STRAFFORD REGIONAL PLANNING COMMISSION

At the annual Town Meeting, March 10, 1970, Madbury voted to become a member of the Strafford Regional Planning Commission. The Regional Planning Commission is authorized by New Hampshire statute to provide an agency and forum through which the communities within the region could approach and solve problems. To strengthen regional planning, federal aid to communities and states for planning and for most development programs now require participation in a regional planning group. New Hampshire has 17 planning regions delineated by the State Planning Office. The Strafford Planning Region includes the 13 municipalities of Strafford County and 2 — Nottingham and Newmarket — of Rockingham County.

Current members of the Strafford Regional Planning Commission are Dover, Durham, Madbury, Newmarket, Rollinsford, and Somersworth. Each community is entitled to 2 representatives except that Dover with a population over 10,000 is entitled to three. The powers of the Commission are advisory; the duties of the Commission are to provide guidelines in a comprehensive plan to the communities for the most appropriate development of the resources, environment, facilities, and services of the Planning Region.

The Strafford Planning Commission was established in 1967 and did prepare a preliminary plan for the extension of short and long range water and sewer systems — before Madbury joined. Madbury could benefit from this design which projects Dover and Durham systems spreading out to serve Madbury in certain areas. The Madbury Water Board is particularly interested in these developments.

Since Madbury and Newmarket joined in March, 1970, a contract has been made with the State Planning Office for the services of consulting planners to set up an overall design for planing during the next five years in the Strafford Planning Region. An executive director has been secured to begin his duties March 1. A budget of \$25,000 for director, office and planning consultants was voted to cover the fiscal year July 1, 1971 — July 1, 1972. This program and staff will make member communities elegendible for federal and state assistance and will be able to give help to the member communities in local planning

matters such as building codes, zoning regulations, maps, applications for federal and state aid. Dover has requested priority for a study of solid waste disposal on a regional basis. The problem of solid waste disposal is critical in many of the Region's communities.

I think it has been valuable for Madbury to be "in"—not "out" while the direction and the priorities of this planning group are being determined. It is important to keep the needs and the point of view of the small rural town prominently before the planners and before the larger more urban communities even as we recognize their special needs and our mutual concerns. The Regional Plan should seek to protect the small towns' resources from exploitation and give consideration to our critical problem to improve both tax base and essential services without being suddenly swamped with uncontrolled growth.

MADBURY FIRE DEPARTMENT

February 3, 1971

To the Citizens of Madbury:

The fire department had an average year in 1970.

The forest fire conditions held grass and woods fires at a minimum.

The greatest number of calls were to investigate smoke or reports of small fires.

The largest losses were Colprits Nursery Garden Shop and a mobile house in the Bunker Lane Mobile home park. In both instances the Dover and Durham fire departments assisted.

Our equipment is in good operational condition with usual maintenance to portable pumps and trucks with the exception of the Chevrolet.

Returning from the mobile home fire, an axle on the Chevrolet broke.

The age of the vehicle made procurement of parts difficult.

The obvious need of new equipment prompted the appointment of a committee and the proposal of a new truck to be acted upon at town meeting.

I would like to express the appreciation of the department for your confidence in us as evidenced by the increased appropriation and for the careful use of fire which has kept our fire losses low.
