COURTESY TOWN MEETING

Convened 7:30 P. M., August 9, 1952.

Moderator: Randolph H. Milligan.

Attendance: 91 present.

The majority of the suggestions offered were for better roads.

The Rev. Franklin J. Knotts offered a resolution of sympathy on the illness of Selectman John H. Gillingham, which was unaimously adopted.

It was a very lively meeting, a true expression of democracy at work.

Meeting adjourned 9:15 P. M.

A detailed account of this meeting was published in "The Boston Daily Globe" Monday, August 11, 1952.

TEAM WORK WILL DO THE JOB

Team work has won victories from time immemorial—for families, towns, cities, states and nations. Team work is the highest form and most democratic example of cooperation. Without team work, America and Americans would never have achieved the greatness that is theirs. We are all aware of its power and appeal. It is no less heeded to than in the past.

Team work among those who live, work and recreate in and near the woodlands, is vital, There never was a time when our woodlands as a whole were in such precarious condition as they are now.

Since the hurricane, nearly 900,000 acres of slash have been added to our already sizeable slash problem. If we are to avoid unnecessary trouble with fire in our woodland areas everyone must cooperate—we must have team work. The remedy is simple—

YOU and YOU and YOU and YOU

MUST secure the required permit from your local forest fire warden before burning.

MUST use necessary precautions while burning or smoking in or near woodlands.

MUST not throw lighted cigars, cigarettes and matches from vehicles moving along highway.

Otherwise YOU might well contribute to a costly and damaging fire. And don't forget that fire might destroy your own property!

REMEMBER—Only YOU and YOU and YOU can prevent fire!

TEAM WORK WILL DO THE JOB!

During the past year, several people in Newbury have raised the question of the possibility of combining the two schools in Newbury so we could have the children all under one roof. Each person that I have talked with has had the same general idea but would go about it in a different way. Which way, if any,

would be up to the people of the District to decide. Certainly, there are many advantages in having all the pupils together in one building. If there is enough interest in Newbury for providing better housing for the children, I think that there is a definite line of action which should be taken. It has been successful in two other Districts in the Union, and a third is preparing to come into this March meeting with a definite proposal for a new school.

School construction is expensive and there is no evidence that costs of construction are going down. Because of the high costs, school buildings have to last a long time and will have to meet educational needs over the life time of the building. If careful consideration is not given to these educational needs, the District may find, after a few years, that they have invested their money in something they do not want and will have a building on their hands which to dispose of will be very difficult.

The large majority of school districts that feel that they need a better building for their children, set-up a Building Committee to aid the School Board in making a study of the educational needs of the Community to act in an advisory capacity to the School Board. Membership in this Committee is usually made of selectmen, citizens, teachers and, recently, school children have been added to the Committee. Surprisingly enough, school children, very often, have good suggestions.

After a careful study by the Building Committee, they may reach any one of three conclusions. First, that the present facilities are adequate and no new construction is necessary. Second, they may feel that an addition might be made to one of the present buildings. Third, they may decide that neither of the buildings can be utilized and a new building should be constructed.

In the event that the Committee feels that some sort of change should be made, they should consult an architect who is experienced in school construction. He will draw up sketches of various plans and will be able to get fairly accurate estimates of what the costs will be. Then the program should be presented to the people of the District for their judgement.

The two most important things to be done whenever a District considers new construction are:

1. Careful study of the whole educational program so that we know what we want this year, ten years from now and twenty years from now.
2. That every one in the District is fully informed by the Committee about the plans before School Meeting so

they will be able to vote intelligently on the project.

I have enjoyed working with the School Board and Teachers of Newbury. They are doing a fine piece of work and are getting results.

WILLIAM C. STERLING,
Superintendent of Schools.
