www.unh.edu/survey-center

DURHAM, NH – Incumbent senator Kelly Ayotte and governor Maggie Hassan remain deadlocked for New Hampshire's U.S. Senate seat although Ayotte's favorability ratings have dropped since February. A majority of Granite State likely voters believe the Senate should hold a vote on Supreme Court appointee Merrick Garland and two in five likely voters say Ayotte's position that the Senate should wait until the next president is elected to confirm a nominee has made them less likely to vote for her.

These findings are based on the latest **WMUR Granite State Poll**,* conducted by the University of New Hampshire Survey Center. Six hundred and twenty-one (621) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between April 7 and April 17, 2016. The margin of sampling error for the survey is +/- 3.9 percent. Included were five hundred and fifty-three (553) likely 2016 general election voters (MSE = +/- 4.2%).

2016 US Senate Election

This year's New Hampshire Senate race between incumbent senator Kelly Ayotte and governor Maggie Hassan is one of the most closely watched races in the nation and likely the most expensive election in New Hampshire history. However, because the election is months away, few likely voters have finally decided on who they will support -- just 21% of likely voters say they have definitely decided, 10% are leaning toward a candidate, and 68% are still trying to decide.

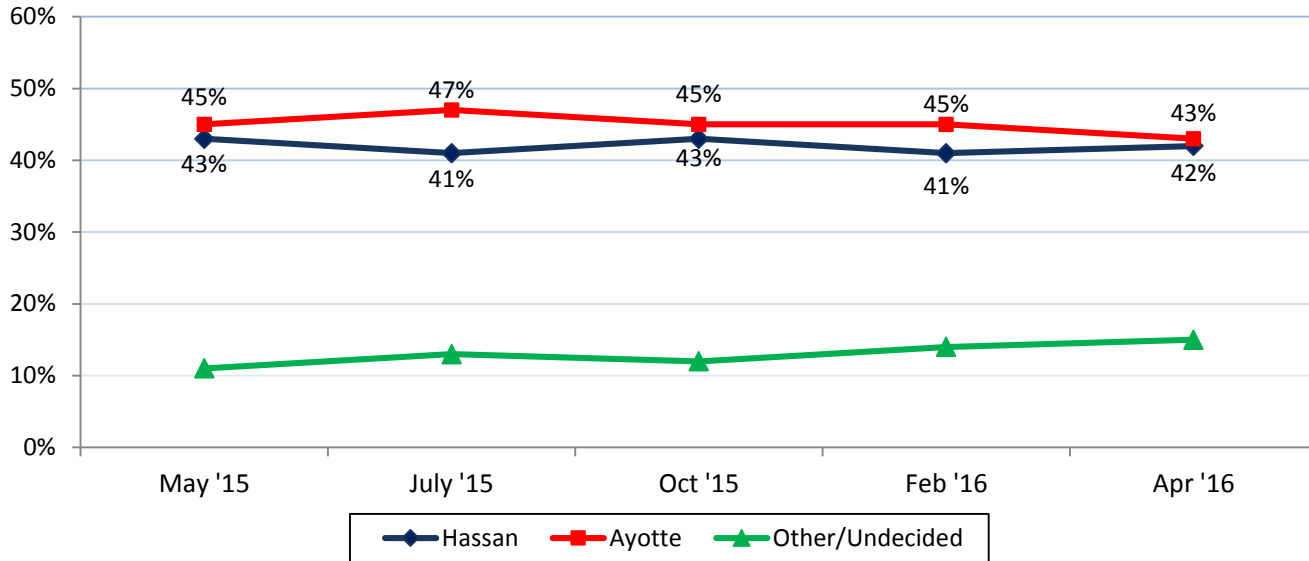

* We ask that this copyrighted information be referred to as *the Granite State Poll*, sponsored by WMUR-TV, and conducted by the University of New Hampshire Survey Center.

2016 US Senate Election – Ayotte vs. Hassan

If the 2016 Senate election was held today, 43% of likely voters say they would vote for Ayotte, 42% would vote for Hassan, 5% would vote for someone else and 10% are undecided. These figures are largely unchanged since May 2015. Ayotte and Hassan hold wide leads among members of their party, Ayotte leads among Republicans 83%-4% and Hassan leads among Democrats 77%-10%, but Ayotte has a 57%-21% edge among Independents.

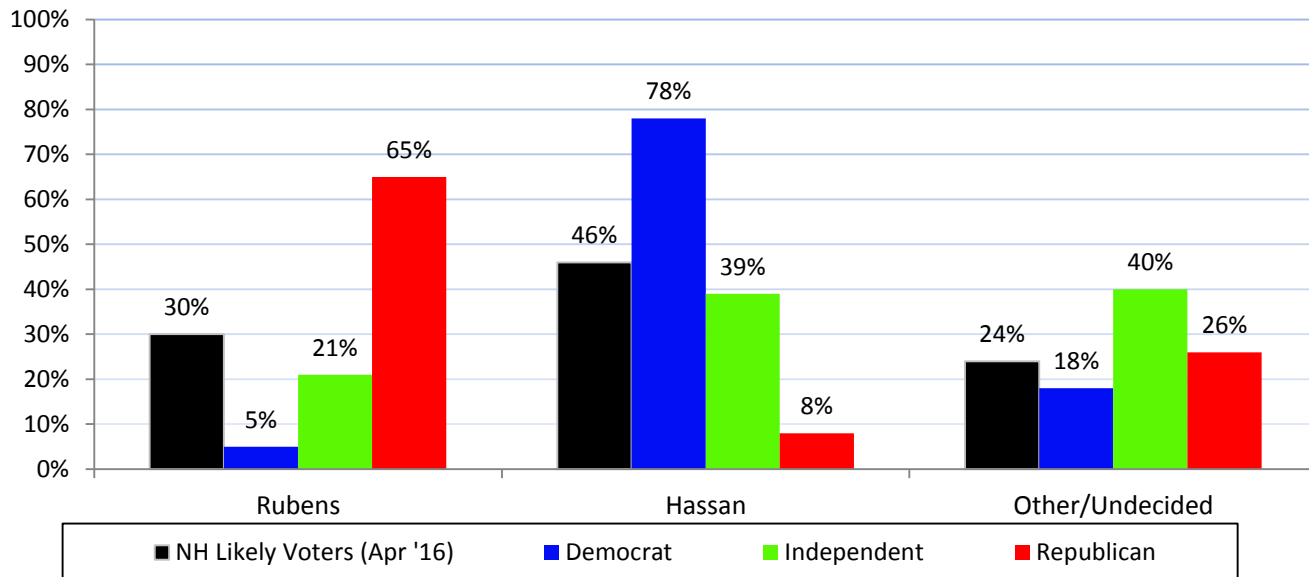

US Senate - Ayotte vs. Hassan

2016 US Senate Election – Rubens vs. Hassan

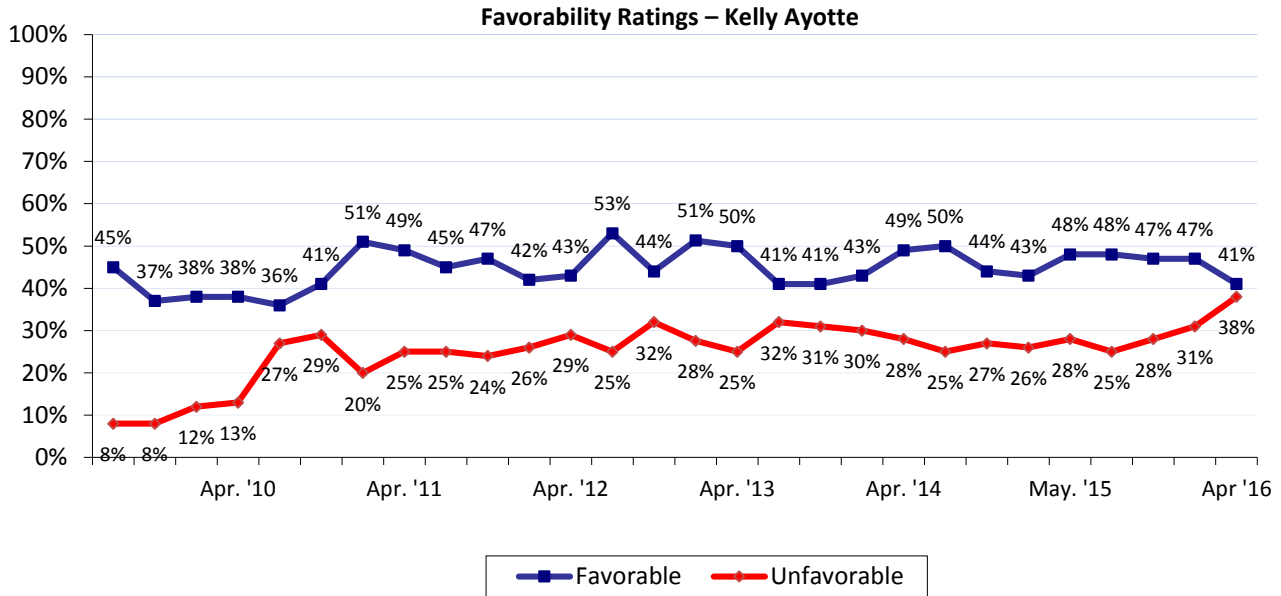

Former New Hampshire state senator Jim Rubens (R-Hanover), who lost to Scott Brown in the 2014 Republican primary for Senate, has decided to challenge Ayotte for the Republican nomination. If an election between Rubens and Hassan was held today 46% of likely voters say they would vote for Hassan, 30% would vote for Rubens, 7% would vote for someone else and 17% are undecided. Hassan has a wide lead among Democrats (78%-5%) and a slight lead (39%-21%) among Independents, while Rubens has a 65%-8% edge among Republicans.

US Senate - Rubens vs. Hassan

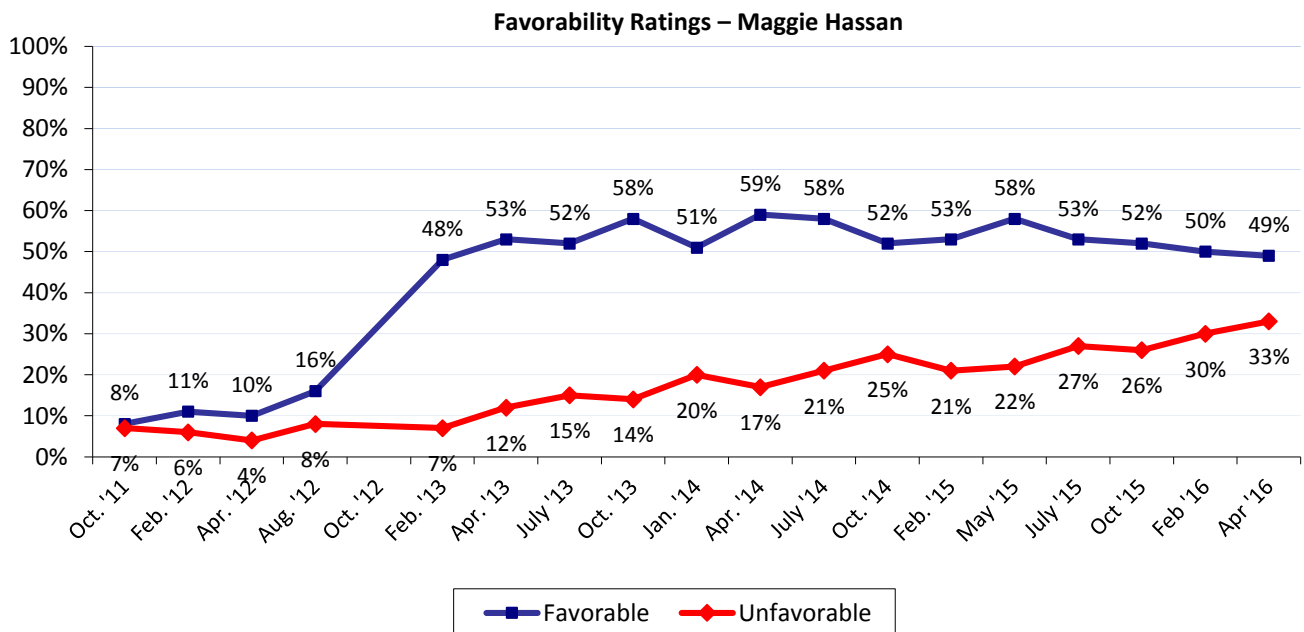

Favorability Ratings – Senator Kelly Ayotte

Senator Ayotte favorability ratings have dropped recent months -- currently, 41% of New Hampshire adults have a favorable opinion of Ayotte, 38% have an unfavorable opinion of her, 8% are neutral and 12% don't know enough about her to say. Ayotte's net favorability rating is +3%, which is down from +16% in February. She remains very popular among Republicans (net favorability rating of +49%), somewhat popular among Independents (+11%) and very unpopular among Democrats (-37%).

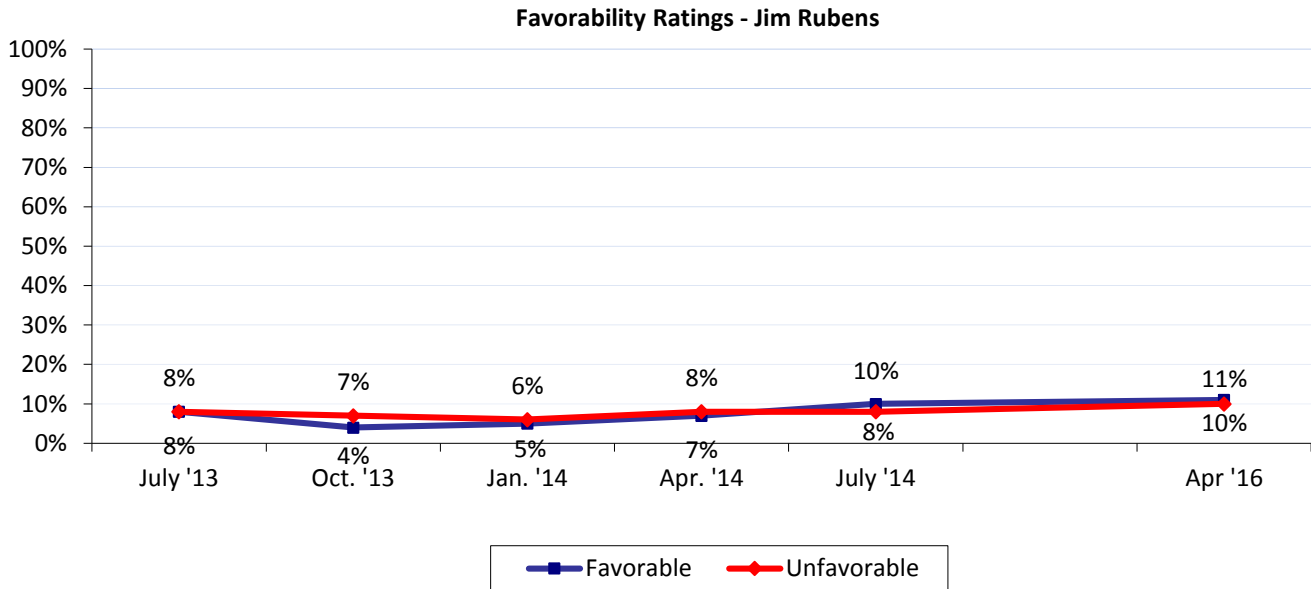

Favorability Ratings – Governor Maggie Hassan

Governor Hassan has remained popular entering the election cycle -- 49% of New Hampshire adults say they have a favorable opinion of Hassan, 33% have an unfavorable opinion, 10% are neutral, and 8% say they don't know enough about her to say. Hassan's net favorability rating, is +16%, down slightly from +20% in February. Hassan is very popular among Democrats (+55% net favorable) and unpopular among Republicans (-27%), while Independents are divided (+3%).

Favorability Ratings – Jim Rubens

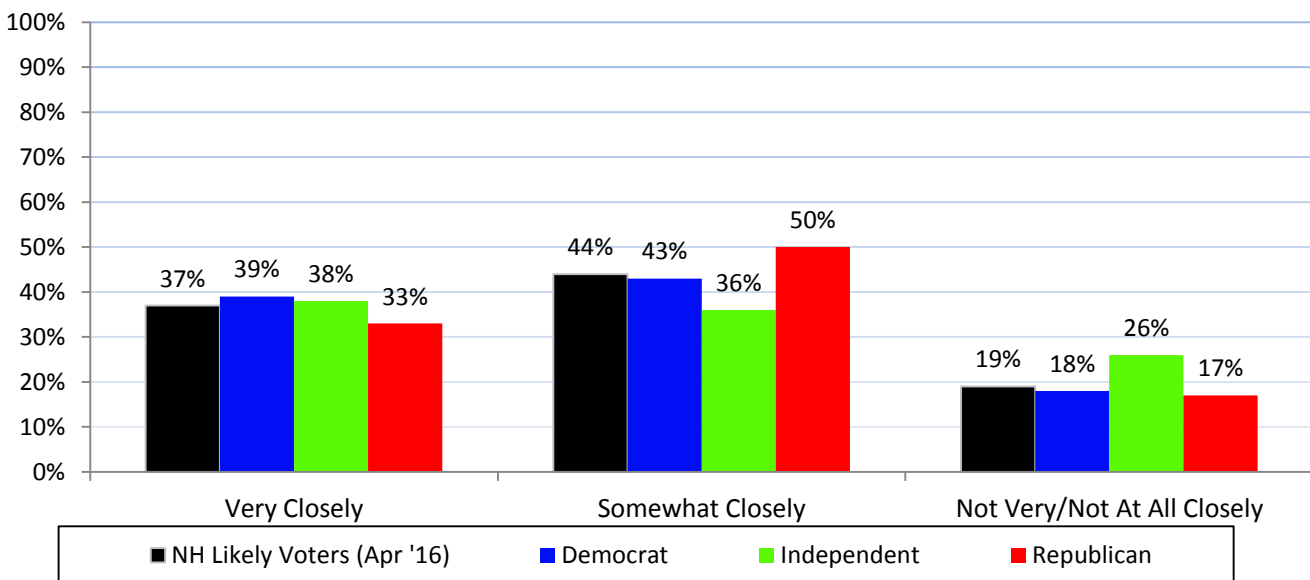

Jim Rubens remains largely unknown in the Granite State. Currently, only 11% of New Hampshire adults have a favorable opinion of Rubens, 10% have an unfavorable opinion, 9% are neutral and 71% don't know enough to say. Rubens' net favorability rating is +1%.

Appointment of Merrick Garland to Supreme Court

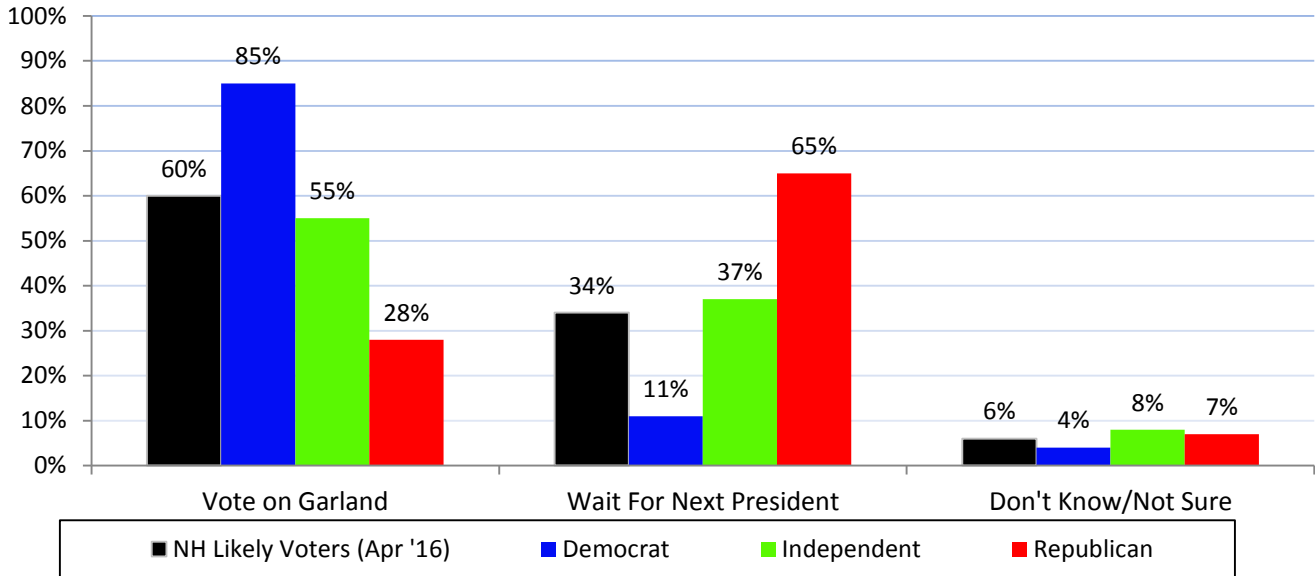

One possible reason for Ayotte's declining popularity is the scrutiny she has faced regarding Obama's appointment of Merrick Garland to the Supreme Court. Senator Ayotte, and most Republicans in the Senate have said the next President should choose the next Supreme Court Justice. This is an issue that most likely voters say they are following at least somewhat closely – 37% are following this very closely, 44% are following it somewhat closely, 12% are following it not very closely and 7% are following it not at all closely.

How Closely Are You Following Supreme Court Appointment?

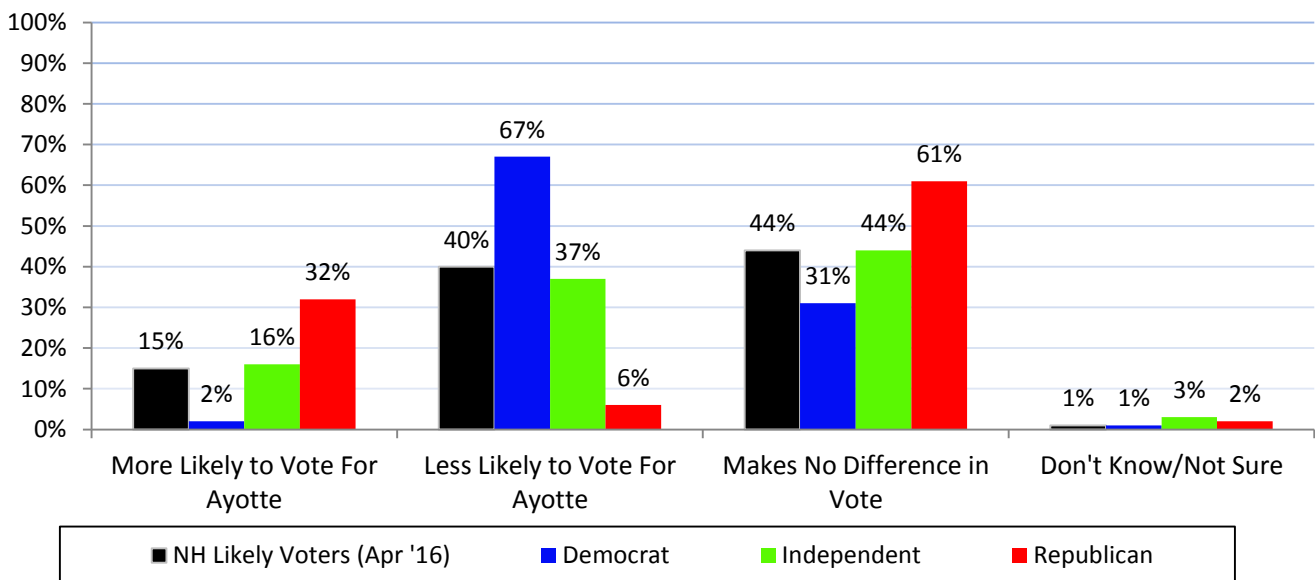

A majority (60%) of New Hampshire likely voters believe that the Senate should hold a hearing and vote on Garland, 34% believe the Senate should wait for the next president to confirm the next justice and 6% are unsure. There is a significant partisan split on this issue as most Democrats (85%) and a slight majority of independents (55%) believe there should be a vote on Garland's appointment, while 65% of Republicans believe the Senate should wait for the next president.

What Should Senate Do About Supreme Court Appointment?

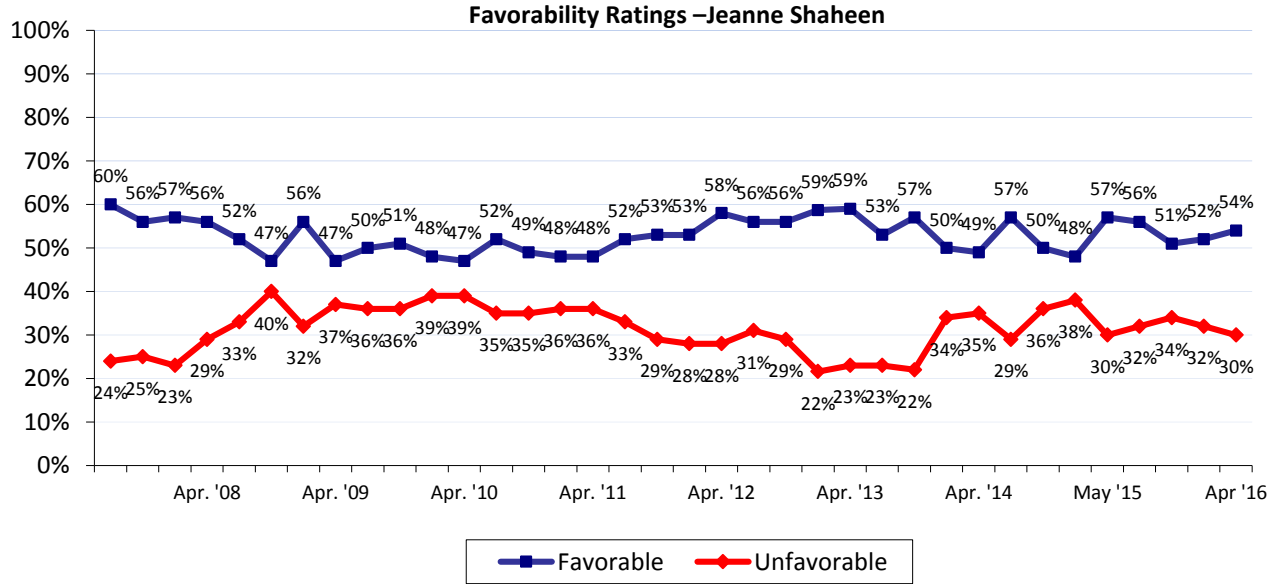

When likely voters were asked about the impact that Ayotte's position on the Supreme Court appointment will have on their vote, 15% say they are more likely to vote for her, 40% are less likely, and 44% say it makes little difference. Among those voters who say they will vote for Ayotte, 32% say that her position on the Garland nomination makes them more likely to vote for her, 10% are less likely and 57% say it makes little difference in their vote. Among voters who support Hassan, 1% are more likely to vote for Ayotte, 74% are less likely and 24% say it makes no difference in their vote. Among voters who don't support either or are undecided, 5% are more likely to vote for Ayotte because of her position on the Garland nomination, 37% are less likely to vote for her and 54% say it makes no difference in their vote.

Effect of Ayotte's Position on Supreme Court Appointment on US Senate Vote

Favorability Ratings – Senator Jeanne Shaheen

Senior senator Jeanne Shaheen remains popular in the Granite State. Currently, 54% of New Hampshire adults say they have a favorable opinion of Shaheen, 30% have an unfavorable opinion of her, 7% are neutral and 9% don't know enough about her to say. Shaheen's net favorability rating, is +24%, up from +20% in October. Shaheen is very popular among Democrats (net +75%), somewhat popular among independents (+13%) and very unpopular among Republicans (-38%).

Granite State Poll Methodology

These findings are based on the latest WMUR Granite State Poll, conducted by the University of New Hampshire Survey Center and funded by WMUR-TV, Manchester, NH. Six hundred and twenty-one (621) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between April 7 and April 17, 2016. If a household included more than one adult, the adult who had the most recent birthday was selected to be interviewed.

The margin of sampling error is +/- 3.9 percent for the entire sample. Included were five hundred fifty-three (553) likely 2016 general election voters (MSE +/- 4.2%). These MSE's have not been adjusted for design effect. The design effect for the survey is 1.1%.

The random sample used in the WMUR Granite State Poll was purchased from Marketing Systems Group (MSG), Horsham, PA. MSG screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the Granite State Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
