The assistants have labored harmoniously and efficiently toward the results obtained. The general good deportment of the scholars while out of school, particularly the lessened amount of bad language, and the better condition of dress and cleanliness, has been the general remark of most all of those interested in the school; showing conclusively, that the parents and scholars have taken a deeper interest than ever before.

The money appropriated for finishing the new higher department has all been accomplished within the sum specified, with additional work of considerable magnitude. The room has been furnished in the most modern style and convenience. For the finishing of the room proper, and extra work, the District is obligated to Mr. J. F. Eastman, for carrying it on to a first-class finish. Mr. Eastman showing his interest by doing the work at a figure that gave him only fair day's pay, with no contract profit whatever to himself.

The first term of school was brought abruptly to a close after  $5\frac{1}{2}$  weeks by the prevalence of scarlet fever. We feel that this might have been avoided by the prompt action of the proper authorities, and more regard for the health of others, by the parents or guardians of the afflicted children.

We make the suggestion that the incoming board may so change the terms of school as to conform to those around us, making it smooth for the graduating scholars to enter higher schools. We are thoroughly convinced that this is the almost unanimous voice of those interested.

The course of study, as adopted by this board, is the work of the principal, George M. Clough, who gathered it from frequent visits and correspondence with the best schools and highest authorities in school matters in this state and adjoining states.

We trust this course may be permanent. It has been printed in pamphlet form and distributed throughout the District.

The appropriation voted for concrete walks, with the sum of twenty dollars given us by the "Village Improvement Society," has enabled us to carry out the long needed improvement. The great increase of pupils predicted by many, on account of the new industry in our village, has not been realized, as will be seen by an examination of the statistics herein presented.

We have divided the primary department, and the result has been seen in the marked advance of the children. The indications for attendance during this year point to a large increase, and to maintain the present corps of teachers, will call for an additional increase of funds.

## TABLE OF STATISTICS.

## FIRST PRIMARY SCHOOL.
