

Physical Therapy Demolition and Relocation

Peter Girard

M.S. in Project Management

2021

Granite State College

- ***This project is the demolition of the building that held our physical therapy department and the construction of a new space. I selected this project due to the size and complexity of the project. The ability to write the project charter, build a WBS, and follow the course recommendations have made a smooth process. The resulting space is a new and patient friendly physical therapy area that will provide a great service to our community.***

Project Scope

Addison Gilbert
Hospital built in
late 1800's

MEP issues for
demolition

Moves involved
for projects was
extensive

Tools

WBS

Schedule

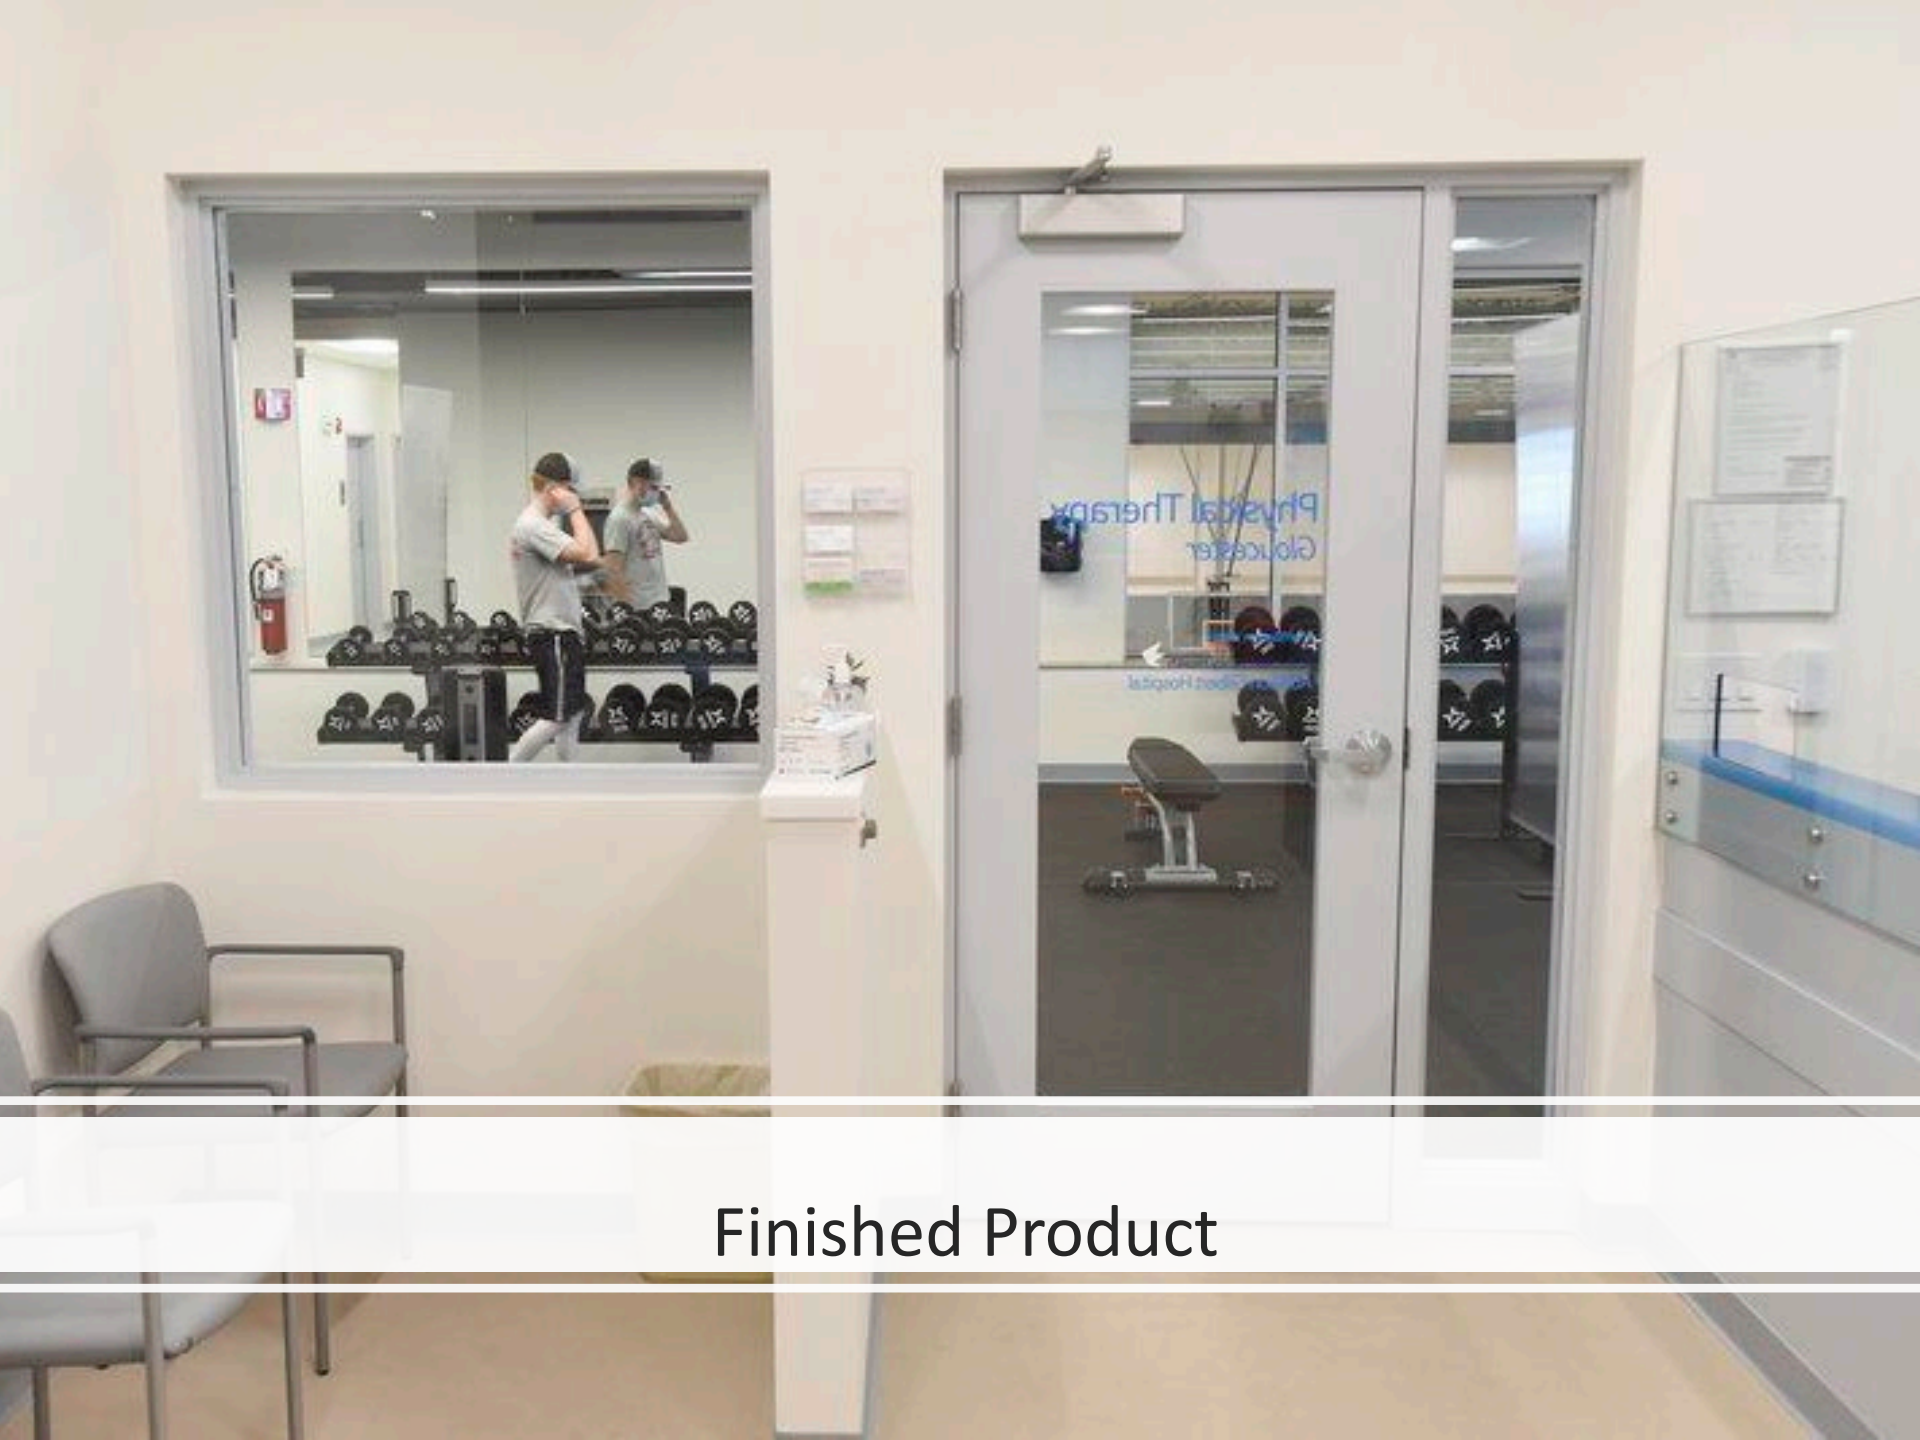

Budget

Tools that I have implemented at work below:

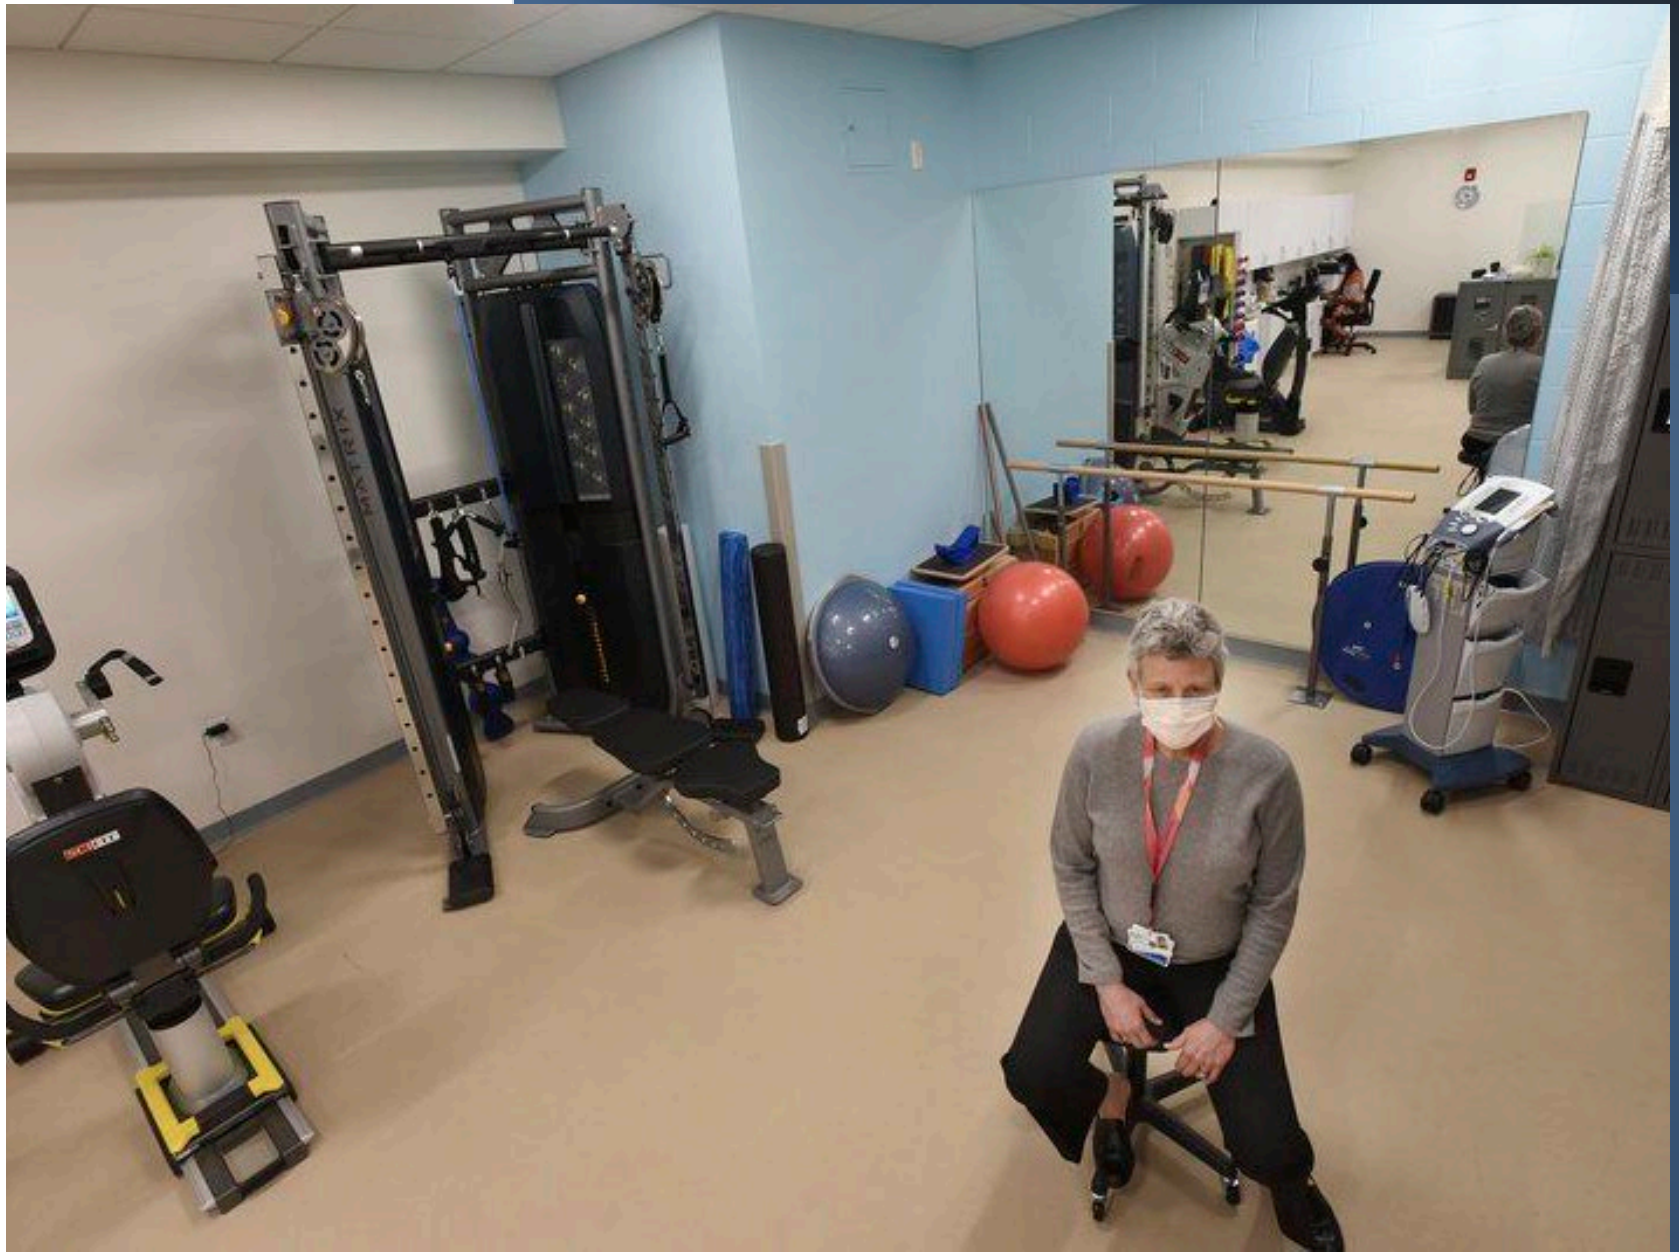

Scope Change process

Quality Management Plan

Procurement Management Plan

Finished Product

Project Management Concept

One of the biggest lessons that I learned from this master's program is the ability to take any problem that we encounter in our workdays can be approached as a project.
