CITY MANAGER'S REPORT

To the Honorable Mayor, Members of the City Council, and Residents of the City of Berlin:

It is my pleasure to submit the 1975 Annual Report on the activities of our municipal government. The report is in the now traditional format. We hope that this provides not only something of year-round usefulness but also serves as a reference for the time and date of meetings of the City Council and other municipal boards and agencies so that residents have a greater opportunity to participate. As resources for the public sector become more scarce, it is of great importance that citizens participate in making the decisions which will result in the expenditures of those resources.

The 1975 report covers a period of seventeen months instead of the usual twelve months. This is because the City changed its fiscal year from the previous period of February 1 through January 31 to a new fiscal year beginning July 1 and ending June 30. The change puts the City's fiscal year in line with the state and school fiscal years. It also places the beginning of the City's fiscal year much closer to the month of October when tax revenues usually begin to be received and, thus, substantially reduces the City's need to borrow money in

James C. Smith

anticipation of tax receipts. In the long run the change will result in a substantial savings to the City.

The fiscal year change is one of a number of extremely important activities in progress during fiscal year 1975-76 which we anticipate will reduce the long term cost of municipal services in Berlin and improve the community for its residents, and in the eyes of prospective new business which may wish to locate here. The attraction of new business and industry as well as construction of new housing is the surest way of reducing the tax burden on existing residents and businesses in the City without reductions in municipal service levels.

Construction began in 1975 and will be completed in early 1977 on a new water treatment plant. Although the Water Commission

was forced to increase water rates initially to pay the City's share of the cost of the new treatment plant, constructing the new plant now enabled the City to take advantage of substantial federal assistance and will result in a long term stabilization of water service charges. The quality of drinking water and availability of water for fire-fighting purposes will also be substantially improved.

Anderson-Nichols Company, the City's engineering consultants for the sewage collection and treatment plant project were hard at work during FY 1975-76 completing final plans, specifications and bid documents. These are now under review by state and federal agencies. Construction is scheduled to start in 1977. The new wastewater treatment system in conjunction with a similar system being constructed by the Brown Company will remove pollution from both the Androscoggin and Dead Rivers. Proper waste disposal facilities are now mandated by federal and state law and are also a requirement of any new industry which must meet strict federal anti-pollution requirements when constructing new plants.

Another activity of great long-term significance to the community which occurred during fiscal 1975 was the adoption of the transportation plan for the City. The transportation plan maps out needed improvements to the City's streets and highway network. It sets priorities for accomplishment of these improvements and intermeshes the scheduling of improvements with the availability of local, state and federal funds. Improvements to such important arteries as Route 110 and Hutchins Street are vital to the long-term health of the community.

Hoyle, Tanner and Associates were employed by the Berlin Airport Authority to

prepare a master plan for the future development of the Berlin Airport. An airport capable of servicing the needs of business and industry as well as other commercial and private air traffic is also important to long term development prospects for Berlin.

The Community Development Department instituted several programs for improvement of housing in the City. The most important of these during FY 75-76 was the Home Improvement Loan Interest Rate Subsidy Program. This program provided federal dollars for subsidies averaging approximately \$1,000 each to homeowners in sections of the City designated for special emphasis on home improvements. The program generated nearly a quarter of a million dollars of improvements to residences in the City. Safe, sound and attractive housing is extremely important to the long-term health of the City.

Progress in developing Berlin's Maynesboro Industrial Park also continued during fiscal year 1975. A Farmers Home Administration Grant was received to enable the Berlin Industrial Development and Park Authority to install streets and utilities in the northern quarter of the park and an Economic Development Administration Grant in conjunction with Department of Housing and Urban Development funds allowed the installation of streets and utilities in the southern half of the park. These funding packages, put together by the Department of Community Development, enabled all of the work to be done at no cost to the taxpayer.

Recreation for the City also received attention in FY 1975-76 with the opening of Jericho Lake Park and the approval of a Bureau of Outdoor Recreation grant for the purchase and development of Horne Field.

Nineteen hundred and seventy-five saw the appointment of two new department heads with responsibility for public safety in the City. Norman Lacroix succeeded Fire Chief Lucien Lamontagne and Carl Giordano succeeded City Marshal Alex Dumessnil. Both Lucien and Alex were respected public servants who worked hard for many years to assure the safety of the citizens of Berlin. Initial emphasis of the new chiefs has been to strengthen the training programs in both the Police and Fire Departments and promote fire and crime prevention.

In March of 1976, the entire community was greatly saddened by the loss of Ernest Tankard who was still serving very actively as Water Works Superintendent and Engineer at age 72. Ernie's death was a loss of not only a valuable and long serving public official but of a close personal friend to many residents of the area. Larry Hodgman has been appointed by the Water Commission to carry on the good work.

Although substantial progress was made during FY 1975-76 towards improving the City's long term situation, acute problems exist in meeting needs for funding other more immediate operational expenses. Unfortunately, service reductions were necessitated in several areas, particularly snow removal operations and street maintenance. Constantly rising costs and a stagnant tax base have resulted in insufficient appropriations for equipment replacement and building maintenance. These are areas where federal assistance which the City has been successful in obtaining for other needs is generally not available. Continued neglect in these areas is counter-productive to other long term programs for improvement of the City and is a most serious concern.

I am confident, however, that if we persist in making the difficult decisions which result in long term improvement in the community, the decline and deterioration which has occurred in past years can and will be reversed. In the meantime, elected and appointed officials and the citizenry must work together to guide our community through its present difficult period.

New Hampshire, the North Country, Berlin and its citizens can have a bright future!

Respectfully submitted,

James C. Smith
City Manager

THE MAYOR'S REPORT

My return to City Hall as Mayor has come during difficult times. My first months in office have been dominated by the municipal budget, and the problem of rising taxes — the most difficult problem the city faces. As budget sessions went on and on, it became clear that an \$11 increase per \$1,000 valuation was unavoidable this year without drastic reductions or cuts in municipal services. This resulted from three factors. First, the entire budget surplus from 1974 was applied as revenue to keep taxes down last year. But it wasn't really revenue. After one year it disappeared, and the result was that this administration had to absorb a \$5 tax increase right off the bat. Second, this administration faced an additional \$2 increase because of the results of a tax abatement suit against the City by Brown Company. Before one dime was spent, this administration faced a \$7 increase. Then a \$4 tax increase was required for salary and wage increases for City employees. We faced an automatic \$11 increase without one dime going for new improvements.

A large part of our hope for the future lies in attracting new industry. As chairman of the Industrial Authority I have been making contacts with Paul Guilderson, the State Industrial Development Director, concerning the City's industrial building in the new industrial park. It is now being advertised through the State at no cost to Berlin.

I have also made contacts with potential industries. I am pleased to report that at present things look favorable for a new industry which will employ both men and women to move into the building around the first of the year. Much of the credit for this is due Val Doucette, City Manager Jim Smith, and Mike Donovan.

The first step has been taken in dissolving the City's relationship with TEPCO, or I.G.&T. Inc. The hiring of Mr. John Harris as a consult-

Mayor Laurier Lamontagne makes a point during a City Council work session.

ant for the City has come to a stop. An appropriation of \$60,000 to continue municipal power efforts was deleted from the budget by vote of the Mayor and a majority of the Council. Necessary steps are now being taken to dissolve the City's contract with TEPCO.

The City has faced another problem with the deterioration of the Mason Street Bridge, State Highway Commissioner John Clements has promised me that the repair of the bridge is a top priority. It will be funded by federal and state funds and therefore won't involve an increase in property taxes.

In another development, the Motor Vehicles Department has been moved to the rear of City Hall for purposes of safety and convenience. The long climb upstairs was difficult for some of our older citizens and there was a possibility of accidents. People will find the new location more convenient.

At the same time, I have remodeled the old Motor Vehicles office for my own use as Mayor, Chairman of the Airport Authority and Chairman of the Industrial Authority. In the new office I will be better situated for keeping records in order and for meeting with the many citizens who come to see the Mayor.

The expenses of these moves are being paid off by charging the Motor Vehicles Department

\$100 a month. After the expenses of creating the offices are paid off, Motor Vehicles will continue to pay \$100 a month for maintenance.

The City hired new auditors this year — the firm of Coopers & Lybrand of Portland, Maine. From all reports they have been doing an excellent job, and their report will speak for itself.

I would like to close by saying that this has been my first time as mayor under the new City Charter, where the city manager is the administrator. This has been hard for me to get used to. My experience in past terms was as the chief administrator. The mayor was able to give orders. Now the mayor can only make recommendations. Whether I like it or not, it is our charter, and it is up to me to get used to it.

I am the first mayor to work with an eight-member Council. I have found it very hard to get a two-thirds vote, much more so than with a 12-member Council. I personally feel that because of this it will be harder for Councils to spend funds in the future. The eight-member Council should provide a financial safeguard for the future.

Laurier A. Lamontagne,
Mayor

The Berlin High School Mountaineers, the number two-ranked girls' softball team in the State.

Lawrence W. Dwyer

As in previous years, we have noted some decline in the public school enrollments. While this decline has been more than balanced by transfers from the parochial schools, apparently the 1975 graduating class of 327 will be our largest for some time.

We should mention the programs that are shared mutually by the public and parochial school systems. The public school system still provides transportation and hot lunch programs for all the students in Berlin. Specific programs include the Shared Services Program, through which all seventh and eighth grade students from the parochial schools report daily to the junior high school for science lessons.

Another is the Child Benefit Program. Although parts of it have been designated as unconstitutional, some aspects still continue. Under this procedure, testing and guidance services are made available to the parochial schools, along with the purchasing of textbooks which are the same type as those used in the public schools.

Although physical education has also been provided, the program has been hampered this past year by a ruling that the physical education instructor on the public payroll may not conduct classes within the parochial schools. This has caused problems for both school systems.

The public schools continue to have the advantage of progress that has been made within the past few years. Increased opportunities have been made available because of the building of the new high school, the extensive addition made to the old high school to make it a junior high school, and the purchase of the old Notre Dame High School for use as a middle school.

We have seen many curriculum innovations and expanding opportunities for students in the basic subjects of reading, math and science, the enriching subjects of art, physical education and music, and the specific subjects that have been included in the expanded industrial arts and vocational programs at the junior and senior high schools.

There has been an on-going in-service training program for teachers. This has been highlighted by the creation of a staff development committee which has worked significantly and appropriately to develop an organization which will enable teachers to become re-certified for their teaching positions with the emphasis on needs of the local system and the approval of the local authorities. Previously, courses were taken which might or might not have been related to an individual teacher's program.

We need to look ahead to certain concerns. New regulations are developing for the education of handicapped children. The age for which public schools will have to provide education for handicapped students is uncertain. It might be from 6 to 21, 0 to 21, or 3 to 16. Also uncertain is the question of funding. Once again, we do not know if state or federal authorities will impose on school systems regulations without adequate support.

We can also expect federal regulations from the Civil Rights and Human Rights Commissions in the field of Bilingual Education. Apparently if there is any significant ethnic group within the community, the public schools will be obligated to provide special programs for that group. We shall follow developments in this field very closely.

Earlier, the matter of providing space and programs for students from the parochial schools was mentioned. We have cooperative programs between the two school systems. However, we must always be conscious of how we might accommodate more pupils in the event of an increased number of transfers or school closings. The physical facilities from grades 7 to 12 are now adequate for any number of local transfers which might occur. Burgess School is currently badly overcrowded for grades five and six, but a few more students could be accepted. Any significant number of transfers for the lower grades would require more classroom space in the community.

The public school system continues to try to serve the needs of all the children. Meeting these needs means that there must be a comprehensive academic program and that there must be provisions for the very able child and for the handicapped child. Over and above classroom accommodations, there must be opportunities for the development of the child's intellectual and physical potential.

We maintain a constant concern for the educational welfare of the children of Berlin. This concern is for an educational program which will enable them to be knowledgeable and productive members of society and good citizens of the community in which they live.

Lawrence W. Dwyer,
Superintendent of Schools

NO SCHOOL DAYS

The procedure for announcing "No School" days remains unchanged. When the weather is bad and school is in attendance parents are urged to use their own judgment concerning sending their children to school. The local radio stations will be used for important school notices. Both WMOU and WBRL will provide "No School" notices.

CITY CLERK'S REPORT

This year's report will follow closely those of other years in form as we deal briefly with the work accomplished during the period from February 1, 1975, to June 30, 1976.

- 799 Financing statements, mortgages, sales were filed and indexed.
- 161 Termination statements were processed.
- 13,015 Motor Vehicle permits were issued (Staggered registrations meant some registrations were issued and renewed for the same party twice within 6 months).
- 1,291 Dog licenses were issued.
- 5 Taxi licenses were issued.
- 37 Taxi driver's license applications were taken.
- 15 Pool table licenses were issued.
- 30 Bowling alley licenses were issued.
- 178 Marriage licenses were issued.
- 407 Birth certificates were issued.
- 227 Death certificates were received and recorded.

Copies of all vital statistics were forwarded to Concord and copies of all birth certificates were prepared and mailed to the parents.

Deaths were issued and recorded for cemetery lots, and orders issued for digging of all graves in the city cemeteries.

Monthly labor reports were mailed to Concord.

As Clerk of the City Council, the minutes of the meetings of the Council as well as those of public hearings were recorded, and all correspondence in connection with the meetings indexed and filed.

The City Clerk also acts as an agent for the Fish and Game Department.

Respectfully submitted,

Olivette M. Dumas,
City Clerk

ASSESSORS' REPORT

The following is a summary inventory of taxable property in the City of Berlin for the year 1975.

Real Estate-Land & Buildings	45,295,320

FIRE DEPARTMENT

The Fire Department is responsible for the protection of persons and property from fire. This includes fire prevention as well as fire-fighting. The department is also responsible for electrical service to other City departments.

The total number of full-time personnel is 28. This includes the Chief, three Assistant Chiefs, three Captains, the City Electrician, one Linesman, and 19 Firefighters. In addition, there are 24 Call Men.

The Department is housed in two buildings and operates ten vehicles, including four pumps, one ladder truck, one tank truck, one four-wheel drive jeep, one electrical utility truck, one electrical bucket truck, and the Chief's car.

Norman Lacroix,
Fire Chief

PUBLIC WORKS DEPARTMENT

The following is a brief report of the activities of the Public Works Department.

- Some 107 catch basins and manholes were installed or repaired.
- The Department, along with Bell & Flynn, Inc., seal-coated 63,292 sq. yds. of City streets.
- The Department purchased 1,400 tons of hot top and cold patch for City streets.
- The City constructed 2,268 sq. yds. of road into the Jericho Lake Recreation Area, with the exception of some grading along the road's edges.
- Again this year the Department collected and disposed of 1,700 tons of garbage at the sanitary landfill.
- The Department took care of 135 spring clean-up calls and 40 fall clean-up calls.
- The Department laid some 3,314 lineal feet of curbing and constructed or re-surfaced about 1,500 feet of sidewalk.
- Sweeping of streets was accomplished by using one power sweeper all summer long.
- The regular care of the cemeteries was carried on throughout the year.
- The Department spread some 4,436 tons of road salt last winter.
- A total of 5,553 yds. of gravel was purchased from Brown Company for City use.
- The Department hauled 30,851 yds. of gravel for the construction of the Jericho Lake road.

Sewer line construction on Grafton Street.

COMMUNITY DEVELOPMENT DEPARTMENT

Re-use plans for the St. Anne's-Androscoogin Valley Hospital complex are being prepared with C.D. funds.

Among its major accomplishments of the past year, the Department:

1. Established and organized a departmental structure and administrative process that will assure the smooth flow of federal community development monies into Berlin.
2. Brought federal grants to Berlin during FY 75-76 having an equivalent value of \$5 against the tax rate.
3. Established a Home Improvement Loan Interest Rate Subsidy Program that has, as of March 1, 1976, awarded \$36,010 in interest rate subsidies to 38 owners of residential properties. These subsidies have stimulated \$142,890 worth of housing improvements in Berlin's older, denser neighborhoods.
4. Prepared a comprehensive, detailed transportation plan and program for future improvements to Berlin's roads and streets.
5. Installed streets, water lines and sewer lines at the municipal Maynesboro Industrial Park and completed the construction of parking lots and loading areas at the municipal industrial building.
6. Accomplished staff work assisting the Berlin Industrial Development and Park Authority in its sale of an industrial building facility to Paper Sales Corporation (EMCA).

Other important and diverse activities of the Department have included: Assisted the Zoning Board of Adjustment in reviewing the rezoning for the new Androscoogin Valley Hospital; attended numerous meetings with engineers of the New Hampshire Department of Public Works and Highways to expedite the Route 110 Relocation Project; prepared Berlin's application for certification in the National Flood Insurance Program; drafted an ordinance that reorganized the Industrial Development and Park Authority under Act 162-G; worked to bring scheduled air com-

muter service to Berlin; prepared City of Berlin's position paper on the I-93-Franconia Notch issue; worked with engineering consultants and the Federal Aviation Agency on the Airport Master Plan; helped bring the federal Section 8 Leased Housing Assistance Program (currently funded at \$120,000.00 per year) to Berlin; and worked with the North Country Council and Community Action Program to refine the new rural public mass transportation program and better tailor it to Berlin's needs.

Berlin's 1976 application to the Department of Housing and Urban Development for federal community development funds summarizes the City's most important community development needs as follows:

- Upgrading of Certain Neighborhoods
- Preservation of Other Neighborhoods
- Solution to Transportation Problems
- Revitalization of the Downtown Area
- Strengthened Economic Base
- Increased Housing Opportunities for the Elderly
- Housing Assistance for Low Income and/or Large Families
- Improved Community Facilities and Services
- Developing a Community Investment Plan

In the future, the Department will continue to develop new programs and activities that work toward meeting these needs. In doing so, it will be helping to carry out the desires of the people of Berlin and their elected leadership for a better tomorrow.

Michael L. Donovan
Community Development Director

RECREATION AND PARKS DEPARTMENT

Mitchell A. Berkowitz

The past seventeen months were the most difficult to plan in terms of leisure time services and the continuous requirements of Berlin residents. The unparalleled increase of inflation and the cost of our supplies left us with a fixed purchasing power and a changing cost market. Our budget projections reflected the difficult task. However, we were still able to stay within the appropriated budget and return 2% back to the city.

The department continued to maintain cooperation between different organizations and departments. Besides being a resource for many programs, we also obtained the use of additional indoor facilities including the Burgess School, the Junior High School, and St. Patrick's gym. This allowed us to increase our programming efforts at a minimal cost and

permit the 13-and-older age group to participate in neighborhood facilities in the evening. Programs such as men's volleyball, women's basketball, youth basketball and volleyball, and sports nights were dependent upon the facilities.

Jericho Lake Park opened one year ahead of schedule in July, 1975. The park operated under difficult circumstances and yet over 9,000 people enjoyed the family swimming, fishing, picnicking, and outings. During the next few years, a major landscaping effort will be undertaken to improve the Jericho Lake Park facilities. Included in the future will be a multi-purpose hiking/cross country skiing trail.

Our summer program entitled "Wagon Full of Fun" allowed more playground and sports programs to be developed, and Berlin youth participated to their hearts' content. One major change was that the swimming and outing program which used to travel to Moose Brook State Park began utilizing Jericho Lake Park for all swimming and outing activities, including our overnight camp-outs.

The Community Gardens, in cooperation with the Community Action Program's Project Green Thumb, expanded the number of lots to 215. Estimated cost of vegetables produced by the Gardeners was \$30,000 with over 1,100 people benefitting.

During our fall and spring seasons new programs complemented our existing programs. Pottery and planting, terrariums and gardening sessions helped the would be "Green Thumb" while our wrestling, "spring is fun" day, snowmobile swap, and pre-school story hour added alternatives for participation. Results from the new programs were favorable, again supporting the Recreation and Parks Commissioners' feelings that Berlin residents want a variety of new leisure activities.

During this period, our department cooperated fully with the Berlin Bicentennial Committee to support the 1975 Summer Festival, the Burning of the Green, and Winter

Carnival activities. I anticipate that we will remain involved with Bicentennial programs, as well as assist in future community-wide programs.

While we were able to increase our programs and keep our costs for them rather low, our maintenance costs increased. This was due to the increase in the number of park acres under our management as well as contractual and vehicle operation costs. In the future, maintenance programs will continue to manage all parklands. However, new equipment and up to date maintenance procedures should allow us to keep up with our obligations.

Looking ahead, the Berlin Recreation and Parks Department will continue to provide year-round leisure activities and programs with a greater emphasis on providing assistance to local groups for their leisure enjoyment.

WELFARE DEPARTMENT

Maurice A. Belanger

FEBRUARY 1, 1975 to JANUARY 31, 1976

Direct Assistance

88 cases involving 273 people. This included 72 families and 16 single individuals.

Aid Furnished to Veterans and Their Families 30 cases involving 96 people. This included 21 families and 90 single individuals.

Board & Care 1 person

Old Age Assistance 134 people

Aid to the Permanently and Totally Disabled 57 people

County Cases 3 cases, all single individuals

Gorham Case 1 case involving a family of 8

Transferred to the County 4 cases, all families, involving 15 people.

In all, this department assisted a total of 318 cases involving 587 people.

A total of 756 orders were issued.

FEBRUARY 1, 1976 to JUNE 30, 1976

Direct Assistance

57 cases involving 180 people. This included 42 families and 15 single individuals.

Aid Furnished to Veterans and Their Families 13 cases involving 48 people. This included 10 families and 3 single individuals.

Board & Care 2 people

Old Age Assistance 120 people

Aid to the Permanently and Totally Disabled 50 people

In all, this department assisted a total of 242 cases involving 400 people.

A total of 311 orders were issued.

Five cases, involving 14 people, were transferred to the County during this period.

I herewith submit my report as Overseer of Public Welfare for the 17-month period from Feb. 1, 1975 through June 30, 1976.

All people who applied to the department for aid were either counselled, referred to another agency which could better serve their needs, or helped by this department in accordance with the New Hampshire welfare laws.

Statistically, this report is divided into two parts. The first covers the period from Feb. 1, 1975 through Jan. 31, 1976, and the second covers the period from Feb. 1, 1976 through June 30, 1976.

Maurice A. Belanger,
Overseer of Public Welfare

BERLIN HOUSING AUTHORITY

URBAN RENEWAL

The Cole Street Salvation Army Community Center was opened to the public in 1975. Completion of the 6500 square foot masonry structure brought to eight the number of new buildings erected on urban renewal land since 1971, the year when the Cole Street area's first new building (the North Country Bank) was completed. Including the structure built on upper Jericho Road to house the beverage distributorship displaced by urban renewal, the number of new buildings in place to date as a result of the Cole Street urban renewal project totals nine.

Urban renewal parcels remaining to be developed at year's end included: a) parcel C-2, a commercial piece fronting on Pleasant Street and bisected by the Dead River; b) parcel P-2, a public parking area located on Cole Street; c) parcel R-3, a residential piece of land with frontage on York Street; and d) parcel S-2, a 60-foot wide strip of land which parallels the Grand Trunk right-of-way and marks the project's northwesterly boundary. S-2 has been acquired and cleared for the construction of new Granite Street.

It is expected in 1976 that the City will purchase, surface, and landscape P-2 for public parking with money remaining from an appropriation previously made.

Also expected to be settled in 1976 is the course of action to be followed with respect to the construction of new Granite Street, i.e., whether it is to 1) span the Dead River and connect Green and York Streets, or 2) be built as a service road providing vehicular access to the Parkside Apartments complex from Green Street only.

Another item of unfinished business is repair of the Dead River channel walls through Parcel C-2. Inasmuch as the Department of Agricul-

ture's Soil Conservation Service (SCS) has stated that it does not intend to participate in the rebuilding of these walls (an action initially proposed by SCS and the City in the 1965 Dead River Watershed Work Plan) and the poor repair of the walls adversely affects the marketability of Parcel C-2, the Authority plans to investigate what must be done to restore them to a satisfactory condition.

PUBLIC HOUSING

During 1975, there was a change in occupancy in only one of the 55 units of public housing owned and operated by the Authority. At year's end there were more than 125 applicants on the waiting list for one of the 55 apartments and the average rent being charged the Authority's tenants was less than \$55 per month, included in the monthly rent are heat, hot water and electricity.

SECTION 8-EXISTING

At the invitation of HUD, the Authority in 1975 filed an application for 54 units of Section 8-Existing Housing. This application was approved and the Authority received a grant of money with which to assist lower-income families lease decent, safe, and sanitary housing without having to pay a disproportionate share of their incomes for rent. This is accomplished by the Berlin Housing Authority making housing assistance payments to owners on behalf of participating families occupying dwelling units located in Berlin.

To be eligible for assistance, a family's total income may not exceed the following limits:

	Number of Persons Per Family			
1	2	3	4	
\$5,350	\$6,900	\$7,750	\$8,600	
5	6	7	8	
\$9,150	\$9,650	\$10,200	\$10,750	

Thus, for example, a family of four having a total annual income of no more than \$8,600 may be eligible for assistance from the Authority.

For the purposes of this program, the term family includes a single person if said person is either elderly (at least 62 years of age), disabled, handicapped, or displaced.

The housing assistance payment will be the difference between the lease rental for an approved unit and the family's portion of said rental. In most cases, the family's contribution will amount to twenty-five percent of its monthly income after allowances. Housing assistance payments will be made directly to the owner in accordance with the terms of a Housing Assistance Payments contract between the owner and the Authority. The term of this contract will be for one year.

Existing housing which is located in Berlin and meets quality standards/housing code requirements may be used in this program.

AUTHORITY BOARD

Mr. Romeo Blouin was re-appointed to the Board in February of 1976. He has been a member of the Authority since January of 1966 and serves as its Vice-Chairman.

CIVIL DEFENSE DEPARTMENT

The City of Berlin, through the Civil Defense Unit, participates in the Federal Government's Personal and Administrative Program which reimburses 50% of the administrative expenditures of the Civil Defense office. Also, the Federal Surplus Property Program is made available to City departments and many items can be purchased at small costs. Supplies are obtained from the N. H. Distributing Agency's warehouse in Concord.

During the month of October, 1975, an "emergency training" session was held in which personnel from all City departments participated. Mr. Kenneth Fields of the Civil Defense Education Department of the University of New Hampshire directed this training, which was held at the National Guard Armory in Berlin.

The Auxiliary Police Unit is very active in training members in police work and when available has assisted the regular Police Department. Competitive target-shooting contests are held at the Ingersoll Field, which is located on the East Milan Road. Various instructive training movies are frequently shown at regularly held meetings to help members understand their responsibilities and duties. Through the individual efforts of the Auxiliary Police, and emergency vehicle has been obtained. No funds were taken from the city budget.

During this past year, Mr. George E. McAvoy has been appointed by Gov. Meldrim Thomson, Jr., as State Civil Defense Director.

The local Civil Defense office is open Monday and Friday mornings from 8:30 a. m. to 12:00 noon. It is staffed by a part-time clerk.

Roma E. Brisson,
Civil Defense Director

BERLIN AIRPORT AUTHORITY

The Berlin Airport Authority had another busy year during FY 1975-76. The firm of Hoyle, Tanner and Associates was employed as consultants to assist the Authority in preparing a new master plan for the future development of the Airport. The plan is expected to be completed in 1977.

David Piche, Airport Manager and fixed base operator at the airport, left to assume a new position in Laconia. Robert Dalphonse was selected by the Authority to replace him. All of the pilots as well as the Authority members will miss Dave and wish him success in his new job. We are confident, however, in Bob Dalphonse's ability to meet the needs of our business and private flying community at the airport. We hope that a new spirit of management-customer relations will be established.

A new try at Berlin and Whitefield commercial air service to Boston was made during the past year. The project was devised and administered by the White Mountains Region Association, under the direction of Mr. Ned Pinkerton, and was funded by the New Hampshire-Vermont Development Council. The commercial flights showed some success and it is hoped that commercial air service for the North Country can be re-established on a permanent basis in the future.

Another project begun in FY 1975-76 was the replacement of the hazard warning beacons on hillsides surrounding the airport. Work began this past summer but as costs mounted it was decided to apply for Federal Aviation Administration assistance. Credit will be received for the materials already purchased towards the Authority's matching share of the anticipated grant. We hope the work can be completed next spring.

Regrettably, there was no air show at the airport during 1976 due to the lack of a sponsor, though several thousand people attended the 1975 show. The Authority is continuing to look for a sponsor for a 1977 airshow.

INDUSTRIAL DEVELOPMENT AND PARK AUTHORITY

The Berlin Industrial Development and Park Authority had a largely successful though at times troubled second year of existence. A \$79,000 grant was received from the Department of Agriculture, Farmers Home Administration, for the complete installation of street utilities and parking areas in the vicinity of the Authority's Industrial Building. Construction of street and utilities was also initiated in the southern half of the Maynesboro Industrial Park under grants from the U. S. Department of Commerce, Economic Development Administration, and U. S. Department of Housing and Urban Renewal totalling \$152,180. This work will be complete in the fall of 1976. A Public Works Employment Act grant is being sought to reconstruct East Milan Road from the 12th Street Bridge to the Industrial Park. A trunk sewer will also be extended in 1977 to connect to the park's internal sewers under an Environmental Protection Agency grant.

Authority members realized when the industrial development promotional body was established that not every one of their efforts would be successful. Over half of all the new businesses started in the U. S. each year fail. The financial collapse of Granite Business Forms, first tenant in the Authority's industrial building, was an unfortunate example. A positive aspect of the business failure, however, was the employment of Coopers and Lybrand, a large national certified public

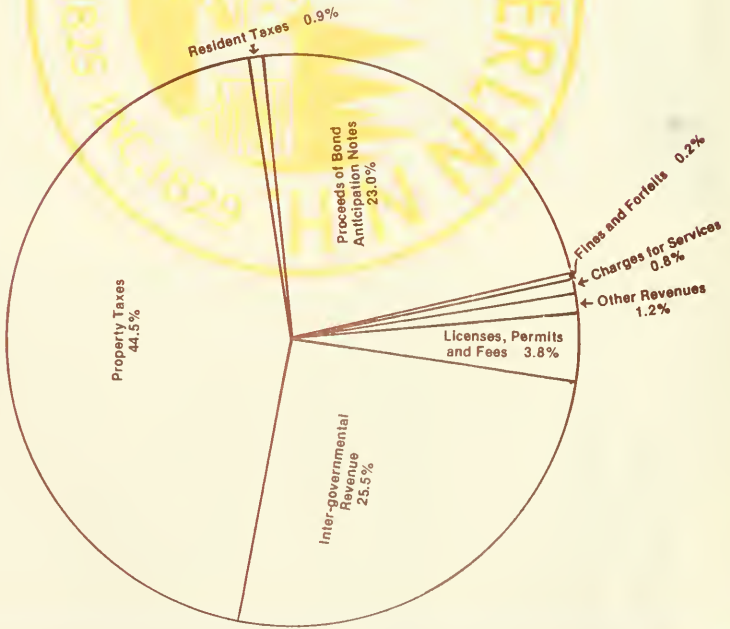

accounting firm, by the City to advise the Authority, audit the financial records and organize the Authority's accounts in a way which more clearly presents the agency's financial status.

The Authority, now composed of 15 members with its new Chairman, Mayor Laurier Lamontagne, and with the assistance of the Community Development Department and the City Manager's office, is presently working with several prospects for permanent new tenants in the building.

Major sources of income for the Industrial Authority during fiscal year 1975-76 included

rental payments from Brown Company and North Country Business Forms, Inc., who are now occupying the industrial building, rental monies received from Plastic Structural, Inc., Berlin Sportswear, Inc., Advance Bearing, Inc., and Echo Electronics, Inc., who occupy space in the Authority's satellite "starter buildings", and proceeds from the sale of the building on Route 110 near the City Garage to EMCA Division of Paper Sales Corporation of New York.

Honorable Mayor, Council and Manager
City of Berlin, New Hampshire

We have examined the financial statements of the General Fund, Industrial Development and Park Authority, Federal Revenue Sharing Fund, Community Development Block Grant Fund and the General Long-Term Debt Group of Accounts, of the City of Berlin for the seventeen months ended June 30, 1976. Our examination was made in accordance with generally accepted auditing standards and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

The financial statements of the City of Berlin Capital Projects Fund, Airport Authority and Parking Meter Fund for the seventeen months ended June 30, 1976 have not been included in the accompanying financial report. However, we have examined the financial statements of such funds and they are included in our separate report dated September 3, 1976 on all funds (except Cemetery Trust Funds and the Berlin Water Works) and the General Long-Term Debt Group of Accounts of the City of Berlin.

In our opinion the financial statements referred to in the first paragraph above present fairly the financial position of such funds and the General Long-Term Debt Group of Accounts of the City of Berlin at June 30, 1976 and the results of operations of such funds for the seventeen months then ended and the changes in financial position of the Industrial Development and Park Authority for the period from inception, July 15, 1974 to June 30, 1976, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

Portland, Maine

GENERAL NOTES TO FINANCIAL STATEMENTS

Summary of Significant Accounting Policies

The following is a summary of significant accounting policies employed in the preparation of these financial statements.

Fund Accounting

The diverse nature of governmental operations and the necessity of determining compliance with legal provisions requires modification of accounting systems commonly used by commercial enterprises. Rather than establishing a single unified set of accounts to record and summarize all financial transactions, the accounts of the City are organized on the basis of funds and account groups, each of which is considered a separate entity with self-balancing accounts that comprise its assets, liabilities, reserves, fund balance, revenues and expenditures or expenses, including interfund obligations and transfers.

There are two general categories of the City's operations. The first consists of operations supplying the basic services of a general government nature which are controlled by legal budgets. These operations are accounted for in the General Fund and Special Revenue Funds. The second consists of those operations which are similar to commercial enterprises. These operations are accounted for in the Industrial Development and Park Authority.

In addition to the two general categories of operations, a further distinction from accounting in commercial enterprises exists with respect to capital expenditures. Capital expenditures of the Industrial Development and Park Authority are recorded as investments, at cost, held for subsequent sale. Other capital expenditures are required to be capitalized at historical cost in a General Fixed Asset Group of Accounts primarily for control purposes. The

City has not maintained a record of its general fixed assets, and accordingly a statement of general fixed assets, required by generally accepted accounting principles, is not included in the financial report.

Fiduciary activities of the City are accounted for in Trust Funds. The Cemetery Trust Funds of the City have not been examined by us, and accordingly, are not included in this report.

General Obligation bonds supported by general revenues are obligations of the City as a whole and not its individual constituent funds. Accordingly, such unmaturing obligations which are backed by the full faith and credit of the City are accounted for in the General Long-Term Debt Group of Accounts, except for the bonds which are to be repaid from revenues of the Industrial Development and Park Authority and the Berlin Water Works.

Budgetary Accounting and Encumbrances

General governmental revenues and expenditures accounted for in the General Fund are controlled by a formal integrated budgetary accounting system in accordance with various legal requirements which govern the City's operations.

Appropriations in the General Fund are encumbered upon issuance of purchase orders, contracts or other forms of legal commitments. Even though certain goods and services have not been received, the transactions are accounted for as a reduction of budgeted appropriations in the year that the commitment is made.

Basis of Accounting

The accounts of the Industrial Development and Park Authority are maintained and reported on an accrual basis. All other funds included in this financial report are maintained and reported on the modified accrual basis.

Under the modified accrual basis of accounting, revenues are recorded when received in cash except in cases where they are both measurable and available and therefore are resources which may be appropriated. Expenditures, except for interest on general long-term debt which is recorded when it becomes due, are recorded when certain goods or services are received and actual liabilities are incurred.

Basis of Presentation

As authorized by Chapter 172 of the Laws of 1975 of the State of New Hampshire, the City elected to change its fiscal year-end from January 31 to June 30 of each year. In order to accomplish this change the City adopted a General Fund budget (on January 21, 1975) for the twelve-month period ended January 31, 1976 and a budget (on September 29, 1975) for the five month transitional period ending June 30, 1976. As a result of this change all financial statements of the various funds of the City included in this report have been prepared for the seventeen-month period ended June 30, 1976.

Other General Accounting Policies

Substantially all employees of the City are covered under the State of New Hampshire Retirement System, Employees of the Public Works Department and certain Recreation Department personnel are covered under a City sponsored plan. Pension costs are actuarially determined and include amortization of prior service costs over periods of 20 and 24 years. The City's policy is to fund pension costs accrued. The amount, if any, of the value of vested benefits in excess of the assets of the pension fund is not available.

Employees may accumulate unused sick leave. A portion of unused sick leave is paid upon termination. The City's policy is to recognize cost of sick leave only at the time payments are made.

**GENERAL FUND
NOTES TO FINANCIAL STATEMENTS**

- For years prior to the seventeen-month period ended June 30, 1976, the City had recorded amounts available from the State of New Hampshire for Town Road Aid as a payroll and expense vouchers for approved projects, revenue should not have been accrued. Accordingly, renewals of prior periods were overstated by \$148,939 and fund balance as reported at January 31, 1975 has been reduced by a like amount. Amounts available from the State of New Hampshire for Town Road Aid have been recorded as a receivable and offset by a contra reserve.
- To defray the additional costs resulting from the adoption of a seventeen month transitional fiscal year beginning February 15 and ending the following June 30, 1976, the City issued \$2,000,000 of short-term notes, however, since the bonds were issued on August 26, 1976, the short-term notes are presented in the Statement of General Long-Term Debt (see page 47).
- There are various claims and suits pending against the City which arise in the normal course of its activities. The City's management and legal counsel believe that the City has a reasonable disposition of these various claims and suits will not have a material effect on the financial position of the City.
- Total pension expense of the General Fund for the year was \$156,837.
- Materials and supplies are considered expended when purchased and inventory is not reflected in the financial statements.
- Reserve for designated improvements contains the unexpended appropriations from the current and previous years identified by the City Council for the following purposes:

School Department—programming costs	\$ 4,000
City Department—CR progr. costs—Bridge Repairs & OSHA	17,178
Urban River Dept—parking lots	20,888
Dead River Project—soil conservation	5,050
Recreation—Jericho Brook	2,724
Special School Account	11,051
Town Road Aid Funds	51,924
	<u>\$112,825</u>

See accompanying notes to financial statements

**INDUSTRIAL DEVELOPMENT AND PARK AUTHORITY
NOTES TO FINANCIAL STATEMENTS**

**FEDERAL REVENUE SHARING FUND
ANALYSIS OF CHANGE IN FUND BALANCE
for the seventeen months ended June 30, 1976**

1. The Industrial Development and Park Authority was established July 15, 1974, pursuant to Chapter 28 of the Laws of 1974. The Authority was re-established on September 1, 1975, pursuant to the Industrial Development and Park Authority Act, Chapter 177A of the Laws of 1975, for the purpose of promoting economic development, and disposal of industrial land and facilities, in accordance with the provisions of RSA 162-G. The City was empowered to transfer title to certain industrial facilities owned by the City to the Authority.

For the period from inception, July 15, 1974, to January 31, 1975 the only activities occurring were the issue of \$480,000 of bonds and the payment of building construction costs. On February 1, 1975, the Authority received the first payment from the General Fund. Subsequent to January 31, 1975 the Authority has been established as a separate entity for complete reporting purposes. The statement of changes in financial position includes all financial activity from inception, July 15, 1974.

2. Investment property is valued at cost, which is not in excess of net realizable value. Cost includes approximately \$30,000 of interest on the 8% serial bonds payable during the construction period. The investment property is being held for sale and accordingly, depreciation has not been provided. Rental income may be received until the property is sold.

3. The 8% serial bonds were issued on October 1, 1974 to finance the construction of the industrial building. These bonds, and interest thereon, although general obligations of the City, are to be repaid from proceeds of sales or rental income.

4. Contributions from the municipality represent the value of property transferred from the City to the Authority. The property, consisting of land appraised at \$12,000 and a building constructed at a cost to the City of \$27,345, was subsequently sold for \$52,500 to EMCA, Inc. with a 6 year mortgage note at 7% interest.

Contributions from the federal government represent the receipt of federal funds for the acquisition of land and the construction of the industrial building. The federal programs providing contributions are as follows:

- a. Federal Revenue Sharing
- b. Farmer's Home Administration
- c. Community Development Block Grant

\$135,850
79,000

Excess of expenditures over revenues	<u>\$160,183</u>

**FEDERAL REVENUE SHARING FUND
NOTES TO FINANCIAL STATEMENTS**

1. The Federal Revenue Sharing Fund has been established to account for the receipt of Federal Revenue Sharing entitlements and to transfer funds to the General Fund in accordance with plans and programs reflected in the annual General Fund budget. Expenditures may be made directly from the Fund. Transfers made to the General Fund during the seventeen months ended June 30, 1976 were used for the following purposes:

Public safety	\$ 64,974
Transportation	320,826
Recreation	7,035
Education	1,754
Social services	9,202
General government	68,000
Economic development	12,447
Other	
	<u>\$485,000</u>

2. The financial statements at January 31, 1975 did not reflect a payable to the General Fund of \$127,453 and expenditures for the year ended January 31, 1975 were understated by \$127,453. Accordingly, Fund balance at February 1, 1975 has been restated. The City has accrued a final payment of \$192,709 to reimburse the State of New Hampshire for the City's share of costs for the Twelfth Street Bridge Project.

COMMUNITY DEVELOPMENT BLOCK GRANT FUND

BALANCE SHEET, June 30, 1976

ASSETS

Due from Federal Government

\$3,247

LIABILITIES

Due to General Fund

\$3,247

COMMUNITY DEVELOPMENT BLOCK GRANT FUND

STATEMENT OF REVENUES AND EXPENDITURES

for the seventeen months ended June 30, 1976

Revenues:		
Entitlement grant	\$74,500

Code enforcement	949	
Rehabilitation loans and grants	50,000	
Payment of interest on Federal shares	15,951	
Planning and management development	11,318	
Administrative	16,292	
Contingencies	1,262	97,747
Excess of revenues over expenditures	\$ --	\$ --

COMMUNITY DEVELOPMENT BLOCK GRANT FUND

NOTE TO FINANCIAL STATEMENTS

1. The Community Development Block Grant Fund was established by the City in February 1975 to account for the funds the City will receive in accordance with the Community Development Block Grant Act of 1974. The Year 1 entitlement amount of \$155,000 and discretionary amount of \$20,000 will be available to the City on a basis with funds to be expended for program activities established within the approved Community Development Budget. In general, CDBG funds may be used for any community development activity except certain public facilities, new housing construction, or operating and maintenance expenses.

STATEMENT OF GENERAL LONG-TERM DEBT

June 30, 1976

General obligation serial bonds:	
Amount to be provided:	
School bonds	\$2,685,000
Sewer bonds	55,000
Public improvement bonds	210,000
Bond anticipation notes (Note 2)	2,000,000
	<u>\$4,950,000</u>

AMOUNT TO BE PROVIDED FOR THE

PAYMENT OF GENERAL LONG-TERM DEBT (Note 1)

General obligation serial bonds payable	\$450,000
General obligation serial bonds payable	94,000
	<u>\$544,000</u>

GENERAL LONG-TERM DEBT PAYABLE

General obligation serial bonds payable

\$4,950,000

STATEMENT OF GENERAL LONG-TERM DEBT

NOTES TO FINANCIAL STATEMENTS

1. The amount to be provided for payment of general long-term debt does not include \$450,000 of 8% serial bonds which are to be paid from revenues of the City, as these bonds are to be paid from revenues of the Industrial Development and Park Authority and are included as a liability of that Fund.

2. On August 26, 1976 the City converted the \$2,000,000 bond anticipation notes to 5.375% bonds payable over ten years to 1986. This bond issue was authorized under Chapter 172 of the Laws of 1975 to finance the cost of converting to a June 30 fiscal year and to meet the debt covenants and indebtedness of the City for the purpose of determining the City's borrowing capacity.

3. On August 26, 1976 the City issued \$1,770,000 of 6.2% general obligation serial bonds, repayable over twenty years to 1996. The proceeds are to finance a new water filtration treatment plant for the Berlin Water Works. The bonds, although general obligations of the City, will be repaid from Water Works revenues, and accordingly, will be recorded as a liability of the Berlin Water Works.

GREEN SQUARE, LOOKING SOUTH TOWARD
GLEN AVENUE AND EXCHANGE STREET,
ABOUT 1905.

Almost overnight, Berlin had developed from a sleepy frontier village into a thriving industrial city, the fifth largest in the state. The population had risen to almost 11,000 people -- and nearly 800 horses. The fountain served as a watering trough for the latter.
