

**The CNN /WMUR
New Hampshire Primary Poll**

**University of
New Hampshire**

Interviews with 837 adults in New Hampshire were conducted by land line and cellular telephone before the Iowa Caucuses (January 29-February 1, 2016) and 556 adults since the Iowa caucuses (February 2-February 4, 2016 at 3PM).

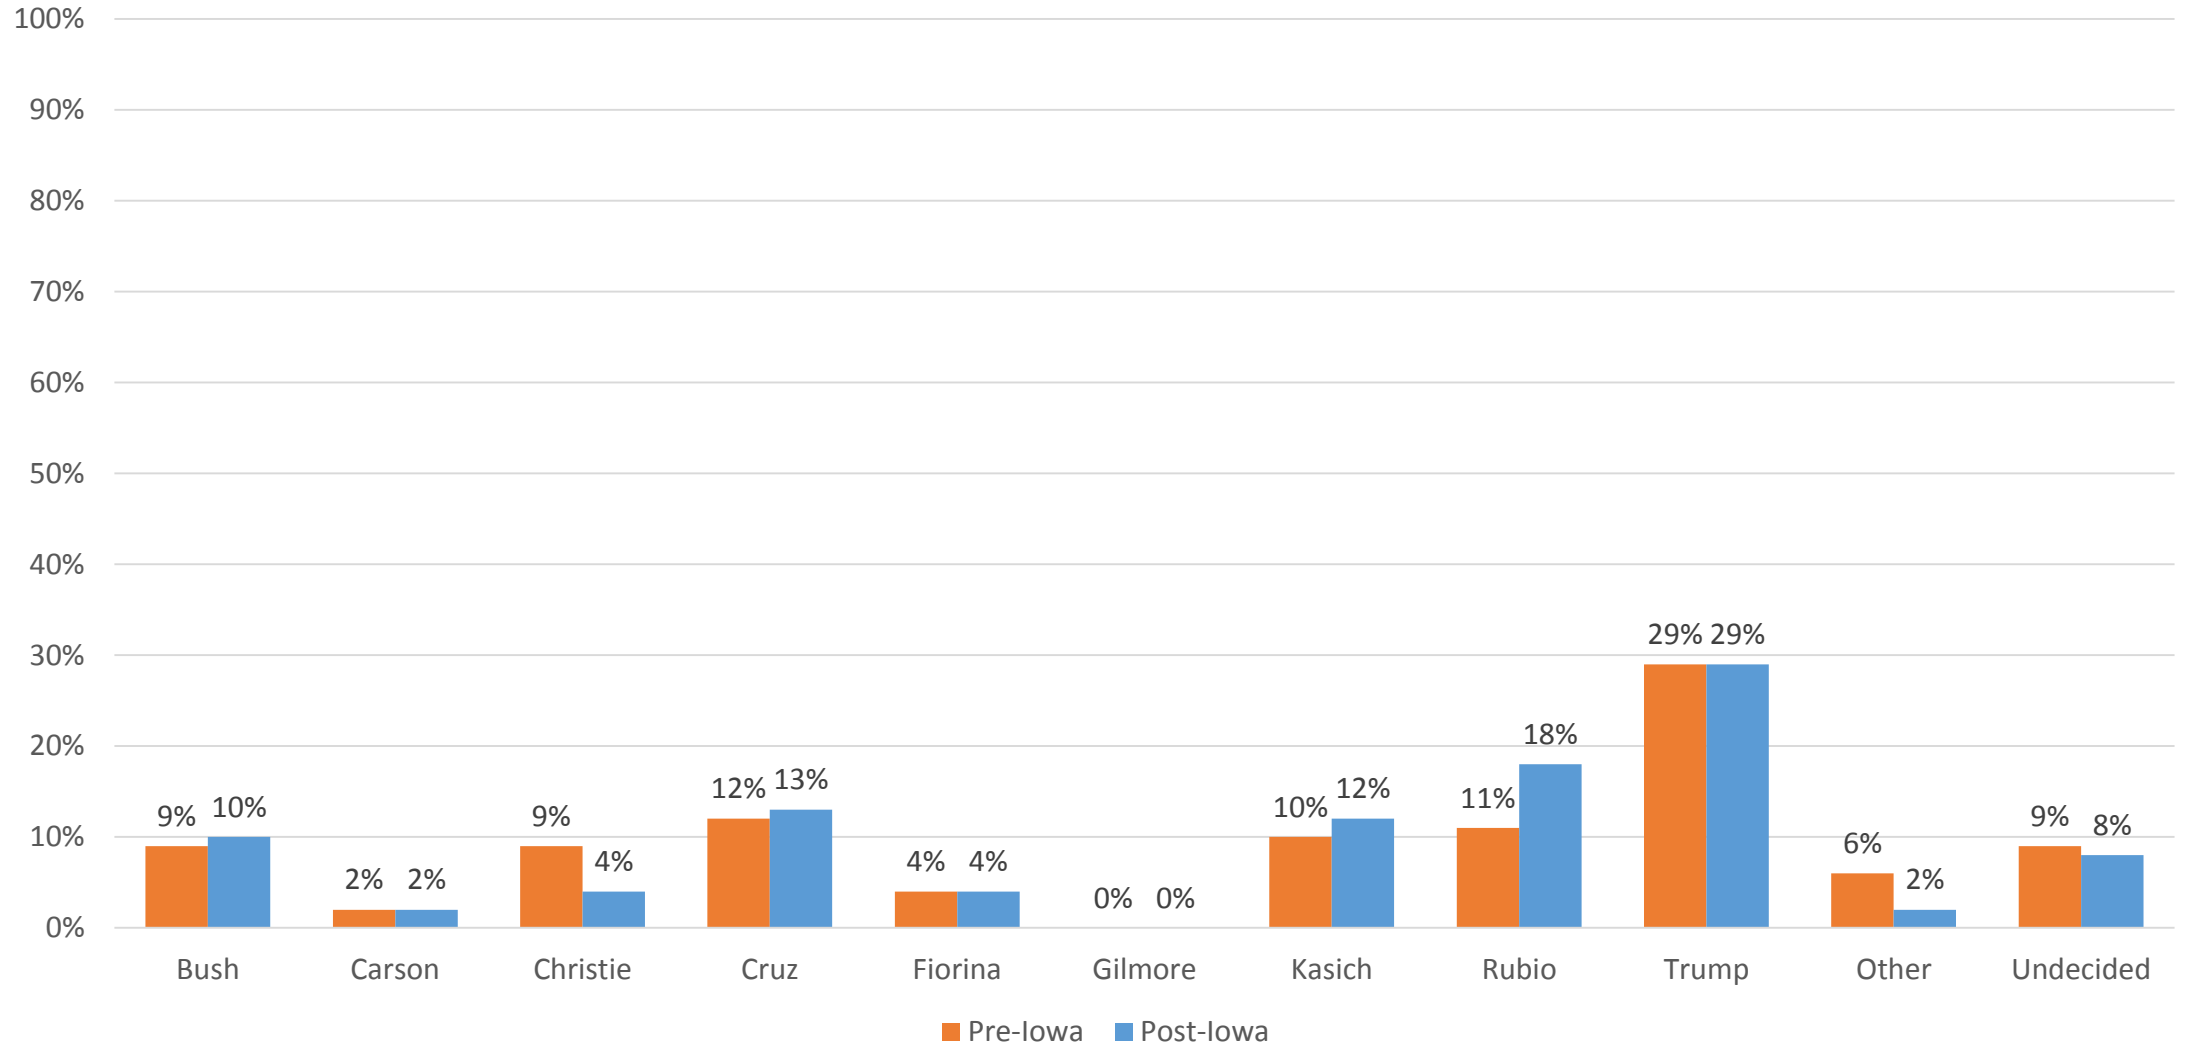

The pre-caucus sample includes 362 respondents who say they plan to vote in the Republican presidential primary and 333 respondents who say they plan to vote in the Democratic presidential primary. The margin of sampling error for results based on Republican primary voters is plus or minus 5.2 percentage points and for results based on Democratic primary voters is plus or minus 5.4 percentage points.

The post-caucus sample includes 209 respondents who say they plan to vote in the Republican presidential primary and 228 respondents who say they plan to vote in the Democratic presidential primary. The margin of sampling error for results based on Republican primary voters is plus or minus 6.8 percentage points and for results based on Democratic primary voters is plus or minus 6.5 percentage points.
