DURHAM, NH – Misuse of drugs continues to grow as the most important problem facing New Hampshire. Incumbent Governor Maggie Hassan is leaving the corner office with a majority of Granite Staters approving of the job she is doing as Governor. The candidates seeking to replace her are not very well known among New Hampshire residents.

These findings are based on the latest **WMUR Granite State Poll**,* conducted by the University of New Hampshire Survey Center. Six hundred and twenty-one (621) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between April 7 and April 17, 2016. The margin of sampling error for the survey is +/- 3.9 percent. Included were five hundred and fifty-three (553) likely 2016 general election voters (MSE = +/- 4.2%).

Most Important Problem Facing New Hampshire

Over the past year, Granite Staters have become increasingly concerned about the drug crisis in the state -- currently, 44% of New Hampshire adults cite drug abuse as the most important problem facing the state, followed by jobs and the economy (18%), education (5%), health care (4%), taxes (3%) and the state budget (2%). The percentage of Granite Staters cited drug abuse as the most important problem has shot up 35% in the past year.
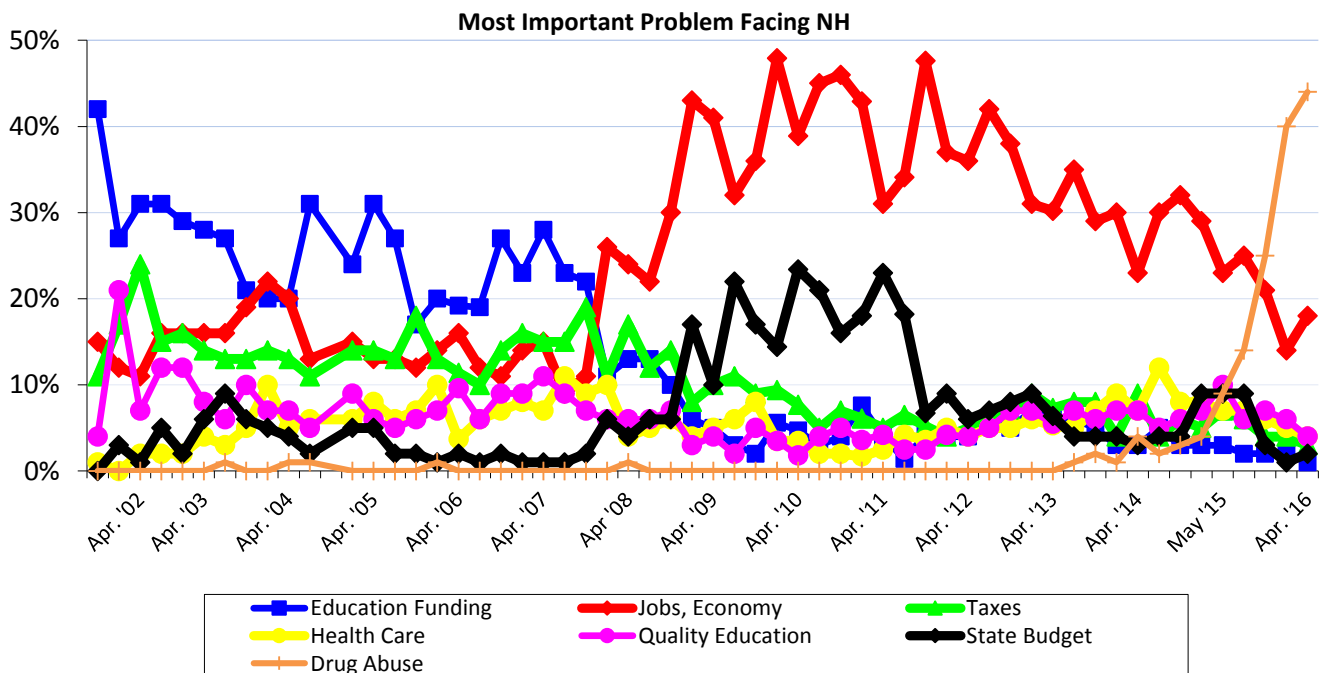

Most Important Problem Facing NH

Gubernatorial Approval

Democratic governor Maggie Hassan, who is running for U.S. Senate and will not run for a third term, continues to be popular in the state. In the most recent Granite State Poll, 52% of Granite Staters say they approve of the job Hassan is doing as governor, 33% disapprove, and 15% are neutral or don't know enough to say. Democrats (72% approve, 16% disapprove) approve of Hassan's job performance, while Independents are divided (41% approve, 39% disapprove) and Republicans disapprove (32% approve, 53% disapprove).

Job Approval Ratings – NH Governor Maggie Hassan
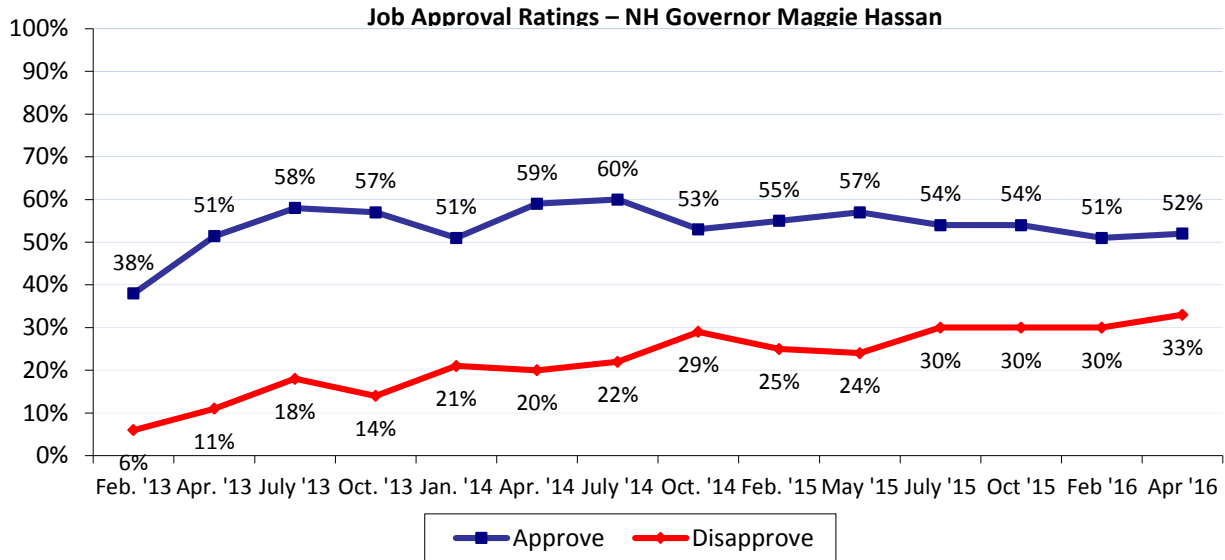

Favorability Ratings – Potential Republican NH Governor Candidates

The race to replace Hassan as Governor of New Hampshire is wide open but the potential candidates are all relatively unknown to New Hampshire residents. The best known of these candidates is Republican Executive Councilor Chris Sununu of Newfields; son of former governor John H. Sununu and the brother of former senator John E. Sununu. Currently 28% of New Hampshire adults have a favorable opinion of Sununu, 19% have an unfavorable opinion, 12% are neutral and 40% don't know enough about him to have an opinion (including 34% in the 3rd district which he represents). Sununu's net favorability (the percentage having a favorable opinion minus the percentage having an unfavorable opinion) is +9%.

Favorability Ratings - Chris Sununu
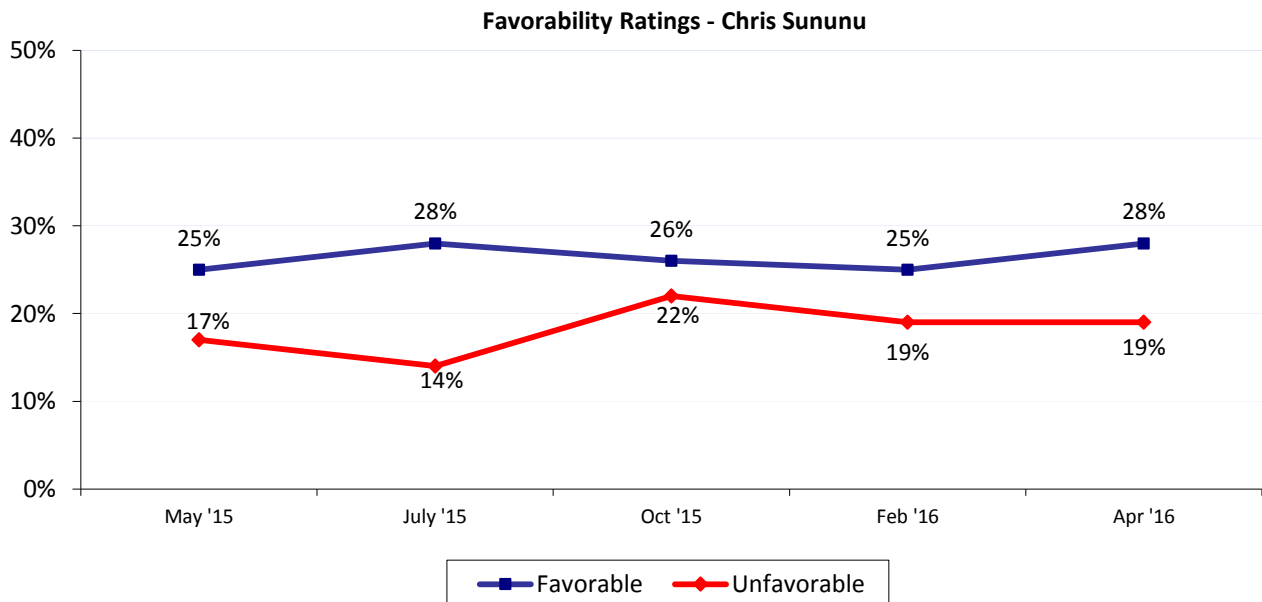

Ted Gatsas, who is serving his fourth term as mayor of Manchester and is a former president of the New Hampshire Senate, has also announced a run for Governor. Despite being mayor of New Hampshire's largest city, Gatsas is relatively unknown to the state – 28% of state residents have a favorable opinion of Gatsas, 14% have an unfavorable opinion, 8% are neutral and 50% don't know enough about him to have an opinion. Gatsas' net favorability rating is +14%, which is up from +5% in February.

Favorability Ratings - Ted Gatsas
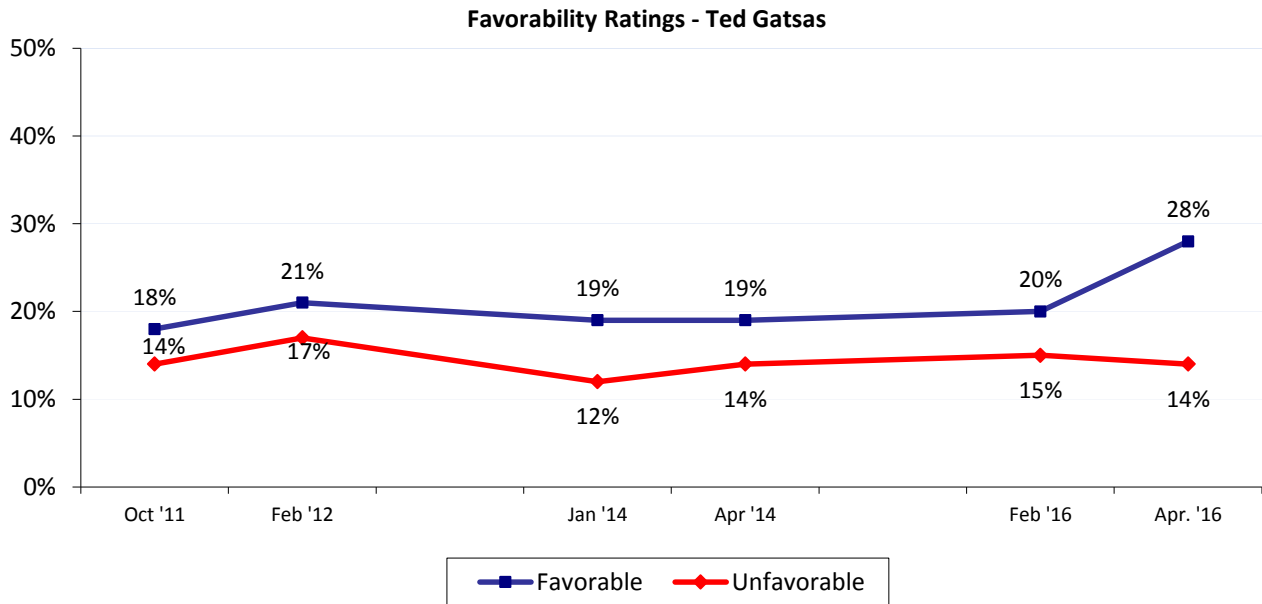

State senator Jeanie Forrester (R-Meredith) has also recently announced a run. Currently 11% have a favorable opinion of Forrester, 5% have an unfavorable opinion, 10% are neutral, and 74% don't know enough about her to have an opinion. Forrester's net favorability rating is +6%.

Favorability Ratings - Jeanie Forrester
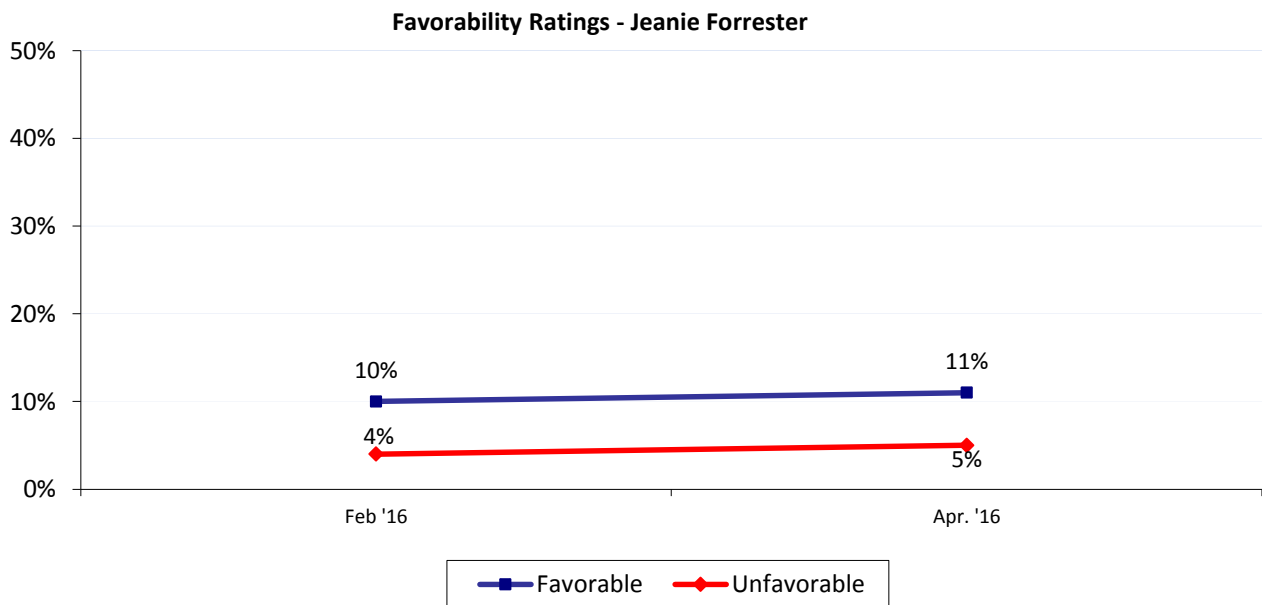

Rounding out the Republican candidates is first-term state representative Frank Edelblut of Wilton. Currently 3% have a favorable opinion of Edelblut, 3% have an unfavorable opinion, 8% are neutral and 86% don't know enough about him to say. Edelblut's net favorability is 0%.

Favorability Ratings - Frank Edelblut
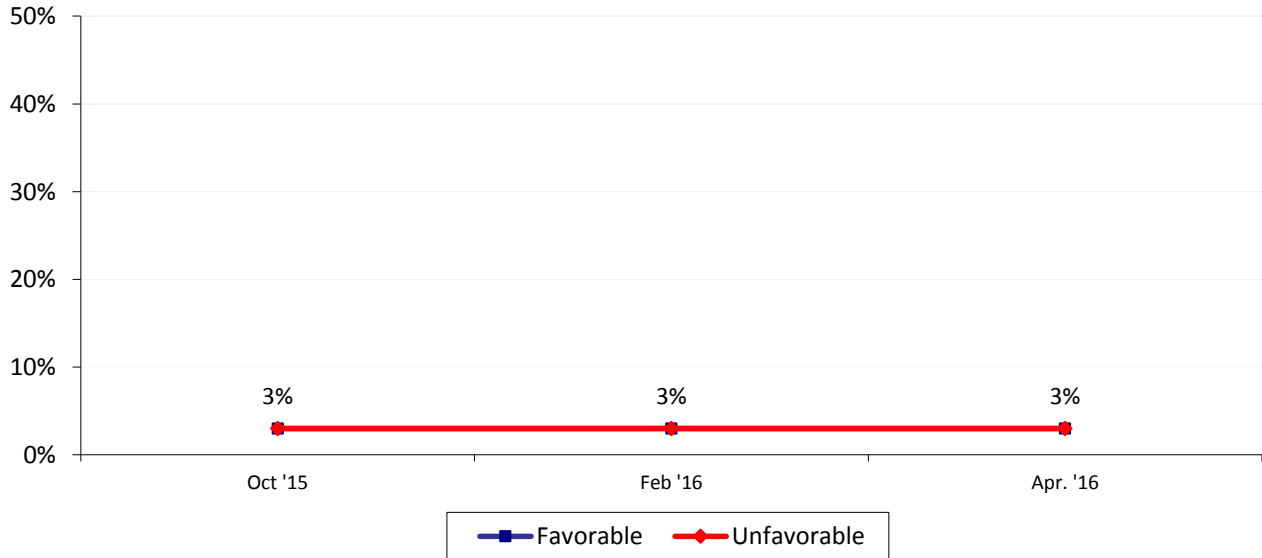

Favorability Ratings – Potential Democratic NH Governor Candidates

Currently, three Democrats are vying for the Democratic nomination for Governor, none of whom are well known in the Granite State. Currently 12% of New Hampshire adults have a favorable opinion of former director of the New Hampshire Bureau of Securities Regulation Mark Connolly (D-New Castle), 3% have an unfavorable opinion, 9% are neutral and 75% don't know enough about him to have an opinion. Connolly's net favorability is +9%.

Favorability Ratings - Mark Connolly
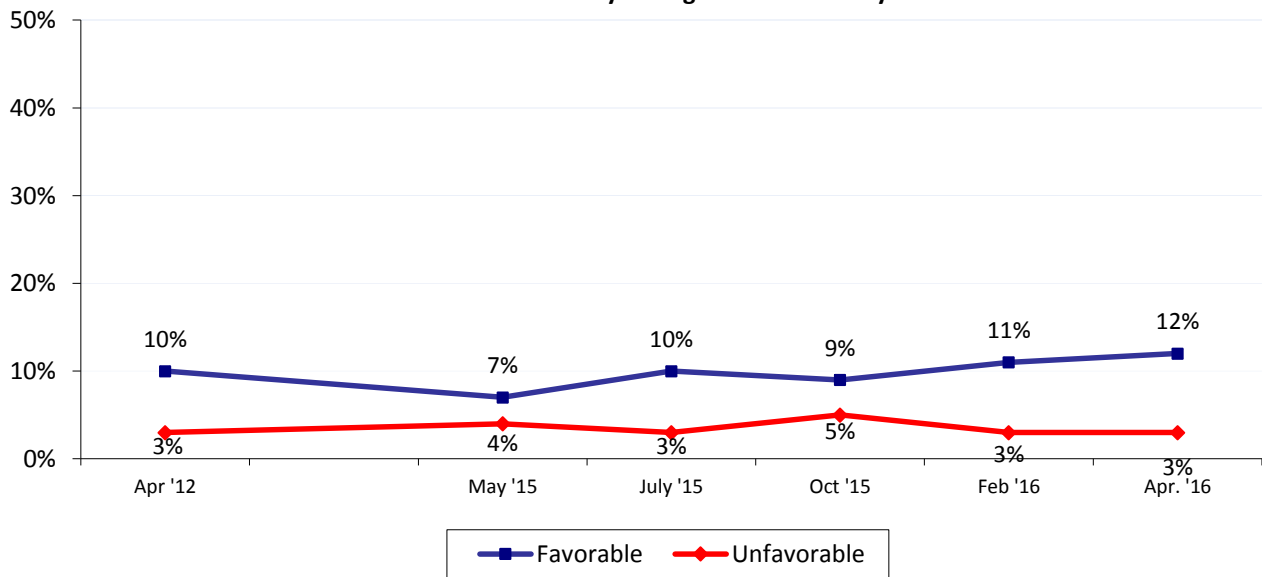

Colin Van Ostern currently represents the 2nd Executive Council district. Currently 10% of New Hampshire adults have a favorable opinion of Van Ostern, 3% have an unfavorable opinion of him, 8% are neutral and 79% don't know enough about him to have an opinion (including 72% in the 2nd Executive Council district). Van Ostern's net favorability is +7%.

Favorability Ratings - Colin Van Ostern
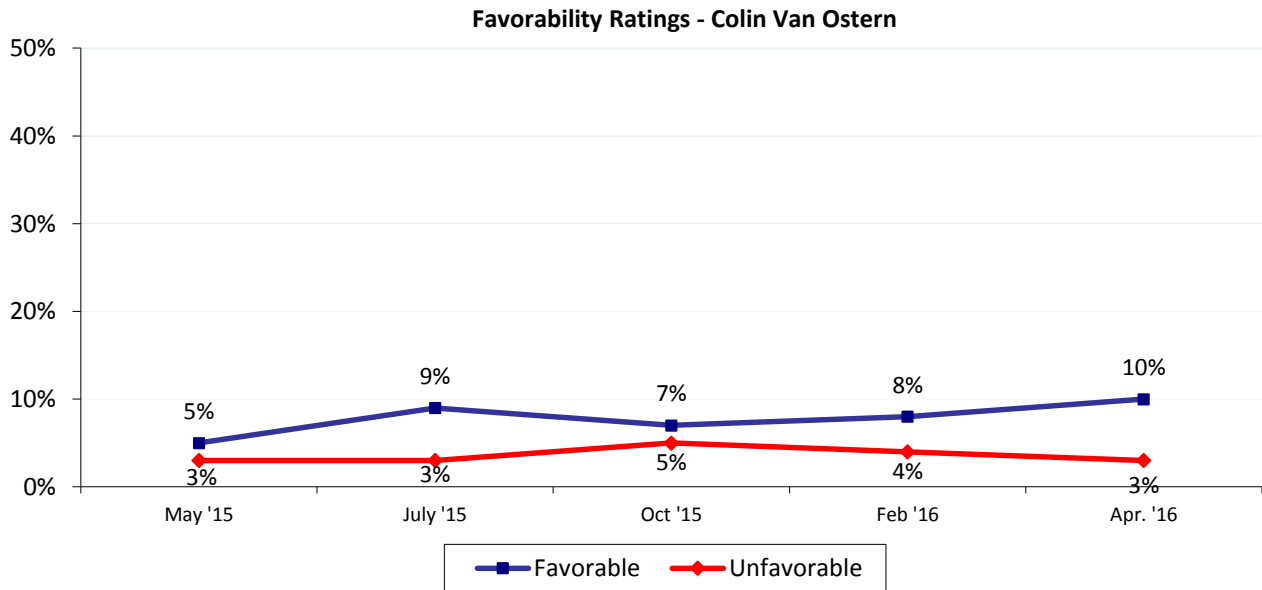

The final candidate on the Democratic side is former Portsmouth Mayor Steve Marchand. Currently 6% of New Hampshire adults have a favorable opinion of Marchand, 4% have an unfavorable opinion of him, 9% are neutral and 82% don't know enough about him to have an opinion. Marchand's net favorability is +2%.

Favorability Ratings - Steve Marchand
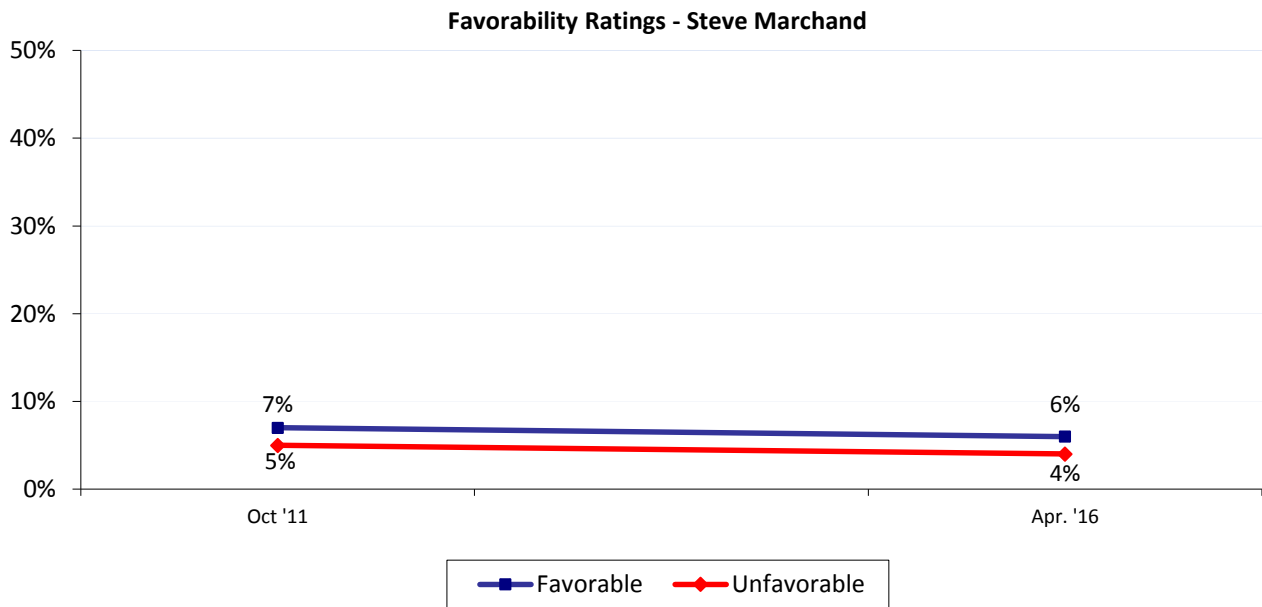

Approval of New Hampshire Legislature

New Hampshire residents are divided on how the state legislature is doing. Currently, 43% of New Hampshire adults approve of how the State Legislature is doing its job, 37% disapprove, and 21% are neutral or don't know enough to say. This division is present among Republicans (43% approve, 35% disapprove), Independents (40% approve, 36% disapprove), and Democrats (43% approve, 38% disapprove).

Approval Rating – NH Legislature
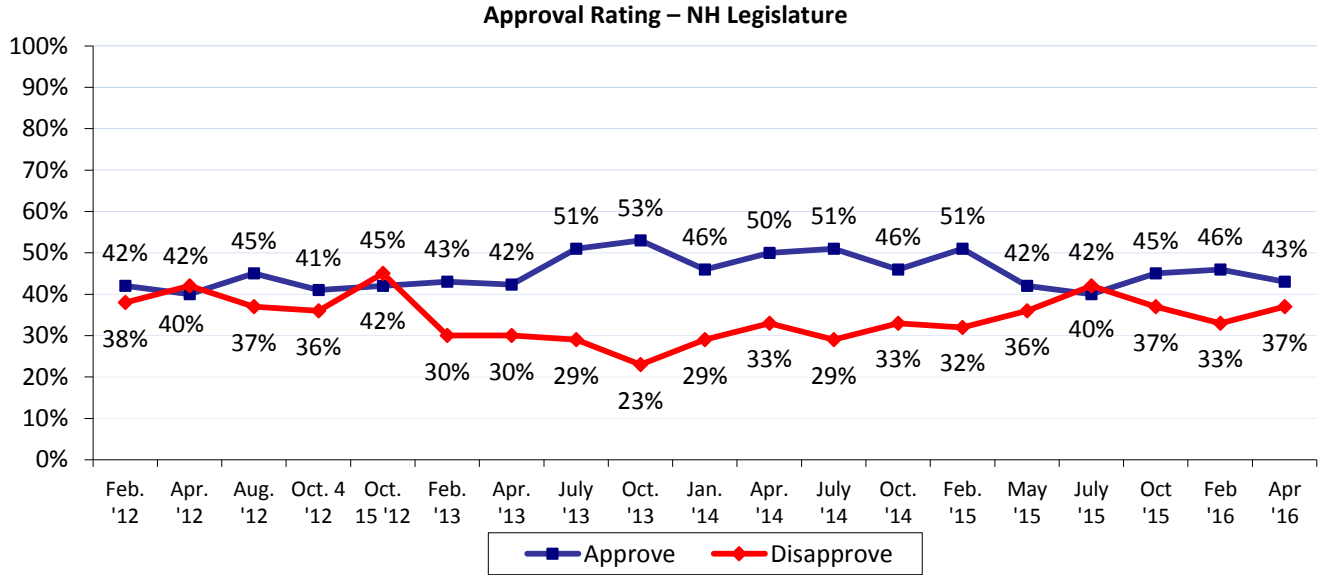

Right Direction or Wrong Track?

New Hampshire residents continue to think the state, as a whole, is headed in the right direction. Currently, 65% of New Hampshire adults feel the state is heading in the right direction, 25% think the state is seriously off on the wrong track, and 10% are unsure. Majorities of Democrats (78%), Independents (58%), and Republicans (52%) say the state is headed in the right direction.

NH Heading in Right Direction or On Wrong Track?
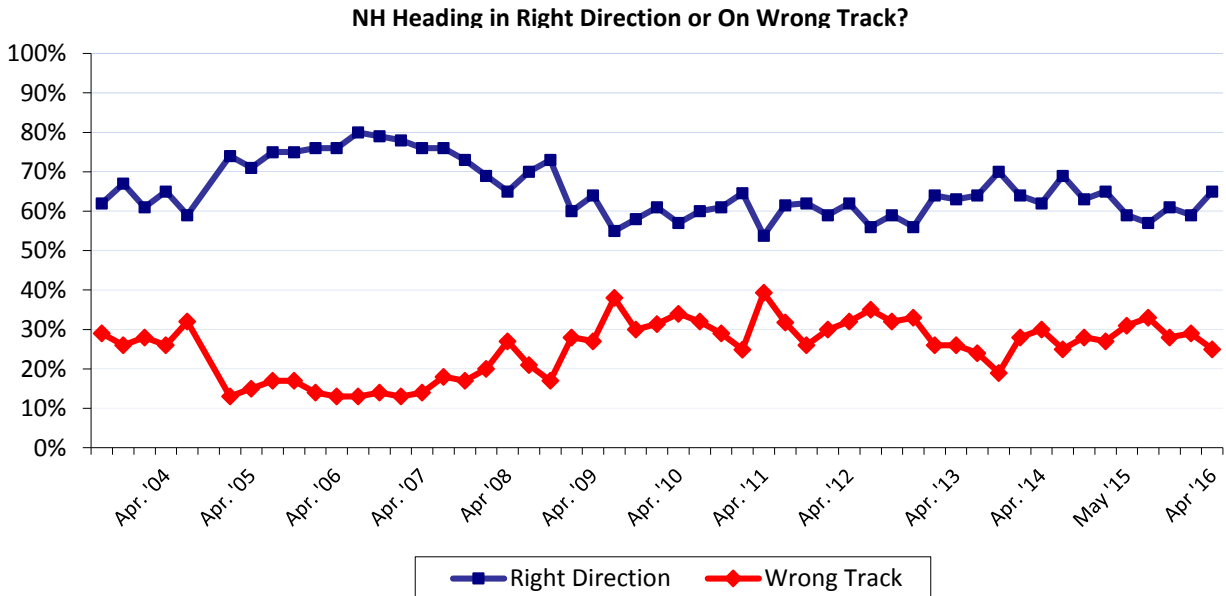

Knowledge of Bobcat Proposal

One controversial issue that recently came before the legislature was a proposal to issue 50 permits to hunt or trap bobcats in the state. Ultimately, the Fish and Game Department decided to withdraw the proposal after facing considerable public opposition. Despite the publicity surrounding the issue – most Granite Staters did not know much about it. Only 13% said they knew a great deal about the proposal, 26% knew a fair amount, 31% knew only a little and 30% knew nothing at all.

How Much Have You Seen or Heard About Bobcat Proposal?
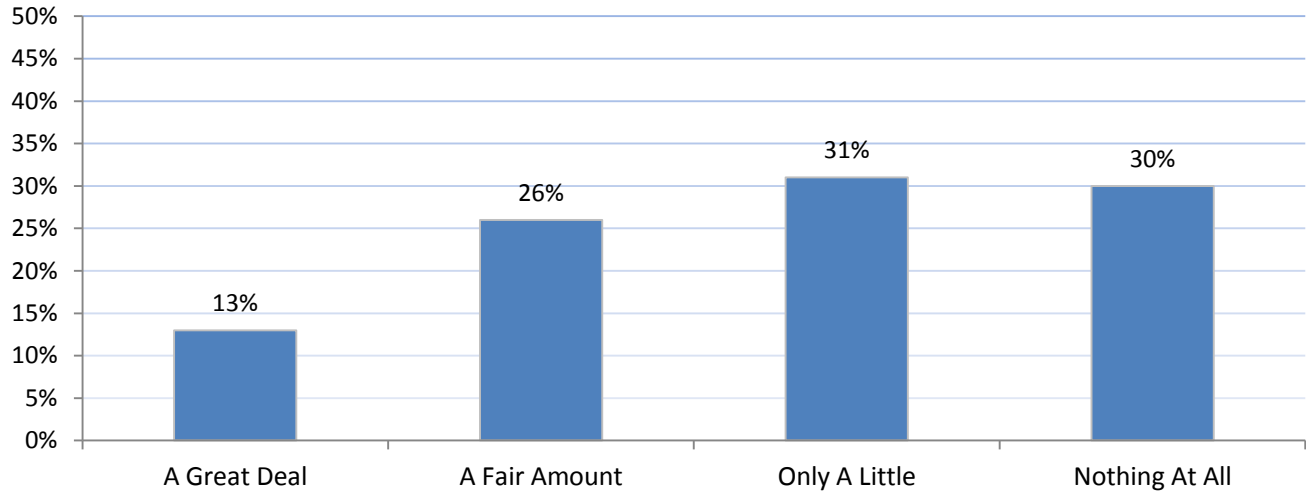

Favor/Oppose Bobcat Proposal

Due to the lack of knowledge about the issue, it not surprising that a plurality (44%) of Granite Staters are neutral (7%) or don't know enough to have an opinion about the bobcat proposal (37%). Only 19% favor the proposal (8% strongly and 11% somewhat) and 36% oppose the proposal (27% strongly and 9% somewhat). Democrats (12% favor, 43% oppose) and Independents (19% favor, 36% oppose) are more likely to oppose the proposal while Republicans (30% favor, 27% oppose) were divided.

Favor/Oppose Bobcat Proposal
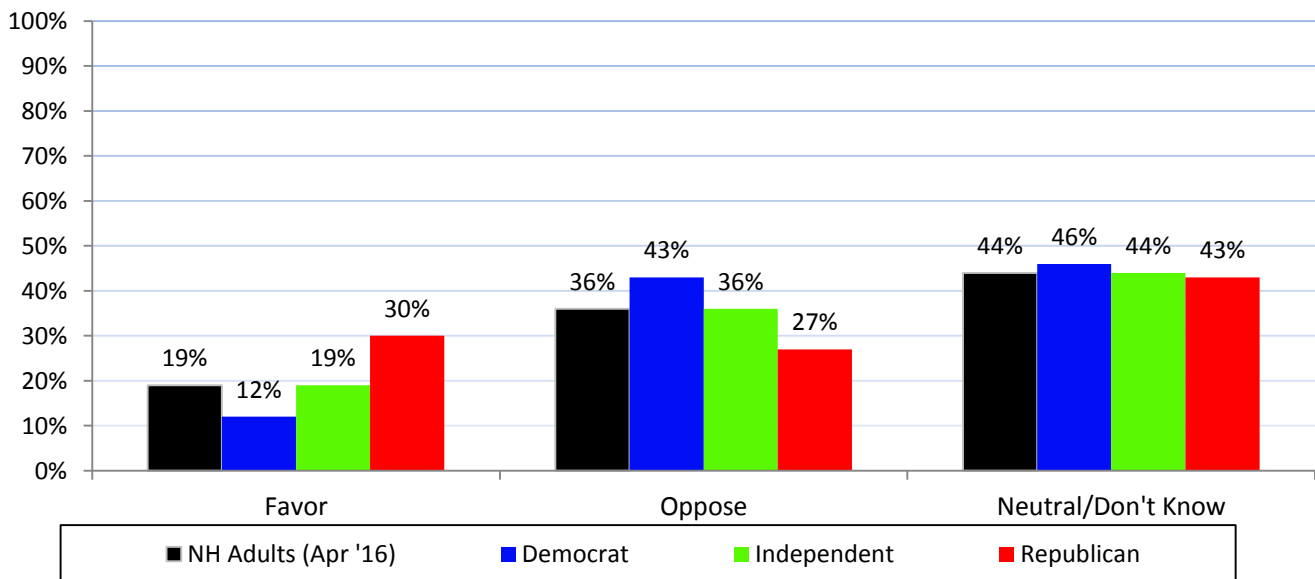

Granite State Poll Methodology

These findings are based on the latest WMUR Granite State Poll, conducted by the University of New Hampshire Survey Center and funded by WMUR-TV, Manchester, NH. Six hundred and twenty-one (621) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between April 7 and April 17, 2016. If a household included more than one adult, the adult who had the most recent birthday was selected to be interviewed.

The margin of sampling error is +/- 3.9 percent for the entire sample. Included were five hundred fifty-three (553) likely 2016 general election voters (MSE +/- 4.2%). These MSE's have not been adjusted for design effect. The design effect for the survey is 1.1%.

The random sample used in the WMUR Granite State Poll was purchased from Marketing Systems Group (MSG), Horsham, PA. MSG screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the Granite State Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
